The Mantuan Jews suffered seriously at the time of the Thirty Years' war. The Jews exiled from the papal dominions had repeatedly found refuge in Mantua, where the dukes of Gonzaga had accorded protection to them, as they had done to the Jews already resident there. The next to the last duke, although a cardinal, favored them sufficiently to enact a statute for the maintenance of order in the ghetto. After the death of the last of this house the right of succession was contested at the time of the Thirty Years' war, and the city was besieged by the German soldiery of Wallenstein. After a valiant defense, in which the Jews labored at the walls until the approach of the Sabbath, the city fell into the power of the besiegers, and for three days was at the mercy of fire and sword. The commander-in-chief, Altringer, forbade the soldiers to sack the ghetto, thereby hoping to secure the spoils for himself. The Jews were ordered to leave the city, taking with them only their personal clothing and three gold ducats per capita. There were retained enough Jews to act as guides to the places where their coreligionists were supposed to have hidden their treasures. Through three Jewish zealots these circumstances came to the knowledge of the emperor, who ordered the governor, Collalto, to issue a decree permitting the Jews to return and promising them the restoration of their goods. Only about 800, however, returned, the others having died.

The victories in Europe of the Turks, who brought their armies up to the very walls of Vienna (1683), helped even in Italy to incite the Christian population against the Jews, who remained friendly to the Turks. In Padua, in 1683, the Jews were in great danger because of the agitation fomented against them by the cloth-weavers. A violent tumult broke out; the lives of the Jews were seriously menaced; and it was only with the greatest difficulty that the governor of the city succeeded in rescuing them, in obedience to a rigorous order from Venice. For several days thereafter the ghetto had to be especially guarded.

Leon of Modena.

At the end of the sixteenth and during the seventeenth century several Hebrew writers attained considerable fame. Among them was Leon of Modena, who wrote Italian and Latin verse. At Venice, where there was a population of about 6,000 Jews, he and Simon Luzzatto (Simḥah), both holding liberal views, were members of the rabbinical college. Several Jews of this epoch wrote elegant Italian prose and verse. Two women merit special mention, Deborah Ascarelli and Sarah Copia Sullam. Even more cultured and profound than Modena was his friend and disciple Joseph Solomon Delmedigo, who had a special aptitude for mathematics, and whose instructor was the great Galileo. Simon Luzzatto, in his "Discorso sullo Stato degli Ebrei," without concealing their faults, took up the defense of the Jews. Isaac Cardoso of Verona did likewise, in a work entitled "Sulla Excellenza degli Ebrei." These liberal Italian thinkers persistently combated, as did others in various parts of Europe, the spirit of the Cabala as well as some of the exaggerated practises introduced later into Judaism; for this reason their works did not meet with popularity.

Mordecai of Eisenstadt.

A strange phenomenon in the history of the Italian Jews was Mordecai of Eisenstadt, a man of commanding presence, and a disciple and partizan of Shabbethai Ẓebi. Abraham Rovigo and Benjamin Coen, rabbis of Reggio and Italian cabalists of the school of Zacuto, were captivated by him and greeted him with enthusiasm. He proposed that they should go to Rome to preach Messianic sermons. The majority considered him a madman, and feared the unlucky consequences of this foolish agitation; others declared that it would be necessary for him to become a Christian in order to achieve his purposes. The Inquisition, failing in its attempts to convert him, became suspicious; and his friends counseled him to leave Italy and to go to Bohemia.

Moses Ḥayyim Luzzatto (born at Padua in 1707; died at the age of forty) was a savant of the highest order among Italian Jews famous in science and in Hebrew poetry. He elaborated a new Zohar, which brought upon him much trouble. Finally he was persecuted, excommunicated, and forced to abandon his family and country and to become a wanderer. Isaac Lampronti compiled a monumental work of rabbinical science, the great Talmudical cyclopedia entitled "Paḥad Yiẓḥaḳ." Isaac Reggio, influenced by Mendelssohn's works, above all by his German translation of the Pentateuch, translated portions of the Bible into Italian. He was the author also of various poetical and philosophical works.

MAP OF ITALY SHOWING PLACES WHERE JEWISH COMMUNITIES HAVE EXISTED.

Among the first schools to adopt the Reform projects of Hartwig Wessely were those of Triest, Venice, and Ferrara. Under the influence of the liberal religious policy of Napoleon I., the Jews of Italy, like those of France, were emancipated. The supreme power of the popes was broken: they had no longer time to give to framing anti-Jewish enactments, and they no longer directed canonical laws against the Jews. To the Sanhedrin convened by Napoleon at Paris (1807), Italy sent four deputies: Abraham Vita da Cologna; Isaac Benzion Segre, rabbi of Vercelli; Graziadio Neppi, physician and rabbi of Cento; and Jacob Israel Karmi, rabbi of Reggio. Of the four rabbis assigned to the committee which was to draw up the answers to the twelve questions proposed to the Assembly of Notables, two, Cologna and Segre, were Italians, and were elected respectively first and second vice-presidents of the Sanhedrin. But the liberty acquired by the Jews under Napoleon was of short duration; it disappeared with his downfall. Pius VII., on regaining possession of his realms, reinstalled the Inquisition; he deprived the Jews of every liberty and confined them again in ghettos. Such became to a greater or less extent their condition in all the states into which Italy was then divided; at Rome they were again forced to listen to proselytizing sermons. But the spark of the French Revolution could not be extinguished so easily; a short time after it burst forth into a flame more brilliant and enduring. In the year 1829, consequent upon an edict of the emperor Francis I., there was opened in Padua, with the cooperation of Venice, of Verona, and of Mantua, the first Italian rabbinical college, in which Lelio della Torre and Samuel David Luzzatto taught. Luzzatto was a man of great intellect; he wrote in pure Hebrew upon philosophy, history, literature, criticism, and grammar. Many distinguished rabbis, of whom several still fill important pulpits, came from the rabbinical college of Padua. Zelman, Moses Tedeschi, and Castiglioni followed at Triest the purposes and the principles of Luzzatto's school. At the same time, Elijah Benamozegh, a man of great knowledge and the author of several works, distinguished himself in the old rabbinical school at Leghorn.

Reaction After Napoleon.

The return to medieval servitude after the Italian restoration did not last long; and the Revolution of 1848, which convulsed all Europe, brought great advantages to the Jews. Although this was followed by another reaction, yet the persecutions and the violence of past times had disappeared. The last outrage against the Jews of Italy was connected with the case of Mortara, which occurred in Bologna in 1858. In 1859 all the papal states became the united kingdom of Italy under King Victor Emanuel II.; and except in Rome, where oppression lasted until the end of the papal dominion (Sept. 20, 1870), the Jews obtained full emancipation. In behalf of their country the Jews with great ardor sacrificed life and property in the memorable campaigns of 1859, 1866, and 1870. Of the many who deserve mention in this connection may be singled out Isaac Pesaro Maurogonato. He was minister of finance to the Venetian republic during the war of 1848 against Austria, and his grateful country erected to him a memorial in bronze. There was also erected in the palace of the doges a marble bust of Samuel Romanin, a celebrated Jewish historian of Venice. Florence, too, has commemorated a modern Jewish poet, Solomon Fiorentino, by placing a marble tablet upon the house in which he was born. The secretary and faithful friend of Count Cavour was the Piedmontese Isaac Artom; while L'Olper, later rabbi of Turin, and also the friend and counselor of Mazzini, was one of the most courageous advocates of Italian independence. The names of the Jewish soldiers who died in the cause of Italian liberty were placed along with those of their Christian fellow soldiers on the monuments erected in their honor.

Modern History.

After the death of Luzzatto the rabbinical college rapidly declined; the wars and the revolutions that convulsed Italy absorbed the interest of the Jews entirely. When the Venetian province became part of Italy the college was abolished with the intention of establishing another elsewhere. Somewhat later (1887) such a college was founded at Rome, which had been made the capital of the kingdom. The rabbinical school at Leghorn continued its work. The abandonment of the Jewish college in Padua not only resulted in a loss to Jewish studies in general, but was felt throughout Italy likewise in the scarcity of able Italian rabbis. The rabbinical college at Rome was opened under the leadership of Rabbi Mortara of Mantua, Professors Ehrenreich and Sorani being among the instructors. It was not successful; and it was transferred to Florence, where it flourished under the direction of Dr. S. H. Margulies.

In 1853 the rabbis Pontremoli and Levi founded at Vercelli a monthly review, which was entitled "L'Educatore Israelita," for the discussion of vital questions of Jewish literature and history. This was published with the title "Vessillo Israelitico" at Casale Monferrato, and was under the direction of Flaminio Servi until his death (Jan. 23, 1904). About fifteen years ago another Jewish magazine, the "Corriere Israelitico," was founded by Abraham Morpurgo at Triest, where it is still published.

The small and obscure old synagogues situated in narrow streets have been replaced by magnificent and imposing temples in Milan, Turin, Modena, Florence, and even at Rome, where the community, which is the largest in Italy, and contains between 12,000 and 14,000 Jews, is now being completely reorganized. As head of this most important community Prof. Vittorio Castiglione of Triest has lately been chosen chief rabbi. In order to make a place in the service for the choir, the ritual has been shortened, while the sermons have become more general and elevated in tone. In exceptional cases Jews have become ministers of finance (Leone Wollemberg in 1901, and Luigi Luzzatti, for the fifth time, in 1903) and minister of war (Ottolenghi in 1902-3). The Italian Jews, like those of other countries, are worthily represented in all fields of human activity; and it may be added that Italy remains free from the contagion of anti-Semitism with which too many of its influential European neighbors have become inoculated.

G. V. C.

ITHAMAR (איתמר): Youngest son of Aaron by Elisheba (Ex. vi. 23). Together with his father and three brothers he was consecrated to the priesthood (*ib.* xxviii. 1; Lev. viii. 13). On the death of Nadab and Abihu, Ithamar and his elder brother, Eleazar, were ordered not to mourn for them; and he and Eleazar were appointed successors of Aaron in the priesthood (Lev. x. 6-15; Num. iii. 4). During the wanderings of the Israelites in the wilderness, Ithamar was the superintendent of the Gershonites and Merarites, who were in charge of the Tabernacle and its equipment, and he directed the service of the Levites (Ex. xxxviii. 21; Num. iv. 21-33). The high-priesthood passed over into the family of Ithamar through Eli, and from him descended in regular succession until Abiathar was deprived of it by Solomon; the high-priesthood then reverted to the family of Eleazar (I Kings ii. 27, 35). In the reign of David, as the descendants of Eleazar were more numerous than those of Ithamar, the latter were appointed for the monthly services in the proportion of one to two of the former (I Chron. xxiv. 3, 4).

ITINERANT TEACHERS. See Baḥur.

ITUREA (Ἰτουραία): Greek name of a province, derived from the Biblical "Jetur," name of a son of Ishmael (comp. Gen. xxv. 15, 16). The name of the province is mentioned only once (Luke iii. 1), while in historical sources the name of the people, the Itureans (Ἰτουραῖοι, Ἰτυραῖοι), occurs. The latter are first mentioned by Eupolemus—as one of the tribes conquered by David (Eusebius, "Præparatio Evangelica, " ix. 30)—and subsequently by Strabo, Pliny, Josephus, and others, some of whom designate the Itureans as Arabs and others as Syrians. They were known to the Romans as a predatory people (Cicero, "Philippics," ii. 112), and were appreciated by them for their great skill in archery (Cæsar, "Bellum Africanum," 20).

The Itureans did not always possess the same land; as a nomadic people they roamed through the country, and when dispossessed of one place settled in another. Thus, according to I Chron. (v. 19-22), the people of Jetur, the Itureans of the Greeks, fell with the Hagarites into the hands of the children of Reuben, Gad, and the half-tribe of Manasseh, who occupied their country. Later, in the time of the Roman conquest, they dwelt in the region of Mount Lebanon.

Many Christian theologians, among them Eusebius ("Onomasticon," ed. Lagarde, pp. 268, 298), taking into consideration the above-cited passage of Luke, place Iturea near Trachonitis; but this seems contrary to all the historical sources. According to Josephus ("Ant." xiii. 11, § 3), the Iturean kingdom lay north of Galilee, and in 105 B.C. Aristobulus, having defeated the Itureans, annexed a part of their country to Judea, imposing Judaism upon the inhabitants. Strabo (xvi. 2, § 10, p. 753) includes the land of the Itureans in the kingdom of Ptolemy, son of Mennæus, whose residence was at Chalcis and who reigned 85-40 B.C. Ptolemy was succeeded by his son Lysanias, called by Dio Cassius (xlix. 32) "king of the Itureans." About 23 B.C. Iturea with the adjacent provinces fell into the hands of a chief named Zenodorus (Josephus, *l.c.* xv. 10, § 1; *idem*, "B. J." i. 20, § 4). Three years later, at the death of Zenodorus, Augustus gave Iturea to Herod the Great, who in turn bequeathed it to his son Philip (Josephus, "Ant." xv. 10, § 3).

That Iturea was in the region of Mount Lebanon is confirmed by an inscription of about the year 6 C.E. ("Ephemeris Epigraphica," 1881, pp. 537-542), in which Q. Æmilius Secundus relates that he was sent by Quirinius against the Itureans in Mount Lebanon. In 38 Caligula gave Iturea to a certain Soemus, who is called by Dio Cassius (lix. 12) and by Tacitus ("Annals," xii. 23) "king of the Itureans." After the death of Soemus (49) his kingdom was incorporated into the province of Syria (Tacitus, *l.c.*). After this incorporation the Itureans furnished soldiers for the Roman army; and the designations "Ala I. Augusta Ituræorum" and "Cohors I. Augusta Ituræorum" are met with in the inscriptions ("Ephemeris Epigraphica," 1884, p. 194).

ITZE (ISAAC) OF CHERNIGOV: Russian scholar of the twelfth century, frequently consulted by his contemporaries on questions of Biblical exegesis. He is probably identical with Isaac of Russia, found in the English records of 1181. His explanation of the term "yabam," for which he finds a parallel in the Russian language, is quoted by Moses ben Isaac Nasi of London in his lexicon "Sefer ha-Shoham." Zunz, and after him Harkavy, see in this explanation evidence that the Jews living in Russia in the time of Itze of Chernigov spoke the vernacular of the country.

H. R. I. Br.

ITZIG (sometimes **Hitzig**): Wealthy German family which did much in the eighteenth century for the development of modern culture among the Jews.

Babette Itzig: Born 1749; married Salomon; her daughter Leah became the wife of Abraham Mendelssohn and was the mother of Felix Mendelssohn-Bartholdy.

Blümchen Itzig: Born 1752; married David Friedländer

Bonem Itzig: Born 1756; probably the **Julius Eduard Hitzig** whose son **Georg Heinrich Friedrich Hitzig** (born Berlin April 8, 1811; died there Oct. 11, 1881), the architect, built the Berlin Stock Exchange on the site of his grandfather Daniel Itzig's residence on the Burgstrasse (see Kayserling, "Moses Mendelssohn," p. 11, Leipsic, 1888).

P. Wi.

Daniel Itzig: German banker; head of the Jewish communities of Prussia (1764–99); born 1722; died at Berlin May 21, 1799. Itzig was a member of the wealthy banking firm of Itzig, Ephraim & Son, whose financial operations greatly assisted Frederick the Great in his wars. He was also the owner of the large lead-factories at Sorge as well as of the oil-mill at Berlin, being one of the few Jews permitted to engage in such enterprises. In 1756 Itzig was appointed "Münzjude" (mint-master) by Frederick the Great, and again in 1758, together with his partner Ephraim.

In 1797 Itzig became "Hofbankier" (court-banker) under Frederick William II. When the latter came to the throne he instituted a commission to examine into the grievances of the Jews and to suggest measures for their relief. Itzig, with his son-in-law David Friedländer, was appointed general delegate to that body. They had the courage to expose to the conference the cruel legislation of Frederick the Great and to refuse the inadequate reforms proposed (König, "Annalen der Juden im Preussischen Staate," p. 236).

The Itzigs were among those granted equal rights with Christians, and an order was issued that they should not be classified as Jews in official documents. Itzig was the first to plan the founding of a home and school for poor Jewish children at Berlin (1761), a plan which, through the endeavors of David Friedländer and of Itzig's son **Isaac Daniel Itzig,** was realized in 1778 in the establishment of the Ḥinnuk Ne'arim, the first school of its kind in Germany. At the instance of Moses Mendelssohn, Itzig, as the head of the Jewish community, interposed (April, 1782) in behalf of Wessely's "Worte der Wahrheit und des Friedens," which work had been put under the ban by Polish rabbis, and was about to receive the same treatment from Hirschel Levin, chief rabbi of Berlin.

Itzig married Miriam (daughter of Simḥah Bonem), by whom he had thirteen children.

Bibliography: Geiger, *Gesch. der Juden in Berlin*, pp. 84–85, 140-141, Berlin, 1871; Kohut, *Gesch. der Deutschen Juden*, pp. 720, 760; Graetz, *Hist.* v. 397, 413, 415–416; see also Steinschneider, *Hebr. Bibl.* iv. 72–73, for a poem dedicated to Itzig by Israel Samosc.

I. G. D.

Elias Itzig: Born 1755; father of **Julius Eduard Itzig,** "Criminalrath" and writer on criminal law, who was born in Berlin March 27, 1780; died there Nov. 26, 1849.

Henriette Itzig: Wife of Nathan Mendelssohn.

Jacob Itzig: Born 1764; his son adopted the name of "Bornheim."

Jettchen (Yetta) Itzig: Born 1767; married Mendel Oppenheim, whose sons adopted the name of "Oppenfeld."

Johannet Itzig: Born 1748; married Fliess.

Julius Eduard Hitzig: Son of the architect Georg Itzig; born in Berlin Feb. 6, 1838; medical professor at the universities of Zurich and (later) Halle; an authority on diseases of the brain.

Rachel Itzig: Born 1766; died (unmarried) 1826.

Rebecca Itzig: Born 1763; married Ephraim.

Vögelchen Itzig: Became Baroness Fanny von Arnstein, of Vienna; born in Berlin Sept. 29, 1757; died June 8, 1818.

Zaerlche Itzig: Born 1761; died May 11, 1854; married Samuel Levi.

Zipperche Itzig: Born 1760; married Bernhard, Freiherr von Eskeles.

Most of the descendants of the Itzig family are members of the Christian Church.

IVAN III., VASSILIVICH, THE GREAT: Czar of Russia 1462–1505. His attitude toward the Jews was friendly. Under his reign the Jew Skhariyah (Zechariah), who arrived in Novgorod with the suite of Prince Mikhail Olelkovich, founded a Judaizing sect to which several eminent Russians adhered; among them the priest Dionis, the archpriest Aleksei, Feodór Kuritzyn, the archimandrite Sosima, the monk Zechariya, and even Ivan's daughter-in-law, Princess Helena.

With the aid of Chozi Kokos (from "Chozi" = "a pilgrim to the Holy Land," and "Kok-Kos" = "the blue-eyed"), an influential Jew of Kaffa, Ivan concluded and maintained throughout his entire reign a very important alliance with Menghli Girei, Khan of the Crimea. The services rendered by Kokos to Ivan may partly explain the latter's favorable attitude toward the Jews. The part played by Kokos as the agent of the grand duke is shown by the instruction given by the latter to his emissary, the boyar Nikita Beklemishev, dated March, 1474 ("Sbornik Imp. Russ. Istor. Obschestva," xli. 8). In his letter Beklemishev is instructed by Ivan to transmit to Kokos his credentials to the court of the khan and the regards of the grand duke. Kokos is requested to discontinue the use of the Hebrew language in his further communications to the grand duke, and to use either Russian or Tatar instead.

Although there is no evidence of the existence of Jewish communities in Great Russia during the reign of Ivan, it seems certain that Jewish merchants from Kiev, Novgorod, and other towns were prominent in the commercial transactions of Moscow with Lithuania, the Orient, and the Crimea.

The fact that Ivan ordered the beheading (April 22, 1490) of his Jewish physician Leon should not in any way affect the estimate of his attitude toward the Jews as a whole; for Leon had boasted of his ability to heal the son of the grand duke, and he was punished for his boastfulness and for his failure to effect the promised cure. If the condition of the Jews of Moscow was changed for the worse, it was through the persistent efforts of the clergy, led by Gennadi, who saw a great menace to the Greek Church in the spread of the heresy.

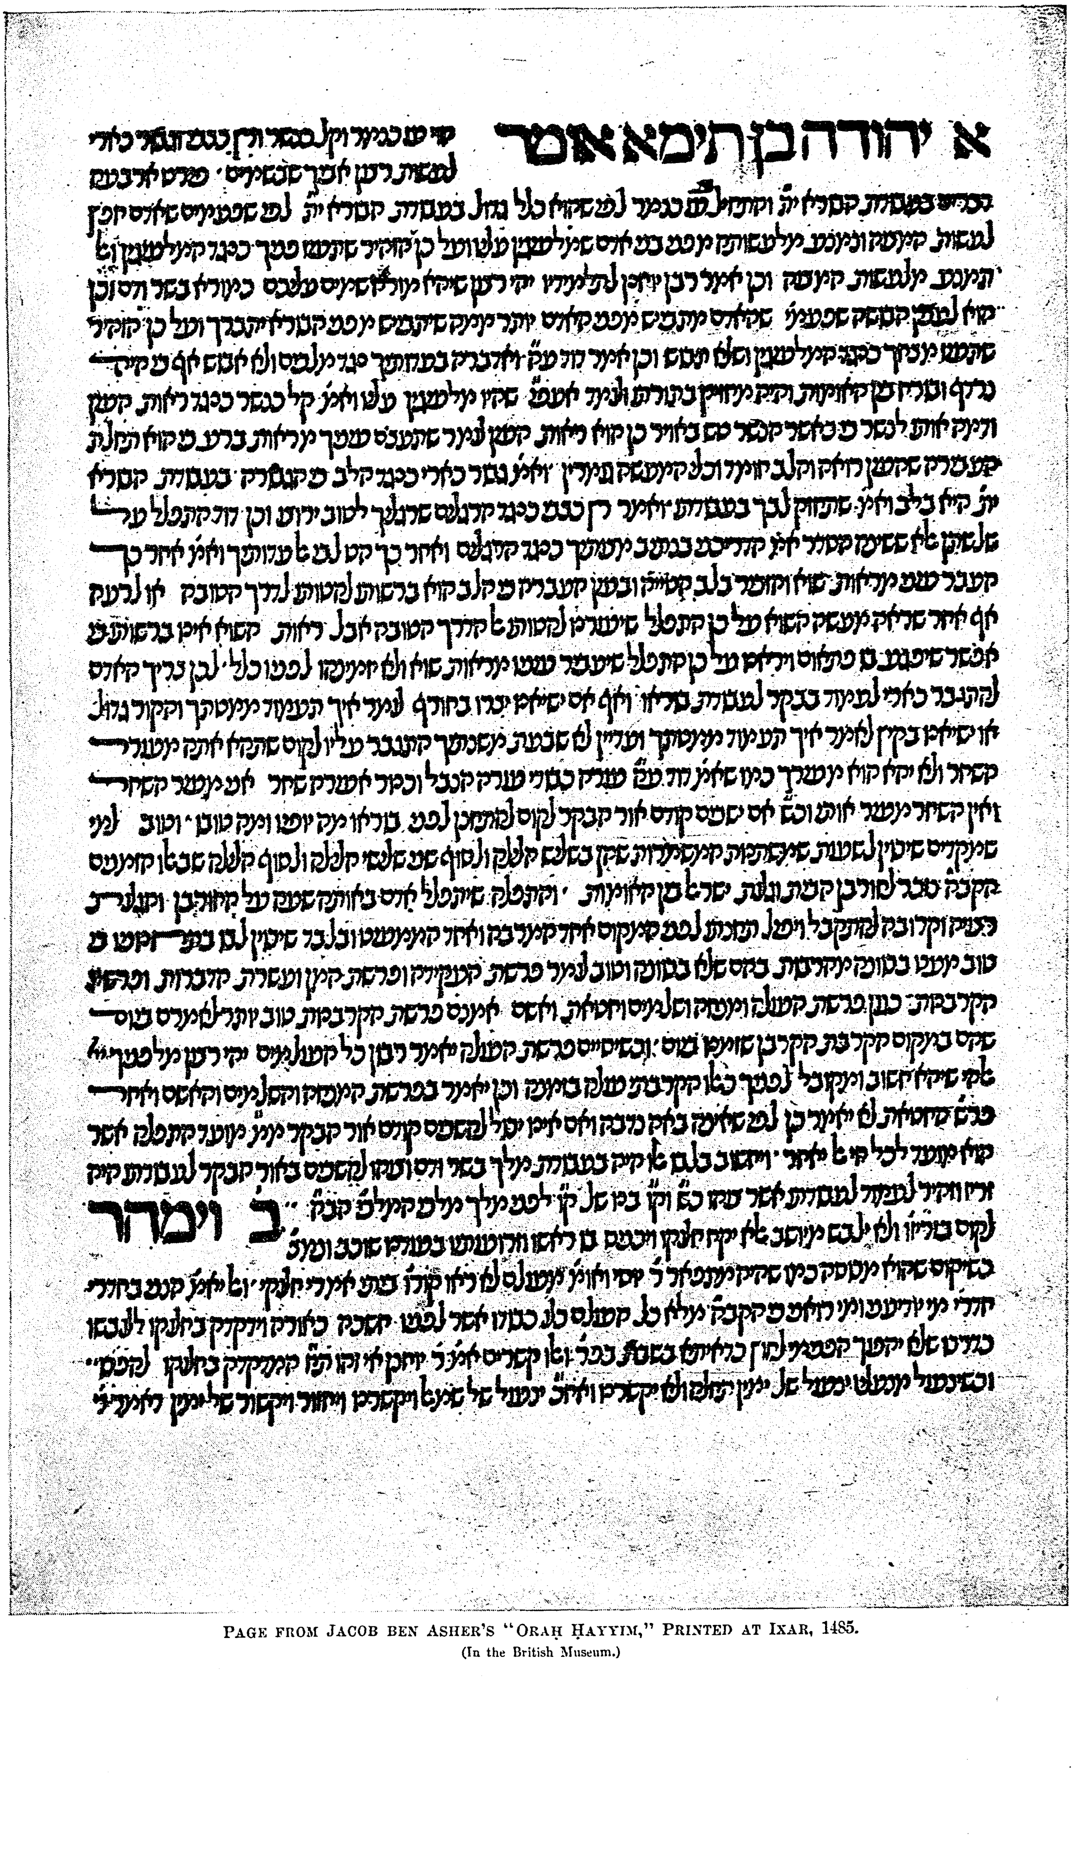
H. R.

IVAN IV., VASSILIVICH, THE TERRIBLE: Czar of Russia 1533–84. In his time the prejudice against the Jews in the Muscovite dominions was very pronounced. They were feared as



א יהודה בן תימא אומר

Page from Jacob ben Asher's "Oraḥ Ḥayyim," Printed at Ixar, 1485.

(In the British Museum.)

magicians and proselytizers. In 1545 Ivan sent a special embassy to Sigismund August, King of Poland, with reference to boundary disputes and to certain Jews of Brest whose goods had been burned in Moscow because they had brought thither some red ocher ("mumeya"), notwithstanding the prohibition to enter Muscovite territory. In 1550 Sigismund August asked Ivan the Terrible to permit the Lithuanian Jews to trade without hindrance throughout Russia, on the strength of old agreements permitting Polish merchants to trade in Lithuania. The czar firmly refused to comply with his request.

When the Russian army occupied the flourishing Polish city of Polotzk, which at that time (1563) had a prosperous Jewish community, the czar ordered that all the local Jews be converted to the Greek Orthodox faith; and those who resisted were either drowned in the Düna or burned at the stake.

H. R.

IVISA or **IVI[illegible].** See BALEARIC ISLANDS.

IVORY: The Hebrew word for ivory, *i.e.*, "shen" (="tooth"), shows that the Israelites knew what ivory was. The other term used to denote ivory, "shenhabbim" (I Kings x. 22; II Chron. ix. 21), is usually explained as a compound of "shen" and the Egyptian "ab," "ebu" (elephant). Other suggested derivations, from the Indian or Assyrian, are improbable, though the question can not be decided with certainty. In ancient times ivory was always a very costly article. In the East it was commonly used for inlaid work. It is related of Ahab (I Kings xxii. 39) that he built for himself an "ivory house," or palace, the halls and chambers of which were enriched with inlaid ivory. With this should be compared Homer's description of Menelaus' palace ("Odyssey," iv. 63). The Assyrians had similar palaces. Ps. xlv. 9 (A. V. 8) and Amos iii. 15 also speak of palaces, or houses, of ivory. As the latter passage indicates, the luxury of the court was still imitated by the great of the land at the time of Amos. Whether or not it may be concluded, from the "ivory tower" in Cant. vii. 4, that the exterior of such palaces, or the exterior of one special tower, was inlaid with ivory is doubtful.

Ezek. xxvii. 6 mentions the rich ivory ornamentation (of the deck ?) of Phenician ships. Inlaid work was popular also for furniture. Amos (vi. 4) condemns the newly introduced luxury of couches inlaid with ivory. Ivory couches and chairs are included in the enumeration of HEZEKIAH's tribute to Sennacherib. Solomon's ivory throne (I Kings x. 18 *et seq.*) seems to have been of another kind—most probably of carved ivory. The statement that Solomon's ships brought ivory from Ophir (I Kings x. 22) is the only indication as to the source of his supply. It is usually supposed that it came from India, but it is more likely that it was brought mostly from the east coast of Africa. Ethiopia supplied the Egyptians with most of their ivory, and the Phenician markets were undoubtedly partially supplied from Egypt.

IWRE-TEUTSCH. See JUDÆO-GERMAN.

IXAR (HIJAR): Town in Aragon, Spain, 62 miles to the northeast of Teruel. Here were printed by Eliezer Alantansi two parts of the Spanish edition of the Arba' Ṭurim: the Oraḥ Ḥayyim in 1485, and the Yoreh De'ah in 1487, possibly in continuation of the Guadalajara Eben ha-'Ezer. Besides these, Alantansi printed a Pentateuch with Megillot. In the same year there appeared a Pentateuch with the Targum, issued by Solomon Salmati, possibly in rivalry with Alantansi. Alantansi used as a printer's mark a lion on a black shield in his first publication, a lion on a red shield in his second, and a lion fighting with a unicorn in his Pentateuch.

J.

IYYAR: The second month in the Jewish calendar, consisting always of twenty-nine days, and falling between the tenth of April and the eighth of June (R. H. 3a *et passim*; Targ. Yer. to Ex. xii. 39; Targ. Sheni to Esth. iii. 7). This month in the Bible is designated as זו (I Kings vi. 1 = the month of beginning the Temple-building), probably the same as the Phenician or Punic זיב (Lidzbarski, "Nord-Semitische Epigraphik," p. 267). The word "Iyyar" is undoubtedly connected with the root אור, and thus denominates the month as the month of light, over and against Adar, which etymologically is the dark month. Like all the names of the months, "Iyyar" is a loan-word from the Assyro-Babylonian ("A-a-ru"; see Delitzsch, "Handwörterb." p. 34b). This month falls in the OMER, the first of Iyyar being the sixteenth day of Omer.

The principal events recorded in Iyyar are as follows:

Iyyar 1.—According to Seder 'Olam R. viii., the census of the people was begun under Moses (Num. i.-ii. 18).

2.—Solomon began the building of the Temple (see above; II Chron. iii. 2).

7.—Anniversary of the dedication of the walls of Jerusalem (Meg. Ta'an. ii. 1, xii. 5).

8.—Memorial day of the massacre of the Jews of Speyer during the First Crusade (גזירות ת"תנ"ו, 1096; see Grätz, "Gesch." vi. 101 *et seq.*; Jellinek, "Ḳontres Gezerot").

10.—Eli died (I Sam. iv. 1-18).

15.—Arrival of the Israelites in the desert of Sin (Ex. xvi.); also the day for Pesaḥ Sheni (Num. ix. 7; II Chron. xxx.).

16.—The manna began to fall (Ex. xvi.).

17.—On this day, rising against Florus, the Jews broke down the colonnade connecting the citadel Antonia with the Temple (3826 = 66; Josephus, "B. J." ii. 16, § 17); also the anniversary of the imprisonment of the Jews in England (5047 = Friday, May 2, 1287; Grätz, *l.c.* vii. 197-198).

18.—LaG be-'Omer = thirty-third day of Omer, when marriages may be solemnized.

21.—Siege of Jotapata began 3827 = 67 (Grätz, *l.c.* iii. 410-414).

23.—Arrival of Israel at Rephidim (Seder 'Olam R. v.).

27.—A day of victory on account of the recognition of the independence of Judea under Simon I. (Meg. Ta'an. ii.); beginning of a new Era (3618 = 142 B.C.; I Macc. xiii. 41, 42).

29.—Death of Samuel the prophet (Meg. Ta'an. *l.c.*).
E. G. H.

IZATES: Proselyte; King of Adiabene; son of Queen Helena and Monobaz I.; born in the year 1 of the common era; died in 55. While in Charan Spasinu, whither he had been sent by his father, a Jewish merchant named Ananias acquainted him with the tenets of the Jewish religion, in which he became deeply interested. His mother had been previously won over to Judaism without his knowledge. On ascending the throne on the death of his father, Izates discovered the conversion of his mother; and he himself intended to adopt Judaism, and even to submit to circumcision. He was, however, dissuaded from this step both by his teacher Ananias and by his mother, but was ultimately persuaded thereto by another Jew, Eleazar.

For some time Izates enjoyed peace; and he was so highly respected that he was chosen as arbitrator between the Parthian king Artaban III. and the rebellious nobles of that monarch. But when several of Izates' relatives openly acknowledged their conversion to Judaism, some of the nobles of Adiabene secretly induced Abia, King of Arabia, to declare war against him. Izates defeated his enemy, who in despair committed suicide. The nobles then conspired with Volageses, King of Parthia, but the latter was at the last moment prevented from carrying out his plans, and Izates continued to reign undisturbed for twenty-four years. He left twenty-four sons and twenty-four daughters. Izates' remains and those of Queen Helena were sent by Monobaz II. to Jerusalem for burial. For the account of Izates' conversion given in the Midrash see Gen. R. xlvi. Compare Adiabene; Ananias; Helena, and the bibliography there cited.

IZRAELITA: Jewish weekly in the Polish language, published in Warsaw since 1865. It was the successor of the Jutrzenka. At the beginning the "Izraelita" met with many obstacles in the way of restrictions from the censor; and it was also strongly opposed by the Orthodox Jews. Even the Liberals were not altogether pleased with it. While the "Izraelita" advised the Orthodox Jews to introduce the Polish language in the ḥeder, it urged the Liberals to teach their children Hebrew. From 1865 to 1897 the paper was edited by Samuel H. Peltyn, who always conducted it in a spirit of patriotism, and advocated assimilation. After his death (Sept., 1897) N. Sokolow became its editor, and upheld Zionism; but in 1901, when L. Grosglik became editor, the "Izraelita" returned to its old program.

JAARBOOKEN VOR DE ISRAELITEN. See Year-Books.

JAAZER or **JAZER** (יעזר: in I Chron. xxvi. 31 יעזיר = "he will help"): A city east of the Jordan, in or near Gilead (Num. xxxii. 1, 3; I Chron. *l.c.*), and inhabited by the Amorites. It was taken by a special expedition sent by Moses to conquer it (Num. xxi. 32). From the Septuagint, which reads Ἰαζήρ for עז in Num. xxi. 24, it appears that Jaazer was on the border of Ammon. As an important city it gave its name to the whole of the surrounding territory (*ib.* xxxii. 1). Even a "sea of Jaazer" is mentioned in Jer. xlviii. 32 (but comp. the Septuagint rendering *πόλις* Ἰαζήρ, probably due to reading עיר יעזר instead of ים יעזר).

Jaazer is stated to have been a fertile land fit for the raising of cattle (*ib.*) and a place having many vineyards (Isa. xvi. 8, 9; Jer. *l.c.*). It was occupied by the children of Gad (Josh. xiii. 25; I Chron. xxvi. 31), by which tribe it was allotted to the Merarite Levites (Josh. xxi. 39; I Chron. vi. 66 [A. V. 81]). In the time of David it seems to have been occupied by the Hebronites, who were descendants of Kohath (I Chron. xxvi. 31). It was chosen as one of the stations by David's officers who were sent to number the children of Israel (II Sam. xxiv. 5).

According to Josephus ("Ant." xii. 8, § 1), Jaazer was captured and burned by Judas Maccabeus. The site of Jaazer was defined by Eusebius and Jerome ("Onomasticon," *s.v.* "Azor") as being 8 or 10 Roman miles west of Philadelphia, and 15 miles north of Heshbon, and as the source of a large river falling into the Jordan. It is identified by some scholars (*e.g.*, S. Merrill; see Hastings, "Dict. Bible," *s.v.*) with the modern Khurbat Ṣar on the road from 'Iraḳ al-Amir to Al-Salt; but this identification has been rejected by Cheyne (Cheyne and Black, "Encyc. Bibl." *s.v.*).
E. G. H. M. Sel.

JABAL IBN JAWWAL: Jewish Arabic poet of the seventh century; contemporary of Mohammed. According to Ibn Hisham ("Kitab Sirat Rasul Allah," ed. Wüstenfeld, pp. 690, 713) and Abu al-Faraj al-Iṣbahani ("Kitab al-Aghani," viii. 104), Jabal was a Tha'alabite (Abu al-Faraj gives the whole genealogy), but neither of them mentions the fact that he was a Jew. Ibn Ḥajar, however, in his biographical dictionary "Kitab al-Aṣabah fi Tamyiz al-Ṣaḥabah" (ed. Sprenger, i. 453), relying on Ibn al-Kalbi and on Al-Marzabani, declares that such was the case and that Jabal subsequently embraced Islam. Yaḳut ("Mu'jam," i. 765), quoting a verse of Jabal, calls him erroneously "Jamal ibn Jawwal al-Taghlabi."

Jabal is sporadically cited by the above-mentioned Arabic authors. Abu al-Faraj (*l.c.* p. 101) quotes two verses of Jabal's, apparently from a poem which he addressed to Al-Shammakh, himself a Tha'alabite poet, in reference to a quarrel that arose between them. This is probably the same incident as that related by Abu al-Faraj (*l.c.* p. 104); namely, that Al-Shammakh fell in love with Jabal's sister Kalbah, and when, shortly afterward, Al-Shammakh went on a journey she married his brother, giving rise to a poetical contest between the disappointed lover and Jabal. Eleven other verses by Jabal, indicating sufficiently the poet's Jewish religion, are quoted by Ibn Hisham (*l.c.* p. 713). They are an elegy on the death of Ḥuyayy (according to Sprenger's punctuation in Ibn Ḥajar, *l.c.*, "Jubayy") ibn Akhṭab, chief of the Banu al-Naḍir, and on the defeat by Mohammed of this tribe and of the Banu Ḳuraiẓa. These verses were a reply to the poet Ḥassan ibn Thabit. They apparently do not form a complete poem; for Ibn Ḥajar (*l.c.*) quotes a verse of Jabal's not appearing in the quotation of Ibn Hisham, but having the same meter and the same rime, and therefore probably from the same poem.

Bibliography: Besides the sources mentioned above, H. Hirschfeld, in *R. E. J.* x. 26.

G. M. Sel.

JABALI, ABU AL-ṬAYYIB AL-: Karaite scholar of the tenth century. His full name is said to have been **Samuel ben Asher ben Manṣur.** The surname "al-Jabali" indicates that he came from the province of Jabal, in the neighborhood of Hamadan. According to Ibn al-Hiti, he was a contemporary of Abu al-Faraj Harun, the author of "Mushtamil." This is, however, inaccurate, inasmuch as Abu al-Faraj wrote in the year 1026, whereas Al-Jabali is quoted by an earlier writer, Sahl b. Maẓliaḥ. Al-Jabali controverted Saadia Gaon in a special writing. He is also said to have controverted a certain Menahem, the head of a school, after he had read a letter written by a son of this Menahem to one Abu Thabit (otherwise unknown).

Perhaps this Menahem is identical with a scholar of the same name who directed questions to Saadia in the Arabic language. In that case Al-Jabali can not have flourished before 950–960.

Al-Jabali must not be confounded with the Karaite author Samuel ibn Manṣur, who presumably belongs to the fourteenth century.

K. S. P.

JABBOK (יבק): One of the principal tributaries of the Jordan; first mentioned in connection with the meeting of Jacob and Esau and with the struggle of Jacob with the angel (Gen. xxxii. 23 *et seq.*). It was the boundary separating the territory of Reuben and Gad from that of Ammon, the latter being described as lying along the Jabbok (Num. xxi. 24; Deut. ii. 37, iii. 16; Josh. xii. 2). The territory of Sihon is described as extending "from Arnon unto Jabbok" (Num. xxi. 24), and it was reclaimed later by the King of Ammon (Judges xi. 13, 22). Eusebius ("Onomasticon," ed. Larsow-Parthey, pp. 222, 224, Berlin, 1862) places the river between Gerasa and Philadelphia. The Jabbok is identified with the Wadi or Nahr al-Zarḳa, a river that rises in Mount Hauran, and, after receiving many tributaries, empties into the Jordan between Gennesaret and the Dead Sea (Schwarz, "Das Heilige Land," p. 30; comp. Estori Farḥi, "Kaftor wa-Feraḥ," ed. Luncz, p. 63, Jerusalem, 1897). The general opinion is that the name "Zarḳa" is given to this river on account of the bluish color of its water; but Schwarz (*l.c.*) says that it is because the river in its course touches the fortress of Zarḳa on the route between Damascus and Mecca.

E. G. H. M. Sel.

JABESH (more fully **Jabesh-gilead** [יבש, יביש = "dry"]): Principal city of Gilead, east of the Jordan. It is first mentioned in connection with the war between the Benjamites and the other tribes of Israel (Judges xxi. 8–24). Because its inhabitants had refused to march against the Benjamites, 12,000 Israelites were sent against it. All the people of the city were slain except 400 virgins, who were spared to be given as wives to the surviving Benjamites. In the beginning of the reign of Saul the city was attacked by Nahash, King of Ammon, and was forced to apply to Saul for help (I Sam. xi. 1–10). The inhabitants of Jabesh-gilead remained grateful to Saul for his assistance, and when he and his three sons were killed by the Philistines on Mount Gilboa, they went by night, took the bodies from the wall of Beth-shan, brought them to Jabesh, burned them, buried the remains, and fasted seven days (*ib.* xxxi. 2, 6, 11–13). For this deed Jabesh-gilead was afterward highly lauded (II Sam. ii. 4–6).

Josephus ("Ant." vi. 5, § 1) calls Jabesh the metropolis of the Gileadites. Eusebius ("Onomasticon") speaks of it as of a village six Roman miles from Pella on the road to Gerasa. The name is preserved in the modern Wadi Yabis; and Robinson ("Researches," 2d ed., iii. 319) holds the ruins of Al-Dair to be the site of Jabesh-gilead.

E. G. H. M. Sel.

JABEZ: Eponym of a clan of the Kenite family of the Rechabites, which clan was merged into the tribe of Judah. I Chron. ii. 55 refers to "families of scribes" ("soferim") dwelling at Jabez; while in another passage (*ib.* iv. 9–10) Jabez is described as "more honorable than his brethren." His name (Ya'beẓ) is derived from his mother's saying: "I bare him with sorrow" ("'oẓeb"). Another explanation is (*ib.* iv. 10, Hebr.): "Jabez called on the God of Israel, saying, 'If Thou wilt bless me and enlarge my boundary, and Thine hand be with me, and Thou wilt give me friendships that will not grieve me [an allusion to "'eẓeb"] then' [the concluding words are omitted in the text; see the commentaries to iv. 10]. And God granted him that which he requested."

Jabez was prominent, particularly after the Exile, among those Kenite clans that embraced Judaism becoming scribes and teachers of the Law. Rabbinical tradition identifies Jabez with Othniel the Kenezite, the head of the bet ha-midrash after the death of Moses (Tem. 16a; Targ. to I Chron. ii. 55, iv. 9). Hence the vow of Jabez was understood to refer to his schoolhouse: "If Thou wilt bless me with children, and give me many disciples and associates," etc. (Tem. *l.c.*; Sanh. 106a). "The whole tribe of

Jethro, the Kenites as well as the Rechabites, left their habitations near Jericho and went to Jabez to learn the Torah from him" (Mek., Yitro, 'Amaleḳ, ii.; Sifre, Num. 78).

In the Syriac Apocalypse of Baruch (v. 5) Jabez is mentioned together with Jeremiah and Gedaliah among the saintly leaders of the people at the destruction of the Temple, being one of the deathless frequently mentioned in rabbinical tradition (Massek. Derek Ereẓ i.; see "J. Q. R." v. 417 *et seq.*).

E. G. H. K.

JABEZ, BARZILLAI BEN BARUCH: Turkish Talmudist of the seventeenth and eighteenth centuries; son-in-law of Elijah Ḥako, author of "Ruaḥ Eliyahu." Jabez was a Talmudist of considerable reputation, and had many pupils, among whom were his son-in-law Judah Ashkenazi, and Isaac Nuñez Belmonte, author of "Sha'ar ha-Melek." Jabez was the author of: "Leshon 'Arummim" (Smyrna, 1749), containing annotations to Elijah Mizraḥi's supercommentary on Rashi on the Pentateuch and to the passages in Maimonides, and novellæ by Jabez's father; "Leshon Limmudim" (*ib.* 1755), novellæ on the Ṭurim.

S. S. I. BR.

JABEZ, ISAAC BEN SOLOMON BEN ISAAC BEN JOSEPH HA-DORESH: Turkish Biblical exegete and preacher in the second half of the sixteenth century; a descendant of Joseph JABEZ. He wrote: (1) "Ḥasde Abot," commentary on Pirḳe Abot (Constantinople, 1583); (2) "Yafiḳ Raẓon," homiletic explanations of the Hafṭarot according to the German and Portuguese rites (Belvedere, 1593); (3) "Torat Ḥesed," commentaries on the Hagiographa, except Chronicles (*ib.* c. 1593–94); the commentary to each book has a subtitle indicating its contents—as "Tehillot Adonai" (on Psalms), "Limmude Adonai" (on Proverbs), "Yir'at Shaddai" (on Job), "Ḳodesh Hillulim" (on Canticles), "Ẓemaḥ Ẓaddiḳ" (on Ruth)—and a commentary on the Pesaḥ Haggadah is appended to the work. All the hagiographic commentaries except those on Proverbs, Ecclesiastes, and Esther are printed in the rabbinical Bible "Ḳehillat Mosheh," Amsterdam, 1727, the subtitles in a few cases being somewhat changed.

G. M. SC.

JABEZ, JOSEPH BEN ḤAYYIM: Spanish theologian of the fifteenth and sixteenth centuries. He lived for a time in Portugal, where he associated with Joseph Ḥayyun, who inspired him with that taste for mysticism which he subsequently displayed in his writings. When the Jews were banished from Spain Jabez settled at Mantua, Italy. There he met his compatriot, the cabalist Judah Ḥayyaṭ, whom he induced to write the commentary "Minḥat Yehudah" on the cabalistic work "Ma'areket Elahut."

Jabez was an opponent of philosophy. For him the truth of the Jewish religion is demonstrated by the miracles recorded in the Bible. He criticizes the thirteen articles of faith of Maimonides, the six of Ḥasdai Crescas, and the three of Albo. According to him, only the following three, alluded to in the verse "I AM THAT I AM" (Ex. iii. 14), are the fundamental principles of Judaism: (1) that God is one; (2) that He governs the world; (3) that in the end all mankind will believe in His unity. These dogmas are expounded by him in the following books: "Ḥasde Adonai" (Constantinople, 1533), an ethical work wherein the author demonstrates that the wise man is more grateful to God for his misfortunes than for worldly advantages; "Ma'amar ha-Aḥdut" (Ferrara, 1554), on the unity of God; "Perush 'al Massekat Abot" (*ib.* 1555), on the sayings of the Fathers, mentioned by the author of "Yesod ha-Emunah"; "Or ha-Ḥayyim" (*ib.* 1555), against philosophy; a commentary on the Psalms (Salonica, 1571).

Jabez left also a great number of manuscript works, which, according to Ghirondi, are still in the possession of the author's descendants.

G. I. BR.

JABIN: **1.** King of Hazor; head of one of the great confederations which faced Joshua in his conquest of Canaan (Josh. xi.). He summoned his allies from every side, including the Amorites, Hittites, and many petty kingdoms. By "the waters of Merom" the battle was fought, and the great coalition, notwithstanding its chariots of iron, was defeated. Joshua took advantage of his victory, captured the royal city Hazor, and slew Jabin, its king. He thus conquered territory that was finally divided by lot among (at least) Asher, Naphtali, Zebulun, and Issachar.

2. King of Canaan "that reigned in Hazor" (Judges iv.). Some regard Josh. xi. and Judges iv. as referring to one and the same event. This Jabin appears as an oppressor of Israel for twenty years, whose most formidable instruments of war were nine hundred chariots of iron. Israel arose under the inspiration of Deborah and Barak to throw off this yoke. Jabin's army was in charge of Sisera, his commander-in-chief, who afterward fell in the tent of Jael the Kenite. No mention is made of Jabin's part in the battle, either in the prose or in the poetic account of that event (Judges iv., v.). The result of the battle, however, was that "God subdued on that day Jabin, the King of Canaan, before the children of Israel. And the hand of the children of Israel prospered, and prevailed more and more against Jabin, the King of Canaan, until they had destroyed Jabin, King of Canaan" (*ib.* iv. 23, 24). An interesting reference is found in Ps. lxxxiii. 9: "Do thou unto them as unto Midian, as to Sisera, as to Jabin, at the River Kishon."

E. G. H. I. M. P.

JABLONSKI, DANIEL E.: German Christian theologian and Orientalist; born Nov. 26, 1660, in Danzig; died May 25, 1741, in Berlin. After spending some time as a wandering scholar in the universities of Holland and England, he settled in Lissa in 1686, but ultimately removed to Berlin, where he became a member of the Academy of Sciences in

1700. He established there a Hebrew printing-press, from which he issued a text of the Old Testament (1699) based upon Leusden's (that is, Athias') of 1667; several prayer-books; and an edition of the Babylonian Talmud in twelve volumes (1715–21). An attempt to produce a second edition of the Talmud led him into pecuniary difficulties.

J.

JABNEH (יבנה), or **JAMNIA** (*'Ιαμνία, 'Ιαμνεία*): Philistine city; taken by Uzziah, who demolished its wall (II Chron. xxvi. 6). Jabneh is mentioned with Gath and Ashdod, two other cities of the Philistines, and is generally identified by Biblical students with Jabneel (יבנאל), on the boundary of Judah, near Ekron, and not far from the coast (Josh. xv. 11). Neither Jabneh nor Jabneel is mentioned afterward among the cities of Judah, but the Septuagint renders וימה, which follows Ekron in Josh. xv. 46, by *Γεμνά*. In post-Biblical history, in the books of the Maccabees, in Josephus and in other Greek authors, the name occurs as "Jamnia," and in Judith (ii. 28) as "Jemnaan." With Ashdod, Jamnia is described by Josephus sometimes as a maritime city ("Ant." xiii. 15, § 4) and sometimes as an inland city ("Ant." xiv. 4, § 4; "B. J." i. 7, § 7). This was due to the fact that, though removed from the coast, it had its own harbor; and it was considered by Pliny ("Historia Naturalis," v. 13, § 68) and Ptolemy (v. 16, 2) likewise as two distinct towns. According to Strabo (xvi. 759), Jabneh, or Jamnia, was so populous that, with the surrounding villages, it could furnish 40,000 able warriors. It is referred to in I Macc. iv. 15, v. 58, x. 69, xv. 40, and was apparently garrisoned by Gorgias; later it served other generals as a place of encampment. Judas Maccabeus took it by assault, and fired the shipping in the harbor as well as the town, so that the conflagration was seen from Jerusalem, 240 furlongs distant (II Macc. xii. 8–9, 40).

Jamnia was taken from the Syrians by Simon Maccabeus, but the Jews did not enter into possession of the city until the time of Alexander Jannæus. Pompey restored it to the Syrians, and about 57 B.C. it was rebuilt by Gabinius ("Ant." xiii. 6, § 7; 15, § 4; xiv. 4, § 4; "B. J." i. 2, § 2; 7, § 7; 8, § 4). Jamnia must have been given by Augustus to Herod, for the latter bequeathed it to his sister Salome, who in her turn gave it to Livia ("Ant." xvii. 8, § 1; 11, § 5; xviii. 2, § 2; "B. J." ii. 6, § 3; 9, § 1). The inhabitants of the city at that time were chiefly Jews (Philo, "Legatio ad Caium," § 30). Philo states further that a Roman officer raised at Jamnia an altar of mud for the deification of Caligula, but that the altar was thrown down by the Jews. Owing to the turbulence of its large population, Vespasian twice found it necessary to besiege the city ("B. J." iv. 3, § 2; 8, § 1).

Jabneh became the seat of Jewish scholarship even before the destruction of the Temple; for Johanan b. Zakkai, while predicting to Vespasian that he would become emperor of Rome, asked him as a special favor to spare Jabneh and its scholars (Git. 66a). After the destruction of Jerusalem the Great SANHEDRIN removed to Jabneh, where it was presided over by Johanan b. Zakkai (R. H. 31a). The Sanhedrin held its sittings in a "vineyard," which term, however, is explained as figurative ('Eduy. ii. 4; Yer. Ber. iv. 1): "the Sanhedrin sat in rows similar to vines in a vineyard." Jabneh took the place of Jerusalem; it became the religious and national center of the Jews; and the most important functions of the Sanhedrin, such as determining the time of the new moon and of the festivals, were observed there. It even enjoyed some of the privileges of the Holy City, among others the right to blow the shofar when New-Year's Day fell on a Sabbath (R. H. iv. 1 [29b]). In the time of Gamaliel II. the Sanhedrin removed to Usha, but it met again in Jabneh from the time of Simeon b. Gamaliel to that of Bar Kokba (R. H. 31b).

Seat of the Great Sanhedrin.

Benjamin of Tudela identifies Jabneh with the Ibelin mentioned in the history of the Crusades. He places Jabneh at three parasangs from Jaffa and two from Ashdod (Azotus). He professes to have seen there traces of the academy, though in his time there were no Jews in the place (ed. Asher, i. 43, Hebr.; comp. ii. 98, note). Rapoport ("'Erek Millin," p. 4) places Jabneh the seat of the Sanhedrin in Galilee, identifying it with the Jabneel of Naphtali (Josh. xix. 33). The modern Yabna, a village situated on a hill south of the Wadi Rubin, is generally assumed to mark the site of the ancient Jabneh (comp. Robinson, "Researches," ii. 420, iii. 22).

G. M. SEL.

JACA (Hebr. גאקא): City of Aragon, Spain. Jews were settled here as early as the eleventh century, during which the city became the seat of a Jewish high school. Sancho Ramirez the Great, King of Navarre, did not permit the Jews to grind their grain in any mill they pleased; but a certain mill belonging to the city was assigned to them and to the bread-sellers. This they were allowed to use on payment of a certain tax; and they were, in addition, compelled to pay all the usual imposts and taxes. In 1281 the Jews of Jaca and of the surrounding villages—who were engaged in industries and lived in comfortable circumstances—were obliged, like those of Gerona, to contribute toward repairing the fortifications, which had been damaged during the French invasion. In 1289 they had to pay King Jaime 6,000 sueldos toward defraying the costs of an expedition against Sicily.

The Jaca Jews were victims of the outbreak of the Shepherds in 1321, no fewer than 400 of them being killed on Tammuz 17 (= July 14). In 1391, also, Jews were killed or forcibly baptized at Jaca. In 1438 the community was so reduced that it could pay only 200 sueldos in taxes. Toward the end of the fourteenth century Seraiah ben Daud and Samuel Almosnino, who corresponded with Isaac ben Sheshet, lived in Jaca. In 1492 the Jews of the city left Saragossa for Italy and Turkey.

JACHIN (יכין = "he establishes"): **1.** The right-hand pillar of the two brazen ones set up in the porch of the Temple of Solomon, that on the left or north being called "Boaz" (I Kings vii. 21; II Chron. iii. 17). For an elaborate reconstruction of these pillars based on Assyrian and Egyptian models and on the parallel description in Jer. lii. 21-23, see Perrot and Chipiez, "History of Art in Sardinia and Judæa," pp. 250-257, and plates vi. and vii., London, n.d. Comp. Freemasonry. **2.** Fourth son of Simeon and founder of the family of the Jachinites (Gen. xlvi. 10; Ex. vi. 15; Num. xxvi. 12). In the parallel list of I Chron. iv. 24 his name is given as "Jarib." **3.** Head of the twenty-first division of priests in the time of David (I Chron. xxiv. 17); his descendants returned from Babylon (*ib.* ix. 10; Neh. xi. 10).

JÄCKLIN (JACOB): Jewish financier of Ulm in the fourteenth century; married the daughter of the "Grossjuden" Moses of Ehingen. Jäcklin had several sons; one of them, Isaac, lived in Strasburg, another in Riedlingen, or Reutlingen, and a third, Veflin, in Nuremberg. Jäcklin was probably president of the Jewish community of Ulm for many years; he loaned considerable sums to the municipal government of Ulm and to the counties of Helfenstein, Altenbeck, and Werdenberg. For example, he advanced (Oct. 1, 1378) to the community of Ulm 1,680 gulden for the redemption of the monastery of Langenau, receiving 84 gulden interest semiannually; and later, 1,800 gulden, receiving the gate-toll of the city in payment. On Nov. 13, 1378, the council of Ulm entered into an agreement with Jäcklin to declare void all the documents bearing upon the city's indebtedness to him, excepting those relating to the two loans mentioned. A letters patent ("Tedingbrief") has been preserved which gives him the right to remain in Ulm until Dec. 6, 1379.

Eberhard der Greiner (= "the complainer") of Württemberg taxed Jäcklin 4,000 gulden, which he refused to pay. Thereupon Eberhard sued him and won his case before the court of Nuremberg (1376); the wife and son of Jäcklin were put into the "Reichsacht" by the emperor (Charles IV.) until the 4,000 gulden were paid (Sept. 5, 1376). It seems that Jäcklin nevertheless continued to live in Ulm. The "Reichsacht" directed against Ulm as also against Jäcklin was annulled by the Reichstag of Rothenburg May 31, 1377. On Oct. 6, 1376, in consideration of the damage done to the county of Heinrich von Würdenberg, the emperor declared void his debts to Jäcklin. The city of Ulm, however, reimbursed Jäcklin by paying him from 1378 onward, in half-yearly instalments, 10 per cent interest on Heinrich's debts.

JACKSON, HARRY: English actor; born in London 1836; died there Aug. 13, 1885. At an early age he left England for Australia, where he adopted the stage as a profession. After playing at Auckland, New Zealand, and at San Francisco (1856-1862) he returned to England about 1870, and appeared at the Gaiety Theatre, London, later at the Princess', of which he became stage-manager. He held the same post at the Drury Lane Theatre, where he impersonated chiefly Jewish characters, or rather caricatures, in modern melodramas. His portrayal of Napoleon I., whom he much resembled, attracted some notice.

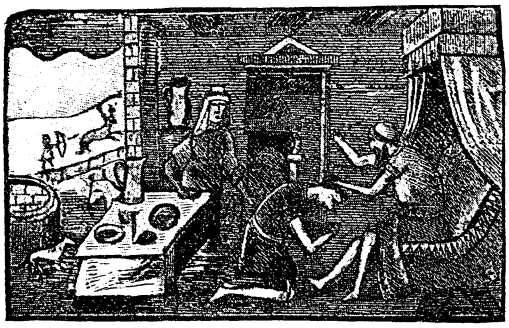
J. G. L.

JACOB (יעקב, יעקוב), called also **Israel** (ישראל). —**Biblical Data:** Third patriarch; son of Isaac and Rebekah, and ancestor of the Israelites. He was born when his father was sixty years old and after his mother had been barren for twenty years. For the account of his birth and origin of his name see Gen. xxv. 19, 26. The name "Jacob" is explained elsewhere as meaning "supplanter" or "deceiver" (*ib.* xxvii. 36; Hos. xii. 4 [A. V. 3], where there is also an allusion to the struggle before birth between the two brothers). Jacob was the favorite of his mother (Gen. xxv. 28). He is represented as "a plain man [איש תם], dwelling in tents," that is to say, pursuing the life of a shepherd (*ib.* xxv. 27; comp. *ib.* iv. 20).

Only two important incidents marked the early period of Jacob's life. The first was his obtaining the birthright from his brother Esau. The birthright being a very important possession, Jacob waited for the opportunity to acquire it, and the opportunity came. Esau, returning one day tired from hunting, and seeing Jacob cooking a mess of lentils, asked Jacob to give him some. Jacob offered to do so in exchange for the birthright, and Esau, feeling faint and ready to die, consented to sell it, an oath confirming the bargain (*ib.* xxv. 29–34).



Isaac Blessing Jacob.
(From a "Teutsch Chumesh.")

Obtains Isaac's Blessing.

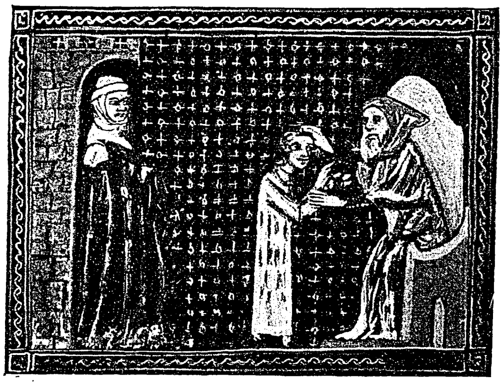
The second incident happened many years later, and with it Jacob's life assumed an entirely new phase. Isaac, having become blind, sent Esau to hunt for some game and to prepare for him a meal in order that he might bless him before his death. Rebekah, hearing of this, instigated Jacob to intercept the blessing by taking his brother's place. At first Jacob objected; but he soon yielded to his mother's persuasion. Having anticipated his brother in the preparation of the meal and having put goatskins upon his hands and neck lest his father should recognize him, Jacob brought the meal to his father, who, after having partaken of it, blessed him and promised him that he should be lord over his brethren and that his mother's sons should bow to him (*ib.* xxvii. 1–29). This substitution was in agreement with the divine purpose (comp. *ib.* xxv. 23); and Isaac, when he learned of Jacob's trick, not only did not revoke his blessing, but even confirmed it (*ib.* xxvii. 33, 37).

Owing to this deceit Esau hated his brother, and resolved to kill him after their father's death. Rebekah found no better means to protect her favorite son from his brother's vengeance than to send him to Haran, to her brother Laban. She advised Jacob to stay with his uncle a short time till his brother should have forgotten his wrongs, and to marry one of his uncle's daughters. Jacob, after having received a further blessing from his father, left the paternal home (*ib.* xxvii. 42–xxviii. 5).

When Jacob was on his way he saw in a prophetical dream a ladder reaching from earth to heaven and angels ascending and descending thereon. YHWH Himself appeared to him, promising to give the land of Canaan to his descendants, who should be as numerous as the dust of the earth (*ib.* xxviii. 10–15). Jacob commemorated his dream by setting up a pillar on the spot on which he had slept, calling the name of the place "Beth-el" (= "the house of God"; *ib.* xxviii. 18–22).

Marriage with Laban's Daughters.

On his arrival at Haran Jacob met Rachel, his uncle's second daughter. Jacob offered to serve Laban seven years for Rachel. Laban, however, deceived him at the end of that period by giving him Leah instead of Rachel, and exacted of him a further service of seven years for Rachel, though he gave her to him immediately after the conclusion of Leah's wedding-feast (*ib.* xxix. 1–28). During the second seven years Jacob begat by his two wives and two concubines eleven sons and one daughter, Dinah. By Rachel he had one son only, Joseph (*ib.* xxix. 31–xxx. 25). Having finished the second term of seven years, Jacob stayed with Laban six years longer, tending his sheep for pay, which consisted, according to an agreement between them, of all the spotted, speckled, and ring-straked sheep and goats born in the flocks. Jacob, by means of peeled sticks which he set up before them, caused all the strongest of the flocks to bear speckled and spotted offspring. Thus he baffled the plans of Laban, who endeavored to deprive him of his hire (*ib.* xxxi. 7, 8), and Jacob amassed great wealth (*ib.* xxx. 26–43).

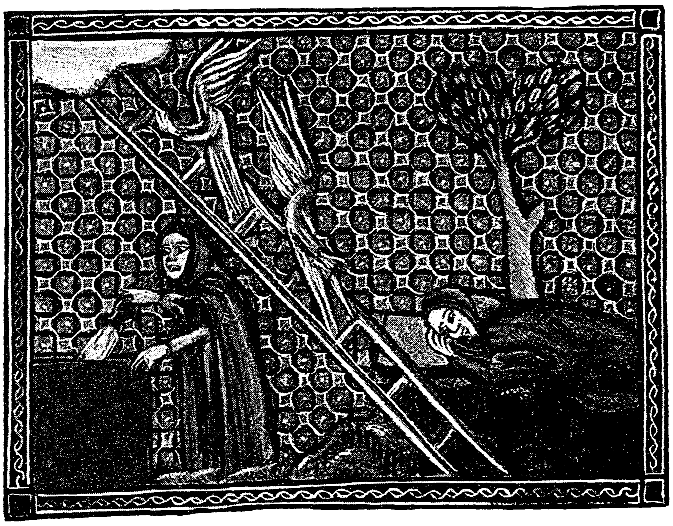


Isaac Blessing Jacob.
(From the Sarajevo Haggadah, 14th century.)

Jacob, seeing that Laban was no longer friendly toward him, resolved upon returning to his parents. His resolution was approved by YHWH; and, encouraged by his two wives, he departed without acquainting his uncle and father-in-law (*ib.* xxxi. 1–21). Laban, however, three days later learned of Jacob's flight, and, after pursuing him for seven days, overtook him on Mount Gilead. They at first quarreled, but were finally reconciled and made a covenant, building, in commemoration of their compact, a cairn which Jacob called "Galeed" (= "a heap as witness"; *ib.* xxxi. 22–54).

Wrestles with the Angel.

Immediately after this Jacob was informed that his brother Esau was coming to meet him, accompanied by 400 men. Jacob, fearing Esau, sent him very rich presents, but at the same time made plans to escape from his brother's fury in case the latter should reject them. At night Jacob sent his family and all his possessions over the brook Jabbok, he himself remaining alone on the other side, where an angel wrestled with him all night till the breaking of the day. While wrestling, the angel touched the hollow of Jacob's thigh, causing him to limp; but the angel was overpowered by Jacob, who would not let him go until blessed by him. The angel then changed Jacob's name to "Israel" (ישראל, apparently shortened from ישר אלהים = "he overpowered Elohim"). Jacob gave to the place at which this event occurred the name "Peniel" ("for I have seen Elohim face to face"). The Israelites commemorate the event to this day by not eating "the sinew which shrank which is upon the hollow of the thigh" (*ib.* xxxii. 32). Hosea alludes to Jacob's wrestling with the angel, whom he calls once "Elohim" and once "Mal'ak," adding that the angel wept and implored Jacob to let him go (Hos. xii. 4).



Jacob's Dream.

(From the Sarajevo Haggadah, 14th century.)

After his meeting with Esau, at which the brothers were reconciled (Gen. xxxiii. 1–16), Jacob went to Shechem, where he bought from the children of Hamor, for a hundred pieces of money, a field in which he erected an altar (*ib.* xxxiii. 17–20). The abduction of Dinah, which occasioned the destruction of Shechem by her brothers, caused Jacob much apprehension; but God allayed his fears, and he arrived peacefully at Beth-el, where God appeared again to him, confirming the name "Israel" which had previously been given to him by the angel, and repeating the promise that his children should possess the land of Canaan. While Jacob was on his way home Rachel gave birth to Benjamin, his last son. Jacob, with his twelve sons, the fathers of the twelve tribes of Israel, then arrived at Hebron, where his parents lived (*ib.* xxxv. 9–27).

Journey to Egypt.

At the end of ten years (comp. *ib.* xxxvii. 2) Jacob's favorite son, Joseph, was sold to a company of Ishmaelites by his brothers, who led their father to think that he had been devoured by a wild beast. While Jacob was still mourning for Joseph, Isaac died, and at his funeral Jacob again met his brother Esau (*ib.* xxxv. 29). Later, when the famine grew severe in Canaan, Jacob sent his sons into Egypt to buy corn, but kept with him Benjamin, Rachel's second son. Jacob was, however, at last compelled to let Benjamin go with his brothers to Egypt, through Joseph's refusal otherwise to release Simeon, whom he held as hostage until Benjamin should be brought to him. When, on the second return of his sons from Egypt, Jacob heard that Joseph was alive and was ruler over Egypt, he decided to go there to see him (*ib.* xlv. 26–28). Before doing so he journeyed to Beer-sheba, where his resolution to go to Egypt was approved by God. He went to Egypt with his eleven sons and their children, numbering altogether sixty-six, Joseph meeting him in Goshen (*ib.* xlvi. 1–30). Afterward Jacob was honorably received by Pharaoh, who assigned him and his sons a residence "in the best part of the land, in the land of Rameses." Jacob was at that time 130 years old (*ib.* xlvii. 5–11).

When about to die, Jacob made Joseph swear that he would not bury him in Egypt, but in the sepulcher of his fathers in Canaan. Jacob then adopted Joseph's two sons, Ephraim and Manasseh, placing them on the same footing as his own children. While blessing them he gave the first place to the younger son, Ephraim. To Joseph himself he gave one portion more than his brothers (*ib.* xlviii. 22).

Jacob assembled his sons in order to bless them (see Jacob, Blessing of), after which, having pronounced his last will, he died, being 147 years old (*ib.* xlix.). His body was embalmed according to the Egyptian custom; a great funeral procession, which included all the servants of Pharaoh and all the elders of Egypt, accompanied it to Canaan; and there Jacob was buried in his family grave in the cave of Machpelah at Hebron (*ib.* l. 1–13). The name "Jacob" as well as that of "Israel," though to a lesser degree, was used by the Prophets to designate the whole nation of Israel (comp. Isa. ix. 7, xxvii. 6, xl. 27).

E. G. H. M. Sel.

—— **In Rabbinical Literature:** Even before their birth the struggle between the two brothers Esau and Jacob commenced. Each of them wished to be born first, and it was only after Esau threatened to kill Rebekah, his mother, if he was not permitted to be born first that Jacob acceded (Midrash ha-Gadol [ed. Schechter, Cambridge, 1902] on Gen. xxv. 22; comp. Pesiḳ. R. [ed. Friedmann, Vienna, 1880], p. 48a). The respective characters of the two brothers were thus revealed before they were born. Whenever Rebekah passed a pagan house of worship Esau moved within her; and whenever she passed a synagogue or bet ha-midrash Jacob moved (Gen. R. lxiii. 6; Yalḳ., Gen. 110). There was also a conflict between them as to who should inherit this world, and who the world to come. In the conflict the angel Samael was about to kill Jacob, when Michael intervened; and the struggle between the two angels was settled by a court which God Himself convened for that purpose (Yalḳ., Gen. 110, from Midrash Abkir). All these legends are based upon the word "wa-yitroẓeẓu" (= "and they struggled"; Gen. xxv. 22).

Sale of Birthright.

Jacob was born circumcised (Ab. R. N. ii. 5; Gen. R. lxiii. 7). Until the age of thirteen both he and Esau attended school; but later Esau became a hunter, while Jacob continued his studies under various tutors—Abraham, Methuselah, Shem, and Eber (*ib.*; Gen. R. *l.c.*). The sale of the birthright occurred after Esau had slain Nimrod and two of his associates and fled from his pursuers. Jacob did not desire the material benefits of the birthright as much as the spiritual prerogatives attendant upon it. According to one opinion, this transaction was the final settlement of the quarrel which the brothers had had before they were born; and Esau thus sold to Jacob his portion in the world to come. Another opinion is that Jacob wished for the birthright because the first-born was the forerunner of the priest who offered the family sacrifices; and he thought that Esau was not fit to bring offerings to God (Yalḳ., Gen. 111; comp. Zeb. 112b). With the purchase of the birthright Jacob came into possession of the garments which Esau had inherited from Adam and which were the official robes of the officiating minister (Midr. Tan. 67b).

The Rabbis attempted to explain that Jacob did not intend to deceive his father in the words, "I am Esau thy first-born" (Gen. xxvii. 19), but meant by them: "I am the one whose children will accept the Decalogue which begins with I ("anoki"); but Esau is thy first-born" (Gen. R. lxv. 14; Yalḳ., Gen. 115). By confirming the blessing before Jacob's departure (Gen. xxviii. 1-4), Isaac established the fact that the blessing really belonged to Jacob (Gen. R. lxvii. 10).

Furthermore, it was only to please his mother that Jacob allowed himself to be disguised; and he brought the venison to Rebekah in a very distressed frame of mind and crying (Gen. R. lxv. 11). The goodly raiment which Rebekah put upon Jacob was that which Esau had taken from Nimrod when he murdered him (*ib.* 12). Rebekah accompanied Jacob to his father's door, and then said, "Thus far I was obliged to go with you, but now may thy Maker assist you." When Jacob entered and Isaac said, "Come near, I pray thee, that I may feel thee" (Gen. xxvii. 21), Jacob felt his heart melting like wax; but two angels supported him (Gen. R. lxv. 13, 15). He then came near to his father, who said unto him, "See, the smell of my son is like the smell of a field which the Lord hath blessed"; that is, according to the Rabbis, the fragrance of paradise came with him (*ib.* 18).

When Jacob left the presence of his father he, by reason of the blessing he had received, came out crowned like a bridegroom, and the dew which is to revive the dead descended upon him from heaven; his bones became stronger, and he himself was turned into a mighty man (Pirḳe R. El. xxxiii.). Jacob then fled from Esau, and went to the school of Shem and Eber, devoting himself to the study of the Torah. There he was hidden for fourteen years, and then returned to his father. He found that his brother was still purposing to kill him; whereupon he accepted the advice of his mother to go to Padan-aram (Gen. R. lxviii. 5; see also "Sefer ha-Yashar").

At Beth-el.

When Jacob arrived in Haran he bethought himself that he had passed without offering any prayer the place where his ancestors had prayed (Pes. 84a). He therefore decided to turn back to Beth-el; but to his surprise the place came to him, and he recited there the evening service (Ber. 26b). After this he wished to proceed on his journey, but God said, "This pious man came to My house: shall I permit him to depart before night?" So the sun set before its time, and Jacob remained in Beth-el overnight. The contradiction in the text, where it says first that Jacob took "of the stones" (Gen. xxviii. 11), and then that he took "the stone" (*ib.* verse 18), is variously explained. Some think that he took twelve stones, corresponding to the number of the tribes; others, that he took three stones, corresponding to the number of the Patriarchs; others, again, that he took two stones; but all agree that the stones were later merged into one. Some of the rabbis say that he took a number of stones and placed them all round him for protection; that the stones began to quarrel, each one wishing that Jacob should lay his head upon it; and that, in order to settle the quarrel, God made all the stones into one (Gen. R. lxviii. 13; Yalḳ., Gen. 118-119; Ḥul. 91a; Sanh. 95b).

The angels that had accompanied Jacob thus far on his journey ascended the ladder, and other angels descended to accompany him farther. When the angels saw Jacob's likeness engraved on the throne of glory, they became jealous and desired to injure him; but God Himself came down and watched over him. When God promised to give him the land whereon he was lying, the whole land of Palestine folded up and placed itself under Jacob's head, so that it should be easier later for his children to conquer it. The angels ascending and descending the ladder are also interpreted to have represented the tutelary genii of the various nations to whom the Jews in later times were to be subjected. When Jacob's turn came to ascend he refused, fearing that, like the others, he, too, would have to come down. Then God said unto him, "If thou hadst had faith and hadst ascended thou wouldest not have come down; but since thou didst not believe, thy children shall be subjected to many nations.

Nevertheless this shall not be forever, for I will redeem them from all the lands of their exile."

When Jacob left his father's house he had with him much silver and gold which his father had given him. Esau, on learning of Jacob's intention to depart, summoned his thirteen-year-old son, Eliphaz, and told him to encounter Jacob on his way and to kill him. Eliphaz with a company of ten men lay in wait for Jacob by the road, but, being of a more gentle disposition (Deut. R. ii. 13), he had pity on him and did not injure him. He, however, took from Jacob all his possessions, so that when the latter came to Laban he had nothing with him ("Sefer ha-Yashar," end of "Toledot").

Leah and Rachel.

From the very first Jacob suspected that Laban would deceive him, and he therefore gave Rachel a sign by which she might cause him to recognize her; but she sacrificed her own love for the sake of her sister, and before the marriage revealed Jacob's plan to Leah. When Jacob discovered that Leah instead of Rachel had been given to him he became very angry; but Leah reminded him that he had been guilty of a similar deceit when he obtained the blessing from his father by assuming his brother's disguise (Gen. R. lxx. 17; Midr. ha-Gadol to Gen. xxix. 23; comp. B. B. 123a). In his machinations to obtain sheep from Laban's flock, Jacob was assisted by angels who brought sheep to him from Laban's herds. There are several estimates of the number of Jacob's flock, ranging from 200 to 2,207,100 (Gen. R. lxxiii. 8; comp. commentary to Gen. R.). These sheep Jacob gave to his children to watch, for he would not take any time that belonged to his employer Laban (Midr. ha-Gadol to Gen. xxx. 40).

The encounter between Jacob and the angel who subsequently injured his thigh is explained in the following manner: When Jacob had transported a part of his belongings over the Jabbok, he met an angel who appeared to him as a shepherd; and when Jacob returned to gather up the rest of his belongings the angel accused him of stealing from his flock, and the encounter ensued. Others think that it was the tutelary angel of Esau whom Jacob met; while still others identify him with the angel Michael, who came to reproach Jacob for neglecting to give a tithe of his possessions to God, as he had promised (Yalḳ., Gen. 132; Pirḳe R. El. xxxvii.; Tan., Gen. 87b). The angel, although defeated by Jacob, injured the latter's thigh; and when the sun rose he begged Jacob to let him go (comp. Hos. xii. 5), as the time for adoration had arrived, and if he, who was to begin the service, was away, the adoration of the angels could not take place. Jacob, however, eager for a blessing, would not let him go until he blessed him. The angel was compelled to submit; and in changing his name from "Jacob" to "Israel" he promised him that his children should be as righteous as he. The wound inflicted by the angel was cured when the sun appeared (Gen. R. lxxix. 5; Yalḳ., Gen. 133).

When Laban returned to his place (Gen. xxxii. 1) he was not reconciled to Jacob's departure. He then, with the purpose of avenging himself, sent his son Beor, aged seventeen, and Abiharof, son of Uz, son of Nahor, with an escort of ten men, to Esau, saying unto him, "Have you heard what your brother has done unto us? He who came unto me poor and forsaken, that I went to meet, and brought up, and to whom I gave my two daughters and their maids, and whom God blessed for my sake, so that he became mighty and had sons and daughters and female slaves, and sheep and oxen and camels and asses, and much gold and silver—when he saw that his fortune was great he left me, and stole my gods and ran away. Now, behold, I left him in the valley of Jabbok. If thou intendest to go to him, thou wilt find him there, where thou mayest deal with him as thy heart willeth." When Esau heard this he recalled his hatred, and his wrath kindled, and he took his sons and sixty others and gathered all the 340 male descendants of Seir. He divided these into seven parties; placing sixty men under Eliphaz, his first-born, and the other six parties under the sons of Seir. But the messengers of Laban, on leaving Esau, went to the land of Canaan to the house of Rebekah, and said, "Behold thy son Esau is preparing to attack Jacob with 400 men because he has heard that he is coming." Rebekah therefore hastened and took seventy-two men from among the servants of Isaac to meet Jacob before his arrival, because she thought that Esau would give battle on the way. When Jacob saw them he said, "This host comes unto me from God"; and he called the place "Mahanaim" ("Sefer ha-Yashar," section "Wayesheb"). According to others (Gen. R. lxxiv. 16), the host consisted of 120 myriads of angels.

When the messengers of Rebekah met Jacob they said unto him in her name, "My son, I have heard that Esau, thy brother, comes to meet thee with men from the sons of Seir. And now, my son, listen to my voice and consider what shall be done. Do not speak hard words unto him; pray for his mercy and give him from thy fortunes as much as thou canst afford; and when he shall ask thee about thy affairs, conceal from him nothing. Perhaps he will be induced to forget his great anger, so that thou and all depending upon thee will be saved; for it is thy duty to respect him, seeing that he is thy elder brother."

Meeting with Esau.

When the brothers again met and Esau fell on Jacob's neck, it was his intention to bite him; but Jacob's neck became hard as marble, so that Esau's teeth were injured by the contact. This explanation is derived from the fact that the word "wa-yishshaḳehu" ("and kissed him"; Gen. xxxiii. 4) has dots on the top of each letter.

Although Jacob's gifts were accepted, he still feared the anger of his brother; and during the eighteen months that he lived in Succoth he sent presents to his brother, which, however, his descendants, the nations, will return to the Messiah (comp. Ps. lxxii. 10). Jacob's fears were well grounded; for in the year that Leah died, when Jacob least expected him, and had only 200 slaves with him, Esau returned with a large and formidable army. Jacob pleaded with Esau from the wall of the fortress; but Esau would not listen. Then Judah took his bow and shot Admon the Edomite, and also hit Esau in his right loin with an arrow which later caused his death (Yalḳ., Gen. 133). Jacob entered Shechem "perfect" ("shalem") in every respect, both spiritually and materially (Shab. 33b).

Simeon and Levi did not ask their father's advice in destroying the inhabitants of Shechem; and Jacob was very angry when he heard of the action of his children. Still, after the act was done, he girded his sword and was ready to meet the enemy (Gen. R. lxxx. 9; comp. *ib.* xcvii. 9). Although the surrounding nations were afraid to fight them at that time, they did so seven years later, when they saw that Jacob had made Shechem his home and was intent upon inheriting the land. The war lasted six days; and every day witnessed great victories for Jacob and his sons. On the sixth day all the kings of the Amorites made peace with Jacob, agreeing to pay him a certain tribute (Yalḳ., *l.c.*; "Sefer ha-Yashar," section "Wayishlaḥ"; comp. Jubilees, 34; see AMORITES; JUDAH IN RABBINICAL LITERATURE).

When Jacob was about to rest from the persecutions of Esau and from the wars with the neighboring tribes, the troubles of Joseph came upon him. The Rabbis severely censure Jacob for manifesting his love for Joseph by clothing him with a special garment (Yalḳ., Gen. 141; comp. Shab. 10b).

Favoritism Toward Joseph.

The grief of Jacob at the loss of his son was much aggravated by the idea that he would now be unable to establish the twelve tribes, since he dared not marry again because of the oath he had made to Laban that he would take no more wives. Isaac knew that Joseph was living; but he did not reveal this to Jacob, because he thought that if God wished him to know, He would reveal it Himself (Gen. R. lxxxiv. 19; Yalḳ., Gen. 143). When his children brought him the report that Joseph was still living, and that he was the ruler of all Egypt, Jacob refused to believe it, until they told him in the name of Joseph at what portion of the Law they had suspended their studies twenty-two years before. Then Jacob rejoiced in the thought that Joseph still retained his piety, and immediately prepared for his journey. Before he went to Egypt he stopped at Beer-sheba, and cut down cedars which Abraham had planted and which were later used by the Israelites in the building of the Tabernacle (Gen. R. xciv. 3, xcv. 2).

Before his death Jacob wished to reveal to his children the time of the Messiah's advent, but he could not recall it at that moment. When they were all gathered around his death-bed he said to them, "Perhaps there is in your hearts a feeling against God?" (that is to say, an inclination to idolatry). Then they all cried out, "Hear, O Israel, the Lord is our God, the Lord is One." He replied, "Blessed be the name of the glory of His kingdom forever and ever" (Gen. R. xcviii. 4; Pes. 56a).

His Death.

Jacob gave three commandments to his children before his death: (1) that they should not worship idols; (2) that they should not blaspheme the name of God; and (3) that they should not permit a pagan to touch his hearse. Three of his sons were to be stationed on each side of the coffin even as the tribes were later stationed in the wilderness. The Rabbis looked with disfavor upon Joseph's order to have his father embalmed; for to them it manifested a lack of faith in the providence of God.

When Jacob's sons reached the cave of Machpelah, they found Esau there prepared to prevent them from interring their father's body in the ancestral cave, and claiming that the place belonged to him. Jacob, however, had foreseen such a complication, and had previously bought the place from Esau; but the deed of sale was in Egypt, and there was nothing to do but to send some one back to Egypt to procure the document. Naphtali, the swift, volunteered to go, but Hushim, the son of Dan, who was hard of hearing, meanwhile inquired about the delay. When told the reason he said angrily, "Shall my grandfather's body lie and wait until the deed is obtained from Egypt?" and threw a missile at Esau so that his eyes fell out on the knees of Jacob, who opened his eyes and smiled. Then it was that Rebekah's words, "Why should I be bereft of both of you in one day?" (Gen. xxvii. 45) were fulfilled (Yalḳ., Gen. 162; "Sefer ha-Yashar," section "Wayeḥi"; comp. Soṭah 13a). Another opinion is that Jacob had not died, although the embalmers and the mourners thought that he was dead (Ta'an. 5b; Rashi and MahrShA, *ad loc.*; comp. B. B. 17a, 121b). See ESAU; JOSEPH; PATRIARCHS.

S. S. J. H. G.

JACOB, BLESSING OF.—Biblical Data: Name given to the chapter containing the prophetic utterances of Jacob concerning the destiny of his twelve sons as the fathers and representatives of the twelve tribes (Gen. xlix. 1–27). It is called thus after verse 28: "Every one according to his blessing he blessed them"; though in reality many of the utterances contain rebukes rather than blessings. Jacob is represented as revealing to his sons that which shall befall them "in the last days." Reuben is told that he has forfeited his birthright—that is, his leadership among the tribes—on account of his incestuous conduct with reference to Bilhah (Gen. xlix. 3–4; comp. *ib.* xxxv. 22; I Chron. v. 1). Simeon and Levi are called brethren whose inborn nature (for "mekerah" or "mekurah" = "kinship"; comp. Ezek. xxi. 35 [A. V. xxii. 3], xxix. 14) it is to handle weapons of violence (A. V. "instruments of cruelty"); their fate—"to be divided in Jacob and scattered in Israel," instead of forming two strong tribes—is declared to be due to their fierce anger shown at the massacre of the men of Shechem (Gen. xlix. 5–7; comp. *ib.* xxxiv. 25).

Judah, on the other hand, is addressed as the leader of the tribes, before whom his enemies shall flee and his brethren shall bow down. The rather obscure verse, "The scepter shall not depart from Judah, nor a lawgiver from between his feet until Shiloh come, and to him shall the gathering of the peoples be," seems to refer to David as having been elected king in Shiloh (this is not in harmony with II Sam. v. 3; but the whole history of Shiloh is wrapped in mystery; see SHILOH). Judah's land, as producing wine, is especially praised (Gen. xlix. 8–12). Zebulun is told that he shall dwell on the coast of the sea and be a neighbor of the Phenician merchant city of Sidon (*ib.* verse 13). Issachar with his beautiful land is rebuked for having allowed himself from love of ease to become a tribute-paying servant to the Canaanite (verses 14–15). Dan is represented as struggling hard for his existence among the tribes; he can assail his mightier foe only by waylaying him and acting like the serpent, which bites the heels of the horse so that the rider falls. The situation is that of the later time of the Judges (verses 16–18; comp. Judges i. 35, v. 17, xviii. 1–29). The tribe of Gad is depicted as being pursued by troops of the neighboring tribes of Ammon or Moab, but at last overcoming them by falling upon them in the rear (Gen. xlix. 19). Asher is praised only because of its land, which yields choice fruits for the table of kings (*ib.* verse 20). Naphtali, according to the Masoretic text, is declared to be a "hind let loose; he giveth goodly words"; but this fails to convey a clear idea, and the original reading seems to have been: "Naphtali is a stretched-out terebinth ["elah" instead of "ayyalah"], sending forth beautiful branches." It refers to the beautiful landscapes of the country (*ib.* verse 21; comp. Deut. xxxiii. 23). Signal blessing is conferred upon Joseph, who is called "a fruitful bough by the well, whose branches run over the wall." His tribe is described as being engaged in warfare but coming forth victorious, strengthened by the mighty God of Jacob and by the arms (read "mi-zero'e" instead of "mi-sham ro'eh") of the Rock of Israel. In consequence of this he possesses the hills of Ephraim, rich in blessing (Gen. xlix. 22–26). Benjamin, the warrior tribe (Judges iii. 15, xx. 16; I Chron. viii. 40, xii. 2), is likened to a wolf that devours its prey in the morning and divides the spoil at night (Gen. xlix. 27).

E. C. K.

——**Critical View**: It has been held by some authorities that the text is not intact. Verses 10, 25, 26, and probably verse 18, are regarded as interpolations. Verse 10 interrupts the continuity of thought, verse 11 taking up the thread dropped in verse 8. All these verses touch upon the possession of the land of promise; whereas verse 10 refers to the future and to the submission of the people. Verses 25 and 26 bear a suspicious resemblance to Deut. xxxiii. 13–16; and while the text of verses 22–24, corresponding to other very ancient songs, presents a knotty problem, verses 25 and 26 are comparatively intelligible (Fripp, in "Zeit. für Alttestamentliche Wissenschaft," 1891, pp. 262 *et seq.*; Holzinger, "Commentar zur Genesis," *ad loc.*). The lack of connection between verse 18 and the other verses is made clear by the form of the matter: the speech concerning Dan consists of three couplets, and verse 18 seems to hobble lamely after. Moreover, the idea expressed in verse 18 is different from that of the other verses (comp. Ball, "S. B. O. T." *ad loc.*).

Origin of the Song.

The question as to the origin of the song is independent of the age of the Pentateuchal sources; for there is no doubt that the song bears no relation to them, and that it had been composed before the time of the author who introduced it into his narrative. It is difficult to determine who that author was; yet, since Reuben's great transgression and the dispersion of Levi and Simeon, here mentioned, were likewise touched upon, in fact were more explicitly given, in the oldest source (J)—in Gen. xxxiv., xxxv. 22—it is highly probable that J was the one who wove the song into his story. Consequently the origin of this oldest source determines the latest date at which the song could have been written.

Date of Composition.

The difficulty of an exact determination is increased by doubt concerning the unity of the composition. The first to dispute its unity was E. Renan ("Histoire Générale des Langues Sémitiques," p. iii.); and the conjecture that the song consists of sayings originating in different periods gains more and more credence (J. P. N. Land, "Disputatio de Carmine Jacobi," 1857; Kuenen, Holzinger, and others). The great variety of forms in the song supports this theory: while the language of one part is smooth and clear, another part is obscure. The determination of the correctness of this theory involves an investigation of the age of each verse; and in several instances this can not be ascertained, since the verses indicate nothing concerning the time of their origin (see verses on Zubulun, Gad, Asher, and Naphtali). The verses on Issachar have reference to the period after the struggles of Deborah (Judges v.); the verses on Dan, describing his battles in the north, where in his conflicts with the surrounding nations he maintained the old Israelitish custom of making an insidious rear attack instead of offering a bold challenge, refer to the time after Judges xvii. *et seq.*; and the verses on Judah (8, 11) presuppose the kingdom of Judah. The comparison of Judah to a lion's whelp seems to characterize him as a rising power. This may apply to different periods, not necessarily to the time of David.

The verses on Joseph (22–27) allude to a defensive war, in which Joseph was successful. Since the text refers to archers, and the Arabs were excellent marksmen, Dillmann thinks that the war was with the Arabs. But his conjecture is erroneous; for the conflicts with the Arabs were confined to the portion of Manasseh east of the Jordan, and the term "Joseph" designates the portion of the tribe of Joseph dwelling west of the Jordan. Since, moreover, the reference could not have been to the Philistines, by whom the tribe was occasionally subdued, the verse clearly alludes to the Arameans of Damascus, with whom the conflicts were of long duration, often threatening the safety of the tribe of Joseph—that is, of the Northern Kingdom. Verse 24, however, bears no testimony of times following the glorious period of Jeroboam II.; consequently the passage on Joseph points to the ninth century. Probably it was in the second half of this century, at all events before the conquests of Jeroboam, and evidently in the Southern Kingdom, that the collection of these pithy descriptions of the tribes was completed. If verses 25 and 26 are interpolations, this is the only interpretation which would also explain both the esteem felt for Judah, expressed in the passage on him, and the silence concerning the Benjamite kingdom and possibly even the Northern Kingdom.

Dillmann endeavored to arrive at the same conclusion by the supposed sequence in the enumeration of the minor tribes, proceeding from south to north. But this supposition is not tenable; for the very first tribe mentioned is the most northerly, and, furthermore, the sequence is broken by Gad. However, even if there were an exact geographical succession of tribes from south to north, it would prove nothing concerning the home of the collector of the passages, since the same order would have been natural for an Ephraimite (comp. Holzinger *ad loc.*).

Zimmern's attempt (in "Zeit. für Assyriologie," 1892, pp. 161 *et seq.*) to connect Jacob's blessing with the Babylonian representation of the zodiac, specifically with the Gilgamesh epic, can not be regarded as successful. Ball has given some important and well-founded arguments against this theory (Commentary on Genesis in "S. B. O. T." pp. 114 *et seq.*). Zimmern himself does not assume that the poet or collector of the song was aware of the original significance of each passage.

Historically, Jacob's blessing is of the greatest value, both because it is the only source of information for certain of the tribes in ancient times, and because it is an aid in rendering the sources (for example, Gen. xxxiv.) more intelligible.

E. C. W. N.

JACOB: 1. Tanna of the second century; probably identical with Jacob b. Ḳorshai (= "the Ḳorshaite," or "of Ḳorsha"), the contemporary of Simon b. Gamaliel II. Of his relations with this patriarch the Talmud has preserved the following incident: Nathan the Babylonian and Meïr had determined to humiliate Simon and bring about his deposition by putting to him questions on 'Uḳẓin, which he had not mastered; but Jacob prevented the patriarch's discomfiture by indirectly turning his attention to the neglected treatise (Hor. 13b). He was a grandson of Elisha ben Abuyah on his mother's side (Ḳid. 39b; Ḥul. 142a), and was a teacher of Judah I. (Yer. Shab. x. 12c).

Jacob is frequently met in halakic controversies with Akiba's later disciples (see Tosef., Zeb. x. 9, 11; *ib.* Tem. i. 17; *ib.* Ṭoh. vi. 5, 6). Sometimes he cites Meïr as an authority (Tosef., Ma'as. Sh. ii. 10; *ib.* Yeb. xii. 11). The compiler of the Mishnah cites Jacob (Tosef., 'Ab. Zarah, v. [vi.] 4), and preserves the following eschatological remarks of his: "This world is as if it were a vestibule to the future world: prepare thyself in the vestibule that thou mayest [becomingly] enter the reception-room. One hour devoted to penitence and good deeds in this life is worth more than the whole of the life hereafter [where no opportunity is given for improvement]; and one hour's happiness in the world to come is worth more than all the pleasures of this world" (Ab. iv. 16, 17).

In this spirit Jacob interprets the rewards attached to filial reverence and to sparing the dam when rifling a bird's nest: "That thy days may be prolonged, and that it may go well with thee" (Deut. v. 16, xxii. 7). An incident once came under his notice that seemed to falsify this Scriptural promise. A dutiful son, in obedience to his parent's wish, climbed a tree after some birds. He duly complied with the Scriptural requirements, and yet, in descending, he fell and was killed. Thereupon Jacob remarked, "In this world there is no reward for good deeds: the rewards promised will be awarded in the world which is all good and immeasurably long" (Ḳid. 39b). Many decades later a prominent Babylonian amora remarked, "Had Aḥer [Elisha b. Abuyah] interpreted those promises as did his daughter's son he would not have become a sinner" (*ib.*; comp. Yer. Ḥag. ii. 77b; Eccl. R. vii. 8).

2. Palestinian amora of the fourth century; contemporary of R. Jeremiah; probably identical with Jacob b. Aḥa (comp. Pes. 91b with Yer. Pes. viii. 36a, B. M. 101a with Yer. B. Ḳ. ix. 6d, and 'Ab. Zarah 13b with Yer. 'Ab. Zarah i. 39d).

s. s. S. M.

JACOB B. AARON OF KARLIN: Russian rabbi and author; died at Karlin, government of Minsk, 1855. He was a grandson of Baruch of Shklov, the mathematician and author, and was one of the earliest and most renowned graduates of the yeshibah of Volozhin. He held the office of rabbi at Karlin for about thirty years, and was considered one of the greatest rabbinical authorities of his time.

Jacob was the author of: (1) "Mishkenot Ya'aḳob" (Wilna, 1838), responsa on the four parts of the Shulḥan 'Aruk; (2) "Ḳohelet Ya'aḳob" (*ib.* 1857), novellæ on the tractates of the Talmudic orders Zera'im and Mo'ed; and (3) another collection of responsa.

Bibliography: Fuenn, *Keneset Yisrael*, p. 574.

s. s. N. T. L.

JACOB B. ABBA: 1. Babylonian scholar of the third century; junior to Rab (B. M. 41a). He was an expert dialectician, and prevailed in argument even against his famous senior (Yer. Sanh. vii. 25c).

2. Amora of the fourth century; contemporary of Abaye and Raba (b. Joseph). His patronymic is variously given as "Abba," "Abaye," "Abina," "Abuha," "Abun," and "Aibu" (comp. Yer. Sanh. x. 28b; Gen. R. xlii. 3; Ruth R., proem, 7; Tan., Aḥare Mot, 7; *ib.*, ed. Buber, 9; Num. R. ii. 26). As regards his nativity, he appears in the company of Palestinian scholars (Pesiḳ. viii. 71a; Lev. R. xxviii. 6), but also, before the leaders of the fourth amoraic generation, in Babylonia ('Er. 12a; Ḳid. 31b). The fact, however, that he was a favorite in Babylonia would make it seem more probable that he was a Babylonian by birth. Whenever Jacob returned from school his father and mother would vie with each other in waiting on him; but this Jacob did not consider consonant with the respect due from child to parent; he therefore appealed to Abaye, who told him: "Thy mother's services thou mayest receive, but not those of thy father, who is himself a scholar" (Ḳid. 31a). He doubtless visited Palestine, since he is mentioned in the company of Palestinians; but as an old man he is found in Babylonia (Zeb. 70b).

JACOB B. ABBA MARI. See Anatolio (Anatoli), Jacob ben Abba Mari.

JACOB BAR ABINA (ABIN; BUN): Palestinian amora of the fourth century. He is known as having transmitted the haggadot of Samuel b. Naḥman, Abbahu, and Abba b. Kahana (Eccl. R. i. 5). Jacob is reported to have had a heated controversy with R. Jeremiah on the question of the payment of taxes to the Roman government (Yer. M. Ḳ. iii. 1).

JACOB BEN ABRAHAM FAITUSI (פייתוסי): Tunisian scholar; died at Algiers July, 1812. He settled in the later part of his life at Jerusalem, whence he was sent as a collector of alms to Italy and Algeria. He was the author of "Berit Ya'aḳob" (Leghorn, 1800), the contents of which were as follows: sermons; Bezaleel Ashkenazi's "Shiṭṭah Meḳubbeẓet" on Soṭah, with the editor's notes, entitled "Yagel Ya'aḳob"; glosses of the Geonim on the Talmudical treatises Nedarim and Nazir, with the editor's notes; commentaries on Nazir by Abraham ben Musa; "Sha'are Ẓedeḳ," a commentary, attributed to Levi ben Gershon, on the thirteen hermeneutic rules of R. Ishmael; novellæ on Ḥullin and Pesaḥim; and poems, entitled "Ḳontres Aharon."

Jacob wrote also "Yerek Ya'aḳob" (*ib.* 1842), sermons arranged in the order of the Sabbatical sections, with an appendix entitled "Ya'ir Kokab mi-Ya'aḳob," containing novellæ and responsa, and edited "Mizbaḥ Kapparah" of Naḥmanides; Bezaleel Ashkenazi's "Shiṭṭah Meḳubbeẓet" on Zebaḥim and various tosafot of Rabbi Perez, Eliezer of Touques, and others on several Talmudical treatises, with an appendix entitled "Ranenu le-Ya'aḳob" (*ib.* 1810) containing Talmudic novellæ and sermons by Jacob (republished with additions by Saul ha-Levi, Lemberg, 1861); "Sefer Mar'eh ha-Ofannim" (Leghorn, 1810), containing Asher ben Jehiel's novellæ on Soṭah, Aaron ha-Levi's "Shiṭṭah" on Beẓah, and an appendix entitled "Yagel Ya'aḳob," containing novellæ on Pesaḥim, Beẓah, Rosh ha-Shanah, Mo'ed Ḳaṭan, 'Abodah Zarah, and Makkot.

D. I. Br.

JACOB BAR AḤA: **1.** Palestinian amora of the third generation (latter part of the third century); contemporary of R. Ze'era. He rarely gives opinions of his own, but repeats halakot and homiletic remarks in the names of earlier authorities. In Yer. Ber. 11a he communicates in the name of Rabbi Johanan a halakah relating to grace at meals. In the name of R. Eleazar (probably ben Pedat) he reports that in the words "Hide not thyself from thine own flesh" (Isa. lviii. 7) the prophet refers to a divorced wife, whom her former husband has to support (Lev. R. xxxiv. 14).

Jacob bar Aḥa associated with Assi (Yer. Meg. 74b); and it is also recorded that he once took a meal together with Ze'era, Ḥiyya bar Abba, and Ḥanina, and was invited to say grace (Yer. Ber. 11a).

2. Palestinian amora of the fourth generation; a contemporary of Hezekiah, with whom he associated (Yer. Ber. ii. 5a, iii. 6a; Ket. v. 30a).

Bibliography: Zacuto, *Yuḥasin*, ed. Königsberg, 95a; Frankel, *Mebo ha-Yerushalmi*, 104b, 105a; Bacher, *Ag. Pal. Amor.* ii. 178 and Index; Heilprin, *Seder ha-Dorot*, i. 236.

s. s. I. Br.

JACOB BEN AMRAM: Polemical writer of the seventeenth century. He wrote in 1634, in Latin, a book against the religion of the Christians, with the Hebrew title "Sha'ar Emet" ("Porta Veritatis"). He borrows largely from Manasseh ben Israel, but that Manasseh himself was not the author of this book was proved by Wolf. The English bishop Richard Kidder, in his "Demonstratio Messiæ" (part iii., London, 1684, etc.), wrote a refutation of Jacob ben Amram's arguments.

Bibliography: Jöcher, *Allgemeines Gelehrtenlexicon*, ii. 1806; Steinschneider, *Jewish Literature*, p. 213; Wolf, *Bibl. Hebr.* i. 686, iii. 442.

J. M. Sc.

JACOB BEN ASHER (known also as **Ba'al ha-Ṭurim**): German codifier and Biblical commentator; died at Toledo, Spain, before 1340. Very little is known of Jacob's life; and the few glimpses caught here and there are full of contradictions. According to Menahem b. Zerah ("Ẓedah la-Derek," Preface), Jacob was the third son of Asher, and older than Judah. Indeed, Jacob is usually mentioned before Judah. On the other hand, Jacob himself, in his introduction to the Ṭur Oraḥ Ḥayyim, which he wrote after his father's death, at a time when Judah was more than fifty years old (comp. Judah's testament, published by S. Schechter in "Bet Talmud," iv. 340 *et seq.*), says that he himself was then a young man. What is definitely known is that, contrary to the assertions of Gedaliah ibn Yaḥya ("Shalshelet ha-Ḳabbalah," ed. Zolkiev, p. 47b) and Heilprin ("Seder ha-Dorot," p. 169), Jacob emigrated with his father to Spain, where in 1317 he and his brother Judah were appointed by their father treasurers of the money which the family had to distribute as alms, his signature to his father's testament coming before Judah's (Schechter, *l.c.* p. 375). Besides his father, who was his principal teacher, Jacob quotes very often in the Ṭurim his elder brother Jehiel; once his brother Judah (Ṭur Oraḥ Ḥayyim, § 417), and once his uncle R. Ḥayyim (*ib.* § 49).

His Life.

Jacob was very poor all his lifetime and suffered great privations (Ṭur Oraḥ Ḥayyim, § 242; comp. his epitaph in Luzzatto, "Abne Zikkaron," No. 7). His business seems to have consisted in lending money (Ṭur, *l.c.* § 539). It is also known, contrary to the statement of Zacuto ("Yuḥasin," ed. London, p. 223), that Jacob did not succeed his father in the rabbinate of Toledo, his brother Judah filling that office (Schechter, *l.c.*, Luzzatto, *l.c.* No. 5). Jacob's testament (Schechter, *l.c.* 378 *et seq.*) betrays a lofty spirit. He wandered in different countries, where he observed the varying religious customs which he quotes in his Ṭurim; but his epitaph (Luzzatto, *l.c.* No. 7) refutes the assertion of Azulai ("Shem ha-Gedolim," i.) that he died and was buried in Chios. His pupil David

Abudarham, writing in 1340, speaks of Jacob as already dead.

The Ṭurim.

Jacob was one of the pillars of rabbinic learning. His name became known throughout the entire Jewish world through the following works, which he wrote probably in Spain: (1) "Sefer ha-Remazim," or "Ḳiẓẓur Pisḳe ha-Rosh" (Constantinople, 1575), an abridgment of his father's compendium of the Talmud, in which he condensed his father's decisions, omitting the casuistry. This work is arranged in the same order as the treatises of the Talmud, and is quoted by Jeroham b. Meshullum ("Sefer Mesharim," Preface), Simeon b. Ẓemaḥ Duran (Responsa, iii., No. 86), Elijah Mizraḥi (Responsa, No. 4), and other Talmudists. (2) The four Ṭurim, namely, (*a*) Ṭur Oraḥ Ḥayyim (separately Mantua, 1476), containing the ritual laws relating to the daily prayers, the Sabbath, and holy days; (*b*) Ṭur Yoreh De'ah (separately first third, *ib.* 1476; completed at Ferrara, 1477), containing the laws concerning things lawful and unlawful ("issur we-hetter"); (*c*) Ṭur Eben ha-'Ezer (separately Guadalajara, n.d.), containing the laws relating to marriage and divorce, legitimacy, etc.; and (*d*) Ṭur Ḥoshen ha-Mishpaṭ (edited with the other three, Piove di Sacco, 1475), containing the civil laws. The first complete edition, that of Piove di Sacco, finished July 3, 1475, is the second dated Hebrew book, and must have been begun earlier than the Rashi of Reggio of the same year. It was, after the Bible, the most popular work printed in the fifteenth century, no less than two complete editions and seven editions of parts being printed between 1475 and 1495 (Leiria). See INCUNABULA.

As stated above, Jacob was a young man when he began the Ṭurim, which remained the standard code for both Sephardim and Ashkenazim up to the appearance of the Shulḥan 'Aruk. In the introduction to the Ṭur Oraḥ Ḥayyim he says he was induced to undertake such an immense work by a desire to establish a code suited to the requirements of the time. Maimonides' Yad ha-Ḥazaḳah, being a compilation of all the laws contained in the six orders of the Talmud, was too bulky for general use. Besides, with the course of time, questions arose to which no immediate solution was given in the Talmud. Jacob on the one hand simplified Maimonides' work by the omission of laws which could not be applied after the destruction of the Temple, thus reducing the whole code to four parts, and on the other he inserted an account of the customs which he had observed in various countries. In the Ṭur Oraḥ Ḥayyim Jacob shows a greater deference to Ashkenazic than to Sephardic rabbis, citing the former very often. Once (§ 35) he even bases his decision on the Cabala, and once (§ 113) he speaks of the German Ḥasidim. Just the contrary is the case in the other three Ṭurim, where Sephardic authorities predominate. But throughout the four parts he speaks of the customs of different countries as an eye-witness; and very often he points out the differences between the Ashkenazic and the Sephardic practises.

Jacob was averse to all kinds of controversy; and he recorded the laws as they had been pronounced by preceding expounders ("poseḳim"). In many cases he indicated merely that he was inclined to accept the opinion of a certain authority, without forcing his view upon the student. In many other cases he refrained from expressing his own opinion, and left the decision to the officiating rabbi. He never speaks either favorably or unfavorably of secular sciences, ignoring them altogether.

Commentaries on the Ṭurim.

The Arba' Ṭurim soon became very popular with students; but, as is generally the case with works of this nature, they felt the necessity of writing commentaries upon it. The commentators are: Joseph CARO ("Bet Yosef"), who sometimes criticizes Jacob's text; Moses Isserles ("Darke Mosheh"); Joel Sirkes ("Bayit Ḥadash"); Joshua Falk ("Derishah u-Ferishah"); and Joseph Escapa ("Rosh Yosef"), who deals with only a part of the work. The four Ṭurim have been unduly depreciated by Grätz and A. Geiger because they were not written in the philosophical spirit of Maimonides.

Jacob wrote also two commentaries on the Pentateuch: (1) "Rimze Ba'al ha-Ṭurim" (Constantinople, 1500), which is printed in all the editions of the Pentateuch accompanied by commentaries, and consists only of gemaṭria, noṭariḳon, and Masoretic calculations; (2) "Perush 'al ha-Torah," less known (Zolkiev, 1806), and taken mainly from Naḥmanides, but without his cabalistic and philosophical interpretations. Jacob quotes many other commentators, among them Saadia, Rashi, Joseph Ḳara, Abraham ibn Ezra, Ḥiyya ha-Sefaradi, which last name Geiger erroneously emends to "Abraham b. Ḥiyya" ("Wiss. Zeit. Jüd. Theol." iv. 401; comp. Carmoly in "Orient, Lit." xii. 373).

S. S. M. SEL.

JACOB (ABERLE, ABRIL) BENEDICT (BENET): Rabbi at Alt-Ofen at the beginning of the nineteenth century; son of Mordecai b. Abraham BENET (Marcus Benedict). Jacob was the author of "Toledot Mordekai Benet" (Alt-Ofen, 1832). The first part contains a biography, and the second various writings of his father: "Liḳḳuṭim," explanations of Biblical passages; homiletic explanation of "dayyenu" as it occurs fifteen times in the Pesaḥ Haggadah; sermon on Shabbat Teshubah, delivered in 1826; commentary on the song of Deborah; "Ḥiddushe Halakot." The biography is written in a pure and easy Hebrew style.

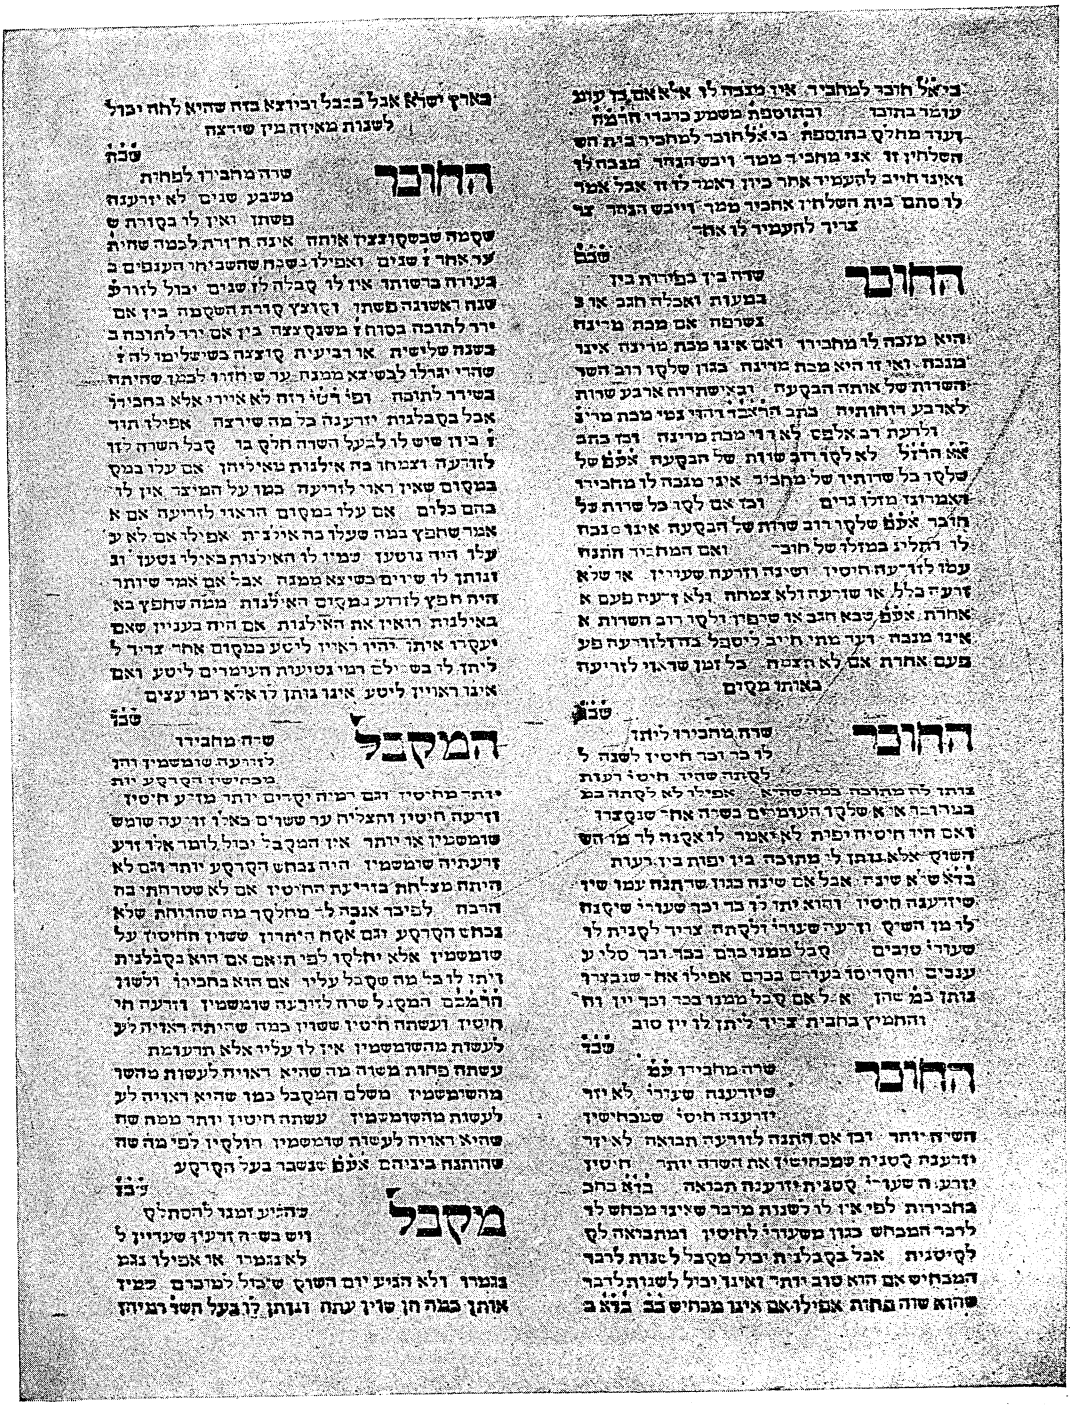
G. M. SC.

JACOB BEN BENJAMIN ZEEB SAK: Lithuanian Talmudist; born in the first half of the seventeenth century at Wilna, Russia; died at Jerusalem. Driven from his native city by the Chmielnicki persecutions, he left Russia with his father-in-law, Ephraim ben Aaron. On the way they were separated by their pursuers, and after barely escaping



Page from the First Edition of Jacob ben Asher's "Arba' Ṭurim," Piove di Sacco, 1475.

(In the Library of Columbia University, New York.)

death Jacob wandered about for several months, finally arriving at Trebitsch, Moravia, where he found his father-in-law.

About 1665 Jacob was appointed rabbi of Trebitsch, later of Ungarisch-Brod, and after the death of Ephraim he officiated in Ofen. There also fate was against him; for the city was captured in 1686 by the imperial troops, and Jacob was carried captive to Berlin. Ransomed by the Jews of that city, he lived for some years with his son Ẓebi Ashkenazi in Altona, and then went to Jerusalem, where he died at the age of seventy-three.

S. S. A. PE.

JACOB, BENNO: German rabbi and Biblical scholar; born at Breslau Sept. 8, 1862; educated at the gymnasium, the university, and the theological seminary of his native town (Ph.D. 1889). Since 1891 Jacob has been rabbi at Göttingen.

Among his writings may be especially mentioned: "Das Buch Esther bei den LXX." Giessen, 1890; "Unsere Bibel in Wissenschaft und Unterricht," Berlin, 1898. He also edited "Predigten, Betrachtungen und Gebete von Dr. Benjamin Rippner," *ib.* 1901; and has made many contributions to Stade's "Zeitschrift."

JACOB BERAH DE-BAT SAMUEL. See MARI B. RACHEL B. SAMUEL.

JACOB BAR BERATEH DE-ELISHA AḤER. See JACOB, 1.

JACOB ÇADIQUE (ẒADDIḲ): Spanish physician and writer; born at Ucles in the second third of the fourteenth century. He devoted himself to the study of medicine, and became body-physician to D. Lorenzo Suarez de Figueroa, Maestre de Santiago, from whom he received a commission to translate from the Limousinian into the Castilian dialect a moral-philosophical work containing proverbs and sayings from the Old and New Testaments and from the works of Aristotle, Seneca, Cicero, and others. This work, entitled "Libro de Dichos de Sabios é Filosofos," and consisting of seven parts, was finished in Velez July 8, 1402, and is still extant in manuscript in the Escurial. Whether Jacob Çadique was baptized, as Amador de los Rios states, is not certain.

G. M. K.

JACOB OF CHINON: French tosafist; lived about 1190–1260. He was a pupil of Isaac ben Abraham of Dampierre and a teacher of Perez of Corbeil. His two brothers were Nathanael, "the Holy," and Eliezer ben Joseph, "the Martyr," both Talmudical scholars. Jacob wrote: (1) "Shiṭṭah," probably on Sanhedrin, quoted by Mordecai (iii., Nos. 690, 691, on Sanh.; see Benjacob, "Oẓar ha-Sefarim," p. 573); (2) commentary on Giṭṭin; (3) tosafot, some of which are quoted in Ber. 12a and Nazir 53a, and in Mordecai (Shab. x. 377; 'Er. viii. 527; B. M. ii.; comp. "Monatsschrift;" 1878, p. 82).

In the "Semaḳ" on Giṭṭin (No. 81), a passage somewhat doubtful as regards its genuineness, some tosafot of "R. Tam de Chinon" are quoted, while in a corresponding passage in Kol Bo (No. 88) the name of the author is given as "Jacob de Chinon." "R. Tam of Chinon" occurs also in the Halberstam MSS. (No. 345), which makes it appear likely that Jacob of Chinon was known also by that name.

S. S. M. SC.

JACOB OF CORBEIL (called "the Saint"): French tosafist of the twelfth century. He was the brother of Judah of Corbeil, author of tosafot to various treatises of the Talmud. He is sometimes confounded with Jacob ha-Levi, "the Pious," of Marvège or Marvéjols (Lozère, France). Aaron ben Ḥayyim ha-Kohen, in his commentary on the Maḥzor, praises him highly. He is mentioned by Isaac ha-Levi ben Judah in his "Pa'aneaḥ Raẓa" as well as in Judah ben Eliezer's "Minḥat Yehudah."

Jacob of Corbeil wrote tosafot to several Talmudical treatises, and he is frequently mentioned in the Tosafot, *e.g.*, to Ket. 12b; Ḥul. 122b; Beẓah 6b; Shab. 27a, 61a; Pes. 22. The "Memorbuch" of Mayence names Jacob among the martyrs of Corbeil.

L. G. S. K.

JACOB OF COUCY: French tosafist of the thirteenth century; mentioned in tosafot to Ḳiddushin (43b, 67a), by Mordecai, and in Joseph Colon's "She'elot u-Teshubot" (No. 47, Venice, 1579).

BIBLIOGRAPHY: Gross, *Gallia Judaica*, p. 556; Renan-Neubauer, *Les Rabbins Français*, p. 446; Zunz, *Z. G.* p. 50.

JACOB BEN DAVID PROVENÇAL (פרווינצאלי or פרוינצל): French Talmudist of the fifteenth century; not to be confounded with the astronomer Jacob ben David ben Yom-Ṭob Po'el, called "Sen Bonet Bongoron (or Bonjorn) of Perpignan" (14th cent.). Jacob lived at Marseilles, where he was engaged in maritime commerce. Subsequently he retired to Naples, and thence addressed a letter (1490) to David ben Judah Messer Leon of Mantua on the utility of secular studies, and especially of medicine. Jacob was a learned Talmudist, and wrote a letter of approbation for Jacob Landau's casuistic work "Sefer Agur." He wrote also a commentary on Canticles.

G. S. K.

JACOB B. ELEAZAR: Spanish grammarian of the first third of the thirteenth century. The assumption that he lived in the first third of the twelfth century (Geiger's "Jüd. Zeit." xi. 235; Grätz, "Gesch." 3d ed., vi. 110; Winter and Wünsche, "Jüdische Litteratur," ii. 183) is erroneous. He was probably a native of Toledo, where he had access to the famous Bible Codex Hilleli (David Ḳimḥi, "Miklol," ed. Fürst, p. 78b); subsequently he went to southern France, where he wrote "Gan Te'udot" (see below) at the request of Samuel and Ezra, the sons of Judah, who, according to Steinschneider (in "Z. D. M. G." xxvii. 558), are identical with Judah b. Nathanael's sons of the same names, mentioned by Al-Ḥarizi.

Jacob ben Eleazar's chief work, the "Kitab al-Kamil" (Hebr. "Sefer ha-Shalem"), written in Arabic, has long since been lost. Tanḥum Yerushalmi, who quotes it in his lexicon (see Bacher, "Aus dem Wörterbuche Tanchum Jerushalmi's," 1903, p. 42), says in the introduction to his Bible commentary that the book was in reality, and not merely metaphorically, complete, as its name indicated ("R. E. J." xl. 141). Tanḥum's contemporary Abraham Maimonides also cites the work in his Pentateuch commentary ("Zeit. für Hebr. Bibl." ii. 155).

The "Kitab al-Kamil," which probably included a grammar and a lexicon, is cited frequently by David Ḳimḥi; in about twenty articles of his "Sefer ha-Shorashim" he quotes opinions of Jacob's, some of which are most original and remarkable (see ed. Lebrecht and Biesenthal, p. xxviii.). Many citations are found also in an anonymous Hebrew-Arabic lexicon (Steinschneider, "Die Arabische Literatur der Juden," p. 290). As late as the fourteenth century the work was freely quoted by Isaac Israeli of Toledo in his commentary on Job (Neubauer, "Cat. Bodl. Hebr. MSS." No. 383; "Oẓar Neḥmad," iii. 151). A Hebrew author of Damascus (date unknown) says that complete copies of the "Kitab al-Kamil" had been found in Egypt ("Zeit. für Hebr. Bibl." ii. 154). It may be assumed that, the work being very large, only a limited number of copies existed. If Israelson's assumption (really originating with Poznanski in "Zeit. für Hebr. Bibl." ii. 156) is justified, long portions of the grammatical part of the "Kitab al-Kamil" are still extant; namely, the fragments found in a St. Petersburg manuscript and elsewhere, which have been ascribed to the earlier grammarian Isaac ibn Yashush. This fragmentary grammatical work also quotes the Codex Hilleli.

Certain Hebrew works bearing the name of Jacob b. Eleazar have been assigned, and probably correctly, to the author of the "Kitab al-Kamil"; and they are probably among the twelve works by him dealing with different subjects which Tanḥum Yerushalmi mentions (see "R. E. J." xl. 141, note 5).

The following three works of Jacob b. Eleazar are still extant: (1) "Gan Te'udot," a parenetic work on the human soul, written in mosaic style (formerly Halberstam MS., now in the Montefiore collection at Ramsgate; see "R. E. J." xv. 158). Copies of this work, under a different title, seem to be also in the libraries of the Vatican and the Escurial (see Steinschneider in "Z. D. M. G." xxvii. 555 *et seq.*). (2) "Meshalim," parables in "maḳamah" form, written in 1233 at the instance of friends, in order to show that Hebrew was as good a language as Arabic (Munich MS. No. 207). (3) "Sefer Kalilah wa-Dimnah," a Hebrew version of the famous book of fables, in rimed prose, written for a certain Benveniste. Only the beginning of this translation has been preserved (Neubauer, "Cat. Bodl. Hebr. MSS." No. 384); this has been edited by Joseph Derenbourg ("Deux Versions Hébraïques du Livre de Kalilah et Dimnah," pp. 311-388, Paris, 1881; see KALILAH WA-DIMNAH). Two liturgical poems by Jacob b. Eleazar are enumerated in Zunz, "Literaturgesch." p. 201.

T. W. B.

JACOB B. ELIEZER. See TEMERLES, JACOB.

JACOB BEN EPHRAIM: Syrian Talmudist of the tenth century. From Salmon b. Jeroham's commentary to Psalms (cxl. 6) it appears that Jacob b. Ephraim wrote a commentary to the Jerusalem Talmud. He is especially mentioned by the Karaite Joseph al-Ḳirḳisani in his "Ha-Ma'or ha-Gadol," where he recounts a dispute with Jacob ben Ephraim al-Shami in regard to the permissibility of marriage with a niece. Al-Ḳirḳisani states further that he asked Jacob b. Ephraim why they (the Rabbinites) intermarried with the 'Isawite sectaries, and that the latter answered, "They have not seceded from us in regard to the calendar." Pinsker erroneously conjectured that Jacob ben Ephraim was to be identified with the Karaite Ben Ephraim, who was so violently attacked by Abraham ibn Ezra ("Liḳḳuṭe Ḳadmoniyyot," p. 24), while Schorr, ignoring the evidence, denied the existence of Jacob ben Ephraim ("He-Ḥaluẓ," vi. 70).

BIBLIOGRAPHY: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, p. 24 (Supplement, p. 14); Poznanski, in *Steinschneider Festschrift*, p. 201; *idem*, in *J. Q. R.* x. 159.

S. S. M. SEL.

JACOB BEN EPHRAIM OF LUBLIN: Polish rabbi; died in Lublin 1648. At first he occupied the post of rabbi and instructor at the yeshibah of that city, whence he was called to officiate as rabbi in Brest. There he entertained in 1631 R. Yom-Ṭob Lipman Heller, who speaks of him with great respect, and mentions his officiating as rabbi in the two cities cited ("Megillat Ebah," p. 28). From Brest he returned to Lublin as rabbi, and remained there till his death.

Jacob was known as "the Gaon Rabbi Jacob of Lublin"; for he was the teacher of the most eminent Polish rabbis of his time, who studied in his yeshibah and profited by his extensive knowledge of Halakah. Only a few of his responsa have been preserved: these are to be found among the responsa of the Geone Batra'e. Some novellæ by him and by his son R. Höschel, on Yoreh De'ah, Eben ha-'Ezer, and Ḥoshen Mishpaṭ, are still in manuscript.

G. S. KR.

JACOB GEBULAAH (GEBULAYA): Palestinian scholar of the third century; disciple of Johanan (Yer. Yeb. viii. 9b). He seems also to have sat at the feet of Ḥanina b. Ḥama, for he reports the latter's halakot and haggadot, and this even in the presence of Johanan, who on one occasion expressed himself as opposed to an opinion of Ḥanina's quoted by Jacob (Yer. Ḥal. iii. 59a). Jacob transmitted the halakot and haggadot of others also (Yer. Yeb. viii. 9b). Thus, he cites Ḥanina's eschatological interpretation of the passage "A generation passeth away, and a generation cometh" (Eccl. i. 4, Hebr.). Adducing the Biblical "I [the Lord] kill, and I make alive; I wound, and I heal" (Deut. xxxii. 39), Jacob argues that there was no need for the latter clause, since he who can revive the dead is surely able to heal the wounded; the Bible means that as the generation passeth away so the generation will come back; those who were lame at death will return lame, and the blind at death will return blind, all doubt of the identity of the dead and the resurrected being thus precluded. Then, after having revived the dead, the Lord will free them from their infirmities (Eccl. R. i. 4).

S. S. S. M.

JACOB B. GERSHOM HA-GOZER (= "the Mohel"): German Talmudist of the twelfth century. He was a nephew of Ephraim b. Jacob of Bonn, with whom he carried on a scientific correspondence; he had also personal relations with Eliezer b. Joel ha-Levi. As far as is known, Jacob was the first to write a monograph on circumcision. The work published by Glassberg in his collection "Zikron Berit ha-Rishonim" (Berlin, 1892), after a manuscript in the Hamburg Library, under the title "Kelale ha-Milah le-Rabbi Ya'akob ha-Gozer," was not composed by Jacob himself, but by one of his pupils, of whom nothing further is known except that he was also a pupil of Eliezer b. Joel ha-Levi.

The "Kelale" opens with a homily on circumcision, very characteristic of the German preaching of that time; this is followed by a brief but very clear exposition of the processes "milah," "peri'ah," and "meẓiẓah," and by a detailed account of the regulations concerning circumcision on the Sabbath, leading the writer to comment also on the cases when the milah does not take place on the eighth day after birth. The work contains valuable material for the history of the liturgy and the religious customs of the German Jews. Doubtless it is incomplete in its present shape; how much of it can be ascribed to Jacob and how much to the anonymous compiler is unknown. Aside from the Geonim, only German halakists and some authorities of northern France, as Rashi and Jacob Tam, are quoted in the book.

Bibliography: Brüll's *Jahrb.* ix. 12; Müller, in the introduction to *Zikron Berit ha-Rishonim.*

JACOB THE GNOSTIC. See James (the Just).

JACOB BEN HANANEEL SEKILI (= "of Sicily"): Bible commentator and cabalist; lived in the fourteenth century. He was the author of "Minḥat ha-Bikkurim," the first part of which, "Torat ha-Minḥah," is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 984–986). It contains homilies on Genesis, Exodus, and Leviticus, delivered on Sabbath afternoons. The author knew Arabic, quotes Maimonides, and refers to his own large commentary on the Pentateuch, entitled "Talmud Torah." Each section is brought into connection with some verses from the Prophets, and cabalistic explanations are frequent. He wrote also a work on Palestine, treating of localities and of the tombs of prominent men.

Bibliography: *Yuḥasin*, ed. London, p. 228; Azulai, *Shem ha-Gedolim*, ii. 153; Steinschneider, *Jewish Literature*, p. 104; Fuenn, *Keneset Yisrael*, p. 570; Gross, *Gallia Judaica*, p. 434.

K. I. Br.

JACOB BEN ḤAYYIM BEN ISAAC IBN ADONIJAH: Masorite and printer; born about 1470 at Tunis (hence sometimes called **Tunisi**); died before 1538. He left his native country in consequence of the persecutions that broke out there at the beginning of the sixteenth century. After residing at Rome and Florence he settled at Venice, where he was engaged as corrector of the Hebrew press of Daniel Bomberg. Late in life he embraced Christianity. Jacob's name is known chiefly in connection with his edition of the Rabbinical Bible (1524–25), which he supplied with Masoretic notes and an introduction which treats of the Masorah, of "ḳere" and "ketib," and of the discrepancies between the Talmudists and the Masorah. The value of his activity as a Masorite was recognized even by Elijah Levita, who, however, often finds fault with his selections (second introduction to "Massoret ha-Massoret," ed. Ginsburg).

Jacob's introduction to the Rabbinical Bible was translated into Latin by Claude Capellus ("De Mari Rabbinico Infido," vol. ii., ch. 4, Paris, 1667), and into English by Christian D. Ginsburg (Longham, 1865). Jacob also wrote a dissertation on the Targum, prefixed to the 1527 and 1543–44 editions of the Pentateuch, and published extracts from Moses ha-Naḳdan's "Darke ha-Niḳḳud weha-Neginot," a work on the accents. He revised the "editio princeps" of the Jerusalem Talmud (1523), of Maimonides' "Yad," and of many other works from Bomberg's press.

S. R. H. K.

JACOB BEN ISRAEL HA-LEVI: Rabbi of Zante; died on that island in 1634. He was a native of Morea, Greece, and passed the earlier part of his life at Salonica, where he studied under the direction of Aaron Ḥasun. Later he was called to the rabbinate of Zante, a position which he held until his death.

Jacob combined great Talmudical learning with extensive secular knowledge, and was highly esteemed by his contemporaries. He was the author of the following works: "She'elot u-Teshubot Rabbi Ya'aḳob le-Bet Lewi" (2 vols., Venice, 1614; with additions, 1632), responsa; "Derushim," sermons arranged in the order of the Sabbatical sections, no longer extant; a translation of the Koran from the Latin into Hebrew, with an essay on the history of Mohammed and his religion. This translation is still in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2207). A funeral oration on Jacob pronounced by Azariah Figo is inserted in "Binah le-'Ittim" (No. 73).

Bibliography: Conforte, *Ḳore ha-Dorot*, p. 47a; Azulai, *Shem ha-Gedolim*, s.v.; Michael, in *Orient, Lit.* ii. 606; Steinschneider, *Cat. Bodl.* col. 1221; Fuenn, *Keneset Yisrael*, p. 552.

S. S. I. Br.

JACOB B. JACOB HA-KOHEN: Spanish cabalist of the end of the thirteenth century; born at Soria; buried at Segovia; also called **Gikatilla**, according to Jellinek ("Beiträge zur Gesch. der Kabbala," ii. 49). The cabalist Isaac ha-Kohen of Béziers was his elder brother, and outlived him. Nothing definite is known regarding Jacob's life. Of his works only "Tefillat R. Ya'aḳob mi-Seguba," a cabalistic prayer, has been printed (in Gabriel Warschauer's "Liḳḳuṭim me-Rab Hai Gaon"). His most important work is "Perush Ẓurot ha-Otiyyot," on the form of the letters of the Hebrew alphabet.

Bibliography: Steinschneider, *Hebr. Bibl.* 1877, xvii. 36.

K. P. B.

JACOB BEN JACOB MOSES OF LISSA: German Talmudist; died in Stryj, Galicia, May 25, 1832. He was a great-grandson of Ẓebi Ashkenazi and a pupil of Meshullam Eger. Jacob was ab bet din in Kalisz and afterward in Lissa, and is usually quoted as Jacob of Lissa or Jacob Lisser. Later he returned to Kalisz and lived there for ten years. Jacob wrote: "Ta'alumot Ḥokmah," commentary on Ecclesiastes (Lemberg, 1804; Dyhernfurth, 1819); "Ẓeror ha-Mor" and "Palge Mayim," commentaries on Canticles and Lamentations, under the general title "Imre Yosher" (*ib.* 1815 and 1819); the character of all three is homiletic-haggadic. Jacob had intended to write commentaries on the Five Megillot also under this title.

Jacob's importance, however, rests upon the following halakic writings, all of which contain ḥiddushim and bi'urim: (1) "Sefer Ḥawwot Da'at," commentary on Shulḥan 'Aruk, Yoreh De'ah, 69–201; the earlier sections of Yoreh De'ah (1–68) are very briefly dealt with in the form of an introduction to the work (Lemberg, 1799; Dyhernfurth, 1810, and often since in editions of the Yoreh De'ah, as the Wilna [1894] ed.). In it the works of earlier commentators are discussed and somewhat pilpulistically developed. (2) "Sefer Meḳor Ḥayyim," commentary on Shulḥan 'Aruk, Oraḥ Ḥayyim, 429 and following, with notes on the commentaries "Ṭure Zahab" and "Magen Abraham"; the second part contains ḥiddushim on Keritot (Zolkiev, 1807; Frankfort-on-the-Oder, 1813; Warsaw, 1825; Dyhernfurth, 1827). (3) "Sefer Netibot ha-Mishpaṭ," commentary on Shulḥan 'Aruk, Ḥoshen Mishpaṭ, in two parts (Dyhernfurth, Lemberg; Zolkiev, 1809, 1816; Sudilkov, 1830; and often since in Lemberg editions of Shulḥan 'Aruk, Ḥoshen Mishpaṭ). (4) "Sefer Torat Giṭṭin," commentary on Shulḥan 'Aruk, Eben ha-'Ezer," 119–155, and ḥiddushim on the Talmudic treatise Giṭṭin (Frankfort-on-the-Oder, 1813; Warsaw, 1815). (5) "Sefer Bet Ya'aḳob," commentary on Shulḥan 'Aruk, Eben ha-'Ezer, 66–118, and on the Talmudic treatise Ketubot (Grubeschow, 1823). (6) "Sefer Ḳehillat Ya'aḳob," a collection of discussions and notes on several legal points in the Eben ha-'Ezer and Oraḥ Ḥayyim (Lemberg, 1831).

Toward the end of his life Jacob composed a short compendium of dinim, under the title "Derek ha-Ḥayyim" (Zolkiev, 1828; Altona, 1831). This compendium is very popular and was frequently reprinted in the larger Hebrew prayer-books. These dinim are taken either from later exponents of the Law as contained in the works "Ṭure Zahab," "Magen Abraham," "Peri Megadim," etc., or from his own decisions. The sources from which he borrowed are usually indicated.

Jacob wrote also a commentary on the Pesaḥ Haggadah under the title "Ma'aseh Nissim," with the text and a short compendium of the Passover ritual ("Kiẓẓur Dinim"; Zolkiev, 1807, 1835; Minsk, 1816; Dyhernfurth, 1817, and later). After Jacob's death his grandson Naphtali Z. N. Chachamowicz published his "Naḥalat Ya'aḳob" (Breslau, 1849), containing sermons on the Pentateuch, halakic ḥiddushim, responsa, and his last will.

S. S. M. Sc.

JACOB BEN JEKUTHIEL: French Talmudic scholar; born at Rouen; died at Arras in 1023. Jacob became known by the fact that he was the bearer of a petition to Pope John XVII. praying him to stop the persecution of the Jews in Lorraine (1007). These persecutions, organized by King Robert of France, are described in a Hebrew pamphlet published in Berliner's "Magazin" (iii. 46–48, Hebrew part, reproducing Parma [De Rossi] MS. No. 563, 23; see also Jew. Encyc. v. 447, *s.v.* France). They were so terrible that many women, in order to escape the fury of the mob, jumped into the river and were drowned. Jacob undertook the journey to Rome, but was imprisoned with his wife and four sons by Duke Richard (doubtless Richard the Fearless of Normandy), and escaped death only by a miracle. He left his eldest son, Judah, as a hostage with Richard while he with his wife and three remaining sons went to Rome. He made a present of seven gold marks and two hundred pounds to the pope, who thereupon sent a special envoy to King Robert ordering him to stop the persecutions.

Jacob stayed in Rome till the return of the envoy, a space of four years, during which time he made the acquaintance of the three members of the Roman rabbinate, Moses Nasi, Abraham, and Shabbethai. He then went to Lorraine and remained there twelve years. In 1023, being invited by Count Baldwin of Flanders to settle in his territory, he went with thirty of his friends to Arras with the intention of so doing. Jacob, however, died three months after his arrival; and, as there was no Jewish cemetery in the place, he was buried at Reims.

JACOB BEN JEREMIAH MATTITHIAH HA-LEVI: German translator of the seventeenth century. He translated into Judæo-German Abraham Jagel's "Leḳaḥ Ṭob" (Amsterdam, 1675; Wilmersdorf, 1714; Jesnitz, 1719) and the "Sefer ha-Yashar" (under the title "Tam we-Yashar"; Frankfort-on-the-Main, 1674; frequently reprinted). The latter work contains Biblical history from Adam to the period of the Judges, with haggadic elaboration (see Zunz, "G. V." p. 163). After every paragraph a short résumé of the content and the moral application of the story of the section are given. The early editions contain also extracts from Abraham Zacuto's "Sefer Yuḥasin" and from Eleazar Askari's "Sefer Ḥaredim," together with various prayers (in German).

H. R. M. SC.

JACOB BEN JOSEPH ISRAEL (known also as **Joseph Israel**): French scholar; lived at Pont-Audemer in the twelfth century; pupil of Jacob Tam, with whom he carried on a correspondence ("Sefer ha-Yashar," pp. 77–78; Tos. to Ket. 98b), and of Samuel b. Meïr ("Teshubot Rabbane Ẓarfat," No. 3). Gross supposes that Jacob is identical with Jacob of Pont-Audemer, known as a Biblical commentator.

G. I. BR.

JACOB JOSHUA BEN ẒEBI HIRSCH: Polish rabbi; born at Cracow in 1680; died at Offenbach Jan. 16, 1756. On his mother's side he was a grandson of Joshua of Cracow, the author of "Maginne Shelomoh." While a youth Jacob became examiner of the Hebrew teachers of Lemberg. In 1702 his wife, his child, and his mother were killed through an explosion of gunpowder that wrecked the house in which they lived. Jacob himself narrowly escaped death. He was then called to the rabbinate of Tarli and Lisko, small Galician towns. In 1717 he replaced Ḥakam Ẓebi in the chief rabbinate of Lemberg; and thence he was called to Berlin in 1731. Having displeased Veitel-Heine Ephraim, one of the most influential leaders of the community, by rendering a judgment against him, he was compelled at the expiration of his term of office (1734) to resign. After having been for seven years rabbi of Metz he became chief rabbi of Frankfort-on-the-Main; but the unfavorable attitude of the local authorities toward the Jews, and the fact that the community was divided by controversies, made his position there very precarious. Soon afterward the quarrel between Jacob Emden and Jonathan Eybeschütz broke out. The chief rabbi, because of his opposition to Eybeschütz, was ultimately compelled to leave the city (1750). He wandered from town to town till he came to Worms, where he remained for some years. He was then called back to Frankfort; but his enemies prevented him from preaching in the synagogue, and he left the city a second time.

Jacob was one of the greatest Talmudists of his time. He wrote "Pene Yehoshua'," novellæ on the Talmud, in four parts. Two of them were published at Frankfort-on-the-Main (1752); the third, with his "Pesaḳ bet-Din Ḥadash," at Fürth (1766); the fourth, which, in addition to Talmudic novellæ, contains novellæ on the Ṭur Ḥoshen Mishpaṭ and "Liḳḳuṭim," also at Fürth (1780). He wrote also a commentary on the Pentateuch, which is mentioned by the author himself, but has not appeared in print.

JACOB JUDAH ARYEH LEON. See LEON.

JACOB BEN JUDAH ḤAZZAN OF LONDON: English codifier of the thirteenth century. His grandfather was one Jacob he-Aruk (possibly Jacob le Long). In 1287 Jacob wrote "'Eẓ Ḥayyim," a ritual code in two parts, containing sixty and forty-six sections respectively, dealing with the whole sphere of Halakah, and following in large measure Maimonides in the Mishneh Torah, though Jacob utilized also the "Halakot Gedolot," the "Siddur" of R. Amram, and the works of Moses of Coucy, Alfasi, and the tosafists. He quotes, furthermore, Isaac ben Abraham, Moses of London, and Berechiah of Nicole (Lincoln). Some verses by him are also extant ("J. Q. R." v. 359). The "'Eẓ Ḥayyim" still exists in a manuscript which formerly belonged to Wagenseil and is now in the Rathsbibliothek at Leipsic.

The work is of interest as the chief literary production of an English Jew before the Expulsion, and gives an account of the ritual followed by the Jews of England at that date, a full analysis of which is given by D. Kaufmann in "J. Q. R." iv. 20–64, 550–561. The only part of the work that has been published is the section edited by H. Adler in the "Steinschneider Festschrift" (Hebr. section, pp. 156–208).

BIBLIOGRAPHY: H. Adler, in *Papers of the Anglo-Jewish Historical Exhibition*, p. 276, London, 1888; *idem*, in *Steinschneider Festschrift*, pp. 241-242; D. Kaufmann, as above and in *J. Q. R.* v. 353-374.

J.

JACOB BEN JUDAH LÖB: Polish rabbi; lived in the second half of the eighteenth century. Educated as a Talmudist, he became rabbi of Krasnopolie, government of Suwalki. He wrote "Peduyot Ya'aḳob," an index to the halakot and subjects of the Shulḥan 'Aruk, in the reverse order of the alphabet ("tashrak"). This was published in Frankfort-on-the-Oder with the approbation of the rabbi of that city, Naphtali Hirz, in 1800. In the preface the author describes his sufferings at the hands of his enemies; how through them he was confined in prison for seven weeks; and how when he was liberated he wrote his work according to a vow that he had made while in prison.

JACOB, JULIUS: German landscape- and portrait-painter; born in Berlin April 25, 1811; died there Oct. 20, 1882. He studied under Wach at the Düsseldorf Kunstakademie, and under Delaroche in Paris. Having completed his studies at the latter place he traveled through Europe, North Africa, and Asia Minor, returning with more than a thousand landscape-studies and over three hundred copies of portrait-paintings from foreign art-galleries. From 1844 to 1855 Jacob lived in London; he then visited Vienna, where he painted the portraits of several prominent men, among whom may be mentioned the princes Metternich, Schwarzenberg, Liechtenstein, and Lobkowitz, and Count Kinsky.

Among Jacob's most important paintings are the following: "Steinfeld von Sorrent" and "Aus der Mark" (exhibited in Berlin, 1876); "Verstossung aus dem Paradies"; "Scene aus der Frithjofssage"; "Künstlerleben"; and "Scenen aus der Geschichte St. Ludwigs." Jacob was awarded gold medals by the academies of arts in Paris, Lyons, and Rouen, and became an honorary member of several academies throughout Europe.

JACOB OF KEFAR HANAN (ḤANIN): Palestinian amora of the third generation (3d and 4th cent.). Jacob is especially known as a haggadist (Pesiḳ. iv. 30b; Gen. R. xxxii. 5; Yer. Ber. v. 2; Yer. Ta'an. i. 1), but most of his haggadic sayings have been transmitted only by his pupils and successors. Once (Pesiḳ. R. 33 [ed. Friedmann, p. 153b]) his name occurs as "Jacob of Kefar Hananiah."

BIBLIOGRAPHY: Bacher, *Agada der Palästinensischen Amoräer*, iii. 569-571.

S. S. M. SEL.

JACOB OF KEFAR ḤIṬṬAYA (חיטייא): Palestinian scholar of the second century; contemporary of Judah I. Jacob is said to have been in the habit of visiting his teacher every day (Ḥag. 5b). Heilprin ("Seder ha-Dorot," ii.) concluded that he was a pupil of Akiba and teacher of Judah I.; this, however, is not certain.

S. S. M. SEL.

JACOB OF KEFAR NEBURAYA: Judæo-Christian of the fourth century. Neburaya is probably identical with Nabratain, a place to the north of Safed, where, according to Schwarz ("Tebu'at ha-Areẓ," p. 103a), is the tomb of Jacob as well as that of Eleazar of Modi'im. Jacob was well known as a haggadist before he embraced Christianity; and in two instances his haggadot met with the approval of the Rabbis. One of these may be quoted: in the school of Cæsarea he interpreted Hab. ii. 19 as being a rebuke of simony. On the same occasion he indicated Isaac b. Eleazar as a worthy candidate for the rabbinate (Yer. Bik. iii. 3; Midr. Shemu'el vii.).

Jacob was also consulted at Tyre on halakic matters; but his decisions were not accepted. He decided (1) that the rules of sheḥiṭah should be applied to fish, and (2) that a son born of a Gentile woman may be circumcised on the Sabbath. On account of these decisions Jacob incurred reprimands from R. Haggai, who ordered him to be flogged. Jacob, after presenting some arguments against this punishment, finally acknowledged that he deserved it (Pesiḳ. R. 14 [ed. Friedmann, p. 61a]; Pesiḳ. iv. 35b-36a; Yer. Yeb. ii. 6 and parallels). His heresy was not generally known.

Only Jacob's contemporary Isi of Cæsarea counts him among the Judæo-Christians, applying to him the Biblical word "sinner" (Eccl. R. vii. 47). The appellation "Jacob Mina'ah" (= "Jacob the Heretic"), met with in the Midrashim, may refer to the subject of this article.

S. S. M. SEL.

JACOB OF KEFAR SEKANYA (SIMAÏ): Judæo-Christian of the first century; mentioned on two occasions, in both Talmuds and in the Midrash. Meeting R. Eliezer in the upper market-place of Sepphoris, he asked him for an opinion on a curious ritualistic question bearing upon Deut. xxiii. 18. As R. Eliezer declined to give an opinion, Jacob acquainted him with the interpretation of Jesus derived from Micah i. 7. R. Eliezer was pleased with the interpretation and was consequently suspected of Christian leanings by the governor ('Ab. Zarah 17a; Eccl. R. i. 24; Tosef., Ḥul. ii. 24). On another occasion R. Eleazar ben Dama, nephew of R. Ishmael, having been bitten by a serpent, Jacob went to heal him in the name of Jesus. R. Ishmael objecting, Jacob proved from the Torah that one may seek healing from any source whatever. But in the meantime R. Eleazar died, and R. Ishmael rejoiced that his nephew had not been defiled by the treatment of a Christian (Yer. Shab. iv., end, where "Kefar Simaï" is given; 'Ab. Zarah 23b; Eccl. R. *l.c.*).

JACOB B. KORSHAI. See JACOB, 1.

JACOB HA-LEVI HE-ḤASID: French rabbi and cabalist; lived in the thirteenth century, at Marvège. It was said that by prayers and invocations he was able to obtain from heaven decisions in religious matters, which were communicated to him in dreams. His decisions are collected in his "She'elot u-Teshubot min ha-Shamayim," published by Judah Żeraḥiah Azulai in part five of David ibn Zimra's responsa (Leghorn, 1818). Some of his responsa are found also in Zedekiah ben Abraham's "Shibbole ha-Leḳeṭ" and in Jehiel's "Tanya," an epitome of the latter.

JACOB OF LONDON: First known presbyter of the Jews of England; appointed to that position by King John in 1199, who also gave him a safe-conduct. He appears to have died in 1217, when Josce is mentioned as his successor. He is possibly identical with the rabbi Jacob of London who translated the whole Haggadah into the vernacular so that women and children could understand it (Isserles, "Darke Mosheh," to Ṭur Oraḥ Ḥayyim, 473).

Bibliography: Prynne, *Short Demurrer*, ii. 3-5; H. Adler, in *Papers of the Anglo-Jewish Historical Exhibition*, pp. 262-263.

J.

JACOB OF LUNEL. See Jacob Nazir.

JACOB BEN MEÏR TAM (known also as **Rabbenu Tam**): Most prominent of French tosafists; born at Ramerupt, on the Seine, in 1100; died at Troyes June 9, 1171. His mother, Jochebed, was a daughter of Rashi. Rabbenu Tam received his education from his father, from Joseph Ṭob 'Elem (Bonfils) II., and from his eldest brother, Samuel ben Meïr (RaSHBaM). After his father's death Jacob conducted a Talmudic academy in Ramerupt. On May 8, 1147, on the second day of the Feast of Weeks, French crusaders broke into his home, robbed him of everything except his books, dragged him into a field, insulted him on account of his religion, and decided to kill him. They inflicted five wounds upon his head, in order, as they said, to take revenge upon the most prominent man in Israel for the five blows which the Jews had dealt to Jesus. At that moment a prince of high rank happened to pass, and Jacob called upon him for protection, promising him a horse worth five marks in return. The prince thereupon bade the crusaders give the rabbi into his keeping, promising that he would either persuade him to be baptized or place him in their power again on the following day (Ephraim bar Jacob, in Neubauer and Stern, "Hebr. Berichte über die Judenverfolgungen Während der Kreuzzüge," p. 64).

Shortly afterward, Jacob went to Troyes, not far away. It was probably there that the first French assembly of rabbis took place in 1160, in the deliberations of which Jacob (R. Tam) and his brother took a prominent part. Among other things, it was decreed in this assembly under penalty of excommunication that disputes between Jews must be settled in a Jewish and not in a Christian court (Neubauer, in "R. E. J." xvii. 66 *et seq.*; Jacobs, "The Jews of Angevin England," p. 47). A second synod in Troyes, held after RaSHBaM's death, renewed an old law of Narbonne which decreed that if a woman died childless within the first year after her marriage her husband, after deducting the equivalent of what she had used during the year, was to return her dowry and valuables to her parents or guardians (see "Sefer ha-Yashar," § 579; "R. E. J." xvii. 71–72). This regulation and that of the first synod (see Kol Bo, § 117) are by some authorities (Meïr Rothenburg, Responsa, No. 934, ed. Prague; No. 159, ed. Cremona; Harleian MSS., London, No. 5686) designated "ordinances ["taḳḳanot"] of R. Tam." A third synod, presided over by R. Tam and Moses of Pontoise, threatened with excommunication any person who should question the legality of a deed of divorce on the ground that the document had not been written in the prescribed way. Other ordinances, doubtless passed at similar synods (see Synods, Rabbinical) by R. Tam in conjunction with other French rabbis, were cited in the name of R. Tam alone, and correctly, in so far as they were due to his suggestion. Among them was the repetition of the ban uttered by R. Gershom against polygamy, and the regulation that men must not divorce or desert their wives except for sufficient cause; according to Halberstam MS. No. 45, p. 256 (now in Montefiore Library, No. 130; comp. H. Hirschfeld in "J. Q. R." xiv. 195), in which this second regulation is cited in the name of R. Tam, only the exigencies of business or study are sufficient to justify a man in leaving his wife at any time.

His Taḳḳanot.

It is said that R. Tam was very wealthy, and had official relations with the King of France ("Sefer ha-Yashar," § 595), who favored him (Abraham ben Solomon, in Neubauer, "M. J. C." i. 102; Harkavy, "Ḥadashim gam Yeshanim," supplement to the Hebrew edition of Graetz, "Hist." vi. 6, note 10; Heilprin, "Seder ha-Dorot," i. 208a). So far as is known, Jacob had two sons, Joseph and Solomon, and one daughter, who married in Ramerupt. The "Isaac ben Meïr" mentioned in the "Sefer ha-Yashar" (§§ 99, 252, 604) was his brother. When the news of the heroic death of the martyrs at Blois reached Jacob, he appointed Siwan 20 (in the year 1171 it was May 26) a day of fasting for the inhabitants of France, England, and of the Rhine provinces.

The "Sefer ha-Yashar."

R. Tam's chief work is his "Sefer ha-Yashar," a very poor edition of which was published in Vienna in 1811, from a manuscript; the second part, according to an Epstein manuscript, with the notes of Ephraim Solomon Margoliouth and his own, was reissued by F. Rosenthal, among the publications of the Meḳiẓe Nirdamim Society (Berlin, 1898). The first part (§§ 1–582) contains principally R. Tam's explanations ("bi'urim") and novellæ ("ḥiddushim")—usually called "tosafot"—to thirty Talmudic treatises; the second part contains principally his responsa. A very clear critical analysis of the "Sefer ha-Yashar" was made by I. H. Weiss in 1883; according to him the book in its present form was written by a pupil and relative of R. Tam, a grandson of R. Yom-Ṭob ben Judah. The original "Sefer ha-Yashar," written by R. Tam himself, and corresponding approximately to the first part of the present work, as the subscription at the end of § 540 shows, has doubtless been lost. The compiler, however, worked with great literary precision and faithfulness, and such expressions as

"I found no more in this connection in R. Jacob's work," or, "so concludes R. Jacob," expressions which occur repeatedly throughout the book, leave no doubt as to the identity of the various sources. In the tosafot also are various passages from the "Sefer ha-Yashar," which are cited in the name of R. Tam (*e.g.*, comp. § 26 with Tos. to Ber. 34a; § 41 with Tos. to Ket. 27a; etc.). The compiler of the "Sefer ha-Yashar" had before him both redactions of the original work of R. Tam (see §§ 271, 353, 367, and Tos. to 'Er. 74b). The tosafot contained therein are not arranged in the order of the Gemara, but just as the last compiler chanced upon them, as he himself says.

Object and Method.

The present "Sefer ha-Yashar" contains neither all the tosafot of R. Tam, nor only his. He himself had incorporated into his book the explanations of other commentators, as R. Gershom, Rashi, Eliezer of Mayence (RABeN), and RaSHBaM; and the later compiler added further tosafot of R. Tam's pupils. The original object of the book is plainly stated in the introduction, which unfortunately has been preserved only in a very incomplete form: "I called it 'Sefer ha-Yashar,'" says the author, "because in it I wish to reconcile the old [divergent] traditions concerning the text of the Talmud with the original form of the text" (comp. David of Estella's "Ḳiryat Sefer" in "M. J. C." ii. 231). In these words is proclaimed a campaign against the conjectural criticism which was prevalent among Talmud exegetes of Jacob's day. Rashi had often allowed himself to indicate in his commentary the necessity for different readings based on evidence supplied by the context. His pupils, however, and especially Samuel ben Meïr, went still further and corrected the Talmud text itself according to these corrections and their own. Against such violent treatment of ancient texts ("Sefer ha-Yashar," p. 48b) R. Tam vigorously protested. "Where my grandfather made one correction, Samuel made twenty, and erased [the old readings] from the manuscripts [replacing them with new ones]." Although R. Tam well knew that the Talmud was not free from textual corruptions, he desired to restrain incompetent commentators who were in the habit of altering the established readings. Only old manuscripts and well-authenticated readings, which Jacob zealously collected and examined, would he recognize as the norm. He also made corrections in the Talmud on the basis of the Talmud text of R. Hananeel, but he exercised the greatest caution in making such emendations (§ 361), and hoped that later generations might understand what had seemed unintelligible in his age. Thus a large part of his tosafot is devoted to a rectification of the readings of the text.

Treatment of Contradictory Passages.

Since R. Tam objected so strongly to textual emendations, except in extreme cases, he was forced to adopt a system of casuistic interpretation, and to invent distinctions which did not exist in the plain reading of the text and which had to be interpreted into it. He boasts of his skill in reconciling contradictory decisions found in the Talmud ("Sefer ha-Yashar," p. 78b). He would, however, have energetically opposed the designation of his method as "pilpulistic." He emphatically asserts that his explanations follow the simple meaning of the text ("peshaṭ"), and argues against those persons "who, by their pilpulistic methods, distort the explanations of our teachers, and whose interpretations render the Halakot wholly meaningless"; and he accuses them of inventing difficulties solely with the purpose of meeting them (*ib.* p. 79c). The pupils of R. Tam took his warning against textual changes to heart, and in so far as they were thereby induced to preserve comparatively unaltered the Talmud text as it existed in their time, his influence can only be commended. On the other hand, however, it can not be denied that he is in some degree responsible for the pilpulistic methods followed by his successors.

As Tosafist.

R. Tam is generally regarded as the head of the French school of tosafists ("ba'al ha-Tosafot"; Joseph ibn Ẓaddiḳ, in "M. J. C." i. 94). The closer association of the French and German Jews with their Christian fellow citizens created new conditions of life, and necessitated religious regulations and decisions other than those contained in the Talmud. To derive such laws directly or by inference from the Talmud, and to formulate them, was the task of the tosafists; and it was above all R. Tam who held that all new enactments must represent a continuous development of the Talmud, as regards both its halakah and its method of discussion. He is not content in his tosafot merely to give halakic decisions, but in each case attempts their justification. He uses two methods of demonstration—the analogical or inductive method, and the logical method; the second method consists of a series of Socratic questions, by which all possible opinions or decisions except his own are excluded as logically impossible. The questions are thus the single steps in the demonstration.

R. Tam was well aware that he had created this method of indirect demonstration. He wrote to his pupil Joseph of Orleans ("Sefer ha-Yashar," p. 78b; comp. also § 282): "Thou knowest my method of postulating questions in order to reach the correct halakic view ["shemu'ah"]. I give no forced answers; my questions are their own answers." If the tosafists are really the continuators or epigones of the Amoraim, and differ from them only in respect to language, it was chiefly R. Tam who gave them the impulse in that direction.

Relation to Tosafot of Talmud.

A large part of the tosafot given in the "Sefer ha-Yashar" have been reprinted in abbreviated form among the Talmudic Tosafot. The observation has been made that the decisions in the "Sefer ha-Yashar" and those in the Tosafot frequently contradict each other (comp. *e.g.*, on שבועת היסת, "Sefer ha-Yashar," § 482, with Tos. to Shebu. 41a, *s.v.* ולמאן). These contradictions can be partially explained by the fact of the existence of various manuscripts of R. Tam's tosafot (see p. 78a), into which textual divergences, variations, additions, and mistakes crept at a very early period. Afterward the mere content of his practical decisions was regarded as sufficient, and these were transmitted in the shortest form possible—often, indeed, in too brief a form; so that when the laws came in later times to be analyzed and amplified again, motives, methods of reasoning, and arguments which were in reality wholly foreign to R. Tam were attributed to him. Weiss suggests that if people had studied the "Sefer ha-Yashar" itself, which has always been neglected, and had learned to know the writer through his book, the Halakah would perhaps have had in many respects a wholly different development.

His Teshubot.

Even during his lifetime R. Tam was considered the greatest Talmudic authority in France and Germany, and questions from those two countries, occasionally also from Spain (Mordecai, Ḥul., No. 666), England (Meïr Rothenburg, Responsa, No. 240), and Italy (Mordecai, Ket., No. 146), were addressed to him. His elder contemporaries willingly recognized his superiority, and were not offended at his authoritative and rather overbearing tone. His responsa are scattered through many halakic works; the greater part (103) of them is contained in his "Sefer ha-Yashar" (2d part); in "Halakot Pesuḳot min ha-Geonim" (ed. Müller, Nos. 7–9); in "Kerem Ḥemed" (vii. 47 *et seq.*); and in the "Teshubot Ḥakme Ẓarfat we-Lotar" (ed. Joel Müller, pp. ix. *et seq.*, Vienna, 1881); others are found in the Maḥzor Vitry, which contains also his rules for writing the Torah scroll (ed. Hurwitz, pp. 651 *et seq.*, Berlin, 1893), and in a manuscript in the Bodleian (Neubauer, "Cat. Bodl. Hebr. MSS." No. 641, 9). No. 2343, 2 of the Bodleian collection contains his rules for the drawing up of contracts, especially deeds of divorce (comp. "Sefer ha-Yashar," §§ 68–69; Maḥzor Vitry, ed. Hurwitz, p. 782; comp. *ib.* p. 786 for the ḥaliẓah formula; see also Z. Frankel, "Entwurf einer Gesch. der Literatur der Nachtalmudischen Responsen," pp. 32 *et seq.*).

As Liturgical Poet.

In the field of Hebrew poetry, also, the importance of R. Tam is not slight. He was influenced by the poetry of the Spaniards, and is the chief representative of the transition period, in Christian lands, from the old "payyeṭanic" mode of expression to the more graceful forms of the Spanish school. According to Zunz ("Literaturgesch." pp. 265 *et seq.*) he composed the following pieces for the synagogue: (1) several poems for the evening prayer of Sukkot and of Shemini 'Aẓeret; (2) a hymn for the close of Sabbath on which a wedding is celebrated; (3) a hymn for the replacing of the Torah rolls in the Ark on Simḥat Torah; (4) an "ofan" in four metric strophes (see Luzzatto in "Kerem Ḥemed," vii. 35); (5) four Aramaic "reshut"; (6) two "seliḥot" (the second is reproduced by Zunz in "S. P." p. 248, in German verse; see also "Naḥalat SHeDaL" in Berliner's "Magazin" ["Oẓar Ṭob"], 1880, p. 36). It must, however, be remarked that there was a synagogal poet by the name of Jacob ben Meïr (Levi) who might easily have been confounded with the subject of this article, and therefore Tam's authorship of all of these poems is not above doubt (see Landshuth, "'Ammude ha-'Abodah," p. 106; comp. also Harkavy, "Ḥadashim gam Yeshanim," supplement to the Hebrew edition of Graetz, "Hist." v. 39; Brody, "Ḳuntras ha-Piyyuṭim," p. 72). The short poems which sometimes precede his responsa also show great poetic talent and a pure Hebrew style (see Bacher in "Monatsschrift," xliv. 56 *et seq.*). When Abraham ibn Ezra was traveling through France R. Tam greeted him in verse, whereupon Ibn Ezra exclaimed in astonishment, "Who has admitted the French into the temple of poetry?" ("Kerem Ḥemed," vii. 35). Another work of his in metric form is his poem on the accents, which contains forty-five strophes riming in ח״ם; it is found in various libraries (Padua, Hamburg, Parma), and is entitled "Maḥberet." Luzzatto has given the first four strophes in "Kerem Ḥemed" (vii. 38), and Halberstam has printed the whole poem in Kobak's "Jeschurun" (v. 123).

As Grammarian.

In the field of grammatical exegesis R. Tam towered high above his northern French contemporaries. He wrote his "Sefer ha-Hakra'ot" with the avowed intention of "harmonizing" the statements of the two grammarians Menahem ben Saruḳ and Dunash ben Labraṭ, but as a matter of fact he usually agrees with Menahem and defends him against his opponent. In this work R. Tam divides the verbs into twelve classes, according to their roots, and it is a noteworthy fact that he arrives at the triliteral theory quite independently of Judah ben David Ḥayyuj. The work has been published by Filipowski in "Maḥberet Menaḥem" (London, 1855). Joseph Ḳimḥi afterward wrote the "Sefer ha-Galui" in opposition to this work of R. Tam.

The cabalists claimed R. Tam as one of themselves, ascribing to him a cabalistic prayer beginning בבקשה מכם מיכאל. It is reproduced in Nathan ben Meïr Krumenau's "Ḥayye 'Olam ha-Ba" (Cracow, 1643; see Steinschneider, "Cat. Bodl." col. 1258). R. Tam probably wrote marginal notes to a Maḥzor (see Zunz, "Ritus," p. 26), to "Seder Ḳodashim," and to the "Halakot Gedolot" (see Tos. to Ber. 37a and 'Er. 40a; Meïr Rothenburg, Responsa, ed. Prague, No. 74; "Sefer ha-Terumah," No. 13).

Characterization.

R. Tam, in spite of absorbing scholarly activity, looked upon life and its changing conditions with a clear eye, and wherever the Talmud would permit welcomed a less severe ritualistic practise (comp. "Sefer ha-Yashar," p. 74a); in many cases he was "the apologist for existing customs and usages" (Löw, "Lebensalter," p. 170). He was especially lenient in regard to permitted and forbidden foods ("issur we-hetter"; see Tos. to Ḥul. 104b; Tos. to 'Ab. Zarah 35b), to the collection of taxes from Jews and Jewish proselytes ("Sefer ha-Yashar," § 73b), to the wine-trade (יין נסך; *ib.* § 618), and to many other practical questions (comp. *ib.* p. 75b, on unleavened bread at the Passover Feast), too numerous to be indicated here. For example, he allowed women to wear rings on the Sabbath, and under certain conditions permitted marriages to be performed on that day; for the formation of a quorum of ten ("minyan") he was willing to recognize a boy who was a minor ("ḳaṭon") as being of age (Tos. to Ber. 47b; see also Oppenheim in "Monatsschrift," 1869,

p. 92, on the "Bernickelgans"). In his decisions he is everywhere independent of standard authorities, even of his grandfather Rashi ("Sefer ha-Yashar," § 586); in this respect he served as a model for later teachers (Asher ben Jehiel, Responsa, No. 53).

R. Tam had a large number of disciples, who had come to him from France, Germany, Bohemia, and Russia; the following are the most prominent: Ḥayyim ben Hananeel ha-Kohen (see his saying in Tos. to Ket. 103b); Isaac ben Samuel (RI the Elder), son of R. Tam's sister, and who afterward took his place in Ramerupt; Peter, who was killed in Carinthia (see Wiener, "'Emeḳ ha-Bakah," p. 165, note 107; Gross, "Gallia Judaica," p. 434) in 1147; Joseph of Orleans; Eliezer ben Samuel of Metz; Joseph Bekor Shor. In after-times, R. Tam, like Rashi, was paid almost unbounded respect. People hardly dared to contradict him (see Meïr Rothenburg, Responsa, ed. Cremona, No. 144) or to decide between grandfather and grandson, "those two high mountains" (*ib.* No. 159; Joseph Colon, Responsa, No. 161).

As a matter of fact both have exercised an unusually deep and a universal influence on the halakic development of European Judaism down to the present day. Fables have been woven around the history of R. Tam, and it is said that on one occasion, when certain rabbis were discussing whether the knots in the tefillin should be tied anew every day (Tos. to Men. 35b), he descended from heaven "like a lion" and discussed the question with Moses in the house of Menahem Vardimas until Moses acknowledged himself defeated, and told the rabbis that R. Tam was worthy to be followed (see D. Kaufmann in "R. E. J." v. 273 *et seq.*). So high an authority as Asher ben Jehiel placed R. Tam's knowledge even above that of Maimonides (see "Yam shel Shelomoh" on B. Ḳ., Preface).

JACOB BEN MORDECAI: German scholar; flourished in the seventeenth and eighteenth centuries. A native of Fulda, he was generally called "Jacob of Fulda"; but he was banished from that town and settled at Schwerin. He wrote: (1) "Tiḳḳun Sheloshah Mishmarot" (Frankfort-on-the-Oder, 1691), prayers to be recited in the three divisions of the night, for which the Zohar was his main source. This work was translated into Judæo-German by the author's wife, Laza, who added a preface (Frankfort-on-the-Main, 1692). Benjacob ("Oẓar ha-Sefarim," p. 669), following Wolf ("Bibl. Hebr." iii., Nos. 1338 *et seq.*), attributes the authorship to Laza. (2) "Shoshannat Ya'aḳob" (Amsterdam, 1706; Leghorn, 1792), a treatise on chiromancy, physiognomy, and astrology.

Bibliography: Steinschneider, *Cat. Bodl.* cols. 462, 1239; Fürst, *Bibl. Jud.* i. 305, where he is mentioned under *Fuld.*

S. S. M. Sel.

JACOB BEN MORDECAI HA-KOHEN: Gaon of Sura from 801 to 815; succeeded Hilai ben Mari. He officiated fourteen years, according to a text of Sherira ("M. J. C." i. 39); according to other authorities (*l.c.* i. 65, 188), eighteen years. In his decisions Jacob ben Mordecai leaned as much as possible toward the milder interpretation of the Law, for which Zadok (appointed gaon in 823) and his contemporaries blamed him ("Ḥemdah Genuzah," ed. Jerusalem, No. 8; "Sefer ha-Eshkol," i. 91). A long responsum of his is preserved in "Or Zarua'" (i., No. 411; comp. also Rosh to Ḥul. iii., No. 14). His decisions are given in comparatively pure Hebrew.

JACOB BEN MOSES BEN ABUN (called **ha-Nabi** = "the prophet"): Head of the yeshibah of Narbonne, France. As Abraham b. David in his "Sefer ha-Ḳabbalah" (MS. quoted by Abraham Zacuto in his "Yuḥasin," ed. London, p. 84) mentions that Moses ha-Darshan was the son of Jacob b. Moses, it may be concluded that Jacob lived in the eleventh century. He is mentioned by Abraham b. Isaac or Abraham, ab bet din of Narbonne ("Ha-Eshkol," ed. Auerbach, iii. 152), as the author of a responsum. The title "ha-Nabi" is honorific, and was applied to other persons besides Jacob.

Bibliography: Gross, *Gallia Judaica*, p. 410; *R. E. J.* xvi. 227.

S. S. M. Sel.

JACOB BEN MOSES OF BAGNOLS: Provençal theologian of the second half of the fourteenth century; lived successively at Salon, Avignon, and Argon. He was the author of a casuistic and philosophical work, still extant in manuscript ("British Museum Cat." MS. No. 2705). It is divided into three parts, each with a different title: (1) "Pesaḳim," on things permitted and prohibited ("issur we-hetter"); (2) "'Ezrat Nashim," on marriage, levirate, and divorce laws; (3) "Sod ha-Hashgaḥah," containing essays on ethics, philosophy, and mysticism.

G. I. Br.

JACOB B. MOSES MÖLLN. See Mölln, Jacob ben Moses.

JACOB IBN NA'IM or **NAYYAM**: Rabbi of Smyrna toward the end of the seventeenth century. He corresponded with Ḥayyim Benveniste, author of "Keneset ha-Gedolah," whom Jacob seems to have succeeded in the rabbinate of Smyrna. Jacob was the author of "Mishkenot Ya'aḳob" (Salonica, 1721), homilies on the Pentateuch and other subjects, followed by a pamphlet entitled "Ẓenif Melukah," on the obligations of subjects to their king; a responsa collection entitled "Zera' Ya'aḳob," followed by a collection of sermons bearing the title "Yeshu'ot Ya'akob," Leghorn, 1784. Zedner ("Cat. Hebr. Books Brit. Mus." p. 2) attributes the last two works to a different author, whom he calls Jacob Ḥayyim ibn Na'im; but Benjacob attributes them to Joseph ibn Na'im.

JACOB BEN NAPHTALI: Talmudist of Gnesen; flourished about 1650. His father was clerk of the Jewry in Great Poland (סופר מדינה), and died in 1646. Jacob lost his fortune and books in a fire, and had to wander aimlessly about. In 1652 he published in Amsterdam "Naḥalat Ya'akob: Meliẓot," a book of poems, containing a dialogue between the body and the soul, hymns for the dedication of a scroll of the Law, and elegies on the Cossack massacre of 1648. Jacob superintended as corrector the printing of Nathan Hanover's work "Yewen Meẓulah" (Venice, 1653). In 1654, when Jacob intended to go to Rome in order to procure from the pope a letter of protection against the blood accusation and the excesses committed by the students of Jesuit colleges in Great Poland, he was highly recommended to the Italian communities by Moses Zacuto.

D. P. B.

JACOB BEN NAPHTALI HA-KOHEN: Italian printer; born in Gazolo; lived in the sixteenth century. For some time prior to 1556 he was the manager of Tobiah Foa's printing establishment at Sabbionetta, which issued Abravanel's "Merkebet ha-Mishneh" (1551). In 1556 Jacob removed to Mantua, where he superintended the printing of a great number of works in Rufellini's printing-house, first alone, afterward in association with Meïr b. Ephraim Sofer, then from 1560 to 1563 again alone. The first work printed by Jacob at Mantua was Elijah Levita's "Sefer ha-Baḥur"; the last, "Midrash Yelammedenu."

JACOB BEN NATHANAEL IBN AL-FAYYUMI (the name is given in this form in "Maẓref la-Ḥokmah," fol. 93a; in Neubauer, "M. J. C." [Sambari] i. 122, 24; and in Nahum's Hebrew version of Maimonides' "Letter" cited below): Rosh yeshibah of the Yemen Jews in the second half of the twelfth century. All that is known of him is that at the suggestion of Solomon ha-Kohen, a pupil of Maimonides, he wrote to the latter asking his advice in regard to a pseudo-Messiah who was leading the Jews of southern Arabia astray. From a passage in Maimonides' "Letter to the Wise Men of the Congregation of Marseilles," the date of Jacob's letter is fixed as 1172 (Halub, in his ed. of "Iggeret Teman," p. 51, note). In answer, Maimonides sent his "Iggeret Teman," or, as it is also called, "Petaḥ Tiḳwah." Harkavy supposes that Jacob had cognizance of Saadia's "Sefer ha-Galui" ("Studien und Mittheil." v. 154; comp. "Monatsschrift," xliv. 508). Jacob's father was known as a philosophical writer (see JEW. ENCYC. v. 354). G.

JACOB BAR NAṬRONAI: Gaon of Sura (911–924). After the death of his predecessor, Shalom bar Mishael, the Academy of Sura became impoverished and was abandoned by most of the students (Sherira, in "M. J. C." i. 39, 189). Jacob bar Naṭronai was then made gaon, and he retained the position for thirteen years. Halevy has shown that he is not to be identified with Amram ben Solomon, as Grätz holds.

S. S. M. SC.

JACOB NAZIR: French exegete; flourished in the second half of the twelfth century; one of the five sons of Meshullam ben Jacob of Lunel. "Jacob of Lunel" would accordingly be only another designation for "Jacob Nazir." Jacob Nazir wrote certain Biblical commentaries, including commentaries on Genesis (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1646, 2) and Job (see Zunz, "Z. G." p. 74). An explanation by him of a prayer in the ritual, given to a certain Moses ben Isaiah, is also extant (Maḥzor Vitry, ed. Hurwitz, p. 368). Isaac ben Samuel of Acre (*c.* 1300) is said to have described him as one of the most prominent cabalists, and Abraham ben David is said to have been one of his pupils. It is, however, very doubtful whether Jacob Nazir had anything to do with Cabala.

G. S. K.

JACOB BEN NISSIM IBN SHAHIN: Philosopher; lived at Kairwan in the tenth century; younger contemporary of Saadia. At Jacob's request Sherira Gaon wrote a treatise entitled "Iggeret," on the redaction of the Mishnah. Jacob is credited with the authorship of an Arabic commentary on the "Sefer Yeẓirah" (translated into Hebrew by Moses ben Joseph). He asserts in the introduction that Saadia, while living in Egypt, used to address very insignificant questions to Isaac ben Solomon of Kairwan, and that, on receiving Saadia's commentary, he found that the text had not been understood by the commentator. Jacob therefore decided to write another commentary. In the same introduction Jacob speaks of Galen, repeating the story that that celebrated physician was a Jew named "Gamaliel." The Hebrew translation of Jacob's commentary is still extant in manuscript (Munich MSS., No. 92, 20; De Rossi MSS., No. 769); excerpts from it have been given by Landauer and Dukes.

G. I. BR.

JACOB OF ORLEANS: French tosafist; died as a martyr in London Sept. 3, 1189. He was one of the most distinguished pupils of Rabbenu Tam, being often called by his teacher's name. According to "'Emeḳ ha-Baka" (ed. Cracow, p. 52), Jacob was still at Orleans in 1171, and went to London later, probably in response to a call as teacher from the community. He was killed during the anti-Jewish riots in London at the coronation of Richard I.

Jacob was a prominent tosafist, his tosafot being often quoted; *e.g.*, in 'Ab. Zarah 34a; Giṭ. 8b; Ket. 47a; Men. 10b; Naz. 54b; Pes. 5b; Sanh. 35b; Zeb. 14b, 39a; Yeb. 4a; also in the old tosafot to Yoma 34a, 88a; in Judah of Paris' tosafot to Ber. 21b, etc. He also wrote glosses to the Pentateuch, which are included in Isaac ben Judah ha-Levi's "Pa'neaḥ Raza," and are mentioned even more frequently in Judah ben Eliezer's "Minḥat Yehudah." Jacob introduces a large number of gemaṭriot into these glosses.

According to Gross, Jacob is also the author of the tosafot to Rashi's Pentateuch commentary which were written under the name of Rabbenu Tam, and which are mentioned by Geiger ("Parschandatha," p. 36).

BIBLIOGRAPHY: *'Emeḳ ha-Baka*, ed. Vienna, pp. 39, 45; ed. Cracow, pp. 52, 58; *R. E. J.* iv. 211; *Or Zarua'*, ii. 112a; Zunz, *Z. G.* pp. 51, 75, 91, 93; Gross, *Gallia Judaica*, p. 36; Jacobs, *Jews of Angevin England*, pp. 108, 419.

J. A. PE.

JACOB OF PONT SAINT-MAXENCE: French tax-farmer of the fourteenth century. With Manecier of Vesoul and his brother Vivant he was appointed (1360) by Charles V., King of France, to collect the taxes imposed upon the Jews, retaining two florins out of the fourteen which each Jew had to pay upon entering France. In 1365 a dispute arose between Jacob and Manecier, in consequence of which the former brought suit against his opponent before the parliament of Paris, and Manecier was fined. The two functionaries became reconciled in 1370, and their position with the king, although weakened, was still sufficiently important to enable them at the approach of Passover in 1372 to obtain the loan of the Hebrew books deposited in the Sainte Chapelle, Paris.

G. S. K.

JACOB B. REUBEN: Karaite Bible exegete of the eleventh century. He wrote a brief Hebrew commentary on the entire Bible, which he entitled "Sefer ha-'Osher," because, as he says in the introduction, the reader will find therein sufficient information, and will not need to have recourse to the many voluminous commentaries which the author himself had consulted. The book is, in fact, merely a compilation; the author's explanation of any given passage is frequently introduced by the abbreviations מע״ or יע״ (*i.e.*, Arabic "ma'nahu" or "ya'ni" = "that is to say"); and divergent explanations of other commentators are added one after the other and preceded by the vague phrase ד״א ("another says"). It is, in fact, chiefly an extract of Jefet b. 'Ali's work, from whom Jacob borrowed most of his explanations as well as the quotations from various authors, chiefly on the Pentateuch. But Jacob also drew upon later Karaite authors, the last of whom is Jeshua b. Judah, who, so far as is known, flourished about 1054 (see Harkavy, "Ḥadashim gam Yeshanim," vii. 17). This date points to the second half of the eleventh century as the date of composition of the "Sefer ha-'Osher."

The "Sefer ha-'Osher."

Among Rabbinitic authors Jacob quotes Abu al-Walid; but his quotations have apparently been intentionally suppressed by Firkovich in his edition (see Harkavy, "Altjüdische Denkmäler aus der Krim," p. 211, note 1), though they are found in the manuscripts, and one of them has been given in the edition (on Jer. iv. 37; fol. 2b, line 1). If Jacob read Abu al-Walid not in the Arabic original but in the Hebrew translation, he must have compiled his book in the second half of the twelfth century. Firkovich believes Jacob to have lived at Kertch, in southern Russia, said to have been called ספרד in Hebrew; and he asserts that the הספרדי quoted several times in the commentary to the Pentateuch is identical with Abraham b. Simḥah of Kertch (*c.* 986), a personage invented by him. Both of these assumptions are of course impossible. Jacob was probably a native of Constantinople, as his commentary contains Greek glosses; and he was doubtless influenced by Byzantine authors.

The "Sefer ha-'Osher" is found in manuscript at St. Petersburg, Paris, and Leyden. The library of the last-named city is reported to contain two copies of the commentary to the Earlier Prophets and to the twelve Minor Prophets ("Cat. Leyden," 8, 12; see Steinschneider, "Hebr. Uebers." p. 941). Another portion, from Jeremiah to Chronicles (except Psalms), was printed, under the general title "Mibḥar Yesharim," together with Aaron b. Joseph's "Mibḥar" to the Earlier Prophets and Isaiah (Koslov, 1835). Steinschneider has edited the introduction ("Cat. Leyden," p. 384); Pinsker has printed passages to the Pentateuch ("Liḳḳuṭe Ḳadmoniyyot," ii. 83 *et seq.*); and Dukes, passages to the Psalms ("Arch. Isr." 1847; "Orient, Lit." 1850, p. 12). The "Sefer ha-'Osher" is of no especial importance for Karaitic Bible exegesis, nor, so far as is known, is it mentioned by earlier Karaite authors. But it may have been used by a Hebrew translator or editor of Jefet's commentary to the Minor Prophets. Of the latter work the beginning to Hosea has been edited by Töttermann ("Die Weissagung Hoseas," pp. 90 *et seq.*, Leipsic, s.a. [1880]; see Steinschneider, "Hebr. Uebers." *l.c.*).

Jacob b. Reuben has been wrongly identified with the Rabbinite translator of the "Liber Lapidum" (by the English bishop Marbod, d. 1123) from the Latin into Hebrew, the translation also bearing the title "Sefer ha-'Osher" (Steinschneider, *l.c.* p. 957; Kohut Memorial Volume, p. 56). Further, Jacob must not be confounded with the Rabbinite polemical writer Jacob b. Reuben, author of the anti-Christian work "Milḥamot Adonai."

G. S. P.

JACOB BEN REUBEN IBN ẒUR: Talmudist and rabbi of Fez; born in the latter part of the seventeenth century; died after 1750. That his reputation as a Talmudist stood high is apparent in the responsa ("Kerem Ḥemed," Leghorn, 1871) of Abraham Ankava, where he is quoted as an authority recognized by all Moroccan Jewish communities. Jacob was the author of the following works, still extant in manuscript: "Ḥiddushim u-Derushim," casuistic and homiletic notes ("Cat. Munich," MS. No. 261); "Leshon Limmudim," collection of epistles signed יבץ (= J[acob] b[en] Ẓ[ur]; Steinschneider, "Cat. Berlin," MS. No. 54). Jacob was also a liturgical poet, and wrote many dirges on the destruction of the Temple which were incorporated in the "Ḳinot" for the 9th of Ab in use among the Moroccan Jews; and his name occurs in the approbations to various Talmudical works, the last of which is dated 1750.

G. I. BR.

JACOB ROMAN IBN PAḲUDA. See ROMAN, JACOB.

JACOB BEN SAMSON (sometimes called **Jacob ben Simeon**): French tosafist and liturgist; flourished at Paris or at Falaise in the first third of the twelfth century. He is mentioned by Moses Taku in his "Ketab Tamim" (see "Oẓar Neḥmad," iii. 59) as having been the pupil of Rashi and the teacher of Jacob Tam. The former statement is confirmed by the fact that in his commentary on Abot, Jacob frequently quotes Rashi, speaking of him as his master. There exists also a decision of his (Paris MS. No. 326, fol. 80) which he seems to have written at the dictation of Rashi. Zunz, however ("Literaturgesch." p. 458), doubts the statement of Taku that Jacob was the master of R. Tam.

Jacob is called by Meïr of Rothenburg (Responsa, No. 655) "Jacob b. Samson of Paris," but in the corresponding passage in Mordecai on Beẓah (No. 672) he is called "Jacob b. Simeon of Falaise." He is also mentioned in the tosafot to Ḥul. 54b (as "Jacob b. Simeon"); 'Ar. 28b; Men. 64b; Mordecai on Yoma (No. 727); and "Liḳḳuṭe Pardes," ed. Amsterdam, 12b (where also he is called "Jacob b. Simeon").

Jacob's literary activity was both extensive and varied. Of his works the following are extant: (1) "Sefer ha-Elḳoshi" (Neubauer, "Cat. Bodl. Hebr. MSS." No. 692, 7), a calendar beginning with the year 1123. (2) Commentary on Abot (Neubauer, *l.c.* Nos. 376, 379), which, owing to its being anonymous, was ascribed by some scholars to Rashi, by others to R. Isaiah, Rashbam, and R. Ephraim (comp. Ṣamuel of Uceda, preface to his "Midrash Shemu'el"). The author, however, introduces the fourth chapter with an acrostic giving the name Jacob b. Samson (see S. D. Luzzatto in "Kerem Ḥemed," iv. 201 *et seq.*, and S. Schechter, introduction to his edition of Ab. R. N. ch. ii.).

Jacob borrows freely from the Abot or Mishnah or Baraita of R. Nathan, commonly designated by him "Baraita." The authorities quoted by him are Rashi, Mishnah of R. Gershom, R. Ephraim, ר'ת' (probably R. Tam), Meshullam b. Kalonymus, Nathan ha-Babli, "Haggadat Hashkem," "Dibre ha-Yamim shel Mosheh," and "Midrash shel R. Shim'on Ḳara." (3) Commentary on the Seder 'Olam Rabbah, or perhaps a treatise so entitled and quoted by Judah Sir Leon in his tosafot to Berakot (ed. Warsaw, p. 57b, or "Berakah Meshulleshet," 42d), a fragment of which is to be found in Neubauer (*l.c.* No. 692, 12). (4) "Pisḳe shel Beẓim," halakic novellæ on Beẓah (Neubauer, *l.c.* No. 1101, 2). It may also be concluded from his being quoted by Shemaiah in his commentary on Tamid that Jacob wrote a commentary on this treatise. (5) Commentary on the Baraita of R. Samuel and on the "Sefer Yeẓirah." (6) Notes to Samson b. Jonah's halakot concerning the Passover feast ("Or Zarua'," ii. 116b). (7) A poem in Aramaic on the tenth commandment and a commentary on it, as well as on three Aramaic poems written by other liturgists on the Decalogue (Parma [De Rossi] MS. No. 159). In his commentaries Jacob sometimes follows the system of the mystics, explaining the words according to gemaṭria and noṭariḳon, but he does so in a less degree than the later commentators.

JACOB B. SAMUEL SIRKES. See SIRKES, JACOB B. SAMUEL.

JACOB BEN SHESHET GERONDI: Spanish cabalist of Gerona (whence his surname "Gerondi") in the thirteenth century. He was the author of "Sha'ar ha-Shamayim," a cabalistic essay published by M. Mortara in "Oẓar Neḥmad" (iii. 153 *et seq.*), and of "Meshib Debarim Nekoḥim," an apologetic work in defense of the Cabala, in thirty chapters, still in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 1585, 1586). According to the preface, he composed this apology against a certain work full of heterodoxy. He refers to another work that he had written, and quotes Ibn Ezra, Maimonides, Ezra (Azriel), R. Joseph bar Samuel, and Samuel ibn Tibbon's "Yiḳḳawu ha-Mayim."

K. I. BR.

JACOB BEN SOLOMON (called also **Jacob of Courson**): French tosafist; born at Courson, department of the Yonne; flourished between 1180 and 1250. He was a pupil of Samson of Sens and, apparently, teacher of Meïr of Rothenburg (Meïr of Rothenburg, Responsa, ed. Cremona, No. 144). His tosafot are quoted in "Shiṭṭah Meḳubbeẓet" to B. Ḳ. (ed. Venice, 1262) 43a, b, under the name "Jacob of Courson," and 79a under the erroneous designation "Jacob of Kurso." According to "Haggahot Maimuniyyot" on "Ma'akalot Asurot," No. 13, Jacob wrote a work entitled "Nimuḳim," containing comments on the Talmud. He may also have been the author of another work entitled "Maṭbea'," containing Talmudic decisions (comp. "Haggahot Maimuniyyot," *l.c.*, and responsa of Samuel of Medina on Yoreh De'ah, No. 193.

Jacob corresponded with the liturgical poet Judah b. Shencor, or Judah the Elder, as he is also called.

JACOB BEN SOSA: Idumean leader. In the great war against Rome, 67–70, when Simon bar Giora went on a raid through Idumæa to take provisions, the Idumeans gathered together to defend their country, and then 20,000 of them went to Jerusalem. One of their four leaders was Jacob ben Sosa (Josephus, "B. J." iv. 4, § 2), who succeeded in betraying the Jews to Simon (*ib.* 9, § 6). The Zealots called the Idumeans to Jerusalem as a protection against the aristocrats, who were suspected of favoring the Romans. Some 5,000 of these Idumeans, whose chief leaders were Jacob b. Sosa and Simon ben Kathla, joined the party of Simon bar Giora (*ib.* v. 6, § 1). The Romans were repulsed in an attack on the citadel of Antonia, one of the most prominent in the defense being Jacob b. Sosa (*ib.* vi. 1, § 8). He was equally conspicuous when the Romans tried to storm the Temple (*ib.* 2, § 6).

The Idumeans finally grew tired of the unequal conflict, and secretly opened negotiations with Titus for surrender. When Simon bar Giora heard of this he had their leaders seized and imprisoned, among them Jacob b. Sosa (*ib.* 8, § 2).

JACOB OF VIENNA: Austrian rabbi and Biblical commentator of the fourteenth century. The Munich MSS. (Hebrew) contain a commentary on the Pentateuch written by "Jacob of Vienna" (No. 27, 2) and mention a certain "Jacob of Austria" (No. 402). Zunz ("Z. G." p. 103) identifies him with the R. Jekel who was a pupil of Meïr b. Baruch ha-Levi and who was consulted by Jacob Mölin (MaHRIL) as "the great luminary R. Jekel of Austria" (Jacob Mölin, Responsa, No. 101); Judah Minz (Responsa, No. 15) also mentions a "R. Jekel of Vienna," probably the same person.

JACOB (B. JUDAH) WEIL. See WEIL, JACOB.

JACOB BEN WOLF KRANZ OF DUBNO (DUBNER MAGGID): Russian preacher; born at Zietil, government of Wilna, about 1740; died at Zamosc Dec. 18, 1804. At the age of eighteen he went to Meseritz (Mezhirechye), where he occupied the position of preacher. He stayed there for two years, and then became preacher successively at Zolkiev, Dubno, Wlodawa (government of Lublin), Kalisch, and Zamosc. He remained at Dubno eighteen years, his stipend being at first six Polish gulden per week with lodging, this amount being afterward augmented by two gulden. He left Dubno for Wilna at the request of Elijah Wilna, who, having recently recovered from a sickness and being unable to study, sought diversion in his conversation.

Jacob was an unrivaled preacher. Possessed of great eloquence, he illustrated both his sermons and his homiletic commentaries with parables taken from human life. By such parables he explained the most difficult passages, and cleared up many perplexing questions in rabbinical law. He was also an eminent rabbinical scholar, and on many occasions was consulted as an authority.

All of Jacob's works were published after his death by his son Isaac Kranz and his pupil Abraham Bär Plahm. These are: "Ohel Ya'aḳob," a homiletic commentary on the Pentateuch abounding with graphic parables (i., Jozefow, 1830; ii., Zolkiev, 1837; iii., Vienna, 1863; iv., 1861; v., Vienna, 1859); "Ḳol Ya'aḳob" (Warsaw, 1819), a similar commentary on the Five Scrolls; "Kokab mi-Ya'aḳob," a commentary on the "hafṭarot"; "Emet le-Ya'aḳob" (Zolkiev, 1836), a commentary on the Passover Haggadah; "Sefer ha-Middot" (n.p., 1862), ethics arranged in eight "gates" or sections, each section being divided into several chapters. This work resembles very much the "Ḥobot ha-Lebabot" of Baḥya. As the author himself had given no name to it, Abraham Bär Plahm, its editor, at first intended to call it "Ḥobot ha-Lebabot he-Ḥadash" (= "The New 'Ḥobot ha-Lebabot'"); but out of respect for Baḥya he changed his mind. The editor also revised the work, and added to it a preface containing a sketch of the author's life, and glosses of his own under the title "Shiyyure ha-Middot." Moses Nussbaum of Przemysl extracted from the author's "Ohel Ya'aḳob" all the parables, and published them in one book entitled "Mishle Ya'aḳob" (Cracow, 1886).

H. R. M. SEL.

JACOB B. YAḲAR: German Talmudist; flourished in the first half of the eleventh century. He was a pupil of Gershom b. Judah in Mayence, and is especially known as the teacher of Rashi, who characterizes him as "mori ha-zaḳen."

Jacob was one of the leading Talmudic authorities of his time, although Rashi sometimes criticizes the opinions of his teacher. It appears that Jacob had already written commentaries on portions of the Talmud before Rashi (*e.g.*, comp. Rashi on Bek. 41a); at any rate, much in Rashi's commentary on the Talmud is derived from oral communications of Jacob, who, in fact, is meant when Rashi says simply "my teacher" without naming any one. It appears also, from a remark of Rashi (commentary to Job xxii. 30), that Jacob was engaged in interpreting the Bible and in the study of Hebrew. Besides Rashi, the German Talmudists Eliakim b. Meshullam ha-Levi and Solomon b. Samson were pupils of Jacob.

S. S. L. G.

JACOB BEN ZABDA: Palestinian amora of the fourth generation (4th cent.); junior contemporary, and probably pupil, of Abbahu, in whose name he repeats several halakic decisions and homiletic remarks (Yer. Dem. 23c; Pes. 29d; Pesiḳ. 75b; Sheb. iv. 35a; Niddah ii. 6a). He also repeats halakot in the names of Jeremiah and Jose II. (Kelim i. 1).

Jacob was a firm believer in the powers of magic. Bread or other eatables found on the road must not be touched, according to him, because such food may have been laid there for magical purposes (Lev. R. xxxvii.). From the words "And the people spake against God, and against Moses" (Num. xxi. 5) Jacob infers that he who speaks against his teacher is as though he insulted the majesty of God (Midr. Teh. xxx.).

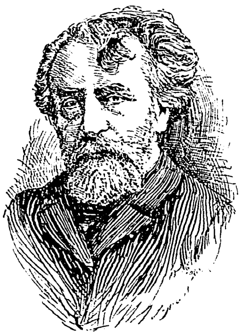
JACOBI, ABRAHAM: American physician; born at Hartum, near Minden, Westphalia, May 6, 1830; educated at the universities of Greifswald, Göttingen, and Bonn (M.D., 1851). Identified with the revolutionary movement in Germany, he was imprisoned at Berlin and Cologne, under the charge of high treason, from 1851 to 1853; when liberated he emigrated to America, settled in New York city, and soon became one of its leading practitioners. He became professor of diseases of children at the New York Medical College (1861-64), at the University of the City of New York (1865-70), and at the College of Physicians and Surgeons, Columbia University (1870-92), from the last of which institutions he received the degree of LL.D.



Abraham Jacobi.

Jacobi was connected also with many of the hospitals of New York city, and was president of the New York Academy of Medicine (1885-89) and chairman of the American Commission to the Fourteenth International Medical Congress at Madrid (1903).

Jacobi contributed articles on diphtheria, dysentery, etc., to Gerhardt's "Handbuch der Kinderkrankheiten." Among his works are: "Dentition and Its Derangement," New York, 1862; "The Raising and Education of Abandoned Children in Europe," *ib.* 1870; "Infant Diet," *ib.* 1874; "Diphtheria," *ib.* 1876; "Therapeutics of Infancy and Childhood," Philadelphia, 1878; "Intestinal Diseases," New York, 1880.

JACOBI, HEINRICH OTTO: German philologist; born at Tütz, West Prussia, 1815; died in Berlin 1864. He studied at Berlin University, and received the honorary degree of Ph.D. from the University of Königsberg in 1854 for his profound knowledge of the Greek language. He was engaged as teacher at the Joachimsthal Gymnasium, Berlin, from 1854 till 1858, and then became teacher at the Friedrich Wilhelm Gymnasium at Posen, where in 1860 he received the title of professor. He became a Protestant.

Jacobi is the compiler of the most valuable "Index Græcitatis" to Meineke's edition of "Græcorum Comicorum Fragmenta," Berlin, 1847. Of his other works may be mentioned "In Comicos Græcos Adnotationum Corollarium," *ib.* 1866.

S. F. T. H.

JACOBI, KARL GUSTAV JAKOB: German mathematician; born Dec. 10, 1804, at Potsdam; died at Berlin Feb. 18, 1851; brother of Moritz Hermann Jacobi. He studied mathematics, philosophy, and philology at the University of Berlin, and in 1824 (having embraced the Christian faith) became privat-docent in mathematics at his alma mater. In 1825 he acted in the same capacity at Königsberg, where he was appointed assistant professor in 1827 and professor in 1829. At that period he, together with Abel, made his epoch-making discoveries in the field of elliptic functions. To benefit his health he went in 1843 to Italy. On his return to Germany he established himself as professor of mathematics at the University of Berlin.

Most of Jacobi's papers were published in Crelle's "Journal für die Reine und Angewandte Mathematik" and in the "Monatsberichte" of the Berlin Academy of Sciences, of which he became a member in 1836. Of his independent works may be mentioned: "Fundamenta Novæ Theoriæ Functionum Ellipticarum," Königsberg, 1829, and "Canon Arithmeticus," Berlin, 1839. Jacobi's lectures on dynamics were published in Berlin in 1866 (2d ed., 1884). The Berlin Academy of Sciences published his "Gesammelte Werke" (8 vols., including supplement; *ib.* 1881-91).

Bibliography: *Brockhaus Konversations-Lexikon*; Lejeune-Dirichlet, in *Abhandlungen* of the Berlin Academy of Sciences (1852); De le Roi, *Juden-Mission*, p. 204; Gerhardt, *Gesch. der Mathematik in Deutschland*, pp. 247-257.
S.

JACOBI, MORITZ HERMANN: German physicist; born Sept. 21, 1801, at Potsdam; died March 10, 1874, at St. Petersburg. He was established as architect at Königsberg when, in 1835, he was appointed professor of architecture in the University of Dorpat. Called in 1837 to St. Petersburg, he became in 1842 an extraordinary member, and in 1847 full member, of the Russian Academy of Sciences, and later he received the title of "state councilor." His greatest merit was the discovery of galvanoplasty (1838). Besides his "Die Galvano-Plastik" (St. Petersburg, 1840) and "Mémoire sur l'Application de l'Electromagnétisme au Mouvement des Machines" (*ib.* 1835), Jacobi published a large number of papers in the "Mémoires" of the Academy of St. Petersburg.

Bibliography: *Brockhaus Konversations-Lexikon*; Wild, *Zum Gedächtnis an Moritz Hermann Jacobi*, 1876.
S.

JACOBI, SAMUEL: Danish physician; born in Yaroslav, Galicia, 1764; died in Copenhagen 1811. He studied the Talmud for some years, but later devoted himself to medical studies, which he pursued at the universities of Breslau, Leipsic, and Halle, obtaining his diploma from the last-named.

In 1792 he settled in Copenhagen, and in 1796 obtained permission to practise medicine in Denmark. In 1798 a royal patent assured him that his faith should prove no hindrance to his promotion.

Jacobi was a very active worker in the interests of his coreligionists. He acted as physician to the Jewish poor, and assisted in founding a free school for Jewish boys, as administrator of which he officiated until his death. During the last year of his life Jacobi was vice-president of the Danish Medical Society.

S. F. C.

JACOBS, GEORGE: American rabbi of English Sephardic descent; born in Kingston, Jamaica, Sept. 24, 1834; died in Philadelphia July 14, 1884. He went to the United States in 1854 and settled in Richmond, Va., frequently officiating for the Congregation Beth Shalome, studying meanwhile for the ministry; in 1857 he was elected to the rabbinate. In 1869 he succeeded Isaac Leeser as rabbi of the Congregation Beth El Emeth in Philadelphia. He was connected with many Jewish and other lodges, and was one of the founders of the Young Men's Hebrew Association of Philadelphia, of the Board of Jewish Ministers of Philadelphia, and of the American Jewish Publication Society. He was a contributor to the Philadelphia Jewish press, published several catechisms, and aided in the revision of the English of the Szold-Jastrow Prayer-Book.

Bibliography: *Jewish Record* (Philadelphia), July 18 and 25, and Oct. 24, 1884.
A.

JACOBS, HENRY S.: American rabbi; born in Kingston, Jamaica, March 22, 1827; died in New York Sept. 12, 1893. He studied for the Jewish ministry under the Rev. N. Nathan, at Kingston, holding at the same time the position of head master in the Jewish Free School. At the age of twenty he accepted a call from the congregation in Spanish Town, but later returned to Kingston as rabbi of the English and German synagogue there. In 1854 he went to the United States as rabbi of the Congregation Beth Shalome in Richmond, Va. His subsequent rabbinates were at Charleston (1858–1862), at New Orleans (1866–73), and at New York (Shearith Israel, 1873–74; B'nai Jeshurun, 1874–93). The honorary degree of D.D. was conferred upon him in 1900. He was president of the Board of Jewish Ministers of New York from its organization until his death, and was vice-president of the New York branch of the Alliance Israélite Universelle. A.

JACOBS, JOSEPH: Critic, folklorist, historian, statistician, communal worker; born Aug. 29, 1854, at Sydney, N. S. W.; educated at Sydney Grammar School, Sydney and London universities, and St. John's College, Cambridge (senior moralist, 1876). After taking his B.A. degree at Cambridge he went to Berlin (1877), where he studied under Steinschneider and Lazarus. From 1878 to 1884 he was secretary of the Society of Hebrew Literature. In the London "Times" of Jan. 11 and 13, 1882, appeared articles by Jacobs on the persecution of the Jews in Russia which drew the attention of Europe to the "pogrom" of 1881 and led to the Mansion House Meeting of Feb. 1, 1882, and to the formation of the Mansion House Fund and Committee, of which Jacobs was secretary (1882–1900). From his connection with the Mansion House (later Russo-Jewish) Committee he was led to investigate the general "Jewish question," as a result of which he published a bibliography (1885) and social and other statistics of the Jews of Europe in a series of papers contributed to the "Jewish Chronicle" and to the "Journal of the Anthropological Institute" (1882 to 1889; afterward republished as "Studies in Jewish Statistics," 1890); they were among the first attempts to apply the principles of statistical science to modern Jewish problems.

Meanwhile his attention had been drawn to Jewish history by the Anglo-Jewish Historical Exhibition of 1887, to the literature and art committee of which he was honorary secretary, in that capacity compiling, with Lucien Wolf, the catalogue of the exhibition. He was associated with Wolf in the compilation also of a bibliography of Anglo-Jewish history as one of the publications of the exhibition. This bibliography has been the inspiration of all subsequent research in that field. In 1888 he undertook a literary journey to Spain to investigate the Jewish manuscript sources of that country; the results of his journey were published in 1893 under the title "Sources of Spanish-Jewish History." In 1891 he wrote, in connection with the Guildhall Meeting, a further account of Russian persecutions, with an appendix on anti-Jewish legislation in Russia (reprinted by the Jewish Publication Society of America).

From his researches in connection with the Anglo-Jewish Historical Exhibition Jacobs was led to study the early history of the Jews in England, on which he published his "Jews of Angevin England" (1893). In 1896 he collected a number of his essays on Jewish philosophy and history under the title "Jewish Ideals"; in the same year appeared the first issue of his "Jewish Year-Book." One of the chief critics of the "Athenæum," he wrote necrologies on George Eliot, Matthew Arnold, Newman, Stevenson, and others, later assembled under the title "Literary Essays" (1894). He has published also a volume on "Tennyson and 'In Memoriam'" (1892). Jacobs has issued many editions of English classics, including Howell's "Familiar Letters" and Painter's "Palace of Pleasure," and has written introductions to Jane Austen's "Emma," Thackeray's "Esmond," and other masterpieces. Toward the end of 1896 he visited the United States, lecturing at Gratz College in Philadelphia and before the Council of Jewish Women at New York, Philadelphia, and Chicago, on the "Philosophy of Jewish History." Jacobs was one of the founders of the Jewish Historical Society of England, of which he was president (1898-99), and also of the Maccabeans. He was for many years on the executive committee of the Anglo-Jewish Association and on the conjoint committee of that body with the Board of Deputies. In 1900 he went to New York to act as revising editor of the Jewish Encyclopedia, in which capacity he is still engaged (1904). He was connected for a time with the "Jewish Chronicle" of London and the "Jewish World" (New York), and is one of the editors of "Jewish Charity."

Jacobs is one of the chief English authorities on folk-lore, and was editor of "Folk-Lore," honorary secretary of the International Folk-Lore Council, and chairman of the literary committee of the Folk-Lore Congress in London, 1881. He has published many works in this field, notably a reprint (1889) of Caxton's "Esope" with a volume of prolegomena on the history of the Æsop fable, as well as several volumes of English and other folk-tales. From his studies in folk-lore he was, in his "Studies in Biblical Archeology" (1894), led to apply to the Bible the method of comparative institutional archeology. Jacobs has also written an imaginative life of Jesus from a Jewish standpoint ("As Others Saw Him," 1895; 3d ed. 1903).

Bibliography: *Men and Women of the Time*, 1894; *Who's Who in England*; *Who's Who in America*; *Dictionnaire International des Folkloristes*, 1889; *Nat. Dict. of Am. Biog.*; *Encyc. of Am. Biog.* 1903; *Critic* (New York), Jan. 23, 1897; *Brit. Mus. Cat.* Supplement, 1903, *s.v.*

A. I. A.

JACOBS, JOSEPH (known as **Jacobs the Wizard**): English conjurer; born at Canterbury 1813; died Oct. 13, 1870. He first appeared in London at Horn's Tavern, Kennington, in 1835, when he introduced the Chinese ring trick. At the Strand Theatre in 1841 he achieved a great success by the aid of expensive apparatus. Jacobs in 1850 invented the trick of producing from under a shawl bowls of water containing goldfish; he appeared at the Adelaide Gallery in 1853, in America in 1854, and in Australia and New Zealand in 1860. In the last-cited year he opened the Polygraphic Hall in London.

Bibliography: *Jewish Record*, Nov. 18, 1870; Frost, *Lives of the Conjurers*, pp. 214-220, London, 1876; Boase, *Modern British Biography*.

J. G. L.

JACOBS, SIMEON: Judge in the Supreme Court of the Cape of Good Hope; born in 1830; died in London June 15, 1883. He became a barrister of the Inner Temple in Nov., 1852. In 1860, in search of health, he emigrated to the Cape of Good Hope, and in 1861 was appointed attorney-general of British Kaffraria, which office he held till 1866, when he became solicitor-general at the Cape of Good Hope. He acted as attorney-general from 1874 to 1882, in which year he was promoted puisne judge and made a member of the executive council. In the course of a few months he retired from active life, and was created C.M.G. in Nov., 1882.

Bibliography: *Jew. Chron.* and *Jew. World*, June 22, 1883; *Times* (London), June 20, 1883; *Zingari*, March 14, 1873; *Cape Argus*, July, 1883; Boase, *Modern British Biography*.

J. G. L.

JACOBSOHN, PAUL: German physician and hygienist; born in Berlin Sept. 30, 1868; educated at the gymnasium in Berlin and the universities of Berlin and Freiburg (M.D. 1891). He settled in his native city, and from 1892 to 1894 was assistant physician at the Jewish hospital there. From 1894 to 1897 he was assistant at the dispensary of Martin Mendelsohn; and since 1898 he has been coeditor with E. Dietrich of the "Deutsche Krankenpflege-Zeitung," of which he was the founder.

Jacobsohn's specialty is the improvement of nursing and the training of nurses. He founded the Deutsche Krankenpflegerbund (society of German nurses) in 1899. Jacobsohn has invented a special stretcher for the conveyance of patients, and a scale for weighing. Among his works may be mentioned: "Handbuch der Krankenversorgung und Krankenpflege" (with G. Liebe and G. Meyer), Berlin, 1898-1902.

S. F. T. H.

JACOBSON: Danish family of engravers, of whom the first important member was **Aaron Jacobson** (1717-75), who, in the middle of the eighteenth century, left Hamburg and settled in Copenhagen, where (1745) he became engraver of the royal seals. He had two sons: **David Aaron Jacobson** (born in Copenhagen 1753; succeeded his father as royal engraver) and **Solomon Aaron Jacobson** (born in Copenhagen 1754; died there June 28, 1830). Solomon Jacobson was a skilful engraver, and in 1788 went to Stockholm to make miniature reproductions in precious stones of some antique statuary belonging to Gustavus III. of Sweden. He was a member of the Academy of Arts of Stockholm, and was admitted (1796) to membership in the Danish Academy of Fine Arts, to which he had submitted an onyx engraving of Apollo. He engraved also several medals, among them being the "Ole Borch Medal" and a medal in commemoration of Queen Marie Sofie Frederikke. **Albert Jacobson**, son of Solomon Jacobson, also became a noted medalist and a member of the Danish and Swedish academies of arts. He carved (1826) in topaz a portrait of King Frederick VI. of Denmark, and (1827) in carnelian a portrait of Emperor Nicholas I.

S. F. C.

JACOBSON, EDUARD: German dramatist; born at Gross Strelitz, Silesia, Nov. 10, 1833 (M.D. Berlin, 1859); died in Berlin Jan. 29, 1897. He established himself as a physician in Berlin. While a student he wrote the farce "Faust und Gretchen" (1856); and from this time on he wrote—either alone or in collaboration with O. F. Berg, O. Girndt, G. v. Moser, Julius Rosen, and others—burlesques which became stock pieces in almost all German theaters. The following may be specially mentioned: "Meine Tante—Deine Tante!" (Berlin, 1858); "Lady Beefsteak" (1860); "Wer Zuletzt Lacht" (1861); "Backfische, oder ein Mädchenpensionat" (1864); "Seine Bessere Hälfte" (1864); "Humor Verloren—Alles Verloren!" (1867); "1,733 Thaler 22½ Silbergroschen" (1870); "500,000 Teufel" (played 300 times successively in Berlin); "Der Nachbar zur Linken" (1887); "Das Lachende Berlin" (1888); "Salontirolerin" (1888); and "Goldfuchs" (1890).

Bibliography: *Meyers Konversations-Lexikon*, 1897.

S.

JACOBSON, HEINRICH: German physician; born Oct. 27, 1826, at Königsberg, East Prussia; died Dec. 10, 1890, at Berlin; educated at the gymnasium of his native town and at the universities of Heidelberg, Berlin, Prague, and Halle, he graduated from the last-named as doctor of medicine in 1847. Settling as a physician in Königsberg, he became privat-docent, and in 1872 assistant professor, at the university of that town. Being elected chief physician at the Jewish Hospital (Jüdisches Krankenhaus: Innere Station) in Berlin in 1872, he removed to the German capital, where he resided for the remainder of his life.

Jacobson was a great clinicist, and wrote many essays and books, especially on experimental pathology. Among them are: "Beiträge zur Hämodynamik" (in Reichert-Du Bois's "Archiv," 1860-62); "Zur Einleitung in die Hämodynamik" (*ib.* 1861); "Ueber die Blutbewegung in den Venen" (in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin"), 1866, 1867; "Ueber Normale und Pathologische Localtemperatur," Berlin, 1870; "Ueber die Herzgeräusche," "Ueber den Blutdruck in Comprimitirter Luft."

Bibliography: *Jew. Chron.* Dec. 19, 1890; Pagel, *Biog. Lex.* s.v., Vienna, 1901.

JACOBSON, HEINRICH FRIEDRICH: German jurist and writer on ecclesiastical law; born at Marienwerder June 8, 1804; died at Königsberg March 19, 1868. He studied in the latter city, and at Göttingen and Berlin; became privat-docent at the University of Königsberg; assistant professor in 1831; and professor of law in 1836. Early in life Jacobson embraced Christianity. He wrote: "Kirchenrechtliche Versuche" (2 vols., Königsberg, 1831-1833); "Gesch. der Quellen des Kirchenrechts des Preussischen Staats" (3 vols., *ib.* 1837-44); "Der Preussische Staat" (Leipsic, 1854); "Ueber das Oesterreichische Konkordat" (*ib.* 1856); and "Das Evangelische Kirchenrecht des Preussischen Staats und Seiner Provinzen" (2 parts, Halle, 1864-66), which was his principal work. Jacobson took a very active part in the ecclesiastical movement of his time and became a partizan of the Free Evangelical Church. In this capacity he wrote on mixed marriages (1838), and on the genuflection of Protestants in Bavaria (1844), etc.

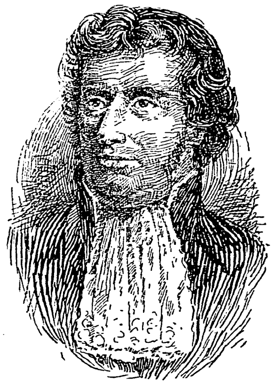
S.

JACOBSON, ISRAEL: German philanthropist and reformer; born in Halberstadt Oct. 17, 1768; died in Hanover Sept. 14, 1828. Originally his father's name was Jacob. His parents were in humble circumstances. Owing to the very low level of efficiency of the Halberstadt public schools, Israel attended mainly the Jewish religious school, in his leisure hours studying on his own account. At the age of nineteen, after having accumulated a small fortune, he became engaged to the granddaughter of Philip Samson, founder of the Samson-Schule at Wolfenbüttel, at which Zunz and Jost were educated. Jacobson took up his residence in Brunswick, and, possessing great financial ability, rapidly increased his fortune. He established (1801) in Seesen, near the Harz Mountains, a school in which forty Jewish and twenty Christian children were to be educated together, receiving free board and lodging. This close association of children of different creeds was a favorite idea of his. The Jacobson school soon obtained wide reputation, and hundreds of pupils from neighboring places were educated there. During the hundred years of its existence it has stood foremost in every line of educational work.

Jacobson very soon perceived the necessity of imbuing the young as early as possible with proper religious impressions. In 1810 he built a beautiful temple within the school-grounds and showed his Reform sympathies by supplying it with an organ, the first instance of the placing of an organ in a Jewish house of worship. Hymns in German were sung by the boys; and prayers in German were added to those in Hebrew. The liberality of his views was further shown by his strong advocacy of the introduction of confirmation. It was Jacobson himself who, in 1811, confirmed, in the Seesen Synagogue, the first five Jewish boys. When, under Napoleon's rule, the kingdom of Westphalia was created, and Jerome, the emperor's brother, was placed at its head, Jacobson, who had removed to Cassel, the residence of the king, was appointed president of the Jewish consistory. In this capacity, assisted by a board of officers, he did his best to exercise a reforming influence upon the various congregations of the country. He opened a house of prayer in Cassel, with a ritual similar to that introduced in Seesen; he also advocated a seminary for the training of Jewish teachers.



Israel Jacobson.

After Napoleon's fall (1815) Jacobson removed to Berlin, where also he attempted to introduce reforms in divine service. For this purpose he opened in his own house a hall for worship in which eloquent sermons were delivered by Zunz, Kley, and Auerbach; but the Prussian government, remembering the French sympathies of Jacobson, and receiving, moreover, continued complaints from the Orthodox party, ordered the services discontinued. It was through Jacobson's influence and persuasion that the so-called "Leibzoll" (poll-tax) was abolished. Throughout his life Jacobson seized every opportunity to promote a cordial understanding between Jews and Christians, and his great wealth enabled him to support many poor of both faiths.

S. H. Ba.

JACOBSON, LUDWIG LEWIN: Danish surgeon; born in Copenhagen Jan. 10, 1783; died there Aug. 29, 1843. He received his early education at the German Lyceum in Stockholm, Sweden, but on deciding to pursue the study of medicine removed to Copenhagen, where he entered the surgical academy. He was graduated as C.B. and M.D. in 1804, and was appointed at his alma mater assistant surgeon in 1806 and lecturer on chemistry in 1807. From 1807 to 1810 he was engaged as tutor at Den Kongelige Veterinær og Landbohöjskole (the Royal Veterinary and Agricultural High School) in Copenhagen.

The Jacobsonian Organ.

During the bombardment of Copenhagen by the British (1807), Jacobson served as a military surgeon at the lazaretto of the freemasons' academical lodge, and after the capitulation he showed his zeal for scientific research by requesting and obtaining permission to inspect the British field-hospitals, of which he later (1809) published an interesting account in the "Bibliothek for Læger." It was, however, in the field of comparative anatomy that Jacobson won his reputation. This science, which at that time constituted the main basis for the study of biology, was being zealously cultivated by the most distinguished savants. In 1809 Jacobson announced to the Danske Videnskabernes Selskab his discovery of and researches concerning a hitherto unknown absorptive organ in the human nose (later named after him "the Jacobsonian organ"). Of this discovery G. Cuvier published an account, "Description Anatomique d'un Organe Observé dans les Mammifères," in "Annales du Muséum d'Histoire Naturelle" (Paris, 1811). This discovery at once placed Jacobson in the front rank of the biologists of his age. The Danish society of sciences awarded him a silver medal of honor; he was given military rank as a regimental surgeon, and was granted a royal stipend to enable him to travel through Germany and France.

During his sojourn in Paris Jacobson devoted a great deal of time to the study of practical medicine and surgery, and was so successful that the Danish government, on his return in 1813, obtained for him admission into the French army in order that he might study the medical system employed therein. In 1814 he served in a field-hospital near Leipsic, and became dangerously ill with fever when the lazaretto was attacked and pillaged by Cossacks. He returned to Denmark the same year (1814) and received from the University of Kiel an honorary diploma as doctor of medicine and surgery. In 1816 the same university conferred upon him the title of professor.

His Surgical Instruments.

Jacobson invented several appliances which proved of great benefit to the surgical profession. Of these may be mentioned his apparatus for the arrest of arterial hemorrhage and his lithoclast for the crushing of stones in the bladder. The latter instrument, which replaced the French lithotrites then in use, was later somewhat modified by the eminent French surgeon Dupuytren.

In 1833 the Académie des Sciences awarded Jacobson one of the Monthyon prizes (4,000 francs), having previously awarded him a gold medal for his important researches into the venal system of the kidneys in birds and reptiles. On the death of the English anatomist Sir Everard Homes, Jacobson became his successor as a corresponding member of the Académie des Sciences. In 1836 he was elected an honorary member of the Kongelige Medicinske Selskab, the Royal Medical Society (of Denmark).

Jacobson was created a knight of the Danebroge in 1829, and he received the silver cross of the same order in 1836. He was also honored with decorations from several foreign potentates. In spite, however, of all the flattering recognition that he received, Jacobson felt depressed because he as a Jew was barred from the University of Copenhagen. A professorship had been offered him on the condition that he embrace Christianity, but he refused to abandon the faith of his fathers. His religious belief prevented also his accepting a special invitation to attend the first meeting of natural scientists to be held in Christiania (1822), because at that time the edict forbidding Jews to stay in Norway was still in force.

Of Jacobson's many writings the following may be mentioned: "Undersögelser over den Steensen'ske Næsekirtel hos Pattedyr og Fugle," Copenhagen, 1813; "Nyreportaaresystemet hos Fisk, Padder, og Krybdyr," *ib.* 1813, 2d ed. 1821; "Primordialnyrerne," *ib.* 1830; "Primordialkraniet," *ib.* 1842.

JACOBSON, NATHAN: American surgeon; born in Syracuse, N. Y., June 25, 1857. He was graduated from Syracuse University, and took a postgraduate course at the University of Vienna. He is professor of clinical surgery in the College of Medicine of Syracuse University, visiting physician to St. Joseph's Hospital at Syracuse, and consulting surgeon to the Syracuse Hospital for Women and Children. Jacobson has for more than twenty years been a member of the executive board of the Jewish Orphan Asylum of western New York. He has published numerous papers on surgical subjects.
A.

JACOBSTHAL, JOHANN EDUARD: German architect; born at Stargard, Pomerania, Sept. 17, 1839. He studied at the architectural academy in Berlin, and, after long travels through Greece and Asia Minor, became in 1874 professor in that institution. At present (1904) he is teacher in the technical high school at Berlin. His architectural abilities were especially displayed in the construction of railroad stations in Alsace-Lorraine (Metz, 1874–78; Strasburg, 1877–84), of the Alexanderplatz station of the Berlin surface railroad, and of the gates of the railway bridges of Dirschau and Marienburg. He has published: "Grammatik der Ornamente," 2d ed., Berlin, 1880; "Süditalienische Fliesenornamente," *ib.* 1887; and "Araceenformen in der Flora des Ornaments," 2d ed., 1889.

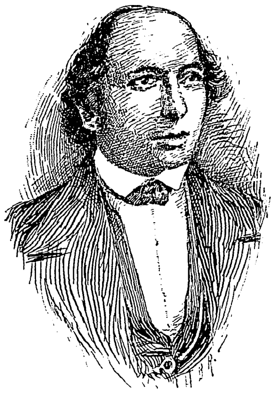
Bibliography: *Meyers Konversations-Lexikon*, 1897.
S.

JACOBY, JOHANN: German physician and statesman; born at Königsberg, Prussia, May 1, 1805; died there March 6, 1877. The son of a well-to-do merchant, after attending the Königsberg Collegium Fredericianum, in 1823 he entered the university in that city, devoting himself to philosophy and medicine. After completing his course (1827) he journeyed through Germany and Poland, and established himself in Königsberg as a physician in 1830, soon acquiring an extensive practise.

In 1831 an article by him entitled "Einige Worte Gegen die Unentbehrlichkeit der Medicinisch-Chirurgischen Pepinière zu Berlin" and consisting of an attack upon the administration of the medical schools, appeared in the "Zeitschrift für Staatsarzneikunde." The same year witnessed the great cholera epidemic. The disease was then almost unknown in Europe, and Jacoby hastened to the Warsaw cholera hospital, where he battled energetically to stem its progress. On his return he was invited to lay the results of his researches before the Königsberg Medical Society, the outcome being improved government regulations for the prevention and treatment of the disease.

Political Activity.

But Jacoby's principal field of activity was to be the political, which he entered with a pamphlet entitled "Ueber das Verhältniss des Königlich-Preussischen Oberregierungsraths Streckfuss zu der Emancipation der Juden" (Hamburg, 1833), being a reply to the pamphlet of Streckfuss, "Ueber das Verhältniss der Juden zum Christlichen Staate." Jacoby points out that the edict of March 11, 1812, did not break the fetters of the Jews in Prussia but only loosened them, inveighs against the plea of Streckfuss that the Jews should be satisfied for thirty or forty years with the rights that had been granted to them, and insists upon the principle that Jews should be invested with equality as a matter of right instead of having privileges doled out to them as favors.



Johann Jacoby.

In his pamphlet "Der Streit der Pädagogen und Aerzte" (Königsberg, 1836) Jacoby advocated a concurrent mental and physical training for the young. An answer by Director Gotthold elicited Jacoby's "Die Apologie des Director Gotthold," in the same year. In July, 1838, he brought out his "Beiträge zu einer Künftigen Gesch. der Censur in Preussen." Jacoby identified himself with the Liberal party, and won national recognition by his "Vier Fragen, Beantwortet von einem Ostpreussen," which appeared in Feb., 1841, on the eve of the meeting of the provincial parliament, to whose members it was addressed. This was at the beginning of the reign of Frederick William IV., when constitutional agitation was rife throughout the kingdom, and Jacoby's anonymous pamphlet, claiming a constitution as a matter of right, created much excitement. The author sent a copy to the king, together with a letter complaining that the pamphlet had been confiscated by the police of Leipsic, and appealing for royal protection. The response came in the form of arrest for lese-majesty and subversive criticism of the law. On April 20, 1842, Jacoby was found guilty and sentenced to two and a half years' imprisonment, but was acquitted on appeal. Meanwhile the pamphlet was republished in Strasburg and Paris. Three years later his two pamphlets entitled "Preussen im Jahre 1845" and "Das Königliche Wort Friedrich Wilhelms III." again moved the authorities to proceed against him.

Member of Prussian National Assembly.

After such experiences it was natural that on the outbreak of the agitation of 1848 Jacoby should be recognized as one of the leaders of the democratic movement. He took a prominent part in the deliberations of the preliminary parliament convened at Frankfort-on-the-Main March 31, 1848, and composed of unauthorized delegates chosen by a committee for the purpose of creating a popular constitution, and was chosen one of the committee of fifty to carry out the provisions of the resolutions adopted by it. On May 22, 1848, the opening day of the Preussische Nationalversammlung, he issued an appeal entitled "Deutschland und Preussen," maintaining that it was the duty of the Prussian deputies not to pursue a selfish Prussian policy but to labor to make Germany a free and united country. A few weeks later he left Frankfort and went to Berlin, where he was elected a member of the Prussian National Assembly. He was appointed a member of the deputation which waited upon the king in vain remonstrance against the Brandenburg-Manteuffel ministry. When, after the address had been read, the king refused a hearing, he exclaimed, "That is the misfortune of kings; they do not wish to hear the truth." Jacoby continued to take part in the proceedings of the National Assembly after its removal to Stuttgart in 1849 and until its dissolution. When he returned to Königsberg in October he was arrested for treason on the charge of having taken part in the "Stuttgart Rumpfparlament," was acquitted Dec. 8 following, and returned to his medical practise. But Jacoby could not long remain out of the turmoil of political life. At the assembly of the electors of Königsberg Nov. 10 and 11, 1858, he delivered a speech on the principles of the Prussian democracy. On May 17 following he was elected to the Prussian Abgeordnetenhaus (Chamber of Deputies), and affiliated with the extreme opposition. On Dec. 13, 1863, he delivered a speech to the electors of Berlin denouncing militarism and the Junkers, for which he was sentenced to six months' imprisonment. Details of his trial are given in "Ein Urtheil des Berliner Kriminalgerichts, Beleuchtet von Jacoby" (Leipsic, 1864) and "Dr. Jacoby vor dem Kriminalsenate des Kammergerichts" (*ib.* 1865).

In his "Heinrich Simon, ein Gedenkbuch für das Deutsche Volk" (Berlin, 1865) Jacoby paid a tribute to his former colleague. In 1866 appeared his pamphlet "Der Freie Mensch, Rück- und Vorschau Eines Staatsgefangenen." Other contributions to literature were "Gotthold Ephraim Lessing, der Philosoph," embodied in the biography of Lessing by Adolf Stahr (Berlin, 1861) and afterward printed separately, and "Kant und Lessing, eine Parallele" (Königsberg, 1867).

Jacoby gradually lost popularity during these later years, and at last stood alone in the chamber. He violently opposed Bismarck, the Austrian war, the reorganization of the army, and the North-German Bund. Estranged from the Fortschrittspartei, he sought to reorganize the Volkspartei, and on

Reorganizer of the Volkspartei.

Jan. 30, 1868, in a speech at Berlin on "Das Ziel der Deutschen Volkspartei," claimed that the working classes must have a greater participation in the government; the speech was published at Königsberg in the following year. In Sept., 1868, the Stuttgart Congress adopted his program. On Jan. 20, 1870, Jacoby spoke at Berlin on "Das Ziel der Arbeiterbewegung" (Berlin, 1870), expounding the principles of Lassalle. His opposition to the annexation of Alsace-Lorraine led to his arrest at a public meeting on Sept. 20, 1870, and he was confined for five weeks in the citadel of Lötzen. In 1874 Jacoby definitely adopted the Social-Democratic program; he was elected to the Reichstag in the same year, but declined to serve. A complete edition of Jacoby's writings and addresses was published at Hamburg (1872, 2 vols.; Supplement, 1877). His "Geist der Griechischen Geschichte" was published after his death by F. Rühl (1884).

JACOBY, LOUIS: German engraver; born June 7, 1828, at Havelberg, Brandenburg, Germany; pupil of the engraver Mandel of Berlin, in which city he settled. The year 1855 he spent in Paris; 1856 in Spain; and the years 1860-63 in Italy, especially in Rome. In 1863 he was appointed professor of engraving at the Vienna Academy, and in 1882 was called to Berlin as adviser on art to the imperial printing-office.

Jacoby's first engraving, Tiarini's "St. John," appeared in 1850. His most important engravings are: Kaulbach's "The Battle of the Huns"; Raphael's "School of Athens" (of which he had made a copy during his stay at Rome); Soddoma's "The Wedding of Alexander and Roxana"; Winterhalter's "The Austrian Emperor Francis Joseph and the Empress Elizabeth"; as well as the portraits of many important scientists and members of society in the Austrian and German capitals, *e.g.*, Rokitansky, Olfers, Ritter, Cornelius, Guhl, Mommsen, Henzen, Grillparzer, Brücke, De la Motte-Fouqué, and York von Wartenburg.

JACOPO (JACOMO) SANSECONDO: Italian musician of the fifteenth and sixteenth centuries; born about 1468. Jacopo was an eminent violinist; his reputation is shown by the fact that in 1502 he played at the wedding of Lucrezia Borgia (Castiglioni, "Il Cortegiano," ii.). He held a prominent position at the court of Pope Leo X. Jacopo was also known as a handsome man, and is said to have been the original of Raphael's "Apollo on Parnassus" (Galleria Sciara, Rome).

JACQUES, HEINRICH: Austrian deputy; born in Vienna Feb. 24, 1831; shot himself Jan. 25, 1894. He studied philosophy and history at Heidelberg, and afterward jurisprudence at Vienna (Dr. Juris, 1856). After having been for five years manager of the Vienna banking firm of Hermann von Wertheimstein Söhne, he severed his connection with the house in 1859, and settled in Vienna as an attorney.

In 1879 Jacques was delegated from the first district of Vienna to the Reichsrath, where he joined the constitutional party ("Verfassungspartei"), and where he secured the passage of a law providing that a certain amount of property, the minimum sufficient for subsistence, should be exempt from taxation. He also endeavored, by repeated motions, to arrange that the full right to pension—especially for railway and postal employees—should commence after thirty-five years' service.

Jacques was director of the following enterprises: the Theissbahn, the Süd-Norddeutsche Verbindungsbahn, the Südbahn, the Creditanstalt, and the Wiener Handelsakademie; in the interests of the last-named institution he labored for twenty years, first as its founder, and afterward as its vice-president. In 1870 he superintended the collection for the wounded in the Franco-Prussian war, and in 1872 was decorated with the Prussian Order of the Crown.

His best-known works are: "Theorie und Praxis im Civilrecht," Vienna, 1857; "Denkschrift über die Stellung der Juden in Oesterreich," 4th ed., 1859; "Unterrichtsrath und Unterrichtswesen in Oesterreich," 1863; "Revolution und Reaction in Oesterreich 1848-49," 1867; "Die Wuchergesetzgebung und das Civil- und Strafrecht," 1867; "Die Legislative Organisation der Freien Advocatur," 1868; "Grundlagen der Pressgesetzgebung," 1874; "Abhandlungen zur Reform der Gesetzgebung," Leipsic, 1874; "Alexis de Tocqueville," Vienna, 1876; "Eisenbahnpolitik und Eisenbahnrecht in Oesterreich," 1878; "Oesterreich's Gegenwart und Nächste Zukunft," 1888. Of a greater work, "Revision des Deutschen und Oesterreichischen Strafrechtes," which he had planned, only the first volume was completed.

s. L. Y.

JACQUES PASHA (Jacques Nissim Pasha): Turkish army surgeon; born in 1850 at Salonica; died there Aug. 25, 1903. The son of a physician, he was sent at an early age to the school of medicine at Constantinople, from which he was graduated in 1874. In the following year he was attached, with the rank of captain, to the hospital Haidar Pasha at Constantinople, and in the same year he accompanied, as adjutant-major, a Turkish detachment to Bosnia and Herzegovina. He later became director of the Central Hospital of Salonica, which position he occupied until his death. He was also appointed medical inspector of the Third Army Corps at Salonica and inspector of public and private hygiene for the vilayet of Salonica. He died from gangrene contracted while dressing the wound of a soldier who had been disabled in a skirmish with the Macedonians. He was decorated with the orders of Nishan-i-Medjidie and Nishan-i-Osmanie, the medal of Iftikhar, and a number of foreign decorations. He was president of the Biḳḳur Ḥolim of Salonica.

s. M. Fr.

JADASSOHN, JOSEF: German physician; born at Liegnitz Sept. 10, 1863. He was educated at the universities of Göttingen, Breslau, Heidelberg, and Leipsic (M.D. Breslau, 1886). From 1887 to 1892 he was assistant physician at the dermatological hospital and dispensary of the University of Breslau, and from 1892 to 1896 physician-in-chief of the dermatological department of the Allerheiligen Hospital. In 1896 he was appointed assistant professor, and director of the dermatological clinic, at the University of Bern; in 1904, professor. He has contributed various essays on syphilis and dermatology to the medical journals, and is the author of "Venerische Krankheiten," in Ebstein-Schwalbe's "Handbuch der Praktischen Medizin."

BIBLIOGRAPHY: Pagel, *Biog. Lex.* Vienna, 1901.

S. F. T. H.

JADASSOHN, SOLOMON: German composer and music teacher; born at Breslau, Prussia, Aug. 13, 1831; pupil at the Breslau gymnasium and of Hesse (pianoforte), Lüstner (violin), and Brosig (harmony). In 1848 he entered the Leipsic Conservatorium, which, however, he left after a year in order to study with Liszt at Weimar. Here he advanced rapidly, and eventually became a virtuoso of no mean ability.

After a private course in composition under Hauptmann, Jadassohn in 1852 settled in Leipsic as a teacher of music. In 1866 he became conductor of the Psalterion Choral Society, and from 1867 to 1869 was director of the Euterpe concerts. Since 1871 he has been professor of harmony, composition, and instrumentation at the Conservatorium; and his treatises on these subjects are considered among the best.

Jadassohn's most noteworthy theoretical works are: "Harmonielehre" (Leipsic, 1883, and four later editions; English ed., New York, 1893; 2d revised ed., 1894; also translated into French and Italian); "Kontrapunkt" (1884); "Die Formen in den Werken der Tonkunst" (1889; 2d ed., 1894); "Lehrbuch der Instrumentation" (1889). In addition to these works, most of which have been translated into English, Jadassohn has published more than 130 compositions.

S. J. So.

JADDUA: High priest at the time of the Second Temple. According to Neh. xii. 11, his father's name was Jonathan, but according to verse 22 of the same chapter, it was Johanan. If both of these names are correct, and if Johanan was the son of Jonathan, or vice versa, Jaddua belonged to the sixth generation after Jeshua, the first high priest who returned from the Exile; but if "Jonathan" and "Johanan" refer to one person, then Jaddua was of the fifth generation. A certain Jaddus, son of Joannes, whose brother Manasseh married Sanballat's daughter, officiated at the time of Alexander the Great (Josephus, "Ant." xi. 7, § 2); and between this date and the return from the Exile there are six, rather than five, generations. Indeed, even six seem to be too few. The hypothesis that Johanan and Jonathan were father and son is therefore the more probable, since the Jaddua mentioned by Nehemiah seems to be identical with the Jaddus mentioned by Josephus; but it must be noted that the Septuagint has once 'Ιωδαέ and once 'Ιδούα, which do not correspond well with 'Ιαδδοῦς, found in Josephus. The high priest whom Alexander the Great greeted respectfully before the gates of Jerusalem was Jaddus, according to Josephus ("Ant." xi. 8, § 4); while in Talmudic accounts the same story is told of Simon the Just. But as Jaddua's son was the same Onias ("Ant." xi. 8, § 7) who was, according to another source (I Macc. xii. 7, 8, 20), a contemporary of King Areus of Sparta (309–265 B.C.), and as the often-mentioned Simon the Just was Onias' son ("Ant." xii. 2, § 5), there is an insolvable discrepancy between Josephus and the Talmud. Josephus must be given the preference here, as it is well known that the Talmud was inclined to group all the legends of that period around the person of Simon; and the act of Alexander the Great seems to be merely a legend.

The Christian chroniclers, as Eusebius, the "Chronicon Paschale," and Syncellus, of course follow Josephus; while the Jewish chroniclers of the Middle Ages tried to solve the difference in a naive way which excited the ridicule of Azariah dei Rossi ("Me'or 'Enayim," § 37). The Jewish sources write the name in the form עדון or עדוא; *e.g.*, Simon Duran in "Magen Abot," p. 4d (Leipsic, 1855). A more detailed account of the person of Jaddua would have to deal with the question how the lists of high priests in Nehemiah and in Josephus are to be interpreted.

G. S. Kr.

JAEL, THE KENITE WOMAN: Wife of Heber, the Kenite (Judges iv. 17). Jabin, the king of Canaan, "that reigned in Hazor," had tyrannized over Israel for twenty years. Deborah and Barak aroused the northern tribes and assembled them at Mount Tabor, to throw off, if possible, the yoke of their oppressor. Jabin's general, Sisera, took the field at the head of a great Canaanitish army, but was defeated by Israel. In his flight Sisera, who was on foot, came to the tent of Jael, whose husband had been on good terms with King Jabin. She invited him into her tent: "Turn in, my lord, turn in to me; fear not." He accepted the proffered refuge and hospitality. She gave him nourishment in the form of curds, and concealed him in her tent. He asked her to protect him against any one who should be seeking him. As soon as he had fallen asleep she stealthily crept up to him and drove a tent-pin into his temples; and when she saw Barak in pursuit she invited him in to see his enemy prostrate in death.

The poetic account (Judges v.), while it does not give all the details of the prose record, by no means conflicts; it is complementary. Jael's act, praised in Judges v. 24, is contrary to modern ideas of right and to the obligations of hospitality as recognized in the East to-day. But she was a Kenite, akin to Israel; and history contains many precedents to justify a breach of faith under such circumstances. Though barbarous to modern sentiment, her act was not below the morality of her times.

E. G. H. I. M. P.

JAEN: Capital of the province of Jaen in Andalusia, Spain. It possessed a flourishing Jewish community as early as the thirteenth century. In 1391 many of its members were either killed or forced to accept baptism. A still heavier blow fell upon the Jews of Cordova and the Maranos of Jaen in March, 1473. The Connetabe Miguele Lucas de Iranzo, who tried to protect the Maranos, had to seek refuge, and was speared to death in a church by the infuriated populace, who then fell upon the Maranos and Jews, plundering and killing them. The massacre at Jaen was even more terrible than that at Cordova.

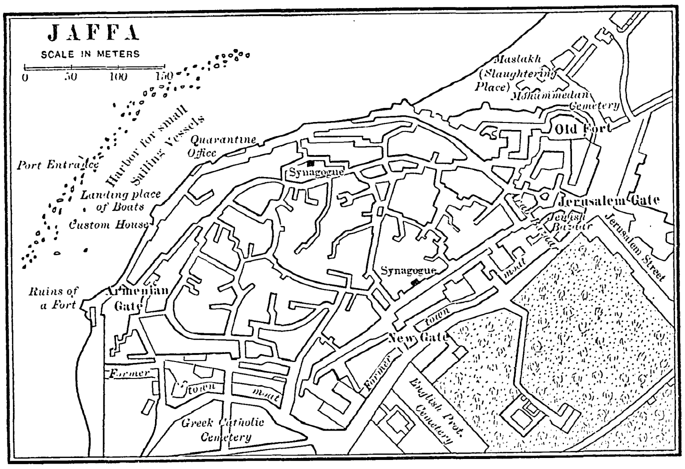
JAFFA (Hebr. **Yafo**; A. V. **Joppa**; Greek, **Joppe**; Arabic, **Yaffa**): City of Palestine and Mediterranean port, 35 miles northwest of Jerusalem. In ancient times it was Palestine's only point of communication with the Mediterranean. The cedars of Lebanon, destined for use in the construction of Solomon's Temple, were disembarked at Jaffa (II Chron. ii. 15 [A. V. 16]; Ezra iii. 7). The prophet Jonah embarked there for Tarshish (Jonah i. 3). There is no further mention of the city in the Old Testament.



Plan of the Modern City of Jaffa.

Historical Data.

At a later date the Maccabean princes Jonathan and Simon wrested it from the Syrians (I Macc. x. 76, xiv. 5). At the time of the Jewish insurrection against the Romans the town was taken by assault and burned by Cestius, 8,000 inhabitants being massacred by the Roman soldiers. Some time afterward the Jews rebuilt the city walls. Pirates, putting out from the port of Jaffa, troubled the coasts of Phenicia and Syria, which brought down the Romans upon the city anew. Vespasian took it by a night attack, razed it to the ground, and erected in its place a citadel in which he placed a Roman garrison.

There is no record of any Jews in Jaffa under the Byzantine domination, but there are mentioned in Babli a Rab Adda and a R. Aḥa of Yafo (Ta'an. 16b; Meg. 16b). Under the Arabs there were no Jews in Jaffa.

During the period of the Crusades Benjamin of Tudela (1170) sojourned at Jaffa, and found there one Jew only, a dyer. At the end of the sixteenth century Jaffa, according to the traveler Cotwyk, was only a heap of ruins.

In 1780 the grand rabbinate of Constantinople officially requested a Christian official, one Hanna Domia, to protect Jews passing through Jaffa on their way to Jerusalem. In 1820 Isaiah Agimann, who acted as banker of the Janizaries at Constantinople, shocked by the humiliation to which Jews were exposed at Jaffa, purchased there a piece of real estate which he legally transferred to the Sephardic community of Jerusalem. One part of this served as a free hotel for Jewish travelers, in which was fitted up a prayer-room. Little by little the Jews established themselves in Jaffa.

A sailing vessel from the north of Africa, with a large number of Jewish passengers, foundered before Haifa; and those who escaped from the wreck settled at Jaffa. In 1839 a body of Ashkenazim, coming from Europe, established themselves at Jaffa. The community was, however, too poor to buy a cemetery, and continued to bury its dead at Jerusalem.

In 1841 the chief rabbi of Jerusalem, Abraham Ḥayyim Gagin, assigned to Jaffa Judah Halevy as rabbi. Thenceforth the old "ḥerem" of the Jerusalem rabbis against the settlement of Jews in Jaffa, the object of which was to attract all immigrants to Jerusalem, ceased to be binding. Jews even from Jerusalem went to Jaffa and established themselves there for commercial purposes. Among these may be cited Amzaleg, the present English consul in the city.

Present Statistics.

Jaffa, in a total population of 17,713 inhabitants, including 11,630 Moslems and 3,113 Christians, besides Armenians, Greeks, Latins, Maronites, and Copts, possesses 2,970 Jews, of whom 1,210 are Sephardim and 1,760 Ashkenazim. The Jews occupy three city districts, bearing the respective names "Neweh Ẓedeḳ," "Neweh Shalom," and "Neweh Yafeh," and each comprising a block of houses. The Jewish market, consisting of shops and workrooms, is partly on the quay and partly on the main street traversing the city. Although of recent foundation, the community possesses a number of institutions, *e.g.*:

The Hospital Sha'ar Ẓiyyon, founded in 1891, and sustained by the gifts of the Jewish philanthropists of Europe; a public library, founded in 1885, and containing several thousands of books in different languages; two schools, founded in 1894, sustained by the Alliance Israélite and by Zionist societies of Russia and Vienna, and educating 118 boys and 241 girls; two Talmud Torahs: one, Or Torah, Sephardic, founded (1838) through the munificence of Baron Menascé of Alexandria and educating 180 boys; the other, Sha'are Torah, Ashkenazic, dating from 1884 and accommodating 130 boys; three Ashkenazic synagogues, one Sephardic; and some private midrashim. Jaffa possesses also five Jewish benevolent societies, among them a B'nai B'rith lodge.

In 1898 Jaffa had for chief rabbi Joseph ben Nuss (d. 1901). He was succeeded by Rabbi Malka.

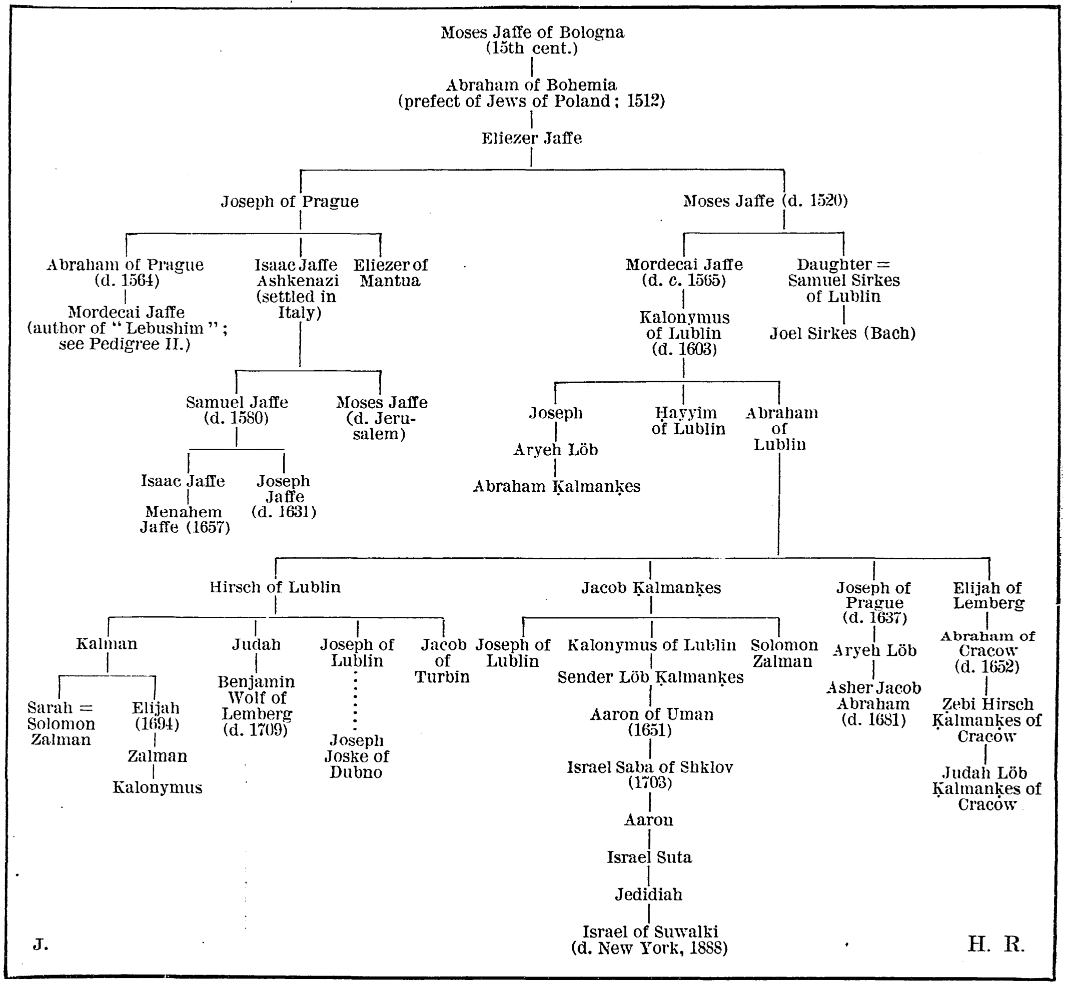
JAFFE (JOFFE): Family of rabbis, scholars, and communal workers, with members in Germany, Austria, Russia, Great Britain, Italy, and the United States. It traces its descent from Mordecai Jaffe (1530–1612), author of the "Lebushim," and his uncle Moses Jaffe, both descendants of an old family of Prague. According to Joseph Lewinstein, rabbi at Serock, government of Warsaw, the progenitor of the Jaffes was Samuel ben Elhanan, a grandson of Isaac ha-Zaken (died at the end of the twelfth century), whose father was Samuel, the son-in-law of Rabbi Meïr of Ramerupt, the father of Jacob Tam, grandson of Rashi. Lewinstein's conclusions, however, have not yet been substantiated.

From Abraham, the father of Mordecai ("Lebushim"), came the Jaffe branch proper, while another Mordecai, the son of Moses Jaffe, settled in Cracow, where he married the daughter of Joel Singer and assumed the name of his father-in-law, in accordance with the custom current among the Jews of Poland. His descendants, often called Ḳalmanḳes, were sometimes confounded with the descendants of the author of the "Lebushim," and it is difficult to ascertain to which of the two houses some of the later Jaffes belong. Again, many Jaffes have taken the names of Itzig, Meier, Margolies, Schlesinger, Rosenthal, Wallerstein, etc., while many distant relatives, really of other houses, have preferred to take the popular name of Jaffe. In the tables given below these questions have been elucidated in so far as documentary or authoritative private evidence has permitted. Isaac and Eliezer, two other brothers of Abraham ben Joseph (father of the author of the "Lebushim"), settled in Italy, and there became the progenitors of the Italian branch of the Jaffes. Three daughters of Mordecai Jaffe ("Lebushim") married



Moses Jaffe of Bologna (15th cent.)
Abraham of Bohemia (prefect of Jews of Poland; 1512)
Eliezer Jaffe
Joseph of Prague
Moses Jaffe (d. 1520)
Abraham of Prague (d. 1564)
Mordecai Jaffe (author of "Lebushim"; see Pedigree II.)
Isaac Jaffe Ashkenazi (settled in Italy)
Eliezer of Mantua
Mordecai Jaffe (d. c. 1565)
Daughter = Samuel Sirkes of Lublin
Kalonymus of Lublin (d. 1603)
Joel Sirkes (Bach)
Samuel Jaffe (d. 1580)
Moses Jaffe (d. Jerusalem)
Isaac Jaffe
Menahem Jaffe (1657)
Joseph Jaffe (d. 1631)
Joseph
Aryeh Löb
Abraham Ḳalmanḳes
Ḥayyim of Lublin
Abraham of Lublin
Hirsch of Lublin
Jacob Ḳalmanḳes
Joseph of Prague (d. 1637)
Aryeh Löb
Asher Jacob Abraham (d. 1681)

Jaffe Pedigree III.

the sons of three of the most prominent Jewish families of that time (see Table II.), and in this way the Jaffe family became related to the Wahls, Epsteins, and Günzburgs. The daughter of Moses Jaffe was the wife of Samuel Sirkes. Later the Jaffes united with the families of Katzenellenbogen, Schorr, Heilprin, Bacharach, Deiches, Rosenthal, Minz, etc. The following is a partial enumeration of the members of both branches of the family, the descendants of Moses Jaffe being indicated by K (= Ḳalmanḳes):

Aaron Jaffe (K): Son of Israel (Saba) of Shklov and father of Israel Jaffe Zuṭa; lived in the middle of the seventeenth century.

Aaron Jaffe (K) **of Uman:** Father of Israel Jaffe (Saba) of Shklov; born 1568 at Prague; died at Glusk 1651. He was rabbi at Uman, and escaped during the Cossack uprising (1648) to Glusk.

Abraham Abba ben Israel Jaffe: Rabbi at Ponewiezh; author of "Sefatayim" on the Talmud, and "Bet Yisrael," responsa (in manuscript at Jerusalem). His mother was the daughter of David Solomon, rabbi at Lissa, and his sons were Shabbethai Weksner, Jedidiah of Bausk, and Isaac (went to Jerusalem). The son of Shabbethai was Joseph of Weksna.

Abraham Aberl b. Perez: Grandson of Mordecai Jaffe ("Lebushim"); died at Nikolsburg, Moravia, 1657. Misled by Warnheim ("Ḳebuẓat Ḥakamim," p. 117), N. Brüll declared Abraham Aberl to have been the son of Mordecai and the successor of R. Pethahiah as chief rabbi of Moravia. Friedländer and others followed him in that error. Aberl's tombstone, however, was badly decayed, and the words ר' פרץ (= "R. Perez") were ascertained with great difficulty (Feuchtwang, in "Gedenkbuch zur Erinnerung an David Kaufmann," Breslau, 1900).

Abraham b. Aryeh Löb Ḳalmanḳes: Author of "Ma'yan ha-Ḥokmah," an introduction to the Cabala (Amsterdam, 1652). Fuenn ("Keneset Yisrael," p. 59) confounded him with Asher Jacob Abraham (see Joseph Kohen-Ẓedeḳ in "Ha-Asam").

Abraham of Bohemia (see Jew. Encyc. i. 100): According to Joseph Lewinstein, the great-grandfather of Abraham b. Joseph.

Abraham b. Elijah Ḳalmanḳes: Dayyan at Cracow; son of Elijah b. Abraham Ḳalmanḳes, rabbi at Lemberg. He was the son-in-law of Zalman b. Jacob Walsh, and his signature appears in the "pinḳes" of Lemberg of 1650 in two cases (Dembitzer, "Kelilat Yofi," p. 39b, note 2). He died 1652.

Abraham b. Joseph: Father of Mordecai Jaffe ("Lebushim"); a merchant and a rabbinical scholar; pupil of Abraham ben Abigdor; died 1564 ("Lebush ha-Or," p. 294).

Abraham b. Kalonymus of Lublin (K): Author of "Adderet Eliyahu" (commentaries and notes on the Pentateuch; Frankfort-on-the-Oder, 1694). He was a second cousin of Asher Jacob Abraham b. Aryeh Löb (the author of "Ha-Eshel"). He had a son named Kalonymus.

Abraham b. Kalonymus b. Mordecai (K): Brother of the first Hebrew printers in Lublin. He had two sons, Hirsch and Jacob.

Anselm Benjamin Jaffe: Died at Berlin 1812. His wife was Reicke, daughter of Aaron b. Isaac Saul of Frankfort-on-the-Oder, who published (1746), in conjunction with his brother-in-law Judah Be'er, the great-grandfather of Giacomo Meyerbeer, a Pentateuch with commentaries. Anselm's son was Saul Ascher of Berlin.

Aryeh Löb b. Joseph b. Abraham Ḳalmanḳes: Father of Asher Jacob Abraham.

Aryeh Löb b. Mordecai: Son of the author of the "Lebushim"; mentioned in preface to "Yam shel Shelomoh, Giṭṭin" (Berlin, 1761).

Asher Jacob Abraham b. Aryeh Löb Ḳalmanḳes: Author of "Ha-Eshel," sermons (Lublin, 1674), and "Birkat Abraham," on Talmudic law.

Until the age of ten he studied Talmud with his grandfather Joseph. During the Cossack uprising (1648) he fled to Egypt, and from there went to Jerusalem. In 1671 he returned to Lublin, where he became rabbi. He died at Lemberg 1681.

Benjamin Wolf b. Judah Ḳalmanḳes: Died at Lemberg 1709. He left in manuscript (preserved at Oxford) a work entitled "Hanhagat ha-Bayit," on religious ethics, with a commentary; it is published in "Maẓẓebet Ḳodesh" (see "Maẓẓebet Ḳodesh," i. 62; Fuenn, "Keneset Yisrael," p. 173).

Daniel Jaffe. See Itzig, Daniel.

David Friedländer: Son-in-law of Daniel Itzig-Jaffe.

David Jaffe: Father of Aryeh Löb Wallerstein of Holschitz.

David b. Ẓebi Hirsch Saba: Rabbi at the Klaus-Synagoge, Prague.

Dobrush: Daughter of Phinehas Jaffe of Kalvariya; wife of Tobiah of Kalvariya, a pupil of Elijah of Wilna; lived in the eighteenth and nineteenth centuries.

Eleazar Jaffe: His signature is found in the pinḳes of Berlin of 1743 (Landshuth, "'Ammude ha-'Abodah," p. 37).

Eliasberg, Mordecai b. Joseph (1817–89), and his son **Jonathan** (1850–98). See Jew. Encyc. v. 111.

Eliezer Jaffe: Son of Abraham of Bohemia; lived in the sixteenth century.

Eliezer (Lazar) Jaffe: Physician; lived in the middle of the nineteenth century ("Ha-Maggid," 1861, No. 39, p. 255).

Eliezer b. Alexander Kleinberg (Bausker): Rabbi at Wilna; went to America and became rabbi at Chicago, Ill.; died in New York city 1891.

Eliezer (Lazar) b. Jacob Riesser-Katzenellenbogen: Father of Gabriel Riesser; son-in-law of Raphael ha-Kohen, rabbi of Hamburg. He was the author of "Zeker Ẓaddiḳ," with a supplement, "Ma'alele Ish," containing sermons and a biography of Raphael ha-Kohen (Altona, 1805). He also wrote, in German, "Sendschreiben an Meine Genossen in Hamburg, oder eine Abhandlung über den Israelitischen Kultus" (Altona, 1815). His "Ma'alele Ish" (p. 11b) traces the descent of his father-in-law from Mordecai Jaffe.

Eliezer of Mantua: Son of Joseph of Prague and uncle of Mordecai Jaffe ("Lebushim").

Eliezer (Lazar) b. Shalom Rosenthal: Born at Brody 1768; died at Bausk, Courland, 1840 (see Rosenthal, Eliezer).

Elijah b. Abraham Ḳalmanḳes: Rabbi at Lublin, and later at Lemberg and Opatow; died at the latter place in 1636 ("Kelilat Yofi," pp. 26, 38b).

Elijah b. Kalonymus: Author of "Adderet Eliyahu" (see Jew. Encyc. v. 131). According to Joseph Cohen-Ẓedeḳ (Rabinowitz, "Ha-Meassef," p. 134, St. Petersburg, 1902), he was the brother-in-law of Solomon Zalman Ḳalmanḳes. He had a son named Kalonymus.

Elijah b. Shalom: Rabbi at Neustadt-Shervint (Wladislawow); born between 1750 and 1775; died about the middle of the nineteenth century; a brother of Eliezer (Lazar) Rosenthal (see Rosenthal, Elijah).

Enoch Zundel: Rabbi at Olinka; son of Mordecai b. Joseph of Plungian; lived in the eighteenth century.

Enoch Zundel: Rabbi of Pultusk; son of Jacob of Lidvinovi; died on the 11th of Adar (Sheni), 1891.

Enoch Zundel Jaffe (called also **Zundel Ḥalfon**): Grammarian and authority on the Masorah; son of Moses b. Mordecai b. Joseph Jaffe; lived in the eighteenth century.

Ephraim b. Aaron of Prague (K): Brother of Israel of Shklov (author of "Or Yisrael"); born about 1638, his father then being at the age of seventy (Walden, "Shem ha-Gedolim he-Ḥadash," p. 26).

Epstein, Aryeh Löb (K): Relative of Israel b. Aaron Jaffe (Saba) of Shklov (17th cent.; see Fuenn, "Keneset Yisrael," p. 694; Eliezer Kohn, "Ḳin'at Soferim," p. 61b).

Epstein, Jehiel Michael ha-Levi: Physician; died in 1632; son of Abraham Epstein, rabbi of Brest-Litovsk (d. 1617). He married Bella, the daughter of Mordecai Jaffe. His son-in-law was Abraham b. Joseph Heilprin, rabbi at Kauth, a descendant of Elhanan b. Isaac, the tosafist. Rabbi Joseph Lewinstein of Serock is a descendant of this family.

Frank Jaffe: Lived in London; translated A. Mapas' "Ahabat Ẓiyyon" into English under the title "Amnon, Prince and Peasant" (London, 1887). His father was **Abraham Jaffe,** of London; his grandfather, **Mordecai Jaffe,** of Memel, Prussia. **Moses Jaffe,** a lawyer of New York city, is a nephew of Abraham.

Frommet: Wife of Ḥayyim Jaffe; died at Prague in 1635, at the age of seventy-three (Hock, "Die Familien Prag's," p. 172).

Ginzberg, Louis (see Jew. Encyc. v. 671): Related to the Jaffes on his mother's side.

Ḥayyim b. Kalonymus b. Mordecai (K): Printer at Lublin.

Hirsch b. Abraham (b. Kalonymus b. Mordecai: K): Bought the printing establishment of his grandfather Kalonymus (1606).

Hirsch b. Benzion Shlez: Grandson of Shabbethai Jaffe of Weksna; author of "Te'ome Ẓebiyyah," on the Halakah, and of "Siḥat Ḥullin," sayings of rabbinical scholars (2d ed., Warsaw, 1889).

Isaac b. Joseph Jaffe-Ashkenazi: Studied in Padua under Judah b. Eliezer Minz, and settled in Italy, where he married into a Sephardic family. His sons were **Samuel** and **Moses.**

Isaac Ḳalmanḳes of Lublin: Teacher of Moses ha-Kohen of Metz (formerly of Narol); author of "Birkat Ṭob"; lived in the seventeenth century. His son was **Meïr,** and his grandson **Mordecai** (author of "Tabnit ha-Bayit").

Isaac b. Simon of Warka.

Israel (K): Rabbi at Kopys, government of Moghilef; had a Hebrew printing establishment at Kopys, and published an edition of the Talmud (1816–28).

H. R.

Israel ben Aaron Jaffe (Saba): Russian rabbi; born at Uman about 1640; died at Frankfort-on-the-Oder after 1702. From childhood he was brought up in the atmosphere of the Talmud. On attaining maturity he became rabbi at Shklov, where he remained till 1702. He then went to Frankfort-on-the-Oder to publish his "Or Yisrael" (1702), which aroused considerable animosity because it was alleged to countenance the followers of Shabbethai Ẓebi.

Jaffe, who in his youth had witnessed the sufferings of his coreligionists at the hands of Chmielnicki and his associates (1648), devoted himself assiduously to the study of the Cabala in order to find out the reason for the prolongation of the Exile ("Galut"), and why God had permitted the outrages of 1648. He rebuked the Rabbis, who declared that their work was the real work of God. Especially did he rebuke them for their lack of interest in the study of the Cabala; and it was on this account that he composed the "Or Yisrael." Besides this work he wrote "Tif'eret Yisrael," called also "Milḥamot Adonai," appended to which are "Kishshut Ṭob" and "Sefer Yisrael Zuṭa," homiletical expositions of the Law. It was published by his grandson Israel Jaffe (Zuṭa), Frankfort-on-the-Oder, 1774.

Bibliography: Fuenn, *Keneset Yisrael*, p. 694, Warsaw, 1886.

H. R. B. Fr.

Israel b. Aaron Jaffe (Zuṭa: K): Grandson of Israel b. Aaron Jaffe (Saba); lived in the eighteenth century. At the age of twenty-five he published an extract of his grandfather's "Tif'eret Yisrael" ("Ha-Shaḥar," vi. 929).

Israel David b. Mordecai Margolies-Schlesinger-Jaffe (called also **David Sered**)**:** Rabbi at Bösing, Hungary; descendant of Mordecai Jaffe, and, on his mother's side, of Liva b. Bezaleel of Prague; author of "Meḥolat ha-Maḥanayim," responsa (Presburg, 1859); "Har Tabor," responsa, with a supplement in German directed against Dr. W. A. Meisel, chief rabbi of Budapest (Presburg, 1861); and "Ḥazon la-Mo'ed," on the calendar.

Israel b. Jedidiah (K)**:** Cantor at Suwalki and in New York city; author of "Ishshe Yisrael," commentary to Moses Isserles' "Torat ha-'Olah" (Königsberg, 1854–57); died in New York city 1888; descendant of Israel b. Aaron of Shklov (as is evident from the preface to "Torat ha-'Olah") and not of Jedidiah b. Abba of Bausk (as given by N. Sokolov in "Sefer Zikkaron").

Israel Landau: Lived at Sadagora; descendant of Mordecai Jaffe ("Lebushim").

Israel b. Zalkind b. Isaac Jaffe: Lived at Zhagory; father-in-law of Dob Bär Rabbiner, the father of Benash Zalkind Rabbiner of New York; Israel's brother Simon was the grandfather of Ḥayyim Sack of Zhagory.

Israel b. Ẓebi Hirsch Jaffe (called also **Israel Weksler**)**:** Prominent merchant at Bausk, Courland; born in 1800; died in 1870; son-in-law of Eliezer (Lazar) Rosenthal. His son **Solomon Wolf** removed to New York city.

Jacob: Son of Israel Jaffe of Shklov; rabbi at St. Petersburg, where he died April 22, 1820 ("Voskhod," Feb., 1881, p. 41).

Jacob: Rabbi at Ludvinovi; author of "Gufe Halakot" (1822); son of Phinehas of Kalvariya and of Naomi, daughter of Samuel of Karlin and Antipoli.

Jacob b. Abraham b. Kalonymus b. Mordecai (called also **Jacob Ḳalmanḳes**)**:** Lived in the seventeenth century. In 1662 he reestablished the Hebrew printing-press at Lublin, which had been closed in 1648 on account of the Cossack uprising, and employed his two sons, **Joseph** and **Kalonymus (Ḳalman),** as assistants.

Jacob of Krink: Son of Enoch Zundel Ḥalfon; died at Krink 1780; left various works in manuscript (see "Da'at Ḳedoshim," p. 36).

Jedidiah b. Abraham Abe Jaffe: Educator; lived at Bausk; died about 1862; brother of Shabbethai Jaffe (Weksner); grandfather of S. Schaffer of Baltimore, Md. (through his daughter Taube).

Joel ben Samuel Jaffe. See Sirkes, Jacob.

Joseph: Grandfather of Mordecai Jaffe ("Lebushim"); lived in the fifteenth century.

Joseph b. Abraham Ḳalmanḳes (K)**:** Rabbinical scholar; rabbi at various places in Poland and Bohemia; died at Prague 1637 ("Gal Ed," No. 82).

Joseph b. Kalonymus b. Mordecai (K)**:** Printer at Lublin in the seventeenth century.

Joseph b. Mordecai b. Joseph of Plungian: President of the Lithuanian council; his signature is attached to documents emanating from the council of Krozhe (1779).

H. R.

Joseph b. Moses Jaffe: Russian rabbi; born in Vilkomir, government of Wilna, 1846; died in Manchester, England, June 30, 1897. In 1874 he became rabbi of Pokroi, government of Wilna, where he remained nine years. In 1883 he became rabbi of Salaty, government of Kovno, and in 1886 he succeeded his father as rabbi of Garsdi, in the same government. In 1893 he went to England as rabbi of the Russian-Polish congregation at Manchester, and retained the position until his death. He was the author of "Yosef Bi'ur" (Wilna, 1881), on Canticles, and of an ethical work in verse, entitled "Ha-Sekel we ha-Yeẓer." He wrote also responsa and sermons, which are still in manuscript.

Bibliography: Eisenstadt, *Dor Rabbanaw we-Soferaw*, i. 32, Wilna; *Aḥiasaf*, 5659, pp. 342–343.

H. R. P. Wi.

Joseph Silverstrom: Son of Jacob of Krink; son-in-law of Arush Mintz of Meseritz (Mezhirechye).

Judah Löb b. Asher Selig Margolioth: Rabbi at Suchostav, Kapitschintze, Buzhanov, Lesla, Plotzk, and Frankfort-on-the-Oder (where he died 1811). He was a descendant of Mordecai Jaffe and of Moses Mat, author of "Maṭṭeh Mosheh" (see "Ḳorban Reshit," Frankfort-on-the-Oder, 1778). His sons were **Asher Selig Margolioth** (rabbi at Pruzhany) and **Ephraim** (Joseph Cohen Ẓedeḳ, "Shem u-She'erit," p. 72).

Judah Löb Jaffe of Halberstadt: Member of the Jewish community at Berlin about the middle of the eighteenth century (see Landshuth, "'Ammude ha-'Abodah," pp. 28, 37, 40).

Judah Löb Ḳalmanḳes: District rabbi of Eidlitz in the seventeenth century; son of Ẓebi Hirsch Ḳalmanḳes, dayyan of Cracow.

Judah Löb b. Shabbethai Jaffe: Rabbi at Chernigov; his signature is attached to taḳḳanot of 1818.

Ḳalman b. Joseph b. Kalonymus: Died at Jerusalem in 1598 (13th of Shebaṭ). His brothers were Jehiel and Moses, the father of Kalonymus.

H. R.

Kalonymus ben Mordecai Jaffe: Polish printer; died at Lublin 1603. About 1556 he founded a Hebrew printing-press at Lublin, and published as his first work the Pentateuch, which was followed in 1559 by an edition of the Talmud. In 1592 Kalonymus ben Mordecai left Lublin, on account of an outbreak of cholera, and settled in Bistrowitz, where, in that year, he published Isaac Abravanel's "Zebaḥ Pesaḥ." He later returned to Lublin, and continued in business there until his death.

Bibliography: Steinschneider, *Cat. Bodl.* col. 2918; B. Friedberg, *Gesch. der Hebräischen Typographie in Lublin*, p. 3.
J. B. Fr.

Kalonymus b. Moses Jaffe: Died at Prague in 1656.

Kim Ḳaddish: Dayyan of Krotoschin; author of "Sefer Ma'amar Ḳaddishin 'al Ḥoshen Mishpaṭ" (Prague, 1766); son of Kim Ḳaddish Jaffe of Pila and father-in-law of Naḥman b. Alexander of Pila.

Kresel: Wife of Ozer Jaffe; died at Prague 1618 (Hock, "Die Familien Prag's," p. 172).

Lewinstein, Joseph: Rabbi at Serock, government of Warsaw, Poland; descendant of Mordecai Jaffe ("Lebushim"). See Lewinstein, Joseph.

Maskileison, Naphtali. See Maskileison.
H. R.

Max Jaffé: German pharmacologist; born at Grünberg, Silesia, July 25, 1841. He studied medicine at the University of Berlin (M.D. 1862), and was from 1865 to 1872 assistant at the university hospital at Königsberg, where he became privatdocent (1867) and assistant professor (1872) of medical chemistry; in 1873 he was elected professor of pharmacology by the university. In 1880 he was appointed member of the German sanitary commission ("Gesundheitsamt") and received the title of "Geheime Medizinalrat." Among his writings may be mentioned: "Ueber den Niederschlag Welchen Pikrinsäure im Normalen Harn Erzeugt," 1886; "Vorkommen des Urethan im Alkoholischen Extrakt des Normalen Harns," 1890; "Zur Kenntniss der Durch Phenylhydrazin Fällbaren Harnbestandtheile," 1897; "Ueber das Verhältniss des Furfurols im Thierischen Organismus," 1900.

Mordecai Hirsch: Rabbi at Kalvariya; son of Jacob of Lidvinovi.

Mordecai Jaffe: Codifier of rabbinical law; born in Prague about 1530; died at Posen March 7, 1612. His father, Abraham b. Joseph, was a pupil of Abraham ben Abigdor. Moses Isserles and Solomon Luria were Mordecai Jaffe's teachers in rabbinics, while Mattithiah b. Solomon Delacrut was his teacher in Cabala. Jaffe studied also philosophy, astronomy, and mathematics. He was head of a yeshibah in Prague until 1561, when, by order of the emperor Ferdinand, the Jews were expelled from Bohemia. Jaffe then went to Venice and studied astronomy (1561–71). In 1572 he was elected rabbi of Grodno; in 1588, rabbi of Lublin, where he became one of the leaders of the Council of Four Lands. Later Jaffe accepted the rabbinate of Kremenetz. In 1592 he was called as rabbi to Prague; from 1599 until his death he occupied the position of chief rabbi of Posen.

The "Lebush."

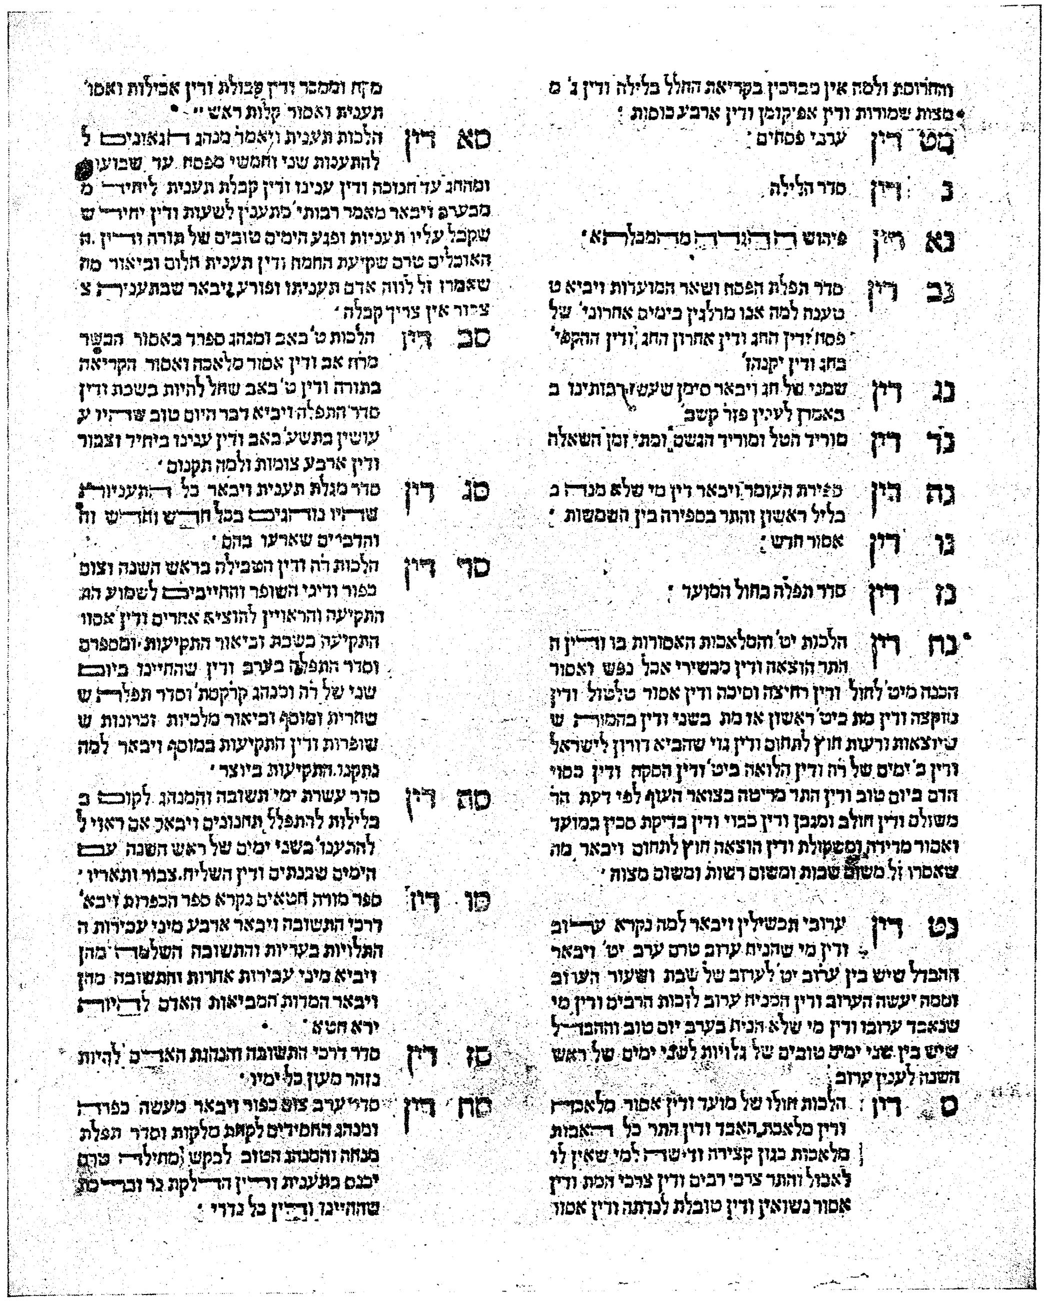
The "Lebush" is the achievement with which Jaffe's name is principally associated, and he is best known as the "ba'al ha-Lebushim" ("the author of the 'Lebushim'"). It is a rabbinical code, arranged in the order adopted in the Ṭurim and the Shulḥan 'Aruk, and divided into five parts. The titles of the work and its various parts were derived by Mordecai, with allusion to his own name, from Esther viii. 15. The reason advanced by Jaffe for the compilation of the work was his desire to give a digest of the latest decisions and minhagim, mainly those of German and Polish authorities and including those of his teachers, in order to shorten the course in his yeshibah (introduction). The appearance of Joseph Caro's "Bet Yosef" appended to the Ṭurim was hailed with joy as a great event in rabbinical circles. Even Jaffe thought, at the time, that this work was final. The "Bet Yosef," however, was too scientific and voluminous for the general use of an ordinary rabbi. Jaffe was on the point of publishing his work, when Caro anticipated him with the Shulḥan 'Aruk, to which Isserles later added annotations and the minhagim prevailing in Germany, Poland, and Russia. The two extremes presented by the copiousness of the "Bet Yosef" and the brevity of the Shulḥan 'Aruk left many dissatisfied, and Jaffe accordingly continued his work on his own lines, avoiding both the exuberant, argumentative style and the too terse and legal manner of Caro. Another advantage possessed by the "Lebush" was that it included parts of the Ṭurim omitted by Caro, and the latest minhagim collected by Isaac Tyrnau. The "Lebush," while its author was alive, enjoyed great popularity; but after his death Caro's code gradually superseded it, not only in the Orient but also in Europe, for the reason that the rabbis were obliged to consult the "Bet Yosef" for the sources, while the layman was content with the shorter Shulḥan 'Aruk.

His Method.

Nevertheless, for scholars who study the spirit of the Law, the "Lebushim" are a valuable contribution to halakic literature. As Jaffe rightly observes, the Shulḥan 'Aruk is "a table well prepared with all kinds of refreshments, but it lacks the salt of reasoning." Jaffe seasoned his work with the "salt of reasoning" by giving logical explanations at the beginning of almost every section.

In treating ritual-legal matters from a cabalistic standpoint, Jaffe is an exception among the codifiers. Even Caro, in Safed, the seat of Cabala, refrained from infusing Cabala into his code. Jaffe's method was to a certain extent an innovation, and tended to draw together the Talmudists and cabalists, otherwise in danger of an open breach.

In his "Lebush Tekelet," § 36, Jaffe treats the form of the script alphabet cabalistically. In addition to the "holy and true science" of Cabala, Jaffe was well versed in the secular sciences of his time. In § 94, by means of a map, he indicated the site of Jerusalem, and directed the worshipers of his own country to face the Temple, to the east, "a degree southward." In §§ 427–428 (written in 1579) he gives a minute, scientific explanation of the calendar, with tables and illustrations. That he was familiar with the Russian language is evident from his "Lebush Buẓ we-Argaman," § 129.



PAGE FROM THE FIRST EDITION OF MORDECAI JAFFE'S "LEBUSHIM," LUBLIN, 1590.
(From the Sulzberger collection in the Jewish Theological Seminary of America, New York.)

His "Lebush Ḥur," corresponding to Oraḥ Ḥayyim, part ii., begins with § 242, on "Sabbath rules." Jaffe quotes the Talmud freely and explains, "Whoever strictly observes the Sabbath, his worship of idols is forgiven," as follows: Sabbath is based on the belief in the creation of the world by the Almighty, in the deliverance from Egypt, and in the revelation of the Torah on Sinai. Therefore it is to be presumed that in one who strictly observes the Sabbath the worship of idols is merely a formality, an involuntary act due entirely to the pressure of circumstances. Perhaps Jaffe intended this for the Maranos.

In his "Lebush 'Aṭeret," corresponding to Yoreh

De'ah, Jaffe follows the restrictions of his teacher Isserles, as opposed to Caro, his reason for doing so being "the lack of knowledge of physical science in our time." In a case in which the upper jaw of an animal has been removed (by accident or design), Caro is inclined to pronounce it kasher, but is reluctant to do so because Maimonides decided otherwise (§ 33). Jaffe, however, says that authoritative physicians concur in the rabbinical opinion that the absence of the upper jaw is certain to result in the death of the animal from tuberculosis, and that therefore it can not be slaughtered as kasher meat (*ib.*).

Liberal Interpretation.

Regarding wine of Gentiles, Jaffe, like Isserles, is somewhat lax. Caro prohibits "honey wine" (mead) made by a Mohammedan; Jaffe permits it (§§ 123-126). The principal reason for the existing prohibition is that wine is intoxicating and promotes companionship, causing an intimacy that is apt to lead to intermarriage between Jews and Gentiles. But at the present time, when business with the Gentile is generally opened with an introductory libation, it would be impossible to expand or enforce the rule. Besides, Jews are now socially too much separated from the Gentile to fear assimilation. Hence there is no necessity to expand the prohibition to include any other intoxicating beverage than wine, which was the original Gezerah; and this can not be permitted in the absence of an authoritative synod (*ib.*).

In regard to loans and interest, Jaffe considered a Karaite as an Israelite, and significantly said that "the Karaites are in a measure under duress, being wrongly brought up from infancy to discard the rabbinical traditions" (§ 159). He was very strict against usury, and would not allow any pretext or evasion, as the evil is contagious; "permit an opening of the size of a pinhole, and it will enlarge from day to day until it becomes as wide as the entrance of the Temple corridor" (§ 160). In the next paragraph he attacks an alleged ruling by Rashi to the effect that the prohibition against interest can be avoided by an intermediary between debtor and creditor. Caro, in "Bet Yosef," does not hesitate to say that an unscrupulous scribe inserted the ruling, and "hung himself on a tall tree" (that is, a recognized authority) by attributing it to Rashi. Jaffe is of the same opinion, and criticizes his teacher, Isserles, for adding this ruling to the Shulḥan 'Aruk; he can not comprehend how his "holy mouth" could have uttered such a thing, as there is not the slightest excuse or basis for the subterfuge, which makes the prohibition of usury a mockery and a laughing-stock in the eyes of the common people. He goes on to threaten: "If I ever get into power I will order the obliteration of that paragraph from the books" (*ib.*).

The "Lebush Buẓ we-Argaman," corresponding to Eben ha-'Ezer, contains rules, regulations, and forms for the writ of divorce. In connection with this appears an interesting alphabetical list of names, male and female, with their spellings, appended to § 129.

The "Lebush 'Ir Shushan," corresponding to Ḥoshen Mishpaṭ, is devoted to civil laws. Speaking, in the first section, of judges and judgment, he says: "Judgment is one of the fundamental principles of creation; as the Mishnah says, 'The triple basis of the world is truth, judgment, and peace'" (Abot i. 18). The maxim "The law of the government is law" is fully treated in § 369, and defined democratically by the statement that "only that government is legitimate in which the king's seal of authority is voluntarily acknowledged by his subjects; otherwise he is not their king, but a robber gathering imposts by force, whose edicts have no legal value."

Jaffe's other works are: "Lebush Orah," a commentary on Rashi to the Pentateuch (Prague, 1603); "Lebush Simḥah," sermons (in manuscript); and "Lebush Or Yeḳarot," consisting of three independent treatises: (1) "Lebush Yeḳarah," on Recanati; (2) "Lebush Eder ha-Yeḳar," on the Jewish calendar, following Maimonides; (3) "Lebush Pinnat Yeḳarot," on Maimonides' "Moreh" (Lublin, 1594). He also annotated the Talmud, and his notes were first published at Vienna in 1830.

Jaffe's opinion was sought on many questions of law, and his responsa were highly valued.

Authority at Lublin Fair.

Lublin was one of the great fair-towns and commercial centers of Poland, and thousands of Jews from neighboring countries attended its fairs. Disputes growing out of their transactions there required adjudication by an authority of more than local standing, and Mordecai Jaffe, who had already established a reputation in Lithuania as rabbi of Grodno, was chosen as judge. The reputation he had won did much also to increase and extend his influence in the Council of Four Lands; and even after his return to Prague he was recognized as its principal leader (D. Gans, "Ẓemaḥ Dawid," p. 46a, Frankfort-on-the-Main, 1692; see also Harkavy in Hebr. transl. by Rabinowitz of Grätz, "Gesch." vol. vii. ["Ḥadashim we-gam Yeshanim," p. 18]).

His last responsum, referring to a conditional divorce, is printed in the collection of R. Meïr of Lublin (No. 125). Jaffe dictated this opinion from his death-bed two days before he died. In it he said: "I am now lying on my bed, subject to the judgment of the King of Kings, hoping that He will heal and cure me of my illness." His signature was so faint that he directed his secretaries to authenticate it (*ib.*).

Jaffe had five children, two sons and three daughters: Perez Jaffe (d. 1647; see D. Kaufmann in Nissenbaum's "Le-Ḳorot ha-Yehudim be-Lublin," Warsaw, 1899); Aryeh Löb; Walka, the wife of R. Samuel Wahl; Bella, the wife of Jehiel Michael ha-Levi-Epstein, son of Abraham Epstein, rabbi of Brest; and a third daughter, the wife of Benjamin Wolf Günzburg, rabbi of Mayence.

H. R. J. D. E.

Mordecai Jaffe: Rabbi at Zelve in the eighteenth century; descendant of Abraham Aberl (the grandson of the author of the "Lebushim"). His signature occurs in connection with the last meeting of the Council of Lithuania.

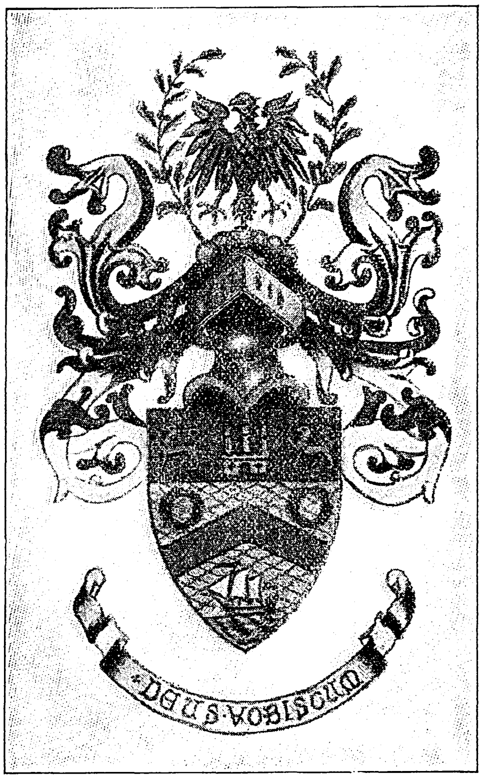
Mordecai (Marcus) Jaffe of Berlin: Rabbi at Schwerin until 1770; born in Bohemia; died 1812.

His correspondence with Moses Mendelssohn is preserved in "Bikkure ha-'Ittim" (iv. 182, 219, 233). He was the father of **Joseph Jaffe** (1765–1841). His grandson **Daniel Joseph Jaffe** (1810–74) was the father of Sir Otto Jaffé.

Mordecai Jaffe of Brody: Rabbi at Gorochov, government of Volhynia; died 1828; corresponded with Eliezer b. Aryeh Löb of Pilz (1788, 1802).

Mordecai Jaffe-Margolies-Schlesinger of Vienna: Son-in-law of R. Raphael of Wilna; died in 1754. "Torat ha-Ḳena'ot" (p. 45, Amsterdam, 1737) contains two letters written to him about 1729 from Padua by the physician Jekuthiel b. Löb of Wilna.

Mordecai Gimpel Jaffe: Rabbi at Ruzhany; died at Jehud (colony), near Petaḥ Tiḳwah, Palestine, in 1892. He was active in furthering the Zionist colonization movement among the Jews of Russia, his articles on which subject appeared in "Ha-Lebanon."



Arms of Sir Otto Jaffé.

Mordecai b. Joseph of Plungian: Descendant of Mordecai Jaffe ("Lebushim"); born in 1721; went with his father from Posen to Plungian. At the age of twelve he was captured by soldiers of the army of the Polish Confederation and taken to Wilkoviski, where he was ransomed by the wealthy Enoch Zundel (son-in-law of Tobiah b. Joseph Solomon Ḥasid-Bacharach) for 1,200 "tinpes." He married Enoch Zundel's daughter. In 1756 he was appointed rabbi at Keidany.

Mordecai b. Meïr of Zamoscz: Author of "Tabnit ha-Bayit," ethical poetry (Frankfort-on-the-Oder, 1746). Another edition, with a German translation by Maier Kohn, entitled "Abriss des Mikrokosmos," appeared in Vienna, 1853 (Steinschneider, "Hebr. Bibl." i. 96). He was the grandson of Isaac Ḳalmanḳes of Lublin. His mother belonged to the family of R. Löb b. Jacob Temerlesh.

Mordecai b. Moses of Prague: Rabbi at Grodno and later at Cracow; married the daughter of Joel Singer of Cracow, and took the name of Jaffe-Singer; president of the yeshibah at Cracow in succession to Moses Storch. Died 1568.

Moritz Rosenthal: Prominent merchant and communal worker; son of Hirsch and grandson of Eliezer (Lazar) Rosenthal; born at Bausk in 1818; died at Friedrichstadt July 29, 1896.

Moses Jaffe of Berlin: His signature appears in a document of 1743 (see Landshuth, "'Ammude ha-'Abodah," p. 37).

Moses Jaffe of Pinsk: Pupil of Meïr of Lublin (Responsa, pp. 86, 87); lived in the early part of the sixteenth century.

Moses b. Eliezer Jaffe: Born in Poland; removed to Italy, where, at the end of the fifteenth century, he was prominent as a rabbi; mentioned in the "Shalshelet ha-Ḳabbalah" manuscript at St. Petersburg (see Wiener's supplement to "Da'at Ḳedoshim," p. 48). In printed editions of "Shalshelet ha-Ḳabbalah" he is described as "of Bologna," not "of Polonia."

Moses b. Eliezer Jaffe: Rabbi at Cracow; grandfather of Joel Sirkes; died 1520.

Moses ben Issachar: Author of "Pene Mosheh," sermons (Lublin, 1681).

Moses b. Mordecai (b. Joseph): Rabbi at Wilkoviski in the eighteenth century. His signature appears in some taḳḳanot in the pinḳes of Wilkoviski. His son was **Zundel Ḥalfon,** the grammarian. H. R.

Sir Otto Jaffé: Lord Mayor of Belfast; born in Hamburg 1846; the third son of Daniel Joseph Jaffe, and a descendant of Mordecai Jaffe. He was educated in Belfast, Hamburg, and Switzerland. After carrying on business in New York from 1865 to 1877, on the retirement of his brothers he became chief director of the Belfast firm. He had acquired considerable experience in navigation concerns, and in 1894 placed himself at the head of the successful agitation for the reporting and destruction of derelicts in the North Atlantic Ocean. Sir Otto is president of the Belfast Hebrew Congregation, a justice of the peace for the city of Belfast, and a member of the Harbor Board. He is also consul in Belfast for Germany. He was elected lord mayor of the city in 1899 and again in 1904, and was knighted in March, 1900.

Bibliography: *Jew. Chron.* Jan. 27, 1899, and March 2, 1900; *Who's Who*, London, 1903.

J. G. L.

Philipp Jaffé: German historian and philologist; born at Schwersenz, province of Posen, Germany, Feb. 17, 1819; committed suicide at Wittenberg April 3, 1870. After graduating from the gymnasium at Posen in 1838 he went to Berlin, entering a banking-house. Two years later he abandoned commercial life and studied at Berlin University distinguish the contributions of J from those of E; but critics now agree with virtual unanimity in their assignment of the most important passages at issue to one or to the other.

Contributions of J to the Hexateuch.

From the Jahvist there is in Genesis the account of the creation of the world of men, of the probation and fall of "the man" and his "helpmeet," and of the career of the earliest men generally (ii. 4–iv.). He gives a part of the complex story of the Flood, and the sole account of the settlement of Babylonia (x. 8–12) and of the dispersion of the race (xi. 1–9). The stories of Abraham's relations with Lot and of the cities of the plain (xviii., xix.) are also from J, as are the narratives of the quest of a wife for Isaac (xxiv.), most that is told of the earlier life of Jacob and Esau (xxv., xxvii.), Judah's family history (xxxviii.), and a large part of the story of Joseph, especially where Judah is prominent. The same writer contributed the blessing of Jacob (xlix.). In Exodus is found less of J than of E (or of P); but he tells much of the preparations for the migration from Egypt and of the flight itself. In Numbers it is mostly impossible to separate J and E. They together have given x. 29–xii., xx.–xxv. 6, and most of xxxii. In Joshua J and E form practically one document, comprising most of the first half of the book.

J's Distinctive Teaching.

II. J is classed with E as belonging to the prophetic school, as distinguished from P, or the Priestly writer. The main distinction between J and E is that while both of them in their narratives aim to set forth God's providential guidance and His manifestation of Himself, J illustrates his theme by indicating the ideas and principles of revelation, and E by exhibiting its forms and modes. J is an adept at conveying religious truth in his matchless stories, even when these are legendary. Nowhere else earlier than the Later Prophets can be found such profound views of the nature and progress of sin among men, or of God's plan of redeeming the world from sin, or of His choice of Israel and Israel's representative men to be the instruments of such redemption.

The Style of J.

Admiration of the Jahvist is heightened when one studies the literary forms in which he conveys these great and far-reaching ideas. In a certain sense it is immaterial in what guise truth is presented if only it come out strong and clear; hence one must always maintain that the stories of the Pentateuch as literature are of secondary importance as compared with their prophetic teachings. Still, of all narrators he is the most skilful in selection of details, the most vivid, graphic, and picturesque, and withal the most simple, realistic, and sympathetic. As one reads one sees Isaac tremble, one hears Esau's cry, and Judah's appeal to Joseph. To make God real to the reader J shrinks not from the most extreme anthropomorphism; and much of the world's faith in YHWH to-day is due to the fact that the Jahvist has told how He used to come down to men and talk and walk in the midst of them.

III. There seems to be good reason for believing that the work of the Jahvist is composite; not merely that he worked over materials from different sources into his book, but that he incorporated directly considerable portions of a separate composition. Gen. xxxviii. and xxxix., for example, both belong to him, but they are not continuous, and they apparently occupy different levels of moral development (J[1] and J[2]). The question thus arising, though important for the history of the growth of prophetic ideas, becomes of secondary importance in view of the fact that the work in general is on a very high plane and as a whole must be the product of a single mind and of a definite epoch.

Time and Occasion of Writing.

But there is no approach to unanimity on the part of critics as to the time of composition. The place of its production is usually held to be the kingdom of Judah. Yet such eminent critics as Reuss, Kuenen, and Schrader maintain that it proceeded from the Northern Kingdom, on the ground that a Judahite would not have made so much of the northern shrines of Shechem, Beth-el, and Peniel (Gen. xii. 6, etc.). But one remembers that the prophets of Judah, as devoted Israelites, held fast to all the great common Hebrew traditions. Moreover, one must without doubt hold to a Judahite origin, in view of the association of Abraham and Jacob with Hebron, and the special prominence given to Judah, the head of the tribe that gave its name to the kingdom.

The standpoint, however, is not that of Judah alone, but that of Judah as representing all Israel. This obvious fact suggests as a date a time after the destruction of the Northern Kingdom. It was there, undoubtedly, that E was composed, probably about 770 B.C.; and it is natural to suppose that J was written as its counterpart, and as an expression of the view that YHWH ruled all things from the beginning, and that the faith and worship cherished in Jerusalem were also those of the Fathers. The date is therefore perhaps about 720 B.C. Soon thereafter J and E were combined into a single work.

For a brief summary of the results of the analysis see JEW. ENCYC. iii. 174 *et seq.*, s.v. BIBLE EXEGESIS.

BIBLIOGRAPHY: Since the study of the Jahvist can not be pursued independently of that of the other sources of the Hexateuch, it must suffice here to give a general reference to recent critical commentaries, especially those upon Genesis, above all that of Dillmann; to critical treatises, such as the epoch-making works of Kuenen and Wellhausen; and for the history of the analysis and the limits of J the following: Westphal, *Les Sources du Pentateuque*, 1888–92; Holzinger, *Einleitung in den Hexateuch*, 1893: Briggs, *Higher Criticism of the Hexateuch*, 1893. The introductions of Driver and Cornill distribute the several sources in convenient tabular form.

JAIL. See IMPRISONMENT.

JAIR (יאיר = "He gives light"): **1.** A contemporary of Moses, called in the Pentateuch "son of Manasseh," who in the beginning of the conquest took from the Amorites the whole tract of Argob, containing sixty fortified cities, which he called HAVOTH-JAIR (Num. xxxii. 41; Deut. iii. 14; Josh. xiii. 30; I Kings iv. 13). In I Chron. ii. 22, 23 Jair is mentioned as of mixed descent, he being the son of Segub, whose father was Hezron, a Judahite, and whose mother was the daughter of Machir, grandson of Manasseh and father of Gilead.

2. A Gileadite who judged Israel for twenty-two years. He had thirty sons; and thirty cities were

30

called after him "Havoth-jair." He was buried at Camon (Judges x. 3–5). This Jair is probably the same as No. 1. According to another tradition the number of cities called after him was twenty-three (I Chron. ii. 22).

3. The father of Mordecai, a Benjamite (Esth. ii. 5).

4. (Ḳere, יעיר; ketib, יעור = "He awakens.") Father of Elhanan, one of David's heroes (I Chron. xx. 5). In the parallel narrative in II Sam. xxi. 19 his name is stated to be "Jaare-oregim."

E. G. H. M. Sel.

JALOMSTEIN, MORDECAI B. DAVID: American journalist; born in Suwalki, Russian Poland, 1835; died in New York city Aug. 18, 1897. He was well versed in Talmudic and neo-Hebrew literature, and was a skilful linguist. He went to New York in 1871 and for several years edited Hirsch Berstein's "Ha-Ẓofeh be-'Ereẓ ha-Ḥadashah," the first Hebrew periodical issued in the United States. He was a regular American correspondent of "Ha-Meliẓ," his letters, over the signature "Yashan," attracting much attention. For about twenty years Jalomstein was the chief collaborator on the "Jewish Gazette" (Yiddish) of New York, founded by his brother-in-law, K. H. Sarasohn. He also contributed to "Ha-'Ibri," and his "Dibre Yeme Arẓot ha-Berit" (New York, 1893) is a reprint from that periodical, in which it appeared as a serial during about two years.

Bibliography: *Ha-'Ibri*, vii. No. 46; *Jewish Gazette*, xxiii. No. 35.

A. P. Wi.

JAMAICA: Largest island in the British West Indies. It has a total population of 644,841 (1901), of whom about 2,400 are Jews. When England conquered the island in 1655, a considerable number of Jewish inhabitants was found there, known as "Portugals," under which name the Sephardic Jews concealed their true faith from Spanish persecution. Jews settled in Jamaica during the century preceding Cromwell's conquest. The proprietary rights of the family of Columbus to Jamaica were recognized in 1508 and 1538, and passed to the female Braganza line in 1576. The friendship which subsisted between Columbus and the Jews continued with his descendants, and as their proprietary rights excluded the Inquisition and prevented the inclusion of Jamaica in the bishopric of Cuba, unavowed Jews were enabled to live in Jamaica in comparative safety, even during the Spanish period. Clarendon's "State Papers" refer, under date of 1623, to some of these Portuguese as yearning to throw off the Spanish yoke.

The principal pilot, Captain Campoe Sabbatha, whom Penn and Venables relied upon in their attack upon Jamaica seems to have been a Jew, and there is strong reason for believing that Cromwell considered Jews settled and to be settled in and about Jamaica as important factors in the establishment of his ambitious British colonial policy. Simon de Caceres, one of Cromwell's principal secret-intelligencers, furnished him with reports on conditions in Jamaica immediately after its conquest. The British, in their methods of dealing with the conquered residents, were careful to distinguish between the Portuguese Jews and the Spanish inhabitants, with the result that Jews at once began to establish and develop the commercial prosperity of the island. The Dutch capitulation of Brazil augmented the Jewish settlement in Jamaica; it was further increased by considerable accessions from Surinam upon the British withdrawal from that district in 1675, and by direct migration from England, beginning in 1663, and later from Curaçao and Germany. In 1700 the Jews bore the bulk of the taxes of the island, though the avowed Jewish population at that time is figured as only 80. No fewer than 151 of the 189 Jews in the American colonies whose names have been handed down as naturalized under the Act of Parliament of 1740 between that year and 1755, resided in Jamaica. The vanilla and sugar industries of Jamaica, and in fact almost the entire foreign and intercolonial trade of the colony during the first half of the eighteenth century, were principally in the hands of the Jews, and Jamaica was a far more important commercial center in that century than it since has been. Among the leading Jewish families that contributed most signally to the development of Jamaica's trade are the following: Da Silva, Soarez, Cardoza, Belisario, Belinfante, Nuñez, Fonseca, Gutterecet, De Cordova, Bernal, Gomez, Vaz, and Bravo.

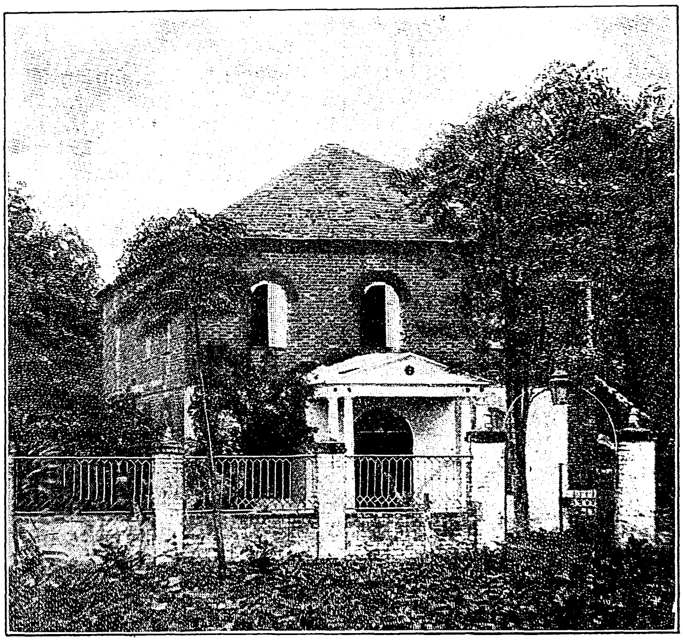
Immigration from England, Curaçao, and Germany.

Efforts were early made to abolish the special taxes which were imposed on Jews in the colony, which efforts, with the assistance of the crown, finally succeeded. Attempts, inspired by local mercantile jealousy, made during the reign of William III. to expel the Jews from the island, also met with a vigorous royal check. In fact, Jamaica led the way for all the present British possessions in the direction of abolishing Jewish disabilities; this had been accomplished as early as 1831, with the result that in 1838 it was possible for Sir F. H. Goldsmid to compile a long and remarkable list of Jews appointed to civil and military offices in Jamaica since the Act of 1831, which list was used by him as a potent argument in favor of Jewish emancipation at home. The first Jew chosen as a member of the Jamaican assembly was Alexander Bravo, for the district of Kingston, in 1835; a year or two later he became a member of the council of the island; afterward, receiver-general. In 1849 eight of the forty-seven members of the colonial assembly were Jews; and the legislature adjourned over Yom Kippur by a decisive vote, the Jews not voting. Dr. C. M. Morales was elected speaker of the House of Assembly in 1849. Numerous other positions of importance, civil, judicial, and military, have been held by the Jews since 1831.

In the Legislature.

In 1700 Jews are referred to as having made at least three different settlements on the island, though Kingston, from the time of its foundation, has been the most important. Spanish Town, Montego Bay, Falmouth, and Lacovia have also had Jewish settlements, and Jews are, in fact, to be encountered in all portions of the island, though Kingston alone has now any Jewish synagogues. Spanish Town had two Jewish congregations between 1840 and

1845. A synagogue is mentioned by local historians as having been established about 1684; it is referred to in the Journal of the House of Assembly in 1687. The Spanish and Portuguese synagogue of Kingston, situated in Princess street until the time of its destruction by fire in 1882, was consecrated in 1750. The English and German synagogue was consecrated in 1789, a new synagogue taking its place in 1837. Hannah Adams, in her "History of the Jews," written in 1812, refers to two parties among the Jamaican Jews, one of which regarded the other as heretics because they had relaxed in the observance of the ritual and had intermarried with Christians. A third (German) synagogue was used for purposes of worship beginning at some time prior to 1850, but the congregation merged in that year with the Portuguese. Rev. M. N. Nathan was rabbi of the English and German synagogue at the time of the consecration of its new building in 1837, and for a number of years thereafter, and was active in various Jewish literary controversies and undertakings, including the editorship of a Jewish monthly, called "First Fruits of the West" (1845). Among other Jewish clerical leaders in Jamaica were Joshua PARDO (went to Jamaica as rabbi in 1683), Daniel Israel Lopez LAGUNA (Spanish Jewish poet, a contemporary of Pardo), Haham de Cordoza (went to Jamaica about the time of the American Revolution; died and was buried in Spanish Town in 1798), Rev. A. P. Mendes, and Rev. George Jacobs.



Synagogue at Spanish Town, Jamaica.
(From a photograph.)

Recent History.

After the disastrous conflagration in Kingston in 1882, an effort was made to unite all three of its synagogues, especially as the decrease of the Jewish population of Jamaica and its diminished commercial importance had made it desirable to concentrate religious energies. Differences as to ritual, however, induced a number of the members of the Spanish and Portuguese congregation to withdraw from the movement; they consecrated a synagogue in East street in 1884. A number of members of the English and German congregation also withdrew, and finally consecrated a synagogue in 1894. The majority of both, however, constructed a synagogue in Duke street under the name of "Amalgamated Congregation of Israelites," consecrated in 1888. The two principal congregations were merged in Dec., 1900, since which they have worshiped under one roof, Rev. Joseph M. Corcos being their minister. Several communal charitable organizations are maintained in Kingston, the chief of which is the Hebrew Benevolent Society, established in 1851.

A. M. J. K.

JAMES (English equivalent for 'Ιάκωβος = "Jacobus"; Italian, **Giacomo**): Name of three persons prominent in New Testament history.

1. Son of Zebedee (Aramaic, "Ya'ḳob bar Zabdai"); with his brother John one of the first disciples of Jesus. Like their father, both were fishermen of Galilee (Matt. iv. 21; Mark i. 19; Luke v. 10); their mother, apparently Salome, is mentioned among the women watching at the grave of Jesus (Matt. xxvii. 56; Mark xv. 40); she was possibly sister to Mary, the mother of Jesus (John xix. 25). James and his brother John are mentioned immediately after Peter and Andrew in the list of the Twelve Apostles (Matt. x. 2-4; Luke vi. 14-16); Mark iii. 17 has preserved the story that when calling them to the apostleship Jesus surnamed them "Bene Ra'ash" or "Bene Rogez" (Job xxxvii. 2) (the text has "Boanerges, which is, The sons of thunder"). This by-name was probably expressive of their impetuous nature (comp. Luke ix. 55 and Mark x. 37). James and his brother John together with Peter were the inseparable followers of Jesus (Mark v. 37, ix. 2, xiii.

3, xiv. 33), and after the death of their master they with the other apostles remained in the city of Jerusalem "steadfast in prayer" (Acts i. 14). James was the first one of the apostles to suffer a martyr's death (Acts xii. 2). What action of James and the other disciples provoked the wrath of Herod Agrippa is not stated. Legend added new features to the martyrdom (Eusebius, "Hist. Eccl." ii. 9); and Spain, whose patron saint James became, surrounded his life with miraculous incidents.

2. Son of Alphæus (Aramaic, "Ḥalfai" or "Ḥolpai" = "Cleophas"; see John xix. 25; Eusebius, "Hist. Eccl." iii. 11, iv. 22), an apostle mentioned in the list of the twelve (Matt. x. 2-4; Mark iii. 16-19; Luke vi. 14-16; Acts i. 13). Probably he was the brother of "Levi the son of Alphæus" (Mark ii. 14), better known as Matthew (Matt. ix. 9); nothing else is known of him. He is often identified with James the Little ("ha-Ḳaṭan," Mark xv. 40; A. V., incorrectly, "the less," John xix. 25; but see No. 3, below). According to Hegesippus (see Eusebius, *l.c.*), James was a cousin, and his father an uncle, of Jesus.

3. Brother of Jesus; also called **James the Just.** James is mentioned as the first among the brothers of Jesus, the others being Joses, Simon, and Judas (Matt. xiii. 55; Mark vi. 3), all of whom were, according to Luke ii. 7, younger than Jesus. Neither James nor any of the other brothers believed in the miraculous powers of Jesus (John vii. 5; Matt. xii. 47 *et seq.*; Mark iii. 31). But after the crucifixion James, the brother of Jesus, is said by Paul to have seen the risen Jesus in a vision after Peter, the twelve, and the five hundred had seen him (I Cor. xv. 7); and when Paul went to Jerusalem to defend his claim to the assumed apostleship to the heathen, James was the head of the Church (Gal. i. 19; ii. 9, 12; Acts xii. 17, xv. 13, xxi. 18). According to Clement of Rome, quoted by Eusebius ("Hist. Eccl." ii. 1), James, surnamed "the Just" on account of his great virtue, was the first bishop of the Church elected at Jerusalem. About his martyrdom Clement writes that "he was cast from a wing of the Temple and beaten to death with a fuller's club." Somewhat differently Josephus writes: "The younger Anan, a high priest belonging to the sect of the Sadducees, who are very rigid in judging offenders, had James, the brother of Jesus, the so-called 'Christ,' together with some of his companions, brought before the Sanhedrin on the charge of having broken the Law, and had them delivered over to be stoned. This act of Anan caused indignation among the citizens best known for their fairness and loyalty" ("Ant." xx. 9, § 1). Hegesippus, quoted by Eusebius (*l.c.* ii. 23), gives the following description of James:

> "James, the brother of the Lord, succeeded to the government of the Church in conjunction with the Apostles. He was holy from his mother's womb; he drank no wine nor did he eat flesh. No razor came upon his head, nor did he anoint himself with oil or use any [warm] bath. He alone was permitted to enter the Holy Place, for he wore not woolen, but linen garments; he was in the habit of entering alone into the Temple, and was frequently found upon his knees praying for forgiveness for the people, so that his knees became hard as those of a camel. . . . Because of his exceeding great justice ["Ẓaddiḳut"] he was called 'the Just' ["Ya'aḳob Ḳobal 'Am" = "Jacob, the bulwark of the people"] and 'Ẓaddiḳ Yesod 'Olam' [= "the righteous are the foundation of the world"; Prov. x. 25, Hebr.]. Now, when some of the seven sects which existed among the people [the Sadducees] asked him: 'What is the gate of salvation?' ["sha'ar ha-yeshu'ah"; comp. Lev. R. xxx.; Ps. cxviii. 20; for which some copyist wrote "sha'ar Yeshua'" = "the gate of Jesus"] he replied that it was the Messiah. James's words were understood to refer to Jesus, and led many to believe in him. . . . The Scribes and the Pharisees, fearing lest the people would all be led over to the belief in Jesus, asked James to place himself upon a wing of the Temple and address the people assembled there on account of the Passover, and persuade them not to be led astray.
>
> "Whereupon James said: 'Why do ye ask me concerning Jesus the Son of Man? He sitteth in heaven at the right hand of great Power, and is about to come upon the clouds of heaven.' And when many cried 'Hosannah to the Son of David,' the Scribes and Pharisees cast him down and stoned him. And James before dying said: 'Lord, God, Father, forgive them; for they know not what they do' [the words ascribed to Jesus; Luke xiii. 34]. And one of the Rechabites cried out: 'Cease! What do ye? The just one prayeth for you.' Then one of the crowd, a fuller, took the club with which he beat out clothes and struck the just man on the head. Thus he suffered martyrdom; they buried him on the spot by the Temple where his monument still remains. Immediately after this, Vespasian besieged them."

It is difficult to say whether this legendary record contains any actual facts or not. The Essene character of James "the Little," or "the Just," seems to rest on authentic tradition. According to Epiphanius ("Hæres." lxxviii. 14), he wore a golden plate on his forehead (comp. Meg. iv. 8, where this is characterized as "the way of the Gnostics" ["derek minut" or "ḥizonim"]), and no sandals. Another evidence of his Essene piety manifests itself in the following: "When, during a drought, he stretched forth his hands in prayer, rain immediately came" (comp. Ta'an. 23a *et seq.*).

It is possible that the last words ascribed to Jesus were original with James the Just. The idea that Mary, the mother of Jesus, should afterward have borne other children became obnoxious to the ascetics of the Church, and consequently either the brotherhood of James was explained to have been on the father's side only (so Clement, in Eusebius, *l.c.* ii. 1; "Clementine Recognitions," xi. 35), or Mary, the mother of James the Little and of Joses, was differentiated from Mary, the mother of Jesus (Matt. xxvii. 56; Mark xv. 40, 47; Luke xxiv. 10; but comp. John xix. 25). This, again, gave rise to a number of different versions in the early literature of the Church, many claiming that James the Little was identical with the son of Alphæus, the cousin of Jesus, and was as such called brother (see Lightfoot on Colossians, 10th ed., pp. 260-267, London, 1896).

K.

JAMES, GENERAL EPISTLE OF: Letter of exhortation and instruction, written by "James, a servant of God and of the Lord Jesus Christ," and addressed "to the twelve tribes which are of the Dispersion" (i. 1, R. V.). The writer is supposed to be James, the brother of Jesus, on which account the epistle was accorded the first place among the so-called "general epistles" of the New Testament. As a matter of fact, aside from the reference to Jesus Christ in the introductory verse quoted above, and in ii. 1 (where the words "Jesus Christ" are obviously an interpolation), the epistle contains nothing to indicate a Christian origin. It comprises, loosely joined together, a number of moral sayings which have their parallels in contemporary Jewish writings, and there is no reason for holding that "the brethren" addressed may not have been Jews of a particular frame of mind—pious and humble, such as were the Essenes, who formed a strong brotherhood in the Diaspora. Especially noteworthy are the facts that the name of the meeting-place of the worshipers addressed is "synagogue" (συναγωγή; ii. 2), not "church" ('εκκλησία), and that the Hebrew prophets Job and Elijah are regarded as patterns, but nowhere the personality of Jesus (v. 10, 11, 17 *et al.*). The canonical character of the epistle has accordingly at all times been questioned; Eusebius ("Hist. Eccl." iii. 25, 3) counts it among the controverted writings—ἀντιλεγόμενα; Origen ("Johannem," xix. 6, xx. 10) speaks of it as "the so-called Epistle of James"; Luther, who calls it "a right strawy epistle," as well as Erasmus, doubted its genuineness; Schneckenburger ("Beiträge zur Einleitung in das N. T." 1832, pp. 196 *et seq.*) and Jülicher ("Einleitung in das N. T." 1894, p. 143) likewise find its standpoint to be Jewish; and Spitta ("Zur Gesch. und Lit. des Urchristenthums," 1896, ii. 61–239), whom this article follows, has, notwithstanding all contradictions or doubts, established its Jewish origin and character.

Contents of the Epistle.

The author, beginning with the Greek formula of greeting (χαίρειν = "joy"), urges his "brethren" (i. 2–4) to rejoice over their trials (comp. Judith viii. 25; IV Macc. vii. 22, ix. 12), as through such "tests of faith" (comp. *ib.* xv. 21) they shall acquire "patience" (Test. Patr., Joseph, 2, 10; IV Macc. xiii. 12, lx. 8 *et seq.*; Book of Jubilees, xvii. 17 *et seq.*) and become "perfect" (comp. Philo, "De Abrahamo," § 33). The same test of virtue is given in Rom. v. 4 and II Peter i. 5. He who lacks wisdom should, in order to be perfect (see Wisdom ix. 6), pray to God for it with a confiding heart, free from wavering doubt (i. 5–8; comp. Wisdom i. 3–5, vii. 7 *et seq.*), and not be double-minded (δίψυχος = "be-leb wa-leb"; Ps. xii. 3 [A. V. 2]; Tan., Ki Tabo, ed. Buber, 3: "Pray not before God with two hearts"; comp. Ecclus. [Sirach] i. 28; Enoch, xci. 4; "Shepherd of Hermas," Mandate, ix. 4, 5, and the Jewish apocryphon quoted; I Clement xxiii. 3; II Clement xi. 2). In allusion to Jer. ix. 22 *et seq.* (comp. Ecclus. [Sirach] iii. 18, x. 21, xi. 1), the lowly brother is admonished to glory in that (through self-humiliation) he is exalted, and the rich to rejoice in that he is made low (by the speedy vanishing of his riches; i. 9–10). "Blessed is the man that . . . is tried; he shall receive the crown of life, which the Lord hath promised to them that love him" (comp. i. 12 with Job v. 17; Ecclus. [Sirach] xxxiv. 8–10; "Shepherd of Hermas," Visio, ii. 2 *et seq.*; Wisdom v. 15 *et seq.*; the passage quoted in I Cor. ii. 9 and the passages in Yalḳut, Judges, 59; see also Crown).

In i. 12–16 temptations are declared to come, not directly from God, but from the powers of the flesh, the "yeẓer ha-ra'"—lust which leads to sin and death (comp. Ecclus. [Sirach] xv. 12; Test. Patr., Reuben, 2 *et seq.*; Judah, 14, 19; and often). "Only good gifts come from God" ("kol de-'abed raḥmana le-ṭab 'abed"); "What God doeth is for good" (Ber. 60b, after Gen. i. 31; comp. Philo, "De Profugis," § 15; and often). "The Father of Lights" (*i.e.*, of the stars as sons of God; comp. Apoc. Mosis, 36; Philo, "De Somniis," i. 13; *idem*, "De Sacrificantibus," § 4) is one "with whom there is no variation or turning," as with the stars (Wisdom vii. 18; Enoch, xli. 8; lxxii. 5, 35). Especially is man created by His word of truth, the first-fruit of His creation (comp. Yer. Shab. 5b: "man is the pure 'ḥallah' [first dough] of creation").

Decidedly Jewish or rabbinical in conception and expression are the following sentences—i. 19–27: "Let every man be swift to hear, slow to speak, slow to wrath" (comp. Abot v. 11–12: "Hard to provoke and easy to be pacified is the disposition of the ḥasid"; "Quick to hear and slow to forget is wise"). "Lay apart all filthiness . . . and receive in meekness the engrafted word which is able to save your souls" (comp. Zech. iii. 3 *et seq.*; pseudo-Phocylides, 128; Apoc. Mosis, 20–21; Ps. cxix. 11; Test. Patr., Gad, 4). "Be ye doers of the word, and not hearers only" (comp. Abot i. 17, v. 14; Shab. 88a: "A crown for Israel's promise to do, and another for his promise to hear"). In i. 25 "the word" is spoken of as "the perfect law of liberty" (comp. Abot vi. 2; IV Macc. xiv. 2; Philo, "Quod Omnis Probus Liber," § 7), the observance of which brings eternal bliss (IV Macc. xvii. 18, xviii. 23). "The attendance at the divine service where the word of God is read should lead to pure speech and a pure worship of God the Father [comp. Ps. lxviii. 6] through works of charity, visiting the fatherless and widows in their affliction" (comp. Ecclus. [Sirach] iv. 10, xxxii. 14), and "keeping oneself unspotted from the world" (comp. Enoch, xlviii. 7).

Synagogal Teaching and Practise.

In ch. ii. the Synagogue and its specific teachings form the main subject of discussion, introduced by verse 1: "My brethren, show not respect of persons while professing belief in [the Lord of Glory]" (comp. Enoch, xl. 3, lxiii. 2; Ps. xxiv. 7–10; the Christian interpolation, "our Lord Jesus Christ," destroys the sense of the whole sentence and of all that follows). "Discrimination between the rich and the poor in the assignment of seats in the synagogue is not in keeping with the faith professed by the brethren, according to which God has chosen the poor as those rich in faith and as heirs to the kingdom promised to those that love Him" (2–5; comp. Ecclus. [Sirach] x. 22, xi. 6; Wisdom iii. 9; Enoch, xliii. 4; and often). "To despise the poor and honor the rich who drag the poor to the courts and thus desecrate the fair [καλὸν; perhaps originally μέγαλον = "great"] name by which ye are called [that is, "ḥillul ha-shem"] is not fulfilling the royal Law, 'Thou shalt love thy neighbor as thyself' [Lev. xix. 18]; those who do so are transgressors of the Law, inasmuch as he who offends in one point is guilty of transgressing the whole" (6–11; comp. Lev. xix. 15; Deut. xvi. 19, xxvii. 26; the Decalogue is quoted after the LXX., Ex. xx. 13–15; comp. Philo, "De Decalogo," §§ 24–26).

The writer then continues: "The freedom that comes from the study of the Law [Abot vi. 2] does not consist in the mere speaking of it, but must be shown in the doing; the mere profession of faith without works is of no avail; words without action do not relieve the naked and destitute—the demons also believe that there is one God. Abraham, our father, testified to his faith by his action, so it was accounted to him for righteousness [Gen. xv. 6], and he became the friend of God [comp. Book of Jubilees, xix. 9]. Also, Rahab the heathen was justified by her work in relieving the messengers [Josh. ii. 9–11] and not by mere confession. Faith without works is like the body without motion [so Spitta; text has "without the spirit"]" (12–26; comp. IV Esd. vii. 24, viii. 32–36, ix. 7, xiii. 23; Enoch, xxxviii. 2). It has been assumed by most New Testament exegetes that these observations refer to Paul's doctrine concerning justification by faith, a doctrine which also is based upon Gen. xv. 6 (see Rom. iv. 3; Gal. iii. 6), but which is contradicted by James. Spitta, however, insists that they were made independently of Paul (see, especially, *l.c.* ii. 204 *et seq.*).

The Power of the Tongue.

Ch. iii. contains observations, in the spirit of the Wisdom literature, regarding the evil tongue (comp. Ps. xxxii. 9, xxxiv. 16; Ecclus. [Sirach] xxii. 25, xxviii. 10–23). The readers are admonished not to pursue in large numbers the vocation of teachers, as it entails great responsibilities (comp. Abot i. 10, 11), since by the unbridled tongue all men are apt to sin. The tongue often defiles the whole body and sets on fire the whole wheel of existence (A. V. "course of nature"). With the mouth with which we bless God the universal Father we also curse men made in His image (1–10; comp. Tan., Meẓora‘, ed. Buber, 4–5; ‘Ar. 15b–16a; Test. Patr., Benjamin, 6). Let therefore the wise show his wisdom in removing strife and envy, for the wisdom that comes from above works peace and mercy without partiality and hypocrisy (11–18; comp. Abot i. 12, ii. 15; Test. Patr., Levi, 13).

In ch. iv. the brethren are warned against lusts which produce war among the members of the body (1–3; comp. Test. Patr., Reuben, 2; Dan, 5; Ned. 32b, with reference to Eccl. ix. 14). In the spirit of Essenism the author calls them (4–5) "adulterers," because cherishing unlawful desires, and says, "Know ye not that the friendship of the world is enmity with God?" (comp. Enoch, xlviii. 7); and with reference to Gen. vi. 3 and Prov. iii. 34 (LXX.) he tells them to resist the devil, or tempter, and he will flee from them; and instead to cling to God, and He will draw nigh to them (comp. Ps. xviii. 26 [A. V. 25] *et seq.*; Zech. i. 3; Test. Patr., Simeon, 3; Issachar, 4, 7; Dan, 5, 7; Naphtali, 8). They should therefore cleanse hands and hearts and weep over their sins, and through humbleness before God they will be lifted up (8–10; such monitions could never have emanated from a believer in Jesus as Christ without some reference to the power of forgiving sin ascribed to him by his followers). The brethren are especially warned against speaking evil against, and judging, one another, inasmuch as, being teachers of the Law, they thereby speak evil against, and judge, the Law itself. "God alone is the Lawgiver and Judge who is able to save and to destroy. Who art thou that judgest thy neighbor?" (11–12).

The Great Judgment-Day.

In the following (iv. 13–15) the rich merchants who plan great voyages and undertakings for the future are reminded of the uncertainty of human life (comp. Deut. R. ix.); they ought to say, "If God wills, we shall live and do this or that." (Compare the Jewish saying, "Im yirẓeh ha-shem" = "If God permits." On the other hand, "he who is able to do good and does it not, sins.") Finally, the rich ones who live only for their own pleasure and withhold the wages of their laborers are told to prepare for the great judgment-day (v. 1–5; comp. Enoch, xciv.–c., cii. 9, ciii. 5 *et seq.*; Ecclus. [Sirach] xxxi. 21; Wisdom ii. 20). On the other hand, the righteous who suffer innocently at the hands of the rich are admonished to wait patiently for the judgment-day of the Lord which is nigh, not to bear grudges one against another, and to take for their example the Prophets and Job, who also suffered in the cause of God (6–11).

Specific Essene Teachings.

Here follow, without any connection with the preceding, a number of Essene teachings concerning (1) swearing and (2) the treatment of members of the brotherhood. (1) "But above all things, my brethren, swear not, neither by heaven, neither by the earth, neither by any other oath: but let your yea be yea and your nay, nay; lest ye fall into [eternal] judgment" (12; comp. Josephus, "B. J." ii. 8, § 6; Ecclus. [Sirach] xxiii. 9–11; Philo, "De Decem Oraculis," § 17; Sifra, Ḳedoshim, viii.; Ruth R. vii. 5; Num. R. xxii.; Lev. R. vi.; Ned. 8b; Shebu. iv. 13: Matt. v. 33–37 is probably an amplification of this passage in James). (2) "Pray for the afflicted and sing psalms with the joyful." If one is sick, the elders of the congregation (A. V. "church") should be called to offer prayer for him and anoint him with oil (for healing) in the name of the Lord (comp. B. B. 116a; Ned. 40a; Apoc. Mosis, 9; Sanh. 101a; Yoma 77b; Yer. Ma‘as. Sh. ii. 53b; Shab. xiv. 3). A confession of sins ("widdui") should precede the prayer (Lev. R. x.), "the prayer of true faith saveth the sick, and that of the righteous man availeth much" (comp. Ber. v. 4b, 5; Test. Patr., Reuben, i. 4; Gad, 5). As an example of the power of the saint the story of Elijah (I Kings xvii. 1, xviii. 1) is referred to. As the ailing brother is thus induced by the one who visits him to repent of his sins, the writer closes with the general sentence (19–20): "If any of the brethren leads another to repentance ["teshubah"] he saves him from death, and hides [*i.e.*, removes from sight] a multitude of sins."

To ascribe these instructions to a believer in Jesus as the Savior and Healer of men is absolutely without foundation. As Spitta has shown, much of early Christian literature, especially the Second Epistle General of Peter, is founded on the epistle.

T. K.

JAMES, DAVID (DAVID BELASCO): English comedian; born at Birmingham 1839; died in London Oct. 3, 1893. Under the auspices of Charles Kean, James made his début, when a child, in the ballet at the Princess' Theatre, London. Next he appeared in various burlesques, his best creation being *Mercury* in F. C. Burnand's "Ixion," produced at the Royalty.

In 1870 James joined H. J. Montague and Thomas Thorne in the management of the Vaudeville Theatre.

His greatest success was as *Perkyn Middlewick* in Byron's "Our Boys," a part which he made famous and which he played more than thirteen hundred consecutive times—the record run for an English play—Jan. 16, 1875, to April 18, 1879. In 1881 he went to the Haymarket to join the Bancrofts; and thence he removed to the Lyceum, where "Two Roses" had been revived especially for him. In 1886 he joined Charles Wyndham's company, playing at the Criterion Theatre. In 1893, shortly before James's death, "Our Boys" was revived for him.

James left his large fortune to charity, mainly to Jewish institutions.

JAMNIA. See Jabneh.

JANINA or **YANYA:** City in Albania, European Turkey, on the lake of Janina.

The community, which was flourishing in the middle of the nineteenth century, is now dwindling. It includes about 1,000 families in an entire population of 30,000 inhabitants. It has two synagogues and two private meeting-rooms for prayer, a Talmud Torah, a school (400 boys and 150 girls) where Turkish and Greek are taught in addition to Hebrew, and about ten benevolent societies.

JANNAI. See Yannai.

JANNES AND JAMBRES (more correctly **Mambres,** ינים זימברים; also יוחני וממרא, **Yoḥanai and Mamre):** Names of two legendary wizards of Pharaoh "who withstood Moses" (II Tim. iii. 8) by imitating "with their enchantments" the works of Moses and Aaron, though they were defeated (Ex. vii. 11, viii. 7). According to rabbinical tradition they were the two chiefs of the magicians at the court of Pharaoh who foretold the birth of Moses, "the destroyer of the land of Egypt," thereby causing the cruel edicts of Pharaoh (Soṭah 11a; Sanh. 106a). They said to Moses when he performed his miracles with the water and the rod: "Dost thou wish to introduce magic into Egypt, the native land of the magic art?" (Men. 85a). According to Midrash Yelammedenu, Ki Tissa (Ex. xxxii.), they were among "the mixed multitude that went up with Israel from Egypt" (Ex. xii. 38) and aided in the making of the golden calf. They were the "two youths" (A. and R. V. "servants") that accompanied Balaam on his travels when commissioned to curse Israel (Targ. i. to Num. xxii. 22). They flew up into the air before the sword of Phinehas and made themselves invisible, until, by the power of the Ineffable Name, they were caught and slain (Zohar, Balaḳ, 194; comp. Targ. Yer. to Num. xxxi. 8).

Numenius the Pythagorean, quoted by Eusebius ("Præparatio Evangelica," ix. 8), relates after Artapanus (see Freudenthal, "Alexander Polyhistor," 1875, p. 173) that "Jannes and Jambres, the most powerful Egyptian magicians, dispersed the plagues which Moses (Musæus) had brought upon Egypt." In the third century the tomb of Jannes and Jambres was shown in Egypt; Christian saints knew it as a place where the evil demons could be consulted for magic purposes (see the story of Macarius in Palladius, "Historia Lausiaca"; Fabricius, "Codex Pseudepigraphus Vet. Test." i. 181, ii. 106–111). Jannes and Jambres are the subjects of many legendary tales, one of which is presented in a Greek work entitled "Pœnitentia Jannis et Mambre," counted among the Apocrypha in Pope Gelasius' "Decretum," and referred to by Origen (to Matt. xxvii. 9). These legends seem to have been known also to such pagan writers as Pliny and Apuleius; Pliny ("Historia Naturalis," xxxi. 11) mentions Moses, Jannes, and Jotape (Rotape?) among the Jewish magicians, and Apuleius ("Apologia," xc.) mentions Moses and Jannes among the world's great magicians.

Regarding the names, various etymologies have been proposed. Ewald ("Gesch." i., pt. ii. 128), Lauth ("Moses der Hebräer," p. 77), and Freudenthal (*l.c.*) believe them to have been derived from the Egyptian; Steiner (Schenkel, "Bibel-Lexicon") attempts to find for them a Hebrew origin; Geiger ("Urschrift," p. 474) considers the sons of Jambri as Amorites (comp. I Macc. ix. 36; see Kohut, "Aruch Completum"). Jastrow ("Dict.") and Levy ("Neuhebr. Wörterb.") each offer equally untenable explanations. The fact that a demon belonging to the class of Lilith, or a sorceress named Yoḥane bat Reṭibi (יוחני בת רטיבי), was greatly dreaded in Talmudical times (Soṭah 22a), and that Abraham's concubine Keturah (believed to have been familiar with magic) was also known as "Yoḥane" (Zeb. 62b; but see Bacher, "Ag. Tan." i. 357; 2d ed., p. 350), seems to throw some light upon the names "Jannes" and "Jotape" in Pliny; while the name "Mambre" appears to be correctly identified with ממרה (= "the rebel"; Levy, *l.c.*).

K.

JANOWSKI, DAVID: Russian chess-player; born May 25, 1868, in Russian Poland. He learned to play chess as a child, but did not make a serious study of the game until about 1886, when he removed to Paris, where he still (1904) resides. In international tournaments Janowski has played as the representative of France. His chief successes have been:

1894. Leipsic, fifth prize.
1896. Nuremberg, fifth prize.
1896. Budapest, fourth prize.
1897. Berlin, fourth prize.
1898. Vienna, third prize.
1899. London, second prize (tied with Pillsbury).
1901. Monte Carlo, first prize.
1902. Hanover, first prize.

In 1902 Janowski succeeded S. Rosenthal as chess editor of "Le Monde Illustré."

Bibliography: H. F. Cheshire, *The Hastings Chess Tournament, 1895*, London, 1896; H. Helms, in *Brooklyn Daily Eagle*, passim.

S. A. P.

JANUARIUS (ינובריום)**:** Talmudic name of a legendary hero; it is taken from the name of the first of the twelve Roman months. R. Johanan, in Yer. 'Ab. Zarah i. 39c, relates as follows: "The governments of Egypt and Rome, having been at war with each other for a long time, finally agreed to cease their cruel bloodshed and instead to recognize as ruler that government whose general would in obedience to command forthwith cast himself upon his sword and die. Egypt found no general willing. The Romans, however, had an old man by the name of Januarius, who had twelve sons. To him they said: ‘Obey our command, and in compensation we will make thy twelve sons dukes, eparchi, and leaders of the army.’ He then cast himself upon his sword and died; and hence the first of January was called ‘Calendæ Januarii,’ and the following day was made a day of mourning." This is obviously a misunderstood Roman legend of old King Janus, the father of Time, who—like Chronus—dies to make room for his twelve sons, the twelve months of the year, and probably is connected with a festival of Janus celebrated in Rome on the 1st of January.

JAPHETH (יפת).—Biblical Data: One of the sons of Noah, and the ancestor of a branch of the human race called "Japhetites." Japheth and his two brothers, Shem and Ham, were born when Noah had attained his five hundredth year (Gen. v. 32). It is not clearly indicated which of the three brothers was the eldest. Japheth usually comes third in order (*ib.* vi. 10, vii. 12, ix. 18, x. 1), but in the genealogy of their descendants the order is inverted (*ib.* x. 2–22). The words "the elder" (*ib.* x. 21) are more probably applied to Shem. Still, it seems, from a comparison of Gen. v. 32, vii. 6, and xi. 10, that Japheth was by two years Shem's senior. Japheth with his brother Shem covered the nakedness of their father when he lay drunken in his tent, for which deed he received from his father the blessing that his descendants might extend over the surface of the earth and that Canaan should be his as well as Shem's servant (ix. 23, 27). Japheth was married before the Flood, and had his wife with him in the ark (vii. 13); but his seven sons were born after the Deluge (x. 1).

The name "Japheth" is derived, according to Gen. ix. 27, from the Aramaic root פתה = "to extend," in allusion to the expansion of the Japhetites. Saadia and the modern lexicographers, as Gesenius and others, derive it from יפה = "fair"; but this interpretation had already been rejected by Ibn Ezra.

As to the identification of Japheth with the Iapetos of the Greek mythology, see D. S. Margoliouth in Hastings, "Dict. Bible"; comp. also Sayce in "Tr. Soc. Bibl. Arch." 1883, p. 154. See Biblical Ethnology.

E. G. H. M. Sel.

——**In Rabbinical Literature:** Japheth is considered by the Talmudists to have been the eldest son of Noah (Sanh. 69b; Gen. R. xxvi.). The reason why Shem's name always appears first is that the sons of Noah are named in the order of their ability (*i.e.*, as wise men, among whom Shem excelled; Sanh. *l.c.*). According to the Midrash, the prosperity of Japheth is alluded to in Ps. i. 3: "and whatsoever he doeth shall prosper" (Gen. R. *l.c.*). In the act of covering Noah's nakedness it was Shem who first took "the cover"; but Japheth came afterward to help him and was repaid therefor in that his descendants Gog and Magog were granted burial (Ezek. xxxix. 11 *et seq.*; Gen. R. xxxvi.).

The words "yaft elohim le-Yefet" (Gen. ix. 27) are interpreted as alluding to the construction of the Second Temple by Cyrus, who was descended from Japheth (Yoma 10a). Bar Ḳappara interpreted the passage as meaning that the Law will be explained in the language of Japheth (Gen. R. xxxvi.; Deut. R. i.); R. Ḥiyya b. Abba, interpreting "yaft" as derived from the root יפה, meaning "beauty" (see Japheth, Biblical Data), explains it more clearly thus: "The Law will be explained in the beautiful language of the Greeks, descendants of Japheth" (Meg. 9b). According to the Targum pseudo-Jonathan (*ad loc.*), the passage means that the descendants of Japheth will become proselytes and will study the Law in the schools of Shem.

When God blessed Noah and his sons (Gen. ix. 1), He in blessing Japheth promised that all of his sons should be white; and He gave them as their portion deserts and fields (Pirḳe R. El. xxiv.).

S. S. M. Sel.

JAPHETH HA-LEVI (Arabic, **Abu** or **Ibn 'Ali Ḥasan [= Japheth] al-Baṣri al-Lawi**): Karaite Bible translator and commentator; flourished at Jerusalem between 950 and 980. He was one of the most able Bible commentators among the Karaites, who distinguished him by the epithet "maskil ha-Golah" (= "teacher of the Exile"). Unlike his Karaite predecessors in the field of Bible exegesis, Japheth realized the importance of grammar and lexicography for the interpretation of Scripture, although he did not excel in either. The interest which his commentaries present lies chiefly in the accumulation of material for the history of the differences between the Rabbinites and the Karaites; for he enters into lengthy disputes with the Rabbinites, especially with Saadia, from whose commentaries on the Bible and polemical works, including some no longer in existence, he gives many extracts. Thus in regard to Ex. xxxv. 3 he discusses with Saadia the kindling of a fire by a non-Jew on Sabbath, a practise which the Karaites considered to be forbidden. Japheth reproaches Saadia with being unfaithful to the principles he himself had laid down for the interpretation of the Law, according to which no deductions by analogy are admissible in definite revealed precepts. On Lev. xxiii. 5 Japheth cites fragments from Saadia's "Kitab al-Tamyiz," a polemical work against Karaism, in which the author states that there are three sects which are divided on the question of the new moon: (1) the Rabbinites, who, except in special cases, determine it by the molad; (2) the sect of the Tiflis, which follow the molad absolutely; and (3) a sect which is guided by the first appearance of the moon.

His Exegetical Principles.

Japheth claims full freedom for the exegete, refusing to admit any authority for the interpretation of the Law; and, although he sometimes uses the thirteen hermeneutic rules laid down in the Mishnah, he denies their authority: they are to be applied, he claims, only when it is not possible to explain the passage literally. Thus, notwithstanding his profound veneration for Anan, the founder of Karaism, and for Benjamin Nahawandi, he often rejects their interpretations.

Japheth was a decided adversary of the philosophico-allegorical treatment of Scripture. He, however, symbolizes several Biblical narrations, as, for instance, that of the burning bush, in which he finds a representation of Israel, whom enemies can not annihilate; and he admits that the Song of Solomon is an allegory.

Japheth attacked Islam with the greatest violence. For him the words of Isaiah, "Woe to thee that spoilest" (Isa. xxxiii. 1), refer to Mohammed, who robbed all nations and dealt treacherously with his own people, and Isa. xlvii. 9 to the downfall of Islam. In the following verse he sees an allusion to the sufferings inflicted by the Mohammedan rulers upon the Israelites, who are loaded with heavy taxes, compelled to wear badges, forbidden to ride on horseback, etc.

Japheth was no less bitter in his attacks on Christianity and on rabbinical Judaism, to which he refers many prophecies. Unlike his predecessors, he was not an opponent of secular science. To him the word "da'at" (Prov. i. 7) denotes "the knowledge" of astronomy, medicine, mathematics, etc., the study of which is to be undertaken before that of theology.

Their Influence.

Japheth's commentaries were much used by succeeding Karaite exegetes, and were often quoted by Ibn Ezra. Written in Arabic, some of them were rendered into Hebrew either in full or abridged. Nearly the whole Arabic text on all the Biblical books is extant in manuscript in the leading European libraries (Leyden, Oxford, British Museum, London, Paris, Berlin, etc.). The parts which have been published are: on the Psalms and the Song of Solomon, by Abbé Bargès (Paris, 1861, 1884); on Proverbs, by Z. Auerbach (Bonn, 1866); on Hosea, by Tottermann (Leipsic, 1880); on Daniel, by Margoliouth (in "Anecdota Oxoniensa," Semitic Series, i., vol. iii., Oxford, 1889); on Ecclesiastes i.-iii., by J. Günzig (Cracow, 1898); on Ruth, by N. Schorstein (Heidelberg, 1903).

Other Works.

Before devoting himself to Biblical exegesis Japheth wrote several other works of lesser importance. Among these were: (1) an epistle in rimed prose refuting the criticism on Karaism by Jacob ben Samuel, surnamed by the Karaites "ha-'Iḳḳesh" (= "the intriguer"), published by Pinsker in his "Liḳḳuṭe Ḳadmoniyyot," p. 19. Japheth endeavors in this epistle to demonstrate that there is no trace of oral tradition in Scripture, and consequently the Mishnah, Talmud, and other rabbinical writings fall under the prohibition "Ye shall not add unto the word which I command you" (Deut. iv. 2). (2) "Sefer ha-Miẓwot," treating of the precepts, and containing many controversies with the Rabbinites; mentioned by Japheth in the commentaries to I Sam. xx. 27; Dan. x. 3. Some fragments of this work were found in the Library of St. Petersburg and published by A. Harkavy. (3) "'Iyyun Tefillah," in ten chapters, treating of all that pertains to prayer; extant in manuscript (Paris MS. No. 670). (4) "Kalam," perhaps a liturgical work, extant in manuscript. Levi, Japheth's son, mentions in his "Muḳaddimah" to Deuteronomy another work by his father, entitled "Safah Berurah," the contents of which are unknown (the supposition of Fürst that it was a grammatical treatise is considered to be erroneous).

JAPHIA (יפיע = "He shineth"): **1.** King of Lachish, and one of the five kings who, entering into a confederacy against Joshua (Josh. x. 3), were killed by the latter at Makkedah (see Adoni-zedek). **2.** According to II Sam. v. 15, the eighth of the eleven sons of David born in Jerusalem, but according to I Chron. iii. 7, xiv. 6, the tenth of thirteen sons born there. This name is given in the Peshiṭta as "Nefia," which reading seems to have been followed by Josephus, who has "Ennaphen" ("Ant." vii. 3, § 3). **3.** A place marking the boundary of Zebulun (Josh. xix. 12, 13). It is identified with Japha, a strong village of Galilee fortified by Josephus ("Vita," 37, § 45; *idem*, "B. J." ii. 20, § 6; iii. 7, § 31), and with the modern Yafa, a small village southwest of Nazareth, in which Robinson found about thirty houses (Robinson, "Researches," iii. 200). This village is also described by Eusebius and Jerome ("Onomasticon," *s.v.* "Japheth"). The Italian monks now call it "St. Giacomo," on account of the tradition that this village was the residence of Zebedee and his two sons James and John.

JAPHO. See Jaffa.

JARE (ירא = "God-fearing"; by some it is regarded as the abbreviation of the words "Yehi reẓui eḥaw" [Deut. xxxiii. 24]): Name of an ancient Italian family of scholars dating back to the fifteenth century.

Giuseppe Jaré: Italian rabbi; born at Mantua, Dec., 1840. He was educated at the Istituto Rabbinico of Padua, being one of the last pupils of S. D. Luzzatto. In 1868 he received his rabbi's diploma, and at the same time a professor's diploma from the university. He officiated as rabbi in his native city, and in 1880 went in the same capacity to Ferrara. A specialist in Jewish literature, he has collaborated on the works of prominent scholars. His independent works include: "Della Immutabilità della Legge Mosaica" (Leghorn, 1876); "Cenni su Abramo Colòrni" (Ferrara, 1891).

S. I. E.

Isaac Jare: Rabbi at Ivrea. Another Isaac Jare was rabbi at Mantua about 1720.

Mordecai b. Berechiah Reuben Jare: Italian preacher; lived at Mantua toward the end of the sixteenth century. His father died at Mantua in 1598. Mordecai compiled for the Shomerim la-Boḳer society the collection of liturgical poems known under the title "Ayyelet ha-Shaḥar," including chiefly "tefillot," "baḳḳashot," "seliḥot," and "pizmonim," printed first at Mantua in 1612 in the newly established printing-office of Eliezer d'Italia. Jare included many poems by his contemporary Hananiah

Eliakim Rieti. The collection contains also the following compositions by Mordecai: (1) "Leka Eli Teshuḳati," baḳḳashah for the Sabbath, in verse, a clever imitation of an anonymous baḳḳashah in the Spanish ritual (printed also in M. Sachs's "Religiöse Poesie," Hebrew part, p. 44; D. Kohn, "Abraham ibn Esra," i. 204). Both poems are closely connected with Gabirol's "Leka Nafshi Tesapper." (2) "Ehyeh Asher Ehyeh," seliḥah for days on which no "taḥanun" is recited, consisting of eleven strophes, each of which, except the last, begins with a name of God. It was written at the request of Isaac Galico.

Mordecai wrote also an approbation for Joseph Jedidiah Karmi's "Kenaf Renanim" (Venice, 1626).

JARGON. See Judæo-German.

JARMON, NEHORAI. See Garmon, Nehorai.

JARNO, JOSEF (Josef Cohen): Austrian actor; born at Budapest Aug. 24, 1866. He was educated for a mercantile career, but went on the stage when nineteen years of age. His début was made in 1885 at Ischl, where he has since been engaged during the summer months. From 1887 to 1890 he played in Laibach; from 1890 to 1899 in Berlin at the Residenztheater and the Deutschestheater; and since 1899 he has been a member of the Josefstädter Theater company at Vienna.

Jarno has written several plays, among which may be mentioned: "Der Rabenvater"; "Illusionen"; "Der Vielgeliebte"; "Die Wahrsagerin"; etc.

JAROSLAW. See Yaroslav.

JAROSLAW, AARON: One of the Biurists; a tutor in the house of Mendelssohn; afterward teacher at Lemberg. His commentary on the Book of Numbers appeared in the first edition of Mendelssohn's Pentateuch ("Netibot ha-Shalom," Berlin, 1783) and has been included in all subsequent editions. He published the third edition of Maimonides' "Millot ha-Higgayon," with Moses Mendelssohn's Hebrew commentary (Berlin, 1784).

Bibliography: Fürst, *Bibl. Jud.* ii. 28; Steinschneider, *Cat. Bodl.* col. 721; Zeitlin, *Bibl. Post-Mendels.* pp. 153-154; Moses Mendelssohn, *Gesammelte Schriften*, v. 660.
S. S. Man.

JASHER, BOOK OF (Hebrew, "Sefer ha-Yashar" = "Book of the Righteous One"): A book, apparently containing heroic songs, mentioned twice in the Old Testament: in the account of the battle of Gibeon a fragment of a song of Joshua is given as taken from it (Josh. x. 13); and another fragment is quoted in David's lamentation for Saul and Jonathan (II Sam. i. 18).

The nature of this book has been a matter of discussion from the time of the Septuagint up to the present day. The Septuagint, in Joshua, omits all reference to the Book of Jasher, while in II Samuel it refers to it as *Βιβλίον τοῦ Εὐθοῦς*. On the other hand, in I Kings viii., transposing verses 12–13, which are a fragment of a song, after verse 53, it adds, "is it not written in the book of songs (*ἐν βιβλίῳ της ᾠδῆς*)?" It is evident that the Septuagint had a text which in this passage read הלא היא כתובה בספר השיר; and it may be supposed that the word הישר, which occurs in the two passages mentioned above, is simply an anagram of השיר. This supposition is supported by the Peshiṭta, which reads in II Samuel "Sefer Ashir," while in Joshua it translates "Sefer ha-Yashar" by "Sifra de-Tushbeḥata" (= "Book of Praises"). Another theory is that "Sefer ha-Yashar" is a misreading for "Sefer Az Yashir" (אז ישיר; comp. Ex. xv. 1), the book beginning with this phrase, and containing songs.

The Rabbis, followed by Jerome, translated "Sefer ha-Yashar" by "Book of the Righteous" ("Liber Justorum"); but while following the rendering of the Targum Yerushalmi, "Sifra de-Oraita" (= "The Book of the Law"), they did not agree as to which book was meant. R. Johanan referred it to Genesis, finding there allusions both to the title ("Book of the Righteous") and to the incidents in connection with which it is quoted; R. Eleazar referred it to Deuteronomy; and Samuel b. Naḥmani to the Book of Judges ('Ab. Zarah 25a). Sixtus Senensis ("Bibl. Sanct." book ii.) states that some Hebrew writers (whose names he does not give) understand by the "Book of Jasher" the twelve Minor Prophets.

Levi b. Gershon was the only commentator who thought that the "Sefer ha-Yashar" was a special book, lost during the Captivity. His opinion has been adopted by Junius, Hottinger ("Thes. Phil." ii. 2, § 2), and many others. For further details in regard to the opinions of modern critics and Donaldson's attempt to reconstruct the book, see W. A. Wright in Smith, "Dict. Bible." For the more modern midrash of the same name see Yashar.
E. G. H. M. Sel.

JASON (JESHUA or JESUS): **1.** High priest from 174 to 171 B.C.; brother of the high priest Onias III. During the absence of Onias, who had been summoned to Antioch to meet charges brought against him by the Hellenists, Jason joined hands with his brother's enemies. Through the payment of large sums he obtained from Antiochus the transfer of the high-priesthood, permission to erect at Jerusalem a gymnasium and an ephebeum, and the grant to the inhabitants of Jerusalem of the privileges and title of citizens of Antioch; for the latter favor alone he paid 150 talents.

During the three years of Jason's administration the influences of Hellenism in Judea reached their climax. In his desire to pass for a Hellene Jason went so far as to send representatives to a duplication of the Olympian games celebrated in the presence of Antiochus at Tyre, and presented 300 drachmas for a sacrifice to Hercules, to whom the games were dedicated. But notwithstanding his zeal Jason was deposed at the end of the third year, having been outbid by Menelaus, supported by the TOBIADS. Jason, however, did not consider himself defeated; profiting by the absence of Antiochus Epiphanes, then engaged in a war with Egypt, and backed by the majority of the inhabitants, he rendered himself master of the city, and compelled his adversary to seek refuge in the fortress. Jason's triumph was short-lived. Antiochus, forced by the Romans to abandon his campaign against Egypt, seized the opportunity afforded by Jason's uprising to march against Jerusalem. When the city was taken Jason fled to the Ammonites, among whom he remained until his death.

2. Son of Eleazar; sent by Judas Maccabeus as envoy to Rome (I Macc. viii. 17; Josephus, "Ant." xii. 10, § 6). In the reference to the embassy in II Macc. iv. 11 only Jason's companion, Eupolemus, son of John (or John, son of Eupolemus), is mentioned.

G. S. KR.

JASON OF CYRENE: Judæo-Hellenistic historian. He wrote a history of the Maccabean revolt in five books, from which the author of II Maccabees took his data (II Macc. ii. 23), this book being practically an abstract (*ἐπιτομή*; *ib.* ii. 26, 28) of Jason's work. The author of II Maccabees himself gives a short account of Jason's work, in which he indicates the moral value of reading it.

Jason doubtless presented the events in fine rhetorical language, his style being still easily recognizable in II Maccabees. The four letters incorporated in II Macc. xi. 16 *et seq.*, as well as the legendary stories of the martyrdom of Eleazar and the seven brothers (*ib.* vi.-vii.), were written probably by Jason himself. Jason no doubt described the occurrences in detail for the purpose of edifying his readers, chiefly Jews, and of confirming them in their faith. This explains why he required five books for a narrative that was compressed into one small book like II Maccabees. The epitome preserved covers a period of fifteen years, from the death of Seleucus IV. to the victory over Nicanor (175-161). The abrupt ending is probably due to the epitomist; for this victory marks no period in the Maccabean uprising.

The many important details in Jason's work prove that he was not far removed from the events; he therefore probably did not make use of written notes, but obtained his information by word of mouth. In any case he wrote his work in Greek, and II Maccabees also is in pure Greek, and is not a translation. The epitomist probably copied many passages outright; but he may also have incorporated material of his own. The two letters in the beginning of the book are not by Jason.

Nothing is known about Jason beyond the references to him in II Maccabees. A Jason of Cyrene who inscribed his name on the temple of Thothmes III. in Egypt (Sayce, "Revue des Etudes Grecques," vii. 297) may be identical with the subject of this article. In this case he must have traveled; and he may therefore have been in Palestine also and have gathered his material on the spot.

Polybius may be regarded as a source used by Jason, though doubtless only for the dates of general history (Willrich, "Judaica," p. 140). It is also assumed that Jason drew upon III Maccabees; *e.g.*, the account of the Dionysus celebration (II Macc. vi. 7) is said to have been taken from III Macc. ix. 29 (Willrich, *l.c.* p. 165), though this can not be proved. If it is rightly assumed that the Hebrew "Yosippon," or Gorionides, shows traces of Jason's work, as was stated first by Trieber, and, following him, by Willrich (*l.c.* p. 170), further reference might be found to Jason's lost work. It must have been one of the finest examples of Judæo-Hellenistic literature; and its loss is irreparable. Even Philo did not know Jason's work itself, but only the extract in II Maccabees; it was this epitome therefore that caused the original work to be forgotten so quickly.

G. S. KR.

JASSY (Jaschi): City of Rumania. Jassy contains the oldest and most important Jewish community of Moldavia, of which principality it was formerly the capital. Psantir has found in the old cemetery there stones with inscriptions dating back to 1467 and 1549. Jews were living at Jassy before it became the capital of Moldavia (1565), and their numbers certainly increased after that, for Jassy, on the commercial highway between Poland and Turkey, was frequented by Jewish merchants. The numerical importance of the Jews of Jassy after the second half of the sixteenth century explains their having among them at that time the distinguished Rabbi Jacob (or Solomon) b. Arvi, who officiated there for forty years, whom Joseph Solomon Delmedigo cites as an able physician and cabalist, and who migrated to Palestine in his old age.

The Cossack Revolt.

When Prince Aaron rose against Turkey, Nov., 1594, and killed all the Turks at Jassy, nineteen Jews were also victims; and when the Cossacks rose against Poland, 1648-52, killing indiscriminately Christians and Jews, a number of the latter fled to Jassy, while the community ransomed others from the Tatars. Others were sent to Jassy by the Jews of Constantinople, who had bought them in the slave-market of that city. Some of these redeemed Jews remained at Jassy. Soon after, the Jews of Jassy themselves were harried by the Cossacks. When Timush, the son of Chmielnicki, went to Jassy, Aug., 1652, to marry the daughter of Vasilje Lupul, the soldiers of his large escort fell upon the Jews, who were forced to hide while the Cossacks remained in the city; about sixty Jews who were caught were maltreated and compelled to pay a high ransom for their lives. When Vasilje Lupul, dethroned by Stephen George, called upon his son-in-law for aid, the Cossacks returned and the Jews suffered more cruel tortures at their hands; all would have perished had not the Patriarch of Antioch intervened in their behalf on his passage through the city.

The insurrection was propitious, however, for the intellectual life of the Jews of Jassy, for among the Polish Jews that sought refuge in Moldavia was Rabbi Nathan Nata Hanover, author of the "Yewen Meẓulah." Called to Jassy from the rabbinate of Focsani, he directed its community for several years. Since that time many learned rabbis have occupied the rabbinate of Jassy, and the inscriptions on tombstones preserve the names of a number of Biblical and Talmudic scholars who dwelt in the community. At the beginning of the eighteenth century the rabbinate was filled by Pethahiah Lida, son of David Lida, who fled to Jassy when Lemberg was sacked by the Swedes. His successor was Bezaleel ha-Kohen, subsequently ḥakam basha, whose son and grandson held in turn the same office. In fact, about the beginning of the eighteenth century Jassy became the seat of the ḥakam bashas, who exercised authority over the Jews of the entire country.

In the Eighteenth Century.

During the troublous times of the first war between Russia and Turkey the community of Jassy suffered greatly, especially under the kaimakam Lupul (1711). After a period of quiet under Nicholas Mavrocordato (1711–1715) the Jews were again harassed under the terrible Michael Racovitza (1716–26), the last year of whose reign was marked by an accusation of ritual murder at Onitzcani. The case, on being appealed, was tried at Jassy, where the populace, incited by the prince, plundered the ghetto and set fire to the synagogue, while Racovitza had a number of Jews tortured in order to extract money from them. During the periodic wars between Russia and Turkey in this century the Jews of Jassy suffered equally with their Christian fellow citizens, being despoiled and pillaged by both sides. The community was, moreover, torn by internal dissensions. The Frankists also caused trouble by their propaganda, and the ḥakam basha of Jassy was forced to appeal to the pasha of Chotin to prevent them from seeking refuge in Moldavia after the death of Archbishop Dembowsky.

On the death of Isaac ha-Kohen, Dec., 1776, or Jan., 1777, the community split into two hostile parties, one of which chose Isaac's son Naphtali as his successor, while the other elected Mordecai b. Moses Ḥayyim. A violent conflict arose, during which both sides spent enormous sums, and the prestige of the Jews of Jassy suffered greatly. The quarrel was finally compromised in 1782, when Naphtali ha-Kohen was recognized as titulary ḥakam basha, though he ceded certain of his rights to his less successful rival. After foreign consulates were established at Jassy, in 1780, there were incessant contentions between the native Jews and the foreign or protected Jews in regard to the gabel, which the latter refused to pay. Agreements were made but soon broken, and the dissensions between the two parties finally led to the suspension of the office of ḥakam basha (1832).

During the Nineteenth Century.

In 1803, during the reign of Prince Alexander Murusi, the Jews of Jassy were threatened with a general massacre, and were saved only through the intervention of the metropolitan, who sheltered them in the court of the archbishop's residence, declaring that the mob would have to pass over his body before reaching the Jews. Calimah (1812–19), although favorably disposed toward them, could not prevent the annoyances and extortions to which they were subjected by his rapacious officials. The plague that raged in Moldavia in 1815 was made a pretext for subjecting the Jews to oppressive regulations, enacted ostensibly for the protection of the city. The assessments of the community were considerably increased, and the Jewish money-lenders were restricted in their business. The most calamitous days fell upon the community in 1821–22, at the time of the Greek revolution. This uprising, known as the "Hetæria," first broke out at Jassy, where Turks and Jews were slain indiscriminately. There were continual conflicts between Jews and Hetærists; Jewish tailors were compelled to furnish gratuitously the uniforms of the revolutionists; the shops of the Jews were plundered, their horses were carried off, and they were generally oppressed and harassed. The well-to-do Jews left the city and country. When the Turks took possession of Jassy, they in turn pillaged and oppressed the Jews as well as the rest of the people; many Jews were imprisoned in order to extort money from them, and women and children were violated. There were frequent fires in the Jewish quarters; the largest of these occurred on July 29, 1822, when three-fourths of the entire city was reduced to ashes. Many Jews perished in the flames, and those that succeeded in saving anything were despoiled by the soldiers. Five synagogues and hundreds of Jewish houses were burned.

Under the Sturzas and Dynasty Ghika.

During the reign of the easy-going prince Ioan Sandu Sturza (1822–28), the Jews were forbidden to make or sell candles or bread to Christians. Much suffering followed the fire of Aug., 1827, when the main and the neighboring streets were destroyed; the merchants lost not only their goods but their books, and were thus deprived of the legal means of holding their debtors, many families being completely ruined. The provisional government of Russia (1828–34) imposed such heavy taxes that the Jews felt the consequences even after the departure of the army. They suffered still more during the plague of 1829 and the cholera of 1831–34. All business was interrupted; the wealthy Jews left the city, while the poor ones were driven out and forced to live miserably in tents on the outskirts.

On the accession of Prince Michael Sturza (1834–1848) the community of Jassy had to pay heavily in order to set aside the decree relating to vagabondage, deliberately intended as an excuse for despoiling the Jews. The people of Jassy were several times induced by the prince to bring complaints against the Jews in order to justify the revival of restrictive measures against them, which measures were ignored as soon as the Jews had paid a sufficient sum. Ordinances forbidding the Jews of Jassy to live in certain streets, hire Christian servants, engage in money-lending or in selling old clothes, were in turn promulgated and then quietly disregarded. Gregory Ghika (1849–56) reorganized the community and admitted Jewish children to the public schools. During his reign a modern Jewish school was established at Jassy, this being the first step toward the civilization and progress that steadily continued under the first Cuza (1859–66).

Organization.

In addition to the ḥakam basha the affairs of the community were originally managed by three starosts, who exercised also a certain judicial power; they represented the community before the authorities and supervised the collection of taxes. After 1832 the starosts were replaced by "epitropes," officials who were recognized by the authorities down to 1866. For a long time there was only one official synagogue, in the upper part of the city, and rebuilt after a fire in 1764; but there has always been a number of ḥebrot. No new synagogues were built before the beginning of the nineteenth century. The community now possesses a modern temple, several large synagogues, and about one hundred smaller places of worship. All its educational and philanthropic institutions are managed by special committees or societies and supported by voluntary contributions. The meat-tax, which as late as 1866 yielded 200,000 francs annually, has not been reestablished.

The religious affairs of the community are in the hands of one preacher at the temple (Rabbi Niemirover, 1903), two rabbis of the old school, and five dayyanim. Among the older rabbis at Jassy who contributed to Jewish literature, Aaron Moses Taubes (d. 1852) should be mentioned. The society Cultura supports two primary schools; the society Junimea and a ladies' society support a school for girls; other educational institutions include a gymnasium, a business school, a trade-school for girls, a Talmud Torah (where Rumanian is taught), a large number of ḥadarim, and some private schools for Jewish boys and girls. The philanthropic institutions include a hospital with 120 beds, a home for the aged, an orphan asylum, a B'nai B'rith lodge, the society Fraterna Pacurar (furnishing medicine and monetary relief to its members), and a women's benevolent society. Certain committees distribute bread and wood to the poor at Passover, and clothing and shoes to needy school children. Of the many Zionist societies formed at Jassy only three survive. The cemetery is in charge of the ḥebra ḳaddisha.

Statistics.

According to partial statistics, published in 1901, there are at Jassy 1,014 Jewish master workmen in a total of 1,493; 1,038 Jewish journeymen in a total of 1,620; and 511 Jewish apprentices in a total of 717. In consequence of the restrictive measures enacted against the Rumanian Jews since 1880 many have left Jassy; since 1899 more than 5,000 Jews have gone elsewhere. In 1803 there were 563 Jewish taxpayers at Jassy in a Jewish population of more than 3,000. Their numbers increased considerably as the city became more important. In 1820 there were 1,099 Jewish taxpayers; in 1827 they had increased to 1,256; in 1831, to 1,700 in a total Jewish population of 17,032; in 1839, to 4,528 in a total of more than 30,000. The census of 1859 showed a Jewish population of 31,000; that of 1894, 33,253; and that of 1899, 39,441.

The city and district of Jassy have, according to the census of Dec., 1899, a Jewish population of 46,696 in a total of 191,828. The Jews in the district are divided among the following communities: Tîrgu-Formoss (2,107), Podul Iloei (1,692), Bivolari (1,005), Sculeni (410), Caminareschti (Tziganash, 170), Tzibana (122), Poieni (100), Socola (71), and Dimache (57). About 1,520 live in villages.

G. E. Sd.

JASTROW, IGNAZ: German economist and statistician; born Sept. 13, 1856, at Nakel. Having studied at Breslau, Berlin, and Göttingen (Ph.D. 1878), he became in 1885 privat-docent of social economy at the University of Berlin.

Among Jastrow's works may be mentioned: "Zur Strafrechtlichen Stellung der Sklaven bei Deutschen und Angelsachsen," Breslau, 1878; "Gesch. des Deutschen Einheitstraums und Seiner Erfüllung," Berlin, 1884 (4th ed., 1891); "Die Volkszahl Deutscher Städte am Ende des Mittelalters und zu Beginn der Neuzeit," *ib.* 1886; "Das Interesse des Kaufmannsstandes am Bürgerlichen Gesetzbuch," *ib.* 1890; "Deutsche Gesch. im Zeitalter der Hohenstaufen" (with G. Winter), *ib.* 1894; "Kommunale Anleitungen," *ib.* 1900.

Jastrow is the editor of the "Jahresberichte der Geschichtswissenschaft" and "Soziale Praxis" (formerly "Blätter für Soziale Praxis").

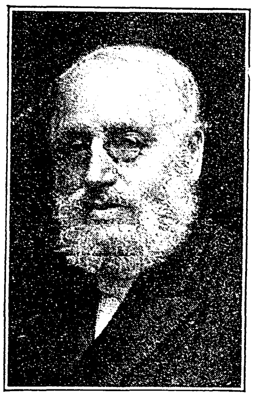
Bibliography: *Meyers Konversations-Lexikon.*

S. F. T. H.

JASTROW, JOSEPH: American psychologist; born Jan. 30, 1863, at Warsaw, Poland. He accompanied his father, Dr. Marcus Jastrow, to the United States in 1866, and was educated in Philadelphia. In 1882 he graduated from the University of Pennsylvania and took the degree of B.A., in 1885 that of M.A.; at Johns Hopkins University he became fellow in psychology (1885–86), and in 1886 took the degree of Ph.D. In 1888 he accepted the chair of psychology in the University of Wisconsin, which position he still (1904) holds. He was placed in charge of the psychological section of the World's Columbian Exposition, Chicago, 1893. For the year 1900 he served as president of the American Psychological Association. Among Jastrow's publications are: "Time Relations of Mental Phenomena" (1890); "Epitomes of Three Sciences" (the section on psychology; Chicago, 1890); "Fact, Fable, and Psychology" (Boston, 1900). During 1902–3 he contributed numerous articles on abnormal psychology, mental pathology, and on anthropology to Baldwin's "Dictionary of Philosophy and Psychology." He is a prolific contributor on psychological subjects to scientific journals, magazines, and encyclopedias.

A. F. H. V.

JASTROW, MARCUS (MORDECAI): American rabbi and scholar; born June 5, 1829, at Rogasen, Prussian Poland; died Oct. 13, 1903, at Germantown, Pa.; fifth child of Abraham Jastrow and Yetta (Henrietta) Rolle. Until 1840 he was privately educated. In 1844 he entered the third-year class of the Friedrich Wilhelm Gymnasium at Posen, graduating in 1852. Thence he went to Berlin University, and continued his Talmudic studies under the rabbis of Berlin. The strongest influence exerted upon him during his Berlin student days was that of Michael Sachs.



Marcus Jastrow.

In 1855 he took the Ph.D. degree at the University of Halle, his thesis being "De Abraham ben Meïr Aben Esræ Principiis Philosophiæ." In Elul, 5617 (1857), he received the rabbinical authorization from Rabbi Feilchenfeld of Rogasen and from Dr. Wolf Landau of Dresden. He taught in the religious school of the Berlin congregation, at that time conducted by Dr. David Rosin.

Joins in Polish Revolution.

In 1858 Jastrow removed as rabbi to Warsaw, and threw himself into the study of the Polish language and of Polish conditions. By Feb. 27, 1861, national feeling had risen so high in Poland that the government called out the military; five victims fell in the Krakauer Vorstadt, Warsaw, and their burial and the memorial service were turned into patriotic demonstrations, in which, for the first time, "the Old Testament Brethren" of the Poles participated as a community. Though it was Sabbath, three rabbis, including Jastrow, joined the funeral cortège; at the memorial service in his synagogue, also on a Sabbath, Jastrow preached his first Polish sermon, which aroused such great enthusiasm that on Sunday his auditors reassembled and took it down at his dictation. Circumventing the censor, they distributed ten thousand manuscript copies within a week.

On various pretexts the three rabbis were arrested (Nov. 10, 1861) and incarcerated in the citadel of Warsaw. For twenty-three days Jastrow was kept in solitary confinement; for seventy-two days he shared the cell of Rabbi Meisels. His release came on Feb. 12, 1862, when, being a Prussian subject, he was sent across the frontier. During his imprisonment he had been required to answer in writing three questions concerning the relation of the Jews to the Polish Christians in their opposition to the government (see "Hebrew Leader," July 15, 22, 1870).

Returns to Warsaw.

Broken in health, Jastrow, with his family, spent the spring and summer of 1862 in Breslau, Berlin, and Dresden; in the autumn he accepted a call from Mannheim. A few weeks later, Nov., 1862, the order for his expulsion was revoked, and gave occasion for a controversy between the congregation at Warsaw (which had continued his salary until he went to Mannheim) and that of Mannheim; at Jastrow's request the latter released him. A few months after his return to Warsaw (Jan., 1863) the revolution broke out. During its progress, and while Jastrow was traveling, his Prussian passport was canceled, and he was not permitted to return to Warsaw.

The literary results of his Polish period are: "Die Lage der Juden in Polen" (anonymous; Hamburg, 1859); "Kazania Polskie," a volume of Polish sermons (Posen, 1863); "Die Vorläufer des Polnischen Aufstandes" (anonymous; Hamburg, 1864). He probably had a considerable share in the production of "Beleuchtung eines Ministeriellen Gutachtens" (Hamburg, 1859 [?]). In July, 1864, Jastrow accepted a call to Worms as district rabbi, and while there he produced "Vier Jahrhunderte aus der Gesch. der Juden von der Zerstörung des Ersten Tempels bis zur Makkabäischen Tempelweihe" (Heidelberg, 1865).

Aids Organization of American Jews.

In the autumn of 1866 he went to Philadelphia as rabbi of the German-Hebrew Congregation Rodeph Shalom, with which he was connected until his death, remaining in active service until 1892 and identifying himself with the interests of the Jewish community. The problem under discussion at the time was organization, urged in the Eastern States by Isaac Leeser, and in the Western by Isaac M. Wise. It dealt with higher education, representation, and the regulation of liturgical changes, and Jastrow's personality became a factor in its solution. When, through the exertions of Isaac Leeser, the Maimonides College was opened at Philadelphia, Oct., 1867, Jastrow occupied the chair of religious philosophy and Jewish history, and later also of Biblical exegesis; he was identified with the college until it closed its doors. He supported the plan of organizing the Board of Delegates of Civil and Religious Rights, and, under its auspices, the American Jewish Publication Society (1873). His main activity, however, from 1867 to 1871, was directed toward combating the tendencies expressed in the resolutions of the rabbinical conferences of 1869 and 1871. His opposition to them found expression in a series of polemical articles published in "The Hebrew Leader" and "The Jewish Times."

To the same period belongs his collaboration with Benjamin Szold in the revision of the latter's prayer-book ("'Abodat Yisrael") and home prayer-book ("Hegyon Leb"), and his translation of the same prayer-books into English. In his own congregation his influence effected consolidation and growth; in the Jewish community he participated in the formation and reorganization of societies.

In 1876 Jastrow fell severely ill, and for some years his public activities were limited by his poor health, which necessitated a sojourn in the south of Europe. During this period of withdrawal he fully matured the plans for his great work, "A Dictionary of the Targumim, the Talmud Babli and Yerushalmi, and the Midrashic Literature" (London and New York, 1886–1903). When the dictionary was approaching completion in manuscript (1895), the Jewish Publication Society of America was about to begin work on its projected new translation of the Bible into English, and to Jastrow was entrusted the chief-editorship. At the time of his death the translation of more than half the books of the Bible had been revised by him. In addition to these two great undertakings, he was a member of the Publication Committee of the Jewish Publication Society from the time of its establishment, and was connected with the Jewish Encyclopedia as editor of the department of the Talmud; he took a prominent part in the proceedings of the Jewish Ministers' Association, held a seat in the central board of the Alliance Israélite Universelle at Paris, was on the committee of the Meḳiẓe Nirdamim, was one of the vice-presidents of the American Federation of Zionists, and was active in relieving the needs, material and intellectual, of the Russian immigrants.

In 1900 the University of Pennsylvania conferred upon him the doctorate of literature.

Besides the journals previously mentioned, articles of his appear in the "Revue des Etudes Juives"; Frankel's "Monatsschrift"; Berliner's "Magazin für die Wissenschaft des Judenthums"; "Sippurim"; "Journal of Biblical Literature"; "Hebraica"; "Young Israel"; "Libanon"; "Jewish Record"; "Jewish Messenger"; "American Hebrew"; "Jewish Exponent"; etc.

Bibliography: M. Jastrow, *Bär Meisels, Oberrabbiner zu Warschau, Ein Lebensbild auf Historischem Hintergrunde nach Eigner Anschauung Entworfen*, in *Hebrew Leader*, April 1–July 1, 1870; *Jewish Exponent*, Oct. 16, 1903.

A. H. S.

JASTROW, MORRIS, JR.: American Orientalist and librarian; son of Marcus Jastrow; born Aug. 13, 1861, at Warsaw, Poland. His family removed to the United States in 1866, and settled in Philadelphia. Morris received his early education chiefly at private schools until, in 1877, he entered the University of Pennsylvania. He graduated from that university in 1881, and shortly afterward went to Europe with the intention of studying for the Jewish ministry. He entered the seminary at Breslau and at the same time took up the study of Oriental languages at the university there. In 1884 he received the degree of Ph.D. at Leipsic, and spent another year in Europe, continuing his studies in Paris and Strasburg. On his return to America he occupied the post of lecturer to his father's congregation for a year, but at the expiration of that period determined to leave the ministry. He was elected to the chair of Semitic languages in the University of Pennsylvania in 1892, a position he still (1904) holds; in 1898 he accepted the post of librarian of that university.

Jastrow is the author of "Religion of the Babylonians and Assyrians" (Boston, 1898), of which a revised edition in German is now appearing under the title "Die Religion Babyloniens und Assyriens" (1902 *et seq.*). He published also: "A Fragment of the Babylonian Dibbarra Epic" (Boston, 1891); the Arabic text of the two grammatical treatises of Abu Zakariyya Ḥayyuġ (Leyden, 1897); and "The Study of Religion" (London and New York, 1902). His literary activity has embraced the editing of "Selected Essays of James Darmesteter," translated by Helen Bachman Jastrow (Boston, 1895). He is the editor of a series of handbooks on the history of religion, of which three have appeared (1903), and has contributed numerous articles to the journals for Oriental languages and to the transactions of various learned societies in America and Europe.

A. F. H. V.

JATIVA or **XATIVA** (Hebrew שאטיבה; not identical with Setif, Algeria; Gross, "Gallia Judaica," p. 289): City in the kingdom of Valencia. The Jews of this locality were granted special privileges by Don Jaime, the conqueror of Valencia. He gave them houses and fields, and allotted them a street as a special quarter. In 1267 the bailiff of the city was ordered by the king to see that the Jews were not insulted or injured in their property. In 1320 they received permission to rebuild their synagogue. In 1336, when their privileges were renewed, they were so poor that they could no longer pay their taxes, which in 1274 had amounted to 600 sueldos. In the year of terror, 1391, the congregation dissolved, its members being either murdered or forced to accept baptism.

Here lived one Isaac ben Janaḥ, who in 1273 was freed of all taxes for five years. In the last third of the fourteenth century Phinehas ben Salaṃis of Lünel was rabbi of Jativa. He, as well as Rabbi Ḥabib and the aged scholar Ḥayyim ben Vivas, both of whom also resided in Jativa, corresponded with Isaac ben Sheshet.

G. M. K.

JAVAL, EMILE: French physician and deputy; born May 5, 1839, at Paris; son of Leopold Javal. Emile studied both medicine and mineralogy (M.D. 1868); he devoted himself specially to ophthalmology, and invented an ingenious method for the diagnosis of astigmatism. He became one of the leading authorities on strabismus; and in 1877 he was appointed director of the ophthalmological laboratory of the Sorbonne. On July 28, 1885, he was elected member of the Academy of Medicine. In January of the same year he had been returned by a large majority as the Republican member for the district of Sens, and he sat on the benches of the Republican Union. At the general elections of the following October he was sent to the Chamber of Deputies by the department of Yonne. Here he opposed the Panama scheme. He did not offer himself for reelection in 1889. Javal is an officer of the Legion of Honor. In 1900 he was stricken with blindness.

Among his published works are the following: "Du Strabisme dans ses Applications à la Physiologie de la Vision," 1868; "Hygiène des Ecoles Maternelles et des Ecoles Primaires," 1884; "Mémoires d'Ophthalmometrie" (translated into four languages); "Manuel du Strabisme," 1894. Javal translated Helmholtz's "Handbuch der Physiologischen Optik."

Bibliography: Vapereau, *Dict.*; *La Grande Encyclopédie.*

S. V. E.

JAVAL, ERNEST LEOPOLD: French administrative officer; born Sept. 25, 1843, at Paris; died there Sept. 1, 1897; son of Leopold Javal. He was a lieutenant in the Gardes Mobiles during the Franco-Prussian war (1870–71). In 1877 he was appointed successively subprefect of Boussac and Aubusson; in 1880, of Lunéville; in 1881, of Doucie

(June 27) and Guéret (July 30), and in the same year he became prefect of the department La Creuse at Guéret; in 1883, inspector of administrative service in the Ministry of the Interior; and in 1885, director of the Institution Nationale des Sourds-Muets. As a result of observations made during a prolonged visit to America, he introduced in the institution various innovations, including manual training and the oral method of instructing deaf-mutes. He was made a chevalier of the Legion of Honor in 1888.

S. J. Ka.

JAVAL, LEOPOLD: French politician; born at Mülhausen Dec. 1, 1804; died at Paris March 28, 1872. The son of a wealthy merchant, he entered the army and became a sublieutenant; as such he took part in the expedition against Algiers (1830). He subsequently resigned his commission and returned to France, where he interested himself in financial matters. Javal helped to establish in Paris the first omnibuses, which were known as "Orléanaises" and "Favorites." He became a bank director and established a model farm at Vauluisant; for planting pine trees in certain sandy plains he gained a gold medal at the Exposition of 1855, and he was awarded the cross of an officer of the Legion of Honor after the London Exhibition of 1863. Javal also took a prominent part in establishing the Alsatian railways.

In 1857 Javal was elected to the legislature as deputy for the Yonne department, and he consistently advocated free trade. He was reelected in 1863 and 1869, voted with the Left, opposed the Plébiscite, and aided Thiers and E. Picard in proclaiming the republic. The Yonne department sent him to the National Assembly in Feb., 1871. Javal represented the Jews of Alsace at the Central Consistory of Paris.

S. V. E.

JAVAN (יון): Name of one of the seven sons of Japheth, given in the list of nations (Gen. x. 2, 4; comp. I Chron. i. 5, 7), and as such the progenitor of Elisha, Tarshish, the Hittim, and the Dodanim (Rodanim). The word corresponds to the Greek *'Ιάων*, the plural of which is *'Ιάονες*, with the digamma between the *a* and *o* (see Homer's "Iliad," xiii. 685). The Greek name denotes the Ionians, settled, when the list of Genesis was written, on the mainland of Greece and on the islands of the Ægean Sea as well as along the coast of Asia Minor. The Greeks were designated by this name in Assyrian ("Ya-wa-nu" [Greece], "Yawnai" [Greek]; Schrader, "K. A. T." 2d ed., pp. 87 *et seq.*) and in Old Persian, and the name was used in this sense by the Syrians, the Arabs, and the Egyptians. The question is still open whether in the Old Testament "Javan" connotes the Greeks, in keeping with this usage of other ancient peoples, or merely the Ionians proper. According to Stade ("De Populo Javan," Giessen, 1880), the term stands for the Ionians of Asia Minor in all pre-Persian passages of the Old Testament (*e.g.*, Ezek. xxvii. 13; Isa. lxvi. 19, and therefore also in Gen. x. 2, 4). It has the wider significance in Joel iii. 6 (Persian age), Zech. ix. 13, and Dan. viii. 21.

In these passages the context shows merely that a distant country is meant (Isa. lxvi. 19) into which Israelites were sold as slaves (by the Phenicians and Philistines; Joel iii. 6). Something of this kind is certainly also referred to in Zech. ix. 13; in fact Ezekiel (xxvii. 13) speaks of "Ionian" (or Greek) slave-trading in the markets of Tyre. In Ezek. xxvii. 19 the word "Javan" is either a corruption of the text (in view of the circumstance that in verse 13 it is used in a clearly different meaning from that required here; see Cornill, "Ezekiel," pp. 351 *et seq.*), or it designates an Arabic people. Glaser ("Skizze der Gesch. und Geographie Arabiens," ii. 428) suggests that in this verse it is the name of the place called "Jain," not very far from Medina.

In Talmudic literature "Javan" stands unquestionably for Greece (*e.g.*, in Yoma 10a); "lashon Yewanit" means the Greek language. In late Hebrew "Javan" denotes the Russians, because they belong to the Greek Catholic Church; therefore Nathan Nate Hanover calls his description of the Chmielnicki persecution "Yewen Meẓulah," punning on Ps. lxix. 3. In Yiddish literature and in the parlance of the Russian Jews "Javan" (pronounce "Yoven") denotes the soldier. So Perez in his sketch "Der Meshullaḥ": "Bei Yoven is a gut Cheder" = "Military service is a good training."

E. G. H.

JAWLIKAR, SAMUEL ISAAC: Beni-Israel; born about 1820 in Bombay. He enlisted in the Third Bombay Native Light Infantry April 4, 1840; was promoted jemidar Jan. 1, 1855; native adjutant March 19, 1855; subahdar Feb. 1, 1862; and subahdar-major May 12, 1869. He was admitted to the second class of the Order of British India Dec. 10, 1869, and to the first class Jan., 1877. He served with the Bombay column of the army of the Punjab 1848-49, was present during the siege of Multan from Dec. 27, 1848, to Jan. 22, 1849, and was present at the storming of Mundi Ava at Multan (Dec. 27, 1848). He was with the reserve brigade at the attack of the city of Multan Jan. 2, 1849, and at the battle of Gujarah Feb. 21, 1849, and accompanied General Gilbert's force in pursuit of the Sikh army under Shere Sing, witnessing its surrender at Hoormuck March 10, 1849. He next proceeded in pursuit of the Afghan army, then stationed at Peshawur. For the above services Jawlikar won the Punjab medal with two bars.

Jawlikar served also with the field force which penetrated the Eussufzee country north of Peshawur in Dec., 1849, for the purpose of chastising the hill tribes on the Swat border, and was present at the capture and destruction of the villages of Sujas, Pullival, Shairkhanee, and Zoorumundee in the Bazdurrah valley, for which he was awarded a medal and bar. He was in garrison at Canton, China, 1860-61, and gained a medal in the Abyssinian campaign of 1868.

Jawlikar after his retirement from the army became treasurer of the Thana Synagogue.

JEBUS. See Jerusalem.

JEBUSITES (יבוסי, היבסי, היבוסי).—**Biblical Data:** One of the nations that occupied Palestine at the time of the invasion of the Israelites. In the list of the sons of Canaan, the Jebusite occupies the third place, between Heth and the Amorite (Gen. x. 15, 16; I Chron. i. 13, 14). This is also its position in Num. xiii. 29; in Josh. xi. 3, however, the Jebusite is mentioned between the Perizzite and the Hivite. On the other hand, in the oft-repeated enumeration of the tribes that occupied the land of Canaan, the Jebusite comes always at the end (Gen. xv. 21; Ex. iii. 8).

The Jebusites, stated to have dwelt in the mountains (Num. xiii. 29; Josh. xi. 3), were a warlike people. At the time of Joshua's invasion the capital of the Jebusites was Jerusalem, called also "Jebus" (Judges xix. 10, 11; II Sam. v. 6), whose king Adoni-zedek organized a confederacy against Joshua. Adoni-zedek was defeated at Beth-horon, and he himself was slaughtered at Makkedah (Josh. x. 1-27); but the Jebusites could not be driven from their mountainous position, and they dwelt at Jerusalem with the children of Judah and Benjamin (Josh. xv. 63; Judges i. 21).

The Jebusites contested David's entrance into Jerusalem (II Sam. v. 6-8). Later a notable Jebusite, Araunah, or Ornan, sold his thrashing-floor to David for the erection of an altar (II Sam. xxiv. 18-24; I Chron. xxi. 18-25). The Jebusites as well as the other tribes that had not been exterminated were reduced to serfdom by Solomon (I Kings ix. 20, 21). In the expression of Zechariah, "and Ekron will be as a Jebusite" (Zech. ix. 7), "Jebusite" must be taken to mean "Jerusalemite."

E. G. H. M. Sel.

——**In Rabbinical Literature:** The Jebusites, who are identical with the Hittites, derived their name from the city of Jebus, the ancient Jerusalem, which they inhabited. Within their territory lay the cave of Machpelah, which Abraham wished to buy. But they said to him: "We know that God will give this country to your descendants. Now, if you will make a covenant with us that Israel will not take the city of Jebus against the will of its inhabitants, we will cede to you the cave and will give you a bill of sale." Abraham, who was very anxious to obtain this holy burial-place, thereupon made a covenant with the Jebusites, who engraved its contents on bronze. When the people of Israel came into the promised land they could not conquer Jebus (comp. Judges i. 21) because the bronze figures, with Abraham's covenant engraved thereon, were standing in the center of the city.

The same was the case later with King David, to whom the Jebusites said: "You can not enter the city of Jebus until you have destroyed the bronze figures on which Abraham's covenant with our ancestors is engraved." David thereupon promised a captaincy to the person who should destroy the figures; and Joab secured the prize (comp. II Sam. v. 6; I Chron. xi. 6). David then took the city of Jebus from its owners; the right of appeal to the covenant with Abraham had been forfeited by them through the war they had waged against Joshua; and after the figures themselves had been destroyed, David had not to fear even that the people would reproach him with having broken the covenant. Nevertheless he paid the inhabitants in coin the full value of the city (comp. II Sam. xxiv. 24; I Chron. xxi. 25), collecting the money from all the tribes of Israel; so that the Holy City became their common property (Pirḳe R. El. xxxvi.; comp. David Luria's notes in his commentary *ad loc.*; on the money paid for Jerusalem, comp. Midr. Shemu'el xxxii., beginning; Sifre, Num. 42; Zeb. 16b).

According to a midrash quoted by Rashi on II Sam. v. 6, the Jebusites had in their city two figures—one of a blind person, representing Isaac, and one of a lame person, representing Jacob—and these figures had in their mouths the words of the covenant made between Abraham and the Jebusites.

JEDAIAH PENINI. See Bedersi, Jedaiah ben Abraham.

JEDIDAH: Mother of Josiah, King of Judah; daughter of Adaiah of Boscath, and wife of Amon (II Kings xxi. 26, xxii. 1). The name means "beloved."

E. G. H. I. M. P.

JEDIDIAH (GOTTLIEB) BEN ABRAHAM ISRAEL: Galician preacher and Masorite; lived at Lemberg in the seventeenth century. He wrote: "Ahabat ha-Shem," fifty haggadic expositions on Deut. x. 12 (Cracow, 1641; Lublin, 1645); "Shir Yedidut," commentary on the Masorah, in four parts and in alphabetical order (*ib.* 1644).

D. S. Man.

JEDIDIAH BEN MOSES OF RECANATI (called also **Amadeo of Rimini ben Moses of Recanati**): Italian scholar; flourished in the second half of the sixteenth century. At the request of Immanuel di Fano, Jedidiah translated, in 1580, the "Moreh Nebukim" into Italian, under the title "Erudizione di Confusi." Parts of this translation, which is still extant in manuscript (Parma MS. No. 5), were published in 1892 by G. Sacerdote, under the title "Una Versione Italiana Inedita del Moreh," in the "Rendiconti della R. Accademia dei Lincei." Jedidiah is mentioned, together with other Italian rabbis, in a responsum of the sixteenth century (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2317). He was the author of a Hebrew-Italian vocabulary of the Bible, entitled "Sefer Turgeman" (*ib.* No. 1498). In a manuscript collection of letters (*ib.* No. 241) are two addressed by him to Eleazar ben Solomon of Camerino. Some mathematical notes of Jedidiah and a hymn beginning with אודך במו פי, in which the name of the author is given in acrostic, were in manuscript in the library of the late D. Kaufmann.

JEDIDJA. See Heinemann, Jeremiah; Periodicals.

JEDUTHUN: The name of one of the three great orders or gilds of Temple singers, in charge of the music of the Temple from David's day down into post-exilic times. In I Chron. xvi. 41, 42 Jeduthun is mentioned along with Heman as one of the musicians in service before the Ark of the Covenant; and also as the father of a class of doorkeepers (*ib.* xvi. 38, 42). In I Chron. xxv. 1, 6, and II Chron. v. 12 Jeduthun, Asaph, and Heman are mentioned as the three heads of the musical part of the Temple service. In II Chron. xxxv. 15 Jeduthun is called "the king's seer." In Neh. xi. 17 is mentioned the descendant of a Jeduthun engaged in service with the Levites. In I Chron. vi. 33, 39, 44, and xv. 17 the name "Ethan" seems to be used in place of "Jeduthun," and some scholars have devised a plan to show the possible philological identity of the two names.

The titles of three psalms (Ps. xxxix., lxii., and lxxvii.) contain the word "Jeduthun," possibly as indicating some kind of musical direction or instrument.

JEHIEL ANAW. See ANAW.

JEHIEL BEN ASHER: Liturgical poet; flourished in Andalusia in the fourteenth and fifteenth centuries. He was the author of four liturgical poems, mentioned by Zunz ("L. G." p. 520), and of a dirge of twenty-five strophes on the persecution of the Jews in Spain in 1391. Jehiel was also the author of a poetical work entitled "Ma'aseh 'Ugah," published, together with Profiat Duran's "Iggeret Al Tehi Ka-Aboteka," at Constantinople about 1577. Firkovich claims to have seen in the possession of a Karaite of Constantinople named Joseph Ḳimḥi a manuscript containing a poem by Jehiel, entitled "Ha-Rewayah."

JEHIEL B. JEKUTHIEL ANAW. See ANAW.

JEHIEL BEN JOSEPH OF PARIS: Tosafist and controversialist; born at Meaux at the end of the twelfth century; died in Palestine in 1286. His French name was **Sir Vives,** and in rabbinical literature he is variously designated as **Jehiel of Paris, Jehiel the Holy, Jehiel the Pious,** and **Jehiel the Elder.** He was one of the most distinguished disciples of Judah Sir Leon, whom he succeeded, in 1224, as head of the Talmudical school of Paris. This school was attended under Jehiel's direction by three hundred disciples, among whom were the later renowned tosafists Isaac of Corbeil (Jehiel's son-in-law), Perez ben Elijah of Corbeil, Yaḳar of Chinon, Meïr of Rothenburg, and many other well-known rabbis of the thirteenth century. Jehiel was held in great esteem even by non-Jews; and, without giving any credence to the legends that present him as Saint Louis' councilor, it is quite probable that he was favorably received at court. Jehiel's position as chief of the Jewish community of Paris forced him into many controversies with Christians. Thus he once had to combat the arguments of the chancellor of Paris, who pretended to prove by the Bible that Jews are compelled by the demands of their ritual to use Christian blood. On another occasion he debated with a friar who, on the strength of a misunderstood Biblical text, maintained that Jews could not, consistently with their belief, bear witness in courts of justice.

But these minor controversies were trivial in comparison with the disputation which, in the presence of Saint Louis and his court, he, together with two other rabbis, had to sustain in 1240 against the apostate Nicholas Donin, who denounced the Talmud as containing blasphemies against Christianity. The result of this controversy was, as was to be expected, the condemnation of the Talmud; but Jehiel displayed on that occasion great courage and dignity. At first he refused to enter into the discussion, alleging that the popes had assured independence to the Jews in their domestic affairs, and that the Talmud was the very essence of their lives. Then, being assured by the queen that the lives of the Jews were in no danger, he consented to answer any questions submitted to him, but positively refused to take an oath. After the controversy the state of the French Jews grew daily worse, and Jehiel had the mortification of seeing his son thrown into prison upon a baseless charge. He decided, therefore, together with his son to leave his native country for Palestine, where he stayed until his death.

Jehiel was the author of tosafot on the Talmudical treatises Berakot, Shabbat, Pesaḥim, Mo'ed Ḳaṭan, Beẓah, Yebamot, Ketubot, Baba Ḳamma, Ḥullin, Zebaḥim, and probably Menaḥot; but these tosafot are no longer in existence. By the later tosafists, Jehiel is mentioned as a Biblical commentator. He wrote also halakic decisions, several of which are cited by Mordecai ben Hillel and Meïr of Rothenburg and in "Orḥot Ḥayyim." See DISPUTATIONS; DONIN, NICHOLAS, OF LA ROCHELLE.

JEHIEL MICHAEL BEN ELIEZER: Rabbi at Nemirov, Russia; murdered May, 1648. When the hordes of Chmielnicki, taking Nemirov, began the work of pillage and massacre, a Cossack concealed Jehiel, hoping that the latter would show him where the Jews had hidden their wealth. A shoemaker, however, discovered Jehiel and his mother, dragged them to the cemetery, and murdered them. Jehiel was the author of a work entitled "Shibre Luḥot," containing homilies on several Sabbatic sections and the various Biblical readings given in the Talmud. The work was published posthumously at Lublin in 1680.

H. R. I. BR.

JEHIEL MICHAEL BEN JUDAH LÖB (known also as **Michael Ḥasid**): Rabbi of Berlin; died March, 1728. After filling the office of rabbi in several Polish communities he removed about 1701 to Berlin, where, with his brother-in-law Aaron, he was entrusted with the direction of the yeshibah founded by JOST LIEBMAN. When in 1713 Aaron was called to the rabbinate of Frankfort-on-the-Oder, Jehiel was nominated rabbi of Berlin.

This nomination was ratified by royal edict in 1714, which provided that when the rabbinate of Frankfort became vacant it would be annexed to that of Berlin. Accordingly on the death of Aaron in 1721 Jehiel's jurisdiction was extended to Frankfort. Jehiel was a Talmudist of high repute, and was well versed in Cabala. His predilection for Cabala was, indeed, so great that he blindly gave his approbation to the works of the Shabbethaian Ḥayyun. Jehiel, however, was not long in acknowledging his fault, and at the conference of rabbis held at Frankfort-on-the-Oder in 1726 he was the first to demand that a "ḥerem" should be launched against the followers of Shabbethai Ẓebi, and that all the cabalistic works published since 1666 in which Shabbethaian ideas were expressed should be put under the ban.

Jehiel's distrust of the Cabala became, indeed, so great that he abstained from publishing his own cabalistic works, fearing lest they might be interpreted in the Shabbethaian spirit. Jehiel wrote novellæ on Megillah (published with the text at Berlin in 1714) and on Rosh ha-Shanah (published in the 1726 Amsterdam edition of the Talmud). Other novellæ and homilies of his are scattered in various works of his contemporaries, such as the "Ḳol Yehudah" of Judah Glogau, the "Asifat Ḥakamim" of Israel Isserles, etc. He annotated the commentary on Canticles of his son-in-law Joel ben Jekuthiel Sachs, and wrote "Miklal Yofi," annotations on the haggadot found in the Jerusalem Talmud (published as a supplement to the "Yefeh Mareh" of Samuel Jaffe; Berlin, 1725–26). Jehiel left several cabalistic works in manuscript.

K. I. Br.

JEHIEL MICHAEL BEN UZZIEL OF GLOGAU: Rabbinical author; died in Vienna 1730. He was well versed in the Midrashim, and was the author of "Nezer ha-Ḳodesh," an extensive commentary on Midrash Rabbah, a part of which, namely, on the first section of Genesis, was published in Tessnitz 1718. Jehiel carried on a correspondence with Jacob Emden, as is mentioned in "She'elot Ya'beẓ," No. 2.

Bibliography: Azulai, *Shem ha-Gedolim*, i. 85; Fuenn, *Keneset Yisrael*, p. 521.

S. S. N. T. L.

JEHIEL OF PISA: Philanthropist and scholar of Pisa; died there Feb. 10, 1492. The wealth he had acquired in the banking business he spent liberally for charitable purposes. Himself a scholar, he extended his protection to Jewish learning. Johanan Alemanno, the teacher of Pico di Mirandola, seems to have lived for years in Jehiel's house. Jehiel was on intimate terms with Don Isaac Abravanel, with whom he carried on a correspondence. In 1472 Abravanel induced Lopo de Almeida and the physician Joao Sezira, Alfonso's ambassadors to the pope, to pay Jehiel a visit. They carried costly presents to Jehiel's wife from Abravanel, and valuable manuscripts, among which were copies of Abravanel's own works, to Jehiel.

The end of Jehiel's life was embittered by the apostasy of one of his daughters. On that occasion Abravanel wrote him a letter of consolation, in which he reminded him of the saying of the Rabbis (M. Ḳ. 20b) that the result of education is not dependent upon the merits of the parents: thorns grow in every field among the ears of corn.

Gedaliah ibn Yaḥya relates that most of Jehiel's fortune was spent in aiding the refugees of Spain. Jehiel's death was bewailed by the poets and writers of his time, such as Eliezer Ezra of Volterra, Solomon of Camerino, and the astronomer Abba Mari Ḥalfon.

G. I. Br.

JEHOAHAZ: **1.** Son of Jehu; second king in the fifth dynasty of northern Israel; reigned 814–797 B.C. During the period of his rule Syria under Hazael and Ben-hadad became particularly aggressive (II Kings xiii. 1–9, 22); Israel's army was reduced to a mere handful of troops (*ib.* xiii. 7); and the land was practically at the mercy of the Syrians, as foretold by Elisha the prophet (*ib.* viii. 12). Israel's religious decline is likewise noted, in the continuation of the abominations of Asherah worship in Samaria (*ib.* xiii. 6). The humility of Jehoahaz and his appeal to Yhwh call forth the statement that a savior was given and Israel was released from its oppression. Just when that savior appeared or who he was is not determined. But in II Kings xiii. 25, xiv. 27, Jehoahaz's son Joash and his grandson Jeroboam II. would seem to fulfil the requirements. It is also true that Adad-nirari III., King of Assyria (812–783 B.C.), made campaigns into the west (804–797), and on one of the incursions captured and sacked the city of Damascus, and thus removed the worst enemy of Israel's prosperity (Schrader, "K. A. T." 3d ed., p. 260).

Bibliography: Commentaries on *Kings*; histories of Israel by Stade, Guthe, and Winckler (i. 154); Goodspeed, *Hist. of Assyria and Babylonia*; J. F. McCurdy, *History, Prophecy, and the Monuments*; Price, *Monuments and Old Testament*, §§ 140–142.

2. (Called also **Shallum.**) Third son of Josiah, King of Judah (II Kings xxiii. 31, 36). In I Chron. iii. 15 Shallum is named as the fourth son of Josiah; but the ages given of those who became king show that Zedekiah (II Kings xxiv. 18) was the youngest. The identity of Jehoahaz and Shallum seems to be established by the evidence of the chronicler above indicated and of Jer. xxii. 11. The change to the more dignified regal name may have been made at his coronation. Immediately upon the death of Josiah at the hands of Necho in 608 B.C., the people of the land took Jehoahaz and anointed him king in the place of his father, although he was not the first in the line of succession. This fact attests the popularity of the young man, and probably also his political affiliations or policy, as being in line with those of his father. At any rate his disposition (Ezek. xix. 2–4) was such that Necho had him seized and carried to Riblah in the plains of Hamath, the seat of Necho's authority. Jehoahaz's elder brother Eliakim, under his new name "Jehoiakim," was enthroned under Egyptian suzerainty; and the land was laid under tribute to Egypt's coffers. The captive king, Jehoahaz, was carried prisoner to Egypt (Ezek. xix. 4), and he here disappears from history, mourned as having gone never to return to his native land (Jer. xxii. 10-12).

Bibliography: Commentaries on *Kings* and *Chronicles*; and the histories of Israel mentioned above.

3. Name, occurring in two passages in II Chronicles (xxi. 17, xxv. 23), for Ahaziah, King of Judah. Etymologically the names "Aḥazyah" and "Yeho'aḥaz" are one and the same; the element "Yah" following in the one case, and the longer "Yeho" preceding in the other. See Ahaziah.

E. G. H. I. M. P.

JEHOASH. See Joash.

JEHOIACHIN.—Biblical Data: King of Judah; son and successor of Jehoiakim (II Kings xxiv. 6); reigned a little over three months. He was scarcely on the throne when Jerusalem was besieged by Nebuchadnezzar, King of Babylon. Unable to resist, he soon surrendered with the queen-mother Nehushta, the servants, captains, and officers. With these he was sent captive to Babylon. The treasures of the palace and the sacred vessels of the Temple were also carried away. For thirty-six years Jehoiachin remained in prison at Babylon, his throne having been given by Nebuchadnezzar to Mattaniah (son of Josiah), whose name was changed to "Zedekiah" (*ib.* xxiv. 11-17; II Chron. xxxvi. 9-10; Jer. xxxvii. 1). When Nebuchadnezzar died, his son Evil-merodach released Jehoiachin and gave him an honorable seat at his own table (II Kings xxv. 27-30; Jer. lii. 31-34).

E. G. H. B. P.

——**In Rabbinical Literature:** Jehoiachin was made king in place of his father by Nebuchadnezzar; but the latter had hardly returned to Babylon when some one said to him, "A dog brings forth no good progeny," whereupon he recognized that it was poor policy to have Jehoiachin for king (Lev. R. xix. 6; Seder 'Olam R. xxv.). In Daphne, near Antiochia, Nebuchadnezzar received the Great Sanhedrin, to whom he announced that he would not destroy the Temple if the king were delivered up to him. When the king heard this resolution of Nebuchadnezzar he went upon the roof of the Temple, and, turning to heaven, held up the Temple keys, saying: "As you no longer consider us worthy to be your ministers, take the keys that you have entrusted to us until now." Then a miracle happened; for a fiery hand appeared and took the keys, or, as others say, the keys remained suspended in the air where the king had thrown them (Lev. R. *l.c.*; Yer. Sheḳ. vi. 50a; other versions of the legend of the keys are given in Ta'an. 29a; Pesiḳ. R. 26 [ed. Friedmann, p. 131a], and Syriac Apoc. Baruch, x. 18). The king as well as all the scholars and nobles of Judah were then carried away captive by Nebuchadnezzar (Seder 'Olam R. *l.c.*; compare Ratner's remark *ad loc.*). According to Josephus, Jehoiachin gave up the city and his relatives to Nebuchadnezzar, who took an oath that neither they nor the city should be harmed. But the Babylonian king broke his word; for scarcely a year had elapsed when he led the king and many others into captivity.

Jehoiachin's sad experiences changed his nature entirely, and as he repented of the sins which he had committed as king he was pardoned by God, who revoked the decree to the effect that none of his descendants should ever become king (Jer. xxii. 30; Pesiḳ., ed. Buber, xxv. 163a, b); he even became the ancestor of the Messiah (Tan., Toledot, 20 [ed. Buber, i. 140]). It was especially his firmness in fulfilling the Law that restored him to God's favor. He was kept by Nebuchadnezzar in solitary confinement, and as he was therefore separated from his wife, the Sanhedrin, which had been expelled with him to Babylon, feared that at the death of this queen the house of David would become extinct.

They managed to gain the favor of Queen Semiramis, who induced Nebuchadnezzar to ameliorate the lot of the captive king by permitting his wife to share his prison. As he then manifested great self-control and obedience to the Law, God forgave him his sins (Lev. R. xix., end). Jehoiachin lived to see the death of his conqueror, Nebuchadnezzar, which brought him liberty; for within two days of his father's death Evil-merodach opened the prison in which Jehoiachin had languished for so many years.

Jehoiachin's life is the best illustration of the maxim, "During prosperity a man must never forget the possibility of misfortune; and in adversity must not despair of prosperity's return" (Seder 'Olam R. xxv.). On the advice of Jehoiachin, Nebuchadnezzar's son cut his father's body into 300 pieces, which he gave to 300 vultures, so that he could be sure that Nebuchadnezzar would never return to worry him ("Chronicles of Jerahmeel," lxvi. 6). Evil-merodach treated Jehoiachin as a king, clothed him in purple and ermine, and for his sake liberated all the Jews that had been imprisoned by Nebuchadnezzar (Targ. Sheni, near the beginning). It was Jehoiachin, also, who erected the magnificent mausoleum on the grave of the prophet Ezekiel (Benjamin of Tudela, "Itinerary," ed. Asher, i. 66). In the Second Temple there was a gate called "Jeconiah's Gate," because, according to tradition, Jeconiah (Jehoiachin) left the Temple through that gate when he went into exile (Mid. ii. 6).

S. S. L. G.

JEHOIADA: High priest under Ahaziah, Athaliah, and Jehoash (Joash). By his marriage with the princess Jehosheba or Jehoshabeath, daughter of Jehoram, he became the brother-in-law of Ahaziah (II Chron. xxii. 11). After the death of Ahaziah at Megiddo, Athaliah slew all the royal family of Judah (II Kings ix. 27, xi. 1; II Chron. xxii. 10) with the exception of Jehoash (Joash), whom Jehoiada and his wife had stolen from among the king's sons and whom they kept hidden for six years in the Temple.

Athaliah, who had usurped the throne of Judah (842-836 B.C.), promoted the worship of Baal and produced disgust among those who adhered to the true worship. In the seventh year of her reign a great and enthusiastic assembly took place in the Temple which hailed Jehoash (Joash), whom Jehoiada had brought from his hiding-place, as the legal claimant to the throne of Judah. Under the guidance of Jehoiada, Baal-worship was renounced, the altar and temple of Baal were destroyed, and other measures were taken for the purification of the

Temple. Jehoiada died at the age of 130, "and was buried in the city of David among the kings, because he had done good in Israel, both toward God, and toward his house" (II Chron. xxiv. 16).

E. G. H. B. P.

JEHOIAKIM.—Biblical Data: King of Judah (608–597 B.C.); eldest son of Josiah, and brother and successor of Jehoahaz (Shallum), whom Pharaoh-necho had deposed. When placed on the throne, his name, originally "Eliakim," was changed to "Jehoiakim" (II Kings xxiii. 34). During his reign Nebuchadnezzar invaded Palestine, entered Jerusalem, and compelled Jehoiakim to pay tribute to him. After three years Jehoiakim rebelled against Nebuchadnezzar (*ib.* xxiv. 1), thereby bringing ruin upon himself and upon the country. Dying after a wicked reign of eleven years, he was buried "with the burial of an ass, drawn, and cast forth beyond the gates of Jerusalem" (Jer. xxii. 19). It was Jehoiakim who slew the prophet Uriah "and cast his dead body into the graves of the common people" (*ib.* xxvi. 23); and it was he also who impiously "cut with the penknife and cast into the fire" Jeremiah's roll of prophecies from which Jehudi had read three or four leaves to the king (*ib.* xxxvi. 23). Jehoiakim's history is briefly stated in II Kings xxiii. 34–xxiv. 6 and II. Chron. xxxvi. 4–8, which must be read in connection with Jer. xxii. 13–19, xxvi., xxxvi.

E. G. H. B. P.

——**In Rabbinical Literature:** Although Jehoiakim was Josiah's eldest son, he was passed over at the latter's death as being unworthy to be his father's successor, and his brother Jehoahaz mounted the throne in his place. Jehoahaz was publicly anointed king to offset his brother's claims to the throne (Seder 'Olam R. xxiv.; Hor. 11b; Ratner's objection *ad loc.* to Seder 'Olam was anticipated and answered by the Gemara). When, subsequently, Jehoiakim took the government, after Jehoahaz had been led captive to Egypt, he showed how little he resembled his pious father: he was a godless tyrant, committing the most atrocious sins and crimes. He lived in incestuous relations with his mother, daughter-in-law, and stepmother, and was in the habit of murdering men, whose wives he then violated and whose property he seized. His garments were of "sha'aṭnez," and in order to hide the fact that he was a Jew, he had made himself an epispasm by means of an operation, and had tattooed his body (Lev. R. xix. 6; Tan., Lek Leka, end; Midr. Aggadat Bereshit xlviii.; see also Sanh. 103b). He even boasted of his godlessness, saying, "My predecessors, Manasseh and Amon, did not know how they could make God most angry. But I speak openly; all that God gives us is light, and this we no longer need, since we have a kind of gold that shines just like the light; furthermore, God has given this gold to mankind [Ps. cxv. 16] and is not able to take it back again" (Sanh. *l.c.*).

When Jehoiakim was informed that Jeremiah was writing his Lamentations, he sent for the roll, and calmly read the first four verses, remarking sarcastically, "I still am king." When he came to the fifth verse and saw the words, "For the Lord hath afflicted her for the multitude of her transgressions" (Lam. i. 5), he took the roll, scratched out the names of God occurring therein, and threw it into the fire (M. Ḳ. 26a). No wonder then that God thought of "changing the world again into chaos," and refrained from doing so only because the Jewish people under this king were pious (Sanh. 103a). Yet punishment was not withheld. Nebuchadnezzar came with his army to Daphne, near Antiochia, and demanded from the Great Sanhedrin, whose members came to pay him their respects, that Jehoiakim be delivered to him, in which case he would not disturb the city and its inhabitants. The Sanhedrin went to Jehoiakim to inform him of Nebuchadnezzar's demand, and when he asked them whether it would be right to sacrifice him for their benefit, they reminded him of what David did in a similar case with the rebel Sheba (Lev. R. xix. 6).

Various opinions have been handed down concerning the circumstances of Jehoiakim's death, due to the difficulty of harmonizing the conflicting Biblical statements on this point (II Kings xxiv. 6; Jer. xxii. 18, 19; II Chron. xxxvi. 6). According to some, he died in Jerusalem before the Sanhedrin could comply with the demand made by Nebuchadnezzar, who therefore had to be content with the king's body, which was cast to him over the walls. Another version says that he died while being let down over the wall. Others, again, maintain that after leading him through the whole land of Judah, Nebuchadnezzar killed him, and then threw his corpse piecemeal to the dogs, or, as one version has it, put it into the skin of a dead ass (Lev. R. xix. 6; Seder 'Olam R. xxv., agreeing in part with Josephus, "Ant." x. 6, § 3; see also Jerome to Jer. xxii. 18, and NEBUCHADNEZZAR IN RABBINICAL LITERATURE).

Even this shameful death, however, was not to be the end of the dead king, upon whose skull were scratched the words, "This and one more." After many centuries the skull was found by a scholar before the gates of Jerusalem; he piously buried it, but as often as he tried to cover it the earth refused to hold it. He then concluded that it was the skull of Jehoiakim, for whom Jeremiah had prophesied such an end (Jer. xxii. 18); and as he did not know what to do with it, he wrapped it in a cloth and hid it in a closet. After a time his wife found it and showed it to a neighbor, who said: "Your husband had another wife before you whom he can not forget, and therefore he keeps her skull." Thereupon the wife threw it into the fire, and when her husband returned he knew what the enigmatical words "this and one more" meant (Sanh. 82a, 104a). Notwithstanding his many sins, Jehoiakim is not one of the kings who have no part in the future world (Sanh. 103b).

S. S. L. G.

JEHONADAB (JONADAB): Son of Rechab, a Kenite (I Chron. ii. 55), the founder of the so-called Rechabites (I Chron. ii. 55; Jer. xxxv. 6–7). The English versions transliterate everywhere in Jeremiah "Jonadab," although the Masoretic text reads thus in Jer. xxxv. 6, 10, 19 only. The name signifies "God promised or gave" (comp. "Chemoshnadab"). Jehonadab was contemporary with Jehu, King of Israel, whom he met on his way to the city of

Samaria, where he purposed to eradicate the worship of Baal. Jehu, discovering in him a ready ally, took him into his chariot, and on the way they concocted the scheme which ended with the massacre of the worshipers of Baal (II Kings x. 15–23). The good example set by Jehonadab was followed by his descendants, and in consequence a blessing was pronounced upon him and them by the prophet Jeremiah (Jer. xxxv. 18–19).

E. G. H. B. P.

JEHORAM (JORAM): 1. King of Israel (852–842 B.C.); son of Ahab and Jezebel; brother and successor of Ahaziah. Like his predecessors, Jehoram worshiped Baal. With Jehoshaphat and the King of Edom, Jehoram attacked Mesha, King of Moab. In the war between Syria and Israel, Elisha befriended Jehoram, revealing to him the plans of the enemy. Subsequently, when Ben-hadad besieged Samaria, reducing the city almost to starvation, Jehoram sought to kill the prophet. The latter, however, foretold a period of plenty, which quickly came, and the old relation between the king and the prophet was restored. When Hazael revolted in Damascus, as Elisha had predicted (II Kings viii. 12), Jehoram made an alliance with his nephew Ahaziah, King of Judah, the two kings going forth to take Ramoth-gilead from Syria. The project failed; Jehoram was wounded, and he withdrew to Jezreel to recover. Attacked by Jehu, the commander of the army in rebellion against Jehoram, he fell pierced by an arrow (see JEHU). With the death of Jehoram the dynasty of Omri became extinct.

E. G. H. B. P.

2. Fifth king of Judah; son of Jehoshaphat and grandson of Asa. He was first named as regent in 854 B.C., when his father went with Ahab to fight the Assyrians at Karkar (comp. II Kings i. 17, iii. 1, viii. 16). He was entrusted with the full reins of government in the twenty-third year (849 B.C.) of his father's reign, and he ruled eight years. The records of his reign are given in II Kings viii. 16–24, 27; and II Chron. xxi. After his father died, and he had secured himself in power, he slew his six brothers (to whom his father had given fenced cities and great wealth) and certain other influential men in Israel (II Chron. xxi. 2–4).

Jehoram took to wife Athaliah, daughter of Ahab of Israel, "and he walked in the way of the kings of Israel, as did the house of Ahab" (II Kings viii. 18, 27). His wickedness would have brought his people to destruction, except for the promise to David "to give him always a light, and to his children" (*ib.* viii. 19; comp. I Kings xi. 36, xv. 4). The Edomites, who apparently had been subservient to Judah since David's day (II Sam. viii. 14), revolted. Jehoram's attempt to force them to submit almost resulted in fatal disaster to his own troops. His army was surrounded, but under cover of night succeeded in cutting its way out and retreating to its own territory. About the same time Libnah revolted, and the Philistines and Arabians invaded the land of Judah, captured and sacked Jerusalem, and carried off all the royal household except Jehoahaz (Ahaziah; II Chron. xxi. 16, 17). During this time the king received a letter of warning from Elijah (*ib.* 12–15).

Jehoram's idolatry, viciousness, and general wickedness brought upon him an incurable disease. At the end of two years of intense suffering he died, unmourned, and despised by his own people. They "made no burning for him, like the burning of his fathers," and "they buried him in the city of David, but not in the sepulchres of the kings" (*ib.* xxi. 19, 20).

JEHOSHABEATH (called also **Jehosheba**): Daughter of Jehoram, King of Judah, and wife of the high priest Jehoiada, together with whom she saved her brother's son Joash from Athaliah (II Kings xi. 2; II Chron. xxii. 11).

E. G. H. B. P.

JEHOSHAPHAT: Son of Asa; fourth king of Judah (873–*c.* 849 B.C.); contemporary of Ahab, Ahaziah, and Jehoram, kings of Israel. He inaugurated a policy which was contrary to that pursued by his predecessors, by recognizing the conditions created by the division of the realm, and by entering into a close alliance with the Northern Kingdom. In execution of this policy, his son JEHORAM married Athaliah, Ahab's daughter (I Kings xxii. 51; I Chron. iii. 11; II Kings viii. 18; II Chron. xxi. 6). Jehoshaphat took part in the expedition undertaken by Ahab against the Arameans (I Kings xxii. 1 *et seq.*; II Chron. xviii. 3 *et seq.*), and together with JEHORAM of Israel waged war upon King MESHA of Moab (II Kings iii. 4 *et seq.*; comp. II Chron. xx. 1 *et seq.*, where the episode is embellished with religious and miraculous elements). He also had the ambition to emulate Solomon's maritime ventures to Ophir, and built a large vessel for Tarshish. But when this boat was wrecked at Ezion-geber he relinquished the project (I Kings xxii. 48 *et seq.*; II Chron. xx. 35 *et seq.*).

In I Kings xxii. 43 the piety of Jehoshaphat is briefly dwelt on. Chronicles, in keeping with its tendency, elaborates this trait of the king's character. According to its report (II Chron. xvii. 7 *et seq.*, xix. 4 *et seq.*) Jehoshaphat organized a missionary movement by sending out his officers, the priests, and the Levites to instruct the people throughout the land in the Law of YHWH, the king himself delivering sermons. Ecclesiastical and secular jurisdictions, according to II Chron. xix. 11, were by royal command kept distinct.

Underlying this ascription to the king of the purpose to carry out the Priestly Code, is the historical fact that Jehoshaphat took heed to organize the administration of justice on a solid foundation, and was an honest worshiper of YHWH. In connection with this the statement that Jehoshaphat expelled the "Ḳedeshim" (R. V. "Sodomites") from the land (I Kings xxii. 46) is characteristic; while II Chron. xix. 3 credits him with having cut down the Asherot. The report (II Chron. xvii. 6) that he took away the "high places" (and the Asherim) conflicts with I Kings xxii. 44 (A. V. v. 43) and II Chron.

xx. 33. The account of Jehoshaphat's tremendous army (1,160,000 men) and the rich tribute received from (among others) the Philistines and the Arabs (II Chron. xvii. 10 *et seq.*) is not historical. It is in harmony with the theory worked out in Chronicles that pious monarchs have always been the mightiest and most prosperous.

JEHOSHAPHAT, VALLEY OF: A valley mentioned by the prophet Joel (Joel iv. [A. V. iii.] 2, 12), where, after the return of Judah and Jerusalem from the Captivity, Yhwh would gather all the heathen and would sit in judgment on their misdeeds to Israel. On account of the significance of the name "Jehoshaphat" ("Yhwh judges") some commentators and translators have thought the designation "Valley of Jehoshaphat" to represent only an imaginary locality. Thus Theodotion renders *τὴν χώραν τῆς κρίσεως* ("the land of judgment"); Targum Jonathan, מישר פלוג דינא ("the plain of the settlement of judgment"). The name is first met with in the fourth century of the common era, having been applied by the unknown Pilgrim of Bordeaux in 333. It has since continued to be so used among Jews, Christians, and Mohammedans, who identify it with the valley of Kidron (the present Wadi Sitti Maryam, which separates Jerusalem from the Mount of Olives, and through which at one time the stream Kidron flowed), and believe that the Last Judgment will be held there. According to the Midrash Tehillim (viii.; quoted by Neubauer, "G. T." p. 51) no "valley called Jehoshaphat" exists (ואין עמק ששמו יהושפט).

JEHOVAH: A mispronunciation (introduced by Christian theologians, but almost entirely disregarded by the Jews) of the Hebrew "Yhwh," the (ineffable) name of God (the Tetragrammaton or "Shem ha-Meforash"). This pronunciation is grammatically impossible; it arose through pronouncing the vowels of the "ḳere" (marginal reading of the Masorites: אֲדֹנָי = "Adonay") with the consonants of the "ketib" (text-reading: יהוה = "Yhwh")—"Adonay" (the Lord) being substituted with one exception wherever Yhwh occurs in the Biblical and liturgical books. "Adonay" presents the vowels "shewa" (the composite ◌ֲ under the guttural א becomes simple ◌ְ under the י), "ḥolem," and "ḳameẓ," and these give the reading יְהֹוָה (= "Jehovah"). Sometimes, when the two names יהוה and אדני occur together, the former is pointed with "ḥatef segol" (◌ֱ) under the י—thus, יֱהֹוִה (= "Jehovah")—to indicate that in this combination it is to be pronounced "Elohim" (אֱלֹהִים). These substitutions of "Adonay" and "Elohim" for Yhwh were devised to avoid the profanation of the Ineffable Name (hence יהוה is also written ה׳, or even ד׳, and read "ha-Shem" = "the Name").

The reading "Jehovah" is a comparatively recent invention. The earlier Christian commentators report that the Tetragrammaton was written but not pronounced by the Jews (see Theodoret, "Question. xv. in Ex." [Field, "Hexàpla," i. 90, to Ex. vi. 3]; Jerome, "Præfatio Regnorum," and his letter to Marcellus, "Epistola," 136, where he notices that "PIPI" [= ΠΙΠΙ = יהוה] is presented in Greek manuscripts; Origen, see "Hexapla" to Ps. lxxi. 18 and Isa. i. 2; comp. concordance to LXX. by Hatch and Redpath, under ΠΙΠΙ, which occasionally takes the place of the usual *κύριος*, in Philo's Bible quotations; *κύριος* = "Adonay" is the regular translation; see also Aquila).

"Jehovah" is generally held to have been the invention of Pope Leo X.'s confessor, Peter Galatin ("De Arcanis Catholicæ Veritatis," 1518, folio xliii.), who was followed in the use of this hybrid form by Fagius (= Büchlein, 1504–49). Drusius (= Van der Driesche, 1550–1616) was the first to ascribe to Peter Galatin the use of "Jehovah," and this view has been taken since his days (comp. Hastings, "Dict. Bible," ii. 199, *s.v.* "God"; Gesenius-Buhl, "Handwörterb." 1899, p. 311; see Drusius on the tetragrammaton in his "Critici Sacri," i. 2, col. 344). But it seems that even before Galatin the name "Jehovah" had been in common use (see Drusius, *l.c.* notes to col. 351). It is found in Raymond Martin's "Pugio Fidei," written in 1270 (Paris, 1651, iii., pt. ii., ch. 3, p. 448; comp. T. Prat in "Dictionnaire de la Bible," *s.v.*). See also Names of God.

The pronunciation "Jehovah" has been defended by Stier ("Hebr. Lehrgebäude") and Hölemann ("Bibelstudien," i.).

The use of the composite "shewa" "ḥatef segol" (ֱ) in cases where "Elohim" is to be read has led to the opinion that the composite "shewa" "ḥatef pataḥ" (ֲ) ought to have been used to indicate the reading "Adonay." It has been argued in reply that the disuse of the "pataḥ" is in keeping with the Babylonian system, in which the composite "shewa" is not usual. But the reason why the "pataḥ" is dropped is plainly the non-guttural character of the "yod"; to indicate the reading "Elohim," however, the "segol" (and "ḥirek" under the last syllable, *i.e.*, יֱהֹוִה) had to appear in order that a mistake might not be made and "Adonay" be repeated. Other peculiarities of the pointing are these: with prefixes ("waw," "bet," "min") the voweling is that required by "Adonay": "wa-Adonay," "ba-Adonay," "me-Adonay." Again, after "Yhwh" (= "Adonay") the "dagesh lene" is inserted in בגדכפת, which could not be the case if "Jehovah" (ending in ה) were the pronunciation. The accent of the cohortative imperatives (קומה , שׁוּבָה), which should, before a word like "Jehovah," be on the first syllable, rests on the second when they stand before יהוה, which fact is proof that the Masorites read "Adonay" (a word beginning with "a").

JEHOVAH-JIREH (יהוה יראה = "Yhwh seeth"): Name given by Abraham to the place where he sacrificed a ram instead of his son Isaac (Gen. xxii. 14). The name may be an allusion either to Gen. xxii. 8 or, as is the opinion of the commentators, to the future importance of the place on which the Temple was to be built by Solomon. The Targumim do not regard "Jehovah-jireh" as a proper name.

E. G. H. M. Sel.

JEHU (Assyrian, Ja'ua): **1.** Son of Jehoshaphat and grandson of Nimshi, founder of the fifth Israelitish dynasty (842–743 b.c.); died 815 b.c., in the twenty-eighth year of his reign. A commander of troops (II Kings ix. 5–14, 25), with the cooperation of the prophetic party intent upon making an end of Baal-worship and the Phenician atrocities in vogue in the Northern Kingdom under Jezebel's influence (I Kings xix. 16; II Kings ix. 1; see Elijah; Elisha), Jehu, profiting by the absence of King Jehoram, who had gone to Jezreel to be healed of the wounds which the Syrians had inflicted on him at Ramah (II Kings viii. 29), had himself proclaimed king by the soldiers in garrison at Ramoth-gilead (*ib.* ix. 13). Taking precautions that the news should not leak out, Jehu hastened to Jezreel, where he met Jehoram in company with his visitor Ahaziah, King of Judah, who had come out to greet him. Jehu slew Jehoram with his own hands, casting the body into a portion of the field of Naboth; while Ahaziah, overtaken in flight, was mortally smitten at his command (*ib.* ix. 21–27). Jezebel was by his orders thrown out of the window by the eunuchs, and he trod her under foot, leaving her body to be "as dung upon the face of the field" (*ib.* ix. 30–37).

His next care was to exterminate the house of Ahab and its adherents (*ib.* x.). Meeting, on his triumphal march to Samaria, Ahaziah's brethren, he caused them to be put to death (*ib.* x. 13–15); and in Samaria he continued his policy of annihilating Ahab's family and party (*ib.* x. 17). True to the intentions of the prophetic partizans, aided by Jehonadab, the son of Rechab, he, pretending to be a worshiper of Baal, succeeded in gathering the priests, devotees, and prophets of Baal in Baal's temple, where he had them put to death by his soldiers, and then destroyed the sanctuary and the sacred pillars (*ib.* x. 18 *et seq.*). The "golden calves" at Dan and Beth-el he did not remove (*ib.* 29–31).

One of Jehu's first cares was to cultivate the good graces of Shalmaneser II., King of Assyria (see the Black Obelisk, second line from top on the four sides; Schrader, "K. B." p. 151; III Rawlinson, 5, No. 6, 40–65; Schrader, "K. A. T." 2d ed., p. 210). It is not unlikely that Assyria had a hand in the revolution that carried Jehu to the throne ("K. A. T." 3d ed., p. 43): Assyria at least promised to be a protector against Damascus and Hazael. Assyria did not keep Damascus in check, however, and so Jehu lost (after 839) to Hazael the control over the district east of the Jordan (II Kings x. 32).

The war must have been waged with great cruelty. The Damascenes penetrated also into the Southern Kingdom and beyond (II Kings xii. 17, 18). Amos refers to the atrocities then committed, while Jehu's assassination of Jezebel and her son is mentioned with horror by Hosea (i. 4). Jehu was succeeded by his son Jehoahaz.

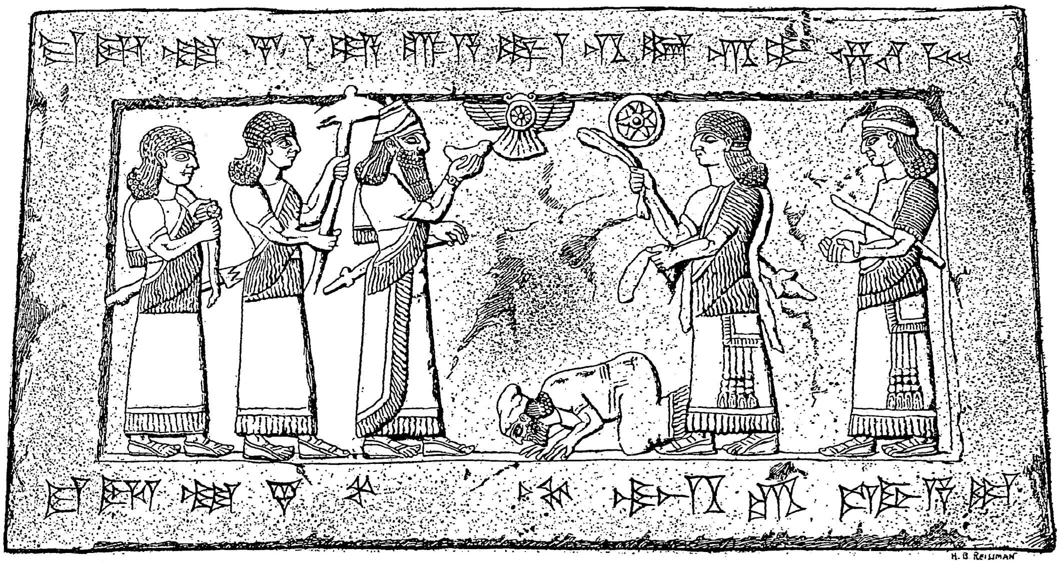
E. G. H.

2. Son of Hanani; a prophet. He denounced Baasha for the idolatry practised by him, and predicted the downfall of his dynasty (I Kings xvi. 1, 7). He censured also Jehoshaphat, King of Judah, for his alliance with Ahab (II Chron. xix. 2, 3). Jehu's father was probably the Hanani who prophesied against Jehoshaphat's father, Asa (II Chron. xvi. 7). Jehu must have either lived to a very great age or begun his prophetical career very young; for between his two prophecies there is an interval of thirty years. Besides, he survived Jehoshaphat, and wrote the latter's life (II Chron. xx. 34). Jerome (in the Vulgate) adds a gloss to I Kings xvi. 7, representing Jehu as having been killed by Baasha.



Tribute of Jehu to Shalmaneser II.
(From the Black Obelisk.)

3. Son of Obed, a descendant of Jarha, an Egyptian, and of a daughter of Hezron the Judahite, the direct male line being Egyptian (I Chron. ii. 38).

4. A Simeonite prince, son of Josibiah; lived in the reign of Hezekiah (I Chron. iv. 35, 41).

5. One of David's heroes, an Antothite, who while David was still at Ziklag, for his sake forsook the cause of Saul (I Chron. xii. 3).

JEHUDA. See Judah.

JEHUDI B. SHESHET: Hebrew philologist of the tenth century; pupil of Dunash b. Labraṭ. He is known exclusively through the polemic in which he defended his teacher against the attacks of the pupils of Menahem b. Saruḳ. The only manuscript which has preserved this very interesting polemic (Parma MSS., Codex Stern, No. 6) names in its title "the pupils of Dunash" as having framed the answer to the pupils of Menahem. At the end of the manuscript, however, the answer is called "Teshubot shel Talmid Dunash," and in the work itself (verse 46) the writer names himself explicitly "Jehudi [see Jer. xxxvi. 14] ben Sheshet." The father's name is punctuated שֵׁשַׁת, and made to rime with words ending in "-shat," hence it should properly be pronounced "Sheshat," instead of, as is usually done, "Sheshet." The polemic gives no further information concerning the person of Jehudi. He wrote it during the lifetime of his teacher Dunash, perhaps with his assistance; Ḥasdai ibn Shaprut, however, was no longer living, a fact which may explain why Jehudi did not preface his work with a eulogy of this great patron of the sciences.

Jehudi b. Sheshet makes the three pupils of Menahem the object of relentless invective, and his coarse ridicule does not spare even their names, especially that of Ben Kafron, which he derides because of its signification in Latin ("caper" = "goat"). He reproaches Judah b. David Ḥayyuj, the youngest of them, for his Christian descent; indeed, he goes far beyond his teacher and the pupils of Menahem in his polemical zeal.

Jehudi ben Sheshet uses the same meter and the same rime as Dunash and his opponents had used. His writing consists of a metrical part containing 154 verses, of which 1-83 form the introduction, and of a prose part preceded by a prologue in rimed prose. The portion in prose is an elucidation of the second half of the metrical part. He answers only about thirty of the fifty criticisms of Menahem's pupils, and is very emphatic in his eulogy of Dunash, preferring him even to Saadia (verse 61). He also defends the application of Arabic laws of prosody to Hebrew verse (p. 22), introduced by Dunash. Jehudi's polemic has been published, with that of Menahem's pupils, by S. G. Stern in "Sefer Teshubot: Liber Responsionum" (Vienna, 1870).

G. W. B.

JEITELES (JEITTELES): Austrian family of some importance, which can be traced back to the first half of the eighteenth century.

Aaron (Andreas) Ludwig Joseph Jeitteles: Physician, poet, and writer; born at Prague Nov. 24, 1799; died at Graz June 17, 1878; son of Judah Jeiteles. Having graduated from the gymnasium of his native city at the age of fifteen, he studied medicine at the universities of Prague and Vienna (M.D. 1825). Three years later he was converted to Catholicism. From 1829 to 1835 he was successively prosector and professor in the anatomical department of Vienna University, and from 1835 to 1869 he held the chair of surgical therapeutics at the University of Olmütz. He contributed several scientific dissertations to medical journals and prepared a new edition of A. M. Mayer's "Beschreibung des Ganzen Menschlichen Körpers" (Vienna, 1831). In 1848 he took an active part in the revolutionary movement, edited the journal "Neue Zeit," and represented the Olmütz district in the revolutionary parliament at Frankfort-on-the-Main.

Aaron had entered the field of literature while still attending the gymnasium. He wrote a great number of poems, some of which were set to music by Beethoven and other composers. On the centenary of his birth his son published his "Gesammelte Dichtungen," which form the tenth volume of the "Bibliothek der Deutschen Schriftsteller aus Böhmen." He pleaded strongly for humanity, justice, and freedom (hence his pseudonym "Justus Frey"), and in his hymn in honor of Huss and Jerome of Prague he attacked the obscurantism of the Roman Church. His former coreligionists found in him a warm defender. In the poem "Warnung" he appealed to them to adhere to their ancestral faith, and gave expression to the pangs which torment the soul of him who without conviction deserts the religion of his fathers.

BIBLIOGRAPHY: Bernhard Münz, in *Beiblatt zum General-Anzeiger für die Gesammten Interessen des Judenthums*, Berlin, No. 52, Dec. 21, 1903; Wurzbach, *Biographisches Lexikon*, x. 119 *et seq.*

D. S. MAN.

Baruch b. Jonah (Benedict) Jeiteles: Bohemian Talmudist and Hebraist; born in Prague April 22, 1762; died there Dec. 18, 1813; eldest son of Jonas Jeiteles and father of Ignaz Jeiteles. He turned from the Orthodoxy then dominant in Prague, and espoused the liberalism championed by Mendelssohn. He conducted a yeshibah there and took an active interest in communal affairs, but his endeavors to modify the prejudiced views of his coreligionists in Prague subjected him to many persecutions at the hands of the more zealous.

After the battles of Kulm and Dresden, in 1813, when the numbers of the wounded who were brought into Prague increased to such extent that the public hospitals could no longer accommodate them all, Jeiteles urged the erection of private infirmaries for the unfortunate men, who had been neglected for weeks. Unceasingly active, collecting funds, visiting the soldiers and relieving them without regard to their religion or nationality, he contracted hospital fever, of which he died.

Jeiteles was the author of the following works: "'Ammude ha-Shaḥar" (Prague, 1785), on Talmudical subjects; "Dibre Yosef ha-Sheni ha-Aḥaronim" (*ib.* 1790), translated from the German; "'Emeḳ ha-Baka" (*ib.* 1793), a funeral sermon on the death of R. Ezekiel Landau; "Ha-'Oreb" (Vienna, 1795), which purports to be by Phinehas Hananiah Argosi de Silva, and to have been published in Salonica, but which was really the work of Baruch: it deals with a dispute between him and Landau; "Siḥah ben Shenat חק"ם ותקס"א," on the disciples of Shabbethai Ẓebi and of Frank in Prague, which was published anonymously (Prague, 1800) and is attributed (by Benjacob, "Oẓar ha-Sefarim," p. 574) to his brother Judah Jeiteles; "Ṭa'am ha-Melek" (Brünn, 1801–1803), on the "Sha'ar ha-Melek" of Isaac Nuñez Belmonte. It was republished with additions by R. Joseph Saul Nathansohn, Lemberg, 1859.

Baruch wrote also Hebrew poems and epigrams which appear in his brother's "Bene ha-Ne'urim," and he delivered a lecture on vaccination, "Die Kuhpockenimpfung" (Prague, 1804). In 1784, 1790, and 1794 he published in "Ha-Meassef" some excellent translations of the fables of Lessing and Lichtwer; and odes, elegies, and funeral and other orations by him in German and Hebrew are scattered through various periodicals.

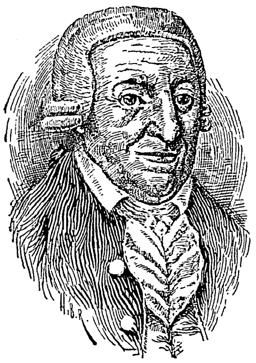
S. S. A. KI.—P. WI.

Ignaz Jeiteles: Austrian writer on esthetics and philosophy; born at Prague Sept. 13, 1783; died at Vienna June 19, 1843. The son of Baruch (Benedict) Jeiteles and grandson of Jonas Jeiteles, he was carefully educated under their supervision. He studied at the Piarists' gymnasium at Prague, and was then enrolled in the law school of the university in that city, but devoted himself to classical literature and esthetics, being influenced by A. G. Meissner, who was then lecturing at Prague on these subjects. Forced by private circumstances to devote most of his time to commercial pursuits, he removed to Vienna, where, nevertheless, he soon became known by the clear, incisive articles, full of common sense, which he wrote for different periodicals of Vienna.

He especially interested himself in all that pertained to the oppressed condition of the Jews, although he was not always successful in his endeavors. His "Gedanken an der Wiege eines Jüdischen Kindes" still possesses considerable value. He contributed hundreds of essays to the "Annalen für Oesterreichische Literatur" (1816–20); "Elegante Zeitung" (1809–12); "Dresdener Abendzeitung" (1817); "Sulamith" (1806–18); "Hormayers Archiv" (1812–15); "Wiener Zeitschrift für Kunst und Literatur" (1817–20); Lewald's "Europa"; and the various "Taschenbücher" of that time. Unfortunately he could not carry out his plan (1838) of issuing a literary supplement to Bäuerles' "Theater-Zeitung." His death interrupted also his work on a history of literature, for which he had been collecting material for years.

Jeiteles published in book form: "Die Kuhpockenimpfung," Prague, 1804 (together with his father and grandfather); "Biographie des Dr. Jonas Jeiteles," *ib.* 1806; "Analekten, Arabesken, und Analogien," *ib.* 1807; "Clio, eine Reihe Welthistorischer Szenen," Vienna, 1834; and his chief work, "Aesthetisches Lexicon, ein Alphabetisches Handbuch zur Theorie der Philosophie des Schönen und der Schönen Kunst," 2 vols., Vienna, 1835-38. During his last years he undertook a journey to Italy, the fruit of which, "Eine Reise nach Rom," was published posthumously by August Lewald (Siegen and Wiesbaden, 1844). In 1838 Jeiteles received the honorary degree of Ph.D. from the University of Jena for his works on esthetics. A. Ki.

Jonas Mischel Jeiteles: Austrian physician; born at Prague May 5, 1735; died there April 18, 1806. His early training he received from his father, who was an apothecary. In 1752 he went to Leipsic to study medicine, and in 1753 to Halle, where he graduated M.D. in 1755. Returning to his native town, he in 1756 received a license to practise medicine among his coreligionists, and in 1763 was appointed physician of the Jewish hospital. In 1784 he received a license to practise medicine and surgery without restriction as to the creed of his patients, and succeeded in building up a large practise. He was the author of "Observata Quædam Medica," Prague, Vienna, and Leipsic, 1783.



Jonas Mischel Jeiteles.

F. T. H.

Judah Jeiteles: Austrian Orientalist; born at Prague March, 1773; died at Vienna June 6, 1838; son of Jonas Jeiteles. He devoted himself to the study of Oriental languages and literature under the direction of his brother Baruch. He was the first to compose in Hebrew a grammar of Biblical Aramaic, its title being "Mebo Lashon Aramit" (Prague, 1813). He edited and wrote commentaries on the books of Samuel, Kings, the twelve Minor Prophets, Chronicles, Ezra, Nehemiah, and Daniel for Anton Schmid's new (fourth) edition of the Bible with German translation. Jeiteles also published: "Siḥah: Gespräch über die Sekte der Sabbatäer" (in Hebrew, Brünn, 1800); "Psalm zum Lobe Gottes," Prague, 1817; and "Sammlung Hebräischer Gedichte, Fabeln, Sprüche," etc., *ib.* 1821; besides contributing many essays to "Ha-Meassef."

s. A. Ki.

JEITELES, ALOIS: Austrian physician and poet; born June 20, 1794 (or 1795), at Brünn, Moravia; died there April 16, 1858. He studied philosophy at Brünn and Prague, and medicine at Vienna (M.D. 1819). Stimulated by his intercourse with men like Beethoven, Grillparzer, and the leading artists of the Vienna Burgtheater, he turned to poetry, attracting attention even as a student. His song-cycle, "An die Ferne Geliebte," which appeared in "Selam Aglaja," was set to music by Beethoven. The parody "Der Schicksalstriumph," written in 1818 in collaboration with Castelli, made the rounds of the German stage. In 1819 he together with his cousin Ignaz Jeiteles founded the weekly "Siona"; but it was soon discontinued. In 1821 he settled as a physician in Brünn. In 1848 he was appointed editor of the official "Brünner Zeitung," an office which he held till his death.

A student of the old Italian and Spanish dramatists, Jeiteles published translations from the latter, and also wrote plays that appeared at the Burgtheater, Vienna. Among these were: "Fegefeuer des Heiligen Patricius"; "Die Macht des Blutes"; "Der Richter aus Zalamea"; "Die Vergeltung"; "Auge und Ohr"; "Der Liebe Wahn und Wahrheit"; "Die Hausgenossen"; and "Der Hirtenknabe von Tolosa." Most of his scientific works have appeared in annuals and other periodicals. His last work, "Der Lehrer des Propheten," was printed in Wertheimer's "Jahrbuch für Israeliten," 5618 (≐ 1857–1858), pp. 667 *et seq.*

JEKEL, RABBI. See Jacob of Vienna.

JEKUTHIEL IBN ḤASAN: Statesman and scientist of the eleventh century; lived in Saragossa. According to Geiger, he is identical with the astronomer Ḥasan ben Ḥasan, who lived as dayyan in Cordova, where he wrote a work on astronomy, and later settled in Saragossa, where he filled a high position under the emir. "The government was upon his shoulders, and by his word princes ruled," sings Solomon ibn Gabirol, who found in Jekuthiel a benefactor and true friend, and who continually praises his learning, modesty, and generosity. In the revolution under Abdallah ibn Ḥakam, who conspired against his uncle, King Mundhir of Saragossa, and beheaded him (1039), Jekuthiel also was beheaded (Nisan, 1039), notwithstanding his great age; a year later, however, the murderers met their punishment. Jekuthiel's death was lamented by the foremost Jewish poets of his age, especially by Gabirol in a poem of more than 200 verses.

J. M. K.

JEKUTHIEL BEN JUDAH HA-KOHEN (YaHBI [יה״בי]; known also as **Jekuthiel ha-Naḳdan** and **Zalman ha-Naḳdan**)**:** Grammarian of Prague; lived in the second half of the thirteenth century. Baer claimed to have seen a manuscript which gave 1171 as the date of Jekuthiel's death ("Orient. Lit." xii. 6), but according to Steinschneider ("Cat. Bodl." col. 1381) the date refers to Jacob Tam (comp. Gross, "Gallia Judaica," p. 117). Jekuthiel occupied himself chiefly with the Masorah and its punctuation, hence his surname "ha-Naḳdan" (the punctuator). With the help of six ancient Spanish manuscripts he prepared a correctly vocalized and accented text of the Pentateuch and the Book of Esther. His rules of punctuation are explained in his "'En ha-Ḳore," in which he quotes the ancient grammarians Ben Naphtali, Ben Asher, Ibn Janaḥ, Ibn Ezra, Jacob Tam, and others. In ancient texts of the Pentateuch his work is indicated by the initials ע״ה. It is quoted by Abraham de Balmes in his "Miḳneh Abraham," by Elijah Levita in his "Masoret ha-Berit," and by Solomon Hanau in his "Ẓohar ha-Tebah." HEIDENHEIM published the preface of the "'En ha-Ḳore," and many extracts from it, in his editions of the Pentateuch ("Me'or 'Enayim") and the Seder Purim. It was Heidenheim's opinion that Jekuthiel lived before David Ḳimḥi.

T. M. SEL.

JEKUTHIEL BEN LÖB GORDON: Russian physician and cabalist; born at the beginning of the eighteenth century. Even as a young man he enjoyed a reputation as an able Talmudist. He went to Padua to study medicine, and there made the acquaintance of the young Moses Ḥayyim Luzzatto, under whose guidance he took up the study of the Cabala. From his letters to Mordecai Jaffe of Vienna (to whom he probably had been introduced by his father-in-law, R. Raphael of Wilna) and to Joshua Höschel, rabbi of Wilna (in 1729; published in Emden's "Torat ha-Ḳena'ot," p. 45, Amsterdam, 1737), it is evident that he was a firm believer in the teachings of the Cabala, and even in miracles. He was careless enough to write to Wilna and Vienna that Luzzatto was a great cabalist and a seer of visions, an indiscretion which led to Luzzatto's persecution by Moses Ḥagiz and other fanatical rabbis. When Luzzatto was compelled to leave Padua, Jekuthiel remained, and for two years, with a circle of companions, continued in secret the study of the Cabala. He then returned to Lithuania and made many converts to the Cabala. In 1742 he was sent from Brest-Litovsk as a delegate to Wilna (?); from that time his movements are unknown. He left many works in manuscript, of which the following came into the possession of Jeshuah ben Höschel Schorr at Brody: "Mar'eh ha-Musar"; "Derushim," etc.; "Mar Ḳashshisha"; "Sugyot ha-Talmud," commentary to the thirteen rules of Rabbi Ishmael and other rules of the Talmud. The first three are cabalistic works.

JEKUTHIEL OF WILNA. See JEKUTHIEL B. LÖB GORDON.

JELIN, ARYEH LÖB: Rabbi of Byelsk, government of Grodno, Russia; born 1820; died April 2, 1886. He was one of the most prominent Russian rabbis, to whom halakic matters were frequently referred for decision. He was the author of "Ḳol Aryeh" and "Miẓpeh Aryeh," novellæ on various Talmudical treatises. His most important production is the "Yefeh 'Enayim," giving the parallel passages found in the Babylonian Talmud, the Yerushalmi, the Midrashim, the Pesiḳtas, and other ancient rabbinic productions, occasionally with critical remarks which are of the greatest value to the rabbinic student. The "Yefeh 'Enayim" accompanies the Talmudic text in the new Talmud editions of the Romms of Wilna. Jelin left in manuscript many novellæ on the Talmud and a collection of responsa.

JELLINEK: Austrian family whose name has been rendered illustrious by the great preacher Adolf Jellinek.

Adolf Jellinek: Austrian rabbi and scholar; born June 26, 1821, at Drslawitz, Moravia; died Dec. 29, 1893, at Vienna. In 1845 he became preacher at the Leipsic-Berliner Synagogue in Leipsic, and in 1848 preacher at the Leipsic community synagogue; in 1856 he was called as preacher to the Leopoldstädter Tempel, Vienna, where he remained until the death of Mannheimer, whom he succeeded in 1865 in the Seitenstettengasse Tempel.

Adolf Jellinek.

Jellinek's intellectual activity covered the three fields of religious philosophy, bibliography, and oratory, and falls naturally into two periods, that of Leipsic and that of Vienna. The first may be designated as the preeminently scientific period; the second, as the preeminently oratorical one. Like most self-taught scholars, Jellinek was an omnivorous reader and investigated many subjects; he had a remarkable memory and a brilliant intellect. He was greatly stimulated to scientific studies by the scholarly circles of Leipsic. While he did not issue a large number of independent works he edited many in his chosen fields, adding valuable scholarly notes or introductions. He devoted especial attention to the Cabala, his first work being "Die Kabbala von Dr. Franck, aus dem Französischen Uebersetzt," Leipsic, 1844. This was followed by: "Moses b. Schem Tob de Leon und Sein Verhältniss zum Sohar," *ib.* 1851; "Beiträge zur Gesch. der Kabbala," *ib.* 1852; "Auswahl Kabbalistischer Mystik," *ib.* 1853; "Thomas von Aquino in der Jüdischen Literatur," *ib.* 1853; "Maarich von M. de Lonsano," *ib.* 1853; "Philosophie und Kabbala," part i., *ib.* 1854. His works on the philosophy of religion include: "System der Moral von R. Bechaje b. Josef," *ib.* 1846; "Mikrokosmos: 'Olam Ḳaṭon von R. Josef ibn Zadik," *ib.* 1854; "R. Salomon Alamis

Sittenlehre," *ib.* 1854; "Der Mensch von Sabb. Donolo," 1854. He published with scholarly introductions a collection of small midrashim taken partly from manuscripts, partly from printed books, and entitled "Beth ha-Midrasch" (six parts, 1853–78). Others of his editions are commentaries by Tobiah b. Eliezer, Solomon b. Meïr, Simon b. Ẓemaḥ, Joseph Bekor Shor, and Jedidiah Solomon Norzi.

Very valuable are his six bibliographies (1876–78) on the earliest commentators of the Talmud ("Ḳontres ha-Mefaresh"), Jewish proper names ("Ḳontres ha-Mazkir"), haggadic hermeneutics ("Ḳontres ha-Maggid"), the 613 precepts ("Ḳontres Taryag"), Maimonides' legal code ("Ḳontres ha-RaMBaM"), and the methodologic-hermeneutic and chronological literature to the Midrash and the Talmud ("Ḳontres ha-Kelalim"). In this connection must also be mentioned Jellinek's index to the German translation of De Rossi's "Dizionario" (1839–46).

While Jellinek's most valuable scientific works were produced during his sojourn at Leipsic, his oratorical achievements culminated at Vienna. Although his discourses printed at Leipsic gave indication of latent power, he at this time was still under the influence of Salomon, the famous preacher of Hamburg; but as soon as he went to Vienna he manifested his independence. "The air of the large city bewitches one," he was wont to say; and he certainly would not have reached his commanding position if he had not occupied the pulpit at Vienna.

Jellinek was the greatest, most gifted Jewish preacher that modern Judaism has produced. His thorough knowledge of the Midrash, and the startling uses he made of it in his sermons, distinguish him especially from all his contemporaries and predecessors. In his discourses he is the most brilliant apologist of Judaism and the most accomplished and courageous opponent of all its enemies, both within and without the Synagogue. All his addresses are timely answers to present-day questions and problems of intellectual and national life, of religion and science. With admirable insight he immediately recognizes in every midrash the whole structure of the original discourse, as he strikingly proved in the sermon "Eine Alte Schutzrede für die Proselyten" ("Zeitstimme," ii. 19). Jellinek printed about 200 discourses, singly or in volumes. Three parts, containing 68 discourses, were published in the years 1862, 1863, and 1866; and the following later: "Das Weib in Israel" (Vienna, 1866), two discourses; "Das Gesetz Gottes Ausser der Thora" (1867), five discourses; "Schema Israel" (1869), five discourses; "Zeitstimmen" (1870–71), two parts, eighteen discourses; "Bezelem Elohim" (1871). For the seventieth birthday of I. N. Mannheimer he issued "Nofeth Zufim, R. Jehuda Messer Leons Rhetorik nach Aristoteles." Jellinek was one of the most productive homiletic writers, the modern classical haggadist par excellence. His "Der Jüdische Stamm" (1869) and "Der Jüdische Stamm in Nichtjüdischen Sprüchwörtern" (1881–82) are psychologic and ethnologic studies.

A. Ku.

Arthur Jellinek: Hungarian deputy; born March 15, 1851. He studied law at the University of Vienna (Ph.D. 1875). In 1876 he opened a law office at Budapest, and in the following year he was elected to the Parliament (Diet). He drafted among other bills that on the jurisdiction of the courts in electoral matters, also the general report on marital laws; and he has contributed many articles on legal topics to the periodicals "Themis," "Togtudományi Közlöny," and "Ügyvédeklapja." His chief works are "Katonai Büntetöjog ei Katonai Eskü" (1884) and "A Magyar Magánjog mai Ervényében" (1886).

Bibliography: *Pallas Lex.* ix.

M. W.

Georg Jellinek: Austrian jurist and author; born at Leipsic June 16, 1851; son of Adolf Jellinek; educated at the universities of Heidelberg, Leipsic, and Vienna, where he studied law and philosophy. He entered the Austrian government service in 1874, but resigned in 1879 to become privat-docent at Vienna University. Appointed professor of jurisprudence in 1883, he resigned in 1889. The following year he was appointed professor at Basel, and since 1891 he has held the chair of international law at the University of Heidelberg. He studied Orientalia at the University of Prague and later in Leipsic.

Among his works may be mentioned the following, all, with one exception, published in Vienna: "Die Sozial-Ethische Bedeutung von Recht, Unrecht und Strafe," 1878; "Die Rechtliche Natur der Staatenverträge," 1880; "Die Lehre von den Staatenverbindungen," 1882; "Oesterreich-Ungarn und Rumänien in der Donaufrage," 1884; "Ein Verfassungsgerichtshof für Oesterreich," 1885; "Gesetz und Verordnung," Freiburg-in-Baden, 1887; "System der Subjektiven Oeffentlichen Rechte," 1892.

F. T. H.

Heinrich Jellinek de Haraszt: Born at Budapest Dec. 21, 1853; son of Moritz Jellinek. After having studied the street-railway system of the Continent, he entered the offices of the Budapest Tramway Company, and later succeeded his father as its president. He introduced electric traction, and extended the system to the environs of Budapest, establishing the branches Budapest-Szent-Endre and Budapest-Haraszti. He was ennobled by the king in recognition of his services. Jellinek is president of the Budapest chamber of commerce and of the Budapest Sick Fund for Working Men.

M. W.

Hermann Jellinek: Austrian writer; brother of Adolf Jellinek; born Jan. 12, 1823, at Drslawitz, near Ungarisch-Brod, Moravia; executed Nov. 23, 1848, at Vienna. At the age of thirteen he left home, going successively to Presburg, Nikolsburg, and Prague. At Prague he studied Kant and Schelling, and wrote essays on philosophy and theology. He at this time intended to qualify for the rabbinate, but later he became a decided opponent of all religion. In 1842 he went to Leipsic, where he studied Hegel, Feuerbach, Bruno Bauer, natural science, political economy, and socialistic literature.

A most determined character, all his writings were in the nature of polemics. For this reason he was expelled from Leipsic in 1847, and subsequently from Berlin. He then returned to Vienna and engaged in journalism, writing editorials for the "Allgemeine Oesterreichische Zeitung" and "Die Radicalen." During the October revolution he criticized the lack of unity in the defense of democracy. On the fall of Vienna Jellinek was imprisoned (Nov. 9, 1848). During his court martial he so bitterly arraigned his judges that he was threatened with physical punishment. Attempts made to induce him to disavow his works, in order that he might be liberated, proved futile. He said, in a letter written the night before his death, that his printed ideas could not be shot. He was buried in the cemetery of Währing, near Vienna, where his grave is marked by the figures "26," his age.

Jellinek was the author of the following works: "Uriel Acosta," Zerbst, 1848; "Das Verhältniss der Lutherischen Kirche zu den Reformatorischen Bestrebungen," Leipsic, 1847; "Die Täuschungen der Aufgeklärten Juden und Ihre Fähigkeit zur Emancipation," Zerbst, 1847; "Das Denunciationssystem des Sächsischen Liberalismus," Leipsic, 1847; "Die Gegenwärtige Krisis der Hegelschen Philosophie," *ib.* 1847; "Kritik der Religion der Liebe," Zerbst, 1847; "Kritische Gesch. der Wiener Revolution," Vienna, 1848; "Kritischer Sprechsaal für die Hauptfragen der Oesterreichischen Politik," *ib.* 1848; "Kritisch-Philosophische Schriften," 1849.

BIBLIOGRAPHY: *Jüdisches Athenäum*, 1851, p. 112; *Meyers Konversations-Lexikon.*

L. V.

Max Hermann Jellinek: Austrian philologist; born in Vienna May 29, 1868; son of Adolf JELLINEK. Educated at the university of his native city (Ph.D. 1889), he became privat-docent there in German philology (1892) and subsequently assistant professor (1900).

Of Jellinek's publications the following may be mentioned: "Die Sage von Hero und Leander in der Dichtung," Berlin, 1890; "Beiträge zur Erklärung der Germanischen Flexion," *ib.* 1891; "Die Psalmenübersetzung des Paul Schede Melissus," Halle, 1896; "Ein Kapitel aus der Gesch. der Deutschen Grammatik," *ib.* 1898. He edited Philipp von Zesen's "Adriatische Rosemund," *ib.* 1899. S.

Moritz Jellinek: Hungarian political economist; born at Ungarisch-Brod, Moravia, in 1823; died at Budapest June 13, 1883; brother of Adolf JELLINEK. He studied political economy at the universities of Vienna and Leipsic. Influenced by his brother Hermann, he took part in 1848 in the Austrian revolution, founding Liberal periodicals at Brünn and Krems. He was associated with the revolutionists at Vienna. Early in the second half of the nineteenth century he went to Budapest, where he established a wholesale grain-house. As president of the Grain Exchange, he organized the Stock Exchange tribunal, which still exists. In 1864 he founded the Budapest Tramway Company, of which he remained general director till his death. He was president also of the Corn Exchange. He contributed to "Ilon" articles on the Magyarizing of commerce, and to the annals of the Academy of Sciences essays on the price of cereals and on the statistical organization of the country.

JENER, ABRAHAM NAPHTALI HIRZ BEN MORDECAI: Polish rabbi; born at Yanov 1806; died at Cracow July 14, 1876. He was a pupil of his father and of his brother Johanan, and soon distinguished himself as a Talmudist. In 1826 he went to Cracow, where he engaged in business, but was unsuccessful. He accepted the position of dayyan or judge of the city of Cracow, and was later appointed president of the bet din.

Jener was an eminent Talmudist and an able dayyan, many renowned rabbis relying upon his decisions.

His responsa are contained in "Birkat Abraham" (1874) and "Ẓeluta de-Abraham." Some of his homilies were added to those works (Lemberg, 1866).

S. S. B. FR.

JEPHTHAH (יפתח).—Biblical Data: Judge of Israel during six years (Judges xii. 7); conqueror of the Ammonites. According to Judges xi. 1, he was a Gileadite, son of Gilead and a harlot. Driven from his father's house by his father's legitimate sons, he settled in the land of Tob as chief of a band of freebooters (Judges xi. 3). On the occasion of the war with the Ammonites, Jephthah's aid was sought by the elders of Gilead and obtained on the condition that they would accept him as their chief; and he was accordingly solemnly invested with authority at Mizpah (Judges xi. 4–11). Before taking the field, Jephthah resorted to diplomacy, sending an embassy to the King of Ammon. This failing, Jephthah attacked and completely defeated him, taking from him twenty cities (Judges xi. 12–33).

The most prominent act in Jephthah's life was his vow to sacrifice to YHWH whatsoever came first out of his house to meet him if he should return victorious. His vow fell upon his only daughter, who came out to meet him dancing to the sound of timbrels. Jephthah, having given her a respite of two months, consummated his vow. After this it became the custom for the daughters of Israel to lament four days in every year the death of Jephthah's daughter (Judges xi. 34–40). After the war a quarrel broke out between Jephthah and the Ephraimites, who reproached him for not having called them to take part. Having seized the fords of the Jordan, Jephthah required every fugitive who attempted to cross to pronounce the word "shibboleth." Those who betrayed their Ephraimite origin by saying "sibboleth" were put to death; in this manner 42,000 Ephraimites fell (Judges xii. 1–6).

E. G. H. M. SEL.

——**In Rabbinical Literature:** Jephthah is represented by the Rabbis as an insignificant person. That vain men gathered about him (Judges xi. 3) was an illustration of the proverb that a sterile date-palm associates with fruitless trees (B. Ḳ. 92b). His name being mentioned in connection with Samuel's (I Sam. xii. 11) shows that even the most insignificant man, when appointed to a position of importance, must be treated by his contemporaries as if his character were equal to his office (R. H. 25b). He is classed with the fools who do not distinguish between vows (Eccl. R. iv. 7); he was one of the three men (Ta'an. 4a), or according to other authorities one of the four men (Gen. R. lx. 3), who made imprudent vows, but he was the only one who had occasion to deplore his imprudence. According to some commentators, among whom were Ḳimḥi and Levi b. Gershom, Jephthah only kept his daughter in seclusion. But in Targ. Yer. to Judges xi. 39 and the Midrash it is taken for granted that Jephthah immolated his daughter on the altar, which is regarded as a criminal act; for he might have applied to Phinehas to absolve him from his vow. But Jephthah was proud: "I, a judge of Israel, will not humiliate myself to my inferior." Neither was Phinehas, the high priest, willing to go to Jephthah. Both were punished: Jephthah died by an unnatural decaying of his body; fragments of flesh fell from his bones at intervals, and were buried where they fell, so that his body was distributed in many places (comp. Judges xii. 7, Hebr.). Phinehas was abandoned by the Holy Spirit (Gen. R. *l.c.*).

The Rabbis concluded also that Jephthah was an ignorant man, else he would have known that a vow of that kind is not valid; according to R. Johanan, Jephthah had merely to pay a certain sum to the sacred treasury of the Temple in order to be freed from the vow; according to R. Simeon ben Laḳish, he was free even without such a payment (Gen. R. *l.c.*; comp. Lev. R. xxxvii., 3). According to Tan., Beḥuḳḳotai, 7, and Midrash Haggadah to Lev. xxvii. 2, even when Jephthah made the vow God was irritated against him: "What will Jephthah do if an unclean animal comes out to meet him?" Later, when he was on the point of immolating his daughter, she inquired, "Is it written in the Torah that human beings should be brought as burnt offerings?" He replied, "My daughter, my vow was, 'whatsoever cometh forth of the doors of my house.'" She answered, "But Jacob, too, vowed that he would give to YHWH the tenth part of all that YHWH gave him (Gen. xxviii. 22); did he sacrifice any of his sons?" But Jephthah remained inflexible. His daughter then declared that she would go herself to the Sanhedrin to consult them about the vow, and for this purpose asked her father for a delay of two months (comp. Judges xi. 37). The Sanhedrin, however, could not absolve her father from the vow, for God made them forget the Law in order that Jephthah should be punished for having put to death 42,000 Ephraimites (Judges xii. 6).

S. S. M. SEL.

——**Critical View:** The story of Jephthah (Judges x. 17–xii. 7) does not, in the opinion of most critics, consist of a uniform account. The following four views are held respecting it:

(1) The main narrative is held to be derived from a single source into which a long interpolation (*ib.* xi. 12–28) has been introduced. This interpolation has really nothing to do with Jephthah, but discusses Israel's title to the land between the Arnon and the Jabbok. Jephthah is an eponymous hero; the narrative is introduced because of the story of the sacrifice of his daughter; and the whole tale is unhistorical. This hypothesis is adopted by Wellhausen ("Die Composition des Hexateuchs," etc., 1889, pp. 228 *et seq.*) and Stade ("Gesch. des Volkes Israel," 1889, i. 68).

(2) Another view supposes, like the foregoing, that the narrative is derived from one source, with an interpolation as above, but regards either the whole story or the main thread of the narrative as historical. Some of its supporters hold that the myth connected with the women's festival of Gilead has attached itself to this historical portion. This view is supported by Kuenen ("Die Historischen Bücher des Alten Testaments," 1890, pp. 13, 18 *et seq.*), Budde ("Richter und Samuel," 1890, pp. 125 *et seq.*), and Moore ("Judges," in "International Critical Commentary," 1895, pp. 282 *et seq.*).

(3) A third view regards the story as composed of two narratives from J and E respectively. E pictured Jephthah as residing at Mizpah, from which he made war on some foreign people who had done him great injury, and as winning a victory at the cost of his daughter. J represented him as a freebooter on foreign soil, who was commissioned by the Gileadites to avenge their wrongs, which he did without the help of the west-Jordanic tribes. This view, put forth by Holzinger in an unpublished manuscript, has been elaborated and defended by Budde ("Richter," in "K. H. C." pp. 80 *et seq.*), and is adopted by Nowack ("Richter," in his "Hand-Kommentar," 1902). Supporters of this hypothesis see evidence of a mixture of sources in Judges xi. 12–28, and make a stronger argument than do the adherents of the second view for the historical character of the whole story.

(4) Cheyne ("Encyc. Bibl." *s.v.*) adopts the two-source theory, but supposes that only one of the original narratives concerned itself with Jephthah. He thinks that the other was a story about Jair.

Of these views the second is, perhaps, the most probable.

JERAHMEEL (ירחמאל).—Biblical Data: David, while he was a refugee at the court of Achish, King of Gath, is said to have made a raid against the "south of the Jerahmeelites" (I Sam. xxvii. 10) and after his raid to have sent a part of the spoil to the "cities of the Jerahmeelites" (*ib.* xxx. 29). In I Chronicles (ii. 9) Jerahmeel appears as a great-grandson of Judah (*i.e.*, he was the son of Hezron, the son of Pharez, the son of Judah); and Caleb is said to have been a brother of Jerahmeel (*ib.* verse 42).

——**Critical View:** From the foregoing references the natural inference is that the Jerahmeelites were a Judean clan, to the south of whose habitat a part of the Negeb extended. But Professor Cheyne has put forth concerning the Jerahmeelites a most surprising theory. In his view they were a powerful north-Arabian tribe, with which the Hebrews came into conflict on their first approach to the land. A part of the Jerahmeelites was absorbed by the Hebrews, but there were many contests between the Israelites and the main body of the Jerahmeelites all through the period of the Kings. Even among the post-exilic opponents of Nehemiah, the Jerahmeelites appear again. Cheyne believes that echoes of these conflicts once reverberated throughout the Old Testament, but that, owing to the corruption of the Masoretic text, they must now be reawakened by conjectural emendation of the text.

Carrying out this idea, Cheyne finds the chief elements of Israel's origin, religion, and history in Jerahmeel. Babylonia and Assyria sink into insignificance beside Jerahmeel in so far as influence on the Old Testament is concerned. "Amalekites" is a corruption of "Jerahmeelites"; "Beer-lahai-roi" (Gen. xvi. 14) is a corruption of "Well of Jerahmeel"; "Ephraim" is often a corruption of "Jerahmeel." The epithet of Jericho, "city of palm-trees," is a corruption of "city of Jerahmeel"; the names of Saul, of Kish, his father, and of most of the sons of Saul are held to be corruptions of "Jerahmeel"; and Isaiah's "Maher-shalal-hash-baz" is held to be a corruption of "Jerahmeel will be deserted." "Jerahmeel" has been displaced by "Babylon" in Isa. xiii. and xiv.; and Ezekiel's three wise men were "Enoch, Jerahmeel, and Arab." This list might be continued indefinitely.

The ingenuity of Cheyne's method may be admitted; but the thesis must be rejected as altogether arbitrary. That it has received serious attention is owing solely to the great service rendered by its sponsor in other departments of Old Testament research.

JEREMIAH.—Biblical Data: Son of Hilkiah; prophet in the days of Josiah and his sons.

§ I. Life: In the case of no other Israelitish prophet is information so full as in that of Jeremiah. The historical portions of the Book of Jeremiah give detailed accounts of his external life evidently derived from an eye-witness—probably his pupil Baruch. Jeremiah's prophecies give an insight into his inner life, and by reason of their subjective quality explain his character and inward struggles. Of a gentle nature, he longed for the peace and happiness of his people, instead of which he was obliged to proclaim its destruction and also to witness that calamity. He longed for peace and rest for himself, but was obliged instead to announce to his people the coming of terrors, a task that could not but burden his heart with sorrow. He had also to fight against the refractory ones among them and against their councilors, false prophets, priests, and princes.

His Family.

Jeremiah was born in the year 650 B.C. at Anathoth, a small town situated three miles north of Jerusalem, in the territory of Benjamin. He belonged to a priestly family, probably the same one as cared for the Ark of the Covenant after the return from Egypt, and the one to which the high priest Eli had belonged, but which had retreated to Anathoth when Abiathar, David's priest, was banished by Solomon (I Kings ii. 26). The family owned property in this place, so that Jeremiah was able to give himself up wholly to his prophetic calling. Devoted as he was exclusively to his high vocation, and realizing that it entailed vexation and involved the proclaiming of disaster, he did not marry (Jer. xvi. 2 *et seq.*). In the thirteenth year of King Josiah (626 B.C.) while still a young man Jeremiah was called to be a prophet. It was just at this time that the plundering Scythian hordes, which troubled Nearer Asia for decades in the second half of the seventh century, swept past the western boundary of Palestine on their swift horses, to capture rich booty in the ancient civilized land of Egypt (Herodotus, i. 164). Since he continued to prophesy until after the conquest and destruction of Jerusalem by Nebuchadnezzar (586 B.C.), Jeremiah's prophetic career covered a period of more than forty years. All the important events of this period are reflected in his prophecies: the publication of the Deuteronomic law (621 B.C.) and the religious reforms instituted by Josiah in consequence; the first deportation to Babylon, that of Jehoiachin, or Jeconiah (597); and the final catastrophe of the Jewish kingdom (586). Strange to say, of all these events the publication of the Deuteronomic law and the religious reforms of Josiah are the least prominently brought out in his writings.

Attitude Toward Jerusalem Priesthood.

It is not improbable that the opposition in which Jeremiah seems to have stood to the priesthood of the central sanctuary at Jerusalem was a continuation of the opposition which had existed from former times between that priesthood and his family and which is traceable to Zadok, the successful opponent of Abiathar. Jeremiah's attitude may also have been influenced by the fact that he considered Josiah's measures too superficial for the moral reformation which he declared to be necessary if the same fate were not to befall the Temple of Zion as had in days gone by befallen the Temple of Shiloh (I Sam. iv.). An inward opposition of Jeremiah to the Deuteronomic law is not to be thought of. This may be seen from the exhortation (*ib.* xi. 1-8) in which Jeremiah calls on his people to hear "the words of this covenant" (*ib.* v. 3) which God had given to their fathers when He brought them up out of Egypt. In this passage there is a plain reference to the newly found law.

Just as little justifiable is the theory, which has recently been suggested, that Jeremiah in his later years departed from the Deuteronomic law. "The false [lying] pen of the scribe," which, as Jeremiah says, "makes the Torah of Yhwh to falsehood" (Jer. viii. 8, Hebr.), could not have referred to the Deuteronomic law, nor to its falsification by copyists. Rather, Jeremiah is thinking here of another compilation of laws which was then in progress under the direction of his opponents, the priests of the central sanctuary at Jerusalem. Jeremiah probably expected from them no other conception of law than the narrow Levitical one, which actually is apparent in the legal portions of the so-called Priestly writings and results from the Priestly point of view.

§ II. Prophetic Career: **(a) During the Time of King Josiah:** No further details of Jeremiah's life during the reign of Josiah are known. This is probably due to the fact, as has recently been suggested, that Jeremiah continued to live in his home at Anathoth during the opening years of his prophetic career. This theory is supported by the description of the prevailing religious rites which he gives in his first prophecies (Jer. iv. 4) and which applies better to the rough, simple, local cults than to the elaborate ritual of Yhwh in the central sanctuary. "On every hill and under every green tree" (*ib.* ii. 20) they honor the "strangers" (*ib.* v. 25), *i.e.*, the Baalim (*ib.* ii. 23), who, introduced from abroad, had taken their place among the local deities. Israel had "acted wantonly" with them from the time when he first settled in the land of Canaan and had even burned his own children for them "in the valley" (*ib.* vii. 31).

Residence in Jerusalem.

The oldest discourses concerning the Scythians (*ib.* iv. 5–31) seem also to have first been written in Anathoth. In them Jeremiah describes the irresistible advance of the people "from the north" which will bring terrible destruction upon the land of Israel on account of its apostasy. Another proof in favor of the theory that Jeremiah continued to live in Anathoth at the outset of his career is that the prophecies before ch. v. do not concern themselves with the doings of the capital, and that only with his supposed change of residence to Jerusalem begins the account of the external details of his life by his pupil, who was probably originally from Jerusalem and who first became associated with the prophet there. In the capital the simple local cults dwindled into comparative insignificance before the central sanctuary, but on the other hand immorality, frivolity, and deceit made themselves prominent, together with a disregard of the words of the prophet spoken by him to the people by Yhwh's order. Even the prophets took part in the general moral debasement; indeed they were worse than those who erstwhile had "prophesied in the name of Baal" (*ib.* ii. 8), *i.e.*, the prophets of the Northern Kingdom. The people, moreover, which Jeremiah was to test for its inner worth, as an assayer (*ib.* vi. 27) tests the purity of metal, had lost all its preciousness and was only a generation of wrath.

Imprisonment and Release.

(b) **During the Time of King Jehoiakim:** Jeremiah's removal from Anathoth to Jerusalem seems to have taken place a little before the time of Jehoiakim's accession; at least he appears as a resident in Jerusalem under that king. Just as his sternness and his threat of impending punishments had already displeased his fellow citizens in Anathoth to such an extent that they sought his life (*ib.* xi. 19), so also in Jerusalem general anger was soon aroused against him. The first occasion therefor was an event in the reign of Jehoiakim. Jeremiah preached a sermon in the valley Ben-hinnom against idolatry, and in order to bring the utter and complete ruin of the kingdom of Judah more clearly before the minds of his hearers he broke an earthen pitcher. When immediately afterward he repeated the same sermon in the Temple court, he was put in prison by Pashur, the priest in charge, being liberated, however, on the next day. The following section (*ib.* xxvi.) gives more details. When the people at the beginning of Jehoiakim's reign, in spite of the terrible loss they had sustained by the death of Josiah in the unfortunate battle of Megiddo and the resultant establishment of the Egyptian domination, still took comfort in the thought of the Temple and of the protection which the sanctuary was believed to afford, Jeremiah stood in the Temple court and called on the people to improve morally; otherwise the Temple of Jerusalem would share the fate of that of Shiloh. In terrible excitement the priests and prophets cried out that Jeremiah was worthy of death. He, however, was acquitted by the priests and elders, who seem to have had great respect for the word of a prophet, especially in view of the fact that some of the most prominent persons rose up and called to mind the prophet Micah, who had prophesied the same fate for the Temple and for Jerusalem.

Reading of the Roll.

The following incidents in Jeremiah's life are most closely connected with public events as he was more and more drawn into political life by them. In the fourth year of Jehoiakim, the same in which the Babylonians conquered the Egyptians in the battle of Carchemish and thus became the ruling power in the whole of Nearer Asia for almost seventy years, Jeremiah dictated to Baruch the speeches he had composed from the beginning of his career till then, and caused his pupil to read them before the people in the Temple, on a feast-day in the fifth year of Jehoiakim. Upon hearing of this event the highest officers of the court caused Baruch to read the roll once more to them; and afterward, in their dismay at its contents, they informed the king of it. Jehoiakim next caused the roll to be brought and read to him, but scarcely had the reader Jehudi read three or four leaves when the king had the roll cut in pieces and thrown into the brazier by which he was warming himself. Jeremiah, however, who on the advice of the officials had hidden himself, dictated anew the contents of the burnt roll to Baruch, adding "many like words" (*ib.* xxxvi. 32). It was his secretary likewise who (later) wrote into the roll all the new prophecies which were delivered up to the time of the destruction of Jerusalem.

Political Attitude.

(c) **During the Time of Zedekiah:** In the original roll which was burned by Jehoiakim, and which probably included practically the prophecies contained in ch. ii.–xii., Jeremiah had not made any positive demands concerning the political attitude of the kingdom of Judah. He had merely, in accordance with the principle laid down by Hosea and Isaiah, declared that Judah should not take any political stand of her own, and should follow neither after Assyria nor after Egypt, but should wait and do what Yhwh commanded (*ib.* ii. 18, 36). But in the course of events he felt impelled to take active part in political affairs. This was during the time of Zedekiah, who had been placed on the throne by Nebuchadnezzar after the deportation of Jehoiachin (*ib.* xxvii., xxviii.). When, in the fourth year of Zedekiah, ambassadors from the surrounding nations came to deliberate with the King of Judah concerning a common uprising against the Babylonian king, a prophet by the name of Hananiah

Advises Acceptance of Yoke.

proclaimed in the Temple the speedy return of Jehoiachin and his fellow exiles as well as the bringing back of the Temple vessels which had been carried off by Nebuchadnezzar, supporting his prophecy by the announcement that the "word of Yhwh" was to the effect that he would "break the yoke of the king of Babylon" (*ib.* xxviii. 4). Jeremiah then appeared in the market-place with a yoke of wood and counseled the ambassadors, King Zedekiah, and his people to submit voluntarily to the Babylonian power. When Jeremiah appeared also at the Temple, Hananiah tore the yoke from his shoulders and repeated his prophecy of good tidings (*ib.* v. 10 *et seq.*). Jeremiah likewise advised the exiles in Babylon to settle there quietly (*ib.* xxix.), which caused one of them to write to the high priest in Jerusalem directing him to fulfil his duty, to watch over every mad man in the Temple and over every one that "maketh himself a prophet" and, consequently, to put Jeremiah "in prison and in the stocks" (*ib.* xxix. 26).

Second Imprisonment.

But destiny was soon fulfilled, and with it came new trials for Jeremiah. Zedekiah had been obliged to succumb to the insistence of the war party and to rebel against Nebuchadnezzar. The Babylonians then marched against Judah to punish Zedekiah and quell the rebellion. When Jeremiah's prophecy was near its fulfilment, the king sent often for him to consult with him and to ascertain how it would go with the people and with himself and what he should do to save himself. Jeremiah told him plainly that the Babylonians would conquer and advised him to surrender before the beginning of hostilities, in order to ward off the worst. Zedekiah, however, did not dare follow this advice, and thus the catastrophe came to pass, not without Jeremiah having in the meantime to endure many hardships owing to the siege. Since he undoubtedly prophesied the overthrow of Jerusalem by the Babylonians, and warned against resisting them as well as against trusting in the Egyptians for help, he was regarded as a traitor to his country; and for that reason and because his openly expressed conviction robbed the besieged of their courage, he was placed in confinement. He was treated as a deserter also because he desired to go to his native city on a personal matter at a time when the Babylonians had temporarily raised the siege to march against Hophra, the Egyptian king (the "Apries" of Herodotus), who was advancing against them. Jeremiah was arrested and thrown into a dungeon, whence he was released by the king. He was then confined in the court of the guard in the royal castle, as his discouraging influence on the soldiers was feared. Although he was allowed a certain freedom there, since he continued to make no secret of his conviction as to the final downfall of Judah, the king's officers threw him into an empty cistern. From this also he was rescued by a eunuch with the king's permission, being saved at the same time from death by starvation (*ib.* xxxvii., xxxviii.). He then remained in the lighter captivity of the court prison until he was liberated at the capture of Jerusalem by the Babylonians.

Taken to Egypt.

(d) **During the Time After the Fall of Jerusalem:** The Babylonians handed Jeremiah over to the care and protection of the governor Gedaliah, with whom he lived at Mizpah. After the murder of the governor, Jeremiah seems to have been carried off by Ishmael, the murderer of Gedaliah, and to have been rescued by Johanan and his companions. This may be concluded from the fact that the prophet, with Baruch, was among the non-deported Jews who thought of going to Egypt through fear of the Babylonians. During a stay near Beth-lehem he was asked for God's will on the matter. When, after ten days, he received the answer that they should remain in the country, his warning voice was not heard, the cry being raised against him that Baruch had incited him to give this counsel. Accordingly the Jews dragged the prophet with them, as a hostage (Duhm ["Theologie der Propheten," p. 235]: "as an amulet") to Tahapanhes (*i.e.*, Daphne, on the eastern branch of the Nile). Here Jeremiah continued to prophesy the destruction by the Babylonians of his fellow refugees as also of the Pharaohs and of the temples of Egypt (*ib.* xxxvii.-xliv.). Here also he must have experienced the anger of the women refugees, who could not be prevented by him from baking cakes and pouring out wine to the "queen of heaven" (*ib.* xliv. 15 *et seq.*).

Jeremiah probably died in Egypt. Whether his countrymen killed him, as tradition says, can, on account of the lack of historical data, be neither affirmed nor denied. But his assassination does not seem wholly impossible in view of the angry scene just mentioned. At any rate, his life, even as it had been a continual struggle, ended in suffering. And it was not the least of the tragic events in his life that his chief opponents belonged to the same two classes of which he himself was a member. The priests fought him because he declared sacrifice to be of little importance, and the prophets because he declared that it was self-interest which prompted them to prophesy good for the people.

Strong Personality.

§ **III. Character:** (a) **Character of Personality:** The tragic element in Jeremiah's life has already been mentioned. It was heightened by the subjective trait which is peculiar to Jeremiah more than to other prophets, even the older ones. This personal suffering over the hard fate which he is obliged to proclaim to his people as God's changeless will is so strong that he even makes the attempt in earnest intercession to move God to a milder attitude toward the guilty. "Remember that I stood before thee to speak good for them and to turn away thy wrath from them" (*ib.* xviii. 20). He would undoubtedly like to keep silence and yet must speak: "I said, I will not make mention of him, nor speak any more in his name. But his word was in mine heart as a burning fire shut up in my bones, and I was weary with forbearing, and I could not stay"—*i.e.*, "I struggled to keep it within me and I could not" (*ib.* xx. 9). Yhwh even has to forbid his intercession for the sinners (*ib.* vii. 16, xi. 14, xiv. 11), and to forbid the people to seek his intercession (*ib.* xlii. 2, 4). Jeremiah's sympathy for his countrymen who have been punished by God is so great that at one time the prophetical declaration to the people is changed into the people's petition: "O Lord, correct me, but with judgment; not in thine anger, lest thou bring me to nothing" (*ib.* x. 24). In moving terms he describes the pain which he feels within him, in his "very heart," when he hears the sound of war and must announce it to the people (*ib.* iv. 19, viii. 18-22); and in despair over his sad life he curses the day of his birth (*ib.* xx. 14-18).

With this intense sensitiveness on the part of the prophet, it should not cause surprise that, on the other hand, his anger breaks forth against his persecutors and he desires a day of destruction to come upon them (*ib.* xvii. 18).

Despondent Tone.

(b) **Character of His Writing:** It is doubtless due to this despondent and often despairing frame of mind that his words frequently make a dull and lifeless impression which is not remedied by a heaping up of synonymous terms; and this is all the more noticeable because the rhythm of the speeches is very feeble and frequently almost disappears. Although this may have been due in part to the fact that Jeremiah did not write his book himself, it is still undeniable that there is a monotony in the contents of his speeches. This may be traced to the conditions of his age. The prophet is always complaining of the sins of the people, particularly of their idolatry, or else describing the catastrophe which is to burst upon them through the hordes from the north. Seldom is there a brighter outlook into a better future. The hope which he had at the beginning, that the people would recognize the evils of idolatry and would turn again to God with inward repentance (*ib.* ii.-iv. 4), entirely disappears later in face of the utter perverseness of the people; as does the other hope that Ephraim, the lost favorite of Yhwh, that child of Rachel who had been lost sight of for 100 years, would return from "out of the desert." But when Jeremiah speaks from the depths of his soul the monotony of the content is relieved by the charm of the language in which he, as no other prophet, is able to relate God's words of love to his faithless wife Judah.

Relieved by Consolation.

From his choice of words it may be concluded that Jeremiah, like Isaiah, was an educated man. The pictures which he paints of outdoor life show a deep, delicate appreciation of nature. The voices of the desert sound in his poems; he speaks of the swift-footed dromedary running to and fro, of the cattle grown wild on the plains, of the thirsty wild ass gasping for breath with dim eyes, and of the bird of prey which the fowler has tied to a stake in order to attract his victim. Even in the description of chaos (*ib.* iv. 25) "Jeremiah does not forget the birds" (Duhm, in the introduction to his translation of Jeremiah, p. xxii.). His is, indeed, rather a lyrical nature, since even without a picture he tarries sometimes in an appreciative contemplation of nature, which corresponds to his sensitive comprehension of the human heart. God's greatness is manifested to him in the sand on the shore, which is placed as an eternal boundary for the sea: "and

His Similes.

though the waves thereof toss themselves, yet can they not prevail; though they roar, yet can they not pass over it" (*ib.* v. 22). He observes the lengthening shadows as the day is sinking (*ib.* vi. 4), or the dry wind of the high places which comes in from the wilderness and is too strong to serve either for fanning or for cleansing (*ib.* iv. 11). Now and then with a special touch he raises his pictures of human life above the vagueness which on account of the suppression of details is common to the Old Testament illustrations and examples. He furnishes the "smelter" (צורף), who has been a stereotyped example since the oldest prophets, with bellows (*ib.* vi. 29); as symbols of the joyful existence which his prophecies foretelling punishment will drive away, he mentions, besides the voices of the bridegroom and of the bride, the sound of the millstones and the light of the candle (*ib.* xxv. 10; comp. *ib.* vii. 34, xvi. 9). He also observes how the shepherd counts the sheep of his flock (*ib.* xxxiii. 13).

The symbolic acts of which he makes frequent use, whether he actually carries them out, as in breaking the earthen pitcher, in putting on the cords, and in placing the yoke on his neck, or merely imagines them, as in the allegories in Jer. xiii. 1 *et seq.*, are simple and easily intelligible (Baudissin, "Einleitung," pp. 420 *et seq.*).

Universality of the Godhead.

(c) Character of His Religious Views: In conformity with the subjectivity of his nature, Jeremiah raised the conception of the bond between God and His people far above the conception of a physical relation, and transferred piety from mere objective ceremonies into the human heart (comp. *ib.* iv. 4, xvii. 9, xxix. 13, and, if Jeremianic, also xxxi. 31 *et seq.*). Through this conception of man's relation to the divinity, the idea of the divine universality, if not created by him, was yet (if Amos ix. 2-4, 5 *et seq.* be excluded) very clearly demonstrated. Although a large part of the passages in which the universality of God is most clearly expressed (Jer. xxvii. 5, 11; xxxii. 19; xlix. 11) are doubtful as regards their authorship, there are nevertheless undoubted passages (*ib.* xii. 14 *et seq.*, and xviii. 7 *et seq.*) in which Jeremiah, although from the standpoint that YHWH is the special God of Israel, expresses his conviction that He can reject nations other than Israel and afterward take them again into His favor. If in these passages the particularistic conception of God is not completely abandoned, nevertheless His universality is the direct consequence of the portrayal, which was first given by Jeremiah, of His omnipresence and omnipotence, filling heaven and earth (*ib.* xxiii. 23; comp. ii. 16). Thus Jeremiah, starting out from his conception of God, can characterize the gods of the heathen as "no gods," and can express his conviction that "among the idols of the heathen there is not one which can cause rain," whereas YHWH has made all (*ib.* xiv. 22; comp. xvi. 19 *et seq.*). But in spite of this tendency toward a universalistic conception of God, which later became a firm article of belief, the barriers of the national religion had not yet fallen in Jeremiah's mind. This is shown most clearly by the fact that even he conceives of a final restoration of the tribe of Israel.

E. G. H. V. RY.

——**In Rabbinical Literature:** Jeremiah, a descendant of Rahab by her marriage with Joshua (Sifre, Num. 78; Meg. 14b, below), was born during the persecution of the prophets under Jezebel (Gen. R. lxiv. 6; Rashi on Jer. xx. 14 reads, probably correctly, "Manasseh" instead of "Jezebel"). The lofty mission for which Jeremiah was destined was evident even at his birth; for he not only came into the world circumcised (Ab. R. N. ii. [ed. Schechter, p. 12]; Midr. Teh. ix. [ed. Buber, p. 84]), but as soon as he beheld the light of day he broke out into loud cries, exclaiming with the voice of a youth: "My bowels, my bowels! I am pained at my very heart; my heart maketh a noise in me," etc. (Jer. iv. 20). He continued by accusing his mother of unfaithfulness; and as the latter was greatly astonished to hear this unbecoming speech of her new-born infant, he said: "I do not mean you, my mother. My prophecy does not refer to you; I am speaking of Zion and Jerusalem. They deck out their daughters, and clothe them in purple, and put golden crowns on their heads; but the robbers shall come and take these things away."

Jeremiah refused God's call to the prophethood, and referred to Moses, Aaron, Elijah, and Elisha, all of whom, on account of their calling, were subjected to sorrows and to the mockery of the Jews; and he excused his refusal with the plea that he was still too young. God, however, replied: "I love youth because it is innocent; it was for this reason that when I led Israel out of Egypt I called him 'my son' [comp. Hosea xi. 1], and when I think lovingly of Israel, I speak of it as of a boy [Jer. ii. 2]; hence do not say 'I am a boy.'" Then God handed to Jeremiah the "cup of wrath," from which he was to let the nations drink; and when Jeremiah asked which nation should drink first, the answer was "Israel." Then Jeremiah began to lament his fate, comparing himself with the high priest who was about to perform in the Temple the ceremonies prescribed in the case of a woman suspected of adultery (Num. v. 12 *et seq.*), and who, when he approached her with the "cup of the bitter water," beheld his own mother (Pesiḳ. R. 26 [ed. Friedmann, p. 129a, b]).

His Prophetic Activity.

The prophetic activity of Jeremiah began in the reign of Josiah; he was a contemporary of his relative the prophetess Hulda and of his teacher Zephaniah (comp. Maimonides in the introduction to "Yad"; in Lam. R. i. 18 Isaiah is mentioned as Jeremiah's teacher). These three prophets divided their activity in such wise that Hulda spoke to the women and Jeremiah to the men in the street, while Zephaniah preached in the synagogue (Pesiḳ. R. *l.c.*). When Josiah restored the true worship, Jeremiah went to the exiled ten tribes, whom he brought to Palestine under the rule of the pious king ('Ar. 33a). Although Josiah went to war with Egypt against the prophet's advice, yet the latter knew that the pious king did so only in error (Lam. R. *l.c.*); and in his dirges he bitterly laments the king's death, the fourth chapter of the Lamentations beginning with a dirge on Josiah (Lam. R. iv. 1; Targ. II Chron. xxxv. 25).

Under Jehoiakim the prophet's life was a hard one; not only did the wicked king burn the early chapters of Lamentations, but the prophet was even in danger of his life (M. Ḳ. 26a; Lam. R., Introduction, p. 28). He fared still worse, however, under Zedekiah, when he had to withstand many attacks both upon his teachings and upon his life. On account of his descent from the proselyte Rahab he was scorned by his contemporaries as one who had no right to reproach the Jews for their sins (Pesiḳ., ed. Buber, xiii. 115b), and they furthermore accused him of unchastity (B. Ḳ. 16b). The hatred of the priests and of the war party against Jeremiah brought about his imprisonment on a false accusation by one of them, Jeriah, a grandson of HANANIAH, an old enemy of Jeremiah. His jailer Jonathan, a relative of Hananiah, mocked him with the words: "Behold, what honors your friend has brought upon you! How fine is this prison in which you now are; truly it is like a palace!" Yet the prophet remained steadfast; and when the king asked whether Jeremiah had a prophecy for him, the prophet fearlessly answered: "Yes: the King of Babel will lead you into exile." When he saw how angry the king grew on hearing this, he tried to change the subject, saying: "Lo, even the wicked seek a pretext when they revenge themselves on their enemies! How much greater right has one to expect that a just man will have sufficient reason for bringing evil upon any one! Your name is 'Zedekiah,' indicating that you are a just 'ẓaddiḳ'; I therefore pray you not to send me back to prison." The king granted this request; but he was unable to withstand for long the clamorings of the nobles, and Jeremiah was cast into a muddy pit, the intention being that he should perish therein. As there was enough water in the pit to drown a man, the design of his enemies would have been carried out had not God miraculously caused the water to sink to the bottom and the dirt to float, so that Jeremiah escaped death. Even then his former keeper, Jonathan, mocked the prophet, calling to him: "Why do you not rest your head on the mud so that you may be able to sleep a while?" At the instance of Ebed-melech, the king permitted Jeremiah to be rescued from the pit. Jeremiah at first did not answer Ebed-melech when he called to him, because he thought it was Jonathan. Ebed-melech, who thought that the prophet was dead, then began to weep, and it was only after he had heard the weeping that Jeremiah answered; thereupon he was drawn up from the mire (Pesiḳ. R. 26 [ed. Friedmann, p. 130a, b]; comp. EBED-MELECH IN RABBINICAL LITERATURE).

During the Destruction of the Temple.

The enemies and adversaries of the prophet were not aware that to him alone they owed the preservation of the city and the Temple, since his merits were so great in the eyes of God that He would not bring punishment upon Jerusalem so long as the prophet was in the city (Pesiḳ. R. *l.c.* [ed. Friedmann, p. 131a]; somewhat different in the Syriac Apoc. Baruch, ii.). The prophet was therefore commanded by God to go to Anathoth; and in his absence the city was taken and the Temple destroyed. When Jeremiah on his return beheld smoke rising from the Temple, he rejoiced because he thought that the Jews had reformed and were again bringing burnt offerings to the sanctuary. Soon, however, he discovered his error, and began to weep bitterly, lamenting that he had left Jerusalem to be destroyed. He now followed the road to Babylon, which was strewn with corpses, until he overtook the captives being led away by Nebuzar-adan, whom he accompanied as far as the Euphrates (Pesiḳ. R. *l.c.*; comp. Syriac Apoc. Baruch, *l.c.*). Although Jeremiah, by the express command of Nebuchadnezzar, was allowed to come and go as he pleased (Jer. xxxix. 12), yet when he saw captives he voluntarily caused himself to be chained or otherwise bound to them, notwithstanding Nebuzar-adan, who, anxious to carry out the orders of his master, always unchained him. At last Nebuzar-adan said to Jeremiah: "You are one of these three: a false prophet, one who despises suffering, or a murderer. For years you have prophesied the downfall of Jerusalem, and now when the prophecy has been fulfilled, you are sorry, which shows that you yourself do not believe in your prophecies. Or you are one who voluntarily seeks suffering; for I take care that nothing shall happen to you, yet you yourself seek pain. Or perhaps you are hoping that the king will kill me when he hears that you have suffered so much, and he will think that I have not obeyed his commands" (Pesiḳ., ed. Buber, xiv. 113; Lam. R., Introduction, p. 34).

After the prophet had marched with the captives as far as the Euphrates, he decided to return to Palestine in order to counsel and comfort those that had remained behind. When the exiles saw that the prophet was about to leave them, they began to cry bitterly, saying: "O father Jeremiah, you too are abandoning us!" But he answered: "I call heaven and earth to witness, had you shed a single tear at Jerusalem for your sins you would not now be in exile" (Pesiḳ. R. 26 [ed. Friedmann, p. 131b]; according to Pesiḳ., ed. Buber, and Lam. R. *l.c.* God commanded Jeremiah to return to Palestine). On the way back to Jerusalem he found portions of the bodies of the massacred Jews, which he picked up lovingly one after another and placed in various parts of his garments, all the while lamenting that his warnings had been heeded so little by these unfortunates (Pesiḳ., ed. Buber, and Lam. R. *l.c.*).

Vision of the Mourning Woman.

It was on this journey that Jeremiah had the curious vision which he relates in the following words: "When I went up to Jerusalem, I saw a woman, clad in black, with her hair unbound, sitting on the top of the [holy] mountain, weeping and sighing, and crying with a loud voice, 'Who will comfort me?' I approached her and said, 'If you are a woman, then speak; but if you are a spirit, then depart from me.' She answered, 'Do you not know me? I am the woman with the seven children whose father went far oversea, and while I was weeping over his absence, word was brought to me that a house had fallen in and buried my children in its ruins; and now I no longer know for whom I weep or for whom my hair is unbound.' Then said I to her, 'You are no better than my mother Zion, who became a pasture for the beasts of the field.' She answered, 'I am your mother Zion: I am the mother of the seven.' I said, 'Your misfortune is like that of Job. He was deprived of his sons and daughters, and so were you; but as fortune again smiled upon him, so it will likewise smile upon you'" (Pesiḳ. R. *l.c.*; in IV Esd. there is mentioned a similar vision of Ezra; comp. Lévi in "R. E. J." xxiv. 281–285).

On his return to Jerusalem it was the chief task of the prophet to protect the holy vessels of the Temple from profanation; he therefore had the holy tent and the Ark of the Covenant taken [by angels ?] to the mountain from which God showed the Holy Land to Moses shortly before his death (II Macc. ii. 5 *et seq.*; comp. Ark in Rabbinical Literature). From the mountain Jeremiah went to Egypt, where he remained until that country was conquered by Nebuchadnezzar and he was carried to Babylon (Seder 'Olam R. xxvi.; comp. Ratner's remark on the passage, according to which Jeremiah went to Palestine again).

The Christian legend (pseudo-Epiphanius, "De Vitis Prophetarum"; Basset, "Apocryphen Ethiopiens," i. 25–29), according to which Jeremiah was stoned by his compatriots in Egypt because he reproached them with their evil deeds, became known to the Jews through Ibn Yaḥya ("Shalshelet ha-Ḳabbalah," ed. princeps, p. 99b); this account of Jeremiah's martyrdom, however, may have come originally from Jewish sources. Another Christian legend narrates that Jeremiah by prayer freed Egypt from a plague of crocodiles and mice, for which reason his name was for a long time honored by the Egyptians (pseudo-Epiphanius and Yaḥya, *l.c.*). The assertion—made by Yaḥya (*l.c.* p. 101a) and by Abravanel (to Jer. i. 5), but not by Isserles, as Yaḥya erroneously states—that Jeremiah held a conversation with Plato, is also of Christian origin.

In haggadic literature Jeremiah and Moses are often mentioned together, their life and works being presented in parallel lines. The following old midrash is especially interesting in connection with Deut. xviii. 18, in which a prophet like Moses is promised: "As Moses was a prophet for forty years, so was Jeremiah; as Moses prophesied concerning Judah and Benjamin, so did Jeremiah; as Moses' own tribe [the Levites under Korah] rose up against him, so did Jeremiah's tribe revolt against him; Moses was cast into the water, Jeremiah into a pit; as Moses was saved by a female slave (the slave of Pharaoh's daughter), so Jeremiah was rescued by a male slave [Ebed-melech]: Moses reprimanded the people in discourses, so did Jeremiah" (Pesiḳ., ed. Buber, xiii. 112a; comp. Matt. xvi. 14).

s. s. L. G.

JEREMIAH, BOOK OF.—Biblical Data: Contents: At the beginning of the book is a superscription (i. 1–3) which, after giving the parentage of Jeremiah, fixes the period of his prophetical activity as extending from the thirteenth year of Josiah to the eleventh of Zedekiah (*i.e.*, the year of the second deportation, 586 B.C.). This period certainly does not cover the whole contents of the book; hence probably the superscription was originally that of an older book of smaller compass. This is followed by the first part, i. 4–xxxviii. 28a, containing prophecies concerning the kingdom of Judah and incidents from the life of the prophet up to the destruction of Jerusalem and the second deportation. Only one passage treats of a different subject, viz., ch. xxv. 13 *et seq.*, containing Yhwh's command to Jeremiah, according to which the prophet was to proclaim God's judgment to foreign peoples. The second part of the book, xxxviii. 28b–xliv. 30, contains prophecies and narrations from the period following the destruction of Jerusalem. As an appendix to this, in ch. xlv., is a short warning to Baruch on the occasion of his writing down the words of Jeremiah. A third part, xlvi.–li., comprises prophecies against foreign peoples. At the end are given, by way of appendix, historical data (lii.) concerning Zedekiah, the deportation of the captives to Babylon, and the change in the fortunes of King Jehoiachin.

Three Sections.

——**Critical View: § I. The Prophecies in Part I.:** In the first part no consistent plan of arrangement, either chronological or material, can be traced. The speeches not being separated by superscriptions, and data generally (though not always as to time and occasion) being absent, it is very difficult to fix the date of composition. In this first part, however, may be distinguished different groups which, with a single exception, reflect substantially the successive phases of the development of Jeremiah's prophetic activity. These groups are five in number, as follows:

(1) Ch. i. 4–vi. 30, belonging to the reign of Josiah. Its first passage, describing the calling of the prophet, is also chronologically the oldest (iii. 6b–18, fixed by the superscription as belonging to the time of Josiah, does not harmonize with the assumed historical background [see below, § II.]; the superscription is undoubtedly a later addition).

(2) Ch. vii.–xx., in the main, of the time of Jehoiakim. This group contains passages that belong to earlier and later dates respectively. For instance, ch. xi. 1–8 is earlier: the mention of the "words of the covenant" assigns it to the antecedent period (Josiah) and as having been written soon after the discovery of the Book of Deuteronomy. Ch. xiii. is certainly later, and probably belongs to the time of the young king Jehoiachin (see below, § II.). Other passages in this group should be excluded as not being by Jeremiah, or at least as having been only partially written by him: ch. ix. 22 *et seq.*; ch. ix. 24 *et seq.*; ch. x. 1–16; and the sermon on the Sabbath, ch. xvii. 19–27 (see below, § II.).

(3) Speeches from various periods: (*a*) a proclamation of the certain fall of Jerusalem made, according to the superscription to Zedekiah and the people, during the siege of Jerusalem, *i.e.*, about 588 B.C. (xxi. 1–10); (*b*) menacing prophecies against the kings of Judah in the time of Jehoiakim (608;

xxi. 11–xxii. 19), completed by the passage xxii. 20–30, descriptive of the leading away of Jehoiachin into captivity (597); (*c*) threats against the "unfaithful shepherds" (*i.e.*, the prophets), the promise of peace and of the real shepherd (after 597), and warnings against false prophets and godless priests (perhaps in the time of Jehoiakim; xxiii. 1–8, 9–40); (*d*) the vision of the two baskets of figs, illustrating the fate of the captives and of those who were left behind, from the period after the first deportation by Nebuchadnezzar, in 597 (xxiv.); (*e*) threats of punishments to be inflicted on Judah and the surrounding nations, in the fourth year of Jehoiakim, *i.e.*, the year of the battle of Carchemish (605; xxv.); (*f*) the first of the historical passages recounting Jeremiah's prophecy in the Temple (comp. vii.), his arrest, his threatened death, and his rescue, in which connection the martyrdom of the prophet Uriah is briefly mentioned (xxvi.).

Dated Prophecies.

(4) Utterances from the time of Zedekiah (see § II.), with an appendix, the last connected prophecy of any length, in ch. xxxv., treating of the fidelity of the Rechabites and of the unfaithfulness of Judah. This dates from a somewhat earlier period, that of Jehoiakim (because certainly before 597), and thus forms a transition to the first passages of the narrative sections.

(5) The fifth group of part I. consists of the first half of the historical narrative concerning Jeremiah's life and work, xxxvi.–xxxviii. 28a, and may be thus divided: (*a*) account of the writing, destruction, and rewriting of the prophecies of Jeremiah under Jehoiakim (xxxvi.); (*b*) narratives and sayings from the time of Zedekiah, who is introduced as a new ruler at the beginning of this historical account (xxxvii. 1), although often mentioned before in the prophecies (xxxvii.–xxxviii. 28a).

§ II. Displaced, Disputed, and Non-Authentic Passages of Part I.: In group 2 the short admonition in ix. 22 *et seq.* is certainly not genuine; it is a warning against self-glorification and an appeal to those who would boast to glory in the knowledge of God instead. As its sententious style indicates, it was probably taken from a collection of wise sayings. The question as to the genuineness of the second short utterance, ix. 24 *et seq.*, which proclaims God's punishment upon the uncircumcised—the heathen who are uncircumcised in the flesh, and the Israelites who are uncircumcised in heart—can not be so easily decided, since the Biblical conception of being uncircumcised in heart is found elsewhere in Jeremiah.

Relations with Deutero-Isaiah.

Again, the following section, x. 1–16, is certainly not genuine. Here, in a style wholly like that of Deutero-Isaiah, the speaker mocks at the unreality of idols, which exist only as images and hence are not to be feared; this recalls the time of Deutero-Isaiah and the idols of Babylon rather than the period of Jeremiah and the tendency of his contemporaries to worship other gods than Yhwh. The interpolated Aramaic verse (x. 11) is held by Duhm to be a magic formula with which the later Jews, who did not know much Hebrew, used to exorcise the various evil spirits in the air, shooting stars, meteors, and comets. In xi.–xx., besides various additions to Jeremiah's sayings which can not be by the prophet himself, there are two passages which till now have generally, and probably rightly, been held to be genuine, although they do not belong to the time of Jehoiakim. That the passage xi. 1–8 is earlier, and belongs to the time of Josiah, has been explained above (§ I.). Ch. xiii., however, must have been written later than Jehoiakim's time; after a symbolic narrative of a girdle buried beside the Euphrates, and which, in that it is soiled and unfit for use, represents Israel and Judah, the passage treats of the king and "queen"—that is, the queen mother—to whom it is announced that they must descend from their throne; and the deportation of the whole of Judah is similarly foretold. The king in this case, however, with whom his mother is mentioned on equal terms, is certainly (comp. xxii. 26, xxix. 2) the youthful Jehoiachin, and the time is shortly before his deportation to Babylon. The one non-authentic passage incorporated in group 2 is that concerning the Sabbath, xvii. 19–27. The reason why the prophet can not be credited with the authorship of this passage, though in form and content it is not unlike Jeremiah, is the high value put upon the observance of holy days, which is wholly foreign to the prophet. The author of the passage not only recommends the keeping of the Sabbath day holy as a day of rest ordained by God, but he even goes so far as to make the possibility of future salvation, and even directly the destruction of Jerusalem, depend upon the observance or non-observance of this day.

Passage on Sabbath Not Genuine.

In group 3, ch. xxv. is doubtful (see below, § IV., in connection with the prophecy against foreign peoples in xlvi.–li.).

In group 4 (of the time of Zedekiah) certain parts of the promises in xxx.–xxxiii. have given rise to doubt in more than one respect. Of the three sections in this collection, xxx. *et seq.*, xxxii., and xxxiii., the middle one may, however, be accepted without reserve. This section begins (xxxii. 9) with a relation of Jeremiah's purchase of a field in Anathoth in accordance with ancient usage, at the time when the Babylonians were already besieging Jerusalem (comp. xxxii. 1 with lii. 5, in opposition to lii. 4), and of Jeremiah's prophecy to Zedekiah of the conquest of the city and of the deportation to Babylon. The divine promise is appended to this narration: "Houses and fields and vineyards shall be possessed again" (*ib.* verse 15), which, upon a question of the prophet's, is explained thus (*ib.* verses 26 *et seq.*): Jerusalem will be burned by the Chaldeans on account of its sins, but afterward Yhwh will collect His people, scattered in all lands. He will make an everlasting covenant with them, and will cause them with rejoicing to settle again in this land (*ib.* verse 41).

The first of the three sections, xxx. *et seq.*, foretells another day of terror for Jacob, but also promises liberation from foreign rule, punishment of the enemy, the rebuilding of the destroyed cities by the people (who will have begun to increase again and whose numbers will have been swelled by the return of Ephraim), and the making of a new covenant. In

Ungenuine Passages in Later Sections.

this section the following passages are doubtful as regards a Jeremianic origin: the passage in which the servant of God, Jacob, is comforted in his exile with words of Deutero-Isaiah (xxx. 10 *et seq.*; comp. Isa. xl. *et seq.*); the threat inserted among the words of promise (xxx. 23 *et seq.*; comp. xxiii. 19 *et seq.*, where this threat occurs again, likewise in an inappropriate place); the description of Yhwh's power on the sea (xxxi. 35b, similar to Isa. li. 15); and various other passages which have many points of contact with Deutero-Isaiah. A considerable portion of this section is shown to be secondary matter by the fact that it is lacking in the text of the Septuagint. At any rate, examination leads to the conclusion that this section, like so much else in the Book of Jeremiah, was worked over afterward, although it is not justifiable to deny to Jeremiah the authorship of the whole of the section, nor to assume that it was written by a post-exilic author. Such a writer would have had more interest in the hope that the Judeans, only a part of whom had come back, would all return home, whereas for a prophet who wrote immediately before the downfall of Judah it was more natural to recall the overthrow of the Northern Kingdom, and to express the hope that with the return of Ephraim Judah also would return, although its present downfall seemed certain to him.

In the third of these sections, ch. xxxiii., the conclusion (xxxiii. 14-26) is suspicious. It is missing in the Septuagint, although no plausible reason for the omission is apparent. Not to speak of smaller matters, the fact that the people among whom (according to verse 24) the prophet was sojourning, and who were wholly opposed to the compatriots of the prophet, can only have been Babylonians—who indeed might have said insultingly of Israel that "it was no more a nation before them" (*ib.*)—does not seem to accord with Jeremiah's authorship. The passage must consequently have been written by one of the exiles in Babylon and not by Jeremiah, in whose time such a taunt could not have been uttered either in Palestine or later in Egypt.

Ch. xxvi. and xxxv.-xlv.

§ **III. The Historical Sections of Parts I. and II.:** The historical passages contained in xxvi. and xxxvi.-xlv. display such an exact knowledge of the events described in the life of Jeremiah, and contain so many interesting details, that as a matter of course they were formerly considered to have been written by a pupil of Jeremiah in close touch with him. When Kuenen and other commentators object that in certain passages the single episodes are not properly arranged and that details necessary for a complete understanding of the situation are lacking, it must be remembered that it is just an eye-witness who would easily pass over what seemed to him as matter of course and likewise displace certain details. Moreover, a comparison with the text of the Septuagint shows that in the historical as in the prophetical passages many changes were made after composition. It is therefore neither necessary nor advisable to set, with Kuenen, 550 B.C. as the date of the first edition of the book; but even if that late date be accepted one must still suppose that the notes of a pupil and eye-witness had been used as material. If, however, the former and generally prevalent opinion is maintained (which has been readopted also by Duhm), namely, that the historical passages were written by a pupil of Jeremiah, there can be no doubt that this pupil was Baruch.

Work of Baruch.

Since it is known that it was Baruch and not Jeremiah who first wrote down the prophecies, and since in all cases the speeches in the historical portions can not be taken out of their setting, it seems the most natural thing to suppose that Baruch was also directly concerned in the composition of the historical passages. But this does not at all exclude the possibility of the insertion, shortly after the passages had been written and put together, of various details and episodes. This theory is supported by Jeremiah's admonition to Baruch (in xlv.), which, although addressed to him by the prophet on the occasion of Jeremiah dictating the prophecies in the time of Jehoiakim, yet stands at the end of the section containing prophecies against Judah. The fact that this admonition occurs at the end of the original Book of Jeremiah (concerning xlvi. *et seq.* see § IV.) can only mean that Baruch placed it at the end of the book edited by him as a legitimation of his labor.

§ **IV. The Prophecies Against Foreign Peoples in Part III.:** Ch. xxv. speaks of the direction received by Jeremiah from God to proclaim His anger to foreign peoples. In the fourth year of Jehoiakim—that is, the year of the battle of Carchemish and of Nebuchadnezzar's victory and accession to the throne—Jeremiah proclaims that Yhwh, in revenge for Judah's sins, will bring His servant Nebuchadnezzar and the peoples of the north against Judah and the surrounding peoples; that they will serve the King of Babylon for seventy years; and that at the end of this time Yhwh will punish the King of Babylon and the Chaldeans. In connection with this, Jeremiah is further told to pass the wine-cup of divine wrath to all the nations to whom he is sent, and all the nations who must drink of the cup are enumerated.

Prophecy Not by Jeremiah.

But however appropriate it may have been for Jeremiah to announce the downfall of foreign nations (comp. xxxvi. 2 and i. 5), and however much the expression "cup of wrath" may sound like one of Jeremiah's, since this illustration occurs often after him and accordingly probably goes back to him, yet this prophecy as it now stands (in xxv.) can not have been written by him. The proclamation of the punishment of Babylon (*ib.* verses 12-14) interrupts the connection of the threatening of the nations by Babylon. Also the words "all that is written in this book, which Jeremiah hath prophesied against all the nations" (verse 13) can not of course have originated with Jeremiah. Finally, the enumeration of the nations that must drink from the cup of wrath (verses 17-26) is not Jeremianic; indeed, some of the nations were located far from Jeremiah's horizon, and the concluding remark (verse 26), with the puzzling word "Sheshach" (*i.e.*, Babylon), certainly dates from a much later period. This passage characteristically illustrates the fact that more than one hand worked on the amplification, and that such passages arose in several stages, as may be observed in detail by a comparison with the Septuagint text (see § VI.).

The question next arises as to whether the prophecies against foreign nations contained in xlvi.-li. are really those which, according to xxv., were to be expected as the latter's amplification. This question seems all the more natural because in the text of the Septuagint those prophecies are actually incorporated in xxv. If l. *et seq.*, a long oracle dealing with the sentence against Babylon, be left out of consideration, there can be no doubt that the section xlvi.-xlix. has in some way a Jeremianic basis. The single oracles of this section are in part expressly referred to Jeremiah in the heading, and the victory of Nebuchadnezzar is in part given as their occasion. At any rate the hypothesis that this section is a working over of original Jeremianic material is to be preferred to the difficulties attending the various other theories that have been suggested to explain the later origin of xlvi.-xlix. On the face of it, it is hardly probable that a later author would have written a whole series of oracles and have artificially made them seem to belong to the time of Nebuchadnezzar, merely for the sake of enriching the Book of Jeremiah. If it is suggested that some one else, perhaps Alexander the Great, was intended by the Nebuchadnezzar of these oracles, it must be objected that even to the last judgment, that against Elam (which, however, did not originally belong in this section; see below), which might be taken to mean Persia, no reference to post-Jeremianic events can be found.

Oracles Worked Over.

A detailed examination, however, shows that in most of these prophecies only a Jeremianic basis is possible. The prophecy concerning the Philistines in xlvii. (but without the heading) is the one that could most readily be accepted as belonging as a whole to Jeremiah.

On the other hand, it is to be supposed that all the other oracles underwent a more or less extensive revision, so that they do not give the impression of being real prophetic utterances, but seem rather to be compilations by later scholars, who also made use of the oracles of other prophets, especially of the exilic and post-exilic passages in Isaiah (comp. Jer. xlviii. 43 *et seq.* with Isa. xxiv. 17, 18a; Jer. xlix. 18 with Isa. xiii. 19 *et seq.*; Jer. xlix. 24 with Isa. xiii. 8). This working over of the material explains the lack of perspicuity and the non-adherence to the historical situation which frequently characterize these prophecies. The following oracles are contained in this section: (*a*) the oracle against Egypt, in two parts, xlvi. 1-12 and xlvi. 13-28 (comp. xlvi. 27-28 [= xxx. 10 *et seq.*] with the consolations of Deutero-Isaiah); (*b*) that against the Philistines, xlvii.; (*c*) that against Moab, xlviii., which in parts recalls Isa. xv. *et seq.*; (*d*) that against Ammon, xlix. 1-6; (*e*) that against Edom, xlix. 7-22, which has much in common with that of Obadiah; (*f*) that against Damascus and other Aramaic cities, xlix. 23-27; (*g*) that against Kedar and other Arabic tribes, xlix. 28-33; and (*h*) that against Elam, xlix. 34-39. Whereas the other nations named all lay within Jeremiah's horizon, this was not the case with Elam, since Judah had no direct dealings with this country until after the Exile. This alone would not, however, be a sufficient reason for denying that Jeremiah wrote the oracle, especially since as early as Isa. xxii. 6 the Elamites were known as vassals of the kings of Assyria, and hence an interest in the history of Elam could not have been so far removed from a prophet of Israel as may now appear. By whom and at what time the supposed revision of Jeremiah's original stock of material was made, it is impossible to determine; but the large number of similar expressions connecting the separate oracles makes it probable that there was only one redaction.

The oracle against Babylon, l.-li. 58, which follows the section xlvi.-xlix., and to which a historical addition is appended (li. 59-64), is very clearly seen to be non-Jeremianic in spite of the fact that individual passages recall very vividly Jeremiah's style. It is really no oracle at all, but a description in oracle form, dating from after the Exile, and originally written so as to appear as a production by Jeremiah, for which purpose the author assumes the standpoint of an older time. Since he is acquainted with Deutero-Isaiah (comp. li. 15-19 with Jer. x. 12-16, which is also taken from Deutero-Isaiah, and apparently furnishes the direct basis for the passage in question), and describes the upheaval in Babylon and the destruction of the city—making use of the exilic oracle in Isa. xiii. *et seq.* (Jer. l. 16, 39 *et seq.*; comp. l. 39; li. 40 with Isa. xxxiv. 14 and xxxiv. 6 *et seq.*), he can not have written it before the end of the Babylonian exile at the earliest. This also explains why the destroyers of Babylon are called "kings of Media" (li. 28). Moreover, the author of the oracle against Babylon made use of the Jeremianic oracle against Edom, at times quoting it literally (comp. l. 44-46 with xlix. 19-21; and the origin of l. 41-43 is found in vi. 22-24). That he lived in Jerusalem may be inferred not only from l. 5, in which, speaking of the returning exiles, he says that their faces were turned "hitherward," but also from the fact that he is much more concerned with the desecrated and destroyed Temple of Jerusalem than are the prophets of the Exile. The added passage, li. 59-64, proceeding probably from a historical record of a journey to Babylon made by Seraiah, was most likely written by the author of the oracle against Babylon, if not by some one later, who desired by his short narrative to authenticate the oracle which he took to be Jeremianic.

Not Before the End of the Exile.

The section closes with the words: "Thus far [are] the words of Jeremiah," showing that the Book of Jeremiah once ended at this point, and that that which follows is a later addition. In fact, lii. is a historical account, concerning Zedekiah, the deportation to Babylon, and the turning-point in the fortunes of Jehoiachin, which was transferred from the Book of Kings to that of Jeremiah. This is shown by the fact that with slight variations and with the exception of two passages, the two accounts agree; one of the exceptions is presented by three verses giving a count of the exiles, which are found only in Jeremiah (lii. 28-30) and which were probably inserted later from some separate source, since they are lacking also in the text of the Septuagint; the other is the short passage recording the appointment of Gedaliah as governor, his murder, and the flight to Egypt of those who were left, which is lacking in Jeremiah (II Kings xxv. 22-26), and which doubtless was purposely omitted because the same facts had already been recorded elsewhere in the Book of Jeremiah (xl. *et seq.*). Moreover, the addition of ch. lii. was of itself not necessary, since the information given in it was already partially known from earlier statements of the Book of Jeremiah; and the last passage concerning the change in the fate of Jehoiachin is wholly superfluous, since the event recorded took place after Jeremiah's death.

§ **V. Sources of the Book of Jeremiah, According to Duhm:** What has here been said concerning the supposed origin of the Book of Jeremiah corresponds to the opinion held on the subject by most modern scholars, whose consensus, though they may differ in detail, has indorsed the view as a whole and in substance. The views of Duhm differ materially from this opinion, however many points of contact therewith it may show, because Duhm, in opposition to previous conceptions, has with an unparalleled boldness and confidence extended his critical investigation to the most minute details, for which reason his analysis is here given separately. Although it seems more plausible to suppose that the real prophecies of Jeremiah are contained in the versified portions, whereas in the prose utterances the thoughts of Jeremiah have been worked over, for the most part in the form of sermons, the question still arises whether one is justified in "ascribing, with the greatest detail, [the various parts of] writings which without doubt have passed through many hands before they received the form in which we know them, to their [respective] authors" (see Nöldeke in "Z. D. M. G." lvii. 412). Duhm distinguishes:

Duhm's Analysis.

(1) *Jeremiah's Poems.* These, in all about sixty, date (*a*) from the period when Jeremiah was still in Anathoth: the cycle ii. 2b, 3, 14-28; 29-37; iii. 1-5; 12b, 13, 19, 20; 21-25; iv. 1, 3, 4; the cycle xxxi. 2-6; 15-20; 21, 22, and perhaps xxx. 12-15; the oldest five poems concerning the Scythians, iv. 5-8; 11b, 12a, 13, 15-17a; 19-21, 23-26; 29-31; (*b*) from the time of Josiah: v. 1-6a; 6b-9; 10-17; vi. 1-5; 6b-8, 9-14; 16, 17, 20; 22-26a; 27-30; vii. 28 *et seq.*; viii. 4-7a; 8, 9, 13, 14-17; 18-23; ix. 1-8; 9; 16-18; 19-21; x. 19, 20, 22; (*c*) from the time of Joah: xxii. 10; (*d*) from the time of Jehoiakim: xxii. 13-17, and probably xi. 15 *et seq.*; xii. 7-12 (from the first period); xxii. 18 *et seq.*, and perhaps xxii. 6b, 7; 20-23; xiii. 15 *et seq.*; 17; 18, 19; 20, 21a, 22-25a, 26 *et seq.* (from the time after the burning of the book-roll); (*e*) from the time of Jehoiachin: xxii. 24; 28; (*f*) from a later period (a more exact definition is unnecessary): description of the great famine, xiv. 2-10; of the evil conditions in the country and their results, xv. 5-9; xvi. 5-7; xviii. 13-17; xxiii. 9-12; 13-15; impressive complaints of personal enmities, xi. 18-20; xv. 10-12, 15-19a, 20 *et seq.*; xvii. 9 *et seq.*, 14, 16 *et seq.*; xviii. 18-20; xx. 7-11; xx. 14-18; from an earlier period, but first inserted after the restoration of the roll: xiv. 17 *et seq.*; xvii. 1-4; (*g*) from the last period of Zedekiah (according to Baruch), xxxviii. 22.

Parts Ascribed to Baruch.

(2) *The Book of Baruch.* Besides single data and exhortations preserved in i.-xxv. (*e.g.*, i. 1-3, 6; vii. 18; comp. xliv. 15 *et seq.*, xi. 21, vii. 21 *et seq.*), the following passages are derived from this book (they are here arranged according to their original order of succession, the groups of verses which have been revised being marked with an asterisk): (*a*) on the time of Jehoiakim: xxvi. 1-3, 4 (to אלי), 6-24 (early period); xxxvi. 1-26; 32 (fourth and fifth years of Jehoiakim); xxxv. 1-11* (a later year); (*b*) on the time of Zedekiah: xxviii. 1a, xxvii. 2 *et seq.*, xxviii. 2-13, 15-17 (fourth year of Zedekiah); xxix. 1 (to הגולה), 3, 4a, 5-7, 11-15, 21-23, 24 *et seq.*,* 26-29 (probably the same period); xxxiv. 1-7* (ninth year); xxxiv. 8-11*; xxxvii. 5, 12-18, 20 *et seq.*; xxxii. 6-15; xxxviii. 1, 3-22, 24-28a (during the siege of Jerusalem); (*c*) on the time after the conquest of Jerusalem, events in Mizpah and the emigration to Egypt: xxxviii. 28b, xxxix. 3, 14a, xl. 6; xl. 7-xlii. 9, 13a, 14, 19-21, xliii. 1-7; (*d*) on an event in Egypt (comp. vii. 18): xliv. 15a, 16-19, 24 *et seq.*,* 28b; xlv. forms the conclusion.

Messianic Passages.

(3) *The Supplements to the Writings of Jeremiah and Baruch.* These comprise about 800 verses, that is, more than the poems of Jeremiah (about 280 verses) and the sections from the Book of Baruch (about 200 verses). The process of amplification, by which the Book of Jeremiah grew to its present size, must have gone on for centuries. It is possible that single additions (which are difficult to identify) were incorporated in the roll of the Book of Jeremiah in the Persian period. The greatest number of additions was made in the third century, the age of "the most midrashic literature"; the most recent are in general the Messianic passages and their complement, the prophecy concerning the heathen. They are in part (as in i.-xxv.) inserted among older additions, in part placed together in a separate section (xxx. *et seq.*, xlvi.-li.), which could not have originated before the end of the second century B.C., and which have received even later additions; single passages (*e.g.*, xxxiii. 14-26) are so late as not even to have come into the Septuagint. These additions fall into separate categories according to their contents: (*a*) amplifications in the nature of sermons in connection with verses of the Jeremianic text, to suit the needs of the post-exilic period; (*b*) short narratives, in the form of the Midrash or of free versification, recording deeds and sayings of the prophet; (*c*) consolatory passages which in part are appended to an admonitory sermon, and in part stand in a separate group in xxxii. *et seq.*; (*d*) additions of various kinds having no connection with the contents of the book.

However justifiable it may be to separate the "songs" of Jeremiah, the question still arises whether much of that which Duhm excludes as a later addition may not still be Jeremianic, since it is easy to suppose that besides the versified portions there must also have been prose utterances of Jeremiah, to which these excluded passages may have belonged.

§ **VI. Relation of the Hebrew Text to the Septuagint:** A comparison of the Masoretic text with the

Septuagint throws some light on the last phase in the history of the origin of the Book of Jeremiah, inasmuch as the translation into Greek was already under way before the work on the Hebrew book had come to an end. This is shown by the fact that a large part of the additions to the Hebrew text, which, absent in the Septuagint, are evidently secondary, are proved also by their contents to be later elaborations. The two texts differ above all in that the Septuagint is much shorter, containing about 2,700 words (that is, about one-eighth of the whole book) less than the Hebrew. On the other hand, headings in the Hebrew text are only comparatively rare. Even if the text of the Septuagint is proved to be the older, it does not necessarily follow that all these variations first arose after the Greek translation had been made, because two different editions of the same text might have been in process of development side by side. Furthermore, the correspondence between the Septuagint and the Hebrew is too great, and their relationship too close, for one to be able to speak of two redactions. They are rather two editions of the same redaction.

Additions to the Septuagint.

§ VII. Origin of the Book of Jeremiah: The different stages in the history of the growth of the book as they are shown in the two theories of its origin, that of Duhm and that of Ryssel, practically coincide. The book, dictated by Jeremiah himself under Jehoiakim, was first worked over by a pupil, probably Baruch, who added later utterances, which he wrote perhaps partly at the dictation of the prophet, but in the main independently, and to which he furthermore added narrative passages (at least for the time preceding the conquest of Jerusalem). This "Book of Baruch," the composition of which Kuenen without sufficient reason (see above, § III.) places first in the second half of the Babylonian exile, concludes with the passage addressed to that scribe. It contains oracles concerning foreign nations, which, however, stood immediately after the section referring to the cup of wrath for the nations, and had little to do with the group of oracles, now contained in xlvi.-li., concerning the nations conquered by Nebuchadnezzar. Besides the oracle concerning Babylon, which is without doubt not genuine, the one concerning Elam must also have been added later, since, according to its dating, it did not belong to the oracles of the fourth year of Jehoiakim. The Book of Jeremiah at a comparatively early date became subject to additions and revisions, which were made especially in the schools and from the material of Deutero-Isaiah; and the only question which suggests itself is whether this critical activity in reality must have continued until the end of the second century or even later. The book as a whole was first terminated by the addition of the oracle concerning Babylon, and again later by the addition of the account taken from the Book of Kings.

Final Redaction.

JEREMIAH, EPISTLE OF: A Greek apocryphon, being a fictitious letter which Jeremiah is supposed to have written to the Jews who were about to be led as captives to Babylonia, the purpose of the letter being to warn them against idolatry. It seems to be written with especial reference to Jer. x. 1-16, wherein the prophet sharply contrasts the living and everlasting God of Israel with the idols of Babylonia. Jer. x. 11, a declamation addressed to the Babylonians, distinguished by being written in Aramaic, appears to have suggested the idea (as may be seen from the Targum to the passage) that Jeremiah sent an epistle of that nature (comp. Jer. xxix. 1) to the elders of the Captivity, who were to read it to all the Jews as a warning against being induced by their heathen masters to worship idols. The author, however, while making use also of such passages as Isa. xliv. 9-19, xlvi. 1-2; Ps. cxv. 4-8, cxxxv. 15-18, has Egyptian idolatry in view, as may be gathered from verse 18, where the Feast of Lights at Sais (Herodotus, ii. 62) is obviously alluded to. The epistle, therefore, must be classed among the propagandist literature of the Alexandrian Jews issued for the purpose of winning the heathen over to Jewish monotheism.

After a few introductory verses announcing the transportation of the Jews to Babylonia as a punishment for their sins, and promising their return to the Holy Land after the lapse of seven generations (possibly a mistake for the seven decades in Jer. xxix. 10), the writer of the epistle immediately turns to his subject, describing with fine sarcasm and vivid coloring, and ostensibly from his own experience, the practises of the idolatrous priests and people:

> "The idols are decked with silver and gold, which often the priests steal to give them to harlots (8-11); they are given pur-

ple and scepters, but have no power; daggers and axes, but can not defend themselves against thieves (12-16, 18); they have candles lit before them, but see not (19); their eyes are full of dust, their faces black with smoke (17, 21); insects and bats cover their bodies, but they feel them not (20, 22). They are carried upon the shoulders, and when they fall they can not rise; yet gifts are set before them as unto the dead! The priests sell and misuse them, take off their garments and clothe their wives and children (26-33); they can give neither health nor wealth, nor sight nor speech, nor any help whatsoever to their worshipers, and instead cause women to deliver themselves over to incest (34-43). [A survival of this Astarte cult is reported by S. I. Curtiss ("Primitive Semitic Religion To-day," Chicago, 1904) as still existing in Egypt.] Men's own handiwork, they can neither save them from war and plague nor from famine, nor their own temples from fire (45-55). Any vessel or piece of furniture in the house is of greater use than they; the stars and the clouds fulfil the command of their Maker, but these idols are like a scarecrow in a garden of cucumbers, that availeth nothing (61-71)."

This description is made quite effective by the refrains

"Whereby they are known to be no gods; therefore fear them not" (16, 23, 29, 66); "How should a man think and say that they are gods?" (40, 44, 52, 56, 64); "And ye shall know them to be no gods . . . " (72-73); "Better the just man that hath no idols; he shall be far from reproach."

In some editions of the Greek text, as well as in the Old Latin and Syriac versions, and accordingly in Luther's and the English translation, the Epistle of Jeremiah constitutes ch. vi. of Baruch, but without justification.

JEREMIAH, THE LAMENTATIONS OF. See LAMENTATIONS.

JEREMIAH: Polish rabbi in the second half of the eighteenth century; head of the yeshibah at Mattersdorf, Hungary, in which he devoted himself especially to the legal treatises of the Babylonian Talmud. Aaron CHORIN was one of his pupils. Jeremiah was the author of "Moda'ah Rabbah," a commentary to Ḥayyim Shabbethai's "Torat Ḥayyim," part ii. (on "Moda'ah we-Ones," a protest against a forced or unduly influenced action); Jeremiah's son **Joab** wrote a parallel commentary entitled "Moda'ah Zuṭa." In the approbation to his work, published at Lemberg, 1795, by his son, Jeremiah is given the title of "gaon." Joab wrote also "Sha'are Binah," novellæ to the "Sha'are Shebu'ot" of Isaac ben Reuben, grandson of Isaac Alfasi.

S. S. S. MAN.

JEREMIAH: Palestinian scholar of the fourth century; always quoted by the single name "Jeremiah," though sometimes that name is used for JEREMIAH B. ABBA. A Babylonian by birth, he passed his youth in his native land without giving much promise of gaining celebrity as a scholar (Ket. 75a). He emigrated to Cæsarea, in Palestine, where he made rapid progress in his studies. Among his teachers were Abbahu (B. M. 16b); Samuel b. Isaac, whose homilies he very frequently reports (Yer. Peah i. 16b; Yer. Meg. i. 70d; Yer. Ḥag. i. 76c); and Assi II. (Giṭ. 44a; Ḥul. 21a); but his principal teacher was his countryman Ze'era. Both Ze'era and Abbahu loved the young scholar as a son (M. Ḳ. 4a; B. M. 16b). Ammi employed Jeremiah as tutor to his son (Yer. Beẓah v. 63a). Once while Ze'era and his pupil were engaged in some halakic investigation the hour of prayer arrived, and Jeremiah began to betray impatience at being detained. Ze'era, noticing it, reproved him with the words, "He that turneth away his ear from hearing the law, even his prayer shall be abomination" (Prov. xxviii. 9; Shab. 10a).

His Over-Subtlety.

Jeremiah developed such industrious habits as to evoke from his teacher the remark that since the death of Ben 'Azzai and Ben Zoma, with whom industry ended, there had not been so zealous a student as Jeremiah (Yer. Ned. viii. 40d; comp. Soṭah ix. 15). But in his anxiety to acquire knowledge and accuracy he developed extreme captiousness. He frequently provoked the laughter of the college, except of his teacher (Niddah 23a); and ultimately his ultra-subtleties became insufferable. His considerate preceptor time and again warned him against pursuing his arguments beyond the bounds of the Halakah (R. H. 13a; Soṭah 16b), but it proved of no avail. At last his colleagues gave vent to their displeasure. The college was seriously discussing a point of law, when Jeremiah broke in with what appeared to be a ridiculous objection, whereupon he was ordered out of the academy (B. B. 23b). It happened that after the death of the great teachers a legal problem vexed the minds of the scholars, and there was none to solve it. It was submitted to Jeremiah, who returned it with the solution, which he prefaced with the humble words: "Although I am not worthy [to be consulted by you], your pupil's opinion inclines this way." On receipt of this, which was taken as an apology for the past, his colleagues reinstated him (B. B. 165b).

Thenceforth Jeremiah was the undisputed head of the scholastic circle at Tiberias (Yer. Shab. i. 3d, iii. 6c; comp. *ib.* vi. 8a), and questions were addressed to him from different parts of Palestine. Nor was his fame limited by the boundaries of his adopted country. In Babylonia also his opinions carried great weight, and when a contemporary or later Babylonian scholar introduced a statement by the phrase "It is said in the West," it was generally assumed that that statement emanated from Jeremiah (Sanh. 17b). The reverence in which he was held by his former countrymen appears from the following colloquy between his younger contemporaries Abaye and Raba: Said the former: "One Palestinian scholar is worth two of ours"; whereupon the other remarked: "And yet when one of ours emigrates to Palestine he is worth two of the natives. Take, for example, Jeremiah; although while he was here he could not comprehend our teachers, since emigrating to Palestine he has risen to such eminence as to look upon us as 'stupid Babylonians'" (Ket. 75a). Indeed, not only did Jeremiah repeatedly apply this epithet to Babylonian scholars, but he spoke disdainfully of his native land as well. Whenever an opinion by a Babylonian scholar met with his disapprobation, he would say: "Those Babylonian simpletons! they dwell in a land of darkness and advance opinions of darkness" (Pes. 34b; Yoma 57a; Bek. 25b).

Active Life.

With the leadership of the scholastic circle the management of public affairs was entrusted to him. He considered this occupation as paramount to engaging in the study of the Law (Yer. Ber. v. 8d); but it sometimes occasioned him unpleasantness. On one occasion some serious trouble threatened the Jews of Tiberias, and much treasure was required to avert it. Jeremiah was called upon to assess the people, and in discharging this duty he displeased his older colleague Jacob b. Bun. Jeremiah had called on Jacob for a considerable contribution, whereupon he remarked, "Jeremiah is still at his tricks: he deserves excommunication." The feeling between them became so bitter that they excommunicated each other, though they soon revoked their decrees and became reconciled (Yer. M. Ḳ. iii. 81d).

Jeremiah had many pupils, among them Jonah and Hezekiah II., who stood in the front rank of the scholars of the next generation. His name is frequently found in the departments of the Halakah and the Haggadah, in the Babylonian as well as in the Palestinian Gemara, and in the Midrashim. He left the following directions for his interment: "Clothe me in white garments with sleeves, put stockings and shoes on my feet, place a staff in my hand, and lay me down on my side. Thus equipped, when the Messiah comes I shall be ready to follow him" (Yer. Kil. ix. 32b; Yer. Ket. xii. 35a).

s. s. S. M.

JEREMIAH B. ABBA (b. Wa in the Palestinian Talmud): Babylonian amora of the third century; disciple and fellow of Rab (Ber. 27b). In Yerushalmi his patronymic is often omitted (comp. 'Er. 21a with Yer. 'Er. ii. 20a; see also *ib.* 19d and Abina). Jeremiah devoted himself to the study of the Halakah; but he is also cited in connection with haggadot. Most of the latter are embodied in the Babylonian version of the treatise Sanhedrin (pp. 91a, 92b, 93b, 103a). A specimen of these follows. The Jewish Bible canon not recognizing a separation of the Book of Nehemiah from that of Ezra, the Talmud raises the question, "Since what is contained in the Book of Ezra has been told by Nehemiah b. Hachaliah, why is there no Biblical book bearing the name of Nehemiah?" To this Jeremiah answers, "Because Nehemiah claimed credit for what he had done, saying, 'Remember [A. V. "Think upon"] me, O my God, for good, according to all that I have done for this people'" (Neh. v. 19; Sanh. 93b). He proves from Scriptural texts that the following four classes of persons will never be admitted into the Divine presence: (1) scorners; as it is said (Hosea vii. 5), "He stretched out his hand with [Hebr. משך = "withdraweth from"] scorners"; (2) liars; as it is said (Ps. ci. 7), "He that telleth lies shall not tarry in my sight"; (3) deceivers; as it is said (Job xiii. 16), "A hypocrite shall not come before him"; and (4) slanderers; as it is said (Ps. v. 5, Hebr.), "Evil shall not dwell with Thee" (Sanh. 103a).

s. s. S. M.

JEREMIAH OF DIFTA: Babylonian amora of the fourth century; contemporary of Papi (B. B. 52a; 'Ab. Zarah 40a). Rabbina, who eventually assisted in the compilation of the Babylonian Gemara, was his pupil. Once, while they were studying, a certain man passed them without covering his head (out of respect to the scholars). Rabbina thereupon remarked, "How bold this fellow is!" But Jeremiah rejoined, "Possibly he comes from Mata Meḥasya, where scholars are not rare and people pay no special attention to them" (Ḳid. 32b).

s. s. S. M.

JEREMIAH BEN ELEAZAR: **1.** Palestinian scholar of the second century; contemporary of Simeon b. Gamaliel, the father of Judah I. He is known through one haggadah, transmitted by his pupil Bar Ḳappara, and giving various reasons for the death of the two sons of Aaron, Nadab and Abihu (Pesiḳ. xxvii. 112b; Lev. R. xx. 8; Tan., Aḥare Mot, 7). Ephraem Syrus ("Opera," i. 240) adopted an explanation by Jeremiah without mentioning his name (comp. Graetz in "Monatsschrift," iii. 319). Jeremiah's son **Eleazar** is mentioned in Pesiḳ. R. 23 (ed. Friedmann, p. 117b) and Soṭah 4a.

2. Haggadist of the third amoraic generation (second half of the third century). Bacher places him among the Palestinian haggadists, although several of his haggadot are found in the Babylonian Talmud, while only one is recorded in Yerushalmi (Shab. vi. 10).

Jeremiah's haggadot are numerous; and a whole group of them is found in 'Er. (18a-19a). He inferred from Ps. cxxxix. 5 that Adam was created with two faces, one of a man and one of a woman, and that God afterward cleft them asunder ('Er. 18a). In Gen. R. viii. 1 this opinion is ascribed to Samuel b. Naḥman, while Jeremiah's opinion is stated to have been that Adam was created a hermaphrodite (see Androgynos). From Gen. v. 3 Jeremiah concluded that all the time that Adam lived under the curse (that is, till the age of 130) he begot demons and spirits ('Er. 18b; see Lilith). According to Jeremiah, the builders of the Tower of Babel were divided into three different groups, which respectively had the intention of dwelling there, of establishing there the cult of idolatry, and of waging war against God. The first group was dispersed; the second was punished by a confusion of language; and the third was transformed into one of apes, demons, and spirits (Sanh. 109a). Jeremiah also indicated the crow as a bird of prophecy (Lev. R. xxxii. 2).

JEREMIAH BEN JACOB BEN ISRAEL NAPHTALI: German Talmudist and philanthropist; died in Halberstadt before 1664. Like his father, Jacob (Jockel Halberstadt), Jeremiah was parnas of the congregation. His wealth, which he used for the benefit of the community, his learning, and his broad culture gave him importance and secured for him the government's recognition, which enabled him to obtain many advantages for his coreligionists.

That, however, which procured influence for him in the higher circles of society availed him nothing against the rage of the populace. On the Ninth of Ab, 1621, the synagogue built by his father was destroyed by a mob. Jeremiah seized the very first opportunity of building a new synagogue at his own expense. This opportunity seemed to be afforded by the wording of a sentence in the rescript issued by the elector Frederick William on May 1, 1652: "The Jews, on account of the synagogue which they shall keep, shall give yearly a gulden in gold." Jeremiah interpreted this to refer to a synagogue proper, and he proceeded to build one. It was claimed, however, that the rescript permitted only a meeting-place for private devotions, and a protest against the new edifice was made to the elector. Before the latter's decision was rendered Jeremiah died, being thus spared the pain of seeing the second synagogue destroyed (March 18, 1669).

JERICHO (יְרֵחו, יריחו, and once, I Kings xvi. 34, יריחה).—**Biblical Data:** A city in the Jordan valley, opposite Nebo (Deut. xxxii. 49), to the west of Gilgal (Josh. iv. 19). Owing to its importance, the part of the Jordan near Jericho was called "the Jordan of Jericho" (Num. xxii. 1, Hebr.). It was a well-fortified city, surrounded by a wall, the gate of which was closed at dusk (Josh. ii. 5, 15), and was ruled by a king (*ib.* ii. 2, xii. 9). It was also rich in cattle and particularly in gold and silver (see the account of the spoil taken there, *ib.* vii. 21).

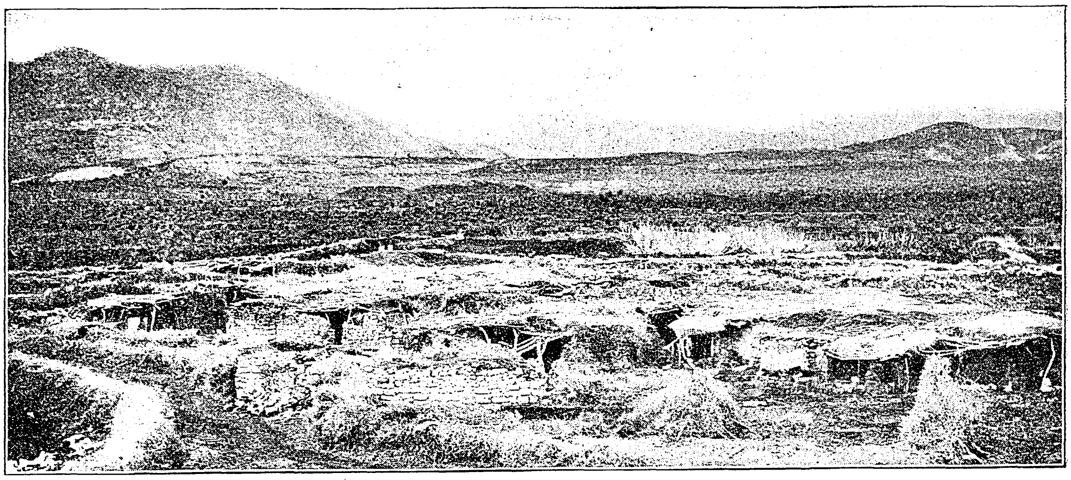
Jericho commanded the entrance to Palestine; hence while Joshua was still encamped at Shittim, east of the Jordan, he sent two spies to investigate the state of the country in general and of Jericho in particular (*ib.* ii. 1). They lodged at Rahab's house in the wall of the city, and, upon their presence being suspected, Rahab let them out through the window by means of a rope (*ib.* ii. 2-15). Crossing the Jordan, and having first encamped at Gilgal (*ib.* v. 10), Joshua besieged Jericho and took it in a miraculous manner (*ib.* vi. 1). The whole army marched around it once a day for six days and seven times on the seventh day. When the last circuit had been made and while the [seven] priests blew trumpets, the Israelites were ordered to shout, and when they did so, the walls fell down before them (*ib.* vi. 2-20). According to this narrative, the Israelites had no conflict with the people of Jericho; but Josh. xxiv. 11 speaks of their fight with the "men of Jericho."

Taking of Jericho.

The conquerors, by special command of the Lord, spared the life of none except Rahab and her family, who were saved according to the promise given to her by the spies; even the cattle were destroyed. The city and everything in it were burned; only the vessels of gold, silver, copper, and iron were declared sacred and were reserved for the treasury of the Lord (*ib.* vi. 21-25). Joshua pronounced a solemn curse on the man who should rebuild Jericho (*ib.* vi. 26), and this curse was fulfilled on Hiel (I Kings xvi. 34). Still it can not be affirmed that Jericho remained uninhabited till Hiel's time.

Jericho was given by Joshua to the tribe of Benjamin (Josh. xviii. 21), and later, when David's ambassadors had been ill-treated by Hanun, the King of Ammon—he had shaved off one-half of their beards—they were told by David to stay at Jericho till their beards should be grown (II Sam. x. 4-5).

The "city of palm-trees," conquered by Eglon, King of Moab (Judges iii. 13), was probably Jericho (comp. Deut. xxxiv. 3; II Chron. xxviii. 15). After it had been rebuilt by Hiel, the city gained more importance. The sons of the prophets settled there; Elisha "healed" its waters by casting salt into them (II Kings ii. 5, 19-22). Elijah's ascension took place not far from Jericho (*ib.* ii. 4 *et seq.*).

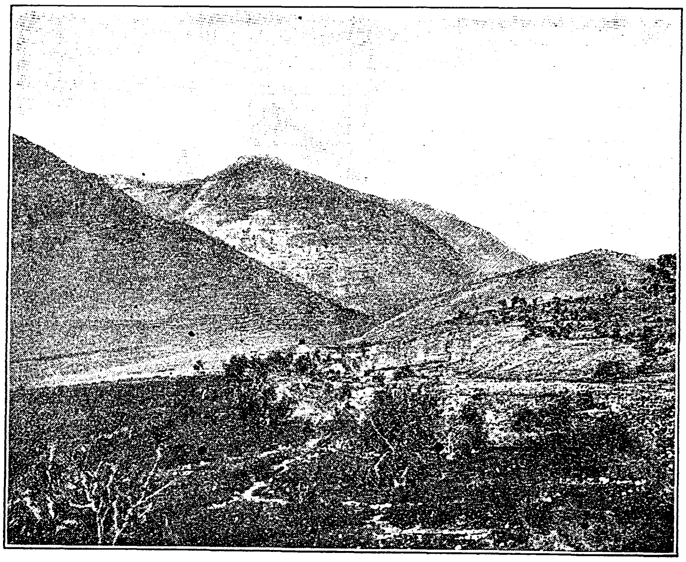


Traditional Site of Ancient Jericho.
(From a photograph by Bonfils.)

The captives who had been carried away by Pekah to Samaria, and were released by order of the prophet Oded, were brought to Jericho, "the city of palm-trees" (II Chron. xxviii. 8-15). Zedekiah was captured by the Chaldeans in the plains of Jericho (II Kings xxv. 5; Jer. xxxix. 5). At the return from captivity, under Zerubbabel, the children of Jericho are stated to have been 345 in number (Ezra ii. 34; Neh. vii. 36). It seems that they settled again in their native town; for men of Jericho assisted Nehemiah in reconstructing the wall of Jerusalem (Ezra iii. 2). Later, Jericho was fortified by the Syrian general Bacchides (I Macc. ix. 50).

Post-Biblical History.

The fertility of the plain of Jericho, alluded to in the Bible by the appellation "city of palm-trees" (see above), is described at length by Josephus ("B. J." iv. 8, § 3). Strabo (xvi. 2) likens the plain surrounded by mountains to a theater.



Jabal Ḳarantal and Probable Site of Ancient Jericho.
(From a photograph by Dr. W. Popper.)

Jericho was an important place under the Romans. When Pompey endeavored to clear Palestine of robbers, he destroyed their two strongholds, Threx and Taurus, which commanded the approach to Jericho (*ib.*). After Jerusalem had been taken by Pompey, Gabinius divided the whole country into five judicial districts (*σύνοδοι*, *συνέδρια*), one of which was Jericho (Josephus, "B. J." i. 8, § 5). Later, when Herod in his fight with Antigonus for the throne needed corn for his army, Jericho was plundered by the Roman soldiery, who "found the houses full of all sorts of good things" (*ib.* i. 15, § 6). A short time after this event Jericho was the scene of the massacre of five Roman cohorts and of the death of Joseph, brother of Herod. Herod himself, coming at the head of two legions to avenge his brother's death, was wounded by an arrow, and had to retire from Jericho ("Ant." xiv. 15, §§ 3, 10-12; "B. J." i. 15, § 6; xvii. 1, §§ 4-6). In the year 34 B.C. Antony gave Jericho with other cities of Judea as a present to Cleopatra ("Ant." xv. 4, §§ 1-2; "B. J." i. 18, § 5), who farmed out to Herod the revenues of the regions about the city ("Ant." xv. 4, § 2). Four years later Herod received from Augustus the whole country (including Jericho) that had been in Cleopatra's possession (*ib.* xv. 7, § 3; "B. J." i. 20, § 3). He erected many villas at Jericho for the entertainment of his friends, calling them after their respective names ("B. J." i. 21, § 4); he built also a wall about a citadel that lay above Jericho, calling it "Cypros" (*ib.* i. 21, § 9). At Jericho Herod caused Aristobulus to be drowned by Gallic mercenaries in one of the large water-reservoirs of the city ("Ant." xv. 2, §§ 3-4; "B. J." i. 22, § 2). Jericho had its amphitheater, and it was there that Salome announced Herod's death to the soldiers (*ib.* i. 33, § 8).

After Herod's death his ex-slave Simon burned the royal palace at Jericho and plundered what had been left in it ("Ant." xvii. 10, § 6). It was magnificently rebuilt by Archelaus, who also carried on some important irrigation works (*ib.* xvii. 13, § 1). In the time of Josephus, Judea was divided into eleven toparchies, of which the eleventh was Jericho ("B. J." iii. 3, § 5). When Vespasian approached Jericho the inhabitants fled to the mountains (*ib.* iv. 8, § 2). Vespasian erected a citadel at Jericho and garrisoned it (*ib.* iv. 9, § 1). Among the remarkable events that took place at Jericho according to Christian tradition was Jesus' healing the blind (Matt. xx. 29; Mark x. 46; Luke xviii. 35).

Jericho, on account of the fertility of its soil, continued to prosper till about 230, when it was destroyed in the war between Alexander Severus and Ardashir, surnamed "Artaxerxes," the founder of the Sassanid dynasty (Solin, "Collectanea," in Th. Reinach's "Textes Relatifs au Judaïsme," p. 339). It is most probable that Jericho was destroyed by the Romans themselves in order to chastise the Jews for their Persian leanings. Many historians, including Graetz, ascribe the second destruction of Jericho to Artaxerxes III., Ochus; but Solin's text shows the improbability of this interpretation. It is to this destruction that Jerome ("Onomasticon") refers in his statement that after Jericho was destroyed by the Romans it was rebuilt a third time. Munk ("Palestine," p. 41b) maintains that Jericho had been destroyed by Vespasian, and was rebuilt by Hadrian. It was entirely burned during the Crusades. Near the site of ancient Jericho there is now a small village called "Al-Riḥah," inhabited by forty or fifty Mohammedan families (Munk, *ib.*).

It may be of interest to note that, according to Eusebius ("Hist. Eccl." vi. 16), in the last years of Caracalla's reign (217) there were found at Jericho manuscripts, both Hebrew and Greek, of the Old

Testament, and ORIGEN is said to have used these for his Hexapla.

During Mohammedan occupation Jericho was the center of an extensive sugar-cane industry ("Kitab al-Masalik," pp. 57, 78, Leyden, 1889; Al-Ya'ḳubi, "Kitab al-Buldan," p. 113, *ib.* 1861). Jericho or Al-Riḥah was destroyed for the last time in 1840 by Ibrahim Pasha in a punitive expedition against the Bedouins.

——**In Rabbinical Literature:** Jericho is greatly praised by the Talmudists for its fertility and the abundance of its palm-trees; it is alluded to in the Bible as the "city of palm-trees" (see BIBLICAL DATA, above). The Targum of Jonathan without hesitation renders the "'Ir ha-Temarim" of Judges (i. 16, iii. 13) as well as the "Tamar" of Ezekiel (xlvii. 19) by "Jericho." It was also rich in balsam (Ber. 43a; comp. Strabo, xvi. 2), and its plain was covered with wheat (Mek., Beshallaḥ, 'Amaleḳ, 1 [ed. Weiss, p. 64a]). When the Israelites divided the land of Canaan among themselves they left a fertile area of the plain of Jericho, 500 ells square, to the tribe on whose territory the Temple was to be built, giving it in temporary charge to Jonadab b. Rechab (Sifre, Num. 81 [ed. Friedmann, p. 21b]). In Jericho fruit ripened earlier than in any other place, while at Beth-el it ripened later (Gen. R. xcix. 3).

Owing to its geographical position, Jericho was considered the key to Palestine; therefore the Israelites said, "If we take Jericho we shall possess the whole of Palestine" (Midr., Tan., Beha'aloteka, ed. Vienna, p. 206b). Jericho was conquered by Joshua on Saturday (Yer. Shab. i. 3), its wall being swallowed up by the earth; and it is counted among the places where miracles were performed and where a benediction must be recited (Ber. 54a, b). When Joshua pronounced the curse against whomever should rebuild it, he meant both the rebuilder of Jericho and the builder of any other city under the same name (Sanh. 113a). The King of Babylon had a viceroy in Jericho who sent dates to his master, receiving in return articles manufactured in Babylonia; hence the Babylonian garment stolen by Achan (see Josh. vii. 21; Gen. R. lxxxv. 15; Yalḳ., Josh. 18).

In the time of the Tannaites Jericho had a large priestly population (Ta'an. 27a). An indication of the size of its population is the fact that for each of the twenty-four groups ("ma'amadot") of men furnished by Jerusalem for the service in the Temple, Jericho furnished another group, but half as numerous. It could have supplied as many men as Jerusalem, which, however, was given the preeminence (Yer. Ta'an. iv. 2; Pes. iv. 1). The bellicose priests ("ba'ale zero'ot") so often spoken of in the Talmud were at Jericho, where the owners of sycamore-trees were obliged to consecrate them to the Lord in order to save them from the rapacity of the priests (Pes. 57a). It is said that the people of Jericho were accustomed to do six questionable things: graft palm-trees during the whole day of the 14th of Nisan; read "Shema'" without stopping between "eḥad" and "we-ahabta"; reap before the 'Omer; use the fruit of the consecrated sycamore-trees; eat on Sabbath the fruit which fell from the trees; leave "pe'ah" of vegetables. The Talmudists blamed them for doing the latter three things (Pes. 55b, 56a; Yer. Pes. iv. 9). These six things are somewhat differently enumerated in Men. 71a. Büchler concluded that by "the people of Jericho" the priests are meant. There was a school in Jericho which was named "Bet Gadya" (Yer. Soṭah ix. 13) or "Bet Guriyya" (Sanh. 11a).

Though ten parasangs distant from Jerusalem the people of Jericho could hear on Yom Kippur the Sacred Name pronounced by the high priest in the Temple of Jerusalem, and the daily closing of the large gate of the Temple (Yoma 39b; Yer. Suk. v. 3). It is said (Ab. R. N., Text B, ed. Schechter, 53b) that in Jericho could be heard the singing of the Levites and the sound of the horn and trumpet. The fragrance of the incense burned at Jerusalem pervaded Jericho and rendered perfume unnecessary for its women's toilet (Yoma *l.c.*; Yer. Suk. *l.c.*; Ab. R. N. *l.c.*).

JERIDIE-TERJUME: Title of a Jewish periodical, written in Judæo-Spanish, and printed in rabbinic characters, which was published at Constantinople in 1876 under the editorship of Nissim Niego.

G. M. FR.

JEROBOAM (ירבעם): Name of two kings of Israel. The meaning generally attached to the name is "[he] strives with [oppresses] the people," or "the people strive," the root of the first element being taken to be רוב = ריב (comp. Judges vi. 32). This equation, however, between "rub" and "rib" presents difficulties. Hommel ("Z. D. M. G." 1895, pp. 525 *et seq.*) holds "'Am" to be the name of a deity, and gives "'Am fights [for us]." Kittel ("Die Bücher der Könige," p. 99) suggests the derivation from "rabab" (= "to be numerous"), and proposes the rendering "the people, or the sept, is become numerous." This would necessitate the pointing "Yerubbe'am."

1. Biblical Data: Son of Nebat; founder of the kingdom of Israel; an Ephraimite of Zeredah, whose mother, Zeruah, is described as a widow. Jeroboam rebelled against Solomon, whose favor he had won by his industry during the repairing of the city wall and the building of the Millo. Though appointed by his royal protector overseer of "all the labor of the house of Joseph" (R. V.) he engaged in a conspiracy against him (I Kings xi. 26–28). In this he was encouraged by the prophet AHIJAH, the Shilonite, who, upon meeting the young conspirator, rent his new garment into twelve pieces, bidding Jeroboam take ten of them, thus symbolically announcing the division of the realm (as a punishment for Solomon's idolatry) and the appointment of Jeroboam to rule over the ten northern tribes, while one tribe (or two ?), retaining Jerusalem, remained faithful to the house of David. Solomon, suspecting Jeroboam's loyalty, sought to kill him, but the conspirator succeeded in escaping to Egypt, where, under the protection of Shishak, the Egyptian king, he awaited the death of Solomon (I Kings xi. 30–40).

Crowned King.

When Rehoboam convened Israel at Shechem, after his father's death, to confirm his own succession to the throne, Jeroboam, apprised of what had occurred, returned. He seems to have been the spokesman for assembled Israel and to have represented their demands for relief from the "grievous yoke." Upon the refusal of Rehoboam to accede to their demands, and the failure of the attempt to coerce the complainants into submission, which led to the stoning of ADORAM, the ten northern tribes asserted their independence by proclaiming Jeroboam their king, the prophet Shemaiah preventing any warlike measures on the part of Rehoboam (I Kings xii. 1–24; II Chron. x., xi. 1–4).

Jeroboam selected Shechem for his capital, and fortified it and Penuel. To prevent his people from turning again to the house of David, he set up two golden calves, one in Beth-el and the other in Dan, on the plea that the pilgrimage to Jerusalem was "too much" for the people and that "these are thy gods, O Israel, which brought thee up out of the land of Egypt." Jeroboam also built altars on HIGH PLACES, and appointed non-Levites to serve them; he changed the date of the Feast of Sukkot from the seventh to the eighth month; on the new date Jeroboam himself offered incense on the altar (I Kings xii. 25 *et seq.*). This act of his provoked a "man of God" to journey from Judah to Beth-el to cry out against the altar and announce that under Josiah its priests would be slaughtered. As a sign the altar would be rent. Jeroboam, in anger, stretched forth his hand, commanding his attendants to seize the prophet of evil, whereupon the king's hand was "dried up" and the altar was rent; the king recovered the use of his hand only by humbly imploring the prophet to restore it (II Kings xiii. 1 *et seq.*; for the fate of this "man of God" see I Kings xiii. 11 *et seq.*).

War with Judah.

Jeroboam, undeterred by this incident, continued his policy of appointing priests regardless of their Levitical origin (I Kings xiii. 33). But when his son Abijah fell sick, Jeroboam sent his wife, in disguise, with presents to Ahijah the prophet, at Shiloh, to consult him concerning the child. Though blind, the prophet recognized her and announced to her the doom of the dynasty: the sick son of Jeroboam would be the only one of his house to come to the grave; all others would meet a violent death (I Kings xiv. 1–17). The account of this episode names Tirzah as the royal residence. Jeroboam became involved in war with Rehoboam's son Abijah, and was defeated, notwithstanding superior numbers and strategy. In consequence of this defeat several districts reverted to the Southern Kingdom. Jeroboam reigned twenty-two years (I Kings xiv. 20; comp. II Chron. xiii. 1).

——**In Rabbinical Literature:** Jeroboam became for the rabbinical writers a typical evil-doer. This appears in the Septuagint (2d recension), where even his mother is represented as a disreputable woman. The name is explained as שעשה מריבה בעם (= "one that caused strife among the people," or "one that caused strife between the people and their Heavenly Father"; Sanh. 108b). The name (Nebat) of his father is construed as implying some defect in his progenitor. Jeroboam is excluded from the world to come (Yalḳ., Kings, 196). Although he reached the throne because he reproved Solomon, he was nevertheless punished for doing so publicly (*ib.*). In the meeting between Jeroboam and the Shilonite the Rabbis detect indications of Jeroboam's presumption, his zeal for impious innovations (*ib.*). His arrogance brought about his doom (Sanh. 101b). His political reasons for introducing idolatry are condemned (Sanh. 90). As one that led many into sin, the sins of many cling to him (Abot v. 18). He is said to have invented one hundred and three interpretations of the law in reference to the priests to justify his course. At first God was pleased with him and his sacrifice because he was pious, and in order to prevent his going astray proposed to His council of angels to remove him from earth, but He was prevailed upon to let him live; and then Jeroboam, while still a lad, turned to wickedness. God had offered to raise him into Gan 'Eden; but when Jeroboam heard that Jesse's son would enjoy the highest honors there, he refused. Jeroboam had even learned the "mysteries of the chariot" (Midr. Teh.; see "Sefer Midrash Abot," Warsaw, 1896).

——**Critical View:** The account of Jeroboam's reign as contained in the First Book of Kings reflects the religious views of later, post-Deuteronomic times, though it is not altogether true that it is written from the Judean standpoint, as stated by Wellhausen in Bleek's "Einleitung" (4th ed., p. 243; Stade, "Gesch." i. 344 *et seq.*). The stress laid on the popular election of the king (I Kings xii. 2) and the evident effort apparent in some portions to regard Jeroboam as an innocent favorite of the people point to an original Israelitish source which in course of time had been worked over by Judean writers (Benzinger, "Die Bücher der Könige," p. 86). The Septuagint has a double recension. This circumstance indicates that the account of this episode must have passed through different stages, in which Jeroboam was first represented as the people's choice, then as the chief conspirator artfully utilizing the just dissatisfaction of the people for his ends, and finally as the wicked seducer of his followers, who, if left to themselves and not kept away from Jerusalem, would soon have overcome their feelings of resentment and returned to the house of David. Even so, their continued defection was not altogether due to Jeroboam's intrigue: it had been foreordained by YHWH as a penalty for Solomon's idolatry (I Kings xi. 33; comp. 1–8). The prophetic episodes are seemingly introduced in accordance with the editor's desire to have prophets appear at every important crisis (see Benzinger, *l.c.* Introduction, iii.).

In the second Septuagint recension (xii. 24, Swete = xiii. 15, 16, Lagarde) the Ahijah episode is placed after Jeroboam's return from Egypt, and the prophet is identified with Shemaiah (I Kings xii. 22). It is curious that, though the mantle is rent into twelve pieces, only eleven are accounted for (I Kings xi.

29–32). Klostermann suggests (commentary *ad loc.*) that originally no numbers were mentioned, and that "twelve" is an interpolation. The Septuagint boldly introduces δύο in verses 32 and 36. After separating the different strata of the story and allowing for their respective biases the following results as the most probable account of Jeroboam's reign.

Recon-structed History.

The antipathy between North and South (Joseph and Judah) was as old as the house of Israel itself. Saul and David had with difficulty succeeded in establishing a closer union under the hegemony of the southern tribes; but Solomon, by extravagant building, by his luxurious court, and by his introduction and support of foreign cults, had awakened again the old spirit of disunion, never altogether extinct in the north. Jeroboam, for a time in the service of Solomon, grasped the opportunity, but, detected in an attempt to build for himself a fortress (see LXX., 2d recension, I Kings xi. 28; Winckler, "Gesch.") and organize an army in his native district, was compelled to flee to Egypt. (The story of his having married Shishak's sister-in-law Ano [LXX., 2d recension] is unhistorical, a double of the preceding episode in Hadad's career.) There he succeeded in winning for his plans the favor of the Egyptian king, with whose consent (see LXX., 2d recension) he returned after the death of Solomon. At home, undoubtedly, a prophetic party countenanced his movement, and his return crystallized the sentiments of all malcontents. He was acknowledged king by the northern tribes, and his southern rival would not even renew the attempt, which cost his general his life during the gathering at Shechem, to retake the rebellious cities by force of arms.

The sanctuaries at Beth-el and Dan, where the golden calves were enshrined, were old and recognized places of worship and pilgrimage (see High Places). The king, by making them royal sanctuaries, gave these old places new significance. The censure passed on Jeroboam for his appointment of non-Levitical priests is post-Deuteronomic. The postponement of the Feast of Sukkot to the eighth month is also charged against him as a sin by later writers. Probably in the north, where the harvest ends later, this annual pilgrimage (not the Sukkot of P or D) took place in the later month. The prophetic party, finding Jeroboam not so pliant a tool as expected, were organizing against him and looking again to the south. This is the basis of the episode at the altar at Beth-el, if the whole is not to be looked upon as altogether a later embellishment drawn from a collection of prophetical experiences, like those of Elijah and Elisha (Budde, in "Zeitschrift für die Alttestamentliche Wissenschaft," 1892, pp. 37 *et seq.*).

From I Kings xiv. 25 *et seq.* the inference has been drawn that it was Shishak who kept the Southern Kingdom from resorting to arms. But the inscription of Shishak, on the southern wall of the great temple at Karnak, enumerates as conquered more than sixty cities that belonged to Israel. The most plausible explanation of this is that Shishak encouraged Jeroboam to secede from Judah, at first keeping the latter in check in order after the division the more easily to carry out his intention to reestablish Egyptian suzerainty over Palestine and Syria. Judah, under Abijah, entering into an alliance with King Tabrimmon of Damascus (I Kings xv. 19), succeeded in getting the better of Israel: This is the historical basis of the fiction in II Chron. xiii. 19. Thus, in the closing years of his reign, Jeroboam began to lose ground, and his failure prepared the way for his successor's assassination and the extermination of his dynasty. The chronology of this reign is not beyond all doubt; Ebers gives 949 as the year of Shishak's expedition; Maspero, 925; modern scholars give, variously, 933–912, 937–915, 937–916.

2. (Jeroboam II.)—Biblical Data: Son of Joash; fourth king of the dynasty founded by Jehu. He ascended the throne in the fifteenth year of Amaziah, King of Judah, and reigned forty-one years (II Kings xiv. 23). His religious policy followed that of Jeroboam I.; that is, under him Yhwh was worshiped at Dan and Beth-el and at other old Israelitish shrines (see High Places), but through actual images, such as the golden calf (II Kings xiv. 24). But in his foreign policy he was extremely successful, restoring the old frontiers of Israel "from the entering of Hamath unto the sea of the plain" (*ib.*). In fact, Jonah, the son of Amittai the prophet, had designated him as the "helper" ("moshia'") for Israel; his reign arresting for the time being the impending doom of the kingdom. He is remembered as having waged war and won back for Israel Damascus and Hamath (II Kings xiv. 26–28). In II Chron. v. (vi.) 17 he is credited with having classified by genealogies the inhabitants of the recovered (transjordanic) territory.

——**Critical View:** Contrary to the usual method of the Books of Kings, in which prophetic experiences and predictions are elaborately introduced, the words of Jonah ben Amittai are not given. The reference to his acclaiming the powerful monarch has the appearance of a timid excuse to account for the palpable exception presented to the Deuteronomic construction of history by the successes of this emulator of Jeroboam, the son of Nebat, and the note (II Kings xiv. 28) shows that sufficient material was accessible to give a much fuller history of his reign. The chronological data require emending. The synchronism in II Kings xiv. 23 agrees with verse 17 preceding, but does not harmonize with xv. 1 following. Again, the length of the reign (41 years) can not be reconciled with xv. 8. In xv. 1 "twenty-seventh year" must be changed to "fifteenth," while the "forty-one" in xiv. 23 should perhaps be "fifty-one." The dating formerly accepted (825–772 B.C.) is now generally abandoned; about 785(3)–745(3) is more probable. The boundaries mentioned correspond with the ideal limits given in Amos vi. 14—Hamath on the Orontes and the Arabah, the southern continuation of the Jordan plain (the Ghor) from Jericho and the Dead Sea to the Red Sea. The expression in xiv. 28 is almost unintelligible, though in meaning it is probably identical with xiv. 25: "to Judah" is certainly a textual error, perhaps due to a false resolution of an abbreviation of the following "for Israel."

A man of great energy, this monarch turned to

His Character.

good profit the developments of his times. Damascus had, since the very first days of the independent Northern Kingdom, been a thorn in the flesh of the Israelitish kings. Attacked by Assur-dan III., King of Assyria (773), Damascus had been sensibly weakened. But Assyria itself was on the decline. This enabled Jeroboam to carry out his own plans and extend the boundaries of his kingdom in accordance with claims never totally relinquished. According to Schrader ("K. A. T." 2d ed., pp. 212 *et seq.*), Jeroboam II. had to pay tribute to Assyria for its acquiescence in his military expeditions and conquests, among which, according to Grätz ("Gesch."), were the cities Lodebar and Karnaim, alluded to in Amos vi. 13.

That certain of the prophets saw in these successes signs of Messianic import is plain from the mention, however grudging, of Jonah's oracle by the compilers of the Books of Kings. Amos and Hosea reveal the disappointment at the miscarriage of these extravagant expectations. The triumphs of the king had engendered a haughty spirit of boastful overconfidence at home (Amos vi. 13). Oppression and exploitation of the poor by the mighty, luxury in palaces of unheard-of splendor, and a craving for amusement were some of the internal fruits of these external triumphs. The YHWH services at Dan and Beth-el, at Gilgal and Beer-sheba, were of a nature to arouse the indignation of these prophets, and the foreign cults (Amos v.), both numerous and degrading, contributed still further to the corruption of the vainglorious people. What these conditions were bound to lead to, Amos and Hosea had no doubt. Assyria, now weak, would soon recover its prestige, and then would come the day of reckoning. But it is for this arousing of the prophetic spirit that the reign of Jeroboam II. is an important period in the evolution of Judaism. The old Israelitish religion of YHWH was more and more ethicized, and the connection between it and the old "high places" was loosened. See AMOS; HOSEA.

E. G. H.

JEROHAM BEN MESHULLAM: French Talmudist; flourished in the first half of the fourteenth century. According to Gross, he lived in Languedoc, but on the banishment of the Jews from that province (1306) he settled at Toledo, where he devoted himself to the study of the Talmud under the direction of Asher ben Jehiel and Abraham b. Ishmael. Jeroham was the author of two casuistical works: "Sefer Mesharim," on the civil laws (Constantinople, 1516), and "Toledot Adam we-Ḥawwah" (*ib.*). The latter work is divided into two parts, the first being entitled "Adam"; the second, "Ḥawwah." The first part considers the laws and regulations that come into force before marriage, such as those regarding circumcision, instruction, prayer, Sabbath ordinances, etc.; the second part deals with the laws and observances that become obligatory at and after marriage, such as those connected with betrothal, marriage, etc.

G. I. BR.

JEROME (EUSEBIUS HIERONYMUS SOPHRONIUS): Church father; next to Origen, who wrote in Greek, the most learned student of the Bible among the Latin ecclesiastical writers, and, previous to modern times, the only Christian scholar able to study the Hebrew Bible in the original. The dates of his birth and death are not definitely known; but he is generally assumed to have lived from 337 to 420. Born in Stridon, Dalmatia, he went as a youth to Rome, where he attended a school of grammar and rhetoric. He then traveled in Gaul and Italy, and in 373 went to Antioch, where he became the pupil of Apollinaris of Laodicea, the representative of the exegetical school of Antioch; subsequently, however, Jerome did not accept the purely historical exegesis of this school, but adopted more nearly the typic-allegoric method of Origen. From Antioch he went to Chalcis in the Syrian desert, where he led the strictly ascetic life of a hermit, in atonement for the sins of his youth. Here to facilitate his intercourse with the people, he was obliged to learn Syriac; and this language doubtless aided him later in his Hebrew studies ("Epistolæ," xvii. 2; yet comp. *ib.* lxxviii. and comm. on Jer. ii. 18). Here also he began with great labor to study Hebrew, with the aid of a baptized Jew (*ib.* cxxv. 12), and it may be he of whom he says (*ib.* xviii. 10) that he was regarded by Jewish scholars as a Chaldean and as a master of the interpretation of Scripture (*ib.* cxxv. 12). On a second visit to Antioch Jerome was ordained a priest. He then went to Constantinople, and thence to Rome, where he undertook literary work for Pope Damasus, beginning at the same time his own Biblical works (*c.* 383). He finally settled at Bethlehem in Palestine (*c.* 385), founding a monastery there which he directed down to his death. This outline of Jerome's life indicates that he was a master of Latin and Greek learning, and by studying furthermore Syriac and Hebrew united in his person the culture of the East and of the West.

His Teachers.

It was in Bethlehem that he devoted himself most seriously to Hebrew studies. Here he had as teachers several Jews, one of whom taught him reading ("Hebræus autem qui nos in veteris instrumenti lectione erudivit"; comm. on Isa. xxii. 17); the peculiar pronunciation of Hebrew often found in Jerome's works was probably therefore derived from this Jew. Jerome was not satisfied to study with any one Jew, but applied to several, choosing always the most learned (preface to Hosea: "diceremque . . . quid ab Hebræorum magistris vix uno et altero acceperim"; "Epistolæ," lxxiii. 9 [i. 443]: "hæc ab eruditissimis gentis illius didicimus"). With similar words Jerome is always attempting to inspire confidence in his exegesis; but they must not be taken too literally, as he was wont to boast of his scholarship. However, he was doubtless in a position to obtain the opinions of several Jews; for he often refers to "quidam Hebræorum." He even traveled in the province of Palestine with his Jewish friends, in order to become better acquainted with the scenes of Biblical history (preface to "Paralipomena," i.); one of them was his guide (preface to Nahum).

Of only three of his teachers is anything definite known. One, whom he calls "Lyddæus," seems to have taught him only translation and exegesis, while the traditions ("midrash") were derived from another Jew. Lyddæus spoke Greek, with which Jerome was conversant (comm. on Ezek. ix. 3; on Dan. vi. 4). Lyddæus, in interpreting Ecclesiastes, once referred to a midrash which appeared to Jerome absurd (comm. on Eccl. iii. 1); Jerome thought him fluent, but not always sound; this teacher was therefore a haggadist. He was occasionally unwilling to explain the text (*ib.* v. 1). Jerome was frequently not satisfied with his teacher's exegesis, and disputed with him; and he often says that he merely read the Scriptures with him (comm. on Eccl. iv. 14, v. 3; "Onomastica Sacra," 90, 12).

Another teacher is called "Baranina," *i.e.*, "Bar Ḥanina," of Tiberias. He acquainted Jerome with a mass of Hebrew traditions, some of which referred especially to his native place, Tiberias. He came at night only, and sometimes, being afraid to come himself, he sent a certain Nicodemus ("Epistolæ," lxxxiv. 3 [i. 520]).

A third teacher, who may be called "Chaldæus," taught Jerome Aramaic, which was necessary for the Old Testament passages and the books of the Apocrypha written in that language. This teacher of Aramaic was very prominent among the Jews, and Jerome, who had great difficulty in learning Aramaic, was very well satisfied with his instruction (prefaces to Tobit and Daniel). Jerome continued to study with Jews during the forty years that he lived in Palestine (comm. on Nahum ii. 1: "a quibus [Judæis] non modico tempore eruditus"). His enemies frequently took him to task for his intercourse with the Jews; but he answered: "How can loyalty to the Church be impaired merely because the reader is informed of the different ways in which a verse is interpreted by the Jews?" ("Contra Rufinum," ii. 476). This sentence characterizes the Jewish exegesis of that time. Jerome's real intention in studying the Hebrew text is shown in the following sentence: "Why should I not be permitted, . . . for the purpose of confuting the Jews, to use those copies of the Bible which they themselves admit to be genuine? Then when the Christians dispute with them, they shall have no excuse" (*ib.* book iii.; ed. Vallarsi, ii. 554).

His Knowledge of Hebrew.

Jerome's knowledge of Hebrew is considerable only when compared with that of the other Church Fathers and of the general Christian public of his time. His knowledge was really very defective. Although he pretends to have complete command of Hebrew and proudly calls himself a "trilinguis" (being conversant with Latin, Greek, and Hebrew), he did not, in spite of all his hard work, attain to the proficiency of his simple Jewish teachers. But he did not commit those errors into which the Christians generally fell; as he himself says: "The Jews boast of their knowledge of the Law when they remember the several names which we generally pronounce in a corrupt way because they are barbaric and we do not know their etymology. And if we happen to make a mistake in the accent [the pronunciation of the word as affected by the vowels] and in the length of the syllables, lengthening short ones and shortening long ones, they laugh at our ignorance, especially as shown in aspiration and in some letters pronounced with a rasping of the throat" (comm. on Titus iii. 9). Jerome not only acquired the peculiar hissing pronunciation of the Jews, but he also—so he declares—corrupted his pronunciation of Latin thereby, and ruined his fine Latin style by Hebraisms (preface to book iii., comm. on Galatians; "Epistolæ," xxix. 7; ed. Vallarsi, i. 143). This statement of Jerome's is not to be taken very seriously, however. In his voluminous works Jerome transcribed in Latin letters a mass of Hebrew words, giving thereby more or less exact information on the pronunciation of Hebrew then current. But, although he studied with the Jews, his pronunciation of Hebrew can not therefore be unhesitatingly regarded as that of the Jews, because he was led by the course of his studies, by habit, and by ecclesiastical authority to follow the Septuagint in regard to proper names, and this version had long before this become Christian.

Jerome shared the belief of the Hebrews and of most of the Church Fathers that Hebrew was the parent of all the other languages ("Opera," vi. 730b). He sometimes distinguishes Hebrew from Aramaic (preface to Tobit), but sometimes appears to call both Syriac. In reference to Isa. xix. 18 (comm. *ad loc.*; comp. "Epistolæ," cviii.) he speaks also of the "Canaanitish" language, as being closely related to Hebrew and still spoken in five cities of Egypt, meaning thereby either Aramaic or Syriac. In explaining "yemim" (Gen. xxxvi. 24), he correctly states in regard to the Punic language that it was related to Hebrew ("Quæstiones Hebraicæ in Genesin"). His knowledge of Hebrew appears most clearly in his two important works, that on the Hebrew proper names and that on the situation of the places mentioned in the Bible; in his extensive commentaries on most of the books of the Old Testament; and especially in his chief work, the new Latin translation of the Bible from the Hebrew original (see VULGATE). Through these works he not only became an authority on the Bible during his lifetime, but he remained a leading teacher of Christianity in the following ages, because down to very recent times no one could go direct to the original text as he had done.

Jerome's importance was recognized by the Jewish authors of the Middle Ages, and he is frequently cited by David Ḳimḥi; also by Abu al-Walid ("Sefer ha-Shorashim," *s.v.* גלל and דום), Abraham ibn Ezra (on Gen. xxxvii. 35), Samuel b. Meïr (on Ex. xx. 13), Naḥmanides (on Gen. xli. 45), Joseph Albo (iii. 25), and the polemic Isaac Troki (in "Ḥizzuḳ Emunah"). Jerome is also important because he could consult works which have since disappeared, as, for example, Origen's "Hexapla" (he says that he had seen a copy of the Hebrew Ben Sira, but he seems not to have used it); he had Aramaic copies of the Apocryphal books Judith and Tobit; and the so-called Hebrew Gospel, which was written in Hebrew script in the Aramaic language, he translated into Greek and Latin ("Contra Pelagianos," iii. 2; "De Viris Illustribus," ch. ii.; comm. on Matt. xii. 13).

Exegesis.

Jerome's exegesis is Jewish in spirit, reflecting the methods of the Palestinian haggadists. He expressly states, in certain cases, that he adopts the Jewish opinion, especially when he controverts Christian opponents and errors (comm. on Joel iv. 11: "nobis autem Hebræorum opinionem sequentibus"); he reproduces the Jewish exegesis both in letter (comm. on Amos v. 18–19) and in substance (*παραφραστικῶς*; comm. on Dan. ix. 24). Hence he presents Jewish exegesis from the purely Jewish point of view. Even the language of the Haggadah appears in his commentaries, *e.g.*, where the explanation is given in the form of question and answer (comm. on Dan. ii. 12: "quærunt Hebræi"); or when he says, in explaining, "This it is that is said" ("Hoc est quod dicitur"; comp. זה הוא שנאמר); or when several opinions are cited on the same subject ("alii Judæorum"); or when a disputation is added thereto ("Epistola xix. ad Hedibiam," i. 55). He even uses technical phrases, such as "The wise men teach" ("Epistolæ," cxxi.) or "One may read" (comm. on Nahum iii. 8). This kind of haggadic exegesis, which is merely intended to introduce a homiletic remark, leads Jerome to accuse the Jews unjustly of being arbitrary in their interpretation of the Bible text. But he did not believe that the Jews corrupted the text, as Christians frequently accused them of doing. While at Rome he obtained from a Jew a synagogue-roll ("Epistolæ," xxxvi. 1) because he considered the Hebrew text as the only correct one, as the "Hebraica veritas," which from this time on he regarded as authoritative in all exegetical disputes. Jerome hereby laid down the law for Bible exegesis. Of course he recognized also some of the faults of Jewish exegesis, as, for example, the forced combination of unconnected verses (comm. on Isa. xliv. 15: "stulta contentione"); he sometimes regards his teacher's interpretation to be arbitrary, and opposes to it his own (*ib.* xlix. 1). Contrary to the haggadic interpretation of the Jews, he correctly notices a difference between "Hananeel" (Jer. xxxi. 38; see comm. *ad loc.*) and "Hanameel" (*ib.* xxxii. 7). Jerome rarely employs simple historical exegesis, but, like all his contemporaries, wanders in the mazes of symbolic, allegoric, and even mystic exegesis. In his commentary on Joel i. 4 he adopts the Jewish interpretation, according to which the four kinds of locusts mean the four empires; Zech. iv. 2, in which the lamp means the Law, its flame the Messiah, and its seven branches the seven gifts of the Holy Spirit, he interprets entirely mystically. In his commentary on Eccl. i. 9 he even teaches the preexistence of all beings, including man. He frequently uses the Notarikon, *e.g.*, in reference to Zerubbabel (comm. on Hag. i. 1) or to Abishag ("Epistolæ," lii. [i. 210]).

Use of Notarikon.

Jerome's exegesis came in some respects like a revelation to the Christian world, and cleared up difficulties in reading the Bible; *e.g.*, his explanation of the Hebrew alphabet ("Epistola xxx. ad Paulam," i. 144) or that of the ten names of God ("Epistola xxv. ad Marcellam," i. 128). It must always be remembered that in many portions of his allegorical exegesis Jerome is entirely in agreement with Hellenistic methods; for instance, in the explanation of the four colors in the sanctuary of the desert ("Epistola lxiv. ad Fabiolam," i. 364; comp. Philo, "De Monarchia," § 2; Josephus, "B. J." v. 4, § 4; *idem*, "Ant." iii. 7, § 7). Jerome's commentaries are of small value for Old Testament criticism, on account of the inclination to allegorize which leads him to a free treatment of the text, as well as on account of his polemics against Judaism (comp. Jew. Encyc. iv. 81, *s.v.* Church Fathers).

Traditions.

Jerome's works are especially important for Judaism because of the numerous Jewish traditions found in them, particularly in his work "Quæstiones Hebraicæ in Genesin." Jerome designates by the general name "tradition" all supplementary and edifying stories found in the Midrash and relating to the personages and events of the Bible; these stories may fitly be designated as historic haggadah. Here also Jerome affirms that he faithfully reproduces what the Jews have told him (comm. on Amos iv. 16: "hoc Hebræi autumant et sicut nobis ab ipsis traditum est, nostris fideliter exposuimus"). He designates the Jewish legend of Isaiah's martyrdom as an authentic tradition (comm. on Isa. lvii. 1: "apud eos certissima traditio"), while he doubts the story of Jeremiah's crucifixion because there is no reference to it in Scripture (comm. on Jer. xi. 18). Jerome often remarks that a certain story is not found in Scripture, but only in tradition (comm. on Isa. xxii. 15), and that these traditions originated with the "magistri," *i.e.*, the Rabbis (comm. on Ezek. xlv. 10); that these "fables" are incorporated into the text on the strength of one word (comm. on Dan. vi. 4); and that many authors are cited to confirm this tradition. All these remarks exactly characterize the nature of the Haggadah. Jerome apparently likes these traditions, though they sometimes displease him, and then he contemptuously designates them as "fabulæ" or "Jewish fables," "ridiculous fables" (comm. on Ezek. xxv. 8), "ridiculous things" (on Eccl. iii. 1), or "cunning inventions" (on Zech. v. 7). Jerome's opinion of these traditions is immaterial at the present time. The important point is that he quotes them; for thereby the well-known traditions of the Midrash are obtained in Latin form, and in this form they are sometimes more concise and comprehensible—in any case they are more interesting. Moreover, many traditions that appear from the sources in which they are found to be of a late date are thus proved to be of earlier origin. Jerome also recounts traditions that are no longer found in canonical Jewish sources, as well as some that have been preserved in the Jewish and Christian Apocrypha. It is, furthermore, interesting to note that Jerome had read some of these traditions; hence they had been committed to writing in his time.

Although other Church Fathers quote Jewish traditions none equal Jerome in the number and faithfulness of their quotations. This Midrash treasure has unfortunately not yet been fully examined; scholars have only recently begun to investigate this field. Nor have Jerome's works been properly studied as yet in reference to the valuable material they contain on the political status of the Jews of Palestine, their social life, their organization, their religious views, their Messianic hopes, and their relations to Christians.

Jerome was no friend to the Jews, although he owed them much; he often rebukes them for their errors; reproaches them for being stiff-necked and inimical to the Christians; controverts their views in the strongest terms; curses and reviles them; takes pleasure in their misfortune; and even uses against them both the books that he has cunningly obtained from them and the knowledge he has derived therefrom. Thus Jews and Christians agree that he is eminent only for his scholarship, and not for his character. See CHURCH FATHERS.

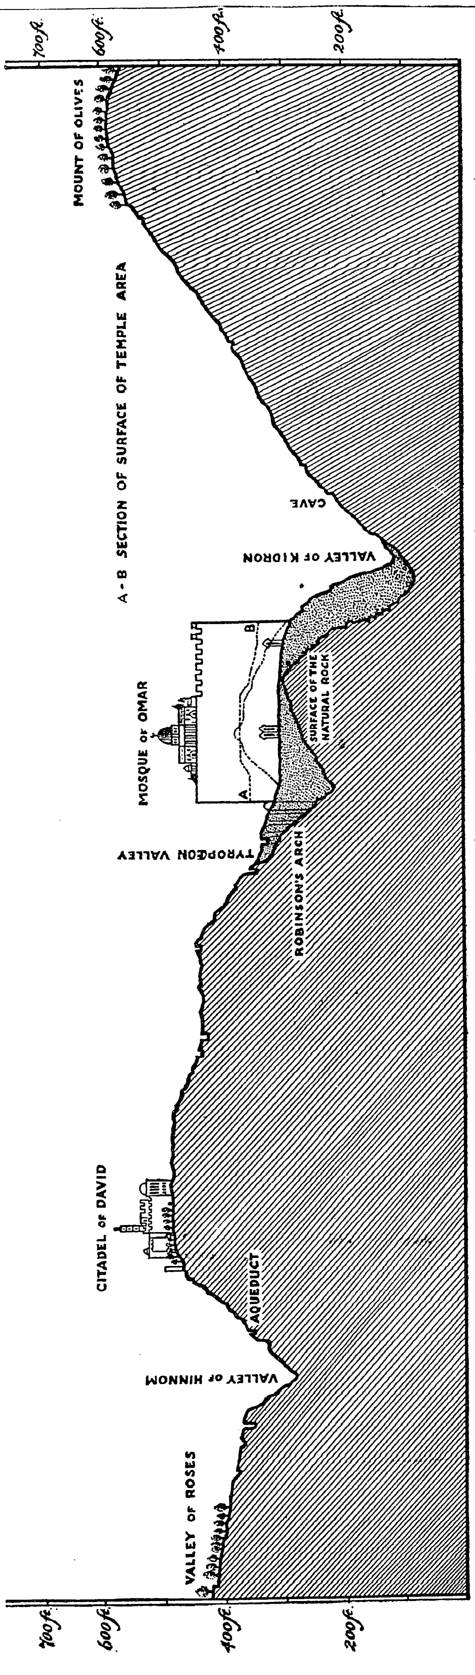
T. S. KR.

JERSEY CITY. See NEW JERSEY.

JERUBBAAL: A name given to Gideon by his father, Joash (Judges vi. 32), because the men of the city of Ophrah demanded that he turn over to them Gideon, who had destroyed the altar of Baal. When Joash named him "Jerubbaal," he said, "Let Baal contend against him, because he hath broken down his altar." The name means "Baal strives," or "contends." It is used three times in subsequent passages (*ib.* vii. 1; viii. 29, 35) when referring directly to Gideon, and in two of these passages "who is Gideon" is added to the new name. In Judges ix., however, it occurs often. In II Sam. xi. 21 it is replaced by "Jerubbesheth" ("Beshet-Ba‘al"). See GIDEON.

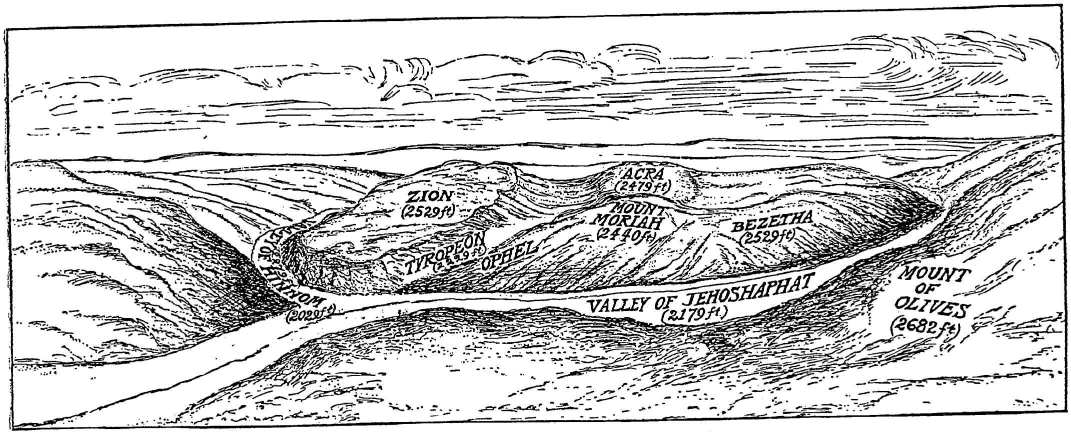
E. G. H. I. M. P.

JERUSALEM—Ancient: Capital at first of all Israel, later of the kingdom of Judah; chief city of Palestine; situated in 31° 46′ 45″ N. lat. and 35° 13′ 25″ E. long., upon the southern spur of a plateau the eastern side of which slopes from 2,460 ft. above sea-level north of the Temple area to 2,130 ft. at the southeastern extremity. The western hill is about 2,500 ft. high and slopes southeast from the Judean plateau. Jerusalem is surrounded upon all sides by valleys, of which those on the north are less pronounced than those on the other three sides. The principal two valleys start northwest of the present city. The first runs eastward with a slight southerly bend (the present Wadi al-Joz), then, deflecting directly south (formerly known as "Kidron Valley," the modern Wadi Sitti Maryam), divides the Mount of Olives from the city. The second runs directly south on the western side of the city, turns eastward at its southeastern extremity, then runs directly east, and joins the first valley near Bir Ayyub ("Job's Well"). It was called in olden times the "Valley of Hinnom," and is the modern Wadi al-Rababi, which is not to be identified with the first-mentioned valley, as Sir Charles Warren (in his "Recovery of Jerusalem," p. 290, and in Hastings,



CROSS-SECTIONAL VIEW OF JERUSALEM (WEST TO EAST) AS SEEN FROM THE SOUTH.
(After Heyck, "Die Kreuzzüge.")

"Dict. Bible," *s.v.*) has done. Easy access to Jerusalem could be had only on the north and northwest. In olden times there were other valleys which divided up this complex; but these are now filled in by the accumulated rubbish of centuries. A third valley, commencing in the northwest where is now the Damascus Gate, ran south-southeasterly down to the Pool of Siloam, and divided the lower part into two hills (the lower and the upper cities of Josephus). This is probably the later Tyropœon ("Cheese-makers'") Valley, though it should be mentioned that W. R. Smith, Sayce, Birch, and Schwartz identify the Tyropœon with the Valley of Hinnom (Cheyne and Black, "Encyc. Bibl." ii. 2423; Hastings, "Dict. Bible," ii. 387). A fourth valley led from the western hill (near the present Jaffa Gate) over to the Temple area: it is represented in modern Jerusalem by David street. A fifth cut the eastern hill into a northern and a southern part. Later Jerusalem was thus built upon four spurs (see frontispiece map of physical features of Jerusalem).



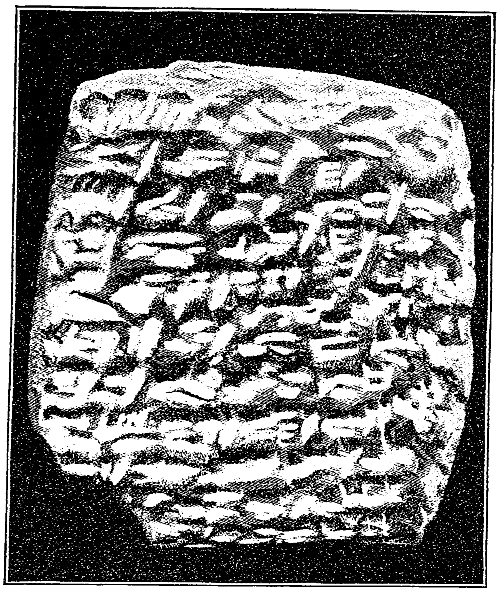
SKETCH SHOWING TOPOGRAPHICAL FEATURES OF JERUSALEM.
(After Fulton, "The Beautiful Land.")

The Name.

The name "Jerusalem" is written in the Old Testament and upon most of the old Hebrew coins defectively ירושלם, though punctuated "Yerushalayim" as a "ḳere perpetuum" (with the exception of five places where the "yod" is added; Frensdorff, "Massora Magna," p. 293). The Aramaic form, "Yerushlem" (Ezra iv. 8, 20, 24, 51), the Syriac "Urishlem," the Septuagint transcription Ἱερουσαλημ, the Assyrian "Urusalim" (El-Amarna tablets) and "Ursalimu" (Sennacherib), point to an original pronunciation "Yerushalem"; the ending "-ayim" either being due to a diphthongization or representing a dual formation (König, "Lehrgebäude," ii. pt. 1, p. 437). A shortened form is perhaps to be found in "Shalem" (Gen. xiv. 18; Ps. lxxvi. 3; comp. Josephus, "Ant." i. 10, § 2), known also to the Arabs ("Shallam," in Yaḳut, "Geographisches Wörterb." iii. 315). Several etymologies for the word have been suggested; *e.g.*, ירוש שלם = "possession of peace" or "of Salem"; ירו שלם, "foundation of peace" or "of Shalem [God of peace]"; according to the Midrash it is made up of "Shalem," the name given to the city by Shem, and "Yir'eh," that given to it by Abraham (Gen. R. lvi. 10; Midr. Teh. to Ps. lxxvi. 3). A more plausible derivation makes it the equivalent of "Uru-shalim" (= "City of [the god] Shalim"; comp. the Assyrian god Shalman or Shulman, the Phenician שלמן [Greek Σαλαμαν], and the Egyptian Sharamana [Zimmern, in "K. A. T." 3d ed., pp. 224, 475; Praetorius, in "Z. D. M. G." lvii. p. 782), "Uri" having become "Yeru" by metathesis (see Haupt in "Isaiah," in "S. B. O. T." Eng. transl., p. 100). In the Greek period the name was Hellenized into Ἱεροσόλυμα (Sibyllines, x. 103, New Testament, Josephus, Philo, and the classical writers). Following the New Testament, the Vulgate has both "Hierusalem" and "Hierosolyma" (or "Ierusalem," "Ierosolyma"). Philo uses the name Ἱερόπολις (ed. Mangey, ii. 524). Under Hadrian (135) the city was renamed "Ælia Capitolina," from which Ptolemy took his Καπιτολιας. The Arabs at times preserved the ancient forms "Urishalam," "Urishallam," "Uraslam" (Yaḳut, *l. c.* i. 402), or "Iliya" (*ib.* 423), or more commonly "Bait al-Maḳdis" or "al-Muḳaddas" (*ib.* iv. 590); in modern parlance, "Al-Ḳuds al-Sharif" or simply "Al-Ḳuds" = "the Sanctuary."

In the El-Amarna Tablets.

The earliest historical notices respecting Jerusalem come from the El-Amarna tablets. Before the fifteenth century B.C. Babylonian influences must have been present. There was a city called "Bit-Ninib" (Temple of the God Ninib) in the "district of Jerusalem" (Letter 180, 25). In the fifteenth century Amenophis III. had extended Egyptian rule so as to include Syria, Mesopotamia, Babylonia, and Assyria. This empire, however, became disrupted through its own weight. The individual districts in Palestine and Syria had been first under native princes ("amelu") with an Egyptian resident ("rabiẓ"), and then under a "ḥazzanu," who was in reality a viceroy of the Pharaoh. Jerusalem was the chief seat of one of the districts, in consequence of which it may at one time have changed its name ("the king has placed his name upon Jerusalem," Letter 180, 60). The four El-Amarna letters from Jerusalem were written by its ḥazzanu, one Abdi Heba. The whole district was sorely pressed by the Ḥabiri. The chief conspirators against him were Milki-il, his father-in-law Tagi, Shuardatu, the Banu Lapaya, the Banu Arzawa, and Adaya, a military chief; they prevented him from personally reporting to his sovereign, upon whom he impressed the fact that if reenforcements were not sent, the whole "land of the King" would be lost. He protested his loyalty, and mentioned the presents he had sent to the king by the latter's officer Shuta. How long the conspiracy had lasted is not known. Before that, an Egyptian special officer (rabiẓ) had been sent to Jerusalem.



One of the El-Amarna Tablets Mentioning Abdi Heba of Jerusalem.

(From Ball, "Light from the East.")

The Kash (?) had also entered Abdi Heba's dominions; and one city had gone over to the Kilti. From another of the El-Amarna letters (182, 5) it appears that Jerusalem itself was in the hands of rebels, and that Egyptian troops which had been sent under Haya had been detained in Gaza. It was evidently a period of general anarchy, due to the break-up of the Egyptian power.

Resists the Israelites.

In Hebrew annals Jerusalem is first mentioned in connection with Melchizedek, King of Salem (Gen. xiv. 18), then with the incursions of the Israelites after the taking of Ai. It was one of the five cities of the Amorites, who seem to have succeeded to the Egyptian power in southern Palestine. Each of these cities had its prince ("melek"), that of Jerusalem being Adoni-zedek, who took the lead against the city of Gibeon (Josh. x. 1 *et seq.*). All the princes were taken, slain, and hanged at Makkedah (see, also, the list, *ib.* xii. 10). The relation of the inhabitants of Jerusalem to the Jebusites can not now be determined. They may themselves have been Jebusites; at least, the latter were not completely driven out at the time (*ib.* xv. 63). In fact, Jerusalem is expressly called a "foreign city," not belonging to the Israelites (Judges xix. 12); and the Jebusites are said to have lived there for very many years together with the Benjamites (*ib.* i. 21; according to Josh. xv. 63, "with the children of Judah"), in whose territory the city lay. At one time the city seems to have been called "Jebus" (Josh. xv. 8, xviii. 28; Judges xix. 10). It was at Jerusalem that Adoni-bezek died (Judges i. 7). Finally the Judahites took the place, burned it, and killed its inhabitants. It must have been soon rebuilt; for in the early history of David (I Sam. xvii. 54) it is again called by its old name, "Jerusalem." Perhaps only the "lower city" had been taken (Josephus, "Ant." v. 2, § 2)—just as in Maccabean times the Acra or citadel was held for twenty-six years by the Syrian garrison—which would explain the apparent contradiction between verses 8 and 21 of Judges i. (Moore, "Judges," p. 21). The name "Zion" seems already to have been attached to a portion of the city; at least the "Meẓudat Ẓiyyon" is mentioned (II Sam. v. 7; I Chron. xi. 5). But the place was renamed by David "'Ir Dawid" (= "City of David"), in the same manner as Assyrian rulers were wont to give their names to captured cities. Though dignified by the name "'Ir," the town need not necessarily have been large. In addition to the fortress, it must have contained some place of worship, besides houses for the people and the soldiers. What the "Ẓinnor" (II Sam. v. 8) was is not known. The word is usually rendered "watercourse" (LXX. *παραξιφις* (?); Aquila, *κρουνισμος* = "stream"; Symmachus, *ἐπαλξις* = "battlement," "parapet"; according to later Hebrew usage, "canal," "aqueduct").

Situation of Zion.

The exact situation of these early settlements has always been a matter of dispute. The author of I Macc. iv. 37 says expressly that the Temple was built upon Mt. Zion; and the presence of St. Mary's Well and the Siloam Pool seems to show that the natural position of the ancient fortress was upon the edge of the southeastern hill, where, as the excavations of Guthe and Bliss have shown, the level of the ground was much higher than at present. It is true that later tradition, both Jewish and Christian, agrees in placing Zion upon the southwestern hill; but even the latest attempts of Karl Rückert ("Die Lage des Berges Sion," Freiburg, 1898), Georg Gatt ("Sion in Jerusalem," Brixen, 1900, and "Zur Topographie Jerusalems," in "Z. D. P. V." xxv. 178), and C. Mommert ("Topographie des Alten Jerusalems," Leipsic, 1902) have not been successful in harmonizing this theory with the Biblical data. The theory is based chiefly upon (1) the direction of the old north wall, ending at the Ḥaram, as described by Josephus ("B. J." v. 4, § 2), and south of which Zion must (?) have stood, and (2) the place of David's burial, which, according to tradition, is usually placed on the southwestern hill (see "Z. D. P. V." xxiv. 180-185).

There were only two natural water sources near Jerusalem, En-rogel and Gihon, respectively east and southeast of the city. The first (II Sam. xvii. 17; I Kings i. 9) has generally been identified with

St. Mary's, or the Virgin's, Spring, largely because the flight of steps running from the spring to Silwan is to-day called "Zaḥwayleh," *i.e.*, "Zoheleth" (I Kings *l.c.*). But the distance is too great; and the application of the term to these particular steps is not certain. En-rogel, according to tradition ("Ant." vii. 14, § 4), was in the king's garden; and Mitchell's identification of it with the Bir Ayyub is worthy of acceptance ("Jour. Bib. Lit." xxii. 108). The well Gihon (I Kings i. 33, 35, 38; II Chron. xxxii. 30, xxxiii. 14) is the so-called "Virgin's Spring." In addition, there were several pools: the "old pool" (Isa. xxii. 11), now called the Patriarch's Pool, northwest of the city; the "lower pool" (Isa. xxii. 9), now known as the Birkat al-Ḥamra; and the "upper pool" (*ib.* vii. 3, xxxvi. 2; II Kings xviii. 17), probably the Mamilla Pool, west of the Jaffa Gate, which fed the "old pool." In regard to the "Serpents' Pool," see below.

City of David.

The city at this epoch may have extended to the southwestern hill; but it is not clear what enlargements were due to David. In II Sam. v. 9 it is said that he built "round about from Millo and inward." The Millo, however, was built by Solomon (I Kings ix. 15, 24); and the reference at the time of David may be to the place where in later times the Millo was. Whether the latter was part of the wall or a citadel (LXX. ἡ ἄκρα) is not known. It was, however, part of the defense of the city, and is mentioned in connection with the walls (*ib.*). It was strengthened by Hezekiah upon the approach of Sennacherib (II Chron. xxxii. 5); and may have been an artificial terrace (comp. the Assyrian "Mulu" and "Tamlu").

A palace of stone and of cedar-wood from Lebanon was built for David by Tyrian workmen (II Sam. v. 11, vii. 2). It must have stood somewhere between the Temple and the Siloam Pool, from the latter of which steps led up to the city of David (Neh. iii. 15). Some sort of tabernacle must also have been erected for him (אהל, II Sam. vi. 17; יריעה, *ib.* vii. 2); for he brought the Ark from the house of Abinadab in Gibeah, first to the house of Obed-edom, and then to the city of David (*ib.* vi. 3, 11). It was here that he deposited the gold and the silver that he had taken from the Aramean princes and from the Moabites and Ammonites, whom he had subdued (*ib.* viii. 11 *et seq.*). The plague that appeared in the land toward the end of David's reign does not seem to have touched Jerusalem. It was supposed to have been stayed mysteriously at a threshing-floor on Mt. Moriah, north of the city of David, belonging to one Araunah or Aranyah, which place was then bought by David, who erected an altar there (II Sam. xxiv. 14 *et seq.*; I Chron. xxi. 15 *et seq.*). David was buried "in the city of David" (I Kings ii. 10). The site of the tomb is unknown; but it was situated probably in the rocks of the southeastern hill ("Z. D. P. V." iii. 210, v. 330). It is mentioned in Neh. iii. 16 as being near to the steps (see above); and it was known in New Testament times (Acts ii. 29).

Improvements by Solomon.

Under Solomon the city took on a much grander aspect. There is now definite reference to a wall surrounding it (I Kings iii. 9, ix. 15), a part of which seems to have been the Millo mentioned above. This wall must have enclosed some portion left open by David (*ib.* xi. 27). Solomon erected a palace made up of various buildings (*ib.* iii. 1), which took thirteen years to build (*ib.* vii. 1). The Temple was commenced in the month Ziv (*ib.* vi. 1; see TEMPLE); it occupied seven years in construction, and was finished in the month Bul (*ib.* vi. 38). With the help of a Tyrian, the two pillars Jachin and Boaz were fashioned out of bronze (*ib.* vii. 13 *et seq.*, ix. 11). The Temple was made up of a forecourt, the Holy Place (40 × 20 × 30 ells), the Holy of Holies (a cube of 20 ells), and various smaller buildings adjoining. To this Temple the Ark was removed from the city of David on the Feast of Tabernacles (*ib.* viii. 1). With the assistance of Hiram of Tyre (I Kings v. 15 *et seq.*), Solomon built a palace for Pharaoh's daughter (*ib.* vii. 8), and the "house of the forest of Lebanon" ("bet ya'ar ha-Lebanon," *ib.* vii. 2), which measured 100 × 50 × 30 cubits, and the top part of which was used as an armory (*ib.* x. 16). All these buildings, constructed of stone and wood, seem to have stood in a sort of court ("ḥaẓer"), around which was a wall of three courses of stone (*ib.* vii. 12). Smaller courts surrounded the individual buildings. Solomon is said to have embellished Jerusalem with silver and costly wood (*ib.* x. 27). In later years he built, also, a "bamah" to Chemosh and to Molech "in the mount that is before Jerusalem" (*ib.* xi. 7, R. V.).

The extent of the city at this time might be gaged by tracing the probable line of the wall, if that line were at all certain. Some scholars believe that Solomon enclosed the western hill; the wall would then be the first of the three, which had sixty crenelations, mentioned by Josephus ("B. J." v. 4, § 2). It would accordingly have commenced at what was later the tower Hippicus, near the present Jaffa Gate; running eastward to the Xystus, it would then have encircled the greater part of the Temple mount; bending south and southwest, it would have skirted Ophel, though not including the Siloam Pool (Josephus says "above the fountains"); and, enclosing the present Jewish and Protestant cemeteries, it would then have turned north again, meeting the other end at the Jaffa Gate. Upon this supposition, the remains found in the excavations of Maudslay in 1865, successfully followed by Bliss in 1896-97, are parts of this wall. Where the towers Hananeel and Ha-Meah or Meah stood can not be ascertained. They are mentioned in Jer. xxxi. 38; Zech. xiv. 10; Neh. iii. 1, xii. 39. The former seems to have marked the northeast corner of the city; the latter, to have been on a wall leading westward from this corner.

As Capital of Judah.

After the partition of the kingdom Jerusalem suffered many vicissitudes. It was taken by Shishak of Egypt at the time of Rehoboam of Judah (I Kings xiv. 25-26); and Jehoash of Israel destroyed 400 cubits of the wall from the Ephraim Gate to the corner gate (II Kings xiv. 13). It seems probable that the wall was repaired under Uzziah; at least, according to II Chron. xxvi. 9, he built towers over three of the gates. The Ophel wall was further repaired or enlarged by Jotham (*ib.* xxvii. 3); and a gate, called in Jer. xxxvi. 10 the "new gate," was built in the north wall of the Temple court (II Kings xv. 35). The coming of Sennacherib (701) caused the rebuilding of some portion of the wall which in the course of time had become ruined; but Sennacherib withdrew and Jerusalem was spared a siege (see Nagel, "Der Zug des Sanherib Gegen Jerusalem," Leipsic, 1902; and Jensen in "Theol. Lit. Zeitung," 1904, 4, col. 103). Hezekiah is mentioned as having done this repairing. He also rebuilt the Millo, and especially erected "another wall outside" (Isa. xxxii. 10; II Chron. xxxii. 5). This is probably Josephus' second wall, which "took its beginning from that gate which they called Genneth, which belonged to the first wall: it only encompassed the northern quarter of the city and reached as far as the tower Antonia," the northwest corner of the Temple mount ("B. J." *l.c.*). This indicates the growth of the city to the north; the additional part being called "Mishneh" ("second city"; II Kings xxii. 14; Zeph. i. 10). Whether the Maktesh (Zeph. i. 11), in which the Phenician traders lived, was a part of the city can not be ascertained (Neh. xiii. 16; Zech. xiv. 21).

Water-Supply.

To Hezekiah was due also the regulation of the water-supply in Jerusalem, so that the city might be prepared for a siege. The only natural spring of real value is Gihon on the southeastern side in the Kidron Valley (now called "Virgin's Spring" or "Spring of the Steps"), which from early times seems to have been used to provide the city with water. Undoubted traces have been found of an early conduit, partly open and partly underground, which conducted the water from the spring around the hill into the city of David (perhaps the earlier "Shiloah" of Isa. viii. 6; see Schick in "Palestine Exploration Fund Quarterly Statement" [hereafter cited as "P. E. F. S."], 1886, p. 197). In 1867 a rock tunnel was discovered by Warren that brought the water westward into a basin cut in the rocks; to this access was had by a shaft from above (perhaps the "king's pool," Neh. ii. 14), from the top of which a series of corridors led to an exit on the Hill of Ophel. Hezekiah cut off the flow of water to the north and had a conduit excavated through the rock, thus leading the water within the city limits to the Siloam Pool (II Chron. xxxii. 30; II Kings xx. 20). This Siloam conduit, which was discovered in 1880, is 1,757 feet in length. At about 19 feet from the Siloam end was found the famous inscription detailing the manner in which the undertaking had been carried out (see SILOAM INSCRIPTION). The usefulness of this work may be gaged by the fact that it is specially mentioned to Hezekiah's honor by Ben Sira (Ecclus. [Sirach] xlviii. 17). It seems probable also that this king built a special fortification around Siloam ("wall of the pool of Siloah," Neh. iii. 15; "between the two walls," Isa. xxxii. 11; Jer. lii. 7). The graves of the common people (Jer. xxvi. 23, xxxi. 40) were probably in the Kidron Valley. The wall built by Manasseh (II Chron. xxxiii. 14) encompassed Ophel; starting west of Gihon, it must have been an additional protection for the southeastern fortifications. Its position can not be accurately determined.

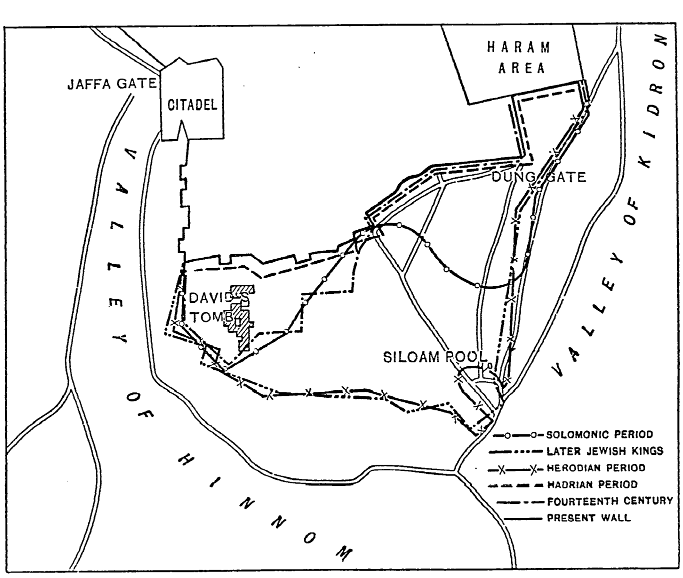
Taken by Nebuchadnezzar.

In the reign of Jehoiakim, Nebuchadnezzar of Babylon made his first invasion into Palestine. There is no trace of a siege of Jerusalem at this time; but some of the Temple vessels were carried off (*ib.* xxxvi. 7). In 597 B.C., however, an encircling wall was built by the invaders, and the city invested. At the time of Jehoiachin (Jer. lii. 6) famine raged in the city. The rebellion of Zedekiah caused a second invasion in 587; and after a siege of a year and a half Jerusalem was taken on the ninth day of the fourth month (Ab), 586. The beauty and the strength of the city were destroyed. Nebuchadnezzar's general, Nebuzar-adan, burned the Temple, carrying away all the brass and the vessels; he burned also the king's palace and the larger houses of the city. The walls were razed, and a large number of the inhabitants (10,000, according to II Kings xxiv. 14) were deported and settled in various parts of Babylon; a number probably at Nippur, to judge from the names found by Hilprecht in the business documents of that city ("P. E. F. S." 1898, pp. 54, 137; Batten, "Ezra and Nehemiah," p. 57, in "S. B. O. T."). Even before this the city must have been depleted through the flight of many to Egypt (Jer. xlii. *et seq.*). The seat of government was removed to Mizpah (II Kings xxv. 23; Jer. xli. 1 *et seq.*).

Rebuilt 537–516 B.C.

There are no materials for a history of Jerusalem during the period of the captivity, or even during the centuries following the return. The view advanced by Kosters and supported especially by Wildeboer and Cheyne will be criticized elsewhere (see ZERUBBABEL); but there seems to be no really valid ground for doubting the tradition reported by the chronicler in Ezra iii. of a first return under Sheshbazzar and Zerubbabel in 539, during the reign of Cyrus; though Kosters may be right in pointing out that the Judahites who had been left in the city must have continued the worship of YHWH in some manner or other. In the seventh month of that year there was a great gathering in Jerusalem, and the altar of burnt offering was again set up—presumably upon the place it had formerly occupied. The reconstruction of the Temple was begun in the second month of the second year (537; Ezra iii. 8 *et seq.*). Though this was attended with great ceremony (*ib.* verses 10–11), it is entirely ignored by the accounts in Ezra v. 2; Hag. i. 14, ii. 15; and Zech. viii. 8, which place the commencement of the building seventeen years later, in 520, during the reign of Darius Hystaspes, under the same Zerubbabel and the high priest Jeshua. But as nothing is said in Ezra iii. of the amount of building done, it may be surmised that it did not extend beyond the mere foundations, the work being interrupted by the evil devices of the Samaritans (*ib.* iv.), who made complaint to the suzerain in Babylon. Even the erection of the building of the year 520 was not uninterrupted, Tatnai, governor of Cœle-Syria and Phenicia, making a second reference of the matter to Babylon necessary (Ezra vi.). It was at length finished in 516 (*ib.* verse 15). For the Temple building itself see Temple.

It is possible that the Birah or fortress was built at this time, though it is first mentioned in Neh. ii. 8. It was twice rebuilt in later times: once ("Ant." xv. 11, § 4, "Baris") by the Hasmonean kings, and a second time by Herod, who renamed it "Tower of Antonia." It was a strong, square building in the northwestern corner of the Temple mount, of some extent, as it had several gates. It was here that the high priests' vestments were kept (*ib.* xviii. 4, § 3), if the tower "built" by the high priest Hyrcanus is to be identified with Antonia, as is done by Josephus.



Southern Wall of Jerusalem at Various Times.
(After Bliss.)

The population of the city was further augmented by the expedition under Ezra in the year 458, which comprised 1,496 men, besides women and children. It was through Ezra and Nehemiah that the new community was organized. It is difficult to estimate accurately the relation of these two to each other; but the material building up of the city seems to have been due to the latter. Whatever theories may exist regarding the composition of the Book of Nehemiah, the data there given are old and trustworthy. Nehemiah's night journey around the walls (Neh. ii. 13 *et seq.*), the account of the building operations (*ib.* iii.), and the route of the processions (*ib.* xii.), would give definite information as regards the extent of the city if the identification of the gates were in every case certain. A thorough exposition of the archeological data to be gotten from Nehemiah's accounts will be found in Ryssel's commentary ("Kurzgefasstes Exegetisches Handbuch"). The most recent study of the subject has been commenced by H. Vincent in "Revue Biblique," 1904, pp. 56 *et seq.* **The Night Ride of Nehemiah.** In his night ride Nehemiah starts from the Valley Gate; goes in the direction of the well 'En-Tannin, then to the Dung Gate, the Fountain Gate, and the Pool of the King; passes through the valley; and returns to the Valley Gate. The location of these various places depends upon the position assigned to the Valley Gate. The word "Gai" undoubtedly stands for "Gai ben Hinnom"; and this must be identical with the Wadi al-Rababi on the south and its continuation northward on the west. Bliss has uncovered a line of wall starting southwest of the old Pool of Siloam and running in a northwestern direction, as well as remains of a gate 600 feet from what was the southwestern corner of the ancient city. This was probably the Valley Gate, although many identify the latter with the present Jaffa Gate, on the western side of the city. From the Valley Gate Nehemiah, taking the direction of the Serpents' Pool ("'En-Tannin"; sometimes identified with the pool of that name mentioned by Josephus ["B. J." v. 3, § 2]; by Caspari and Schick ["Z. D. P. V." xiv. 42], with the aqueduct which led the water from the Pools of Solomon; by Stade and Mitchell, however, with En-rogel ["Jour. Bib. Lit." 1903, p. 114]), proceeded to the Dung Gate, 1,000 cubits from his starting-point, and possibly the Harsith Gate of Jer. xix. 2, which in turn may be identified with a second gate, discovered by Bliss, 1,900 feet east of the first. He then went east, crossed the Tyropœon below the present Birkat al-Ḥamra, and came to the Fountain Gate near the Siloam Pool (here called the "pool of the king"), perhaps the "gate between two walls" through which King Zedekiah fled (II Kings xxv. 4; Jer. xxxix. 4, lii. 4), traces of which have also been found by Bliss. Nehemiah was then in the Kidron Valley, and, being unable to proceed farther along the walls, he returned to the city through the Valley Gate. It seems therefore that he examined only the southern and the southwestern walls of the city.

The walls and gates as rebuilt under Nehemiah's directions are succinctly noticed in Neh. iii.; and their order is partially assured by the reverse enumeration, *ib.* xii. 38 *et seq.* The Sheep Gate is naturally to be sought for north of the Temple area. It is identified by some with the "gate of Benjamin" (Jer. xxxvii. 13, xxxviii. 7). The Fish Gate was so named after Tyrians who brought fish to Jerusalem (Neh. xiii. 16), and was situated on the northwestern side near the present Damascus Gate (II Chron. xxxiii. 14; Zeph. i. 10). The latter, which was strengthened by Manasseh, is sometimes called the "middle gate" (Jer. xxxix. 3). **The Gates.** The "old gate" or "gate of the old pool"—referring perhaps to the Patriarch's Pool northwest of the city—is called also "Sha'ar ha-Rishon" (Zech. xiv. 10) and "Sha'ar ha-Pinnah" (II Kings xiv. 13; Jer. xxxi. 38; "ha-Poneh," II

Chron. xxv. 23; "ha-Pinnim," Zech. xiv. 10). The Ephraim Gate led to the chief road to the north, where the throne of the Persian governor was placed; which throne can not have been in another place, Mizpah, the residence of the governor, as Ryle and Mitchell suggest. Where the "broad wall" was can not now be determined. In connection with it, reference is made to the "tower of the furnaces" (Neh. iii. 11), mentioned before the Valley Gate, and which was probably somewhere along the Tyropœon Valley. Schick, however ("Z. D. P. V." xiv. 51), places it near the Tower of David; Stade, about the middle of the western wall; and Mitchell (*ib.* p. 128), at the southwestern corner of the ancient city, where the remains of a tower whose base was hewn out of the native rock have been found ("P. E. F. S." 1875, p. 83). Then came the Dung Gate and the Fountain Gate mentioned above, a wall or a dam enclosing the Siloam Spring (*i.e.*, the "lower pool," Birkat al-Ḥamra), in the neighborhood of which were the king's gardens (II Kings xxv. 4), the king's wine-presses (Zech. xiv. 10), and the steps leading down from the city of David on the eastern side of the hill ("Z. D. P. V." xi. 12), an artificial pool (Neh. iii. 16), and the "house of the warriors," either a tower or a species of barracks. The line of wall then turned ("angle," *ib.* verse 19) apparently to the northeast. Here two corners were found by Guthe ("Z. D. P. V." v. 298), between which turning and Ophel were the houses of the high priest and the dwelling-places of the Nethinim (Neh. iii. 21–23). Then came the upper royal palace, a projecting tower the ruins of which have been found, the "court of the guard" (*ib.* 25, 26), and the Water Gate (*ib.* iii. 26, xii. 37), near which there must have been an open space (*ib.* viii. 1, 3, 16); it was probably so called because a road led from it to the Virgin's Spring. The Horse Gate (*ib.* iii. 28) was probably toward the southeastern corner of the Temple. In former times it was directly connected with the palace (II Kings xi. 16; II Chron. xxiii. 15; comp. Jer. xxxi. 40). The other gates of the Temple wall on the east were the "gate of Benjamin" (Jer. xx. 2; R. V. "upper gate of Benjamin"; Zech. xiv. 10); the "gate of the Guard," generally located at the northeastern corner of the Temple area, though Schick and Mitchell are inclined to place it south of the Temple; and the "gate Miphḳad" (Neh. iii. 31). The Sheep Gate on the north ended the work.

In addition to the walls, Nehemiah did much for the rebuilding of the city itself. A house for the high priest is mentioned (Neh. iii. 20), as are also dwellings for the other priests near the Horse Gate (*ib.* iii. 28); while, as stated above, the Nethinim had residences on Ophel, west of the Water Gate (*ib.* iii. 26), where there was also an outlying tower. The king's palace seems still to have been standing, or to have been rebuilt (*ib.* iii. 25), and was also flanked by a tower. It has been computed that the whole city thus included within the walls (Temple mount, the old city, and its southern additions) occupied about 200 acres, and covered both the eastern and the western hills. It is said to have been "large and great" (*ib.* vii. 4); but there were few houses built for the common people.

Seized by the Persians.

No events during the Persian period are recorded with any certainty. Josephus has a story that one Bagoses (Bagoas), "the general of Artaxerxes' army," used a quarrel between the high priest John and his brother Jesus (in which the latter was slain) as a pretext to enter the Temple with his Persian soldiers and to "punish the Jews for seven years" ("Ant." xi. 7, § 1; Eusebius, ed. Schoene, ii. 112). This Bagoas is supposed to be the general of the same name under Artaxerxes Ochus (357–338), who with Memnon put down an Egyptian revolt. The identification is quite uncertain, in spite of the authority of Nöldeke ("Aufsätze," p. 78), Wellhausen ("I. J. G." p. 146), and Cheyne ("Introduction to Isaiah," p. 360). Winckler places the occurrence under Cambyses (Schrader, "K. A. T." 3d ed., pp. 120, 291).

Under the Seleucids.

Whether Alexander the Great was really in Jerusalem after the siege of Gaza in 332 is a matter of dispute, though it is hardly to be supposed that he was in Palestine without visiting the capital. The Talmud (Yoma 69a, etc.) has a reminiscence of such a visit, which may be true despite the legendary character of the details in Josephus (Grätz, "Gesch." ii., 2d. ed., p. 221). The latter says ("Ant." xi. 8, §§ 4 *et seq.*) that Alexander exempted its inhabitants from the payment of tribute in the seventh year (see Jew. Encyc. i. 341, *s.v.* Alexander the Great). But the city naturally suffered during the wars between the Ptolemies and the Seleucids which followed the disruption of Alexander's Asiatic empire. Ptolemy Soter seized Jerusalem (in 320 or 305) on a Sabbath-day, as Josephus says ("Ant." xii. 1, § 1) on the authority of Agatharchides of Cnidus, and the priests probably paid tribute to him. In 203 the city was taken by Antiochus; but it was retaken in 199 by the Egyptian general Scopas. The Jews inclined to the Seleucids. According to Josephus ("Ant." xiii. 3, § 3), they even assisted Antiochus when in 198 he seized the (Egyptian?) garrison which was in the citadel of Jerusalem, and admitted him and his soldiers into the city. The Syrian king showed his gratitude by assisting in the rebuilding of various places which had fallen into decay, by repopulating the city, by supplying material for the sacrifices, and by removing part of the heavy taxes. It seems probable that Simon, the high priest, using the permission to offer sacrifices, had the Temple repaired, a cistern dug, the wall for the Temple ("hekal melek") built, and the city fortified; for all of which he is praised by Ben Sira (Ecclus. [Sirach] l. 1-4).

Described by Aristeas and Hecatæus.

If the letter of Aristeas dates from about 200 B.C., as Schürer and Abrahams hold, it gives a fair description of the appearance of the city and especially of the Temple at that time. The city comprised 40 stadia, and the wall had towers. The narrator expresses his especial astonishment at the many canals that carried off the blood and the water from the Temple, and at the magnificence of the service. A similar description of Jerusalem at this time occurs in the fragments ascribed to Hecatæus of Abdera (cited by Josephus, "Contra Ap." i. 22), who speaks of the city as being 50 stadia in extent, with 120,000 inhabitants; of the wall surrounding the Temple area (150 miles in length, 44 miles wide); and of the altars and priests in the Temple (Reinach, "Textes," p. 232). The "flagrant mistakes" which the letter of Aristeas is supposed to contain (Kautzsch, "Apokryphen," ii. 12, note b) are not apparent. This view rests upon his description (§§ 100-104) of the Acra or citadel, which was the chief defense of the Temple area. That such an Acra existed is evidenced, in spite of Wendland, Willrich, and Wellhausen, by the presence of the Syrian garrison left there by the Egyptian general Scopas (II Macc. iv. 27; "Ant." xii. 3, § 1), which garrison was driven out by Simon Maccabeus (I Macc. xiii. 49). Where the Acra stood is doubtful, as the word is applied by Josephus in a general sense to various citadels. Under the Hasmoneans this defense was finally razed, the hill on which it stood being leveled, in order that the Temple might rise high above all other buildings, and to prevent the occupation of the citadel by an enemy ("Ant." xiii. 6, § 7). The northwestern part of the Temple mount can not be meant, as the rock upon which the Antonia was built still exists. In addition, I Maccabees speaks repeatedly of the Greeks fortifying themselves in the "city of David" (i. 33, ii. 31, vii. 32, xiv. 36), which overlooked the Temple ("Ant." xii. 9, § 3; 10, § 5).

The spread of Hellenism was in many ways fatal to the Jews of Jerusalem. It introduced factions into the life of the people; and the contests between the brothers Jason and Menelaus for the high-priestly office occasioned the presence of Antiochus Epiphanes (170 B.C.), who plundered the Temple of its treasures and killed a large number of the inhabitants (I Macc. i. 20; II Macc. v. 12; "Ant." xii. 5, § 3; "B. J." i. 1, § 1). Two years later his general and farmer of the taxes, Apollonius, attacked Jerusalem with a large army; took the city, also killing a large number; set fire to many of its buildings, razed some of its walls, and carried away many captives. The altar of the Temple was desecrated; and the Temple itself was given over to heathen worship. Apollonius built a strong wall around the Acra, which he evidently enlarged (I Macc. i. 29; II Macc. v. 24), and in which he entrenched the Syrian garrison. Jerusalem must, however, have commenced to take on the appearance of a Hellenic city. There was a gymnasium built on the hill west of the Temple (I Macc. i. 14; "Ant." xii. 5, § 1); probably the Xystus (Colonnade), which was joined to the Temple plateau by a bridge.

Recaptured by Judas Maccabeus.

In 165 Judas Maccabeus was at length successful in driving the Syrians out of the Temple and out of the greater part of the city, in honor of which the Feast of Ḥanukkah was instituted. The Temple mount was fortified with high walls and strong towers (I Macc. iv. 60, vi. 7). The citadel, however, was not freed until the time of Simon (142). In 163 Jerusalem was once more besieged, by Antiochus V., Eupator. Failing to take it, he feigned a peace; and, entering the city, he caused the wall around the Temple area to be razed (I Macc. vi. 60 *et seq.*; "Ant." xii. 9, §§ 5-7). It was rebuilt by the Maccabean Jonathan with rectangular stones, and he also repaired the walls of the city (I Macc. x. 10, 11). In 143 he raised the wall still higher, rebuilding a portion called "Caphenatha," which led down to the Kidron Valley, and which had fallen into decay (*ib.* xii. 36, 37). Finally, he built a wall to separate effectually the Acra from the rest of the city (*ib.*). This work was completed by his successor, Simon (*ib.* xiii. 10), who as related above expelled the Syrian garrison and leveled the hill of the Acra. The author of I Maccabees, however, knows nothing of this leveling; in xiv. 37 he speaks of Simon's fortifying the citadel, and in xv. 28 he mentions it as still existing. Wellhausen ("I. J. G." p. 227) supposes that the work was done at the time of John Hyrcanus. No certainty can be reached on this subject; but that the leveling occurred is proved by the various ground-levels as they exist to-day (Schürer, "Gesch." i. 195, note 14). Under Hyrcanus the city was once again besieged, by Antiochus VII., Sidetes (134 B.C.). Towers were raised by him opposite the northern wall; and great suffering ensued. On this occasion Hyrcanus opened the sepulcher of David and took out 3,000 talents ("Ant." vii. 15, § 3; "B. J." i. 2, § 5). A truce was made and, while the Syrian garrison was not admitted, some part of the fortifications around the city was leveled ("Ant." xiii. 8, §§ 2-4); it seems, however, to have been soon rebuilt (I Macc. xvi. 23).

Captured by Pompey.

The Roman power was hovering not far from Judea. It was soon to fasten its claws upon Jerusalem, in consequence of the fratricidal war between Aristobulus II. and Hyrcanus II. Aristobulus had fortified himself on the Temple mount, where he was besieged by Hyrcanus, aided by the Idumean Aretas. Pompey was appealed to by both combatants; and, not wishing to decide in favor of either, he moved against the city (66 B.C.). The war party had entrenched itself behind the walls in the northern part of the Temple area, and day after day Pompey raised a bank on which the Roman battering-rams were placed. These finally broke down one of the towers and made breaches in the wall (Tacitus, "Hist." v. 9; Dio Cassius, xxxvii. 16). Josephus ("Ant." xiv. 4, § 4; "B. J." i. 7, § 12) says that 12,000 Jews perished, and that many houses were fired by the Jews themselves. Though the Temple was not touched, the bridge crossing the Tyropœon to the Xystus was destroyed; this, however, was rebuilt later ("B. J." ii. 16, § 4). Jerusalem thus became (in the autumn of 63) the capital of one of the five provinces into which Palestine was divided ("Ant." xiv. 5, § 4; "B. J." i. 8, § 5); but this arrangement was not of long duration. The Syrian proconsul M. Lucinius Crassus despoiled the Temple, taking 2,000 talents of money and all the golden objects he could find ("Ant." xiv. 7, § 1; "B. J." i. 8, § 8). Permission to rebuild the walls was given by Julius Cæsar ("Ant." xiv. 10, § 5). More blood was shed in the conflicts between Antigonus, Phasael, and Herod, the sons of the Idumean Antipater; and in the year 40 the Parthians, under Pacorus and Barzapharnes, occupied Jerusalem and plundered it and the surrounding country ("Ant." xiv. 13, § 9). The city itself was beleaguered by Herod (37 B.C.) and the Roman general Sosius, the attack coming again from the north. After forty days the first wall was taken; after fifteen more, the second; finally, the Temple and the upper city were captured and a terrible slaughter ensued ("Ant." xiv. 16, § 3; "B. J." i. 18, § 2).

Buildings of Herod.

With the accession of Herod the city entered on a period of outward brilliancy. He was the great building king, and is renowned especially for the palace that he erected and for the Temple that he restored. The palace was built (24 B.C.) upon the extreme western part near the present Jaffa Gate, where to-day are the barracks and the Armenian Garden. It was walled in to the height of 30 cubits; it had towers, many porticos in which were pillars, and large chambers; and outside were groves of trees, a deep canal, cisterns, and brazen statues, all of which excite the admiration of Josephus. Herod's restoration of the Temple, begun in 20 B.C. (finished in 62-64 C.E.), was carried out with great magnificence. He built also a theater, and in the plain ("P. E. F. S." 1887, p. 161) an amphitheater covered with "inscriptions of the great actions of Cæsar" ("Ant." xv. 8, § 1; a hippodrome, according to "B. J." ii. 3, § 1), as well as a town hall, near the present maḥkamah; and in the northeast he erected a monument to himself ("B. J." v. 12, § 2), which can not be exactly located. He enlarged the Baris commanding the Temple on the north, and renamed it "Antonia." It was connected with the Temple by a flight of stairs (Acts xxi. 35). He does not seem to have added to the walls, but to have strengthened and beautified them to the north of his palace by four towers called respectively "Psephinus" (an octagon 70 cubits high), "Hippicus" (a square of 25 cubits), "Mariamne" (a square of 40 cubits), and "Phasael" (a square of 30 cubits). In these towers were reservoirs and living-rooms; and they had battlements and turrets ("B. J." v. 4, § 3). Of the other features of the city at this time may be mentioned the Κολυμβήθρα 'Αμύγδαλον ("B. J." v. 11, § 4), which, if it represents the Hebrew "Berekat ha-Migdalim," must have been in the neighborhood of the four towers. Where the "Lishkat ha-Gazit," in which the Sanhedrin sat, was situated is not clear. According to the Mishnah, it was in the inner court of the Temple. If it is the Βουλή of Josephus, or rather the Βουλευτήριον, it must have been on the western side of the Temple mount not far from the Xystus, of which word the Hebrew "Gazit" would be a translation (Schürer, "Gesch." 3d ed., ii. 211). The city, largely extended as it was to the north, was indeed magnificent in appearance, but with a strangely Roman character imprinted upon an Oriental background. It was during the reign of Herod that Jesus was born (Matt. ii. 1; Luke ii. 1); and during the reign of Herod's successor, Herod Antipas, that he was crucified (see Jesus).

Growth of Northern Suburb.

Very little change was effected in Jerusalem during the years between Herod and the destruction under Titus. Pilate increased the water-supply by building a conduit 200 furlongs in length; whence the water came, Josephus does not state ("Ant." xviii. 3, § 2). If this conduit was one of those which carried the water from the Pools of Solomon south of Bethlehem, it is probable that Pilate only repaired what already existed (Baedeker, "Palestine and Syria," p. 132). The friction between Jews and Romans increased, especially as a garrison of the latter was permanently stationed in the Antonia. The northern suburb had grown to such an extent that in the year 41 of the common era Agrippa I. repaired its walls, making them broader and higher ("Ant." xix. 7, § 2). Josephus says that the work was stopped by Emperor Claudius, and that the people completed it, probably not in as magnificent a style as had been contemplated ("B. J." v. 4, § 2). According to Schick, this work is represented by the present northern wall ("Z. D. P. V." xvii. 87). Most of the original wall has in course of time been carried off for building purposes; but as late as 1869 about forty or fifty yards were still visible (Merrill, in "P. E. F. S." 1903, p. 159). This new part of the city was over against the Antonia, but was divided from it, as a precaution, by a deep valley. Josephus calls this "Bezetha" ("B. J." v. 5, § 8), which he interprets as "New City," but which in Aramaic ought to be "Bet-Ḥadta." It is called "Bezeth" in I Macc. vii. 19; "Bezetho" in "Ant." xii. 10, § 2; "Bethzatha" in John v. 2 (R. V., margin; "Bethesda," A. V.; בית חסדא in Palestinian Syriac; see Grätz, "Gesch." iii., note 11).

The beauty of the city was enhanced by several palaces erected toward the south by the royal family of Adiabene: one by Monobaz near the wall running east from Siloam ("B. J." v. 6, § 1); another for Queen Helena ("in the middle of the Acra," "Ant." vi. 6, § 3); and a third built by Grapte, a relative of Izates ("B. J." iv. 9, § 11). A family burial-place was erected by Helena three furlongs north of the city in the form of a triple pyramid ("Ant." xx. 4, § 3). Agrippa II. built an addition to the Hasmonean palace near the Xystus, which, however, gave offense to the priests, as from it all the doings in the Temple courts could be observed. It was also a menace in time of war. They, therefore, erected a wall which effectually shut out the inner court even from the western cloisters, in which a Roman guard was kept ("Ant." xx. 8, § 11). The Antonia was also a constant menace to the Temple itself. In the time of Florus the Jews destroyed the cloisters between the two buildings ("B. J." ii. 15, § 6); but subsequently they were rebuilt.

A picture of Jerusalem shortly before its final destruction can be drawn from the accounts of Josephus, Tacitus, and the New Testament. The varied character of its population must have been quite evident, made up, as it was, of different parties of Jews, notably Zealots and Hellenists, on the one hand, and of Romans on the other. At the time of the great festivals, the city and its surroundings must have been filled with Jews from other towns and villages, and even from the farthest portions of the Diaspora ("Ant." xvii. 9, § 3). Josephus says that at one time 2,565,000 offered the Passover sacrifice ("B. J." vi. 9, § 3; comp. John

Jerusalem Before the Fall.

xii. 20; Acts ii. 5–11; and "Z. D. P. V." iv. 211), and that at the similar festival in the time of Florus 3,000,000 were present ("B. J." ii. 14, § 3)—as evident an exaggeration as the Talmudic reckoning of 12,000,000 (see Chwolson, "Das Letzte Passamahl Christi," p. 48), though Tacitus ("Hist." v. 13) states that the number of the besieged was 600,000. According to Josephus ("B. J." v. 6, § 1) there were 10,000 soldiers in Jerusalem at the time of the final rebellion in addition to 5,000 Idumeans. The Roman procurator had his court in the Pretorium (Mark xv. 16 *et seq.*). It seems likely that this was part of the Antonia, where the Roman garrison was situated (Acts xxi. 34) and where the procurator's judgment-seat is said to have been (Matt. xxvii. 19).

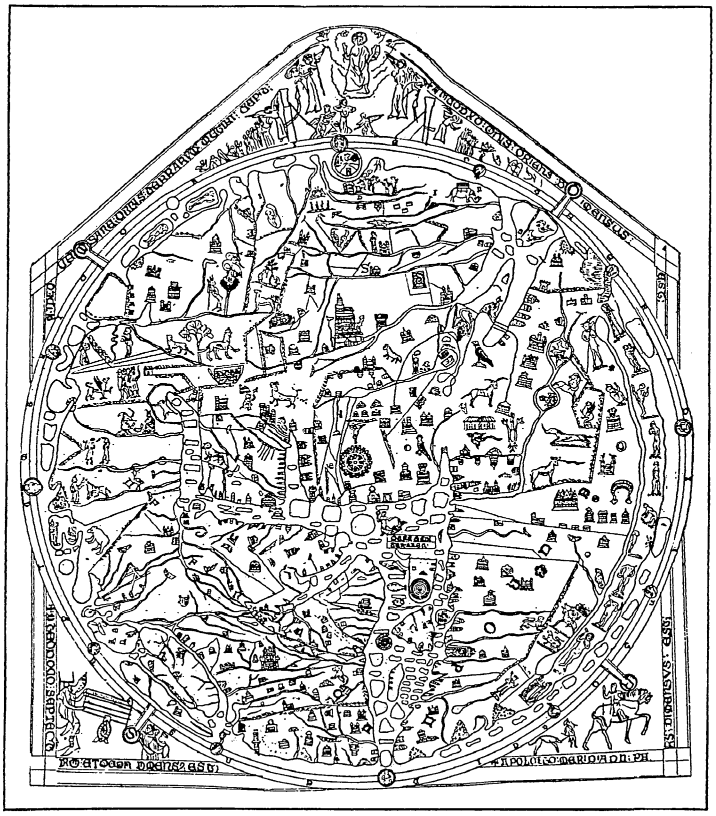
The Walls.

The account of Tacitus ("Hist." v. 8–12) is meager. He mentions the walls with towers 120 feet high, part of which height was that of the natural elevation upon which they were built. He mentions also a perennial fountain of water. Further details, especially of the walls, are given by Josephus ("B. J." v. 4). He says that the city lay upon two opposite hills, with a valley between: the one containing the upper city was much higher and longer, and was called in his day the "upper market-place"; the other hill, called "Acra," was ἀμφίκυρτος ("gibbous"), referring, no doubt, to the city of David of the Old Testament, *i.e.*, Zion. Over against this was a third hill, lower and separated from it by a valley, evidently the Temple mount. In addition to this there was the "new city" (for another, novel but unacceptable, view of these designations see Gatt in "Z. D. P. V." xxv. 178). This would give the city an extent of about 33 stadia or 6 square kilometers; though Eusebius gives only 27 stadia. The walls were three in number. That on the north was a triple one, on account of the vulnerable condition of the city from that direction. The southernmost wall encompassed the upper and the lower city and Ophel. It started at Hippicus, ran south to the Gate of the Essenes at the southwest corner of the city, then east, curving as it approached the Kidron Valley, from which it ran north-northeast, joining the Temple enclosure at its southeastern extremity. Bliss supposes that this wall did not include the Siloam Pool, as Josephus ("B. J." v. 9, § 4) speaks of the pool as being in the hands of the Romans. On the north it ran from Hippicus directly east to the northern edge of the southwestern hill, near the Xystus, where it joined the western porch of the Temple. The second wall to the north has been partly retraced by the excavations of Schick. It must have started near Hippicus and the gate Gennath, running slightly northward, enclosing the Amygdalon Pool, and then east; thence it ran north-northeast until it reached the Antonia. Schick supposed that it did not include the place where now the Church of the Sepulcher stands; but, according to Mitchell, he made a wrong estimate of the material found by him in 1887, and the wall included this space ("Jour. Bib. Lit." xxiii. 142). The third wall was that built by Agrippa I. It started also at Hippicus, ran northwest, then northeast, over against the monuments of Helena, passed by the tomb of the kings, and joined the old wall in the Kidron Valley. It seems probable that this coincided with the present northern wall of the city. See frontispiece, map of Jerusalem (time of destruction).

Destruction of the City (70).

The city, however, was doomed to destruction, partly because of the dissensions among its inhabitants and partly because of the exactions of the Roman procurators. Among the latter was particularly Gessius Florus (66 C.E.), who inflamed the multitude by taking 17 talents out of the treasury of the Temple, and by bringing his soldiers to Jerusalem, where they plundered the upper market-place and robbed many houses; though in the end he was forced to retire again to Cæsarea ("B. J." ii. 14–15). Cestius Gallus tried to retrieve the lost fortunes of Florus: he burned the new city Bezetha, stormed the inner wall, and had commenced to undermine the Temple wall when he was repulsed. Under Vespasian (70) was commenced the great siege of Jerusalem, which lasted from the 14th of Nisan until the 8th of Elul, 134 days. The war party, the parties of Simon and of John of Giscala, the Idumeans, and the peace party rent the city in pieces. Simon held the upper and lower cities; John, the Temple and Ophel; and they did as much destruction from within as the Romans did from without ("B. J." ii. 6, § 1). Vespasian was succeeded by his son Titus, who came with four legions. On the fifteenth day of the siege the wall of Agrippa was taken; on the twentieth and twenty-fourth, the second wall; on the seventy-second, the Antonia; on the eighty-fourth, the daily sacrifice in the Temple was stopped; on the ninety-fifth, the northern cloisters of the Temple were destroyed; on the one hundred and fifth, fire was set to the Temple and the lower city was burned; finally, the greater part of the city went up in flames. The Jews commemorate the Ninth of Ab as the day of the destruction of the Temple, though this seems to have taken place on the 10th of the month (Schürer, "Gesch." i. 530). Josephus says ("B. J." vii. 1, § 1) that orders were given to allow the towers Hippicus, Phasael, and Mariamne to stand, and "so much of the wall as enclosed the city on the western side," but that all of the remaining walls were leveled, and even their foundations were dug up. How far this is to be taken literally is not clear: recent excavations seem to show that it is only partially true. There is no proof that even the altar of burnt offering in the Temple was left, and that some sacrifices were still offered there; the explicit statement (Ta'an. iv. 6) that on the 17th of Tammuz the daily offering ceased is proof against the notices in the Epistle to the Hebrews, Clement of Rome, and Josephus (see discussion in Schürer, "Gesch." i. 548 *et seq.*). The suffering in the city must have been terrible. Many of the inhabitants were carried off and sold as slaves in the Roman markets. According to Josephus ("B. J." v. 13, § 7), as many as 115,880 dead bodies were carried out through one gate between the months of Nisan and Tammuz; and even before the siege was ended, 600,000 bodies had been thrown out of the gates. The 10th Roman legion was left in the city, for whose purposes the towers mentioned were allowed to stand. Bricks marked "leg. X Fret." (*i.e.*, Fretensis) have been found in numbers both in and outside of the city proper. Cæsarea, however, remained the capital of the Roman province (see Church, "The Last Days of Jerusalem," 1903).

The emperor Hadrian attempted to erect a Roman city upon the ruins of Jerusalem, and even to turn the Temple into a place of worship of Jupiter Capitolinus. A stone from the foundation of the statue of the latter, with a Roman inscription, is still to be seen in the southern wall of the Ḥaram (Luncz, "Jerusalem," v. 100). The Jewish legend (Gen. R. lxiv.), mentioned also by Chrysostom, Cedrenus, and Callistus, that the Jews themselves attempted to rebuild the Temple, seems untrustworthy; and the "Chronicon Paschale" says expressly that it was actually rebuilt by Hadrian (Schürer, *l.c.* i. 564). This may or may not have been the direct cause of the Bar Kokba war (see Jew. Encyc. ii. 508, *s.v.* Bar Kokba); at any rate, during the Bar Kokba revolt Jerusalem suffered still further. It seems probable that the leader and his insurgents did occupy Jerusalem for a while; his restruck Greco-Roman tetradrachms have as symbol a portico with four columns, evidently representing the Temple (Reinach, "Jewish Coins," p. 51), with the inscription "Of the Freedom of Jerusalem." When the rebellion was put down, in 134, the city was further destroyed (Appian, "Syria," p. 50), and the plow was drawn over the Temple mount by the governor-general Tinnius Rufus (Ta'an. iv. 6; Jerome on Zech. viii. 19). The new city was finally built and was named Ælia Capitolina after Hadrian and Jupiter Capitolinus; heathen colonists were introduced, and the Jews were prohibited from entering—a decree of Hadrian which was in force certainly up to the time of Eusebius, 312 ("Hist. Eccl." iv. 6). After a while the walls were repaired; but the city does not seem to have had the same extent as before. The new wall did not include part of Ophel and Mount Zion, and seems to have stood on the south where the present wall is found. Various public buildings were erected: a temple to Venus in the northern quarter, and a sanctuary to Jupiter on the site of the Temple. Statues to Hadrian and Jupiter were placed on the Temple area. The Antonia was rebuilt, but on a smaller scale, the ground to the north being turned into a covered market-place on which a triumphal arch was erected to Hadrian, part of which is the present so-called "Ecce homo" arch. The above-mentioned edict does not seem to have been strictly observed; for the Bordeaux Pilgrim (333) states that the Jews were allowed to visit annually "the pierced stone," which they anointed, and at which they bewailed their fate ("Palestine Pilgrim Text Soc. Publ." i., v. 22), a fact corroborated by Jerome (on Ezek. i. 15) and by the rabbinical writings (Eccl. R. xi. 1; Cant. R. i. 15; Lam. R. i. 17; Yer. Ber. 13b, above; "Luaḥ Ereẓ Yisrael," v. 16). Stone ossuaries ("osteophagi") containing bones of both Jews and Jewish Christians and dating from the second to the fourth century have been found in the Valley of Jehoshaphat.



The Hereford Mappa Mundi, 1280, Showing Jerusalem in the Center of the World.

Under the Christian Emperors.

With the advent of Constantine the Great the city became thoroughly Christian. In 336 the Church of the Anastasis was built over the Holy Sepulcher, and the Pool of Siloam was surrounded by a portico. There is a tradition that the emperor Julian, called "the Apostate," in 362 gave the Jews, of whom Rabbi Ḥillel was nasi, permission to rebuild the Temple, but that the plan was not carried out because of an explosion (Socrates, "Hist. Eccl." iii. 20; see Hanauer in "P. E. F. S." 1902, p. 389). Valentinian commenced to rebuild the walls, but died before the work was accomplished. In 450 the empress Eudoxia, widow of Theodosius II., restored them, enclosing within them the Pool of Siloam. Under the Council of Chalcedon (451) Jerusalem became an independent patriarchate. Additional Christian buildings were erected by Justinian in 532. In 614 the Persian Chosroes II. attacked Jerusalem. He is reported by the "Chronicon Paschale" to have been aided by 24,000 Jews ("P. E. F. S." 1898, p. 36). At the time of the emperor Maurice there were several earthquakes in Palestine; one of these caused the destruction of the building which had been erected on the site of the Temple. It is said that Jews were sent to rebuild it. In 629 Heraclius made peace with Siroes, the son of Chosroes, and reentered the city. He renewed the edict prohibiting the Jews from dwelling in Jerusalem. In 637 Omar and the Arabs appeared before Jerusalem, and the city came under the power of the Moslems. Omar erected a wooden mosque west of the Rock, and ordered that no new churches were to be built.

Rabbinic References.

For the whole of the Talmudic period very little information in regard to Jerusalem is to be obtained from the Jewish sources. What became of the Temple utensils carried off by Titus, and figured upon the arch erected to him in Rome, can not be ascertained, despite the various legends that have gathered around them (see, *e.g.*, Naphtali b. Isaac, "'Emek ha-Melek," p. 14a, Amsterdam, 1648). It is interesting to note that a picture on colored glass dating from the third century and representing the Temple at Jerusalem has been found in the Jewish catacombs of Rome ("Archives de l'Orient Latin," ii. 439). Jerusalem was supposed by the Rabbis to be the center of the habitable world (see the passages in Farḥi, "Kaftor wa-Feraḥ," p. 18a), a view adopted by medieval Christendom (see Bevan and Philroth, "Medieval Geography," p. xiii.); and the earthly Jerusalem (ירושלים של מטה) was believed to be paralleled by the Jerusalem above (ירושלים של מעלה), which had been prepared before the creation of the world (Apoc. Baruch, iv. 3). The same idea is found in the Apocrypha (II Esdras vii. 26; viii. 52, 53; x. 44–59) and in the New Testament (ἡ ἄνω Ἰερουσαλήμ, Gal. iv. 26; Heb. xii. 22; Rev. iii. 12, xxi. 10; see Weber, "Lehren des Talmuds," p. 356; Charles, "Apoc. of Baruch," p. 6, note 3; and Jew. Encyc. v. 215).

The Rabbis count seventy different names for Jerusalem in the Bible (Midr. ha-Gadol, ed. Schechter, p. 678; "Agadat Shir ha-Shirim," l. 125, and Schechter's note in his ed. p. 50, Cambridge, 1896; see also Ta'an. v.; Midr. ha-Ne'elam, in Zohar Ḥadash, section "Noaḥ"). They are of course extravagant in their praise of the city: "Whoever has not seen Jerusalem in its glory has never seen a delightful city" (Suk. 51a; Midr. Teh. on Ps. xlviii.): "Ten measures of beauty descended upon the world: Jerusalem took nine, and the rest of the world one" (Ḳid. 49b; Esther R. i.); "There is no beauty like that of Jerusalem" (Ab. R. N. § 28); "No serpent or scorpion ever did harm in Jerusalem" (Ab. v. 48); "nor was there ever a destructive fire or ruin in Jerusalem" (Ab. R. N. xxxv.).

Synagogues and Schools.

Of the city itself the following data may be mentioned: There were 480 synagogues (Lam. R., Preface, 12) and 80 schools (Num. R. xviii.), among them the bet ha-midrash of Johanan b. Zakkai, all of which were destroyed by Vespasian. Each bet ha-midrash contained an elementary and a high school (Pesiḳ., ed. Buber, p. 121b, and note). Mention is made of a synagogue of the טרסיים (Naz. 52a), which was sold to Rabbi Eliezer b. Zadok (Meg. 26b). This may refer to a synagogue of the Jews of Tarsus, though Tosef., Meg. iii. 6 reads: "Synagogue of the Alexandrians." In Midr. Tadshe xxii. (Epstein, "Beiträge," p. xliv.) occurs the following: "Jerusalem originally was made up of two cities: the upper one, which fell to Judah's lot; and the second, to that of Benjamin. Upon Joshua's death, the Judahites took their portion, fired the city, and made it waste. The lower city remained until the time of David, who commenced to rebuild the upper one and to surround both with a wall. In the upper one was the threshing-floor of Araunah; in the lower one (Mt. Moriah) the Temple was situated." Ten peculiarities are mentioned in connection with Jerusalem: its houses could not have balconies or extensions; neither ash-pits nor potters' ovens were allowed, nor gardens, other than those of roses; chickens were not to be raised; a corpse was not to remain over night; a house might not be irredeemably sold; the ceremony of the "beheaded heifer" was not performed to atone an unknown murder committed in Jerusalem or its neighborhood (Deut. xxi. 1–8); it could not be declared "a city led astray" (Deut. xiii., xiv.); nor could any house in it be made unclean by reason of a plague (see Lev. xiv. 34 *et seq.*; see also B. Ḳ. 82 and parallels). There were twenty-four squares in Jerusalem, each having twenty-four porticoes (Lam. R. 1). The following market-places are mentioned: שוק של פטמין, for those that fattened animals: explained by some to be either a meat- or poultry-market or the market of the apothecaries (Yer. Soṭah viii. 3); it was closed on the Sabbath-day ('Er. x. 9); שוק של צמרים, that of the wool-dealers (*ib.* 101a); שוק העליון, where the non-Jewish washers dwelt (Sheḳ. viii. 1); and the דיר העצים (Tosef., 'Eduy. iii. 3), the wood-market, or, perhaps, a chamber in the Temple area where wood for the altar was kept (Zeb. 113a). There was also a large court, Bet Ya'zeḳ, in which the witnesses to the new moon collected (R. H. 23b); a Lishkat Ḥashsha'im (Sheḳ. v. 6), where the charitable made their contributions in secret and the poor received them also in secret; the Eben ha-Ṭo'im (or Ṭo'en), where found articles were brought and returned to their owners (B. M. 28b); the Shokat Yehu ("Water-channel of Jehu"), cut in the rocks (Miḳ. iv. 5; Yeb. 15a); the Kippah shel Ḥeshbonot, a vaulted place immediately outside of the city, in which business accounts were settled; it was placed there so that no one might sorrow in Jerusalem on account of a money loss (Ex. R. lii., end). Courts were built over the rocky ground; in the hollows below were born those children who were to assist the high priest in offering the red heifer (Num. xix. 2; Suk. 21a and parallels). Very peculiarly, Shiloh (Siloam) is said to have been in the middle of the city (Yer. Ḥag. 76a). The trees of Jerusalem were cinnamon-trees, and gave forth an odor over the whole land (Shab. 63a). All sorts of pictures ("parẓupot") except those of human figures were in Jerusalem (Tosef., 'Ab. Zarah, vi.). There were no graves there except those of the house of David and of Huldah the prophetess (Tosef., Neg. vi.).

Old Customs.

Certain customs peculiar to Jerusalem are mentioned in the rabbinical writings. A man invited to a meal turned up one of his sleeves as a sign of the receipt of the invitation (Lam. R. iv. 2); a flag ("mappah") was displayed at the door of a house where a feast was being held; after it had been taken away no one could enter (Tosef., Ber. iv. 8; comp. Yer. Demai iv. 4). Jerusalemites were accustomed to bind their lulabs with golden bands (Suk. 36b). Certain women habitually provided the narcotic which was given to a condemned man in order to blunt his sensibilities (Sanh. 43a; comp. Matt. xxvii. 48 and parallels). On the Fifteenth of Ab and on the Day of Atonement the maidens went abroad in borrowed white garments and danced in the vineyards, saying to the young men, "Lift up thy eyes and see whom thou wouldst choose" (Ta'an. 26b). In writing deeds in Jerusalem it was customary to state not only the day but also the hour of execution (Ket. 94b). A man approaching the city recited, "Zion is a wilderness, Jerusalem a desolation" (Isa. lxiv. 10), and made a rent in his garment (M. Ḳ. 26 and parallels)—a custom observed to this day. As a congregation, the Jews of Jerusalem are called specifically קהלא קדישא דבירושלים (Ber. 9b) and עדה קדושה (Yer. Ma'as. Sh. ii. 10).

The Rabbis further held that the western wall, the Gate of the Priests, and the Huldah Gate were not and never will be destroyed (Cant. R. § 2), and that whether the Temple was standing or not the Shekinah was not removed from it; it still dwelt near the western wall (Tan., Shemot, x.; Cant. R. ii. 9). God will bring back all the former joy to Jerusalem; and every one that on earth bewails its destruction will in the future world rejoice at its restoration (Pes. 28 and parallels). It will not be rebuilt until all the Diaspora is gathered together (Tan., ed. Buber, Noaḥ, 17); then it will reach to the Gate of Damascus (Cant. R. § 7; Sifre ii. 1); and people will come borne on clouds (Pes. 1). God and His angels will be a wall around the city (Yalḳ., Zech. 569), which will be a "metropolis for all countries" (Cant. R. i., § 37); it is even said that all nations will be collected therein (Ab. R. N. xxxv., end), and that the city will then have a new name (Isa. lxii. 2; Pesiḳ. § Sosa Asis). The passages from the Talmudical writings will be found in Jehiel Ẓebi Hirschensohn, "Sheba' Ḥokmot sheba-Talmud," pp. 128 *et seq.*, Lemberg, 1883; Judah Idel Zisling, "Sefer Yalḳuṭ Ereẓ Yisrael," Wilna, 1890; David b. Simon, "Sha'ar ha-Ḥaẓer," Jerusalem, 1862; see also Farḥi, "Kaftor wa-Feraḥ," ed. Edelmann, p. 14a, and Neubauer, "G. T." pp. 134 *et seq.*

Under the Arabs.

After the conquest of Jerusalem by the Arabs the city soon took on a Mohammedan aspect. In 688 the calif 'Abd al-Malik built the Dome of the Rock; in 728 the cupola over the Aḳṣa mosque was erected, the same being restored in 758–775 by Al-Mahdi. In 831 Al-Ma'mun restored the Dome of the Rock and built the octagonal wall. In 1016 the Dome was partly destroyed by earthquakes; but it was repaired in 1022. The chief Arabic histories of Jerusalem are those by Al-Maḳdisi, "Mutir al-Ghanam" ("J. R. A. S." xix. 297); Al-Suyuṭi, "Itḥaf al-Aḥissa" (1470, p. 258); and Mujir al-Din al-'Ulaimi, "Ins al-Jalil" (1496), ed. Cairo, 1866 (partly translated in H. Sauvaire, "Histoire de Jerusalem," Paris, 1876). Mujir al-Din relates that when 'Abd al-Malik built the Dome, he employed ten Jewish families, who were freed from all taxes. They increased so quickly in number that they were removed by the calif Omar (*c.* 717). He relates further: "And among the servants of the sanctuary, too, was another company of Jews, who made the glass plates for the lamps and the glass lantern-bowls and glass vessels and rods. No poll-tax was demanded of them, nor from those that made wicks for the lamps." Another tradition, reported by a number of Arabic writers, says that the original position of the Temple was pointed out to Omar by the apostate Ka'b ("Z. D. P. V." xiii. 9 *et seq.*). This tradition is referred to also in an anonymous Hebrew letter ("Oẓar Ṭob," 79, 13) and by Isaac Ḥelo (1333), who says that the place was pointed out by an old Jew to the Mohammedan conqueror on condition that he preserve the western wall (Carmoly, "Itinéraires de la Terre Sainte," p. 237). Bar Hebræus ("Chronicum Syriacum," p. 108) asserts that it was specially stipulated between Omar and Sophronius, the patriarch of Jerusalem, that the Jews should not live in the city—a statement which can not be verified.

The geographer Al-Muḳaddasi, writing in 985, does not speak highly of Jerusalem; he complains that the Christians and the Jews "have the upper hand" (ed. De Goeje, p. 167). He adds that in Palestine and Syria most of the minters, dyers, tanners, and money-changers were Jews (*ib.* p. 183). The later complaints about the burdensomeness of the taxes were evidently not unwarranted; for, according to Al-Muḳaddasi, the tax on Palestine was 259,000 dinars (*ib.* p. 189). The Persian traveler Nasir i-Khusrau (1047) says that both Christians and Jews came up to Jerusalem to visit the church and the synagogue there (Guy le Strange, "Palestine under the Moslems," p. 88). According to the Ahimaaz Chronicle (Neubauer, "M. J. C." ii. 128, 25), Paltiel, the vizier of Al-Mu'izz in the second half of the tenth century, presented, among other gifts, 1,000 dinars to the אבילי בית העולמים (*l.c.* 128, 25), otherwise called the אבילי ציון (*ib.* 130, 13). These are the usual designations for the Karaites in Jerusalem ("R. E. J." xxxii. 149; "Monatsschrift," xl. 535).

The Karaite Sahl b. Maẓliaḥ of the eleventh century gives a picture of the Jerusalem of his day. There were very few Jews there to bewail her fate, and Sahl begs his fellow Jews wherever they may be to return to the city. He speaks of the wailing women who lamented the city's state in Hebrew, Persian, and Arabic; especially on the Mount of Olives in the months of Tammuz and Ab. Zion, he says, is in the hands of Esau; Jerusalem, in the hands of the Arabs (Harkavy, "Meassef Niddaḥim," No. 13, in "Ha-Meliẓ," 1879, No. 31, p. 639, and in

Berliner's "Magazin," 1878, p. 181). There seems to be some support even for the view that there were German Jews in Jerusalem at this time. The story is told, on the authority of Elijah Ba'al Shem of Chelm, that a young man named Dolberger was saved by a Jew in Palestine who knew German, and that out of gratitude one of his family who was among the Crusaders saved some of the Jews in Palestine and carried them to Worms ("Seder ha-Dorot," ed. 1878, p. 252). In the second half of the eleventh century halakic questions were sent from Germany to Jerusalem (Epstein, in "Monatsschrift," xlvii. 344).

During the Crusades.

It is said that Harun al-Rashid sent the keys of Jerusalem to Charlemagne, and that under Harun various Christian buildings were erected. In 969 Mu'izz al-Din of Egypt took the city; and under Ḥakim (1010) certain buildings were destroyed, which were restored in 1048 by the patriarch Nicephorus. In 1077 the Seljuk Turks, under Isar al-Atsis, drove the Egyptian garrison out of Jerusalem, and 3,000 of the inhabitants of the city were slain. During the First Crusade (1098) the Turks were expelled by Egyptians after a siege lasting forty days. The walls were rebuilt, and the city was taken by the Crusaders July 15, 1099. The latter built extensively and repaired the walls in 1177. The Franks were defeated in Jerusalem in 1187 by Saladin, who is said to have invited the Jews to return to Palestine. The Ḥaram area was reconverted into a mosque, the Dome rebuilt, and in 1192 the city walls were repaired. There are very few notices of the Jews in the city during all this time. Abraham b. Ḥiyya says that in his day (1136) it contained no Jew ("Monatsschrift," xlvii. 450). Yet there must have been some there, as the street in which they lived is called "Judairia" in Latin documents of the times ("Regesta Regni Hierosolymitani," ed. Röhricht, p. 109). A Petrus Judæus is mentioned as swearing allegiance to Baldwin III. on Feb. 11, 1056; and the same name occurs in a document of 1160 (*ib.* pp. 77, 78, 89, 95). That a yeshibah existed or was reinstituted during the first half of the tenth century is proved by the title "Rosh ha-Yeshibah" given to Ben Meïr, perhaps by Saadia himself (Schechter, "Saadyana," p. 18, lines 11, 17). He seems, also, to have had about him both a large and a small Sanhedrin ("R. E. J." xliv. 239; "Zeit. für Hebr. Bibl." vii. 147).

It was in the first half of the eleventh century that the attempt was made to revive the gaonate in Palestine. The yeshibah in Jerusalem is mentioned in the year 1031 (see also Schechter, "Saadyana," p. 18, l. 10 [comp. "J. Q. R." xv. 96]); and in 1046 Solomon b. Judah was at its head; but upon the coming of the Seljuks it was removed to Tyre (see Jew. Encyc. v. 572a, *s.v.* Gaon).

A letter from Jerusalem dated 1188 seems to relate to the dire straits of the Jews, perhaps after Saladin had recaptured the city, to which event a certain passage in the letter ("Oẓar Ṭob," p. 79, 12) may refer. It is partially an alphabetic acrostic, and was given to R. Jonah b. Judah the Sephardi, who was sent out to collect money. He mentions the yeshibah, which at his time had practically ceased to exist. The Jews, though very few in number, were bound to pay the same tax which was originally laid upon them (see Berliner's "Magazin," iii. 217, iv. 233; "Oẓar Ṭob," p. 77). A fragmentary letter, referring probably to the same time, is published in Luncz, *l.c.* v. 67. A letter of 1137 mentions not only the assembling of the Jews in their synagogue ("Midrash Me'aṭ"), but also their gathering together with Jews from other places on the Mount of Olives on the festivals of Sukkot and Hosha'na Rabbah, a custom otherwise attested (see Schechter, *l.c.* 22, 5; according to 21, 12, the dates of the festivals were promulgated on the Mount of Olives; "Sefer ha-Ḥasidim," p. 169, § 630; "R. E. J." xlii. 181; Luncz, *l.c.* i. 65). Abraham ibn Daud (Neubauer, "M. J. C." i. 79, 7) also mentions the custom, but adds that the "Minim" (Karaites) were in tents opposite the other Jews.

Medieval Jewish Visitors.

About the year 1140, Judah ha-Levi visited Jerusalem and was inspired, as legend says, to compose his "Zionide" before its walls. In 1173 Benjamin of Tudela visited Jerusalem. He describes it as a small city full of Jacobites, Armenians, Greeks, and Georgians. Two hundred Jews dwelt in a corner of the city under the Tower of David. He mentions especially the two buildings of the Hospitalers and of the Templars; the four gates of Abraham (Khalil), David, Zion, and "Gushpat" (Jehoshaphat); the Gate of Mercy; the house and stable of Solomon; the Pillar of Absalom; and the grave of Uzziah. In front of Jerusalem is Mt. Zion, upon which there is only a Christian church, and where are the graves of the princes of the house of David ("P. E. F. S." 1894, p. 294). It is curious that Pethahiah of Regensburg (p. 11) mentions only one Jew in Jerusalem, a certain R. Abraham the dyer, who had to pay a heavy tax for permission to remain (ed. Benisch, p. 60). Pethahiah recalls (p. 64) the tradition connected with the Gate of Mercy; namely, that it could not be opened until the Shekinah returned to the gate by means of which it had left the city. Though often spoken of as one, this was really two gates in the eastern wall of the Temple enclosure (now called the "Golden Gate")—the Gate of Repentance and the Gate of Mercy, the first of which was for happy people, the second for the unhappy (see "Oẓar Ṭob," p. 35; Carmoly, *l.c.* pp. 237, 239, 458; Gurland, "Ginze Yisrael," pp. 13, 39, 49; "Shibḥe Yerush." p. 19b; Luncz, *l.c.* v. 242; "Luaḥ Ereẓ Yisrael," vii. 95, 106; ix. 8). The later Arabs had the same designations for these gates ("Z. D. P. V." vii. 163; Guy le Strange, *l.c.* pp. 161, 177, 184), and many tales are told in Jewish writings of the futile attempts of the Arabs to open them (see, *e.g.*, Gurland, *l.c.* p. 39; "Sammelband," Meḳiẓe Nirdamim, 1888, pp. 27, 47; Obadiah of Bertinoro, ed. Neubauer, p. 65; and Jehudah, in Luncz, *l.c.* v. 240 *et seq.*). Reference to a gate separating the blessed from the damned is made in the Koran, sura lvii. 13.

In 1210 a certain Samuel b. Simon made a pilgrimage to Palestine as the forerunner (Berliner's "Magazin," iii. 158) of the 300 and more rabbis from the south of England and from France who went to the Holy Land in 1211 ("Shebeṭ Yehudah," p. 113). His account has been published in "Oẓar Ṭob," p. 35;

transl. in Carmoly, *l.c.* p. 127. He mentions the custom of praying on Sabbaths on the Mount of Olives. In 1218 Al-Ḥarizi visited Jerusalem and saw the English and French rabbis mentioned above. Among them were Samuel b. Simon, Joseph b. Baruch, his brother R. Meïr, and Samson b. Abraham. According to Grätz ("Gesch." vi. 404), this migration was the consequence of the Albigensian persecutions. Al-Ḥarizi speaks of the Jews coming to Jerusalem in large numbers; but he bewails the spirit of discord he found there (see "Taḥkemoni," ch. xxvii., xxviii., xlvi., and xlvii.; and M. Schwab in "Archives de l'Orient Latin," 1881, pp. 231 *et seq.*). In 1219 the walls of the city were taken down by order of the Sultan of Damascus; in 1229 by treaty with Egypt Jerusalem came into the hands of Frederick II. of Germany. In 1239 he began to rebuild the walls; but they were again demolished by Da'ud, the emir of Kerak.

In 1243 Jerusalem came again into the power of the Christians, and the walls were repaired. The Kharezmian Tatars took the city in 1244; and they in turn were driven out by the Egyptians in 1247. In 1260 the Tatars under Hulaku Khan overran the whole land, and the Jews that were in Jerusalem had to flee to the neighboring villages.

On Aug. 12, 1267, Naḥmanides visited Jerusalem. He found there only two Jews, brothers, who were dyers, and who on Sabbath and at festivals gathered Jews from the neighboring villages (see his letter to his son in "Sha'ar ha-Gemul"). He reorganized the community, and on New-Year's Day, 1268, service was held in a new synagogue, later called חורבת רבינו יהודה החסיד, in a court to the right of the present synagogue. It was near the Zion Gate, which led down to the traditional graves of the kings of Judah ("Yiḥus ha-Abot," in Carmoly, *l.c.* p. 440), and seems to have been called "Midrash ha-Ramban" (Conforte, "Ḳore ha-Dorot," p. 19a).

Naḥmanides in Jerusalem.

Palestine at this time was under Egyptian rule. This rule was clement and the congregation grew. Naḥmanides also founded a yeshibah and planted in Jerusalem the study of the Cabala. Pupils came to him from all parts of the Diaspora, among the most famous being the commentator and lexicographer R. Tanḥum, who may, however, have been there even before Naḥmanides, as he was perhaps an eye-witness of the Tatar raids (see Bacher, "Aus dem Wörterbuch des Tanḥum," 1903, p. 11). Naḥmanides died in 1270, and the yeshibah lost its attraction.

In the year 1322 Estori Farḥi was in Jerusalem; and his "Kaftor wa-Feraḥ" (ch. vi.) gives an archeological description of the city (Eng. transl. in "Itinerary" of Benjamin of Tudela, ii. 393; German, in Zunz, "G. S." ii. 268). According to Farḥi, Jerusalem was three parasangs long. He mentions the entrance to the Cave of Hezekiah (B. Ḳ. 16b), within the walls of Jerusalem to the north; the tent erected by David for the Ark, which was supposed to be still in a place called "David's Temple," south of Mt. Moriah (comp. "Yiḥus ha-Abot," p. 25); northwest of this was a place near which were a synagogue and the Jewish quarter (see David b. Zimrah, Responsa, No. 633). The city of Jerusalem is, according to him, higher than Mt. Moriah, and of course higher than the above-mentioned synagogue. A further description of the city is obtained from a letter written by Isaac Ḥelo of Aragon in the year 1333 (Luncz, *l.c.* v. 55). He describes the community as a large one, most of its members having come from France (probably referring to the rabbis mentioned above); they lived at peace and in seeming tranquillity. Many were dyers, clothiers, and shoemakers; others were engaged in commerce and shopkeeping. A few were busy with medicine, astronomy, and mathematics; but most of them were students of the Law and were nourished by the community. It was an old institution that the Talmudic scholars should be exempt from all taxes except the poll-tax. This was reenforced by Isaac Cohen Sholal, and is mentioned in 1535 by Moses de Rossi ("J. Q. R." ix. 498, 23). Isaac Ḥelo describes four gates of the city: Ha-Raḥamim to the east, leading to the Mount of Olives, where the Jewish cemetery is; David's Gate, leading to the Valley of Rephaim on the west; the Gate of Abraham to the north, leading to the tombs of the kings and to the cavern of Ben Sira, the grandson of Jeremiah; and the Zion Gate to the south, leading to Mt. Zion, the Hinnom Valley, and Siloah. He places David's fortress upon Mt. Zion, but the Temple upon Mt. Moriah. He enumerates seven remarkable things in Jerusalem: the Tower of David, where the Jews used to live, but which at his time was only a fortification; the Palace of Solomon, in Christian times a hospital, but at his time a market-place; the tomb of Huldah on the Mount of Olives; the sepulchers of the kings of Judah, the exact location of which was unknown to him; the tombs of the kings; the Palace of Helena, used in his day by the Mohammedan officials; the Gate ha-Raḥamim and the western wall of the Temple.

The number of Ashkenazim in Jerusalem grew rapidly, and a certain Isaac ha-Levi (Asir ha-Tiḳwah) founded a yeshibah for them. R. Samuel Schlettstadt had come from Strasburg (*c.* 1390), but had returned after a short while. Though the Sephardim formed a separate congregation, all the Jews worshiped in one synagogue. In 1434 the plague broke out in the city and ninety Jews perished.

Ashkenazim and Sephardim.

A short while after this the Italian Talmudist, Elijah of Ferrara, came to Jerusalem; and in 1437 he was chosen chief rabbi and head of the bet ha-midrash, his decisions having validity in Syria on the one hand and in Egypt on the other. He seems also to have been a physician (for his letters see Jew. Encyc. v. 131, *s.v.*). He relates that the Jewish women manufactured silk, which the men then sold.

If Isaac Ẓarfati's letter (Jellinek, "Ḳonṭres Tatnu," p. 14) belongs to this period (end of the fifteenth century; Grätz, "Gesch." viii. 446), it would seem that the report had been spread in Germany that the Jews had bought Mt. Zion, had destroyed the buildings upon it, and had also bought the Holy Sepulcher. For this reason Jews were not allowed on Venetian ships, but had to travel to Jerusalem by the land route (mentioned also by Obadiah of Bertinoro, ed. Neubauer, p. 68). Probably in connection with a similar rumor, the Jews of Calabria were mulcted in a large sum, owing to the vexations caused by Jerusalem Jews to the Minorite convent on Mount Zion (Jorga, "Notes . . . pour l'Histoire des Croisades," ii. 255, Paris, 1899). The conditions in Jerusalem grew so bad that within six years more than 100 families left the city, among them that of R. Nathan Cohen Sholal. A contributing cause was another famine which in 1441 came upon the city. In addition to this, the Mameluke sultan Ḳa'it Bey (*c.* 1450) demanded of the Jews 400 ducats a year, besides the 50 ducats which they had to pay to the city authorities for the privilege of making wine. For the collection of this sum, a sort of "vice-nagid" was established in Jerusalem, who together with five others was responsible for the tax. The consequent hardship was so great that the community was forced to sell its books, the holy ornaments, and even the scrolls of the Law (see the letter of the Jerusalem congregation, dated 1456, in "Sammelband," Meḳiẓe Nirdamim, 1888, p. 46). The attitude of the Sephardim toward the Ashkenazim in this matter was not calculated to increase the good-will between the communities, the latter feeling that they were being made the scapegoat (see the complaint of Israel Isserlein in "Pesaḳim," No. 88; Grätz, "Gesch." viii. 294). It was at this time that the well-known "taḳḳanah" was laid down "that if a man die without issue his property (with the exception of real estate) shall go to the community unless he shall have made an arrangement with the leaders during his lifetime." As many old people came to Jerusalem, this brought in a considerable sum of money (Moses Ḥagiz in his "Sefat Emet" says that in his time it was as much as 2,000 francs a year); but it also led to abuses, as the old people were not properly cared for. The decree therefore created much discussion and opposition, and had to be renewed every ten or twenty years. In 1720 it was enforced by a haskamah from the rabbis in Constantinople (Luncz, *l.c.* v. 121).

Meshullam of Volterra.

In 1481 Meshullam of Volterra visited the city (see his letter in Luncz, *l.c.* i. 202). He found there 10,000 Mohammedan and about 250 Jewish families (Brüll's "Jahrb." vii. 123). The Gate ha-Raḥamim, he says, is 4 cubits above the earth and 2 cubits below; and he solemnly records that on every Ninth of Ab, when the Jews go to pray near where the Temple was situated, the lights go out of their own accord. Of the twelve gates in the Temple area, five were closed: the two Ha-Raḥamim mentioned above and three others which had been built up by the Moslems, but the traces of which could still be seen. He speaks of the buildings in Jerusalem as large and beautiful; and it is interesting to note that he gives the name "Mt. Zion" to the hill on which the Temple stood (pp. 202, 207). He mentions as parnas R. Joseph de Montaña Ashkenazi, and as vice-parnas R. Jacob b. Moses. The chief rabbi was R. Shalom Ashkenazi. It seems probable that the custom of regularly sending out "sheliḥim" commenced at this time. The first of them seems to have been R. Moses Twenty-four (עשרים וארבע). The two letters of Obadiah of Bertinoro, dated respectively 1488 and 1489 (ed. Neubauer, Leipsic, 1863), give an interesting picture of the Jerusalem Jews at this time. Among the 4,000 inhabitants he found seventy Jewish families, all in poor circumstances, and in the ratio of seven women to one man. The community was in debt to the extent of 1,000 gold pieces. Even the ornaments on the scrolls of the Law had been sold. Jews lived not only in the Jews' street, but also on Zion. He was especially interested in the Ashkenazic Jews, to whom all the houses around the synagogue belonged.

Effect of Expulsion from Spain.

The expulsion of the Jews from Spain and Portugal in 1492 sent large numbers of Jews to the East. In a few years 130 families were added to those already in Jerusalem, and the community numbered 1,500 souls. The anonymous writer who came to Bertinoro in Jerusalem in 1495 (Neubauer, "Zwei Briefe Obadjahs," pp. 80 *et seq.*) could hardly find a dwelling-place in the city. With the exception of the goldsmiths, it was difficult for workmen to make a living. The Jews had to pay a poll-tax of 1½ ducats. Near the Jews' quarter there was a gate of which they had the key. The houses were made of stone and brick, no wood being used; they contained five or six rooms each. He mentions the Midrash of King Solomon (*i.e.*, the Aḳṣa Mosque), near the synagogue, and states that the Jews were not allowed to enter it. This midrash is also mentioned by Isaac b. Meïr Laṭif (see his letter in "Oẓar Ṭob," p. 33). He says that Jerusalem was twice the size of Ancona, and that it took him six hours to make the tour of the city. He found the Jews living on good terms with the Moslems, which had not always been the case, at least as regards the Ulemas. A significant example of their fanaticism is given in connection with the synagogue of Naḥmanides. It is said that a woman out of spite had sold a piece of property near the synagogue to the Mohammedans, who had built there a mosque and who desired to make a street leading directly to it. The Moslems wished to buy a courtyard for this purpose, but the Jews refused to sell. The rain had washed away part of the wall and disclosed a door in this courtyard west of the mosque. The matter was carried before the sultan in Egypt. It was held that the synagogue was a new one and that therefore, according to the Pact of Omar, it had no right to exist. It was closed for a time, and though the Jews paid a large sum of money, it was pulled down by the fanatical religious leaders. The case was again brought before the sultan; the ringleaders were punished; and the synagogue was eventually rebuilt (1478; see the account by Mujir al Din in Luncz, *l.c.* iii. 72; Grätz, "Gesch." viii. 295; Obadiah of Bertinoro, p. 60; Kolon, Responsa, No. 5; Schwarz, "Tebu'ot ha-Areẓ," ed. Luncz, 1900, p. 465).

The exiles from Spain commenced to form a new congregation ('Adat Sefardim), which caused the Ashkenazim to form one also; the North Africans instituted a third ('Adat ha-Ma'arabim); and the old inhabitants were thus left to themselves ('Adat ha-Moriskos or Musta'ribim). These communities, however, still seem to have used one and the same synagogue. In course of time the Arabic-speaking Jews drew together again and joined the Sephardim, the result being the establishment of two main classes, the Ashkenazim and the Sephardim. The first set of taḳḳanot for the community seems to have been laid down by the nagid of Egypt, Isaac Cohen Sholal, in 1509, and accepted by the Jerusalem yeshibah. In 1517 a further series of taḳḳanot was drawn up, approved by the nagid, engraved on a plate, and affixed to the wall of the synagogue.

Taḳḳanot.

In the same year the Ottoman Turks captured Syria. Salim I. abolished the office of nagid in Egypt; and Sholal came to Jerusalem. The latter did much good in the city, spending his own money and founding two new yeshibot, so that many scholars flocked thither from other parts of Palestine. He also laid down some further taḳḳanot; namely, that a Jew should not cite a fellow Jew before a Mohammedan court, unless he had previously cited him three times before a bet din; that no unseemly drinking should take place at the tomb of Samuel the prophet; and that disputes should not be held in the synagogue. He seems to have commenced to regulate the ḥaluḳḳah and to have instituted vigils ("mishmarot"), for which in 1521 he drew up special rules. It is said that on the first day of these vigils there was a heavy rainfall, and lightning damaged the dome of the Great Mosque (see letter of the Jerusalem rabbis, published by Neubauer in "Ha-Lebanon," 1868, v. 26).

In 1527 Sulaiman I. began to rebuild the walls of Jerusalem. He also improved the water-supply, bringing water from a distance into three basins near the Ḥaram area. The Tower of David was also restored, the walls being finished in 1542. Sulaiman gave the Jews permission to do whatever work they wished, and the Jewish accounts take cognizance of his action; *e.g.*, the author of the "Yiḥus ha-Abot" (ed. Hottinger, 1659; ed. Baruch, Leghorn, 1785; transl. Carmoly, *l.c.* p. 453), who in 1522 came to Jerusalem from Venice. He relates that there were four covered market-places: one for Mohammedans selling wool and flax; a second for Jews selling spices; a third for the sale of vegetables; and a fourth for the sale of fruit. The most beautiful street was that leading from a gate in the Temple area. He himself lived "in the house of Pilate." He refers to the twelve gates of the Ḥaram area, ten of which, he says, were open; and seven gates of the city, of which he mentions only Bab al-Ṣabṭ, Bab al-'Amud, and Bab al-Kuṭṭan, and three gates on the side of Zion. He gives a description of the Naḥmanides Synagogue with its beautiful marble columns. The only window was in the door on the west side, so that lights had to be used even during the daytime. There were 300 Jewish families in the city, among which were more than 500 widows. In addition to Isaac Sholal, he mentions R. David ibn Shoshan, the physician, as head of the Sephardic yeshibah, and a R. Israel as head of the Ashkenazic yeshibah. In 1523 David Reubeni was in Jerusalem for five weeks. He affirms (Neubauer, "M. J. C." ii. 145) that the Moslems showed him the cave below the rock in the Great Mosque. He speaks of two hills; one being Zion, where David was buried, and the other, Jerusalem. The same year a severe drought afflicted the city so that many fled; among them the nagid, who died in 1525. He was followed as head of the community by Levi ibn Ḥabib, who was active in promoting harmony among the various Jewish parties in the city. A certain disturbance was wrought in 1529 by the coming of Solomon Molko. Many people commenced to fast, awaiting the end of time. His influence, however, was effectually nullified by Ibn Ḥabib. In 1538 Jacob Berab attempted to reestablish the old practise of ordination ("semikah") in Palestine; and although Ibn Ḥabib himself was one of those ordained by him, he resented the ordination, and Berab was obliged to fly to Egypt.

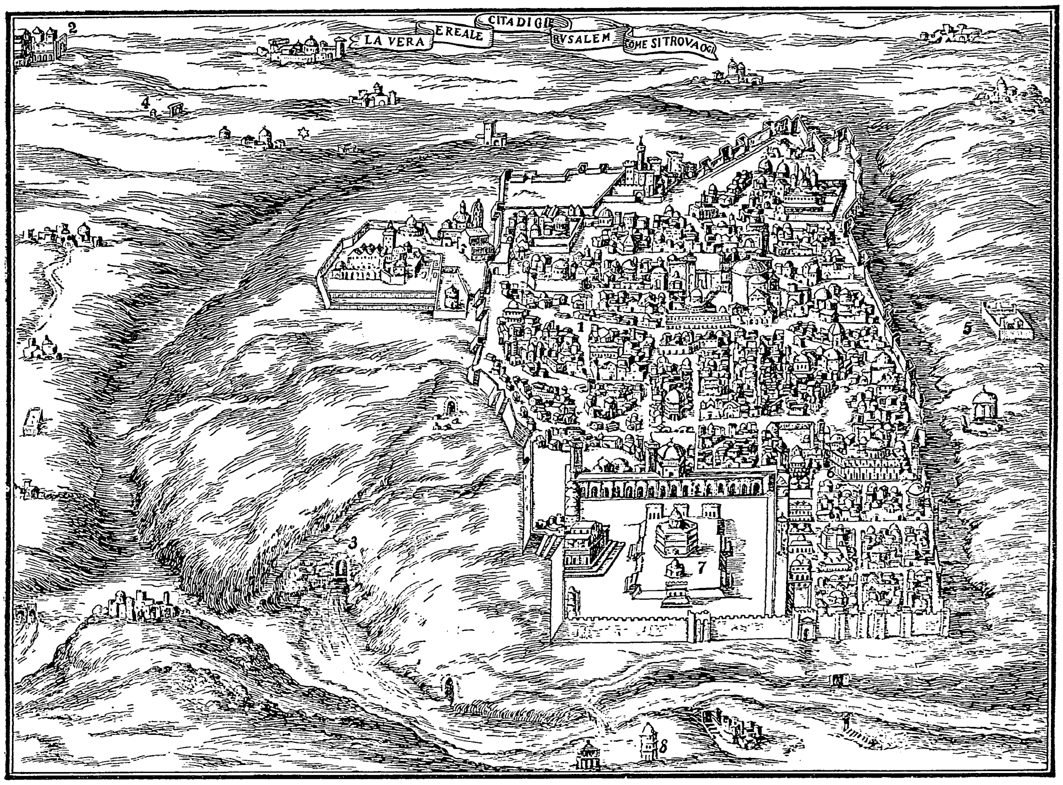
Jacob Berab and Ibn Ḥabib.

The inhabitants, especially the scholars, had largely increased in number; and though the former were well-to-do because of the many merchants that came from Italy, the scholars languished. Debts were contracted; and some of the houses used for charitable purposes had to be sold. This is especially dwelt on in two letters written by a certain R. Israel to Abraham of Perugia ("Sammelband," Meḳiẓe Nirdamim, 1888, p. 26). In his day there were two yeshibot, one of David Shoshan; but the scholars had to leave and seek sustenance elsewhere. Only goldsmiths, silversmiths, weavers, and shoemakers could make a living (*ib.* pp. 25, 26); the rest of the Jews hawked their wares in the neighboring villages. Most of the learned men were Sephardim; but two German scholars had recently arrived (*ib.* p. 30, below). Attempts had been made at various times to force the scholars to contribute to taxes other than the poll-tax. In order to prevent this, a taḳḳanah had been laid down in 1509 by the Bene ha-Yeshibah (20 in number); this was renewed toward the end of 1547 and again in 1566 (according to Avila) or 1596 (Steinschneider, "Hebr. Bibl." xvi. 58; "Centralanzeiger für Jüdische Literatur," i. 51).

Ibn Ḥabib died in 1553, and was succeeded by David ibn Abi Zimra. Even he was unable to lighten the burden of the taxes levied by the Turks; and with many others he left the city in 1567 and went to Safed. In addition to Ibn Ḥabib the following prominent men deserve mention: Menahem di Lonsano (1562), Moses Alshakar of Egypt, Aaron b. Ḥayyim, Simon ha-Levi Innsburg of Frankfort, and Moses Najjarah of Damascus. In 1586 trouble was occasioned by the Moslems: the mufti declared that the synagogue of Naḥmanides had previously been a mosque; and it had to be vacated. The Sephardim then built a synagogue, now the K. K. Talmud Torah; the Ashkenazim, one near the closed synagogue, supposed to be the present Menaḥem Ẓiyyon. In 1587 additional taḳḳanot were issued, and after seven months had to be reaffirmed. In 1594 and 1599 the community was further depleted by plagues. In addition to the taḳḳanah of 1596, ḥerem was placed upon all those who should reveal the names of rich scholars to the authorities. Moses Alshech, rabbi in Safed, intervened and secured aid for the Jerusalem Jews from Venice and other places.

For a number of years no further complaints are met with; and in spite of the plague, which reappeared in 1618 (Azulai, "Ḥesed le-Abraham," Introduction), the Jews prospered. In 1621 Isaiah Horowitz (Sheloh) went to Jerusalem as head of the

Ashkenazim, who had become very important in the community. Through him assistance came to Jerusalem from the Jews of Prague; but five years later he and others were obliged to flee to Safed on account of the extortions of the pasha. In 1623 an attempt was made to separate the Sephardic from the Ashkenazic ḥaluḳḳah; but it was vetoed by the authorities, who reissued the taḳḳanah referring to it (Luncz, "Jerusalem," ii. 147). In 1625 Mohammed ibn Farukh became governor of Jerusalem; and he oppressed the people with such onerous taxes that they fled to the rocks and caverns around the city and had hardly sufficient clothing to cover themselves. His brother-in-law Ottoman Agha took Ibn Farukh's place for a short time while the latter went on a pilgrimage. It was Ottoman who imprisoned Horowitz, Isaac Habillo, Moses Cordovero, and others (Luncz, *l.c.* iii. 38), and demanded heavy ransoms. Ibn Farukh returned and did worse than before. Complaint was made to the authorities in Damascus; and a cadi was sent to watch Ibn Farukh. Even this resulted in no change. Some of the leaders were tortured, *e.g.*, Samuel Tardiulah, Moses Romano, and especially Abraham Ustiral, brother of Isaac Aboab, who had laid the complaint before the vali of Damascus. The cadi of Jerusalem joined in the oppression. He extorted money by threatening to turn one of the synagogues into a mill. In 1627 Ibn Farukh was deposed. He extorted in all 50,000 piasters from the Jews. An account of these persecutions, under the title "Ḥorbot Yerushalayim," was drawn up by the rabbis of Jerusalem, and sent to Venice (printed in 1636; see Steinschneider, "Cat. Bodl." No. 3547, who has given a German translation in Pascheles, "Sippurim," 1856, iv. 49). A special deputy was sent to Europe to collect funds in aid of the community, the Ashkenazic congregation having been practically broken up by the flight of Horowitz, and the few who were left having joined the Sephardim. A letter was also sent to the Jews of Persia (Luncz, *l.c.* v. 262) complaining that only 144 Jews were to be allowed to reside in the city as poll-tax for only that number was being paid.



PLAN OF JERUSALEM, *Circa* 1600.

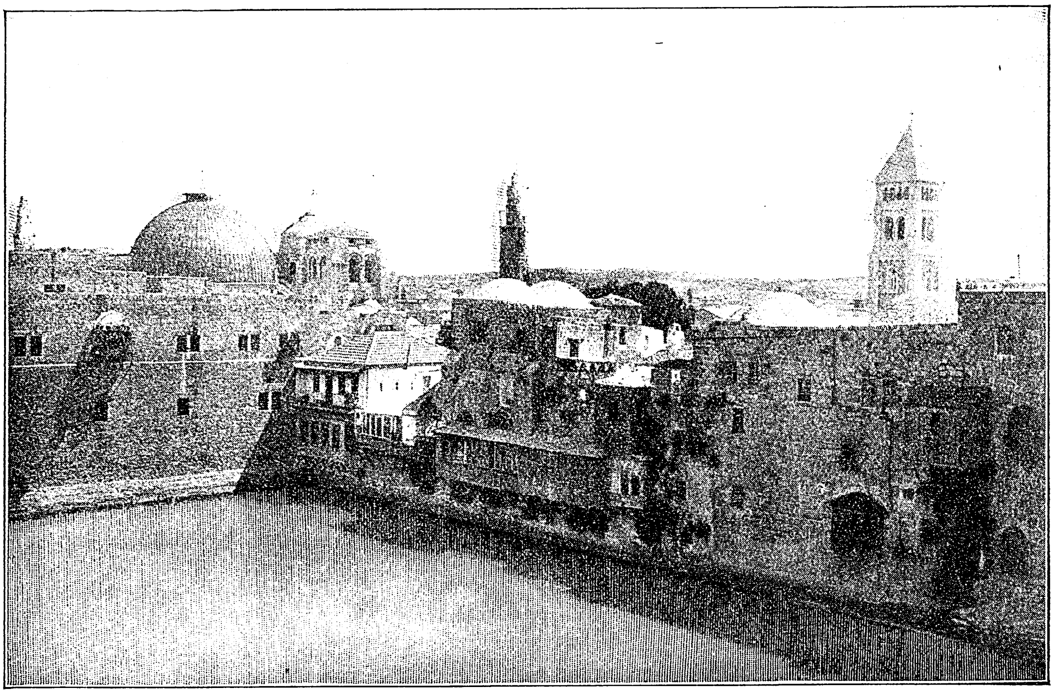
1. Jewish Quarter. 2. Bethlehem. 3. Pool of Siloam. 4. Tomb of Rachel. 5. Tomb of the Kings. 6. Palace of Herod. 7. Mosque of Omar. 8. Tomb of Absalom.

(From Bernandino Amico, "Trattato della Terra Santa," Florence, 1620.)

A letter written about this time by an unknown traveler from Carpi to his son (*ib.* v. 74) has been preserved. He found in Jerusalem many members of well-known Italian families, *e.g.*, Moses Finzi, David Moscato, Mattathias Rieti, and Benjamin b. Moses of Orbino. The Jews were compelled to wear the same clothing as the Turks, except that they wore a bonnet resembling a "cappello." The community was deep in debt. Several times it had had to pay a sum of 6,000 piasters. There were two synagogues: a small one for the Ashkenazim, at whose head was Horowitz; another, a large one, for the Sephardim, near to which was a bet ha-midrash. There was also a small Karaite synagogue, the congregation of which numbered 20. He estimated the Jewish population at 2,000 souls. The city had eight gates, the walls having been built 100 years before his time. He describes at length the city and its monuments, especially the western wall where the Jews were allowed to congregate in times of peace. He speaks of the prayers prepared for the visits to this wall—an early reference, since the present prayers were arranged only at the beginning of the nineteenth century, by R. Samuel (author of "Minḥat Shemuel") under the title "Sha'are Dim'ah."

Solomon al-Gazi's Description.

In 1635 Solomon al-Gazi came to Jerusalem from Smyrna. He was the progenitor of a large and important family. Of the scholars of that time may be mentioned Samuel Garmizon, Moses Galante, and Jacob Ḥagiz. A special bet ha-midrash had been founded for Ḥagiz by the Vega brothers of Leghorn; and among his pupils may be mentioned Moses ibn Ḥabib and Joseph Almosnino. In 1641 Samuel b. David, the Karaite, visited Jerusalem (Gurland, *l.c.* pp. 12 *et seq.*). He gives an account of the Karaite synagogue, founded, he says, by Anan, which was built so low down that it had to be reached by twenty steps; he also states that there were fifteen houses provided for the poor, in which twenty-seven persons (families?) were maintained. He mentions six gates of the city, and a hill near the Mount of Olives, where Abraham had caused his attendants to wait, and where the Jews were accustomed to pray. In 1654 another Karaite, Moses b. Elijah ha-Levi (Gurland, *l.c.* p. 36), visited the city. He describes the same synagogue as very beautiful, and has much to say of the wonderful cave under the sanctuary, mentioned above in connection with David Reubeni. In 1645 the chief rabbi of Jerusalem was Jacob Ḥayyim Ẓemaḥ, a physician from Portugal. The important rabbis of the time were Nathan Spira of Cracow, Uri Shraga Phoebus, and Meïr Poppers. In 1650 appeared the "Darke Ẓiyyon" of Moses b. Israel Naphtali Porges (Moses Präger; transl. by Steinschneider in "Z. D. P. V." iii. 225). At the gate of Jerusalem Moses had to pay a tax of 2 löwenthaler (60 paras; see Gurland, *l.c.* p. 12). He mentions the synagogue in the court of the Temple, which was closed to the public after the evening prayer, and the two yeshibot. The poll-tax amounted to 3 löwenthaler for each householder. The community, he found, had been in great want, especially since the Chmielnicki disasters in Poland, from which country much money had usually come. Near the Jewish burial-ground were two holes in the earth popularly supposed to lead to Gehenna (see Steinschneider, "Hebr. Bibl." 1864, p. 105).

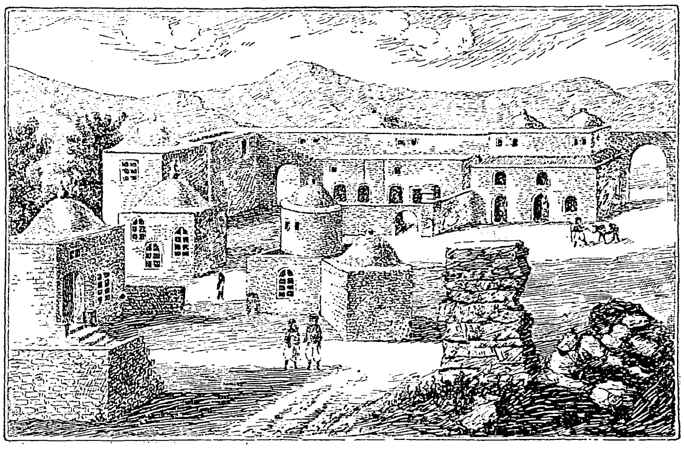


Pool of Hezekiah, Jerusalem.
(From a photograph by the American Colony, Jerusalem.)

In 1665 the chief rabbi was Moses Galante, and among his associates were Abraham Ẓemaḥ, Joseph Ḥagiz, and Aaron Padro (Pardo ?). Shabbethai Ẓebi, though in Palestine at this time, does not seem to have visited Jerusalem. Galante was followed by Moses ibn Ḥabib in 1689; while the head of the Ashkenazim was Moses ha-Kohen. In 1690 a large number of Ḥasidim, at whose head was R. Judah he-Ḥasid of Shidliz near Grodno, came to Jerusalem and took up their abode in Dair Siknaji, which on that account was afterward called "Ḥurbat Rabbi Judah he-Ḥasid." Judah, however, died three days after their arrival. They were so poor that, in order to meet the exactions of the authorities, they had to hypothecate all their buildings, and Moses ha-Kohen, head of the Ashkenazim, went, together with Isaac of Slutsk, to Europe to gather money in their behalf. Frankfort-on-the-Main alone sent 128,000 piasters (25,600 gulden), and Metz 5,000 gulden. Especially helpful were Samson Wertheimer and his son Wolf of Vienna, who not only sent large sums, but through court influence exercised through the Austrian representative at Constantinople tried to prevent the Jews in Jerusalem from falling still further into debt (see Kaufmann in "R. E. J." xxi. 140, and in "Jerusalem," iv. 25 *et seq.*). In 1695 Moses Ḥayyun was chief rabbi. Among other prominent rabbis were Samuel Tanuji and Moses Ḥagiz, while the head of the Ashkenazim was Nathan Naṭa of Mannheim. In 1715 the chief rabbi was Abraham Yiẓḥaḳi, whose successor for two years was Benjamin ha-Kohen Ma'ali.

In the Eighteenth Century.

In 1716 appeared the "Sha'alu Shelom Yerushalayim" of Gedaliah of Semiecz (transl. by Steinschneider in "Z. D. P. V." iii. 226). Gedaliah had come with Judah he-Ḥasid. He describes the synagogue built by the Ḥasidim in a courtyard in which were forty houses. When a new pasha came, the Jews paid him 500 löwenthaler for three years, and an extra bakshish whenever any additional building was to be erected. To meet these requirements, money had to be borrowed from the Turks at 10 per cent. The Jews were forbidden to sell wine or other liquor to the Turks. Few of them had shops; and they were in general very poor. In 1703 the people of the city had revolted against the pasha and had shut the gates of the city upon him. His successor was allowed to enter only for the purpose of receiving the taxes; but in 1705–6 he put down the rebellion, and demanded much money from the richer Jews. Another pasha forbade the Jews to wear white garments on Sabbath or iron in the soles of their shoes. Their turbans were to be large and black; and on the street Jews were always to pass on the left of Moslems. In 1721 the Moslems fell upon the synagogue of the Ashkenazim; burned all the woodwork and the books; took the Jews prisoners; and occupied all the dwelling-places in Dair Siknaji.



The Ashkenazic Synagogue, Jerusalem.

(From Schwarz, "Descriptive History of Palestine," 1850.)

In 1730 the chief rabbi was Eleazar b. Jacob Nahum, and his associates were Isaac Zarḥi, Israel Mizraḥi, and Menahem Ḥabib. In 1738 Emanuel Ḥai Ricci came to Jerusalem, and in 1742 Ḥayyim ibn 'Aṭṭar, who became president of one of the yeshibot. In 1745 Nissim Ḥayyim Moses Mizraḥi was chief rabbi. He was followed by Israel Jacob al-Gazi, and in 1754 by Isaac ha-Kohen of the Rapoport family in Lublin. Prominent in Isaac's day were Ḥayyim Joseph Azulai, Jonah Nabon, and Joseph b. Aaron Ḥason. Isaac was followed in 1762 by Raphael Meyuḥas Bekor Samuel, and in 1786 by Yom-Ṭob al-Gazi, in whose day there lived the noted cabalist Shalom Mizraḥi (called שרעבי) of Yemen.

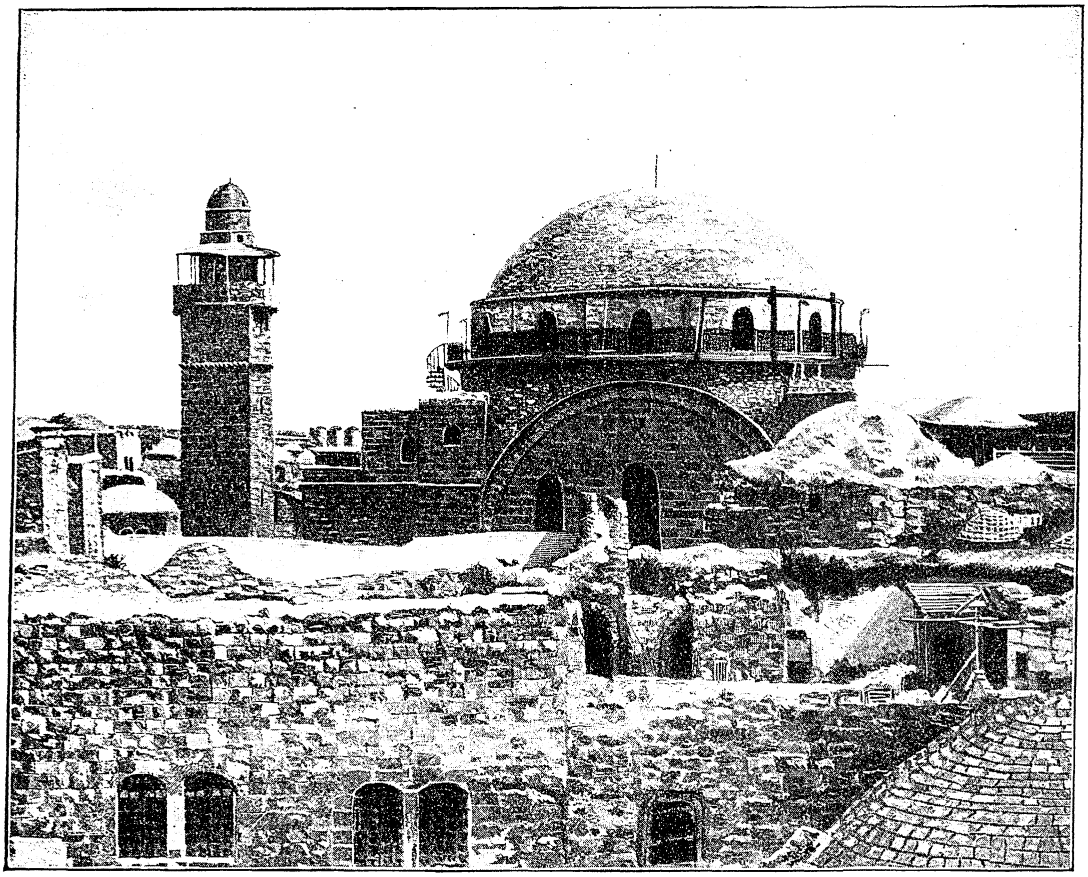
Taxation and Income.

There is a short account of Jerusalem during this period in Moses Ḥagiz's "Parashat Ele Massa'ai" (cited in "Ḥibbat Yerushalayim," pp. 37a *et seq.*). The taxes were paid from the sum gathered by the congregation from those who had died in Jerusalem, which produced an income of 3,000 piasters. There were then about 9,000 Mohammedans and Christians in the city, and 1,000 Jews, most of whom were Sephardim. In 1758 there were eight Sephardic yeshibot, each with a definite income: (1) that of R. Jacob Ferrara of Holland (1,200 pi. a year); (2) Newe Shalom, founded by R. Isaac Dimayo of Constantinople (700 pi.); (3) Pe'er 'Anawim, founded by the Franco family of Leghorn (600 pi.); (4) Ḥesed le-Abraham (1,000 pi.); (5) Damesek Eliezer, founded by Eliezer Ashkenazi (450 pi.); (6) Keneset Yisrael, founded by Ḥayyim ibn 'Aṭṭar (600 pi.); (7) that of Mordecai Taluk of the Maghreb (400 pi.); and (8) that of Abraham Meyuḥas (1,000 pi.). In addition, there were a cabalistic yeshibah, Bet-el, founded by R. Shalom, and three private yeshibot. There were only a few Ashkenazim at this time; and these had no separate congregation (see letter of the rabbis of Constantinople in "Jerusalem," v. 45).

In 1782 some trouble arose in regard to the burial-ground on the Mount of Olives, the site of which the Mohammedans wished to use. They were bought off with a large sum of money ("Jerusalem," vi. 43). In 1785 Benjamin b. Elijah, the Karaite, visited Jerusalem (Gurland, *l.c.* p. 48). He mentions six gates: the Western, David, Hebron, Damascus, Pillar, and Lion. He speaks of two burial-places: a new one under the wall near the Midrash of Solomon, and the old one separated from this by a valley.

When Napoleon came to Palestine in 1798, the Jews were accused of assisting him, and were threatened with death by the Moslems. Led by Mordecai al-Gazi they assembled at the Wailing-Wall for prayer. Napoleon, however, did not come near the city. The condition of the Jews at this time was so bad that the chief rabbi, Yom-Ṭob al-Gazi, went to Europe in their behalf, returning in 1801. He was followed in office by Mordecai Joseph Meyuḥas (1802), who was succeeded by Jacob Moses 'Ayish of the Maghreb (1806). In his day lived Zechariah Zamiro and Solomon Isaac Meyuḥas. On account of the plague in Safed a number of Jews came thence to Jerusalem, at times clothing themselves as Sephardim in order to escape the hatred of the Mohammedans. Two of them, R. Menahem Mendel and R. Abraham Solomon Zalman, founded the 'Adat Ashkenazim Perushim, consisting of about twenty persons. They had a private synagogue in the house which had been the yeshibah of Ḥayyim ibn 'Aṭṭar, where they worshiped on weekdays. On other days they prayed in the synagogue of the Sephardim, whose cemetery also they used. By the year 1817 they had a yeshibah of their own (see letter in "Jerusalem," v. 112); but they were in continual dread that the taxes left unpaid by former Ashkenazim would be demanded of them, and an attempt was made in 1816 to settle the matter in Constantinople. The chief rabbi of the community in 1807 was Jacob Ḳoral; in 1813, Joseph b. Ḥayyim Ḥazzan of Smyrna; and in 1822, Yom-Ṭob Danon. The position was vacant for a year, when it was filled by Moses Sozin, and in 1826 by Moses Jonah Nabon. In 1825 Syria and Palestine revolted against Turkish rule, and in 1832 the country was taken by Mohammed Ali of Egypt. In 1840 Jerusalem was restored to the Turks. During this time a number of Ashkenazim had come from Russia. Great distress prevailed among the learned men; messengers were sent out to all parts of Europe and to the United States; and the Ḥalukkah was organized. In 1827 Moses Montefiore visited Jerusalem for the first time. Occasional aid came through the European powers; *e.g.*, in 1829, through an Austrian representative, Prokesch Osten, who had been sent from Vienna to look after the Austrian subjects.

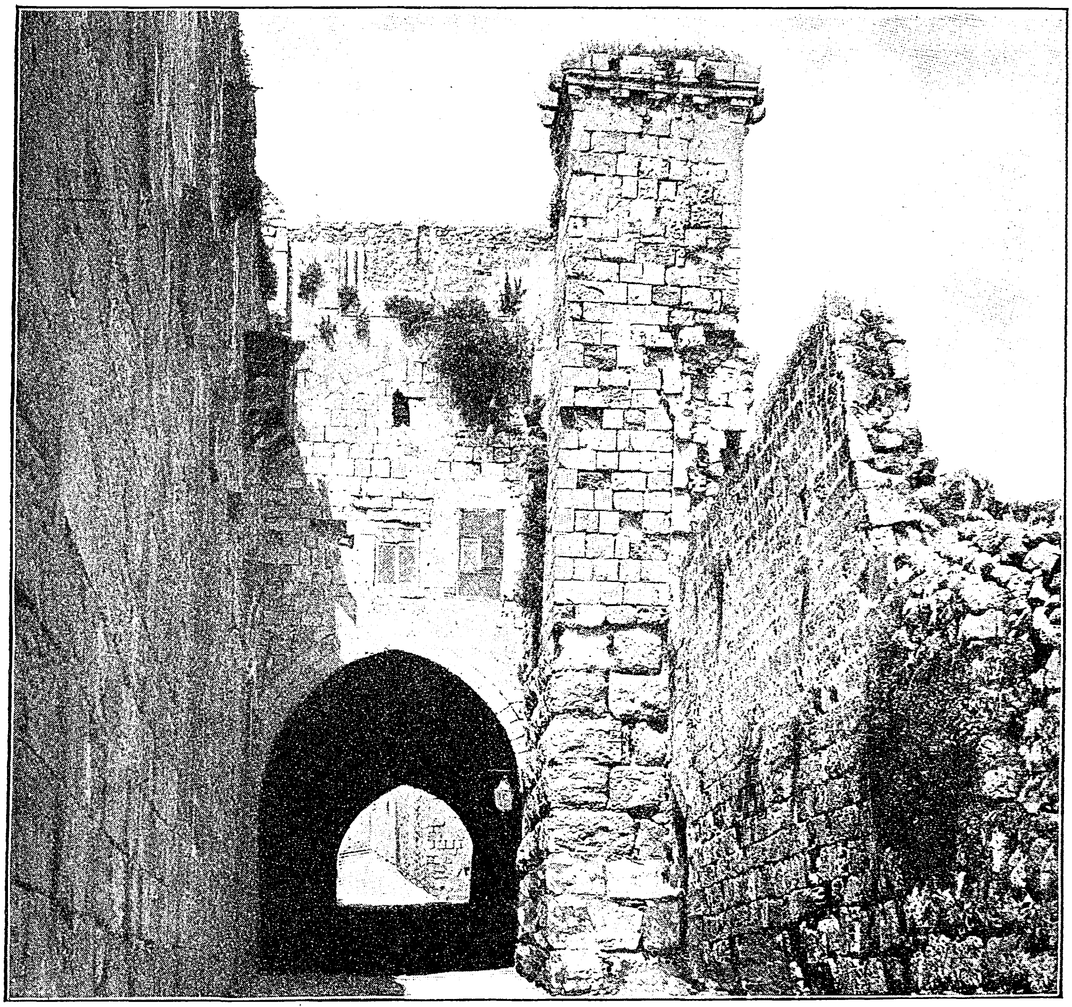
In the Nineteenth Century.



THE GREAT ASHKENAZIC SYNAGOGUE AT JERUSALEM.
(From a photograph.)

Ashkenazim continued to come in large numbers, from Lithuania, White Russia, and other European countries; often whole families arrived, *e.g.*, Shemariah Luria with forty persons. Luria did much for the Ashkenazim; but after a short while he returned to Russia (1834). In order to establish a bet ha-midrash, Akiba Leeren of Amsterdam gave a certain sum of money to be used for this purpose by Rabbi Isaiah בארדאקי. This was called "Sukkat Shalom," or more popularly "Bet ha-Midrash of R. Isaiah." This produced a split in the Ashkenazic community; but after ten years the Ḥurbah was victorious. R. Abraham Solomon Ẓoref went to Egypt in order to obtain authority to rebuild the "Ḥurbat R. Yehudah he-Ḥasid." He was helped by the Russian and Austrian consuls, and received the necessary permission. The new bet ha-midrash, called "Menaḥem Ẓiyyon," or popularly "Bet ha-Midrash ha-Yashen," was inaugurated in 1837.

The same year there was a slight earthquake in Jerusalem, which, however, was very severely felt in Safed and Tiberias. This caused many families to remove from these places to Jerusalem, where the anniversary of the event is still observed. The plague appeared in Jerusalem in 1838 and 1839, as many as fifteen persons dying in one day. England was the first European power to send a consul to Jerusalem (1839); by the year 1844 Austria, Sardinia, Prussia, France, and Russia were similarly represented. The Damascus Affair of 1840, by bringing Crémieux, Albert Cohn, and Montefiore to Palestine, made the wretched condition of the Jerusalem Jews known to their brethren. The idea had arisen among the Ashkenazim and Sephardim of Jerusalem that it was necessary to induce the Jews to till the soil again. Montefiore took up this idea, and was assisted by R. Aryeh b. Jerahmeel, who had taken the place of Menahem Mendel (d. 1847) as head of the Ashkenazic Jews.



TOWER OF ANTONIA, JERUSALEM.
(From a photograph by Bonfils.)

Moses Nabon had been followed in 1841 as chief rabbi by Judah Bekor Raphael Nabon, and he in 1842 by Abraham Ḥayyim Gagin. He seems to have been the first who was called "Ḥakam Bashi." When he walked out a man holding a staff in his hand preceded him; and ten soldiers were allotted to him to keep order and to protect him. There

(From a photograph by Bonfils.)

Albert Cohn and Ludwig Frankl.

were at this time several assemblies: the general assembly (ועד הכללי) of eighty learned and lay members, under the presidency of the vice-ḥakam bashi; the spiritual assembly (ועד הרוחני) of seven learned men, elected by the general assembly; and the "material" assembly (ועד הגשמי) of eight members, also elected by the general assembly (see the firman, rules, and a list of the ḥakam bashis in "Jerusalem," v. 188 *et seq.*). In 1854 Albert Cohn was in Jerusalem as almoner for the Rothschilds and other rich Jews of Europe. He gave his attention especially to the efforts of the missionaries and to the Ḥaluḳḳah system. He founded a hospital, a society of manual workers, a girls' school, and a loan society. In 1856 Montefiore, who visited Jerusalem in 1827, 1839, 1840, 1855, 1866, and 1875, made it possible for 500 Jews to take up agriculture; he also laid the foundation for a hospital, and founded a girls' school, against which, however, a ḥerem was issued. The Sephardic congregation was now decreasing in numbers, and so poor that in 1854 it had to sell its bet ha-midrash; while in 1857 the Ashkenazim received permission to build a new synagogue (finished in 1864), which was called "Bet Ya'aḳob." Some statistics of the year 1856 are due to the visit of Ludwig August Frankl, who went from Vienna to Jerusalem to found the Frau Elise von Herz-Lämel School. A section of the community was violently opposed to this foundation, fearing that a modern school would be inimical to Orthodox observance. Placards were put on the houses, lamentations recited, and prayers offered up at the Wailing-Wall. Frankl, however, was successful, being assisted by the Austrian consul, Pizzamano, and by Kiamil, the pasha of Jerusalem. Of the 18,000 inhabitants of the city 5,137 were Jews; and of the latter 1,700 were under Austrian protection. Frankl gives the following details: Sephardim, 3,500; Ashkenazim Perushim, 770; Ḥasidim, 430; Austrians, 145; Warsawers, 145; Ḥabad, 90; Germans, 57; total, 5,137 (see "Monatsschrift," 1856, p. 330; in his "Nach Jerusalem," ii. 11, Leipsic, 1858, he gives the number of Jews as 5,700). The Sephardim were so well organized that at their head was a ḥakam bashi. For worldly affairs, the "ḥakamim" chose three "peḳidim," under whom there were three other chiefs. Three "mashgiḥim" (observers) examined the accounts of the leaders. The community had 36 yeshibot. The Perushim had no head in Jerusalem, the seat of authority being in Wilna. The Ḥasidim, mostly from Volhynia, had at their head Nissim Bak, who with the aid of Moses Montefiore (*l.c.* p. 22) was the first to establish a printing-press in the city. The Ḥabad were Ḥasidim who got their name from the initial letters of the words "Ḥokmah," "Binah," and "De'ah." The Warsawers were made up of Perushim and Ḥasidim. They had separated from the other Ashkenazim about the year 1850. The Germans, or as they called themselves "Anshe Hod" (*i.e.*, men of H[olland and] D[eutschland]), had separated a year later. Zion, the large synagogue of the Sephardim, was really made up of four synagogues, which together occupied considerable space. According to tradition it had been built 460 years before Frankl's time. The synagogue of the Ashkenazim (Ḥurbat R. Yehudah he-Ḥasid) was rebuilt about 1856, a man named Ezekiel of Bagdad contributing 100,000 piasters for the purpose ("Nach Jerusalem," p. 53). Frankl estimates the money sent every year in charitable gifts to Jerusalem at 800,000 piasters.

Further Benefactions.

In 1856 the Turkish authorities gave permission to all persons to visit the mosques; and this brought more Europeans, who commenced to build churches and hospices. The American Mission had been established in the city in 1821; the English, in 1826. In 1845 the seat of the Greek Orthodox Patriarch had been moved from Constantinople to Jerusalem; and in 1847 the Latin Patriarchate had been renewed. In 1849 the Jerusalem Literary and Scientific Society had been formed, out of which the Palestine Exploration Fund developed. The Jews also continued to increase in numbers. In 1854 the American Judah Touro gave $60,000 for the purpose of founding hospices for them; these were built on the road to Hebron, and were called בתי משכנות שאננים, or "Montefiore Homes," because the money was expended partly through that philanthropist and partly through the "North American Relief Society for the Indigent Jews of Jerusalem." In 1864 the Rothschilds of London established the Evelyn de Rothschild School for Girls.

In 1865 there was an epidemic of cholera, and many Jews were victims. The poverty in the city was very great; flagrant abuses of the Ḥalukkah system having ruined the Jewish banking business there, and the gifts of the charitable Europeans having been in the hands of the Kolel ("Ben Chananja," 1867, p. 45). In the same year the water-works were rebuilt, and water was brought to the city from 'En 'Eṭam and from the Pools of Solomon. In this year Montefiore made his fifth visit, and contributed £300 on condition that the water should be led into the Jewish quarter. A Jewish manual school was founded by Baron Franchetti of Turin. In 1867 Albert Cohn of Paris commenced the work later continued by the Paris Rothschilds and the Alliance Israélite Universelle, and laid the foundation for a Jewish library (*ib.* p. 174). A serious attempt was made to provide better dwellings for the Jews, who lived in miserable huts; this was largely due to the munificence of the brothers Hirsch in Halberstadt (*ib.* pp. 459, 659). In 1870 Prof. H. Grätz and M. Gottschalk Lewy of Berlin were in Jerusalem, and, seeing the sad plight of the orphans left by recent Jewish immigrants, founded the Verein zur Erziehung Jüdischer Waisen in Palästina, the seat of which was in Frankfort-on-the-Main. The work was taken up by M. Herzberg. Despite the strongest possible opposition, a certain R. Kuttner having put the ban on the learning of foreign languages, a school was established in which Arabic, Hebrew, German, French, and English were taught. The Württemberg Templars (a Christian sect) founded a colony in Jerusalem in 1873 and introduced the soap-manufacturing industry. In 1878 the hospital Misgab

JERUSALEM AS VIEWED FROM THE NORTH.

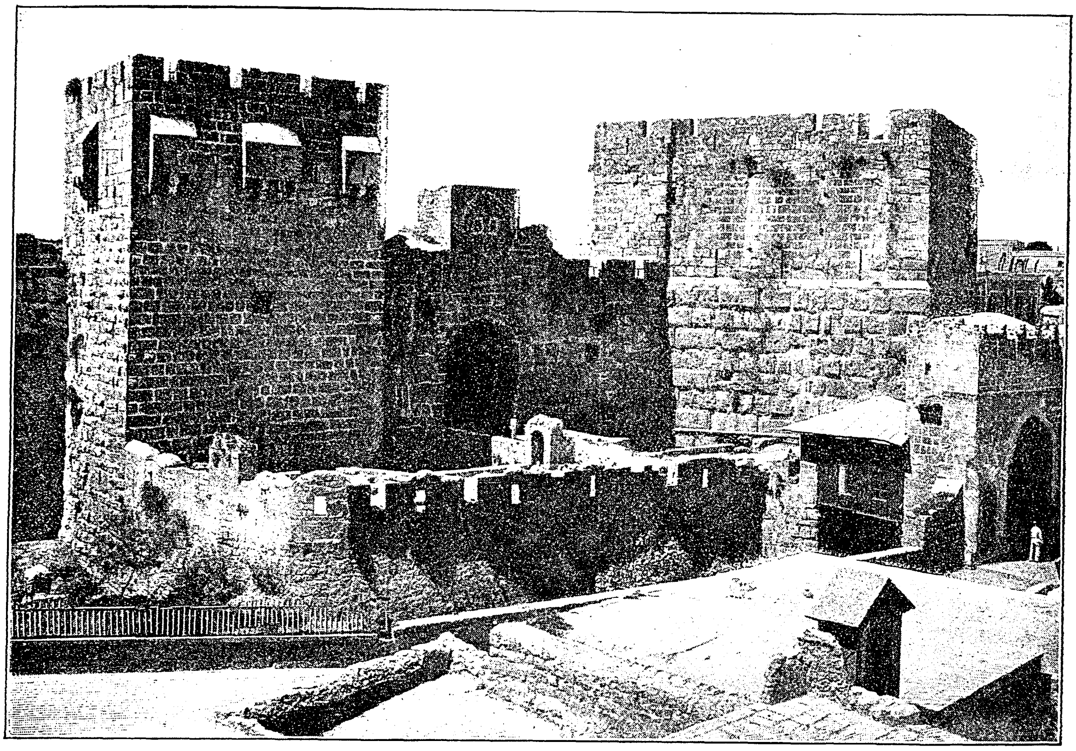
(From a photograph by the American Colony, Jerusalem.)

la-Dak was founded for the Jews, without distinction of party. In 1879 the English Mission Society founded, specifically for Jews, a hospital, a pilgrim-house, and schools at an expense of £10,000 a year, but the results of these missionary efforts were inconsiderable. In the same year the colony Petaḥ Tiḳwah was founded by Jerusalem Jews, as well as an orphan asylum for the Ashkenazim, together with a school which was afterward joined to the Lämel School. In 1881 the number of Jews had grown to 13,920; in 1891, to 25,322. In 1882 the London Society for the Assistance of Persecuted Jews, founded by the Earl of Shaftesbury, bought a piece of property called "Abraham's Vineyard," in which Jews were employed. The colony of Artuf was bought by Jews in 1896. The School for Boys (Bet Sefer), founded by the Alliance, dates from 1882. The British Ophthalmic Hospital was founded and is maintained by the Knights of St. John.

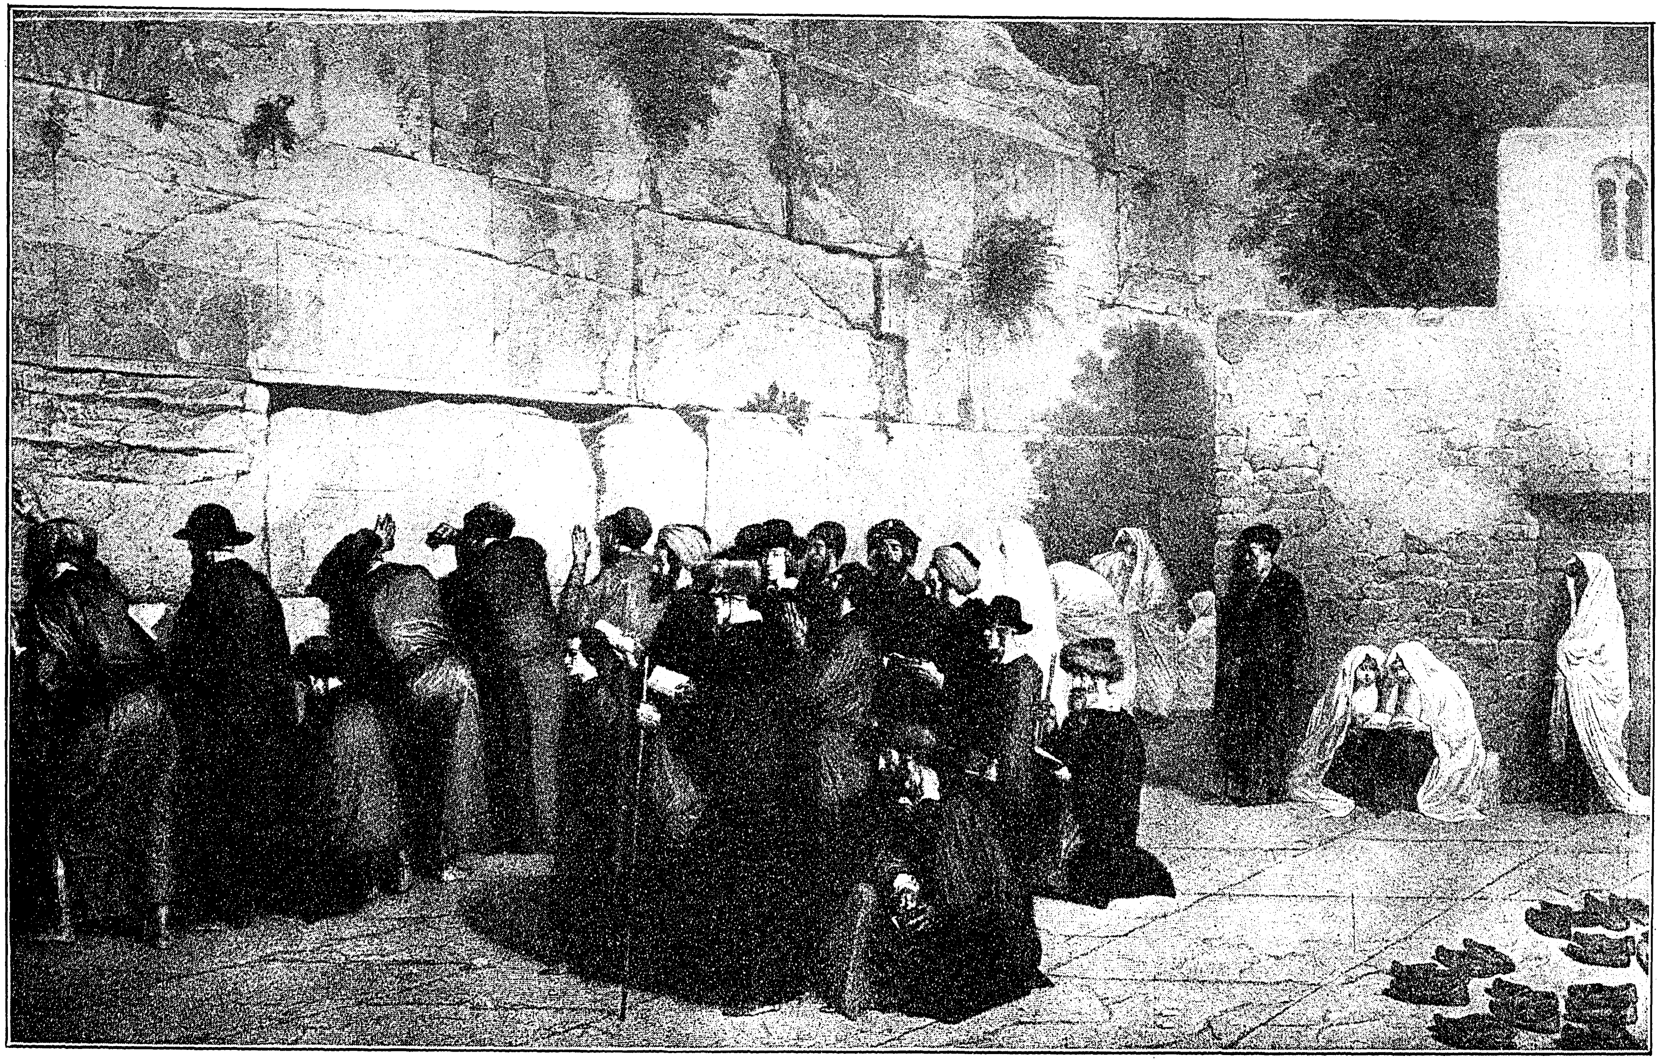
A change for the better came with the Russian Jews (1881–91), who brought with them more modern ideas of life. It was impossible to find room for all in the old Jewish quarter between the traditional Zion and the Temple mount. New portions were built up north and west of the city, especially by building societies such as Maḥaneh Yehudah, Sha'are Ẓedeḳ, and Oholeh Mosheh. In 1891 there were eighteen such societies, owning 400 houses in front of the Jaffa and Damascus gates, and 15 houses on the Mount of Olives. Other societies were founded to enable Jews to acquire landed property, *e.g.*, Elef She'arim, Naḥalat Ya'aḳob (1886), Ḥibbat ha-Areẓ, and Yishshub Ereẓ Yisrael (1896). These were aided by similar societies in Europe, among them the Lema'an Ẓiyyon, founded by Israel Hildesheimer in Berlin, the Moses Montefiore Testimonial Fund, and the Esra in Germany. In addition to the Jews, the Russians and the French Catholics have done a great deal to build up modern Jerusalem. The Russian buildings are nearly all in a walled quadrangle on the Jaffa road. They contain an insane asylum, mission- and pilgrim-houses, and a cathedral. On the Mount of Olives also the Russians have built a church and a hospice for pilgrims. A Mrs. Spofford, who claimed prophetic powers, came from America and formed a community in Jerusalem. A few years later 117 Swedish-Americans, mostly from Chicago, joined her. Visitors commenced to come in larger numbers with the opening on Sept. 26, 1892, of the narrow-gage railway from Jaffa, which was built by a French company. Bokharian Jews commenced to settle in the city in the year 1893.

Spread of Modern Jerusalem.

On Nov. 1, 1898, the German emperor William II. visited Jerusalem in state. One of the three arches built on the Jaffa road was erected by the Jews, a deputation of whom was received by the emperor. On the following day a deputation of Zionists, with Dr. Theodor Herzl at the head, had an audience. In connection with the emperor's visit,



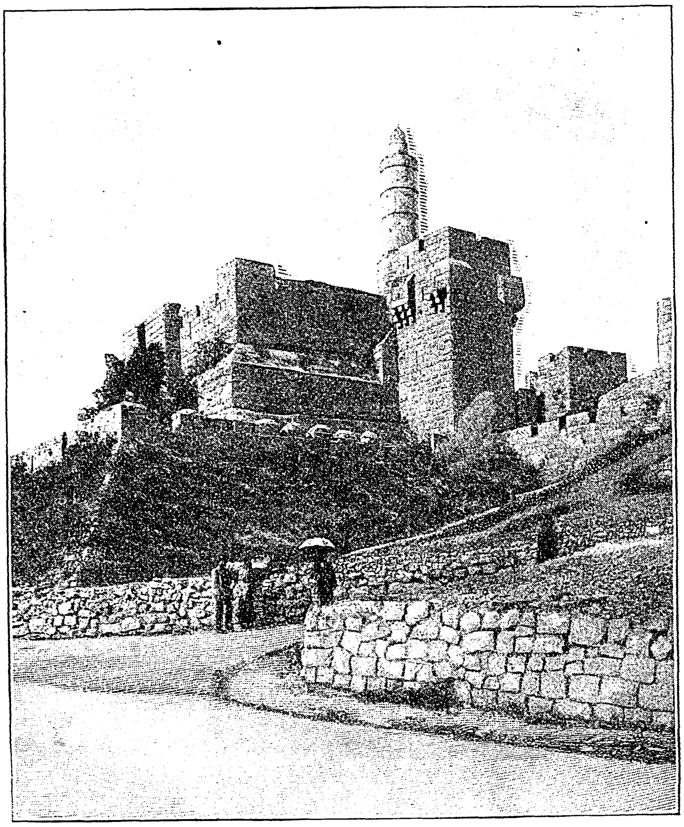
Towers of David and Hippicus, Jerusalem.
(From a photograph by Bonfils.)



THE WAILING-PLACE, JERUSALEM.
(After the painting by Bida.)

many of the old roads had been repaired and new ones built, especially up to the Mount of Olives; and a portion of the city wall to the right of the Jaffa Gate had been torn down to make the entry to the city commodious ("P. E. F. S." 1899, p. 117). In order to assist the German colonists, the Deutsche Palästina Bank was established. This was followed in 1903 by the Anglo-Palestine Co., founded by the Zionists in connection with the Jewish Colonial Trust.

For some hundreds of years a small community of Karaites existed in Jerusalem. According to their own tradition, in 1586 they numbered 200; but on account of the plague most of them wandered away. An anonymous Italian writer of the year 1625 (Luncz, *l.c.* v. 86) says that their number in his day was 20, most of whom were goldsmiths. About the year 1830 there were none to be found in the city; their dwellings had been appropriated by the other Jews; but the latter were forced by the Damascus Karaites to give them up again ("Jerusalem," vi. 239). Their synagogue, to which a number of steps led down, is still standing. The oldest gravestone dates from the year 1716. In 1856 they numbered 32 (Frankl, "Nach Jerusalem," ii. 63; and see Fürst, "Gesch. des Karäerthums," iii. 129 *et seq.*).



Citadel of Zion, Jerusalem.
(From a photograph by the American Colony, Jerusalem.)

Customs of Jerusalem Jews.

Peculiarities in the customs of the Jerusalem Jews are mentioned in various accounts; only a few can be cited here. It was the custom to put on ṭallit and tefillin during the afternoon; to recite seliḥot also in the afternoon; and on Simḥat Torah to deck the synagogues with hangings ("Z. D. P. V." iii. 225). Reference has already been made to the custom of reciting Isa. lxiv. 10 and of making a rent in one's garments when approaching the city (Shulḥan 'Aruk, Oraḥ Ḥayyim, 561). The Sephardim were accustomed to have two wives; Nathan Spira was the first German rabbi to follow this custom ("Gannat Weradim"; Shulḥan 'Aruk, Eben ha-'Ezer, 9). Only very small tombstones, with no inscriptions, are set over the graves, because they are apt to be stolen by the non-Israelites (Naphtali b. Jacob, "'Emeḳ ha-Melek," p. 14a). To-day the Jews are wont to throw rough bits of stone, on which are written names and prayers, into the Tombs of the Judges, the same as is done through holes in the walls of the Ḥaram of Hebron ("Jour. Bib. Lit." xxii. 172). For further peculiarities, see Luncz, *l.c.* v. 82; "Sammelband," Meḳiẓe Nirdamim, 1888, p. 26; Obadiah of Bertinoro, ed. Neubauer, p. 61. Joseph b. Mordecai ha-Kohen wrote a series of hymns to be sung in praise of Jerusalem ("Sha'ar Yerushalayim," Venice, 1707).

Archeological research in Jerusalem was really commenced in 1838 by the American Edward Robinson, who was followed by Count de Vogüé, Sir Charles Wilson (1864-67), and Lieutenant Warren (1867), the latter two working in the service of the Palestine Exploration Fund. Of recent years much has been done by Clermont-Ganneau, Baurath C. Schick, Frederick J. Bliss, and the Jesuit fathers. In 1900 the "American School of Oriental Research in Palestine" was founded by the Society of Biblical Literature in conjunction with the "Archeological Institute of America." On Nov. 15, 1903, the German Palestine Archeological Institute was opened at Jerusalem. The English Palestine Exploration Fund has a museum and library in the Bishop's Buildings near the Tombs of the Kings. The débris is sometimes 100 to 125 feet deep; and excavations usually uncover some antiquities. Among the more important may be mentioned Robinson's Arch on the western side of the Ḥaram, 39 ft. from the southwestern angle. Warren found the remains of the other end of the arch, which had a span of 42 ft., and which

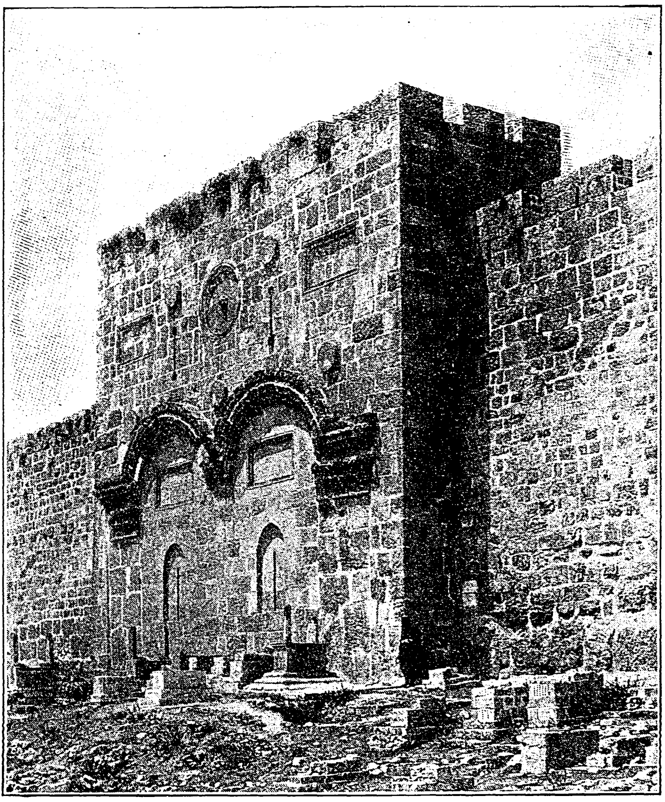
was probably part of an aqueduct carrying water to the Temple area. The remains called "Wilson's Arch" were found in front of the present Gate of the Chain. It also had a span of 42 ft. The southern wall of Jerusalem, partly laid bare in 1875 by Henry Maudslay, on the property of the English School, was accurately determined 1894–97 by F. J. Bliss.

Remains and Inscriptions.

In 1871 Clermont-Ganneau discovered a stone from Herod's Temple with an inscription in both Greek and Latin (comp. Acts xxi.). The Siloam inscription was found in 1880 by the Rev. Mr. Klein. An unfinished pillar, probably intended for the Herodian Temple, is still to be seen in the Russian quarter. A second pillar has been discovered 1¼ miles northwest of the Jaffa Gate ("P. E. F. S." 1899, p. 213). On a rock-cut wine- and olive-press found in "Abraham's Vineyard," northwest of Jerusalem, see *ib.* 1902, p. 398. A number of Hebrew gravestone inscriptions have been found, mostly in the outskirts of the city, and of a period not earlier than the Roman. These are mostly inscriptions upon ossuaries (see Chwolson, "C. I. H." p. 76; Lidzbarski, "Ephemeris für Sem. Epigr." i. 187, 312; "Repet. d'Epigr. Sém." i., Nos. 374, 382, 421, 422, 429–435). Special reference may be made to that of the Bene Ḥazir at the entrance to the so-called St. Jacob's grave (Chwolson, *l.c.* p. 64); the inscription in Syriac and Hebrew of Queen Helena in the Tombs of the Kings ("C. I. S." ii. 156); the inscription upon a lintel ("Repet. d'Epigr. Sém." *l.c.* No. 373); and that of a somewhat later date found below the Al-Aḳṣa Mosque (Chwolson, *l.c.* p. 96).



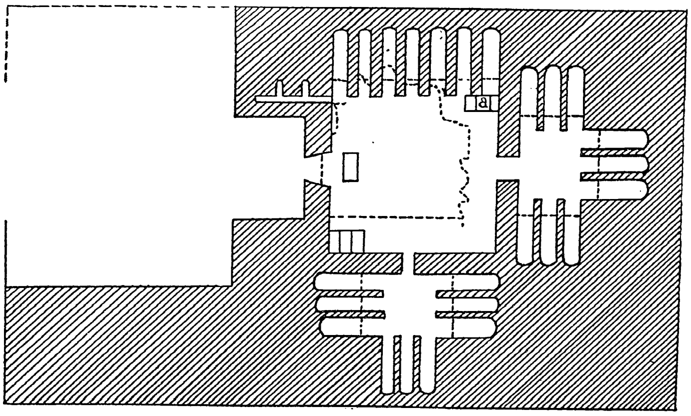
Exterior of the Golden Gate, Jerusalem.
(From a photograph by Bonfils.)

Reference must be made also to the large subterranean quarry called the "Quarry of Solomon" or "The Cotton Grotto," about 100 paces east of the Damascus Gate and 19 ft. below the wall. It is about 100 ft. long and 150 ft. deep. From this quarry was obtained much of the stone of which Jerusalem was built. The cavern is supposed to represent the "Royal Caverns" of Josephus ("B. J." iv. 2; see Cyrus Adler in "J. Q. R." viii. 384 *et seq.*). Remains of an aqueduct have been found which formed part of a remarkable system of water-works extending about 15 kilometers south of Jerusalem. The Arabs call it "Ḳanat al-Kuffar." It contains a peculiar siphon constructed partly, as the Roman inscriptions show, in 195 during the reign of Septimius Severus ("P. E. F. S." 1901, p. 118).

The valleys lying north and east of the city were from the earliest times used as burial-places. A number of the latter, hewn out of the rock, still exist; though the assumption of their use for the burial of judges and prophets is not founded on any real tradition. The Tombs of the Judges, north of Jerusalem, were called by the Jews the "Tombs of the Seventy" and were connected with the Sanhedrin (Carmoly, *l.c.* pp. 387, 430, 443). They have been accurately described by Robinson and Tobler. Formerly a court existed, which measured nearly 10m. × 9m. The tombs are made up of a series of rooms, the first being 6 m. square and 2.52 m. high. On the northern side there are two tiers of loculi ("kukim"), 2 m. long, 0.81 to 0.90 m. high, and 0.47 to 0.62 m. wide. Above these are three arched recesses each with two loculi. A door leads from this room to the second room, which contains 21 niches, and to a third, with 9 niches.

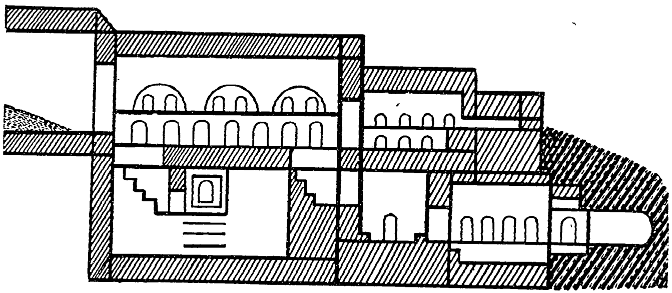
Tombs.

At the end of the series of rooms is a small chamber used for depositing bones removed from the ossuaries in order to secure space for other bodies. Another, similar tomb, south of the Tombs of the Judges, on the road to Nabi Samwil, was very finely conceived, but apparently was not finished (see Barton in "Jour. Bib. Lit." xxii. 164 *et seq.*). About 1,500 ft. northeast of the Tombs of the Judges another series of tombs was found; they have been described in the "Mittheilungen" of the German Palestine Assoc., 1898, p. 39; in the "Revue Biblique," 1899, p. 297; and in the "P. E. F. S." 1900, p. 54. They are like the Tombs of the Judges in their internal decoration and elaborate workmanship. They are said to date from the Hasmonean period, though their use by Christians at a later time is evidenced by the crosses scratched on the walls. The "Tombs of the Prophets" or the "Small Labyrinth" on the Mount of Olives is very extensive and very old. A few steps lead under a low arch into a rotunda, lighted from above. From this rotunda passageways radiate into rooms cut farther into the rocks, and these again are intersected by semicircular passages. In the wall of the outermost circular passage are 24 loculi (see "P. E. F. S." 1901, p. 309, and Baedeker, *l.c.* p. cxiii.). Other tombs are to be found on Mt. Scopus, close to the road leading to Anata ("P. E. F. S." 1900, p. 75), and a few of the Roman period opposite the southwestern corner of the city wall ("Z. D. P. V." xvi. 202).



Plan of the Tombs of the Judges, Upper Level.
(From the "Journal of Biblical Literature.")

A series of tombs somewhat differently arranged was found some years ago on the northern extremity of the Mount of Olives, now called "Karm al-Sayyid," but formerly "Viri Galilæi," because the Galileans who came to the festivals spread their tents here. The general plan is that of a road with rooms lying on either side; but there seems to be no definite architectural arrangement. The entrance was originally closed by a stone; and in many of the chambers the center was scooped out to catch the rain that ran down the walls. Though many of the rooms were used by Christians, the tombs are evidently of Jewish origin. The Jewish graves are farther apart from each other than the Christian ones. This series is supposed by Schick to be the "Peristereon" mentioned by Josephus ("B. J." v. 12, § 2). Roman bricks with the mark of the 10th Legion and Jewish coins have been found there ("Z. D. P. V." xii. 193). The oldest Jewish gravestones near and in Jerusalem date from about the year 1690 ("Jerusalem," v. 53). To be buried in Jerusalem was always considered a special favor; see the passages cited in "Yalḳut 'Ereẓ Yisrael," pp. 78 *et seq.* Among the prominent men supposed to be buried in and around the city may be mentioned: the prophets Haggai, Zechariah, and Malachi; Mordecai, Simon the Just, Johanan b. Zakkai, Naḥmanides, Obadiah of Bertinoro. See "Yuḥasin," p. 228b, ed. London; Conforte, "Ḳore," p. 19a; Carmoly, "Itinéraires," *passim*; the list in Pinner's Catal. p. 7 (Fragment, 1861 ?); and Basset, "Nédromah," pp. 158 *et seq.*, Paris, 1901.



Sectional View of the Tombs of the Judges.
(From the "Journal of Biblical Literature.")

The climate of Jerusalem has been carefully studied since 1883 by Dr. Thomas Chaplin. The mean annual temperature is 62.8°; maximum 112°; minimum 25°. See the résumé by Kersten in "Z. D. P. V." xiv. 93 *et seq.* The mean annual rainfall is 26.06 in.; see the result of observations made from 1861 to 1892 by James Glaisher in "P. E. F. S." 1894, p. 39.

The following chronological table gives a list of the more important incidents that had a direct or indirect bearing on the history of the Jews of Jerusalem:

B.C.
1500. Earliest historical mention of Jerusalem, found in the El-Amarna tablets.
1048. David takes possession of Jerusalem from the Jebusites, calling it "Ir Dawid."
1007. Solomon's Temple completed after seven years' labor.
972. Shishak of Egypt takes the city from Rehoboam.
713. Sennacherib advances toward Jerusalem.
700. Hezekiah perfects the water-supply.
586. (Ab 9.) Captured by Nebuzar-adan.
516. Rebuilt during reign of Darius.
350. Seized by the Persians.
332. Visited by Alexander the Great?
320 or 305. Seized by Ptolemy Soter.
170. Plundered by Antiochus Epiphanes.
165. (Kislew 25.) Judas Maccabeus recaptures Jerusalem and reconsecrates the Temple.
66. Pompey enters Jerusalem.
37. Besieged and taken by Herod the Great.
20. Restoration of the Temple begun by Herod the Great.
C.E.
29. (April.) Jesus of Nazareth executed at Jerusalem.
70. (Nisan 14.) Siege commenced by Vespasian, lasting 134 days.

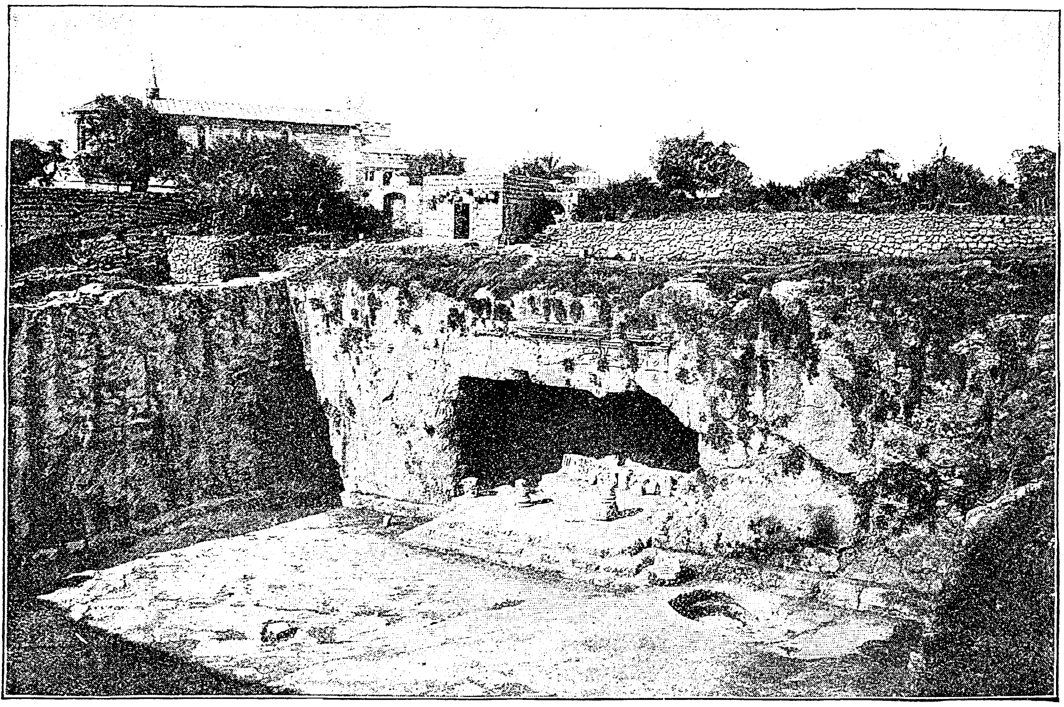
70. (Ab 9.) Jerusalem destroyed by Titus.
135. Hadrian rebuilds the city.
136. Jerusalem called Ælia Capitolina.
362. Restoration of the Temple undertaken by Julian the Apostate.
614. Jews aid the Persian Chosroes II. in attack on Jerusalem.
628. Retaken by Heraclius; Jews forbidden to enter the city.
637. Omar puts Jerusalem under Moslem power.
688. 'Abd al-Malik builds the Dome of the Rock.
1046. Solomon ben Judah head of the yeshibah at Jerusalem.
1077. Seljuk Turks capture Jerusalem.
1099. (July 15.) Crusaders put 70,000 infidels to the sword, and found a new Christian kingdom.
1100. "Assize of Jerusalem" established by Godfrey of Bouillon.
1140. Judah ha-Levi visits Jerusalem.
1173. Benjamin of Tudela visits Jerusalem.
1187. (Oct. 2.) Saladin defeats the Franks and takes Jerusalem.
1211. Several hundred English and French rabbis settle in Jerusalem.
1218. Al-Ḥarizi visits Jerusalem.
1267. (Aug. 12.) Naḥmanides visits Jerusalem.
1437. Elijah of Ferrara made chief rabbi.
1492. Jews expelled from Spain settle in Jerusalem.
1517. Capture by Ottoman Turks.
1580. Naḥmanides synagogue closed by the Moslems, claiming that it had previously been a mosque.
1621. Isaiah Horowitz and a number of his friends settle in Jerusalem.
1627. Ibn Farukh, governor of Jerusalem and persecutor of the Jews, deposed.
1705. Jews subjected to certain vexatious restrictions in matters of attire.
1798. Napoleon visits Palestine; Jewish community of Jerusalem accused of assisting him and its members threatened with death.
1827. First visit of Moses Montefiore.
1838. Edward Robinson commences archeological research in Jerusalem.
1840. Crémieux, Montefiore, and Albert Cohn visit Jerusalem.
1841. (Nov. 7.) S. M. S. Alexander, convert to Christianity, consecrated first Anglican Bishop of Jerusalem.
1854. Albert Cohn establishes many charitable institutions.
1862. (Sept. 5.) Treaty to preserve the Holy Sepulcher signed by Russia, France, and Turkey.
1880. Siloam Inscription discovered.
1892. (Sept. 13.) Railway from Jerusalem to Jaffa, built by a French company, opened.
1898. (Nov. 1.) William II. of Germany visits Jerusalem in state and receives a Jewish deputation.
1900. Abarbanel Library founded.



Grotto Leading to the Traditional Tombs of the Kings, near Jerusalem.

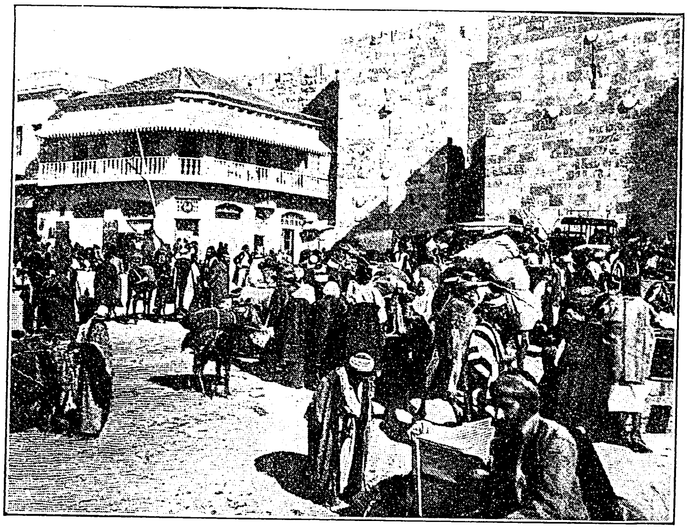
——**Modern:** The modern city of Jerusalem (Arabic, "Al-Ḳuds") practically covers the site of the ancient city. Excavations have shown, however, that the old city extended farther to the south; while to the north, and particularly to the west, the modern city far exceeds the ancient one, whole settlements lying beyond the walls of the medieval city. The western city wall coincides with the line of the original wall; the northern wall is held by some to be identical in its course with the ancient third wall, and by others with the second; and the eastern wall follows the course of the eastern Temple enclosure. The present wall, erected by the Osman sultan, Sulaiman the Magnificent, is thirty-eight and one-half feet high, and forms an irregular quadrangular enceinte two and one-half miles in extent. It is pierced by eight gates: Jaffa, Zion, Dung, St. Stephen's, Herod, Damascus, New, and Golden, the last-named being sealed. Parts of the old city wall are still in situ, especially on the southern and eastern sides, and much of the old material was used in the reconstruction, evidences of which are abundant. On the north an old moat, separating the Hill of Jeremiah from Bezetha, is used as part of the city's defenses.

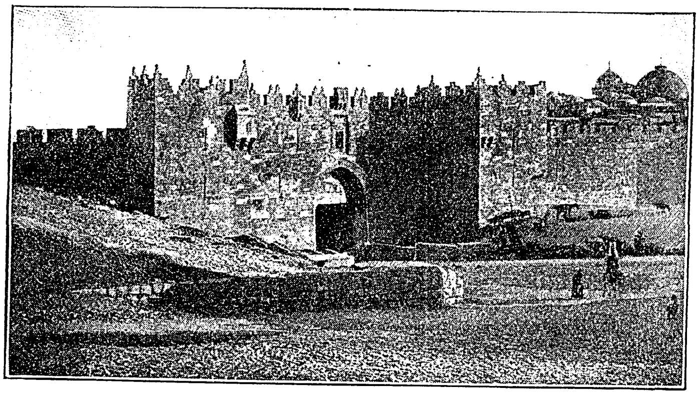


Square Outside the Jaffa Gate, Jerusalem.

(From a photograph by Dr. W. Popper.)

Divisions.

Within the walls the city is divided into four quarters: the Christian, the Moslem, the Jewish, and the Armenian. David street, running east and west from the Jaffa gate to the Temple place, and Damascus street, with its continuation, Bazaar street, which starts from the Damascus gate and runs north and south, form the boundary-lines for these quarters. The Christian quarter is in the northwestern corner of the city; the Moslem, in the northeastern and eastern parts, including the Temple place; the Jewish, in the southern part, on the eastern slope of the traditional Mt. Zion; and the Armenian, in the southwestern part. In recent years the Moslem quarter has been invaded by the Jews; and outside of the walls, along the Jaffa and Damascus roads, are numerous colonies of Jews. The homes of many of the better classes of Christians and Moslems, as well as the foreign consulates, the more important convents, monasteries, hospitals, schools, and hotels, are also in this extramural quarter. Within the walls the streets are narrow, crooked, and steep. Many of them are covered over so that sunlight never enters; and the sanitary conditions are, on the whole, very poor. The style of the architecture is typical, the houses consisting of a series of low, square, flat-domed rooms, built about an open court, which generally contains a cistern for gathering water. An occasional latticed balcony is seen; and almost all roofs are provided with a balustrade. Outside the walls the streets are wider and better cared for, and the houses are more European in appearance.



Damascus Gate, Jerusalem.

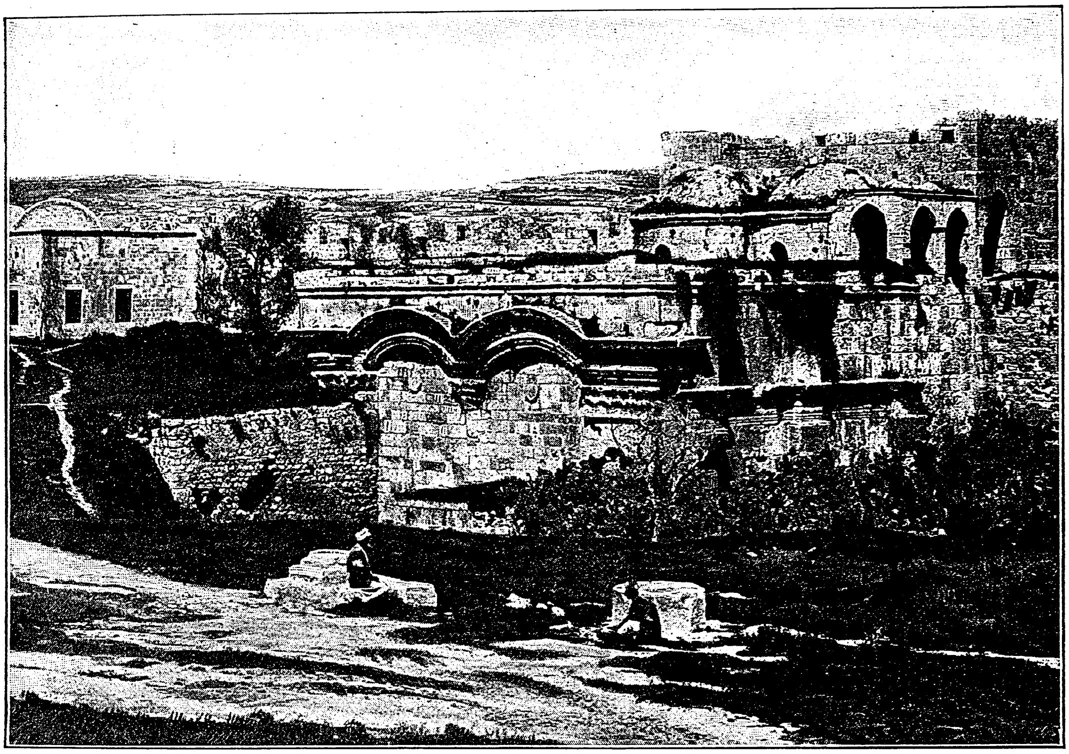
(From a photograph by the American Colony, Jerusalem.)

The climate is mild; but the extremes of heat and cold are not unknown. Snow and frost are occasionally experienced in the winter, a season of long-protracted rains. The late summer is very uncomfortable, owing to the heavy dust and the hot eastern winds. The absence of foliage and the glare of the bare stone seem to intensify the natural heat of the sun.

With the exception of the Spring of Siloam ('Ain Sitti Maryam), Jerusalem is without any natural water-supply. Every house therefore is provided

Weather and Water.

with one or more cisterns for gathering rain-water. The well-being of the city is thus directly dependent on the amount of the rainfall. The old aqueduct from Solomon's Pools has recently been replaced by a modern pipe-line. The amount of water thus conducted is small; and the Temple place is more directly benefited than the city proper. The increase of private cisterns of late years has reduced the amount of water formerly collected in the large public pools, which are now used only in case of necessity by the poorest of the population. Some water is brought in by train and cart from Bittir and 'Ain Karim, mostly for the use of the European inhabitants. The large pools are all of ancient construction: the Birkat Isra'in (Bethesda?), to the north of the Temple place; the Birkat al-Sulṭan (upper Gihon?), southwest of the Jaffa gate; the Birkat al-Baṭraḳ (Hezekiah's Pool?), in the city, west of the Muristan; the Birkat Mamilla, in the Moslem cemetery, west of the city; and the upper and lower pools of Siloam, southeast of the city.



The Golden Gate from Within the City of Jerusalem.
(From a photograph by Bonfils.)

Jerusalem is now reached by rail from Jaffa. The station is twenty minutes' ride southwest of the city, in the plain of Rephaim, near the German colony of the Templars. Transportation within the city is by means of horse, camel, or donkey, only few streets being practicable for wheeled conveyances. Certain streets which are very much crowded have low iron bars across them to prevent camels from entering, their large loads causing much confusion and damage. Without the walls modern carriages are in use.

Population.

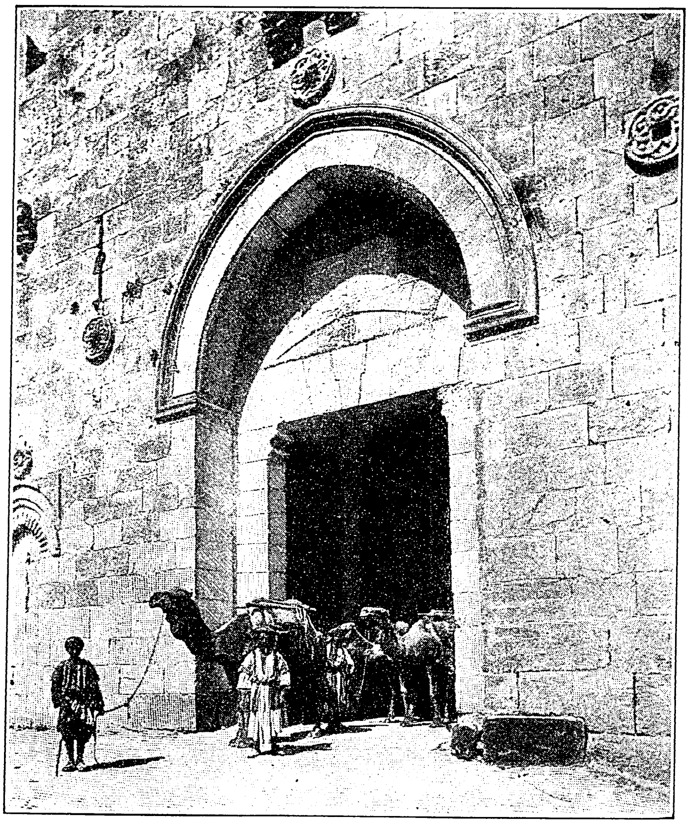
The present population of Jerusalem is about 46,500. Of this number 29,000 are Jews; 8,500, Moslems; and the remaining 9,000, Christians of different sects. Each of the properly accredited confessions has its representatives in the town council ("Majlis Baladiyyah"), of which the mayor of the city is president. Jerusalem forms an independent sanjak, subject to the sultan, who appoints the "mutaṣarrif." A regiment of infantry is maintained in the city, in the Tower of David.

Jews of Jerusalem.

Up to 1837 the number of Jews in the Holy City was very small; and of these the great majority were Sephardim. In previous centuries Ashkenazim had preferred to settle in the Galilean cities. The earthquake at Safed and Tiberias in 1837 caused many to move southward; and this gave the first impetus to the growth of the Jewish colony in Jerusalem. The next great movement toward Jerusalem occurred in connection with the persecutions in Russia; and since then the growth of the community has been extraordinary. From 3,000 in 1837, the Jews have, as stated above, increased to 29,000 in 1903. Rumania, Persia, Mesopotamia, Morocco, and Yemen have each furnished a quota to the now complex Jewish community of Jerusalem. The Sephardim number about 15,000, and comprise, besides the original Spanish-Portuguese stock, colonies of Eastern Jews of various nationalities. The Ashkenazim are broadly divided into Ḥasidim and Perushim, which in turn are divided into numerous small "ḥaluḳḳah" congregations. A few Karaites still remain.

Occupations.

Modern Jerusalem is a city with no commerce except the importation of the necessities of life, the export of souvenirs, and the tourist trade, and manufactures little but olive-wood souvenirs and sacred scrolls. Jerusalem is dependent upon the tourist and upon charity. The Jew gets the least from the former, and a large part of the latter. There is but one good Jewish hotel (Hotel Jerusalem, Kaminitz) where Europeans are accommodated, though there are several Jewish inns. A small number of Jews is engaged in the administration of the various charitable and educational institutions established in the city by their brethren abroad. These include the physicians, chemists, teachers, and other paid officials. About 2,000 Jews are craftsmen, occupied in carpentry, tailoring, capmaking, shoemaking, printing, tin- and copper-smithing, baking, engineering, etc. These trades are, however, all overcrowded, and regular employment is scarce. A few Jews are engaged in money-changing, and one is a banker; writing sacred scrolls gives employment to a small number; many drive cabs; and a great number are engaged in petty trading. A store is a sign of prosperity, no matter how mean it may be. A large portion of the Jews exist on the charity that pours in from abroad.



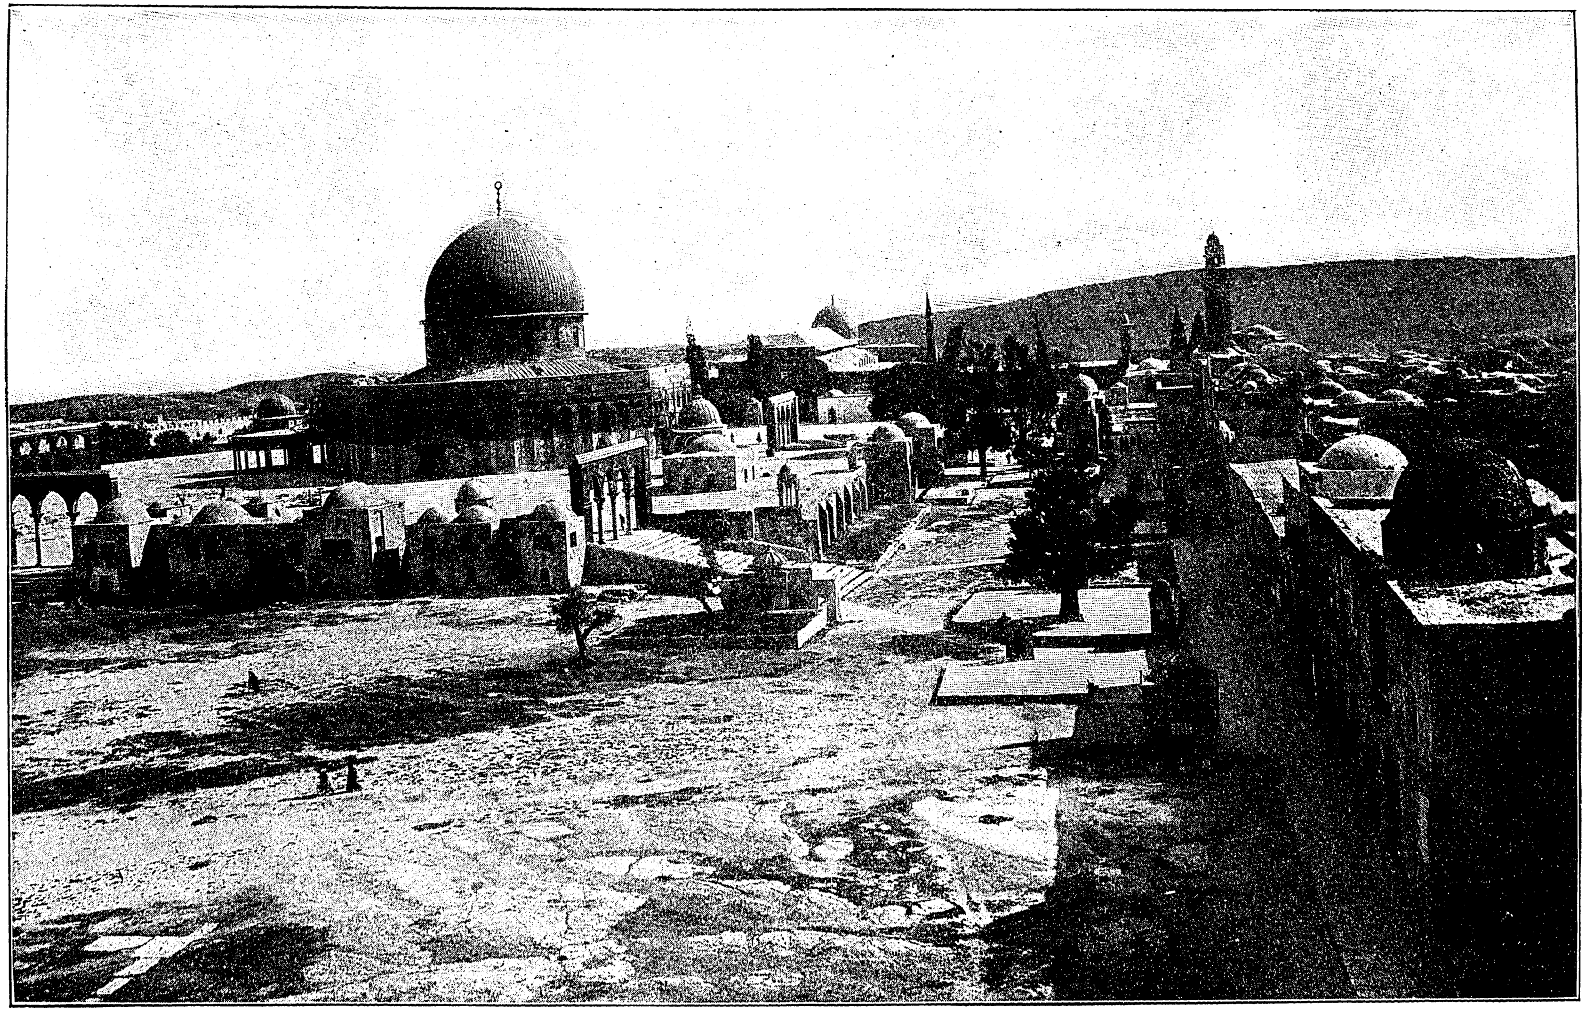
Zion Gate, Jerusalem.
(From a photograph by Bonfils.)

Institutions.

Much is done in aid of the Jew; but so abject is his poverty, and so limited are his chances for improvement, that even the best-directed efforts do not suffice to relieve the situation. For the benefit of the Jewish poor a number of dwellings have been erected which are either let at a nominal rental or occupied free. Free dispensaries are maintained in connection with the hospitals and by the Le-Maʻan Ẓiyyon Society. There are four Jewish hospitals: the Biḳḳur Ḥolim, under the auspices of the Ashkenazim; the Misgab la-Dak, under the Sephardim; the Shaʻare Ẓedeḳ, under the Orthodox of Germany; and the Rothschild. Two orphanages for boys have been established. There are also an institute for training blind children, an asylum for incurables and the insane, and a home for aged men and women. There are a large school for girls, the Evelina de Rothschild School (founded 1864), at present under the Anglo-Jewish Association of London; a German school for boys, the Edler von Laemmel School (1856), under the Frankfort Society; the elementary school (1884) for boys; and the technical shops (1886) of the Alliance Israélite Universelle. At the schools many of the children are provided with food and clothing. A library (the Jewish Central Library) has been established, and contains a promising collection of 20,000 books (see Abarbanel Library). There is a large number of Orthodox ḥadarim and yeshibot scattered through the city, where students are supplied with an education in the traditional sense of the term, and with the necessaries of life.

The working men have organized for purposes of mutual aid and the encouragement of industries in the city.

The great majority of the Jews is, as stated above, dependent on foreign charity. The Jewish Colonization Association and several other societies dispense doles through their agents; but the ḥaluḳḳah system reaches more people than all the others combined. "Ḥaluḳḳah" is the term applied to the funds sent by pious Jews from abroad for the support of needy scholars in the Holy City, who in return pray and study, at the holy sites, in memory of their benefactors. While accomplishing a great deal of good, the system is regarded by some as thoroughly



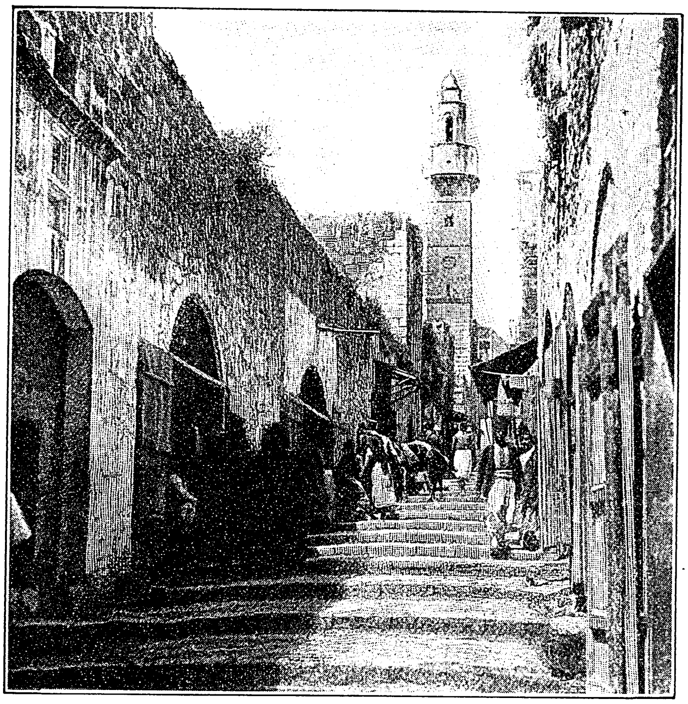
The Ḥaram Area, Site of the Temple.

(From a photograph by Bonfils.)

iniquitous because of its pauperizing tendencies and of the inequality of the distribution of the funds. See Ḥaluḳḳah.

Two weeklies ("Ha-Ḥabaẓẓelet," edited by A. Frumkin; and "Hashḳafha," by Ben Judah) as well as an annual almanac ("Jerusalem," by Luncz) are published by the Jews of Jerusalem. Besides the Talmudic works of the Orthodox rabbis, other works of real importance and value appear from time to time. The names of Grünhut, Ben Judah, Luncz, Simeon Ḥakam, and Yellin are most prominent in this connection.

The Sephardic community is recognized by the government, its chief rabbi, the ḥakam bashi, when installed being invested by the sultan with an official robe and an order. Rabbi Abraham Ḥayyim Gagin was the first to receive an irade as ḥakam bashi of Palestine, in 1842. He died in 1848, and was succeeded by R. Jacob Covo (d. 1854). Since the latter's death the following have held the office: Ḥayyim Nissim Abulafia (d. 1860); Ḥayyim David Hazan (d. 1869); Abraham Ashkenazi (d. 1880); Meïr Panisel (d. 1893); and Saul Jacob El Yashar, the present incumbent (1904), who has a place on the town council, but, owing to age, has delegated this office to his grandson. The ḥakam bashi is responsible for the taxes of the Jews and for their good behavior; and has the right to collect for the communal treasury the meat-tax ("gabella") and any fines he may impose. He has jurisdiction over his people; and the Turkish authorities are at his service for enforcing his decrees and those of his court ("bet din"). The "shaikh al-Yahud" is an administrative officer under the chief rabbi, whose duty it is to police the Jewish quarter and to collect the taxes, etc. Formerly the military tax ("'askariyyah") was paid out of the communal taxes, but recently Baron Edmond de Rothschild has defrayed this expense for all the Jews of Palestine.



A Typical Street in Jerusalem.
(From a photograph by Bonfils.)

The Ashkenazim refuse to recognize the authority of the ḥakam bashi, and have their own organization. They have one head, Samuel Salant, to whose administrative ability the present state of affairs is attributable. An assistant was lately called from Russia, E. D. Rabbinowitz-Tummim. This organization is of course unofficial; and these rabbis depend on their moral and personal influence for the enforcement of their decisions. Most of the Ashkenazim enjoy the protection of some foreign consulate.

There are about 250 places of prayer for the Jerusalem Jews, about seventy of which are in independent buildings. The Ashkenazim possess two large, commodious synagogues, both in the city proper—the Neu Schul of Salant and the synagogue of the Ḥasidim. The other synagogues of the Ashkenazim are Bet Ya'aḳob, Sha'are Ẓiyyon, and Menahem Ẓiyyon (all of which are built about the courtyard of R. Judah he-Ḥasid, and are owned by the members of the Perushim community), and Tif'eret Yisrael, also known as "the synagogue of R. Nissim Bak," Bak having collected the funds for its building.

Synagogues and Yeshibot.

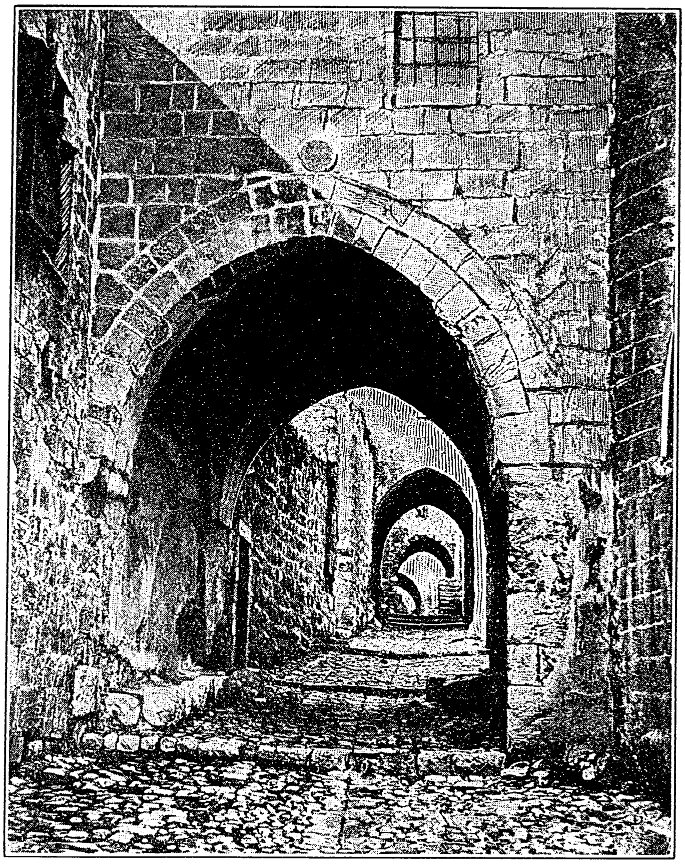
The principal synagogues of the Sephardic Jews are the Ḳehal Isṭambul, the official synagogue in which the ḥakam bashi is installed and in which he officiates on holy days; the Ḳehal Emẓa'i, so called because it is in the midst of the other synagogues; Bet ha-Keneset R. Johanan b. Zakkai; Ḳehal Talmud Torah. All of these are united and form one group. There is a small synagogue, Bet El, used by the Cabalists, and another, Ḳehal Ma'arabim, used by the Moroccan Jews. The Karaites also have an interesting place of worship; and the services of the Yemenite, Persian, and Bokharian Jews are worthy of notice because of the variations in the forms of the ritual.

Besides the larger synagogues within the city, there are several smaller ones. Outside the walls each Jewish colony has a synagogue of its own; the largest of these are Me'ah She'arim, Bet Ya'aḳob, Naḥalat Shib'ah, Bet Yisrael, Yemin Mosheh, Mazkeret Mosheh, Ohel Mosheh, and Reḥobot, the last-named belonging to the colony of the Bokharian Jews.

The famous Wailing-Place ("Kotel Ma'arabi") is interesting from every point of view. Every Friday afternoon and after morning service on Sabbaths and holy days the Jews assemble in a picturesque crowd to bewail their departed glory. This is the great show-place of the Jerusalem Jewry, as the Temple place is for the Moslems, and the Church of the Holy Sepulcher for the Christians.

Of the yeshibot those of the Sephardim are mostly foundations in which the ḥakamim, who are beneficiaries, have to study and to offer prayers daily for the souls of the deceased testators. Chief of these yeshibot are: Ḥesed le-Abraham, an ancient trust which benefits ten rabbis, including the ḥakam bashi; Ḳa'id Nissim Shamama of Tunis, which has an annual income of 6,000 francs, divided among fifty ḥakamim; Mazzal Ẓomeaḥ, supported by the Sassoon family of Bombay, at which ten rabbis each receive 200 francs annually; Menahem Elijah of Vienna, which grants 200 francs a year to each of ten rabbis; Gedaliah, presided over by the ḥakam bashi, and founded and maintained by Ḥayyim Guedalla, a nephew of the late Sir Moses Montefiore; Bet Ya'aḳob, in which ten rabbis receive each an annual allowance of 140 francs; and Tif'eret Yerushalayim, for young students, each of whom receives a small annual income.

The yeshibot of the Ashkenazim are more in the nature of colleges, at which young men spend their time in the study of the Talmud and the codes. Each student receives a monthly allowance varying from 10 to 80 francs. Their chief yeshibot are: 'Eẓ Ḥayyim, attended by about 100 students, under the supervision of R. Samuel Salant; Me'ah She'arim, with 50 students, under R. Saul Ḥayyim Hurvitz; Torat Ḥayyim, managed by R. Ḥayyim Weingrad; and Ḥayye 'Olam, a small yeshibah for Ḥasidim.



Street of Arches Leading to the Palace of Herod.

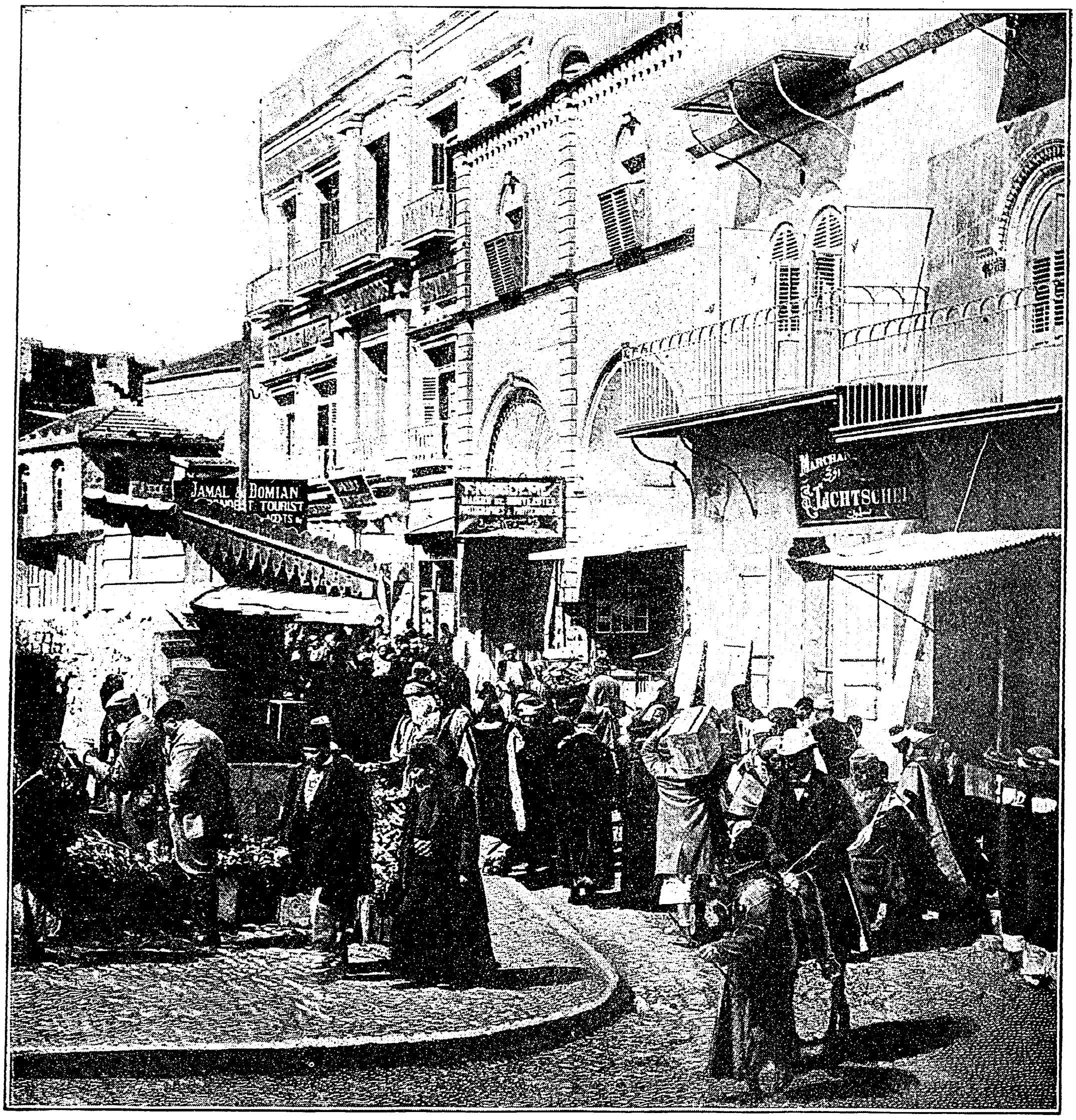
Typography: The following books have been printed in Jerusalem since 1842:

1842. Azharot (published by Israel Bak), selections read on Shabu'ot night by the Moroccan Jews.
1843. Be'er Sheba' (I. Bak), commentary on the Pentateuch, by Moses David Ashkenazi.
1843. Dibre Shalom (I. Bak), by Abraham Shalom Mizraḥi.
1843. Ohole Yehudah (I. Bak), commentary on Rambam, by Judah ha-Kohen.
1846. Be'er ba-Sadeh (I. Bak), by Menahem Danon.
1855. Ge Ḥizzayon (I. Bak), a life of Sir Moses Montefiore, by Jacob Sappir.
1863. Sefer ha-Goralot of R. Ḥayyim Vital (Bril, Cohen, and Salomon), published from a manuscript found in Yemen by Jacob Sappir.
1864. Dim'at ha-'Ashuḳim (I. Bak), on local disputes, by Salomon Bojarsky.
1868. Ohole Yosef (I. Bak), on the ritual laws, by Elias Joseph Rivlin.
1871. Eben Shelomoh (J. M. Salomon), commentary on some difficult passages in the Talmud, by Rabbi Salomon of Tolotshin.
1871–76. Imre Binah (J. M. Salomon), responsa, by Meïr Auerbach.
1872. Arẓot ha-Ḥayyim (Jos. Schmer), by Ḥayyim Palaggi, chief rabbi of Smyrna.
1875. Darke Ish (Nissim Bak), sermons, by Judah Arewass.
1876. Em la-Massoret (N. Bak), by Aryeh Löb Ḥarif.
1876–79. Or ha-Ḥokmah (J. M. Salomon), commentary on the Zohar, by Abraham Azulai.
1877. Eleh Toledot Yiẓḥaḳ (A. M. Luncz), biography of the French statesman, Isaac Cremieux, by Luncz.
1878. Ha-Yehudim bi-Sefarad we-Portugal (Frumkin), translated from the English of Frederick D. Mocatta by I. B. Frumkin.
1881. Ohel Abraham (J. M. Salomon), responsa and "dinim," by Abraham Schag.
1882. Ohel Mo'ed (Agan), commentary on passages from the Pentateuch, the Five Scrolls, Joshua, Judges, and Samuel, by Abraham Bick.
1883. Ereẓ Yisrael (J. M. Salomon), by E. Ben Judah.
1884. Zeker 'Olam (Goshzini), a journey to Palestine, by Rebecca Lippe.
1885. Alfasi Zuṭa (A. M. Luncz), an outline of Alfasi, by Menahem Azariah da Fano; edited by N. Nathan Coronel.
1886. The life of Sir Moses and Lady Judith Montefiore (Zuckermann), by Ezra Benvenisti.

1886. Ohel Mo'ed (S. Zuckermann), by R. Samuel Yarundi.
1887. Eben Shelomoh (Isaac Hirschensohn), commentary on some difficult passages in the Talmud and the Tosafot, by Salomon Epstein.
1887. Iggeret le-Dawid (J. M. Salomon), a letter by David Cohen, containing some references to the events of the year 5648.
1891. Or le-Ḥayyim (I. B. Frumkin), by Hillel Gelbstein.
1893-94. Batte Midrashot (G. Lilienthal), old midrashim, collected and edited by S. A. Wertheimer.
1899. Hafṭarah for the eighth day of Pesaḥ, with the Persian (Luncz).
1899. Wa-Ye'esof Dawid, sermons, by David Kaẓin of Aleppo.
1901. Ben Ish Ḥayil (Frumkin), sermons, by David Ḥayyim of Bagdad.
1901. Bet Ḥayil (Ben Judah), "Domestic Economy," a Hebrew reader, by Joseph Meyuḥas.



DAVID'S STREET, JERUSALEM.
(From a photograph by the Palestine Exploration Fund.)

1894. Ezor Eliyahu (J. M. Levy), commentary on Pirḳe Abot, etc., by Elihu ha-Kohen Etmari.
1898-1900. Jehoiada on some passages of the Talmud (Frumkin).
1899. Agudah (Frumkin), ritual code, by Alexander Susslin Cohen of Frankfort-on-the-Main.
1899. Or Yeḳarot (I. N. Levy), a commentary on the Mishnaic order Ṭohorot, by Asher Luria.
1899. Ben Ish Ḥay (Salomon), on the Pentateuch, by Joseph Ḥayyim, chief rabbi of Bagdad.

The present ḥakam bashi has published "'Olat Ish," "Ma'aseh Ish," and "Simḥah le-Ish (שיא=the initials of Saul Jacob El Yashar in inverted order); A. M. Luncz has issued six volumes of his year-book "Jerusalem," as well as a new edition of Estori Parḥi's "Kaftor wa-Feraḥ," and Rabbi Joseph Schwarz's "Tebu'ot ha-Ereẓ"; L. Grünhut has published some midrashim, "Ḳobeẓ Midrashim"; David Jellin, a Hebrew reader; Ḥayyim Hirschensohn, the work "Mosedot Torah She-be'al Peh"; S. A. Wertheimer, "Midrash Ḥaserot we-Yeterot"; Sliman Mani of Hebron, "Siaḥ Yiẓḥaḳ"; M. Baruch of Bokhara, a volume of sermons, "Tebat Mosheh"; and I. M. Pines has edited the "'Emeḳ Berakah" of David Friedman, chief rabbi of Karlin.

Besides these there have recently been published in Jerusalem for the Jews of Yemen and Bokhara various works in Hebrew, Arabic, and Persian. Among them may be mentioned a Siddur of the Yemenite Jews (1894); "Keter Torah," or "Taj," Pentateuch with Targum and Saadia's Arabic translation (1895-1901); "Mikra Meforash," Pentateuch with modern Persian translation (1901-03).

D. M. A. M.

In addition to the annual contributions from abroad there are the following permanent funds, the interest of which is devoted to the same purpose as the ḥalukkah:

Donor.	Residence.	Date.	Amount.
L. Lewenberg	(?)	(?)	6,200 francs.
Sir Moses Montefiore (testimonial)	London	1877	£13,000.
Sir Moses Montefiore	London	1882	£30,000.
Jacob Nathanson	Plymouth	(?)	£26 (annual interest).
Isaac Ratzesderfer	Antwerp	1885	20,000 florins.
Dr. Salvendi	Dürkheim	1895	1,000 francs.
Ḳa'id Nissim Shamama	Leghorn	1884	178,000 francs.
Levi Solomon	London	(?)	£54 (annual interest).
Gedaliah Tiktin	Breslau	1887	20,000 marks.
Visotzki	Russia	1894	12,780 francs.
Visotzki	Russia	A second deposit.	250 francs (annual interest).
Naḥman Moses Volkoviski	Russia	1900	10,000 rubles.
Samson Wertheimer	Vienna	August 8, 1808	53,657 florins.
Joshua Zeitlin	Dresden	1887	33,250 francs.

There are also several houses in Jerusalem erected from charitable funds contributed from abroad. These are either placed at the disposal of the same persons as those for whom the ḥalukkah is founded, or the income is devoted to their use. These buildings are as follows:

Donor.	Residence.	Name of Terrace.	No. of Houses.	Date.
Moses Alexander	New York	Obole Mosheh	20	1901
Miss Davis	America		24	
Samuel Poliakoff	St. Petersburg	[Income of 3,000 rubles]	..	1863
David Reiss	Yanov	Bet David	20	1874
Mrs. Scheindel	Jassy	Ḥazer ha-Geberet	10	1899
Judah Touro	New Orleans	Bet Mishkenot	20	
Moses Wittemberg	Dünaburg	Sha'are Mosheh	40	
Isaac Rotzesderfer	Antwerp	Ohel Yiẓḥak	18	1892
Jacob Taninwurzel	Warsaw	Naḥalat Ya'aḳob	50	1897
Baron M. de Hirsch and Dr. Arie Salvendi	Paris Dürkheim	'Ezrat Niddaḥim	65	1889

JERUSALEM. See Periodicals; Year-Books.

JESCHURUN: Periodical published in Frankfort-on-the-Main and subsequently in Hanover. Founded in Oct., 1854, it was issued as a monthly by Samson Raphael Hirsch up to 1870. From 1882 till 1886 his son Isaac Hirsch published it as a weekly. It was then merged into "Der Israelit." Its theological position was ultra-Orthodox.

G. A. M. F.

JESCHURUN (Zeitschrift für die Wissenschaft des Judenthums): Periodical edited and published by Joseph Isaac Kobak. Among its contributors were S. L. Rapoport, S. D. Luzzatto, A. H. Weiss, Halberstam, Dukes, Steinschneider, Reifmann, and other well-known scholars. The first two volumes are in Hebrew only, but the succeeding volumes are partly in Hebrew and partly in German (vols. i., ii., Lemberg, 1856–58; iii., Breslau, 1859; iv., v., Fürth, 1864–66; vi.–ix., Bamberg, 1868–78). Some of its Hebrew articles were published separately in four volumes under the title "Ginze Nistarot" (Bamberg, 1868–78).

Bibliography: Harkavy, List of Jewish Periodical Publications and Literary Collections (Russian), in *Yevreiski Biblioteka*, vii.–viii., St. Petersburg, 1879-80; Zeitlin, *Bibl. Hebr. Post-Mendels.* p. 174.

JESHARELAH. See Asarelah.

JESHIBAH. See Yeshibah.

JESHUA BEN JUDAH (Arabic, **Abu al-Faraj Furḳan ibn Asad**): Karaite exegete and philosopher; flourished, probably at Jerusalem, in the second half of the eleventh century; pupil of Joseph ben Abraham ha-Ro'eh. Jeshua was considered one of the highest authorities among the Karaites, by whom he is called "the great teacher" ("al-mu'allim"). Like all the Karaite leaders, he was a very active propagandist; and his public lectures on Karaism attracted many inquirers. Among these was a Castilian Rabbinite named Al-Taras, who, after having accepted the Karaite teachings, returned to his native country, where he organized a powerful propaganda by circulating Jeshua's writings. The greatest service, however, rendered by Jeshua to Karaism was his accomplishment of the reform of the laws concerning incest, a reform which had been advocated by his master, Joseph ben Abraham ha-Ro'eh.

As Biblical Exegete.

Jeshua's activity in the domain of Bible exegesis was very extensive. He translated the Pentateuch into Arabic, and wrote thereon an exhaustive commentary, of which he made, in 1054, an abridged version. In this commentary, Jeshua made use of all the exegetical works of his Karaite predecessors and of that of Saadia, often attacking the latter most vigorously. Several passages of Jeshua's commentary are quoted by Abraham ibn Ezra. Fragments of the Pentateuch translation and of the exhaustive commentary on a part of Leviticus, with almost the whole of the abridged version, are extant in manuscript in the British Museum (MSS. Or. 2491; 2494, ii; 2544–46). Both commentaries were early translated into Hebrew; and parts of them are in the Firkovich collection at St. Petersburg. Jeshua wrote two other Biblical works, an Arabic commentary on the Decalogue (which he reproduced in an abridged form); and a philosophical midrash entitled "Bereshit Rabbah," in which he discusses, in the spirit of the Motazilite "kalam," creation, the existence and unity of God, the divine attributes, etc. A fragment of a Hebrew translation of the abridged commentary on the Decalogue, made by Tobiah ben Moses under the title "Pitron 'Aseret ha-Debarim," is still extant in manuscript ("Cat. Leyden," Nos. 5 and 41, 2). The "Bereshit Rabbah" is no longer in existence; but passages from it are frequently quoted by Aaron of Nicomedia in his "'Eẓ Ḥayyim," and by Abraham ibn Daud, who in his "Sefer ha-Ḳabbalah" (end) calls it a blasphemous work.

Rules of Relationship.

Jeshua was also the author of a work on the precepts, entitled "Sefer ha-Yashar," which has not been preserved. From it was probably extracted his treatise on the degrees of relationship within which marriage is forbidden, quoted by him under the title "Al-Jawabat wal-Masa'il fi al-'Arayot," and known in the Hebrew translation made by Jacob ben Simon under the title "Sefer ha-'Arayot." Fragments of both the Arabic text and the Hebrew translation still exist in manuscript, the former in the British Museum (H. Or. No. 2497, iii.), and the latter in the libraries of Leyden ("Cat. Leyden," Nos. 25, 1; 41, 16) and St. Petersburg (MS. No. 1614). In this treatise Jeshua discusses the hermeneutic rules which are to be used in the interpretation of these laws, gives a critical view of the principles upon which the various prohibitions are based, quotes Karaite authorities, such as Anan and Al-Ḳirḳisani, on the subject, and produces the views of the Rabbinites Saadia and Simon Kahira (author of the "Halakot Gedolot"). Another treatise by Jeshua on the same subject was the "Teshubat ha-'Iḳḳar," published at Goslow in 1834 under the title "Iggeret ha-Teshubah."

Jeshua was also the author of the following philosophical treatises, probably translated from the Arabic: "Marpe la-'Eẓem," in twenty-five short chapters, containing proofs of the creation of the world, of the existence of God, and of His unity, omniscience, and providence (MS. Paris No. 670; MS. St. Petersburg No. 686); "Meshibot Nefesh," on revelation, prophecy, and the veracity of the Law; and three supplementary chapters to Joseph ben Abraham ha-Ro'eh's "Sefer Ne'imot" ("Cat. Leyden," No. 172), in which Jeshua treats of reward and punishment and of penitence. The Arabic original manuscript of the last of these three chapters is in the British Museum. It bears the title "Mas'alah Mufarridah," and the author shows therein that the repetition of a prohibition must necessarily have a bearing on the punishment in case of transgression.

K. I. BR.

JESHURUN: Poetical name for Israel, occurring four times in the Bible (Deut. xxxii. 15, xxxiii. 5, 26; Isa. xliv. 2; in the last-cited place the A. V. has "Jesurun"). All the commentators agree in applying this term to Israel. The Peshiṭta and the Targumim render it by "Israel"; only the Targum Yerushalmi has in the first instance "Jeshurun." The Septuagint invariably renders the word by ἠγαπήμενος, and Jerome once by "dilectus," probably taking ישרון as a diminutive of endearment. But in three other places Jerome renders it by "rectissimus," in which he seems to have followed the opinion of Aquila, Symmachus, and Theodotion (comp. Jerome on Isa. xliv. 2). Thus they derive this word from ישר = "to be upright"; and the same etymology is given by Ḳimḥi and Ibn Ezra. Obadiah Sforno derives it from שור = "to behold," meaning a clear-sighted people.

Some modern scholars accept the etymology from ישר, the word being formed similarly to "Zebulun," from "zabal" (see W. Stärk, "Studien zur Religions- und Sprachgeschichte des Alt. Test." part ii., p. 74, Berlin, 1899; see also Duhm, "Das Buch Jesaiah," p. 304, Göttingen, 1892; Hummelauer, "Deuteronomium," 1901, p. 522; W. Bacher, "Jeschurun," in Stade's "Zeitschrift," v. 161 *et seq.*).

E. G. H. M. SEL.

JESI, SAMUEL: Italian engraver; born at Milan 1789; died at Florence Jan. 17, 1853. He was a pupil of G. Longhi at the Academy of Milan. His first work (1821) was "The Abandonment of Hagar," engraved after a painting by Guercino in the Palazzo di Brera at Milan; this was followed (1834) by "The Madonna with St. John and St. Stephen," from a painting by Fra Bartolomeo in the Cathedral of Lucca. He then devoted himself to the works of Raphael, whom he ably interpreted. His masterpiece is the group representing Pope Leo X. with Cardinals Rossi and Giulio dei Medici (1834). While in Paris for the purpose of having it printed he was elected a corresponding member of the Academie des Beaux-Arts, and received the ribbon of the Legion of Honor. In 1846 he began to work on his engraving of the "Cœna Domini," discovered in the Church of S. Onofrio, Florence, and attributed to Raphael. Meanwhile he engraved the "Madonna della Vite." In 1849 he completed the drawing of the "Cœna Domini," but died before finishing the engraving.

S. U. C.

JESSE (יִשַׁי): Father of David, son of Obed, and grandson of Boaz and Ruth. He is called "the Bethlehemite" (I Sam. xvi. 1, 18; xvii. 58) and "the Ephrathite of Bethlehem" (*ib.* xvii. 12). He had eight sons (*ib.* xvi. 10, 11; xvii. 12), although in I Chron. ii. 13–15 only seven are mentioned. He was a person of wealth, his property being chiefly in sheep (I Sam. xvi. 1, 11; xvii. 20; comp. Ps. lxxviii. 71).

Jesse's name stands out preeminently as that of the father of David, who is called "the son of Jesse"; and though this expression was used during David's lifetime and even afterward as a term of contempt—so by Saul (I Sam. xx. 27, 30, 31; xxii. 7, 8), by Doeg (*ib.* xxii. 9), by Nabal (*ib.* xxv. 10), by Sheba (II Sam. xx. 1), and by the Ten Tribes (I Kings xii. 16; II Chron. x. 16)—Isaiah the prophet connects with the "stem of Jesse" (Isa. xi. 1) and "root of Jesse" (*ib.* xi. 10) one of his sublimest Messianic prophecies. As Jesse was "an old man in the days of Saul" (I Sam. xvii. 12), it is doubtful whether he lived to see his son king. The last historical mention of Jesse is in I Sam. xxii. 3, where it is stated that David entrusted his father and his mother to the care of the King of Moab; but, as may be inferred from *ib.* xxxii. 4, this was only temporary.

E. G. H. B. P.

JESSEL, SIR GEORGE: English master of the rolls; born in London 1824; died there March 21, 1883; youngest son of Zadok Aaron Jessel. Educated at University College, London, and London University, he became M.A. and gold medalist in mathematics in 1844. He entered Lincoln's Inn in 1842, was called to the bar in 1847, and became queen's counsel eighteen years later. In 1868 he was returned to Parliament for Dover in the Liberal interest, and retained his seat until 1873. He won the attention of Gladstone by a speech on the Bankruptcy Bill in 1869; and in 1871 was made solicitor-general. In 1872 he was knighted. In Aug., 1873, when Lord Romilly retired from the presidency of the Rolls Court, Sir George Jessel was appointed in his place. He was also sworn as a privy councilor, and in Nov., 1875, became a judge of the Supreme Court of Judicature.

It was when sitting as a judge of a court of first instance that Jessel showed his marked capacity as an equity judge. In a few months the whole character of the Rolls Court underwent a marked change. The prolixity of former trials was done away with, and the practise of the master of the rolls permeated the other courts. It was Jessel's distinction that he was at the same time one of the most erudite of case lawyers and also the most courageous of judges in handling authorities. He was a "law-making judge" whose decisions soon grew to be taken as guiding dicta. His judgments were rarely appealed from and seldom reversed. Being the first master of the rolls after the Judicature Act, he had many important and novel functions to fulfil as chairman of the chancery division of the court of appeal and of the committee for drafting new rules of procedure. He was besides, from 1873 to 1883, practically the head of the Patent Office, and supervised the important series of national historical publications known as the Rolls Series.

Sir George Jessel.

In 1880 Jessel was unanimously elected by the senate of the University of London as vice-chancellor.

Jessel was a vice-president of the Anglo-Jewish Association and served on the Rumanian Committee. He was one of the last judges who had the right to sit in the House of Commons.

J. G. L.

JESURUN: A family whose members were descendants of the Spanish exiles, and are found mainly in Amsterdam and Hamburg. The earliest known member appears to have been Reuel Jesurun.

Daniel Jesurun: Preacher and president of an educational institute at Amsterdam, founded in 1682 and annexed to the charitable institution Maskil el Dal. "He sang verses of the Scripture for an hour on feast-days and half an hour on the Sabbath."

Bibliography: De Barrios, *Maskil el Dal*, p. 142; idem, *Arbol de las Vidas*, p. 93.

David Jesurun (Jessurun, Jeshurun): Spanish poet; died at Amsterdam at the beginning of the seventeenth century. He wrote verses in early youth, and hence was called "poeta niño" (= "the little poet"). His poems in manuscript were in the possession of Benjamin Belmonte. Daniel Levi de Barrios published a number of them, among others a eulogy of the city of Amsterdam, in which place Jesurun found a refuge from the Spanish Inquisition; also some verses on his circumcision and a Portuguese sonnet on the death of the martyr Diego de la Asumçaõ.

Bibliography: De Barrios, *Triumpho del Govierno Popular*, pp. 74 *et seq.*; Kayserling, *Sephardim*, p. 177; Grätz, *Gesch.* 3d ed., ix. 484.

Isaac Jesurun: Victim of a false accusation in Ragusa in the seventeenth century; died in Jerusalem. Jesurun, an old man, was accused by a Christian woman, who had robbed and killed the daughter of a Christian merchant of Ragusa, of having persuaded her to commit the crime in order to provide blood for the celebration of the Jewish holy day. On Sept. 19, 1622, Isaac was taken prisoner and racked six times in the most cruel manner. Though he still insisted that the accusation was false, he was sentenced to twenty years' imprisonment in a cave. He was accordingly chained naked in a very narrow room specially prepared, where he was given as nourishment nothing but bread and water, which were passed him through a hole.

When several of the judges who had sentenced the innocent man died suddenly, the others regarded this as a punishment from God, and released Jesurun after three years' confinement. Jesurun, who survived all the tortures and hardships, traveled throughout Italy, where those who had heard of his sufferings looked on him with wonder. Several years later he died, as stated above, in Jerusalem.

Isaac Jesurun's brother **Joseph** was president of the Talmud Torah in Hamburg, and died there Oct. 7, 1660.

Bibliography: Aaron ha-Kohen, *Ma'aseh Yeshurun* (appended to *Shemen ha-Ṭob*), Venice, 1657; reprinted in *Ma'aseh Nissim* (1798); Manasseh ben Israel, *Vindiciæ Judæorum*, p. 10 (German transl. in Mendelssohn, *Rettung der Juden* [*Gesammelte Schriften*, iii. 215]); *Memorable Relacion de Ishac Jesurun*, a Spanish translation of the *Ma'aseh Yeshurun*, still in MS.; Grunwald, *Portugiesen-Gräber*, p. 113.

Isaac ben Abraham Ḥayyim Jesurun: Haham of the Portuguese congregation in Hamburg; died there March 19, 1655. He was the author of "Panim Ḥadashot" (Venice, 1651), a short compilation of ritual ordinances according to the ritual codices, containing also an index to the collection of published decisions after Joseph Caro. The "Sefer ha-Zikronot" of Samuel Aboab was falsely ascribed to Jesurun. He wrote also, in Portuguese, "Liuro da Providencia Divina" (Amsterdam, 1663), wherein he makes philosophical reflections on the nature and results of divine providence. He was succeeded by **Isaac Jesurun** of Venice as haham of the community on Aug. 16, 1656.

Reuel (Rohel) Jesurun (alias **Paul de Pina**): Portuguese poet; born in Lisbon; died in Amsterdam after 1630. He went to Rome in 1599 to become a monk. His cousin Diego Gomez (Abraham Cohen) Lobato, a Marano like himself, gave him a letter to the physician Eliau Montalto, at that time living at Leghorn, which, translated, runs as follows: "Our cousin Paul de Pina is going to Rome to become a monk. I would be much obliged to you, sir, if you would dissuade him therefrom." Montalto succeeded in doing so, and Paul de Pina, who as an avowed believer in Judaism called himself Reuel Jesurun, returned to Portugal. He went with Lobato to Brazil in 1601, and thence to Amsterdam (1604).

Jesurun became a very active member of the first congregation in Amsterdam, and belonged to those who drew up the earliest regulations (1614) for the cemetery which the new congregation had bought. In 1624 he composed songs which were recited by seven youths at the Shabu'ot festival in the first synagogue at Amsterdam. These were published under the title "Wikkuaḥ Shib'ah Harim: Dialogo dos Montes," Amsterdam, 1767. The book was dedicated by Aaron de Chaves, the editor, to the "virtuous" David de Aaron Jesurun; president of the congregation.

In the possession of the Portuguese congregation in Amsterdam is Jesurun's manuscript "Liuro de Beth Ahaim do K. K. de Beth Jahacob."

JESUS OF NAZARETH.—In History: Founder of Christianity; born at Nazareth about 2 B.C. (according to Luke iii. 23); executed at Jerusalem 14th of Nisan, 3789 (March or April, 29 C.E.). His life, though indirectly of so critical a character, had very little direct influence on the course of Jewish history or thought. In contemporary Jewish literature his career is referred to only in the (interpolated) passage of Josephus, "Ant." xviii. 3, § 3, while the references in the Talmud are for the most part as legendary as those in the apocryphal gospels, though in an opposite direction (see Jesus in Jewish Legend). Under these circumstances it is not necessary in this place to do more than to give a sketch of the main historical events in the public career of Jesus, with an attempt to ascertain his personal relations to contemporary Judaism; for the theological superstructure based upon his life and death, and certain mythological conceptions associated with them, see Jew. Encyc. iv. 50a, *s.v.* Christianity.

Sources of Life.

In the New Testament there are four "Gospels" professing to deal with the life of Jesus independently; but it is now almost universally agreed that the first three of these, known by the names of "Matthew," "Mark," and "Luke," are interdependent, corresponding to the various forms of contemporary Baraitot, while the fourth, the Gospel of John, is what the Germans call a "Tendenz-Roman," practically a work of religious imagination intended to modify opinion in a certain direction. The supernatural claims made on behalf of Jesus are based almost exclusively on statements of the fourth Gospel. Of the first three or synoptic Gospels the consensus of contemporary opinion regards that of Mark as the earliest and as being the main source of the historic statements of the other two. This Gospel will, therefore, be used in the following account almost exclusively, references to chapter and verse, when the name of the Gospel is not given, being to this source. Beside the original of the Gospel of Mark, there was another source used in common by both Matthew and Luke, namely the "logia," or detached sayings, of Matthew and Luke; and besides these two documents the apocryphal "Gospel According to the Hebrews" has preserved, in the opinion of the critics, a few statements of Jesus which often throw vivid light upon his motives and opinions. Much industry and ingenuity have been devoted by A. Resch to the collection of extracanonical statements of Jesus, known as "agrapha" (Leipsic, 1889).

The earliest of all these sources, the original of Mark's Gospel, contains references which show that it was written shortly before or soon after the destruction of Jerusalem in the year 70; in other words, forty years after the death of Jesus. Like the other Gospels, it was originally written in Greek, whereas the sayings of Jesus were uttered in Aramaic. It is therefore impossible to lay much stress upon the perfect accuracy of the records of events and statements written down forty years after they occurred or were made, and then in a language other than that in which such statements were originally uttered (even the Lord's Prayer was retained in variant versions; comp. Matt. vi. 10-13; Luke xi. 2-4); yet it is upon this slender basis that some of the most stupendous claims have been raised. For the processes by which the traditions as to the life of Jesus were converted into proofs of his supernatural character, see Jew. Encyc. iv. 51-52, *s.v.* Christianity. Many incidents were actually invented (especially in Matthew) "in order that there might be fulfilled" in him prophecies relating to a

Messiah of a character quite other than that of which Jesus either claimed or was represented by his disciples to be.

Yet the supernatural in the life of Jesus according to the Gospels is restricted to the smallest dimensions, consisting mainly of incidents and characteristics intended to support these prophecies and the dogmatic positions of Christianity. This applies especially to the story of the virgin-birth, a legend which is common to almost all folk-heroes as indicating their superiority to the rest of their people (see E. S. Hartland, "Legend of Perseus," vol. i.). Combined with this is the inconsistent claim of Davidic descent through Joseph, two discrepant pedigrees being given (Matt. i., Luke iii.).

Perhaps the most remarkable thing about the life of Jesus as presented in the Gospels is the utter silence about its earlier phases. He was one of a rather large family, having four brothers, Jacob, Jose, Simon, Judah, besides sisters. It is known that he earned his living by his father's trade, that of a carpenter; according to Justin Martyr, plows and yokes made by Jesus were still in existence at his (Justin's) time, about the year 120 ("Dial. cum Tryph." § 88). It is doubtful whether he received any definite intellectual training, the great system of Jewish education not being carried into effect till after the destruction of Jerusalem (see Education). It is probable, however, that he could read; he was certainly acquainted, either by reading or by oral instruction, with much of the Old Testament; and his mode of argumentation often resembles that of the contemporary rabbis, implying that he had frequented their society. In defending his infringement of the Sabbath he seems to have confused Abiathar with Ahimelech (ii. 25; comp. I Sam. xxi. 1), if this is not merely a copyist's blunder. It would appear from his interviews with the scribe (xii. 29-31; comp. Luke x. 27) and with the rich young man (x. 19) that he was acquainted with the Didache in its Jewish form, accepting its teachings as summing up the whole of Jewish doctrine. Only a single incident of his early days is recorded: his behavior about the time of his bar miẓwah (or confirmation) in the Temple (Luke ii. 41-52). It is strange that so masterful a character showed no signs of its exceptional qualities before the turning-point of Jesus' career.

Influence of John the Baptist.

The crisis in Jesus' life came with John the Baptist's preaching of repentance and of the nearness of the kingdom of God. At first Jesus refused to submit to baptism by John. According to a well-authenticated tradition of the "Gospel According to the Hebrews," he asked wherein he had sinned that it was necessary for him to be baptized by John. Nevertheless the sight of the marked influence exercised by the latter evidently made a profound impression on the character of Jesus: he probably then experienced for the first time the power of a great personality upon crowds of people.

It is at this moment of his life that Christian legend places what is known as the temptation, information concerning which, from the very nature of the case, could have been communicated only by Jesus himself. In the "Gospel According to the Hebrews" account this is given in the form: "My mother, the Holy Spirit, took me just now by one of my hairs and carried me up to the great Mount Tabor" (which was in the neighborhood of his home). As Jerome remarks (on Isa. xl. 9), the form of this saying implies a Hebrew (or rather Aramaic) original ("Ruḥa Ḳaddisha"); and for this reason, among others, the saying may be regarded as a genuine one. It is significant as implying two things: (1) the belief of Jesus in a special divine origin of his spirit, and (2) a tendency to ecstatic abstraction. This tendency is found in other great leaders of men, like Socrates, Mohammed, and Napoleon, being accompanied in their cases by hallucinations; auditory in the first case (the "demon" of Socrates), and visual in the last two (Mohammed's dove and Napoleon's star). These periods of ecstasy would tend to confirm in Oriental minds the impression that the subject of them was inspired (comp. the original meaning of "nabi"; see Prophet), and would add to the attractive force of a magnetic personality.

In Jesus' family and among his neighbors the effect seems to have been different. His own people regarded him even as being out of his mind (iii. 21), and they do not appear to have been associated with him or with the Christian movement until after his death. Jesus himself seems to have been greatly incensed at this (comp. vi. 4), refusing to recognize any special relationship even to his mother (iii. 33; comp. John ii. 4), and declaring that spiritual relationship exceeded a natural one (iii. 35). He felt perforce driven out into public activity; and the feverish excitement of the succeeding epoch-making ten months implies a tension of spirit which must have confirmed the impression of inspiration. On the whole subject see O. Holtzman, "War Jesus Ekstatiker?" (Leipsic, 1902), who agrees that there must have been abnormal mental processes involved in the utterances and behavior of Jesus.

Instead, however, of remaining in the wilderness like John, or like the Essenes, with whose tendencies his own show some affinity, he returned to his native district and sought out those whom he wished to influence. Incidentally he developed a remarkable power of healing; one sick of a fever (i. 29-34), a leper (i. 40-45), a paralytic (ii. 1-12), and an epileptic (ix. 15-29) being severally cured by him. But his activity in this regard was devoted especially to "casting out demons," *i.e.*, according to the folk-medicine of the time, healing nervous and mental diseases. It would appear that Jesus shared in the current belief of the Jews in the noumenal existence of demons or evil spirits; and most of his miraculous cures consisted in casting them out, which he did with "the finger of God" (Luke xi. 20), or with "the Spirit of God" (Matt. xii. 28). It would seem also that he regarded diseases like fever to be due to the existence of demons (Luke iv. 39). One of the chief functions transmitted to his disciples was the "power over unclean spirits, to cast them out" (Matt. x. 1), and his superiority to his followers was shown by his casting out demons which they had failed to expel (ix. 14-

His Belief in Demonology.

29). As regards the miracle in which Jesus cast out a demon or several demons whose name was "Legion" into some Gadarene swine (v. 1–21), it has recently been ingeniously suggested by T. Reinach that the name "Legion" given to the spirits was due to the popular confusion between the Tenth Legion (the sole Roman garrison of Palestine between the years 70 and 135) and the wild boar which appeared as the insignia on its standard ("R. E. J." xlvii. 177). From this it would seem that the legend arose, at any rate in its present form, after the destruction of Jerusalem, at which time alone the confusion between the title "legion" and the insignia could have occurred. For a full account of the subject see F. C. Conybeare in "J. Q. R." viii. 587–588, and compare Demonology.

It is difficult to estimate what amount of truth exists in the accounts of these cures, recorded about forty years after their occurrence; but doubtless the mental excitement due to the influence of Jesus was often efficacious in at least partial or temporary cures of mental illnesses. This would tend to confirm the impression, both among those who witnessed the cures and among his disciples, of his possession of supernatural powers. He himself occasionally deprecated the exaggeration to which such cures naturally led. Thus in the case of Jairus' daughter (v. 35–43) he expressly declared: "She is not dead, but sleepeth" (39). Notwithstanding this, her resuscitation was regarded as a miracle.

In essentials Jesus' teaching was that of John the Baptist, and it laid emphasis on two points: (1) repentance, and (2) the near approach of the kingdom of God. One other point is noted by Christian theologians as part of his essential teaching, namely, insistence upon the fatherhood of God. This is such a commonplace in the Jewish liturgy and in Jewish thought that it is scarcely necessary to point out its essentially Jewish character (see Father). As regards repentance, its specifically Jewish note has been recently emphasized by C. G. Montefiore ("J. Q. R." Jan., 1904), who points out that Christianity lays less stress upon this side of religious life than Judaism; so that in this direction Jesus was certainly more Jewish than Christian.

As regards the notion of the "kingdom of heaven," the title itself ("malkut shamayim") is specifically Jewish; and the content of the concept is equally so (see Kingdom of God). Jesus seems to have shared in the belief of his contemporaries that some world-catastrophe was at hand in which this kingdom would be reinstated on the ruins of a fallen world (ix. 1; comp. xiii. 35–37 and Matt. x. 23).

Almost at the beginning of his evangelical career Jesus differentiated himself from John the Baptist in two directions: (1) comparative neglect of the Mosaic or rabbinic law; and (2) personal attitude toward infractions of it. In many ways his attitude was specifically Jewish, even in directions which are usually regarded as signs of Judaic narrowness. Jesus appears to have preached regularly in the synagogue, which would not have been possible if his doctrines had been recognized as being essentially different from the current Pharisaic beliefs. In his preaching he adopted the popular method of "mashal," or Parable, of which about thirty-one examples are instanced in the synoptic Gospels, forming indeed the larger portion of his recorded teachings. It is obvious that such a method is liable to misunderstanding; and it is difficult in all cases to reconcile the various views that seem to underlie the parables. One of these parables deserves special mention here, as it has obviously been changed, for dogmatic reasons, so as to have an anti-Jewish application. There is little doubt that J. Halevy is right ("R. E. J." iv. 249–255) in suggesting that in the parable of the good Samaritan (Luke x. 17–37) the original contrast was between the priest, the Levite, and the ordinary Israelite—representing the three great classes into which Jews then and now were and are divided. The point of the parable is against the sacerdotal class, whose members indeed brought about the death of Jesus. Later, "Israelite" or "Jew" was changed into "Samaritan," which introduces an element of inconsistency, since no Samaritan would have been found on the road between Jericho and Jerusalem (*ib.* 30).

Jewish Characteristics.

While the aim of Jesus was to redeem those who had strayed from the beaten path of morality, he yet restricted his attention and that of his followers to the lost sons of Israel (vii. 24). He particularly forbade his disciples to seek heathens and Samaritans (x. 5), and for the same reason at first refused to heal the Syrophenician woman (vii. 24). His choice of twelve apostles had distinct reference to the tribes of Israel (iii. 13–16). He regarded dogs and swine as unholy (Matt. vii. 6). His special prayer is merely a shortened form of the third, fifth, sixth, ninth, and fifteenth of the Eighteen Benedictions (see Lord's Prayer). Jesus wore the Ẓiẓit (Matt. ix. 20); he went out of his way to pay the Temple tax of two drachmas (*ib.* xvii. 24–27); and his disciples offered sacrifice (*ib.* v. 23–24). In the Sermon on the Mount he expressly declared that he had come not to destroy the Law, but to fulfil it (*ib.* v. 17, quoted in Shab. 116b), and that not a jot or tittle of the Law should ever pass away (*ib.* v. 18; comp. Luke xvi. 17). It would even appear that later tradition regarded him as scrupulous in keeping the whole Law (comp. John viii. 46).

Attitude Toward the Law.

Yet in several particulars Jesus declined to follow the directions of the Law, at least as it was interpreted by the Rabbis. Where John's followers fasted, he refused to do so (ii. 18). He permitted his followers to gather corn on the Sabbath (ii. 23–28), and himself healed on that day (iii. 1–6), though the stricter rabbis allowed only the saving of life to excuse the slightest curtailment of the Sabbath rest (Shab. xxii. 6). In minor points, such as the ablution after meals (vii. 2), he showed a freedom from traditional custom which implied a break with the stricter rule of the more rigorous adherents of the Law at that time. His attitude toward the Law is perhaps best expressed in an incident which, though recorded in only one manuscript of the Gospel of Luke (vi. 4, in the Codex Bezæ), bears internal signs of genuineness. He is there reported to have met a man laboring on the Sabbath-day—a sin deserving of death by stoning, according to the Mosaic law. Jesus said to the man: "Man, if thou knowest what thou doest, blessed art thou; but if thou knowest not, accursed art thou, and a transgressor of the Law." According to this, the Law should be obeyed unless a higher principle intervenes.

While claiming not to infringe or curtail the Law, Jesus directed his followers to pay more attention to the intention and motive with which any act was done than to the deed itself. This was by no means a novelty in Jewish religious development: the Prophets and Rabbis had continuously and consistently insisted upon the inner motive with which pious deeds should be performed, as the well-known passages in Isa. i. and Micah vi. sufficiently indicate. Jesus contended that the application of this principle was practically equivalent to a revolution in spiritual life; and he laid stress upon the contrast between the old Law and the new one, especially in his Sermon on the Mount. In making these pretensions he was following a tendency which at the period of his career was especially marked in the Hasidæans and Essenes, though they associated it with views as to external purity and seclusion from the world, which differentiated them from Jesus. He does not appear, however, to have contended that the new spirit would involve any particular change in the application of the Law. He appears to have suggested that marriages should be made permanent, and that divorce should not be allowed (x. 2-12). In the Talmud it is even asserted that he threatened to change the old law of primogeniture into one by which sons and daughters should inherit alike (Shab. 116a); but there is no evidence for this utterance in Christian sources. Apart from these points, no change in the Law was indicated by Jesus; indeed, he insisted that the Jewish multitude whom he addressed should do what the Scribes and Pharisees commanded, even though they should not act as the Scribes acted (Matt. xxiii. 3). Jesus, however, does not appear to have taken into account the fact that the Halakah was at this period just becoming crystallized, and that much variation existed as to its definite form; the disputes of the Bet Hillel and Bet Shammai were occurring about the time of his maturity.

It is, however, exaggerated to regard these variations from current practises as exceptionally abnormal at the beginning of the first century. The existence of a whole class of 'Am ha-Areẓ, whom Jesus may be taken to represent, shows that the rigor of the Law had not yet spread throughout the people. It is stated (iii. 7) that, owing to the opposition aroused by his action on the Sabbath, Jesus was obliged to flee into heathen parts with some of his followers, including two or three women who had attached themselves to his circle. This does not seem at all probable, and is indeed contradicted by the Gospel accounts, which describe him, even after his seeming break with the rigid requirements of the traditional law, as lodging and feasting with the Pharisees (Luke xiv.), the very class that would have objected to his behavior.

Nothing in all this insistence upon the spirit of the Law rather than upon the halakic development of it was necessarily or essentially anti-Jewish; but the tone adopted in recommending these variations was altogether novel in Jewish experience. The Prophets spoke with confidence in the truth of their message, but expressly on the ground that they were declaring the word of the Lord. Jesus adopted equal confidence; but he emphasized his own authority apart from any vicarious or deputed power from on high. Yet in doing so he did not—at any rate publicly—ever lay claim to any authority as attaching to his position as Messiah. Indeed, the sole evidence in later times of any such claim seems to be based upon the statement of Peter, and was intimately connected with the personal demand of that apostle to be the head of the organization established by or in the name of Jesus. It is expressly stated (Matt. xvi. 20) that the disciples were admonished not to make public the claim, if it ever was made. Peter's own pretensions to succession in the leadership appear to be based upon a half-humorous paronomasia made by Jesus, which finds a parallel in rabbinic literature (Matt. xvi. 18; comp. Yalk., Num. 766).

Tone of Authority.

Indeed, the most striking characteristics of the utterances of Jesus, regarded as a personality, were the tone of authority adopted by him and the claim that spiritual peace and salvation were to be found in the mere acceptance of his leadership. Passages like: "Take my yoke upon you . . . and ye shall find rest unto your souls" (Matt. xi. 29); "whosoever shall lose his life for my sake . . . shall save it" (viii. 35); "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me" (Matt. xxv. 40), indicate an assumption of power which is certainly unique in Jewish history, and indeed accounts for much of modern Jewish antipathy to Jesus, so far as it exists. On the other hand, there is little in any of these utterances to show that they were meant by the speaker to apply to anything more than personal relations with him; and it might well be that in his experience he found that spiritual relief was often afforded by simple human trust in his good-will and power of direction.

This, however, raises the question whether Jesus regarded himself as in any sense a Messiah or spiritual ruler; and there is singularly little evidence in the synoptic Gospels to carry out this claim. These assert only that the claim was made to some of the disciples, and then under a distinct pledge of secrecy. In the public utterances of Jesus there is absolutely no trace of the claim (except possibly in the use of the expression "Son of Man"). Yet it would almost appear that in one sense of the word Jesus regarded himself as fulfilling some of the prophecies which were taken among contemporary Jews as applying to the Messiah. It is doubtful whether it was later tradition or his own statements that identified him with the servant of Yhwh represented in Isa. liii.; but there appears to be no evidence of any Jewish conception of a Messiah suffering through and for his people, though there possibly was a conception of one suffering together with his people (see Messiah). Jesus himself never used the term "Messiah." He chose for specific title "Son of Man," which may possibly have been connected in his mind with the reference in Dan. vii. 13, but which, according to modern theologians, means simply man in general. In his own mind, too, this may have had some reference to his repudiation by his family. In other words, Jesus regarded himself as typically human, and claimed authority and regard in that aspect. He certainly disclaimed any application to himself of the ordinary conception of the Messiah, the Davidic descent of whom he argues against (xii. 35–57) entirely in the Talmudic manner.

No New Organization Contemplated.

It is difficult to decide the question whether Jesus contemplated a permanent organization to carry out his ideals. The whole tendency of his work was against the very idea of organization. His practical acceptance of the Law would seem to imply an absence of any rival mode of life; and his evident belief in an almost immediate reconstruction of the whole social and religious order would tend to prevent any formal arrangements for a new religious organization. The opposition between his followers and the "world," or settled and organized conditions of society, would also seem to imply that those who were to work in his spirit could not make another "world" of their own with the same tendency to conventionality and spiritual red tape. On the whole, it may be said that he did not make general plans, but dealt with each spiritual problem as it arose. "It would almost seem as if he had no consciousness of a mission of any definite sort, so content had he been to let things merely happen" (E. P. Gould, "St. Mark," p. lxxv.): that is certainly how his career strikes an outside observer. He was content to let the influence of his own character work upon the persons immediately surrounding him, and that they should transmit this influence silently and without organization; working by way of leaven, as his parable puts it (Matt. xiii.). His chief work and that of his disciples consisted in the conscious attempt at "saving souls." Jesus was justified in thinking that this new departure would tend to bring dissension rather than peace into families, dividing sons and parents (*ib.* x. 53).

On the character which, whether designedly or otherwise, produced such momentous influence on the world's history, it is unnecessary in this place to dilate. The reverential admiration of the greater part of the civilized world has for a millennium and a half been directed toward the very human and sympathetic figure of the Galilean Jew as presented in the Gospels. For historic purposes, however, it is important to note that this aspect of him was shown only to his immediate circle. In almost all of his public utterances he was harsh, severe, and distinctly unjust in his attitude toward the ruling and well-to-do classes. After reading his diatribes against the Pharisees, the Scribes, and the rich, it is scarcely to be wondered at that these were concerned in helping to silence him. It must also be remembered that in his public utterances he rarely replied directly to any important question of principle, but evaded queries by counter-queries. In considering his public career, to which attention must now be turned, these two qualities of his character have to be taken into account.

During the ten months which elapsed between the ripening of the corn about June of the year 28 and his death in March or April of the following year Jesus appears to have wandered about the northwest shore of Lake Gennesaret, making excursions from time to time into the adjacent heathen territories, and devoting himself and his disciples to the spread of John the Baptist's message of the nearness of the kingdom of heaven and of the need of repentance in order to enter it. The details of these wanderings are very obscure, and need not be discussed here (see Briggs, "New Light on the Life of Jesus," New York, 1904).

The antinomianism of Jesus became more evident to the rulers of the people; and many of the more religious classes avoided contact with him. He had from the beginning laid stress upon the difficulty of associating sanctity with riches; and in this he adopted the quasi-socialistic views of the later Psalms, Ps. ix., x., xxii., xxv., xxxv., xl., lxix., cix. (comp. I. Loeb, "La Littérature des Pauvres dans la Bible," Paris, 1894). He insisted to the fullest extent on the view implied in those Psalms and in various utterances of the Prophets, that poverty and piety, riches and antisocial greed, were practically synonymous (comp. the form of the beatitudes given in Luke vi. 20, 24–26). The parable of Lazarus and Dives and the interview with the rich young man show a distinct and one-sided tendency in this direction similar to that of the later Ebionites; though, on the other hand, Jesus was willing to lodge with Zacchæus, a rich publican (Luke xix. 2, 5). In the form of the interview with the rich young man given in the "Gospel According to the Hebrews," sympathy seems to be restricted to the poor of the Holy Land: "Behold, many of thy brethren, sons of Abraham, are clothed but in dung, and die for hunger, while thy house is full of many goods, and there goeth not forth aught from it unto them."

Jesus in Jerusalem.

As the Passover of the year 29 approached, Jesus determined to carry out the injunction of the Law which made it incumbent to eat the sacrificial lamb at Jerusalem. In the later tradition attempts were made to convey the impression that Jesus was aware of the fate that awaited him at Jerusalem: but in the earliest forms (ix. 32, x. 32) it is recognized that the disciples did not understand the vague hints, if they were at all given; and there is little to show that his visit to Jerusalem was a case of sublime suicide. At the last moment at Gethsemane he made an attempt to avoid arrest ("Rise up, let us go," xiv. 42). Jerusalem at this time appears to have been in a very unsettled state. An attempted revolution seems to have broken out under one Jesus bar Abbas, who had been captured and was in prison at the time (xv. 7). It appears to have been the practise of Pontius Pilate to come up to Jerusalem each year at Passover for the purpose of checking any revolt that might break out at that period recalling the redemption of Israel. It is indicative of the temper of the people that during the first half of the first century several risings occurred against the Romans: against Varus, 4 B.C.; under Judas against the Census, 6 C.E.; by the Samaritans against Pilate in 38; and by Theudas against Fadus in 45—all indicating the continuously unsettled condition of the people under Roman rule.

As far as can be judged, his reception was as much a surprise to Jesus as it was to his followers and to the leaders of the people. His reputation as a miracle-worker had preceded him; and when the little cavalcade of some twenty persons which formed his escort approached the Fountain Gate of Jerusalem he was greeted by many of the visitors to the city as if he were the long-hoped-for deliverer from bondage. This would appear to have been on the first day of the week and on the 10th of Nisan, when, according to the Law, it was necessary that the paschal lamb should be purchased. It is therefore probable that the entry into Jerusalem was for this purpose. In making the purchase of the lamb a dispute appears to have arisen between Jesus' followers and the money-changers who arranged for such purchases; and the latter were, at any rate for that day, driven from the Temple precincts. It would appear from Talmudic references that this action had no lasting effect, if any, for Simon ben Gamaliel found much the same state of affairs much later (Ker. i. 7) and effected some reforms (see Derenbourg in "Histoire de la Palestine," p. 527). The act drew public attention to Jesus, who during the next few days was asked to define his position toward the conflicting parties in Jerusalem. It seemed especially to attack the emoluments of the priestly class, which accordingly asked him to declare by what authority he had interfered with the sacrosanct arrangements of the Temple. In a somewhat enigmatic reply he placed his own claims on a level with those of John the Baptist—in other words, he based them on popular support. Other searching questions put to him by the Sadducees and the Scribes received somewhat more definite answers. On the former asking what evidence for immortality he derived from the Old Testament, he quoted Ex. iii. 6, and deduced from it that as God is God of the living, Abraham, Isaac, and Jacob must have been living after their death—a deduction quite in the spirit of Talmudic ASMAKTA (comp. Sanh. 90b).

In the Temple.

To a scribe asking him (in the spirit of Hillel) to what single commandment the whole Law could be reduced, he quoted the doctrine of the Didache, which gives the two chief commandments as the Shema' (Deut. vi. 4) and "Thou shalt love thy neighbor as thyself" (Lev. xviii. 19), thus declaring the essential solidarity of his own views with those of the Old Testament and of current Judaism. But the most crucial test was put to him by certain of the adherents of Herod, who asked him whether it was lawful to pay tribute to Cæsar. Here again he scarcely answered directly, but, asking for a denarius of tribute, deduced from the image and superscription thereon the conclusion that it ought to be returned unto Cæsar (Matt. xxii. 21). A very probable tradition, retained in Tatian's "Diatessaron," declares that the colloquy with Peter recorded in Matt. xvii. 24-26 occurred on this occasion. Neither the original answer nor his further defense of it was satisfactory to the Zealots, who were anxious for an uprising against the Romans. He had made it clear that he had no sympathy with the nationalistic aspirations of the common people, though they had welcomed him under the impression that he was about to realize their hopes. It is only this incident which accounts historically for the contrast between the acclamations of Palm Sunday and the repudiation on the succeeding Friday.

The Test of the Tribute.

This change of popular sentiment cleared the way for action by the priestly class, which had been offended in both pride and pocket by Jesus' action in clearing the purlieus of the Temple. They may have also genuinely feared a rising under Jesus, having in view the manner in which he had been welcomed on the previous Sunday, though this was possibly brought forward merely as a pretext. It would appear that they determined to seize him before the Feast of the Passover, when the danger of an outbreak would be at its greatest height and when it would be impossible for them to hold a court (Yom-Ṭob v. 2).

According to the synoptic Gospels, it would appear that on the Thursday evening of the last week of his life Jesus with his disciples entered Jerusalem in order to eat the Passover meal with them in the sacred city; if so, the wafer and the wine of the mass or the communion service then instituted by him as a memorial would be the unleavened bread and the unfermented wine of the SEDER service (see Bickell, "Messe und Pascha," Leipsic, 1872). On the other hand, the Gospel of John, the author of which appears to have had access to some trustworthy traditions about the last days, represents the priests as hurrying on the trial in order to avoid taking action on the festival—which would, according to this, have begun on Friday evening—though this view may have been influenced by the desire to make the death of Jesus symbolize the sacrifice of the paschal lamb. Chwolson ("Das Letzte Passahmal Christi," St. Petersburg, 1893) has ingeniously suggested that the priests were guided by the older Halakah, according to which the law of the Passover was regarded as superior to that of the Sabbath, so that the lamb could be sacrificed even on Friday night; whereas Jesus and his disciples would seem to have adopted the more rigorous view of the Pharisees by which the paschal lamb ought to be sacrificed on the eve of the 14th of Nisan when the 15th coincided with the Sabbath (see Bacher in "J. Q. R." v. 683-686).

The Last Supper.

It would seem that by this time Jesus had become aware of the intention of the high priests to do him harm; for after the Seder ceremony he secreted himself in the Garden of Gethsemane outside the city walls, where, however, his hiding-place was betrayed by one of his immediate followers, Judas, a man of Kerioth (see JUDAS ISCARIOT). On what grounds Jesus was arrested is not quite clear. Even if he had claimed to be the Messiah, he would have committed no crime according to Jewish law. It appears that he was taken first to the house of the high priest, probably Anan's, which was without the walls, and where in a hurried consultation the only evidence against him was apparently an assertion that he could overthrow the Temple and replace it with one made without hands—in other words, with a spiritual kingdom. This, according to Holtzmann ("Leben Jesu," p. 327), was equivalent to a claim to the Messiahship. Jesus is reported to have distinctly made this claim in answer to a direct question by the high priest; but the synoptic Gospels vary on this point, xiv. 62 making the claim, and Matt. xxvi. 64 and Luke xxii. 69 representing an evasion, which was more in accord with the usual practise of Jesus when questioned by opponents. The rending of his clothes by the high priest seems rather to imply that the charge was one of "gidduf" or blasphemy (Sanh. vii. 10, 11).

There could be no question of anything corresponding to a trial taking place on this occasion before the Sanhedrin. Whatever inquest was made must have occurred during the Thursday night and outside Jerusalem (for on entering the city a prisoner would have had to be given up to the Roman garrison), and can not have been held before a quorum of the seventy-one members of the Sanhedrin. It is more probable that the twenty-three members of the priestly section of the latter, who had most reason to be offended with Jesus' action in cleansing the Temple, met informally after he had been seized, and elicited sufficient to justify them in their own opinion in delivering him over to the Romans as likely to cause trouble by his claims or pretensions to the Messiahship, which, of course, would be regarded by them as rebellion against Rome. Nothing corresponding to a Jewish trial took place, though it was by the action of the priests that Jesus was sent before Pontius Pilate (see Crucifixion). The Gospels speak in the plural of the high priests who condemned him—a seeming contradiction to Jewish law which might throw doubt upon their historic character. Two, however, are mentioned, Joseph Caiaphas and Annas (Hanan), his father-in-law. Hanan had been deposed from the high-priesthood by Valerius Gratus, but he clearly retained authority and some prerogatives of the high priest, as most of those who succeeded him were relatives of his; and he may well have intervened in a matter touching so nearly the power of the priests. According to the Talmud, Hanan's bazaars were on the Mount of Olives, and probably therefore also his house; this would thus have become the appropriate place for the trial by the Sanhedrin, which indeed just about this time had moved its place of session thither (see Sanhedrin).

The Crucifixion.

In handing over their prisoner to the procurator, Pontius Pilate, the Jewish officials refused to enter the pretorium as being ground forbidden to Jews. They thereby at any rate showed their confidence in the condemnation of Jesus by the Roman power. Before Pilate the sole charge could be attempted rebellion against the emperor. In some way, it would appear, the claim to be king of the Jews (or possibly of a kingdom of heaven) was made before him by Jesus himself, as is shown by the inscription nailed up in derision on the cross. To Pilate the problem presented was somewhat similar to that which would present itself to an Indian official of to-day before whom a Mohammedan should be accused of claiming to be the Mahdi. If overt acts in a disturbed district had accompanied the claim, the official could scarcely avoid passing sentence of condemnation; and Pilate took the same course. But he seems to have hesitated: while condemning Jesus, he gave him a chance of life. It appears to have been the practise to grant to the Jewish populace the privilege of pardoning a prisoner on public holidays; and Pontius Pilate held out to the rabble surrounding the pretorium (for most responsible heads of families must have been at this time engaged in searching for leaven in their own homes) a choice between Jesus and the other Jesus (bar Abbas), who also had been accused of rebellion. The mob had naturally more sympathy for the avowed rebel than for the person who had recommended the payment of tribute. It chose Barabbas; and Jesus was left to undergo the Roman punishment of Crucifixion in company with two malefactors. He refused with some not overkindly words (Luke xxiii. 28–31) the deadening drink of frankincense, myrrh, and vinegar which the ladies of Jerusalem were accustomed to offer to condemned criminals in order that they might pass away in an unconscious state (Sanh. 43a). Whatever had been Jesus' anticipations, he bore the terrible tortures, due to the strain and cramping of the internal organs, with equanimity till almost the last, when he uttered the despairing and pathetic cry "Eloi, Eloi, lama sabachthani?" (the Aramaic form of Ps. xxii. 1, "My God, my God, why hast thou forsaken me?"), which showed that even his resolute spirit had been daunted by the ordeal. This last utterance was in all its implications itself a disproof of the exaggerated claims made for him after his death by his disciples. The very form of his punishment would disprove those claims in Jewish eyes. No Messiah that Jews could recognize could suffer such a death; for "He that is hanged is accursed of God" (Deut. xxi. 23), "an insult to God" (Targum, Rashi). How far in his own mind Jesus substituted another conception of the Messiah, and how far he regarded himself as fulfilling that ideal, still remain among the most obscure of historical problems (see Messiah).

Bibliography: Of the enormous literature relating to Jesus it is unnecessary to refer in this place to more than a few of the more recent works, which give in most cases references to their predecessors. On the sources the best work, at any rate in English, still remains E. A. Abbott's *Gospels* in *Encyc. Brit.* On the parallels with rabbinic sources: Lightfoot, *Horæ Talmudicæ* (best ed., Oxford, 1854); A. Wünsche, *Neue Beiträge zur Erläuterung der Evangelien aus Talmud und Midrasch*, Göttingen, 1878; G. H. Dalman, *The Words of Jesus*, Edinburgh, 1901. On the life of Jesus the best and most critical recent work is that of O. Holtzmann, *Leben Jesu*, Leipsic, 1901 (Eng. transl. London, 1904). W. Sanday, in Hastings, *Dict. Bible*, s.v., presents a moderate and candid estimate of the various aspects of the life from the orthodox Christian standpoint, and gives a critical bibliography to each section. A similar critical view, with a fuller account of the literature attached to each section, is given by Zöckler in Herzog-Hauck, *Real-Encyc.* s.v. With regard to the relation of the Law to Jesus, the Christian view is expressed by: Bousset, *Jesu Predigt in Ihrem Gegensatz zum Judentum*, Göttingen, 1892; G. H. Dalman, *Christianity and Judaism*, London, 1901. Of Jewish writers on Jesus may be mentioned: G. Solomon, *The Jesus of History*, London, 1880; H. Weinstock, *Jesus the Jew*, New York, 1902; J. Jacobs, *As Others Saw Him*, London, 1895. See also Polemics.

J.

——**In Theology:** Because the Gospels, while containing valuable material, are all written in a polemical spirit and for the purpose of substantiating the claim of the Messianic and superhuman character of Jesus, it is difficult to present an impartial story of his life. Nor is the composite picture of

Jesus drawn from the synoptic Gospels, such as is presented by modern Christian writers and in which the miraculous is reduced to the minimum, an approximation to the real Jesus. The Jesus of history was equally as remote from Paulinian antinomianism as from the antagonism to his own kinsmen which has been ascribed to him; the Pharisees having had no cause to hate and persecute him, nor had they given any cause for being hated by him even if their views differed from his (see New Testament).

It was not as the teacher of new religious principles nor as a new lawgiver, but as a wonder-worker, that Jesus won fame and influence among the simple inhabitants of Galilee in his lifetime; and it was due only to his frequent apparitions after his death to these Galilean followers that the belief in his resurrection and in his Messianic and divine character was accepted and spread. The thaumaturgic and eschatological views of the times must be fully considered, and the legendary lives of saints such as Onias, Ḥanina ben Dosa, Phinehas ben Jair, and Simeon ben Yoḥai in the Talmud, as well as the apocalyptic and other writings of the Essenes, must be compared before a true estimate of Jesus can be formed.

However, a great historic movement of the character and importance of Christianity can not have arisen without a great personality to call it into existence and to give it shape and direction. Jesus of Nazareth had a mission from God (see Maimonides, "Yad," Melakim, xi. 4, and the other passages quoted in Jew. Encyc. iv. 56 *et seq.*, *s.v.* Christianity); and he must have had the spiritual power and fitness to be chosen for it. The very legends surrounding his life and his death furnish proofs of the greatness of his character, and of the depth of the impression which it left upon the people among whom he moved.

Legends Concerning His Birth.

Some legends, however, are artificial rather than the natural product of popular fancy. To this category belong those concerning Jesus' birthplace. The fact that Nazareth was his native town—where as the oldest son he followed his father's trade of carpenter (Mark i. 9, vi. 3; comp. Matt. xiii. 55; John vii. 41)—seemed to be in conflict with the claim to the Messiahship, which, according to Micah v. 1 (A. V. 2) (comp. John vii. 42; Yer. Ber. ii. 5a; Lam. R. i. 15), called for Beth-lehem of Judah as the place of his origin; hence, the two different legends, one in Luke i. 26, ii. 4, and the other in Matt. ii. 1–22, where the parallel to Moses (comp. Ex. iv. 19) is characteristic. In support of the Messianic claim, also, the two different genealogies were compiled: the one, in Matt. i. 1–16, tracing Joseph's pedigree through forty-two generations back to Abraham, with a singular emphasis upon sinners and heathen ancestresses of the house of David (comp. Gen. R. xxiii., li., lxxxv.; Ruth R. iv. 7; Naz. 23b; Hor. 10b; Meg. 14b); the other, in Luke iii. 23–38, tracing it back to Adam as "the son of God" in order to include also the non-Abrahamic world. Incompatible with these genealogies, and of pagan origin (see Boeklen, "Die Verwandtschaft der Jüdisch-Christlichen mit der Parsichen Eschatologie," 1902, pp. 91–94; Holtzmann, "Hand-Commentar zum Neuen Testament," 1889, p. 32; Soltau, in "Vierteljahrschrift für Bibelkunde," 1903, pp. 36–40), is the story representing Jesus as the son of the Virgin Mary and of the Holy Ghost (taken as masculine, Matt. i. 20–23; Luke i. 27–35). So also the story of the angels and shepherds hailing the babe in the manger (Luke ii. 8–20) betrays the influence of the Mithra legend (Cumont, "Die Mysterien des Mithra," 1903, pp. 97, 147; "Zeitschrift für die Neutestamentliche Wissenschaft," 1902, p. 190), whereas the legend concerning the prophecy of the two Essene saints, Simeon and Anna, and the bar miẓwah story (Luke ii. 22–39, 40–50) have a decidedly Jewish character.

From the "Gospel According to the Hebrews" (Jerome, commentary on Matt. iii. 13, 16), it seems that Jesus was induced by his mother and brothers to go to John to be baptized in order to obtain the forgiveness of his sins; his vision, too, is there described differently (comp. Justin, "Dial. cum Tryph." lxxxviii., ciii.; Usener, "Religionsgeschichtliche Untersuchungen," 1889, pp. 1, 47; and Holy Spirit). Genuinely Jewish also is the legend which depicts Jesus as spending forty days with God among the holy "ḥayyot" (not "wild beasts," as rendered in Mark i. 13) without eating and drinking (comp. Ex. xxxiv. 28; Deut. ix. 9); and his encounter with Satan is similar to the one which Moses had in heaven (Pesiḳ. R. xx., based upon Ps. lxviii. 19; comp. Zoroaster's encounter with Ahriman [Zend Avesta, Vend., Fargard, xix. 1–9]) and to Buddha's with Mara (Köppen, "Die Religion des Buddha," 1857, i. 88, and R. Seydel, "Das Evangelium von Jesu," 1882, p. 156).

As Healer and Wonder-Worker.

When, after John's imprisonment, Jesus took up the work of his master, preaching repentance in view of the approach of the kingdom of God (Mark i. 14; Luke i. 79; comp. Matt. iii. 2, iv. 16–17), he chose as his field of operations the land around the beautiful lake of Gennesaret, with Capernaum as center, rather than the wilderness; and he had as followers Peter, Andrew, John, and others, his former companions (John i. 35–51; comp. Matt. iv. 18; Mark i. 16 with Luke v. 1). His chief activity consisted in healing those possessed with unclean spirits who gathered at the synagogues at the close of the Sabbath (Mark i. 32–34; Luke iv. 40). Wherever he came in his wanderings through Galilee and Syria the people followed him (Matt. iv. 23–24; xii. 15; xiv. 14, 34; xv. 30; xix. 1; Mark iii. 10; Luke vi. 17–19), bringing to him the sick, the demoniacs, epileptics, lunatics, and paralytics to be cured; and he drove out the unclean spirits, "rebuking" them (Matt. xvii. 18; Luke iv. 35, 39, 41; ix. 42; comp. "ga'ar" in Zech. iii. 2; Isa. l. 2; Ps. lxviii. 31 [A. V. 30]) with some magic "word" (Matt. viii. 8, 16; comp. "milla," Shab. 81b; Eccl. R. i. 8), even as he "rebuked" the wind and told the sea to stand still (Mark iv. 35 and parallels). At times he cured the sufferers by the mere touch of his hand (Mark i. 25; Matt. viii. 8, ix. 18–25), or by powers emanating from him through the fringes of his garment (*ib.* ix. 20, xiv. 36), or by the use of spittle put upon the affected organ, accompanying the operation with a whisper (Mark vii. 32, viii. 23; John ix. 1-11; comp. Sanh. 101a; Yer. Shab. xiv. 14d: Loḥesh and Roḳ). By the same exorcismal power he drove a whole legion of evil spirits, 2,000 in number, out of a maniac living in a cemetery (Josephus, "B. J." vii. 6, § 3; Sanh. 65b) and made them enter a herd of swine to be drowned in the adjacent lake (Luke viii. 26-39 and parallels; comp. Ta'an. 21b; Ḳid. 49b; B. Ḳ. vii. 7). It was exactly this Essenic practise which gained for him the name of prophet (Matt. xxi. 11, 46; Luke vii. 16, 39; xxiv. 19; John iv. 19). In fact, by these supernatural powers of his he himself believed that Satan and his hosts would be subdued and the kingdom of God would be brought about (Luke ix. 2, x. 18, xi. 20); and these powers he is said to have imparted to his disciples to be exercised only in connection with the preaching of the kingdom of God (Matt. ix. 35-x. 6; Mark vi. 7; Luke ix. 1-2). They are to him the chief proof of his Messiahship (Matt. xi. 2-19; Luke vii. 21-22). It was as the healer of physical pain that Jesus regarded himself "sent to the lost sheep of the house of Israel"; and in the same spirit he sent forth his disciples to perform cures everywhere, yet always excluding the heathen from such benefits (Matt. x. 6-8, xv. 22-28). Other miracles ascribed to Jesus, such as the feeding of the 5,000 and the 4,000 (Mark vi. 30-46, viii. 1-9, and parallels), have probably been suggested by the miracles of Moses, and the raising of the dead (Luke vii. 11-17, viii. 40-56; John xi. 1-46) by those of Elijah.

As Helper of the Poor and Forsaken.

While the Essenes in general were not only healers and wonder-workers but also doers of works of charity, there was aroused in Jesus, owing to his constant contact with suffering humanity, a deep compassion for the ailing and the forsaken (Matt. xiv. 14, xv. 32). With this there came to him the consciousness of his mission to bring good tidings to the poor (Luke iv. 16-30, vii. 22) and to break down the barrier which Pharisaism had erected between the Pharisees as the better class of society and the 'Am ha-Areẓ, the publicans and fallen ones (Matt. ix. 10-13, xi. 19, and parallels; Luke vii. 36-50). This was a great departure from Essenism, which, in order to attain a higher degree of pharisaic sanctity, kept its adherents entirely apart from the world, in order that they might not be contaminated by it. Jesus, on the contrary, sought the society of sinners and fallen ones, saying, "They that are whole need not a physician, but they that are sick. I came not to call the righteous, but sinners to repentance" (Luke v. 31-32; comp. parallels). No wonder that, when performing his miracles, he was believed to be in league with Satan or Beelzebub, the spirit of uncleanness, rather than to be filled with the Holy Spirit (Mark iii. 22 and parallels). This anti-Essenic principle, once announced, emboldened him to allow the very women he had cured to accompany him and his disciples—in sharp contrast to all tradition (Luke viii. 1-3); and they repaid his regard with profound adoration, and subsequently were prominent at the grave and in the resurrection legend.

Another departure from pharisaic as well as Essenic practise was his permission to his disciples to eat with unwashed hands. When rebuked he declared: "Whatsoever from without entereth into the man can not defile him, but that which proceedeth out of the man [evil speech], that defileth the man" (Mark vii. 15 and parallels)—a principle which scarcely implied the Paulinian abrogation of the dietary laws, but was probably intended to convey the idea that "the profane can not defile the word of God" (Ber. 22a).

In another direction, also, Jesus in his practises as a physician was led to oppose the rigorists of his day. The old Hasidæan Sabbath laws were extremely severe, as may be seen from the last chapter of the Book of Jubilees; to these the Shammaites adhered, prohibiting healing on Sabbath. But there were also the Hillelites, who accepted liberal maxims, such as "Where a life is at stake the Sabbath law must give way" and "The Sabbath is handed over to you, not you to the Sabbath" (Mek., Ki Tissa). Jesus, following these latter, performed cures on the Sabbath (Mark ii. 27, iii. 1-16, and parallels; Luke xiii. 10-21, xiv. 1-8); but that the Pharisees should on this account have planned his destruction, as the Gospels record, is absurd. In fact, the compilers misunderstood the phrase "The son of man is lord of the Sabbath"—as if this abrogation of the Sabbath were the privilege of the Messiah—as well as the story of the plucking of grain by the disciples, which Luke (vi. 1) alone has preserved more correctly. It was not on the Sabbath, but on the first day of the second Passover week (called *δευτεροπρώτη* from the Biblical expression "the morrow of the Sabbath," Lev. xxiii. 11-14), when no new corn was allowed to be eaten before some had been offered on the altar, that the disciples of Jesus passed through the field and plucked the new corn, called "ḥadash" in rabbinical literature. In defending their action Jesus correctly referred to David, who ate of the holy bread because he was hungry (I Sam. xxi. 5-7)—an argument which would not at all apply to the Sabbath.

Man of the People; Not a Reformer.

Jesus spoke with the power of the Haggadists—compare, *e.g.*, "the men of little faith" (Soṭah 48b); "the eye that lusts, the hand that sins must be cut off" (Nid. 13b); "no divorce except for fornication" (Giṭ. 90b); "purity like that of a child" (Yoma 22a)—and not like the men of the Halakah (Luke iv. 32; comp. Matt. vii. 29, "not like the scribes"). He often opposed the legalism of the Halakists (Matt. xxiii. 9; Mark vii. 6-23), but he affirmed in forcible and unmistakable language the immutability of the Law (Matt. v. 17-19). The Sermon on the Mount, if this was ever delivered by him, was never intended to supplant the law of Moses, though the compiler of the Gospel of Matthew seeks to create that impression. Nor does any of the apostles or of the epistles refer to the new code promulgated by Jesus. As a matter of fact the entire New Testament teaching is based upon the Jewish Didache (see Seeberg, "Katechismus der Urchristenheit," 1903, pp. 1-44).

Only in order to be prepared for the kingdom of God, which he expected to come in the immediate

The Kingdom of God.

future and during the lifetime of his hearers (Matt. xvi. 28, xxiv. 42–44, xxv. 13), Jesus laid down especial rules of conduct for his disciples, demanding of them a higher righteousness and purity and a greater mutual love than the Pharisees practised (Matt. v. 20, xviii. 4–5). It was the Essenic spirit which dictated a life of voluntary poverty, of abstinence from marriage and domestic life, and of asceticism (Matt. xix. 12, 21–24, 29), as well as that principle of non-resistance to evil which the Talmud finds commendable in "the lovers of God" who "take insult and resent not" and shall in the life to come "shine like the sun" (Shab. 88b). The kingdom of God of which Jesus spoke had a decidedly political character, and all the apocalyptic writers so regard it. The Messiah with the twelve judges of the twelve tribes was expected to rule over the land (Matt. xvi. 27, xix. 28); the Judgment Day was to have its tortures of Gehenna for the wicked, and its banquet in Paradise for the righteous, to precede the Messianic time (Matt. viii. 11–12, xviii. 8–9; Luke xiii. 28–29, xiv. 15–24); the earth itself was to produce plenty of grapes and other fruit of marvelous size for the benefit of the righteous, according to Jesus' own statement to John (Papias, in Irenæus, "Adversus Hæreses," v. 33–34).

Often Jesus spoke of the "secrets" of the kingdom of God in allegories and enigmas (not "parables"; see Matt. xiii. 1–52; comp. ii. 35), "dark sayings" hidden from the foundation of the world (Ps. lxxviii. 2; John xvi. 25, 29), because they referred to the kingdom of Satan (Matt. xiii. 39)—that is, Rome—whose end was nigh. Of course such "secrets" were afterward turned into spiritual mysteries, too deep even for the disciples to comprehend, while simple words announcing the immediate nearness of the end were changed into phrases such as "The kingdom of God is within you" (Luke xvii. 21, for "among you"). On the other hand, the rabbinical phrase "the yoke of God's kingdom which liberates from the yoke of the kingdom of the worldly power" (Ab. iii. 5) is spoken of as "my yoke" and declared to be "easy" (Matt. xi. 29); for the allegory of the tares and the wheat (Matt. xiii.) used for the heathen and the Jews in the Judgment Day, comp. Midr. Teh. to Ps. ii. 12. Occasionally political strife, as a means of bringing about the catastrophe, is approved by Jesus (Luke xii. 51–53, xxii. 36; comp. verses 49–50).

His Death.

Like all the Essenes of his time (Tosef., Men. xiii. 21–23), Jesus was a sworn enemy of the house of the high priest Hanan. His indignation at seeing the Temple hill turned into a poultry- and cattle-market for the benefit of the arrogant hierarchy (Mark xi. 15–18) fired him into action against these "bazaars of the Hananites" (Derenbourg, "Histoire de la Palestine," p. 466), which he called with Jeremiah (vii. 1) "a den of thieves"; he seized the tables of the money-changers and drove their owners out of the Temple. Whether he had then actually claimed for himself the title of Messiah in order to be empowered to act thus, or whether he allowed the band of his followers to call him thus, it is certain that he laid no claim to the Messiahship before his entrance into Jerusalem (see Jew. Encyc. iv. 51, *s.v.* Christianity; Son of Man). According to the more authentic older records (Mark viii. 31, x. 33, xi. 18, xiv. 43, and parallels), he was seized by the high priests and the Sanhedrin, and was delivered over to the Roman authorities for execution. The high priests feared the Roman prefect (John xviii. 14); but the people clung to Jesus (Matt. xxvi. 5; Luke xix. 48, xxi. 38, xxiii. 27), and lamented over his death (Luke xxiii. 48). Later "the Pharisees" were added to the list of the persecutors of Jesus (Matt. xxii. 15; Mark xii. 13; John xviii. 3; and elsewhere), and the guilt of shedding his blood was laid upon the Jews, while the bloodthirsty tyrant Pontius Pilate was represented as having asserted Jesus' innocence (Matt. xxvii. 24; John xviii. 28–xix. 16). The term "heathen" or "Romans" was changed into "sinners" or "men" (Mark ix. 31, xiv. 41, and parallels), and the charge of rebellion against Rome with the implied instigation to refuse the tribute (Luke xxiii. 2) was put into the mouth of the Jewish authorities, whereas Jesus is represented as having declared: "My kingdom is not of this world" (John xviii. 36) and "Render to Cæsar the things that are Cæsar's" (Mark xii. 13–17 and parallels).

The Resurrection.

The story of the resurrection of Jesus is the natural consequence of the belief of his followers in his miraculous powers as the subduer of Satan. Indeed, it is stated that it was not he alone who arose from the grave, but that many saints arose with him (Matt. xxvii. 52) just as many saints in Jewish folk-lore overcame death (Shab. 55b; Mas. Derek Ereẓ, i.); and resurrection is the proof of the working of the Holy Spirit (Soṭah xv. 15; Cant. R., Introduction, 9; see Resurrection). The disciples and the women who had been his constant companions when he was alive beheld him in their entranced state as partaking of their meals and heard him address to them instruction and argumentation (Matt. xxviii. 9, 18–20; Luke xxiv. 27–49; John xx. 15–xxi. 23). Many apparitions of Jesus after his death were in the course of time related as having taken place during his lifetime. Thus the strange stories of his walking at night as a spirit upon a lake (Matt. xiv. 24–36; Luke ix. 28–36; and parallels), of his transfiguration and conversation with Moses and Elijah (Matt. xvii. 1–13), and others became current in those credulous times when all the Apostles had their visions and direct communications from their master, whom they beheld as "the Son of Man in the clouds" waiting for "his return with myriads of angels" to take possession of this earth. And so it came about that, consciously or unconsciously, the crystallized thought of generations of Essenes and entire chapters taken from their apocalyptic literature (Matt. xxiv.–xxv.) were put into the mouth of Jesus, the acme and the highest type of Essenism.

It was not the living but the departed Jesus that created the Church with Peter as the rock (Matt. xvi. 18); while, according to the Jewish Haggadah, Abraham was made the rock upon which God built His kingdom (Yalḳ., Num. 766). See Lord's Prayer; Lord's Supper; Sermon on the Mount.

K.

——**In Jewish Legend:** The Jewish legends in regard to Jesus are found in three sources, each independent of the others—(1) in New Testament apocrypha and Christian polemical works, (2) in the Talmud and the Midrash, and (3) in the life of Jesus ("Toledot Yeshu‘") that originated in the Middle Ages. It is the tendency of all these sources to belittle the person of Jesus by ascribing to him illegitimate birth, magic, and a shameful death. In view of their general character they are called indiscriminately legends. Some of the statements, as that referring to magic, are found among pagan writers and Christian heretics; and as the Ebionites, or Judæo-Christians, who for a long time lived together with the Jews, are also classed as heretics, conclusions may be drawn from this as to the origin of these legends.

It ought also to be added that many of the legends have a theological background. For polemical purposes, it was necessary for the Jews to insist on the illegitimacy of Jesus as against the Davidic descent claimed by the Christian Church. Magic may have been ascribed him over against the miracles recorded in the Gospels; and the degrading fate both on earth and hereafter of which the legends speak may be simply directed against the ideas of the assumption and the resurrection of Jesus. The Jewish legends relating to Jesus appear less inimical in character when compared with the parallel passages which are found in pagan authors and Christian sources, more especially as such legends are fixed and frequently occurring themes of folk-lore; and imaginations must have been especially excited by the historical importance which the figure of Jesus came to have for the Jews.

The earliest authenticated passage ascribing illegitimate birth to Jesus is that in Yeb. iv. 3. The mysterious phrase ("that man") cited in this passage as occurring in a family register which R. Simeon ben Azza is said to have found seems to indicate that it refers to Jesus (see Derenbourg in "R. E. J." i. 293), and here occur also the two expressions so often applied to Jesus in later literature—איש פלוני (= "that anonymous one," the name of Jesus being avoided) and ממזר (= "bastard"; for which in later times אותו איש was used). Such a family register may have been preserved at Jerusalem in the Judæo-Christian community.

Birth of Jesus.

The Jews, who are represented as inimical to Jesus in the canonical Gospels also, took him to be legitimate and born in an entirely natural manner. A contrary statement as to their attitude is expressed for the first time in the "Acts of Pilate" ("Gospel of Nicodemus," ed. Thilo, in "Codex Apoc. Novi Testamenti," i. 526, Leipsic, 1832; comp. Origen, "Contra Celsum," i. 28). Celsus makes the same statement in another passage, where he refers even to a written source (*ἀναγέγραπται*), adding that the seducer was a soldier by the name of Panthera (*l.c.* i. 32). The name "Panthera" occurs here for the first time; two centuries later it occurs in Epiphanius ("Hæres." lxxviii. 7), who ascribes the surname "Panther" to Jacob, an ancestor of Jesus; and John of Damascus ("De Orthod. Fide." iv., § 15) includes the names "Panther" and "Barpanther" in the genealogy of Mary. It is certain, in any case, that the rabbinical sources also regard Jesus as the "son of Pandera" (פנתירא, פנדירא, פנדרא), although it is noteworthy that he is called also "Ben Sṭada" (בן סטדא) (Shab. 104b; Sanh. 67a).

It appears from this passage that, aside from Pandera and Sṭada, the couple Pappus b. Judah and Miriam the hairdresser were taken to be the parents of Jesus. Pappus has nothing to do with the story of Jesus, and was only connected with it because his wife happened to be called "Miriam" (= "Mary"), and was known to be an adulteress.

The one statement in which all these confused legends agree is that relating to the birth of Jesus. Although this is ascribed only to the Jews, even in Celsus, the Jews need not necessarily be regarded as its authors, for it is possible that it originated among heretics inimical to Jesus, as the Ophites and Cainites, of whom Origen says "they uttered such hateful accusations against Jesus as Celsus himself did" ("Contra Celsum," iii. 13). It is probable, furthermore, that the accusation of illegitimacy was not originally considered so serious; it was ascribed to the most prominent personages, and is a standing motive in folk-lore (Krauss, "Leben Jesu," p. 214).

The incident of Jesus concerning the dispute with the Scribes was copied by the rabbinical sources (Kallah 18b [ed. Venice, 1528, fol. 41c]; comp. N. Coronel, "Comment. Quinque," p. 3b, Vienna, 1864, and "Batte Midrashot," ed. Wertheimer, iii. 23, Jerusalem, 1895). All the "Toledot" editions contain a similar story of a dispute which Jesus carried on with the Scribes, who, on the ground of that dispute, declared him to be a bastard. Analogous to this story are numerous tales of predictions by precocious boys.

Sojourn in Egypt.

The sojourn of Jesus in Egypt is an essential part of the story of his youth. According to the Gospels he was in that country in his early infancy, but Celsus says that he was in service there and learned magic; hence he was there in early manhood. This assumption may serve to throw more light on the obscure history of Jesus than the account found in the Gospels. The Talmud also says that Jesus was in Egypt in early manhood. R. Joshua b. Peraḥyah is said to have fled with his pupil Jesus to Alexandria in order to escape the persecutions of the Jewish king Yannai (103-76 B.C.); on their return Jesus made a remark on the not faultless beauty of their hostess, whereupon R. Joshua excommunicated him; and when Jesus approached him again and was not received he set up a brick for his god, and led all Israel into apostasy (Sanh. 107b; Soṭah 47a; Yer. Ḥag. 77d). This account is supplemented by the statement, made on the assumption that Ben Sṭada is identical with Ben Pandera, that Ben Sṭada brought magic from Egypt (Shab. 104b). The story that Joshua b. Peraḥyah, a contemporary of Simeon b. Sheṭaḥ, was the teacher of Jesus, is not clearly stated in the various "Toledot"; it is said merely that Jesus was named after this brother of his mother. The assumption that Joshua b. Peraḥyah was the uncle of Jesus is confirmed by Ḳirkisani, who wrote about 937 a history of Jewish sects (ed. Harkavy, § 1, St. Petersburg, 1894; comp. "J. Q. R." vii. 687). The references to Yannai, Salome Alexandra, and Joshua b. Peraḥyah indicate that according to the Jewish legends the advent of Jesus took place just one century before the actual historical date; and some medieval apologists for Judaism, as Naḥmanides and Salman Ẓebi, based on this fact their assertion that the "Yeshu'" mentioned in the Talmud was not identical with Jesus; this, however, is merely a subterfuge.

Jesus as Magician.

According to Celsus (in Origen, "Contra Celsum," i. 28) and to the Talmud (Shab. 104b), Jesus learned magic in Egypt and performed his miracles by means of it; the latter work, in addition, states that he cut the magic formulas into his skin. It does not mention, however, the nature of his magic performances (Tosef., Shab. xi. 4; Yer. Shab. 13d); but as it states that the disciples of Jesus healed the sick "in the name of Jesus Pandera" (Yer. Shab. 14d; 'Ab. Zarah 27b; Eccl. R. i. 8) it may be assumed that its author held the miracles of Jesus also to have been miraculous cures. Different in nature is the witchcraft attributed to Jesus in the "Toledot." When Jesus was expelled from the circle of scholars, he is said to have returned secretly from Galilee to Jerusalem, where he inserted a parchment containing the "declared name of God" ("Shem ha-Meforash"), which was guarded in the Temple, into his skin, carried it away, and then, taking it out of his skin, he performed his miracles by its means. This magic formula then had to be recovered from him, and Judah the Gardener (a personage of the "Toledot" corresponding to Judas Iscariot) offered to do it; he and Jesus then engaged in an aerial battle (borrowed from the legend of Simon Magus), in which Judah remained victor and Jesus fled.

The accusation of magic is frequently brought against Jesus. Jerome mentions it, quoting the Jews: "Magum vocant et Judæi Dominum meum" ("Ep. lv., ad Ascellam," i. 196, ed. Vallarsi); Marcus, of the sect of the Valentinians, was, according to Jerome, a native of Egypt, and was accused of being, like Jesus, a magician (Hilgenfeld, "Ketzergesch." p. 370, Leipsic, 1884). There were even Christian heretics who looked upon the founder of their religion as a magician (Fabricius, in "Codex Apocr. Novi Testamenti," iii. 396), and public opinion at Rome accused all Christians of magic (W. M. Ramsay, "The Church in the Roman Empire Before A.D. 170," pp. 236, 392, London, 1897). The Apostles were regarded in the same light ("Acta Petri et Andreæ," ed. Bonnet, § 8). Neither this accusation nor that concerning the birth of Jesus is found in the canonical Gospels, but it occurs in the apocryphal accounts; *e.g.*, "Gesta Pilati," ii. 1; "Acta Pilati," version B, ii. 3, iii. 1; *ib.* i. 1 (*μαγεῖαι*; comp. *γόης ἐστιν* = "he is a magician"); *ib.* in ed. Tischendorf, 2d ed., p. 216, "maleficus est"; *ib.* p. 338 ("Zeit. für die Neutest. Wissenschaft," 1901, iii. 94), with which comp. "veneficus" = "poisoner" ("Evang. Infantiæ Arab." ed. Thilo, § 36). Somewhat different is the accusation that Jesus imposed upon the people and led them astray (comp. Bischoff, "Ein Jüdisch-Deutsches Leben Jesu," p. 20, Leipsic, 1895: מרמה, often also מתעה, and in the Greek texts *πλανός*, *λαοπλανός*; comp. *πλανᾷ τὸν ὄχλον* = "he deceives the people"; John vii. 12). As Balaam the magician and, according to the derivation of his name, "destroyer of the people," was from both of these points of view a good prototype of Jesus, the latter was also called "Balaam."

The Disciples of Jesus.

Celsus (i. 62) says there were ten or eleven apostles. A passage of the Talmud (Sanh. 43a) ascribes five disciples to Jesus: "Matthai" (Matthew), "Nakai" (Luke), "Nezer" (Nazarene, a general designation for Christian in antiquity), "Boni" (probably the Nicodemus mentioned by John), and "Thoda" (Thaddæus). The following are mentioned in the "Toledot" (Huldricus, p. 35): "Simeon" (Peter), "Matthia" (Matthew), "Elikum" (Luke), "Mordecai" (Mark), "Thoda" (Thaddæus), and "Johannos" (John)—that is, the four evangelists plus Peter and Thaddæus. Paul is mentioned in another connection, and (p. 48) Judas "the betrayer": it is to be noted that the last-named does not occur at all in Talmudic legends. The Twelve Apostles are mentioned in other versions of the "Toledot" (ed. Wagenseil, p. 19; ed. Bischoff, p. 21), while still other versions frequently mention a following of 300, 310, 320, 330 men. It is especially striking that all these disciples are described as eminently wise and learned, while according to Celsus (i. 63, ii. 46) the disciples of Jesus were common men, toll-keepers and seamen, an assumption that agrees to some extent with the canonical Gospels.

The Doctrines of Jesus.

In all the editions of the "Toledot" the doctrine of Jesus is summed up in the statements that he was the son of God, born of a virgin mother, a descendant of David and the promised Messiah; this he proved from passages of Scripture, in the rabbinic-Talmudic manner. In connection with these statements he is also represented as engaging in disputations with Jewish scholars. The only specifically Christian doctrine mentioned by the Talmud is (Shab. 116a, b) that the law of Moses has been annulled and the Gospels put in its place—the well-known Christian doctrine of the abrogation of the Law; the saying of Jesus, "I have not come to take away the law of Moses, but to add to it," is also cited (*ib.*). In the "Toledot" the doctrine of abrogation is put into the mouth of Peter, and the latter, secretly intending to separate the Christians from the community in the interest of the Jews, promulgates the following tenets: Jesus suffered the pain and punishment of death in order to redeem from hell those that believe in him (comp. I Cor. xv. 26, 55); believers shall not hurt the Jews (comp. Acts iii. 26); one who deserves to be accompanied one mile only shall be accompanied two miles; both cheeks shall be offered if one cheek has been struck (comp. Matt. v. 39–41); instead of the Sabbath, Sunday shall be kept holy; Easter shall be celebrated instead of the Passover, Pentecost instead of the Feast of Weeks, etc.; circumcision is abrogated, and the dietary laws annulled. All these doctrines are merely external, while the essential points of the teachings of Jesus are hardly alluded to.

Jesus performed all his miracles by means of magic, as stated above. These miracles are not specified in the Talmud, but they are in the "Toledot"; they are partly such as are mentioned in the Gospels, as the healing of the halt, blind, and leprous, and are somewhat different in nature, though based on the Gospels, as the story of Jesus walking on the sea on a heavy millstone ("Toledot"—ed. Wagenseil, p. 14; ed. Huldricus, p. 43; ed. Bischoff, p. 25; MS. Adler, in Krauss, "Leben Jesu," p. 119; comp. Matt. xiv. 25, xviii. 6). Other miracles are derived from apocryphal accounts, as the story that Jesus fashioned birds from clay or marble and put life into them; this occurs also in the "Gospel of Thomas," in "Evang. Infantiæ Arab." § 36 (Thilo, *ib.* i. 111), and in the Koran. These legends are much amplified in the later "Toledot," although the substance remains the same.

Trial and Death of Jesus.

The Talmudic account of the manner of executing a person guilty of leading the people astray (Sanh. 67a) would be of signal historical importance if it were certain that it referred to Jesus. The proceeding against one who incites others to deny the religion of their fathers consists in convicting him of his guilt by means of concealed witnesses, as follows: The accused is placed in an inner room with a light, so that witnesses unknown to him and watching him from an outer room can see and hear him clearly. Then a companion says to him: "Tell me again what you told me in confidence [in regard to renouncing our religion]." If he does so, the other replies: "How could we leave our God in heaven and serve idols?" If he recants now, it is well; but if he says, "It is our duty and we must do it," then the witnesses outside take him into court and he is stoned. "Thus they did with Ben Sṭada at Lydda, who was hanged on the eve of the Passover." This passage refers to Jesus only if he is regarded as identical with Ben Sṭada; this can hardly be assumed in view of the reference to Lydda. The frequently repeated statement that Jesus was condemned for inciting to apostasy (מסית ומדיח) is based on Sanh. 43a; there is added the entirely improbable statement that forty days before the condemnation of Jesus a herald called upon any one who could say anything in his favor to come forward and testify, but that no one appeared.

The proceeding is related very differently in the "Toledot"; although the several editions of the same differ in detail they agree in substance. The following account is found in a rather old edition (see Krauss, *l.c.* pp. 43 *et seq.*). The scholars of Israel took Jesus into the synagogue of Tiberias and bound him to a pillar; when his followers came to liberate him, a battle occurred in which the Jewish party was worsted and his disciples took him to Antiochia. On the eve of Passover he entered Jerusalem riding on an ass (comp. Matt. xxi. 4-17), disguised—according to several editions—so that his former disciple Judas had to betray him in order to secure his seizure. He was executed on the eve of the Passover festival, which was also the eve of the Sabbath. The executioners were not able to hang him upon a tree, for he had conjured all trees, by means of the name of God, not to receive him, and therefore they all broke; he was finally received by a large cabbage-stalk (comp. Targ. Sheni to Esth. vii. 9). He was buried on the same day, in conformity with the Law, and the apostates, his disciples, wept at his tomb.

According to the "Toledot" his disciples sought for his body in the tomb, but being unable to find it they used the incident as proof before Queen Helena that he who had been slain had ascended into heaven. It then appeared that a man—sometimes called "Judas the Gardener" (Judas Iscariot), sometimes, indefinitely, the "master of the garden"—had taken the body out of the grave, used it as a dam to keep the water out of his garden, and had flooded the tomb. Then there was joy again in Israel; the body was taken before the queen at Jerusalem, and the Christians were shamed. Three points deserve notice in this account: (1) The fact that the body was stolen. According to Matt. xxvii. 64, the Pharisees asked Pilate to guard the tomb so that the disciples might not steal the body and say that Jesus had ascended into heaven; but when the report was nevertheless circulated that Jesus had ascended, the Pharisees bribed the soldiers to say that the body had been stolen by the disciples (Matt. xxviii. 13). The "Gospel of Nikodemus," § 13 (Thilo, *ib.* i. 616), adds that the Jews still persisted in this statement. A similar story is known to Justin ("Dial. cum Tryph." § 108; comp. § 17) and Eusebius ("Hist. Eccl." ch. iv. 18), while in the pseudo-Clementine "Recognitiones" (i., § 42) this assertion is ascribed to "others" (probably the Jews). (2) The statement of the theft of the body and the statement of the gardener who was afraid that the multitude of disciples might destroy his lettuce-beds were both known to Tertullian ("De Spectaculis," § 30). (3) The insult offered to the body in the streets of Jerusalem is alluded to in the Koran (see below).

The Resurrection.

It is clear, therefore, that the Jewish legends deny the resurrection of Jesus; the halakic assertion that Balaam (*i.e.*, the prototype of Jesus) had no part in the future life must also be especially noted (Sanh. x. 2). It is further said: "The pupils of the recreant Balaam inherit hell" (Abot v. 19). Jesus is accordingly, in the following curious Talmudic legend, thought to sojourn in hell. A certain Onḳelos b. Ḳaloniḳos, son of Titus' sister, desired to embrace Judaism, and called up from hell by magic first Titus, then Balaam, and finally Jesus, who are here taken together as the worst enemies of Judaism. He asked Jesus: "Who is esteemed in that world?" Jesus said: "Israel." "Shall one join them?" Jesus said to him: "Further their well-being; do nothing to their detriment; whoever touches them touches even the apple of His eye." Onḳelos then asked the nature of his punishment, and was told that it was the degrading fate of those who mock the wise (Giṭ. 56b-57a). This most revolting passage was applied in the Middle Ages to another Jesus (*e.g.*, by R. Jeḥiel, in the Paris disputation; "Wikkuaḥ," p. 4, Thorn, 1873). A parallel to the story is found in the statement of the "Toledot" that when Judas found he could not touch Jesus in any way in the aerial battle, he defiled him. This feature naturally especially angered Christians (see Wagenseil, "Tela Ignea Satanæ," p. 77). According to a passage in the Zohar (Steinschneider, "Polemische Litteratur," p. 362) the same degrading fate is meted out to both Jesus and Mohammed.

Legends regarding Jesus are found in Mohammedan folk-lore. Although the innocence of Mary is most emphatically asserted, there are such striking parallels to Jewish legends that this material must certainly have been taken from Judaism into the Koran. In that work, also, it is stated that Jesus formed birds out of clay and endowed them with life (sura iii. 43); both the Koran and Jalal al-Din (in Maracci, "Refutatio Alcorani," fol. 114b, Patavii, 1698) refer to the peculiar clothing worn by the disciples of Jesus; and in Ibn Said (Maracci, *l.c.* fol. 113b) is found the statement that the body of Jesus was dragged with ropes through the streets.

Karaites and Samaritans.

The cardinal point in the Jewish legends concerns the birth of Jesus. This question is discussed by both the Samaritans ("Chronique Samaritaine," ed. Neubauer, p. 18, Paris, 1873) and the Karaites, as may be seen in a recently published passage from the work of the Karaite Judah Hadassi ("J. Q. R." viii. 440). Other essential points are that Jesus performed his miracles by conjuring with the name of God (*ib.* viii. 436), and the legend appended to the "Toledot" editions regarding the finding of the cross (*ib.* viii. 438). The Karaites, however, had their own "Toledot." Meswi al-'Akkbari, the founder of a Karaite sect, engaged in similar polemics against the Christian doctrines ("R. E. J." xxxiv. 182).

Antichrist Legends.

The Jewish legends referring to Jesus can not be regarded as originally purely Jewish, because the Christian Antichrist legends also make use of them. The Antichrist is born of a wandering virgin, the latter being, according to one version, a Danitic, hence Jewish, woman, while the father belongs to the Latin race (corresponding to the Roman soldier Panthera). Similar details are found in the Armilus legend (Bousset, "Der Antichrist," p. 99, Göttingen, 1895; Krauss, "Das Leben Jesu," p. 216).

G. S. Kr.

JESUS B. PHABI: High priest (*c.* 30 B.C.). He was deposed by Herod the Great, his office being given to Simon, the son of Boethus, the king's father-in-law (Josephus, "Ant." xv. 9, § 3). Jesus' father's name in this passage of Josephus (ed. Niese) has the form *Φοαβι*; the same name was borne by the high priests Ishmael b. Phabi I. (*c.* 15 C.E.) and II. (*c.* 60 C.E.), and is found in rabbinical works (also פאבי, פיאבי, פואבי).

The name is probably Egyptian (see Parthey, "Aegyptische Personennamen," *s.v.* *Φαβίς*); hence the many variants in Greek as well as in Hebrew texts. It follows from this that Jesus b. Phabi was a native of Egypt, like his predecessor Hananeel (Parah iii. 5) and his successor Simon, who was of the family of the Boethusians.

JESUS SIRACH. See Sirach.

JESUS BEN ZAPPHA (perhaps **Zopha**; compare I Chron. vii. 35): General (*στρατηγός*) of Idumæa in the first century, appointed by the revolutionary government of Jerusalem after Cestius Gallus had been driven away. Jesus' companion was Eleazar b. Neos; and both belonged to high-priestly families (Josephus, "B. J." ii. 20, § 4). Niger of Peræa, who had been until then governor of Idumæa, was commanded to place himself under the orders of the two generals (*ib.*). Jesus is perhaps identical with a former high priest of the same name, who, together with other nobles, fled from Jerusalem to the Romans shortly before the destruction of the Temple (*ib.* vi. 2, § 2).

G. S. Kr.

JETHRO (יתרו; **Jether** [יתר] in Ex. iv. 18).—**Biblical Data:** Priest of Midian and father-in-law of Moses (Ex. iii. 1 *et al.*). In the account of the marriage of his daughter Zipporah to Moses (Ex. ii. 16-21), he is called "Reuel" (רעואל = "God is his friend"; see also Hobab). Happening one day to be at the well where Jethro's daughters were drawing water for their flocks, Moses had occasion to defend them against some shepherds who attempted to drive them away. Jethro, out of gratitude, gave him his daughter Zipporah. After Moses and the Israelites had crossed the Red Sea Jethro went to Moses with the latter's wife and two sons (Ex. xviii. 1-5). When Moses told Jethro of all the miracles done for the Israelites by Yhwh, Jethro, rejoicing, exclaimed, "Now I know that the Lord is greater than all gods," and offered burnt offerings and sacrifices. Jethro advised Moses to appoint deputies to assist him to judge the Israelites and render his burdens lighter. After this Jethro returned to his own country (Ex. xviii. 8-27).

E. G. H. M. Sel.

——**In Rabbinical Literature:** The different names of Jethro puzzled the Talmudists: some thought that his real name was "Hobab," and that Reuel was his father (see Hobab); others thought that his name was "Reuel," interpreting it "the friend of God" (see Jethro—Biblical Data, and comp. the view of some modern scholars, who hold that his name was "Reuel," and that "Jethro" was a title, "his Excellency"). According to Simeon b. Yoḥai, he had two names, "Hobab" and "Jethro" (Sifre, Num. 78). It is, however, gen-

His Names.

erally accepted that he had seven names: "Reuel," "Jether," "Jethro," "Hobab," "Heber," "Keni" (comp. Judges i. 16, iv. 11), and "Putiel"; Eleazar's father-in-law (Ex. vi. 25) being identified with Jethro by interpreting his name either as "he who abandoned idolatry" or as "who fattened calves for the sake of sacrifices to the idol" (Ex. R. xxvii. 7; Mek., Yitro, 'Amaleḳ, 1; Tan., Shemot, 11; comp. Targ. pseudo-Jonathan to Ex. vi. 25 and Soṭah 44a).

Jethro together with Balaam and Job was consulted by Pharaoh as to the means for exterminating the children of Israel; and as he dissuaded Pharaoh from his design, he was recompensed in that his descendants, the Rechabites, sat with the Sanhedrin in the Temple (Sanh. 106a; Ex. R. i. 12; comp. I Chron. ii. 55). In Ex. R. xxvii. 5 it is said that Jethro and Amalek were consulted by Pharaoh, and that both advised him to throw the male children into the river; but, seeing that Amalek was excluded from both this and the future life (comp. Ex. xvii. 14), Jethro repented.

R. Joshua and R. Eleazar ha-Moda'i disagree as to Jethro's position in Midian: according to one, the words "kohen Midyan" mean that he was the priest of Midian; according to the other, "prince of Midian" (Mek. *l.c.*; Ex. R. xxvii. 2). The opinion that Jethro was a priest is met with in Ex. R. i. 35 and in Tan., Yitro, 5. It is further said (Ex. R. *l.c.*) that Jethro, having remarked that the worship of an idol was foolish, abandoned it. The Midianites therefore excommunicated him, and none would keep his flocks; so that his daughters were compelled to tend them and were ill-treated by the shepherds. This, however, is in conflict with another statement, to the effect that Jethro gave his daughter Zipporah to Moses on condition that their first son should be brought up in the worship of idols, and that Moses swore to respect this condition (Mek. *l.c.*; Yalḳ., Ex. 169).

Whether Jethro went to the wilderness before or after the Torah was given, and consequently what it was that induced him to go to the wilderness, are disputed points among the Rabbis (Zeb. 116a; Yer. Meg. i. 11; Mek. *l.c.*). According to some, it was the giving of the Torah; according to others, the crossing of the Red Sea dry-shod, or the falling of the manna.

Honored by Moses.

The manner in which Jethro announced his arrival to Moses is also variously indicated. According to R. Eliezer, Jethro sent a messenger; according to R. Joshua, he wrote a letter and tied it to an arrow which he shot into the camp. Moses did not go out alone to meet his father-in-law; but was accompanied by Aaron, Nadab, Abihu, and the seventy elders of Israel, in order to honor Jethro. Some say that even the Shekinah itself went out to meet him (Mek. *l.c.*; Tan., Yitro, 6). The words "wa-yiḥad Yitro" (Ex. xviii. 9), generally translated "and Jethro rejoiced," are interpreted by the Talmudists as "he circumcised himself"; or "he felt a stinging in his flesh"; that is to say, he was sorry for the loss of the Egyptians, his former coreligionists. By an interchange of the ח with the ה, the phrase would read "wa-yihad," meaning "he became a Jew" (Tan., Yitro, 5).

Jethro was the first to utter a benediction (ברוך) to God for the wonders performed by Him for the Israelites (comp. Ex. xviii. 10). Such a thing had not been done either by Moses or by any of the Israelites (Sanh. *l.c.*; Mek. *l.c.* 2). Jethro knew that Yhwh was greater than all the gods (comp. Ex. xviii. 11), because he had previously worshiped all the idols of the world (Mek. *l.c.*; Tan. *l.c.*); but at the same time he did not deny to idols all divine power (Yalḳ., Ex. 269). According to R. Joshua, Moses purposely sent Jethro away in order that he should not be present at the revelation of the Law (comp. Ex. xviii. 27, Hebr.).

S. S. M. Sel.

JEW (The Word): Up to the seventeenth century this word was spelled in Middle English in various ways: "Gyu," "Giu," "Gyw," "Iu," "Iuu," "Iuw," "Ieu," "Ieuu," "Ieuz," "Iwe," "Iow," "Iewe," "Ieue," "Iue" ("Ive"), "Iew," "Jew." All these forms were derived from the Old French "Giu," which was earlier written "Juieu," derived from the Latin accusative "Judæum" with the elision of the letter "d." The Latin form "Judæus" was derived from the Greek *'Ιουδαῖος*; and this in turn from the Aramaic יהודאי, corresponding to the Hebrew יהודי, a gentilic adjective from the proper name "Judah," seemingly never applied to members of the tribe, however, but to members of the nationality inhabiting the south of Palestine (Jer. xliii. 9). It appears to have been afterward extended to apply to Israelites (II Kings xvi. 3) in the north. The English word is met with in the plural form as early as 1175, in the Lambert "Homilies"; in earlier English the form "Iudea," derived from the place-name "Iudea," is found in the Anglo-Saxon Gospels (John xviii. 35) of about the year 1000. Ormin, about 1200, uses the form "Judeow," derived from Old High German "Judeo," from which the modern German "Jude" is also derived.

In the Old Testament the term "Jew" appears to be applied to adherents of the worship of Yhwh as conducted at Jerusalem after the Exile: it is thus used in the late Book of Esther. In more modern usage the word is often applied to any person of the Hebrew race, apart from his religious creed. At one time during the emancipation era there was a tendency among Jews to avoid the application of the term to themselves; and from 1860 onward the words "Hebrew" and "Israelite" were employed to represent persons of Jewish faith and race, as in the titles "Alliance Israêlite Universelle" and "United Hebrew Charities." At the present time the name "Jew" is being more commonly employed.

The word is sometimes used as an adjective, as in "Jew Bill," "Jew boy," etc.; frequently in special combinations, as in "Jew-baiting," corresponding to the German "Juden Hetze," and in "Jew bail," insufficient bail; but more often in the genitive, as "Jew's eye," a proverbial expression for something very valuable, used by Shakespeare ("Merchant of Venice," Act II., Scene V., line 43); "Jews' houses," remains of ancient smelting-furnaces in Cornwall; "Jews' tin," lumps of tin found in the "Jews' houses." The term occurs in very many names of plants, as "Jews'-apple," the egg-plant (*Solanum esculentum*); "Jew-bush" (*Pedilanthus tithymaloides*); "Jews'-myrtle," butchers'-broom; "Jews' frankincense," a plant of the genus *Styrax*; "Jews'-mallow" (*Corchorus olitorius*), a plant of the linden family; "Jews'-thorn," the Christ's-thorn.

Of the several terms derived from the word "Jew" the only derivations in common use are "Jewess," "Jewish," and Jewry; but there are several curious more or less obsolete forms, as "Jewhead" (1300), "Jewhood" (Carlyle), "Jewishness," "Jewdom," "Jewism," and "Jewship," all used for the religious system of the Jews, as well as "Jewling," used by Purchas (1613) for a small or young Jew. As adverbs are used "Jewishly" and "Jewly" (Wyclif, 1382). In more modern English the adjectival and adverbial derivations are from the original Latin form—"Judaic," "Judaical" (rare), "Judaically," radically connected with the word "Judaism." The chief derivations, however, "Judaizer," "Judaist," and "Judaistic," with the verb "Judaize" and the noun "Judaization," refer rather to Jewish tendencies in the Christian Church than to any specifically Jewish characteristics.

Special classes of Jews have often specific names; thus, in the Caucasus, "Bergjuden"; those in Maga, near Shemachi, "Biki." Those of Jamaica used to be called "Smouse Jews" (H. Adams, "History of the Jews," p. 459); those of northwest Africa are termed Daggatun and "Riff Jews"; while those who have nominally left Judaism have often special names, such as Maranos, "Chuetas," "Anusim," "Maimin," "Jedid al-Islam," and Crypto-Jews. Symbolic epithets for the Jews are: "Chosen People," "People of the Book" (supposed to be derived from Mohammed, who, however, used the term "Peoples of a Book" (or Scripture) as applying equally to Jews, Christians, and Sabeans), "Peculiar People" (comp. M. Ḳ. 16b), "Israel," "Jeshurun," "Keneset Yisrael," "Dove" (comp. D. Kohan, "Yonah," in "Ha-Asif," 1889, v.), "The Nation," "The Race," "The Lily" (comp. Cant. v. 13).

Slang names, given to the Jews by their opponents, also occur, as "Sheeny" in English, "Zit" in Russian, "Youtre" in French. Among Russian Jews a distinction is made between "Yehudi," a Jew of German origin, and "Yid," one of Russian or Lithuanian extraction.

JEW, THE: Jewish monthly whose avowed object finds expression in its subtitle as "being a defense of Judaism against all adversaries, and particularly against the insidious attacks of Israel's advocate." It was published in New York city and edited by Solomon H. Jackson from March 1, 1823, to March 1, 1825. "The Jew" was the first Jewish periodical published in the United States, and was aimed against Christian conversionists.

JEWESSES: Anthropologically considered, Jewesses present certain distinctive physiognomic and epidermic characteristics marking them off from the male members of their race. It has been observed that as a rule they show the Jewish type of feature and expression more markedly. Investigation appears to have developed the fact that their skin is darker than that of the men, while their hair is lighter (Fishberg, in "American Anthropologist," 1903, pp. 92-93). Combining the two factors, it is found that 58.39 per cent of Jewesses are brunettes as against 66.82 per cent of male Jews. On the other hand, Jewesses seem to be less afflicted with color-blindness (see Eyes). They are superior in keenness of sight (Jacobs and Spielman, in "Journal of the Anthropological Institute," xix. 80), but inferior in all other anthropological measurements. It would also appear that the "custom of women" (Gen. xxxi. 35) appears earlier among Jewesses than among other European females (see Niddah).

JEWISH ABEND-POST: Yiddish newspaper, issued daily except Saturday and Jewish holidays, established in New York Feb. 3, 1899, by Jacob Saphirstein and Joseph L. Rosenbaum; now (1904) published by the Jewish Press Publishing Company. Its first editor was George Selikovich; and among its chief collaborators have been Philip Krantz, Ḥayyim Malitz, Jacob Magidoff, and M. Seifert. N. M. Shaikevich, the Yiddish novelist, has written for it several long serial stories. Its weekly edition, the "Jewish Journal," first appeared May 26, 1899.

JEWISH CHRONICLE, THE: Oldest and most influential Anglo-Jewish newspaper; published in London, England; next to the "Allgemeine Zeitung des Judenthums," the oldest Jewish newspaper in existence. It first appeared Nov. 12, 1841, under the editorship of D. Meldola and M. Angel, in quarto, which was soon changed to octavo. On Oct. 18, 1844, under the editorship of Joseph Mitchell, it took the title of "The Jewish Chronicle (New Series) and Working Man's Friend"; it appeared only fortnightly till July 9, 1847, when it became a weekly; from Aug. 18, 1854, it was edited by M. H. Bresslau, who changed the title to "The Jewish Chronicle and Hebrew Observer." From Jan. 12, 1855, A. Benisch assumed the editorship, which he retained till April 2, 1869, when Michael Henry took charge of the paper until his death. Benisch then resumed the editorship (June 18, 1875), which he retained till July 21, 1878. He bequeathed the paper to the Anglo-Jewish Association, which, however, sold the proprietary rights to Asher I. Myers, Sydney M. Samuel, and Israel Davis.

Asher I. Myers was the managing editor till his death in 1902. Under his editorship the paper obtained a very influential position in the London community by its prompt publication of news, its reports of important public meetings, its correspondence from leading members of the community, and by the growing practise of publishing all family notices in its advertising columns. "The Jewish Chronicle," under his direction, was also one of the earliest Jewish newspapers to resort frequently to illustration. On his death the managing editorship was assumed by M. Duparc, and the newspaper itself became the property of Israel Davis, who had survived his two associate owners.

The newspaper throughout has been conservative in tendency, though admitting correspondence on various reforms. A special feature has been made of book-reviews, a running column of which is (1904) contributed by Israel Abrahams under the caption "Books and Bookmen." On the occasion of the paper's jubilee in 1891 a separate jubilee number was issued, to which most of the prominent writers and authorities in the Anglo-Jewish world contributed.

JEWISH CHRONICLE (Baltimore; Boston; Mobile). See Periodicals.

JEWISH COLONIAL TRUST, THE (Jüdische Colonialbank): The financial instrument of the Zionist movement. Its establishment was suggested at the First Zionist Congress, held at Basel in 1897; the first definite steps toward its institution were taken at Cologne, May, 1898. It was conceived by the political Zionists as a financial instrument which should hold in trust the moneys of the Zionists for the direct purposes of the movement, and, at the same time, should act as a bank and carry on business according to the methods of the commercial world. These slightly conflicting ideas rested on a basic principle of the Zionist movement, namely, that it must not serve as a charity, but must teach and foster independence. On the other hand, it was recognized by the Zionists that financial power is needed to support diplomatic negotiations.

Origination.

The idea of founding the trust met with Zionist sympathy from the start, and in May, 1898, the preliminary committee, consisting of David Wolfsohn and Dr. M. Bodenheimer of Cologne, and Dr. Rudolph Schauer of Mayence, issued the first statement of the proposed institution and the first call for subscriptions. The purposes of the trust were described as the economic development and strengthening of the Jewish colonies in Palestine and Syria, the purchase of land for new settlements on a "publicly and legally recognized" basis, the development of trade, industry, and commerce in the colonies, the loaning of money on bond and mortgage and the making of advances for colonization, and the establishment of savings-banks or banking-offices in the colonies. The statement also referred to the purchase of concessions, etc., in Asia Minor, especially in Syria and Palestine, particular consideration being given to railway concessions and the building of harbors. Other points mentioned were the administration of the National Fund (see Zionism) and the carrying on of ordinary banking and exchange business.

It was decided that the principal office of the bank should be in London, that it should be registered under the English Companies Acts, and that the capital stock should be two millions sterling, issued in one-pound shares. Prospective shareholders were permitted to secure shares by a payment of 10 per cent per share, the balance to be subscribed within a stated period. These preliminaries were terminated on July 15, 1898, and the chairman of the committee was able to submit so gratifying a report to the Second Zionist Congress that the establishment of the bank was immediately decided upon. A numerous financial committee was appointed to represent Zionist interests in every country, and the institution was incorporated as a limited company under the English Companies Acts on March 20, 1899. The sum of £2,051 5s. was paid in stamp-duties.

At an extraordinary general meeting held in Aug., 1899, the shareholders revised the first paragraph of the memorandum of the articles of agreement as follows: "To promote, develop, work, and carry on colonization schemes in the East, by preference in Palestine and Syria, and further to promote, develop, work, and carry on industries and undertakings in Palestine, Syria, or in any other part of the world."

The predominance of the council of administration was assured by the allocation of the first hundred shares as "founders' shares," which are entitled, at any general meeting of the company, or at any poll, to as many votes as there are ordinary shares represented at that meeting or poll.

The first governors of the trust were Dr. Schauer of Mayence, Leib Schalit of Riga, and Abraham Hornstein of Kiev.

The prospectus, which stipulated that the company should not make an allotment until 250,000 shares had been subscribed, was issued April 29, 1899, from the offices in Broad street, London. The largest number of applications were for single shares, from applicants who undertook to pay for their holdings in five instalments, at a premium of 2½ per cent, within one year. Even the single shares were divided, especially in Galicia, between from four to eight persons. The applications, which, by the end of the following month, had made the establishment of the trust certain, represented over 100,000 shareholders; and special accommodations for the register at Somerset House, London, were necessary. The application for shares, above the necessary minimum, did not proceed very rapidly, until, in 1900, a system of share clubs was invented by an independent organization to facilitate the purchase of holdings on a still smaller allotment scheme. At the Zionist Congress of 1900 the deposits from various countries having been drawn into the central office, the trust was declared ready to transact business, and it was decided to devote part of the capital to the eventual founding of branches in Russia and Palestine. This plan was taken in hand in 1902, and a subsidiary corporation, the Anglo-Palestine Company, was formed and a branch opened in Jaffa.

At the 1903 annual general meeting, held in Basel, the directors recommended, and the shareholders approved, the payment of a dividend of five pence per share; and it was decided to found branches of the trust in the East End of London and in New York, and to take steps for carrying into effect the resolution relating to the Russian branch. The trust is made directly responsible to the Zionist movement by the fact that the council of administration is selected from among the members of the Grosses Actions Comité, and that one of them must report to each Zionist Congress. The council thus directs the policy of the trust in accordance with the resolutions of the Zionist congresses.

THE JEWISH CHRONICLE

דבר בעתו מה טוב משלי טו' כג' "A word in its season how good it is." Proverbs, chap. 15, ver. 23,

No. I.] כח" מרחשון תרב" לפק" November 12th, 5602.—1841. [Price 2d.

TO OUR READERS.

We have always anticipated the appearance of a truly Jewish paper, with the most lively satisfaction; for we knew, that the existence among us, of an organ of mutual communication, was a desideratum of such magnitude, that the person supplying it would be entitled to the thanks of his brethren, and be a man to be envied. Our sentiments, therefore, on this occasion, when we ourselves are enabled to lay before you the required medium, are of the most grateful kind. We feel that we have done a something that may rescue us from the common fate of mankind—oblivion;—that we have projected (and it remains with you to say, whether our intentions shall be carried out to their fullest extent) a work, which, while it will make every Jew familiar with the condition of his fellow Israelites, will also supply him with the means of becoming better satisfied with his own, by teaching him to render it subservient to a better lot; one that alone can secure happiness here, and ensure beatitude hereafter:—for with God's blessing, we would instruct him how to know himself, to love mankind, and to seek his Creator.

We enter on our task then with alacrity, cheered to our prospective midnight labour and unceasing mental toil, by the bright, the glorious thought, that we may, under Divine Providence, be the humble instruments of regenerating, at least, a portion of our brethren; and like the "orb of night," while dispensing a gentle light to those around, rejoice in our own heaven-borrowed brilliancy, for brilliant indeed will be our career, can we but effect our object.

Our prospectus has already made you acquainted with our purpose; we will here advert to it again. We propose to divide our matter into four distinct parts: 1st.—Religious and moral instruction. 2ndly.—Local intelligence, Historical information, and facts, exclusively Jewish. 3rdly.—Original articles. 4thly—Text books.

1st. The advantages to be derived from our first division, "religious and moral instruction" must at once present themselves; for what can confer greater benefit on man, than the knowledge of his duty towards God and his fellow-creatures—what can tend so much to his spiritual welfare as the former? what contribute so much to improve his social condition as the latter? How can his happiness be better consulted, than by pointing out to him, that in gratitude for the numberless benefits he receives at the hands of a gracious and merciful Providence, he is required to love his neighbour as himself, and to seek the presence of his Maker through the tenets of our holy religion;—a religion, the basis of all others, standing out in all its original purity, after the lapse of ages; while other creeds, since framed, but of man's devising, have crumbled into nought, and left no trace to tell that they have been. Time has breathed his withering blast o'er their nothingness, and like the clay that made them, they have vanished for ever.

2ndly. By local intelligence, we mean the proceedings of our many congregations at home and abroad; their exertions in the cause of religion and charity, and their progress in knowledge. What can better stimulate them to renewed efforts, than the thought, that what they have done is appreciated? and what promote the desire of doing good among us, so much as their example? Facts exclusively Jewish, will consist of anecdotes of eminent men, reports of public meetings, extracts from foreign and domestic journals, and a calender of current festivals, fasts, &c. Our historical information will be derived from authentic records,

3rdly. For original articles, we trust partially, to the kindness of contributors; but we are assured, that we are correct in our anticipations of numerous correspondences; for we know (ourselves) of many—and there must be others, with whom we are not acquainted, who will be but too anxious to give publicity to their opinions on subjects connected with Jewish welfare; and willing to commit to our publication, the less matter of fact, but not less honorable productions of their well stored minds; indeed, we have already received a tale, which we purpose commencing at the earliest opportunity.

4thly. Our Text Books will not, we dare venture to assert, form the least attractive part of our information;—nay, they will perhaps, be the most essentially useful. The הגדה; Passover service, though it does not possess the charm of novelty, will at least be acceptable, as it will contain the forms of German, Spanish, and Portuguese Jews, with the Hebrew from the Hidenheim editions, and will be carefully translated. To our Dictionary, the first English one that has appeared, we invite more particular attention. It is derived from a source, which needs but to be named, to be appreciated by every Hebrew scholar and student: the צמח דוד; a work, which for correctness, copiousness, and erudition, stands unrivalled; but which, unfortunately, has hitherto, from its scarcity and price been a stranger to most of our brethren—who have thereby been deprived of a most valuable assistance in the prosecution of the study of our sacred language. This obstacle we propose to remove, by presenting the Lexicon, in a form at once useful and available to the resources of the most humble; and to render the possession of it still more desirable, we shall give the rabinical, as well as the biblical hebrew, with translations and explanations of both.

Our creed is peace to all mankind—opposition to none, and the love of God; worshiping Him through the medium of our affections and hopes, and not our fears. We have now pointed out our intentions in the conduct of this work: we have only further to add, that it shall be our constant endeavour to render it worthy of your most liberal patronage, and to endow it with a character, at once religious, moral and instructive.

A seed is planted, and is anxiously watched by the gardener; weeds, that may obstruct its growth, are carefully plucked from around,—it is watered when rain comes not, and shielded from the too sultry heat of the summer sun;—all is attended to that can secure its flourishing: and what is the result? The gardener sees the little seed expand and spread, and eventually produce sweet flowers, wooing his gaze by their beautiful hues, and offering the grateful incense of their perfumes, to be wafted by every gale to his delighted senses; or he beholds the luxuriant fruit tree, bowing beneath the accumulated weight of its own productions, and proffering its golden harvest, in blushes, for his acceptance. He perceives in this the return for his labours, and he adores the Providence that has blessed his work.

Readers, will you be the gardener, and make us the fruit tree?

An infant is ushered into life, and its frail form seems scarcely strong enough to contain its atom of existence; but the child is nurtured from a kindly and a genial source—the vital power dilates within him, and he becomes a man, in the image of his Divine Creator. His faculties are developed, his energies expanded, knowledge adds her giant strength, and he gives to them, his first supporters, the recompense for their toils and cares, in the accomplishment of their dearest wishes; nay, more, he himself, learning his task from them, becomes what they were to him, the fountain of new existences. Readers, the inference is obvious—we *are* the child—we *would become* the man, a breath may raise us to maturity, a breath destroy us in our birth—but we feel you will decree us life; and further, we confidently hope, that the day is not far distant, when our little unpretending periodical will have found its way, alike, to the cheerful fire-side of the humble—the luxurious drawing room of the affluent—the closet of the student—and the approbation of the world.

First Page of the First Issue of "The Jewish Chronicle" (London).

JEWISH COLONIZATION ASSOCIATION (known colloquially as the **ICA** or **IKA**): Society founded by Baron de Hirsch Sept., 1891, and incorporated at London under the Companies' Acts of 1862–90, with a capital of £2,000,000, divided into 20,000 non-dividend-drawing shares of £100 each; Baron de Hirsch subscribed for 19,993 shares; and Lord Rothschild, Sir Julian Goldsmid, E. Cassel, F. D. Mocatta, and Benjamin S. Cohen of London, and S. H. Goldschmidt and Solomon Reinach of Paris for one share each. Before his death Baron de Hirsch divided his shares among the following corporations: the synagogue of Brussels and the Jewish communities of Berlin and Frankfort-on-the-Main, 3,600 shares each; the Anglo-Jewish Association of London and the Alliance Israélite Universelle of Paris, 4,595 shares each. The purpose of the association is stated in article 3 of its charter as follows: "To assist and promote the emigration of Jews from any parts of Europe or Asia, and principally from countries in which they may for the time being be subjected to any special taxes or political or other disabilities, to any other parts of the world, and to form and establish colonies in various parts of North and South America and other countries for agricultural, commercial, and other purposes." "To establish and maintain or contribute to the establishment and maintenance in any part of the world of educational and training institutions, model farms, loan-banks, industries, factories, and any other institutions or associations which in the judgment of the council may be calculated to fit Jews for emigration and assist their settlement in various parts of the world, except in Europe, with power to contribute to the funds of any association or society already existing or hereafter formed and having objects which in the opinion of the council may assist or promote the carrying out of the objects of the association."

Objects.

Originally, the association was to be governed by an administrative council of six members, but this provision was modified by the general assembly of 1896. The administrative council now numbers eleven members: five are appointed directly, one each by the five corporations each holding, approximately, one-fifth of the capital; the other six are elected for a period of five years by a vote of the general assembly of the stockholders, convened once a year. Baron de Hirsch was really the sole director of the association; only after his death, April, 1896, did the council of administration enter upon its duties.

After the death of his only son, Lucien, Baron de Hirsch conceived the idea of creating a number of foundations for the purpose of raising the moral and material status of the Jews of eastern Europe; one of these was destined for the Russian Jews. Statutes were drawn up and submitted to the Russian government, which was at first favorably disposed; but it soon changed its attitude, and Baron de Hirsch decided to devote the money to philanthropic work outside Europe for the benefit of the oppressed European Jews.

History.

It was at this time (1889) that Dr. W. Löwenthal, on his return from a trip to Argentina, suggested to Baron de Hirsch the idea of founding a colony in that country. On Aug. 20, 1890, a conference was held in Paris at the residence of Baron de Hirsch, those present including Isidore Loeb, Michel Erlanger, Dr. W. Löwenthal, C. E. Cullen, Colonel Vanvinkeroy, and Dr. E. Schwarzfeld. C. E. Cullen, Dr. Löwenthal, and Colonel Vanvinkeroy were appointed as a commission to visit that country; six months later they submitted a favorable report, and Dr. Löwenthal was sent to the Argentine Republic as director, with full powers to make the necessary preparations for the future Jewish colonists. He was allowed a year's time; but he had hardly landed at Buenos Ayres when the persecutions in Russia forced masses of Jews to leave that country (May, 1891). Then, at the instance of Jewish relief committees, Baron de Hirsch decided to send a certain number of families to the Argentine Republic at once. But the land acquired in the provinces of Santa Fé (the Moïseville colony) and Buenos Ayres (the Mauricio colony) was insufficient for all the immigrants. Many of them gave up agricultural life, and a change of management became necessary (Dec., 1891). The new provisional director, A. Roth, had acquired land in the province of Entre Rios (the colony Clara), where the overflow from the Mauricio and Moïseville colonies was sent; but neither Roth nor his successor, Colonel Goldsmid, appointed in 1892, could overcome the numerous difficulties, especially as the large and costly staff did not understand the manners and customs of the immigrants; and the temporary relief which had necessarily been given to the colonists had demoralized many families.

Argentine Colonies.

Colonel Goldsmid was succeeded March, 1893, by Maxim Kogan, and the latter by Samuel Hirsch and David Cazès; the undesirable elements were eliminated, and the monthly relief was cut off. The council now decided to select colonists in Russia only from such families as desired to be sent to Argentina. Ten groups, of fifty families each, were accordingly designated in the province of Bessarabia; some of their members went ahead to examine the new country and prepare for the remainder: these families constituted several groups in the Clara colony. At the same time another group of forty families was selected in the government of Grodno, and was established at Moïseville, which had been reduced to fifty families in 1893 through the elimination of the undesirable elements. The colonists were subjected to many trials, losing all their crops through locusts, heavy rains, drought, and their own inexperience. Hence Baron de Hirsch decided not to send out any more colonists until those already in the country were on a firm footing.

Process of Selection.

Through the death of Baron de Hirsch the Jewish Colonization Association came into possession of a fund amounting to £6,000,000 ($30,000,000). The council then decided to extend the work; colonies were successively founded in North America, the island of Cyprus, Asia Minor, Palestine, Russia, Rumania, and Galicia, the Jewish Colonization Association also aiding the Alliance Israélite Uni-

North America.

In the United States the ICA assists the Baron de Hirsch Fund principally in aiding the agricultural school at Woodbine, N. J., and the trade-school at New York, N. Y. It has been instrumental in consolidating the colonies of Alliance, Carmel, and Rosenhayn, and has aided individual farmers in various parts of the country. It has founded, in conjunction with the Baron de Hirsch Fund, the Jewish Agricultural and Industrial Aid Society, whose object is to aid Jewish farmers and subvention the Removal Committee created by this society. Since 1892 the ICA has contributed to the founding of the Hirsch colony near Assa, Northwest Territories; it has aided the Baron de Hirsch Institute of Montreal in building and maintaining a school for the children of Jewish immigrants; and it contributes to a fund for the aid of immigrants settling in Canada. Since 1901 the Jewish Colonization Association has contributed to the foundation of a new colony near Qu'Appelle, Assiniboia, N. W. Ter., on land granted by the Canadian government to families of Rumanian Jews.

Asia Minor and Palestine.

In Brazil the association has acquired 3½ square miles of territory in the province of Rio Grande do Sul, where it proposes to start a colony. Since 1897 it has contributed to the foundation of a colony (33 persons) in Cyprus—Margo Tchiflik, near Nicosia, which it at present owns. The places of the former Russian colonists have been taken almost wholly by former pupils of the agricultural school of Jaffa (see Cyprus). In 1899 it acquired, near Smyrna, a tract of land covering 2,587 hectares, naming it "Or Yehudah." An agricultural school was founded there in Nov., 1900, which has now about fifty pupils. Six Jewish farmers are also established there, and seventy-six additional persons take part in the agricultural labors. Aside from the old colonies of Baron Edmond de Rothschild, of which it has assumed the management, the Jewish Colonization Association has contributed to the consolidation of the colonies Wadi el-Ḥanin, Rehoboth, Katra (Gadara), Hederah, and Mishmar ha-Yarden, and in the district of Tiberias it has exploited an agricultural tract, known as "Sajara," which is cultivated exclusively by Jewish laborers. Several of these laborers have also been established as petty farmers. In order to increase the number of merchants and artisans in Jerusalem the association has established the following: a silk- and woolen-mill for purposes of instruction, employing about one hundred persons; a knitting machine establishment, furnishing machines to poor families, which pay in monthly instalments; a dyeing establishment, the complement of the weaving-mill; a working men's quarter, in which artisans, laborers, and small traders may purchase small houses for a moderate sum; a bank that loans money on security, with moderate interest, to artisans, laborers, manufacturers, and small shopkeepers; schools for teaching girls to make lace and also nets for the hair.

Galicia and Russia.

The loan-banks, founded since 1899, constitute the chief work of the Jewish Colonization Association in Galicia. There are now six of these in operation —at Brody, Kolomea, Rzeszow, Stanislawow, Tarnow, and Zaleszczyki; and others are contemplated. Each of these institutions is managed by a council, in conformity with the Austrian laws. By the end of 1902 these banks had altogether 3,912 shareholders with 7,929 shares of 10 kronen each; the loans range from 25 to 400 kronen, repaid in small monthly instalments. Since their foundation these banks have loaned altogether 1,197,554.96 kronen. The industrial work of the association includes: the operation of knitting-mills, furnishing work for about sixty working women; the doll-factory at Tarnow, which employs one hundred men and women, and is intended to introduce the manufacture of dolls among the Galician Jews; the carpenter-shops at Stanislawow and Tarnow, for instructing boys in trades. In 1899 the association acquired the estate of Slobodka Lesna, near Kolomea, where it has established an agricultural school, with seventy pupils and eight carpenter's apprentices (1903). In Russia the association subventions agricultural, professional, and primary schools. It aids the Jewish farmers in the different governments, contributes to the loan-banks, and has established at Dubrovna a spinning-mill and a society for providing cheap lodging-houses. It has six agricultural and horticultural schools, with 210 pupils, at Czestoniew, Minsk, Moghilef-on-the-Dnieper, Novopoltawka, Orgejew, and Orsha. It supports twenty trade-schools for boys (1,916 pupils), seven trade-schools for girls (1,547 pupils), and two mixed schools, these schools being distributed in twenty-seven different localities. The association trains young men to assume positions as directors and instructors in its schools. In the interest of primary instruction it aids the Ḥebrat Marbeh Haskalah (Society for the Spread of Enlightenment) of St. Petersburg, which subventions seventy-five schools having a total roll of more than 5,500 pupils. It aids Jewish farmers by instructing and encouraging them in employing improved methods in agriculture and fruit-growing; it plants model gardens, introduces bee-culture and mutual loan-banks, and distributes farmers' almanacs and pamphlets on agriculture. This work also extends to Bessarabia and the colonies of the Northwestern Zone and of Kherson. The association has furthermore been instrumental in forming cooperative societies among the Jewish artisans at Akkerman, Bairamtcha, Romanowka, and Tarutino, and advances funds to the loan-banks founded in the cities for the purpose of aiding especially artisans and small dealers. The thirteen banks which thus have received funds are situated in localities having a total Jewish population of 240,000 persons. The banks have altogether 7,600 shareholders; the average sum loaned is 40 rubles, and in 1902 more than half a million rubles were loaned. Beginning with 1898 the association has instituted a statistical inquiry into the Jewish population of Russia in order the better to study its needs; this census is now completed, and the results have been published.

Rumania.

In order to counteract the disastrous results of the laws of 1893, by which most of the public schools were closed to Jewish children in Rumania, the Jewish Colonization Association subventions communities and societies which have established schools. There are thirty-five such schools: eighteen primary schools for boys, thirteen for girls, two mixed schools, and two commercial schools, with a total attendance of 4,953 boys and 2,945 girls. It also supports at Bucharest a school for the preparation of boys for the professions (130 pupils) and another of the same kind for girls (96 pupils), and has loaned money to about twenty communities for building schoolhouses. Since the end of 1899, when the economic crisis, added to the restrictive laws, forced the Jews to leave Rumania, the association has systematically organized emigration. It has a representative at Bucharest and correspondents in all the centers of emigration. It has aided about 20,000 persons in leaving Rumania, a number of whom have been settled as colonists in Argentina and Canada.

In addition to the work mentioned above, the association has assisted a large number of Jewish institutions and societies in various countries, especially such as aid emigrants and provide schools. It has also contributed large sums for colonization in Asia Minor.

Organization.

The council of administration is in charge of the work. After the death of Baron de Hirsch, S. H. Goldschmidt became president; in Oct., 1896, he was followed by Narcisse Leven; Franz Philippson is vice-president. The other members of the first council were: Alfred L. Cohen of London (succeeded by Leonard Cohen), Chief Rabbi Zadoc Kahn of Paris, Charles Hallgarten of Frankfort-on-the-Main, Georges Kohn of Paris (succeeded by Paul Errera of Brussels), Dr. Edmond Lachmann of Berlin, Herbert G. Lousada and Claude G. Montefiore of London, Julius Plotke of Frankfort-on-the-Main (succeeded by Dr. Julius Blau), and Solomon Reinach of Paris.

The council is assisted by the directorate in Paris (three members and a general secretary), where the work of the association is concentrated. In Russia there is a central committee of ten members under the presidency of Baron Horace de Günzburg; it is appointed by the council of administration and approved by the Russian government. There is a general directorate at Buenos Ayres, with two directors who are in charge of its affairs in the Argentine Republic. Similarly, in Palestine the work is in the hands of a general directorate, under one chief director. The work in Galicia is in the hands of an agency.

BIBLIOGRAPHY: Since 1894 the Jewish Colonization Association has published annual reports, under the title *Rapport de l'Administration Centrale au Conseil d'Administration*; reports for 1893–96 have appeared in English. There is also published a *Bericht des Curatoriums der Baron Hirsch-Stiftung . . . in Galizien, . . . Lodomerien, . . . Krakau, . . . und . . . Bukowina*, Vienna.

G. E. SD.

JEWISH COMMENT: A weekly published at Baltimore, Md., since May 29, 1895. Its first editor was Max Myers; he was succeeded by Louis H. Levin. The "Comment's" theological position is conservative, but it welcomes free interchange of opinions between Radical and Orthodox. It has made a special feature of regular correspondence from England, New York city, France, Germany, Italy, Australia, and Austria. It also publishes from time to time articles of a scholarly character dealing with Jewish history and literature. As an organ it has been friendly to the Zionist propaganda.

G. A. M. F.

JEWISH CRITERION, THE: American weekly newspaper; established at Pittsburg, Pa., Feb. 8, 1895, by S. Steinfirst and Joseph Mayer. Rabbi Samuel Greenfield was its first editor. In 1899 Charles H. Joseph succeeded him, and in 1900 became owner of the paper. In 1901 J. Leonard Levy was appointed editor-in-chief, Charles H. Joseph assuming the position of associate editor. The paper is published in the interest of Reformed Judaism.

G. S.

JEWISH EXPONENT, THE: A weekly published in Philadelphia and Baltimore since 1887, when it was founded by the Jewish Exponent Publishing Company. Charles Hoffman is the editor, and Ephraim Lederer associate editor. It represents American Judaism in its broadest sense, and is also the organ of the Jewish Chautauqua Society of America. Its theological position is conservative. It is very sympathetic toward the Zionist movement.

JEWISH HISTORICAL SOCIETY OF ENGLAND: After the Anglo-Jewish Historical Exhibition in 1887, it was proposed by Lucien Wolf to form a historical society to continue the researches begun by that exhibition, but nothing was done until six years later, when a meeting was held in London, at the club of the Maccabæans (June 3, 1893), and the Jewish Historical Society of England was constituted for the purpose of "conducting researches into the history of the Jews of the British empire, transcribing and publishing documents, forming a library and museum, and organizing a course of lectures on general Jewish history." Lucien Wolf was the first president, and he was succeeded by Hermann Adler, Joseph Jacobs, F. D. Mocatta, and Isidore Spielmann, the present (1904) holder of the presidency. Israel Abrahams is, and has been throughout, its honorary secretary. Besides four volumes of transactions, the society has published Menasseh ben Israel's pamphlets on the Resettlement, with introduction and notes by Lucien Wolf; and, together with the Selden Society, a volume of "Select Pleas from the Jewish Exchequer," edited by J. M. Rigg. The society has undertaken, also, in conjunction with the American Jewish Publication Society, a series of "Jewish Worthies," of which the first volume, on "Maimonides," has appeared. Under the presidency of Isidore Spielmann steps have been taken to arrange for a museum of historical relics in connection with the society.

J.

JEWISH LADS' BRIGADE: Military association of English Jewish boys, formed, organized, and directed by Col. Albert E. W. Goldsmid "to instil into the rising generation from their earliest years habits of orderliness, cleanliness, and honor, so that in learning to respect themselves they will do credit to their community." It is the first association of its kind. Jewish lads are eligible for membership between the ages of twelve and sixteen, and may remain, up to the rank of sergeant, until the age of eighteen. There is no limit to the age of superior officers. There are at present three regiments in existence: the London Regiment, consisting of all the battalions and companies in the London district; the Northern Regiment, consisting of similar units in the north and center of England; and the Colonial Regiment, consisting of companies in Canada and South Africa. In addition to the infantry training there are also signaling and ambulance organizations. Stress is laid upon the athletic clubs in connection with the organization.

The brigade was founded, after a lecture by Colonel Goldsmid before the Maccabæans, at a meeting held at the Jews' Free School in Feb., 1895, when the first company of boys was enrolled; and six weeks later the first weekly drill was held. In 1896 the first summer camp, of nineteen boys, was held at Deal, and social and athletic clubs were organized.

The idea speedily became popular, and by March, 1898, there were thirteen companies in England, while a company was also established at Montreal, Canada. Four of these, consisting of five officers and ninety boys, had been represented at the seaside camp at Deal, England, during the preceding summer. A labor bureau was then established with a view to obtaining employment for the boys; and provincial companies rapidly sprang into existence. In 1898 the summer encampment consisted of 400 boys; and a year later the number of companies in existence rose to twenty-three, including one at Johannesburg, South Africa.

In Aug., 1899, a second summer camp was formed in the north of England for the benefit of the members of the northern contingent, while the Deal camp was inspected by Lieut.-Gen. Sir Charles Warren, who highly praised the efficiency of the lads. In 1900 a public display was given in London, which was attended by Maj.-Gen. Sir Henry Trotter, the general officer commanding the home district. The following year the number of companies had increased to thirty, while the muster-roll showed a total strength of between 3,000 and 4,000 members. Seventeen officers and members of the brigade took part in the South-African war, including Colonel Goldsmid, his place as commandant being occupied by Lieut.-Col. E. Montefiore. Of the seventeen, two lost their lives, one of them being Lieut. F. M. Raphael, who was killed at Spion Kop while attempting to rescue a wounded soldier.

In 1901 there were 540 boys at the Deal camp, and about 250 at the camp at Lytham. The membership is now (1904) about 3,500, and there are companies existing, in addition to those in London, at Newcastle, Bradford, Leeds, Sheffield, Hull, Birmingham, Manchester, Liverpool, Johannesburg, and Montreal. That in the last-named city has already become a popular institution. A somewhat similar movement in New York has resulted in the formation of the Manhattan Rifles.

JEWISH LEDGER, THE: Weekly journal; founded in New Orleans, La., Jan. 4, 1895, by A. Steeg, who is still (1904) its publisher. Its first editor was Alexander Harris, who was succeeded by Maurice Switzer, afterward editor of "The Owl" (absorbed by the "Ledger" March, 1903). Rev. Dr. Max Heller was editor of the "Ledger" during the years 1896–97, and was succeeded by its present editor, Dr. M. J. Lehman, formerly editor of the "Jewish Times." Its tendency is toward moderate Reform.

G. P. Wi.

JEWISH MESSENGER, THE: Weekly; published in New York city; founded and edited by R. Samuel M. Isaacs (Jan., 1857). Upon his death his son Abram S. Isaacs became editor (May 19, 1878). Its editorial and theological position was conservative. Under its first editor the paper took a conspicuous abolitionist position prior to and during the Civil war.

From Jan. to Dec., 1879, a literary supplement, "Hebraica," was issued, to which such scholars as Bacher, Kaufmann, Rosin, Neubauer, and Gaster contributed.

On Dec. 19, 1902, "The Jewish Messenger" was sold to the proprietor of "The Jewish Gazette" (New York city), and subsequently by him to the owners of "The American Hebrew," into which it was merged Jan. 1, 1903.

G. A. M. F.

JEWISH MORNING JOURNAL (MORGEN JOURNAL): The first Yiddish daily morning newspaper; established in New York July 2, 1901, by Jacob Saphirstein, who is still (1904) its managing editor; now published by the Jewish Press Publishing Company. Its staff of writers includes Jacob Magidoff (city editor), Hayyim Malitz, A. M. Sharkansky, M. Seifert, I. Friedman, and Peter Wiernik. While professedly Orthodox and Zionistic, it is the most secular of the Yiddish papers in America, and is an ardent advocate of the Americanization of the Russian immigrants who form the bulk of its readers.

JEWISH PUBLICATION SOCIETY OF AMERICA: Society for "the publication and dissemination of literary, scientific, and religious works giving instruction in the principles of the Jewish religion"; the third of its kind in the United States (see Jew. Encyc. i. 519). Its headquarters are at Philadelphia. It was founded June 3, 1888, at a convention held in Philadelphia. At the end of the first fiscal year the membership was 1,071; by 1903 it had reached 4,700. Every member of the society receives a copy of each publication; since the society has been in existence over two hundred thousand volumes have been distributed and sold. The society is supported by the income derived from a permanent fund and from membership dues.

As a rule, four, sometimes five, publications a year are issued; the first, "Outlines of Jewish History," by Lady Magnus, appeared in 1890. The society issues two series, a "Special Series" (seven numbers), appearing occasionally, and including short works of a miscellaneous character, and "The American Jewish Year Book," published since 1899–1900 (5660). Besides the twelve volumes of these two series, the society has brought out thirty-one works (thirty-eight volumes), among them translations from German, French, and Hebrew. They include histories, literary, religious, and ethical essays, poems, biographies, proceedings of societies, republications of older classics, and fiction. The most important undertakings of the society are the publication of the English edition of Graetz's "History of the Jews" (six volumes), and a new translation of the Bible into English, first suggested at the second biennial meeting, June 5, 1892; only the Book of Psalms has appeared (1903). Other notable publications of the society are: "Children of the Ghetto" (Israel Zangwill); "Studies in Judaism" (Solomon Schechter); "The Ethics of Judaism" (M. Lazarus); and "Idyls of the Gass" (Martha Wolfenstein).

JEWISH QUARTERLY REVIEW: Journal of Jewish science; founded in London Oct., 1888; edited by Israel Abrahams and C. G. Montefiore. While containing for the most part scientific articles on Jewish literature and history, it has also from time to time dealt with current topics, especially of a theological nature. Many of Professor Schechter's discoveries from the genizah at Cairo, including parts of Ecclesiasticus, have appeared first in its pages, often in facsimile. Among those who have contributed series of articles have been (in addition to the editors): E. N. Adler (Karaitica and Judæo-Persian), W. Bacher (all branches), L. Blau (Masorah), A. Büchler (history of Hellenistic period), T. K. Cheyne (Biblical criticism), H. Hirschfeld (Arabica), D. Kaufmann (history and rabbinics), A. Neubauer (all branches), M. Steinschneider (introduction to Arabic literature), S. Schechter (rabbinic theology), I. Zangwill (poems and analyses of tendencies in modern Judaism).

JEWISH SPECTATOR, THE: The first Jewish weekly journal in the southern United States; founded in Memphis, Tenn., Oct. 19, 1885, by M. Samfield and edited and published by him until 1904. In 1892 his son Joseph M. Samfield assumed the position of business manager. Its tendency is toward moderate Reform.

G. P. Wi.

JEWISH THEOLOGICAL SEMINARY OF AMERICA: Rabbinic seminary established in New York city under the auspices of the Jewish Theological Seminary Association; founded in 1886 mainly by the exertions of Dr. Sabato Morais of Philadelphia, and conducted by him till his death, he serving as president of its faculty, and the Hon. Joseph Blumenthal being president of its board of trustees. Dr. A. Kohut was its professor of Talmud, and it issued seven reports containing scholarly papers. The position of the association having become precarious after their death, a new organization was projected in Oct., 1901, entitled "Jewish Theological Seminary of America," with which the association was invited to incorporate. This arrangement was carried into effect April 14, 1902. The new organization was endowed with a fund of over $500,000, and was presented with a suitable building on University

Heights by Jacob H. Schiff. It obtained a charter from the state of New York (approved Feb. 20, 1902), "for the perpetuation of the tenets of the Jewish religion, the cultivation of Hebrew literature, the pursuit of Biblical and archeological research, the advancement of Jewish scholarship, the establishment of a library, and the education and training of Jewish rabbis and teachers. It is empowered to grant and confer the degrees of Rabbi, Ḥazan, Master and Doctor of Hebrew Literature, and Doctor of Divinity, and also to award certificates of proficiency to persons qualified to teach in Hebrew schools." The reorganized seminary was opened on Sept. 15, 1902, in the old building of the Theological Seminary Association, 736 Lexington avenue, but it has since moved into more commodious quarters at 531–535 West 123d street. A synagogue is attached which contains an Ark discovered in the Cairo Genizah by Prof. Schechter and presented by him.

A valuable library comprising about 7,500 printed volumes and 750 manuscripts, including part of the Halberstam Library, was presented by Mayer Sulzberger, raising the number of printed books in the possession of the seminary to more than 14,500 volumes. It already had the library of David Cassel, numbering about 3,000 volumes.

The course of study extends over a period of four years, and includes training in Bible, Talmud, Jewish history and literature, theology and homiletics, and Semitics. The students are in most cases required to be graduates of a university or college before entering the seminary. In 1904, classes were established for the training of teachers of religious schools.

The affairs of the seminary are conducted by a board of directors, the president of which is Dr. Cyrus Adler. The faculty is composed of the following members: Solomon Schechter, M.A., Litt. D., president, and professor of Jewish theology; Louis Ginzberg, Ph.D., professor of Talmud; A. Marx, Ph.D., professor of history and rabbinical literature and librarian; I. Friedländer, Ph.D., professor of Biblical literature and exegesis; J. M. Asher, M.A., professor of homiletics; Rev. Dr. B. Drachman, instructor in Hebrew and acting reader of codes; Joshua A. Joffe, instructor in Talmud. In 1904 there were 37 students in the theological department, and 120 took the teachers' course. Twenty-five students have thus far been graduated, and are occupying pulpits in various parts of the United States, Canada, and South Africa.

Bibliography: *Biennial Reports* of the seminary; *Jewish Year Book*, 5663-64 (1903-4).

JEWISH TIMES, LONDON. See Periodicals.

JEWISH TIMES, THE; A Journal of Reform and Progress: A weekly published in New York city. The first number appeared on March 5, 1869, Moritz Ellinger being the publisher, and from Nov. 10, 1871, to Feb. 23, 1872, also the editor. On Oct. 4, 1878, Harry H. Marks became the occupant of that position. The last number was issued Feb. 21, 1879. During the last two years of publication (vols. ix. and x.) the periodical was entitled "The Reformer and Jewish Times; A Journal of Progress in Religion, Literature, Science, and Art." It contained an English and a German part in which literary, biographical, Talmudic, and rabbinical articles were published, reprinted, and translated. Jewish news, correspondence, and sometimes sermons appeared in its pages. The journal, throughout its existence, was the exponent of Progressive and Reform Judaism.

JEWISH WORLD, THE (Die Yiddische Welt): Yiddish daily paper; founded in New York city June 27, 1902, by the Lebanon Printing and Publishing Company (president, H. Masliansky), with the purpose of furthering the Americanization of Russian immigrants. In each issue one page is printed in English; this page has been edited successively by Joseph Jacobs, J. de Haas, I. L. Brill, B. G. Richards, and Samuel Mason. The general editor (1904) is D. M. Hermalin. One of the principal collaborators is the Yiddish poet Morris Rosenfeld.

J. S.

JEWISH WORLD, THE: The fourth Jewish newspaper published in London, immediately on the passing of the "Jewish Record." Its first number was issued Feb. 14, 1873, the founders being George Lewis Lyon, who remained the proprietor and general editor up to 1897, and Myer D. Davis, Jewish teacher and antiquary, who was the first editor, and who resigned soon after the founding of the journal. The editorship passed successively to P. B. Benny, Lucien Wolf, Edwin Collins, J. de Haas, and S. H. Herschkowitch. Since a change in proprietorship in Sept., 1897, the editors have been Samuel L. Bensusan, and John Raphael, the present editor.

From its foundation to 1881 the paper pursued the policy of presenting a trenchant criticism of Christian doctrine and belief. On the outbreak of the Balta riots it sent a commissioner to Russia, and until after the outbreak in 1892 earnestly championed the cause of the Russian and Rumanian Jews.

Its criticism of Christianity brought it into contact with W. E. Gladstone; and its doubt of the utility of the forty-second clause of the Berlin Treaty brought it correspondence from the Marquis of Salisbury.

Until 1897 "The Jewish World" advocated Orthodox Judaism, and was a sharp critic of Anglo-Jewish institutions. From 1892 to 1900 it consistently advocated, in one form or another, the Zionist idea. Till 1897 it was a quarto of eight pages, with occasional supplements; from 1897 it has had sixteen pages with cover, and regular illustrations appropriate to the events of the week.

G. J. DE H.

JEWNIN, ABRAHAM JONAH B. ISAIAH: Russian Talmudist; a native of Paritz, government of Minsk; died at Grodno June 12, 1848, while still young. He was the author of novellæ on the works of Maimonides, part of which appeared in the edition of the "Sefer ha-Miẓwot" known as "Maḥshebet Mosheh" (Wilna, 1866), and other parts in the Warsaw edition of the "Yad ha-Ḥazaḳah" (1882). His son Samuel Jewnin (b. *c.* 1830) lives at Wilna (1904); he is the author of "Dibre Ḥefeẓ," a collection of essays on Scriptural texts (Odessa, 1872); "Naḥalat 'Olamim," a collection of the important inscriptions on the tombstones in the Jewish cemetery of Warsaw (Warsaw, 1882); and of several lesser works. A second son, Nate Jewnin (b. *c.* 1835), who now resides in Grodno, is the author of a work entitled "Niṭ'e Or." A third son, Bezalel Jewnin, born about 1840, is a well-known itinerant preacher in the United States.

H. R. P. WI.

JEWRY (Old French, "Juierie"): Originally a designation for Judea and sometimes for the entire Holy Land. The term was afterward applied to any special district inhabited by Jews; hence the name of "Old Jewry" in London. The following reference to a Jewry occurs in Chaucer ("Prioress' Tale," lines 37-38):

> "Ther was in Asye in a great citee
> Amonges cristene folk a Iewerye."

In Old and Middle English the term was used also to express the belief of the Jews. In more modern times it has been extended to include the Jewish people, nation, race, or community in a collective sense, as in the proem to Zangwill's "Children of the Ghetto" (1893): "That long cruel night in Jewry which coincides with the Christian era."

G. J.

JEWS' COLLEGE: Rabbinical seminary in London, England; it owes its existence to the chief rabbi Dr. N. M. Adler; the first stone was laid Jan. 4, 1852, at a public meeting presided over by Sir Moses Montefiore. The original design of the institution was threefold: the training of ministers, readers, and teachers; the formation of a day-school; the establishment of a bet ha-midrash. The third part of the scheme, however, was soon abandoned as impracticable. On Nov. 10, 1856, the college and college school were opened at 10 Finsbury Square, with Dr. L. Löwe as head master. Dr. Löwe, however, soon resigned (Sept., 1858), and was succeeded by the Rev. Barnett Abrahams, B.A., as principal (d. 1863). At his death the Rev. Dr. H. Adler accepted the post provisionally, and held it until the appointment of the present principal, Dr. M. Friedländer. The constitution of Jews' College provides that the chief rabbi of England shall be the president of the council (which is annually elected by the subscribers), and the Orthodox principle is thus, though indirectly, maintained. After having remained in Finsbury Square for twenty-five years, it removed, for the benefit of those of its students that attended University College, to Tavistock House, Tavistock Square, formerly the residence of Charles Dickens; after eighteen years there it removed to Queen's Square House, bought for the college by Charles Samuel.

Of the two departments, the day-school and the college, the former was not popular. For twenty-five years it struggled on, but ultimately it was closed (1880). Its place was taken by "the preparatory class" for young men intending to devote themselves to the study of theology. In this class pupils are prepared for the college in both theological and secular subjects, to enable them to pass the university matriculation examination and an examination of a similar standard in Hebrew and religion. There are three examinations, which correspond to the university matriculation, intermediate, and final examinations; successful candidates receive certificates entitling them to be styled "Probationers," "Associates," and "Fellows" of Jews' College. The "Third Certificate" precedes the obtaining of the HATTARAT HORA'AH from the chief rabbi. The last provision, that the chief rabbi and not Jews' College should grant the highest certificate, gave rise to a prolonged agitation led by Prof. Israel Gollancz. Ultimately (Feb. 11, 1903) it was decided that arrangements should be made for the granting by the college of the diploma of rabbi, with which should be combined the hattarat hora'ah.

The college possesses a large library, the most interesting and important part of it being the collection of the Rev. A. L. Green, a zealous and intelligent collector of Hebrew and Anglo-Jewish literature. Part of the Ramsgate College Library also is deposited in Jews' College, including a valuable collection of Hebrew manuscripts acquired for it by Dr. M. Gaster. The general public is allowed to read in the library and to borrow books. In connection with the college there exist a Jews' College Literary Society and a Jews' College Union for past and present pupils.

The "Jews' College Journal" was started by some of the pupils and students of Jews' College April, 1875; only three numbers were published, the last in 1888.

J. M. F.

JEWS' WALK: Name given to the southeast corner of the colonnade in the Royal Exchange, London, owing to the fact that the Jewish brokers were accustomed to assemble there for business when on 'Change. It was customary at the end of the eighteenth century for each section of the Exchange to have its special position; and to the present day the dealers in foreign bills meet in the old Jews' Walk.

Another Jews' Walk existed opposite the court of Hustings at Guildhall. The name was attached to the wall there, but was removed in 1838 at the request of Sir Moses Montefiore.

BIBLIOGRAPHY: *Jewish Chronicle*, Jan. 18, 1901.

JEZDEGERD. See Persia.

JEZEBEL: Daughter of Ethbaal, King of Sidon, and wife of Ahab, second king of the fourth dynasty of Israel, founded by Omri (I Kings xvi. 31). This marriage was the culmination of the friendly relations existing between Israel and Phenicia during Omri's reign, and possibly cemented important political designs of Ahab. Jezebel, like the foreign wives of Solomon (*ib.* xi. 7, 8), required facilities for carrying on her form of worship. So Ahab "reared up an altar for Baal in the house of Baal, which he had built in Samaria, and Ahab made the Asherah" (*ib.* xvi. 32, 33, R. V.).

The aggressive character of Jezebel went so far as to require that her religion should be the national religion of Israel. She organized and maintained gilds of prophets, 450 of Baal, and 400 of Asherah (*ib.* xviii. 19). She also destroyed such prophets of Yhwh as she could reach. Obadiah, the faithful overseer of Ahab's house, rescued one hundred of these, hid them, and secretly fed them in a cave (*ib.* xviii. 3).

The violence, bloodshed, and idolatry occasioned by Jezebel, and apparently assented to by Ahab, aroused the indignation of the prophet Elijah. Ahab was charged directly with the sin of following the Baalim (*ib.* xviii. 18). The superiority of Elijah and of his God in the test at Carmel, and the slaughter of the 450 prophets of Baal, fired the vengeance of Jezebel. Elijah fled for his life to the wilderness, where he mourned the devotion of Israel to Baal and the lack of worshipers of Israel's God. He was sharply rebuked with the words, "Yet will I leave me seven thousand in Israel, all the knees which have not bowed unto Baal, and every mouth which hath not kissed him" (*ib.* xix. 18).

The determination and unscrupulousness of Jezebel are best illustrated by her false charges against and her murder of Naboth and his sons (*ib.* xxi. 7–16; II Kings ix. 26) to satisfy the whim of Ahab. For this base deed Elijah pronounced upon Ahab and Jezebel and their house a ghoulish prophecy (I Kings xxi. 21–24) which was promptly fulfilled (*ib.* xxii. 38; II Kings ix. 26, 35, 36). Jezebel's influence and religion took root in and brought disaster upon the kingdom of Judah through her daughter Athaliah, who became the wife of Jehoram, son of Jehoshaphat; so that Phenician idolatry, introduced by Jezebel, poisoned both the northern and the southern kingdom of Israel; and its results stretched far down into Israel's history.

Jezebel survived Ahab, who was slain at the battle of Ramoth-gilead, and saw two of her sons, Ahaziah and Jehoram, sit on the throne of their father. In the insurrection of Jehu she lost her life in a horrible manner (see Jehu).

E. G. H. I. M. P.

JEZELUS: **1.** Father of Sechenias, the chief of a family that returned with Ezra from captivity (I Esd. viii. 32). In Ezra viii. 5 he is called "Jahaziel." **2.** Father of Obadiah (Abadias), who was also one of the chiefs on the return from captivity (I Esd. viii. 35). In Ezra viii. 9 he is called "Jehiel."

E. G. H. M. Sel.

JEZREEL (יזרעאל, "God sows"). **1.** See Esdraelon.

2. A city of Issachar, mentioned with Chesulloth and Shunem (Josh. xix. 18). Owing to its importance, Jezreel gave its name to the whole district which was subsequently included in the kingdom of Ish-bosheth (II Sam. ii. 8). But Jezreel acquired its greatest fame in the reign of Ahab, who chose it for his residence (I Kings xviii. 45). Ahab had a palace there (*ib.* xxi. 1). The harem was near the gate, forming a part of the city wall (II Kings ix. 30, 33). Close by was a watch-tower, which perhaps also formed a part of the royal building (*ib.* ix. 17). It may be that Ahab's ivory palace (I Kings xxii. 39) and Jezebel's establishment for idolatrous priests (*ib.* xvi. 33, xviii. 39; II Kings x. 11) were also at Jezreel.

Close to Ahab's palace was the vineyard of Naboth the Jezreelite, so much coveted by Ahab (I Kings xxi. 1 *et seq.*). It would seem, from a comparison of I Kings xxi. 19 and xxii. 38, that the assassination of Naboth took place at Samaria. But with reference to the latter passage Josephus ("Ant." viii. 15, § 6) says that Ahab's chariot was washed in the fountain of Jezreel. Besides, a confusion between Samaria and Jezreel is seen in I Kings xxi. 18 and II Kings x. 1. In front of Ahab's palace was an open space where dogs roamed. It was there that they devoured Jezebel's body (II Kings ix. 35–37).

Jezreel was also the residence of Joram, son of Ahab (*ib.* viii. 29, ix. 15); there he met his death at the hands of Jehu (*ib.* ix. 24, 25). The heads of Ahab's seventy sons were sent by command of Jehu from Samaria to Jezreel, by the gateway of which city they were piled till the following morning (*ib.* x. 7, 8). Jezreel was also the scene of the massacre of Ahab's family and of all who were suspected of sympathy with his dynasty (*ib.* x. 11–14).

Jezreel was known to the Crusaders as "Parvum Gerinum"; and in 1183 a skirmish with Saladin took place near the city (William of Tyre, xxii. 26). It was called even as late as that time "Zar'in," which is almost the equivalent of the Hebrew "Yizre'el." The same identification was made by Benjamin of Tudela, who describes it as being distant a day and a half from Lod, and three miles from Sepphoris, and having a large fountain. He found there one Jewish inhabitant, a dyer ("Itinerary," ed. Asher, i. 44, Hebr.). It was near this fountain that Saul and his army encamped during their war with the Philistines (I Sam. xxix. 1); it is called "Tubania" by William of Tyre (xxii. 20).

Zar'in is now a small village; it is situated at the foot of Mount Gilboa on the western side and has twenty to thirty houses (see Robinson, "Researches," iii. 163–167; Guérin, "Samarie," i. 311–312; Fried. Wilken, "Gesch. der Kreuzzüge," II. ii. 144, Leipsic, 1808; George Adam Smith, "Historical Geography," etc., 1894, pp. 356, 381).

3. A town in the hill country of Judah not far from the Judean Carmel (Josh. xv. 56). Ahinoam, one of David's first two wives, was a native of this town (I Sam. xxv. 43).

4. A Judean; son of Etam, according to the Septuagint (I Chron. iv. 3).

5. Hosea's eldest son, being so called by command of God in token of the divine vengeance which would overtake Jehu for massacring Ahab's family in Jezreel (Hosea i. 4).

6. Name used for Israel in Hosea ii. 24.

E. G. H. M. Sel.

JHIRATKAR, SOLOMON BALLAJCE: Beni-Israel soldier; enlisted in the 14th Regiment Bombay N. L. I. in 1818; promoted jemidar Jan. 10, 1839; subahdar Jan. 1, 1843; subahdar-major Jan. 1, 1856; served as a native adjutant for five years and ultimately became sirdar bahadur; was present at the siege of Mahadewghur in 1832; in the field service at Kolhapur in 1836; and at the operations of Dwarka and Burda Hills against the Waghers 1859–60. He received the first and second stars of the Order of British India.

JOAB (יואב = "Yhwh is Father"). — **1. Biblical Data:** Son of Zeruiah, David's sister (II Chron. ii. 16), and commander-in-chief of David's army. Joab first appears after David's accession to the throne on the occasion of the engagement at the pool of Gibeon between Joab and David's servants on one side and Abner with the servants of Ish-bosheth on the other (II Sam. ii. 13 *et seq.*; see also Helkath Hazzurim). Abner, defeated, on the retreat kills Joab's youngest brother, Asahel. Voluntarily giving up the pursuit, Joab marches to Hebron (*ib.* ii. 17–32). Still minded to avenge his brother's death, Joab, upon learning of Abner's visit to and reception by David during his (Joab's) absence from Hebron, manages to lure his unsuspecting enemy to return to Hebron, where, meeting him in the gateway, he smites him under the fifth rib. David compels Joab to attend in penitent garb the obsequies of his victim.

Becomes "Prince of the Army."

The great opportunity for Joab to distinguish himself came with the siege of Jebus or Jerusalem. David had promised the office of chief to the one who should first smite the Jebusites. Joab, accomplishing this, obtained the position (I Chron. xi. 6). The vague designation of "chief" or "head" ("rosh") is supplemented by the more explicit title of "prince of the army" (II Sam. viii. 16). Joab's strategic skill was immediately shown in his fortification of the conquered city (I Chron. xi. 8). After that event, Joab is throughout represented as a most skilful general and as a model of fidelity. David himself was conscious of Joab's merits in these respects, though he somewhat feared him (comp. II Sam. iii. 39). Owing to his rank, Joab had an armor-bearer of his own (*ib.* xxiii. 37; I Chron. xi. 39) and ten servants to carry his equipment (II Sam. xviii. 15). His usual residence was at Jerusalem (*ib.* xiv. 30), but he had also a house in the wilderness (I Kings ii. 34). Joab was active in all the wars of David. The most important was first in Edom, where Joab remained six months till he had exterminated all the males (*ib.* xi. 15–16). So great was the terror of his name in Edom that Hadad ventured to return to his native country only after Joab's death (*ib.* xi. 21). The second important war in which Joab was engaged was that with the Ammonites in two campaigns. In one of these the Ammonites, allied with Syrians, compelled Joab to leave a part of the army with his brother Abishai, who made an attack on the Ammonites while Joab himself attacked and defeated the Syrians (II Sam. x. 7–14). In the other, in the following year, Joab devastated Ammon and besieged Rabbah (*ib.* xi. 1). So great was Joab's devotion to David that after he had conquered the royal city or "the city of waters," he sent messengers to David asking him to come and complete the conquest himself (*ib.* xii. 26–28). It was during this expedition that David had recourse to the services of Joab in his designs on Uriah (*ib.* xi. 6–25). Joab used his influence over David to effect the rehabilitation of Absalom in his father's favor. Knowing that David longed to see Absalom, Joab instructed a "wise woman from Tekoa" to induce David by a parable to recall his son, and finally brought about a reconciliation between them (II Sam. xiv.). At the time of Absalom's revolt, though Absalom's party was the stronger, Joab remained with David, accompanying him in his flight. David entrusted to Joab only one-third of his men, while the other two-thirds were led by Abishai and Ittai the Gittite (*ib.* xviii. 2). The battle terminated adversely for Absalom's party, and Joab took upon himself the responsibility of killing Absalom, despite David's repeated injunction to spare the young man's life. Afterward he had the courage to rouse David from his grief for his son's death (*ib.* xviii. 5–15, xix. 6–8).

His Devotion to David.

Joab's loyalty was still more striking when David, yielding to his resentment against him, imprudently transferred the office of commander-in-chief from Joab to Amasa. At the revolt of Sheba, Amasa proved himself incapable, and David appointed Abishai to take the lead in the attack, in which Joab of his own accord nevertheless took part (*ib.* xx. 1, 4–7). Joab treacherously killed his rival, but as Amasa had previously been commander-in-chief of the rebels (*ib.* xvii. 25), Joab in slaying him was inspired not by private but by political motives. Joab, having effected the defeat of Sheba, was reinstated in the office of commander-in-chief (*ib.* xx. 15–23). When, later, he was commissioned by David to number the people of Israel, he tried, but in vain, to dissuade the king from his design (*ib.* xxiv. 2–4; I Chron. xxi. 2–4). Even when the king insisted in his purpose Joab's scruples were such that he did not number the tribes of Levi and Benjamin (II Chron. xxi. 6)

Joab's last act, which proved his undoing, was his espousal of the cause of Adonijah (I Kings i. 7, 19), probably because Adonijah was the elder son after Absalom (*ib.* i. 6), and on the death of Adonijah the succession rightfully belonged to him. It seems that David understood that the affair of

Adonijah was not sufficient to convict Joab of treason; for he recommended Solomon to kill Joab out of revenge for Abner and Amasa (*ib.* ii. 5–6). Joab, unaware of David's special recommendation, thought Solomon would probably condemn him as a traitor, and, having heard of Adonijah's death, he fled to the Tabernacle and took hold of the altar. Solomon, however, had no scruples with regard to the defilement of the altar; and Benaiah slew him there, by the king's command. Joab was buried in his own house in the wilderness (*ib.* ii. 28–34).

E. G. H. M. Sel.

——**In Rabbinical Literature:** Joab appears in the Mishnah as the ideal general (Mak. 11b). He and David supplemented each other; he would not have succeeded in his wars without David's continuous study of the Torah, and David would not have been able to apply himself to his ideal pursuits without such a reliable general as Joab (Sanh. 49a). His generosity is indicated by the words "his house in the wilderness" (I Kings ii. 34), which are taken to mean that his house was as free as the wilderness; that it was open to everybody; that everybody could find there food of all kinds; that, like a wilderness, it was free from robbery (Sanh. 49a). R. Johanan even declared that Joab was not guilty of Abner's death, but that he brought him before the Sanhedrin, which, in the gate of the city (comp. Deut. xvi. 18 *et al.*), condemned Abner for killing Asahel (Sanh. 49a). When Joab had smitten the male children of Edom, David inquired why he had done so; Joab answered, "It is written, 'Thou shalt blot out the males ["zakar"] of Amalek'" (Deut. xxv. 19). David retorted, "But it is 'zeker' [remembrance], not 'zakar'!" Joab replied that his teacher had made him read "zakar" (B. B. 21a, b). Joab struggled hard but vainly to dissuade David from numbering the people. Joab made two numberings, a complete and an incomplete one. He intended to render the incomplete numbering; if David became angry, he would give him the complete one (Pesiḳ. R. 11 [ed. Friedmann, p. 43b]). After Joab had fled to the Tabernacle, he was brought before the judges for trial. Declared not guilty of the murder of Abner, as he had only avenged the blood of his brother Asahel, he was condemned for the murder of Amasa; to Joab's defense that Amasa was a traitor because he had failed to execute David's order (comp. II Sam. xx. 4–5), the judges objected that Amasa, being occupied with the study of the Law, was not bound to execute the king's order (Sanh. 49a). When Benaiah went to execute Joab the latter said: "Let not Solomon condemn me to a double punishment; let him either kill me and take on himself the curses which his father uttered against me [II Sam. iii. 29] or let me live and suffer from the curses only." Solomon took on himself the curses, all of which were fulfilled in his descendants (Sanh. 48b). The Talmudists do not agree as to whether Joab left a son or not, as some identify the Joab of Ezra viii. 9 (see Joab, No. 3) with the general of David (B. B. 116a).

Midrashim.

In various midrashim Joab is the subject of a number of hero-tales. Once, hearing David repeat, "Like as a father pitieth his children" (Ps. ciii. 13), Joab objected that a mother had more pity for her children than a father. David suggested that he should more carefully observe the dispositions of parents toward their children, and to do this, Joab undertook a journey. He arrived at the house of a poor old laborer who had twelve sons and who worked very hard to support his family. In the evening the old man divided the bread which he had won by his day's labor into fourteen equal pieces, for his twelve sons, his wife, and himself.

On the following day Joab said to the old man: "You are old and feeble; why do you work for your young sons? Take my advice and sell one of them; and with the money you will be able to live with your family in comfort." The old man rebuked him for such advice and went on to his work; from the mother, however, he succeeded, after meeting many objections, in buying one son for one hundred pieces of gold. In the evening Joab, himself unseen, observed what passed between the father and the mother. The former, having noticed that one of the fourteen pieces of bread remained untouched, asked after his son. His wife at first gave various reasons for his absence, but her husband remained unsatisfied, and she was obliged to tell him the truth. The man took the money, and, having found Joab, demanded the return of his son. As Joab resisted, the man threatened to kill him unless he restored his son to him, which Joab gladly did, and acknowledged that David was right (Midr. Rabbotenu, in Jellinek, "B. H." v. 52–53).

Siege of Ḳinsali.

At the head of 12,000 warriors Joab besieged Ḳinsali, or Ḳinsari, the capital of the Amalekites. After a fruitless siege of six months Joab's men despaired and desired to return to their homes. But Joab, having supplied himself with money, and taking his sword, ordered them to hurl him over the wall from a sling and wait forty days; if at the end of that time they saw blood flowing under the gates they would know that he was alive. His order was executed, and he fell in the yard of a house where lived a widow and her married daughter. Joab was taken and revived by its inmates, meeting their questions by telling them "I am an Amalekite; the Israelites captured me and threw me over the wall; now let me stay with you and I will pay you." At the end of ten days Joab went into one of the 140 streets of the city, entered a smith's shop, and ordered the smith to make a sword like the one which he had, but which was broken. The first two which the smith made Joab shook and broke, but the third one stood the test. Joab asked the blacksmith who should be killed with such a sword, and the answer was "Joab." With the words "Suppose I am Joab" he slew the smith. Then Joab went into the principal street, killed 500 mercenaries whom he met, and returned to the house. In the city it was rumored that Asmodeus had killed the mercenaries; when Joab was asked whether he had heard of it he said he had not. Joab paid his hostess for ten more days, and at the end of that time went to the gate of the city, where he slew 1,500 men. This time his hand stuck to the sword, and he returned to the house and asked the young woman for warm water. But she said to him, "You eat and drink in our house and go out to kill our people!" Joab thereupon ran her through with his sword, after which his hand was healed. He then went into the street, killed every one he met on his way to the gates, slew the guard and threw open the gates. The Israelites had seen the blood flowing under the gates and shouted for joy. After ordering them to send for David, Joab climbed on to a tower in order that all might see him, and then saw the twentieth Psalm written on his right foot. Joab slew all the people of the city except the king, whom he left for David himself to kill. Then Joab put the slain king's crown on David's head while his troops were engaged in carrying off the spoils of the city (Jellinek, "B. H." v. 146–148).

S. S. M. SEL.

——**Critical View:** In the Biblical account of Joab's life the endeavor is palpable to shield David and Solomon, and to paint Joab as a man moved by motives of private revenge, and unscrupulous in the methods of accomplishing his designs. It is he who, contrary to the intentions of the king, assassinates Abner, though David must have had an equally strong reason for the removal of this partizan of Saul's son and a possible rival to the throne. In the narrative of Absalom's death, the same tendency is clearly visible. It is Joab who, contrary to David's instructions, ends the crown prince's life. II Sam. xix. reveals the true situation. Amasa was probably under the suspicion of playing into the hands of Sheba (II Sam. xix. 14, xx. 18 *et seq.*), and as a loyal adherent of David, Joab may have deemed it justifiable to put the lukewarm commander effectually out of the way.

In the narrative as now extant private jealousy is suggested as the motive; and this is later consistently adduced to shield Solomon for having sacrilegiously ignored the right of asylum in the sanctuary (I Kings ii. 28). It was in execution of David's last will, to avenge the assassination of Abner and Amasa—that of Absalom, though logically it should also have been included, is of course omitted, for it would not do to represent Solomon as requiting the death of his rival's brother, who, had he lived, would have been the legitimate heir—that this outrage upon the right of asylum is represented as having been perpetrated. Joab was a loyal and willing tool in the hands of his master David; a sturdy, unscrupulous military chieftain, such as surround Asiatic despots and leaders of freebooters.

E. G. H.

2. Son of Seraiah, and descendant of Kenaz (I Chron. iv. 14); prince of GE-ḤARASHIM.

3. Head of an important family that returned with Zerubbabel from captivity, the number of whose descendants together with those of Jeshua is given as 2,812 (Ezra ii. 6; Neh. vii. 11). A Joab is also mentioned in Ezra viii. 9 whose descendants numbered 218; but this may be a different person from the preceding.

E. G. H. M. SEL.

JOAB: Jewish family to which belonged AARON B. SAMUEL HA-NASI, who lived for some time at Oria in Apulia in the second half of the ninth century. The name "Joab" has been especially frequent since the tenth century in the Roman family of Anaw, within which it is characteristic of the branch that calls itself "Beth-el," "Min ha-Keneset," or "De Synagoga" (see JEW. ENCYC. i. 566, *s.v.* ANAW). In the Anaw family the name occurs as follows:

(1) Joab, great-great-grandfather of Nathan, the author of the 'Aruk (second half of 10th cent.).

(2) Joab b. Solomon b. Abraham (1166), great-great-grandson of No. 1.

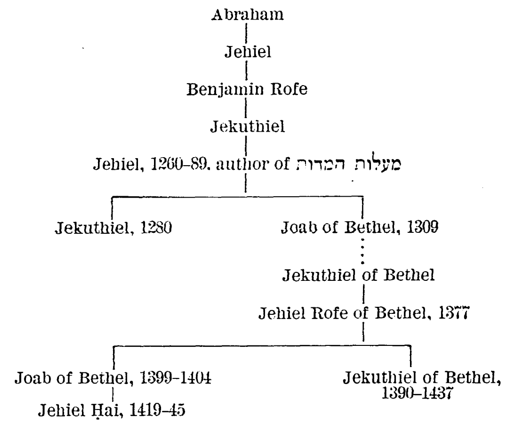
(3) Joab, grandfather of Paola, descendant of No. 1.

(4) Joab b. Benjamin b. Solomon (1280–1304), grammarian and Biblical exegete in Rome.

(5) Joab b. Solomon b. Shabbethai b. Mattithiah, father of Menahem, in Rome (about 1340). In the fourteenth century a synagogue of R. Joab in Rome is mentioned.

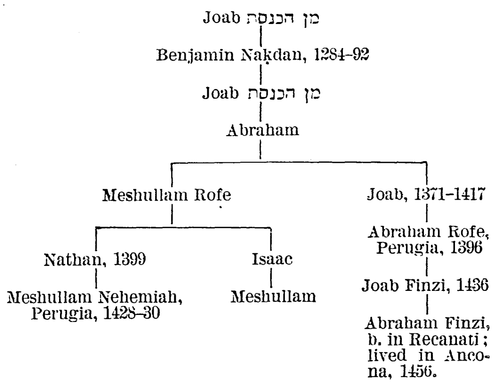
The following is a genealogical table of the Joab family:

I.



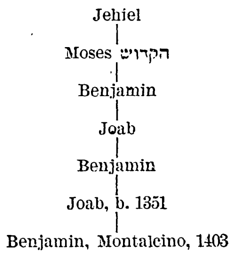
Abraham
Jehiel
Benjamin Rofe
Jekuthiel
Jehiel, 1260–89. author of מעלות המדות
Jekuthiel, 1280
Joab of Bethel, 1309
Jekuthiel of Bethel
Jehiel Rofe of Bethel, 1377
Joab of Bethel, 1399–1404
Jehiel Ḥai, 1419–45
Jekuthiel of Bethel, 1390–1437

II.



Joab מן הכנסת
Benjamin Naḳdan, 1284–92
Joab מן הכנסת
Abraham
Meshullam Rofe
Nathan, 1399
Meshullam Nehemiah, Perugia, 1428–30
Isaac
Meshullam
Joab, 1371–1417
Abraham Rofe, Perugia, 1396
Joab Finzi, 1436
Abraham Finzi, b. in Recanati; lived in Ancona, 1456.

III.



Jehiel
Moses הקדוש
Benjamin
Joab
Benjamin
Joab, b. 1351
Benjamin, Montalcino, 1403

Most of the persons named in the genealogical table are known merely as copiers of Hebrew manuscripts. Only the following are more important:

Benjamin b. Joab: A writer of religious poems (Paris MS. 814; Zunz, "Literaturgesch." p. 365).

Benjamin b. Joab Naḳdan: Grammarian and Biblical commentator in Rome. He is the author of a manuscript work dating from 1284, and is mentioned in another manuscript dated 1292. He was probably the teacher of the poet Immanuel b. Solomon.

Jekuthiel b. Jehiel (**אביר הרופאים מבית אל**): No less than twelve manuscripts of his have been preserved.

Joab of Bethel: Synagogal poet of the fourteenth century. Whether he is identical with the religious poet attacked by Immanuel b. Solomon can not be determined. Zunz mentions three poets of this name.

Bibliography: Berliner, *Gesch. der Juden in Rom*, ii. 1, p. 50, Frankfort-on-the-Main, 1893; Landshuth, *'Ammude ha-'Abodah*, p. 81, Berlin, 1857; Luzzatto, מבוא אל מחזור רומי, p. 23, לוח הפייטנים, p. 35; Steinschneider, *Polemische und Apologetische Literatur*, p. 284; idem, *Hebr. Bibl.* vii. 115, xi. 104, xiv. 61; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 332, 426, 446, Berlin, 1896; Zunz, *G. S.* iii. 169, 171; idem, *Literaturgesch.* pp. 501, 709.

The following persons are known as belonging to the Beth-El family:

Baruch b. Solomon b. Joab: Lived in Larricia 1451.

Bezaleel b. Baruch in Larricia: Son of preceding; flourished 1457–63.

Ishmael Rofe b. Moses: Judge in Rome 1562.

Jehiel (Ḥiel) of Bethel: Contemporary of Immanuel b. Solomon, who speaks of him as "one who is in Hades" ("Maḥberot," xxviii., ed. Berlin, p. 256).

Joab b. Abraham b. Joab (**מן הכנסת**): Writer in Tivoli 1333.

Joab b. Nathan b. Daniel: Writer of synagogal poetry.

Joab Raphael b. Benjamin, of Montesanto, president of the synagogue Quattro Capi in Rome, 1539–50, doubtless belongs to this family.

Mattathiah b. Jehiel, of Pisa (14th cent.; see Schorr in "He-Ḥaluẓ," ix. 50).

Mordecai da Pisa b. Solomon da Camerino (1483).

Shelumiel b. Jehiel, of Tivoli: Lived in Rome 1578.

It is probable that the following persons also belonged to the Beth-El family:

Abraham b. Joab Eliashib (1438).

Baruch b. Joab: Member of the rabbinical board in Rome 1538–42.

Benjamin b. Joab: Lived in Ravenna 1579.

David b. Joab (1468).

Eliezer Moses b. Joab (1463).

Elijah b. Joab: Banker in Rome 1536.

Elijah Melammed b. Joab: Lived in Rome 1524.

Ephraim b. Joab b. Moses, of Modena: Writer and poet (1462); lived at Abruzzo 1481.

Jehiel b. Joab: Pupil of Shabbethai b. Solomon in Rome 1290.

Jekuthiel, of Tivoli (1416).

Joab: Teacher of Benjamin b. Abraham Anaw at Rome in the first half of the thirteenth century.

Joab: Lived in San Miniato in the sixteenth century.

Joab b. Abraham Finzi (*c.* 1660).

Joab b. Baruch Lampronti: Lived in Ferrara about 1730.

Joab (Dattilo) b. Baruch degli Piatelli: Teacher in Rome; supported Joshua Menaggen's efforts and defended Jacob Ẓahalon's writings. He wrote introductions to two works by the latter which appeared in Venice in 1665. Joab was rabbi of Sienna at the time of his death.

Joab b. Benjamin: Lived in Rome 1555.

Joab b. David: Copyist and writer of synagogal poems (*c.* 1426).

Joab Elijah b. Joab (1483; see R. Judah Minz, Responsa, Nos. 2, 3).

Joab Ḥazzan: Writer of synagogal poems.

Joab Immanuel Finzi (1466–77).

Joab b. Jehiel, of Modena.

Joab b. Jekuthiel, of Tivoli (1414).

Joab b. Joseph, of Modena (1495).

Joab b. Maẓliaḥ de Ceprano: Son of Maẓliaḥ b. Menahem Ceprano; lived in Rome 1575.

Joab Melammed: Lived in Rome 1539; perhaps identical with **Joab Fattore** in Rome (1539) and with **Joab Melammed de Recanati**, who lived in Rome 1553.

Joab b. Menahem Joseph (1460).

Joab b. Mordecai Trioufo: Lived in Rome 1539.

Joab b. Moses.

Joab b. Moses: Lived in Rome 1584.

Joab b. Obadiah, of Tivoli: Lived in Rome 1599.

Joab della Ripa (or of Larricia ?). His widow, **Fresca Rosa**, died in Rome 1565 (Berliner, "Aus Schweren Tagen," No. 32).

Joab b. Shabbethai: Lived in Rome 1499.

Joab Shemariah, of Corregio (1503).

Joab Valencin: Lived in Venice 1594.

Joseph b. Joab Elijah (1461).

Joshua b. Joab (1405).

Maẓliaḥ b. Menahem Ceprano: Lived in Rome 1562.

Menahem b. Joab, of Ascoli (1479).

Menahem b. Joab: Lived in Ferrara 1745.

Mordecai b. Joab, מבינפרי: Banker in Rome; "fattore" of the Roman congregation 1536–38.

Mordecai b. Joab.

Obadiah b. Joab: Presider in Rome 1554.

Shabbethai b. Joab Calabrese: Presider and rabbi in Rome 1539–58.

Jacob b. Joab Elijah ha-Kohen de Fano, author of "Shilṭe ha-Gibborim," certainly does not belong to this family, nor does Joab of Salerno (about 1300).

G. H. V.

JOAB BEN JEHIEL: Liturgical poet; lived at Rome in the fourteenth century. He belonged to the Beth-El family, and was the author of five piyyuṭim (inserted in the Roman Maḥzor) for Passover, having for their subject the Canticles, and piyyuṭim for Shabu'ot and the New-Year (before "Nishmat"), and for the Day of Atonement (before "Ḳaddish"). In the Roman Maḥzor, also, a prayer entitled "Ashmurot ha-Boḳer" for Thursdays on which the "Taḥanun" is not recited, is signed "Joab"; and a seliḥah bearing the same signature is found in the seliḥot collection at Tripoli. Joab is believed to be identical with the young poet whom Immanuel satirized ("Maḥberot," viii. 66).

G. I. Br.

JOACHIM, JOSEPH: Hungarian violinist; born at Kittsee, near Presburg, Hungary, June 28, 1831. He began to study the violin when he was five years old, and was placed under Szervaczinski, leader of the orchestra at the Budapest opera-house. He advanced so rapidly that after two years he was able to make his first appearance in a public concert given at the Adels Casino, Budapest, March 17, 1839.

At the age of nine he was sent to study with Joseph Böhm at the Vienna Conservatorium, whence, after a course of three years, he went to Leipsic. There he met Mendelssohn and played at a concert of Madame Viardot's. A few months later he played Ernst's "Otello Fantasia" at a Gewandhaus concert, and achieved such success that in the following year—that is, at the age of twelve—he was invited to play in a violin quartet with Ernst, Bazzini, and Ferdinand David.

Joachim remained in Leipsic until 1849, studying with Ferdinand David (violin) and Moritz Hauptmann (composition), and making occasional concert tours through Germany and elsewhere. In 1844 he was taken by Mendelssohn to England, where he made his début at a benefit concert given at Drury Lane in March, 1844. He revisited England in 1847, and thereafter played annually at the Monday Popular, the Crystal Palace, and other concerts. In 1849 he spent two months at Paris, where he achieved his first success in an orchestral concert given by Hector Berlioz. Shortly afterward he accepted the position of concert-master at Weimar. In 1852 he accepted a call as solo violinist to the King of Hanover; and it was here, in 1863, that he married Amalie Weiss, the well-known contralto.

After a residence of sixteen years at Hanover, Joachim, in 1868, removed to Berlin, where he was appointed director of the newly established Königliche Hochschule für Musik, and member of the Academy of Fine Arts (musical section). His famous quartet, originally established in 1869, and later consisting of Joachim, De Ahna, Wirth (followed by Kruse and Halir), and Hausmann, has, by reason of its artistic character and perfect ensemble, set the standard for high-class chamber-music performances.

Among the compositions of Joachim, most of which are somewhat tinged by the influence of Schumann, the Hungarian concerto in D minor is generally regarded as the most perfect as to both form and content. Other important compositions are: overture to "Hamlet," for orchestra, op. 4; "Hebrew Melodies," for viola and piano, op. 9; nocturne in A for violin and small orchestra, op. 12; "Dem Andenken Kleists," op. 14; "Szene der Marta" (from Schiller's "Demetrius"), for contralto solo and orchestra, op. 14; 3 cadenzas to Beethoven's violin-concertos, etc.

Joachim has embraced Christianity.

S. J. So.

JOACHIMSEN, PHILIP J.: American jurist and communal worker; born in Breslau Nov., 1817; died in New York city Jan. 6, 1890. He emigrated to New York in 1827, and was admitted to the bar there in 1840. During the Civil war, he organized and commanded the Fifty-ninth New York Volunteer Regiment, and was injured at New Orleans. For his services he was made brigadier-general by brevet. After having assiduously practised law, he was elected judge of the New York Marine Court in 1870 and acted as such up to 1877. He then resumed practise.

Joachimsen was the first president of the Hebrew Orphan Asylum (1859). In 1879 he organized the Hebrew Sheltering Guardian Society for Children in New York.

A. A. M. F.

JOACHIMSTHAL, FERDINAND J.: German mathematician; born May 9, 1818, at Goldberg, Silesia; died April 5, 1861, at Breslau. In the year of his graduation (Ph.D. Berlin, 1842) he was appointed teacher at a "Realschule" in Berlin, and in 1846 was admitted to the philosophical faculty of the university as privat-docent. In 1856 he was appointed professor of mathematics at Halle, and in 1858 at Breslau.

Joachimsthal contributed essays to Crelle's "Journal," 1846, 1850, 1854, 1861, and to Torquem's "Nouvelles Annales des Mathématiques."

Bibliography: *Allgemeine Deutsche Biographie*.

S. F. T. H.

JOACHIMSTHAL, GEORG: German physician; born at Stargard, Pomerania, May 8, 1863. He graduated as doctor of medicine from the University of Berlin in 1887 and established himself at the German capital the following year. In 1890 he became assistant in orthopedic surgery at the university dispensary, where in 1898 he was appointed privat-docent in the medical faculty. In 1897 he received the Pourat prize of the French Institute for his essay "Etude des Changements Morphologiques et Fonctionels qu'on Peut Produire Expérimentalement sur l'Appareil Locomoteur."

Joachimsthal has contributed several essays to the medical journals, and since 1897 has been collaborator with J. Wolff in the orthopedic section of Virchow's "Jahresbericht über die Leistungen und

Fortschritte in der Gesammten Medizin." He is the author of "Die Angeborenen Verbildungen der Oberen Extremitäten," Hamburg, 1900.

JOASH (יואש, contraction of יהואש = "given by Yhwh"). **1.** (Called also **Jehoash.**)—**Biblical Data:** Son of Ahaziah and Zibiah of Beer-sheba; eighth king of Judah (II Kings xii. 1, 2). Joash was the only descendant of the house of David living at the time of Ahaziah's death that escaped slaughter at the hand of his grandmother Athaliah. Only a year old when the royal family was exterminated, he with his nurse was concealed by his paternal aunt Jehosheba in "the bedchamber," where he remained six years (II Kings xi. 1–3; II Chron. xxii. 10–12). When he was seven years old he was brought out from his hiding-place by Jehoiada and placed on the throne of his ancestors. As Joash was the only living member of David's line his coronation is particularly narrated; after he was crowned the covenant was renewed between God, the king, and the nation, and after having destroyed the altars of Baal and killed Mattan, the priest of Baal, the king was conducted with great ceremony to the throne (II Kings xi. 4–19; II Chron. xxiii. 11–20). Jehoiada, desiring to secure the permanence of the throne of David, chose two wives for Joash, who begat sons and daughters (II Chron. xxiv. 3). Under the guidance of Jehoiada the young king established the worship of Yhwh, though the "high places" continued to be used for worship (II Kings xii. 3–4).

The first public religious act of Joash was to order the repair of the Temple, which had been despoiled by Athaliah (II Chron. xxiv. 7). To this end the king entrusted to the priests the duty of setting aside all the money resulting from the sale of dedicated things and the money offered by the people. But the twenty-third year of Joash's reign saw the Temple still unrepaired, so the king took away from the priests the charge of the money (II Kings xii. 5–8). In II Chron. xxiv. 5 it is stated that the king ordered the priests and Levites to travel through the cities of Judah and collect money, but that the Levites were slow in their mission. A chest was therefore placed by Jehoiada beside the altar (according to II Chron. xxiv. 8, without the gate and at the command of Joash), in which the princes and all the people placed contributions, and when enough had been collected the money was given to the artisans that restored the Temple (II Kings xii. 10–17; II Chron. xxiv. 8–14). After the death of Jehoiada, Joash proved weak enough to permit himself to be worshiped by the princes of Judah, and this turned the people from the worship of Yhwh. Joash showed his ingratitude toward Jehoiada by slaying the latter's son Zechariah for censuring his (the king's) acts (II Chron. xxiv. 17–22).

An important event in Joash's life is differently stated in II Kings and II Chronicles; according to the former (xii. 18–19 [A. V. 17–18]) when Hazael, the Syrian king, marched against Jerusalem, Joash bribed him with the gold of the royal and sacred treasuries to turn back; in the latter (xxiv. 23–25) it is said that after the Syrian army had destroyed all the princes of Judah the soldiers "executed judgment against Joash," so that they "left him in great diseases." Joash was assassinated by his own servants at Beth-milo, after a reign of forty years, and his assassination is recorded as an act of revenge for the blood of the son of Jehoiada (II Kings xii. 1, 21; II Chron. xxiv. 1, 25). II Kings and II Chronicles differ also with regard to the burial of Joash: according to the former (xii. 22), Joash was buried with his fathers in the city of David, while in the latter (xxiv. 25) it is expressly said that he was buried in the city of David, but "not in the sepulchers of the kings."

E. G. H. M. Sel.

——**In Rabbinical Literature:** As the extermination of the male descendants of David was a divine retribution for the extermination of the priests by David (comp. I Sam. xxii. 17–21), Joash escaped death because in the latter case one priest, Abiathar, survived (Sanh. 95b). The hiding-place of Joash was, according to R. Eleazar, one of the chambers behind the Holy of Holies; according to R. Samuel b. Naḥman, one of the upper chambers of the Temple (Cant. R. i. 66).

Although a king who is the son of a king need not be anointed, exception was made in the case of Joash, as well as of Solomon and Zedekiah, the succession of each of whom was contested (Lev. R. x. 8). Particular mention is made of the crown placed on Joash's head (II Kings xi. 12), because it fitted exactly, showing that he was qualified for kingship ('Ab. Zarah 44a).

Joash was one of the four men who pretended to be gods. He was persuaded thereto particularly by the princes, who said to him. "Wert thou not a god thou couldst not come out alive from the Holy of Holies" (Ex R. viii. 3). He was assassinated by two of his servants, one of whom was a son of an Ammonite woman and the other the offspring of a Moabite (II Chron. xxiv. 26); for God said: "Let the descendants of the two ungrateful families chastise the ungrateful Joash" (Yalk., Ex. 262).

S. S. M. Sel.

2. (Called also **Jehoash.**) King of Israel 798–782 B.C. He was the son and successor of Jehoahaz, and one of the greatest of the Israelitish kings. In three signal and successive victories he overcame the Syrians, and retook from them the towns which Hazael had captured from Israel. He was also involved in a war with Amaziah, King of Judah. In the battle at Beth-shemesh Jehoash defeated Amaziah, advanced to Jerusalem, broke down the wall of that city for a distance of 400 cubits, and carried away to Samaria the treasures of the Temple and of the palace (II Kings xiv. 11–14). Although Jehoash, like his predecessors, worshiped the golden calves, he held the prophet Elisha in high honor, looking up to him as a father. When Elisha was about to die, Jehoash repaired to the bedside of the prophet, "wept over his face, and said, O my father, the chariot of Israel and the horsemen thereof" (*ib.* xiii. 14). Jehoash died soon after his victory over Amaziah, and was buried in Samaria (*ib.* xiv. 16; comp. II Chron. xxv. 17–24).

3. Father of Gideon (Judges vi. 32; II Sam. xi. 21). Joash belonged to the tribe of Manasseh and lived at Ophrah, where he was buried. He must have been a man of importance, because an altar of Baal was in his house, and he had more than ten servants (Judges vi. 25, 27); and he alone was able to check the fury of the people against his son (*ib.* 30-31). See Gideon. M. Sel.

4. Son of Ahab. When the latter was about to set out to meet the Syrians in battle at Ramoth-gilead, he entrusted the prophet Micaiah, whose prophecy had been against him, to Amon, the governor of Samaria, and to Joash, the king's son, saying, "Put this fellow in the prison, and feed him with bread of affliction and with water of affliction, until I come in peace" (I Kings xxii. 26, 27). It may be that Joash was an under-officer of Samaria; or, as Rawlinson suggests, the word translated "king's son" may refer to a state officer, such as is found in Jer. xxxvi. 26. There is no other mention of this Joash. I. M. P.

5. A descendant of Shelah, the son of Judah; one of the men "who had the dominion in Moab" (I Chron. iv. 22). **6.** Son of Shemaah the Gibeathite; one of David's warriors (*ib.* xii. 3). **7.** (יועש.) Son of Becher, the son of Benjamin (*ib.* vii. 8). **8.** Overseer of David's cellars of oil (*ib.* xxvii. 28).

E. G. H. M. Sel.

JOB (איוב).—Biblical Data: Titular hero of the Book of Job. He was a native of Uz, rich, very pious, and upright, and he had seven sons and three daughters. His sons used to make a feast in their houses, one each day; and at the end of the week Job would bring seven holocausts, according to the number of his sons, thinking perhaps that the latter, while feasting, had committed sins (Job i. 1-5).

One day in the heavenly council, in consequence of a question asked by God, Job's piety was discussed by the accuser Satan, who maintained that if Job should be stricken with calamity he would certainly sin. Satan, having received permission to deal with Job as he pleased, first brought poverty on him by causing all his cattle to be stolen; then he caused the death of all Job's children. But Job did not sin. On the contrary, he declared God's act to be just, saying, "The Lord gave, and the Lord hath taken away" (*ib.* i. 6-22).

At a second gathering of the "sons of God" Satan obtained permission to afflict Job's own person. He accordingly smote him with a most painful disease (elephantiasis ?); still Job did not complain. Even when his wife advised him to curse God and die, he replied that he had to accept evil at His hands, just as he had received good (*ib.* ii. 1-10). Three friends came to condole with him, and stayed with him seven days and seven nights in silence (*ib.* ii. 11-13), after which began the colloquies between him and his friends that form the text of the Book of Job.

Finally, God restored Job to his former state, giving him twice as much as he had before, even fourteen sons. The daughters, however, born to him after his restoration were only three in number. Job lived 140 years after this and saw four generations (*ib.* xlii. 10-17). He is mentioned by Ezekiel (Ezek. xiv. 14, 20) with Noah and Daniel as among the three most righteous men. See Job, Book of.

E. G. H. M. Sel.

——**In Rabbinical Literature:** Owing to the importance of the Book of Job, the Talmudists occupied themselves frequently with its chief character. One of the amoraim expressed his opinion in the presence of Samuel b. Naḥmani that Job never existed and that the whole story was a fable (B. B. 15a). An opinion couched in similar words and pronounced by Simeon ben Laḳish was interpreted to mean that such a person as Job existed, but that the narratives in the drama are inventions (Gen. R. lvii.). Apart from these utterances all of the rabbis took it for granted that Job existed, but they differed widely as to the epoch in which he lived and as to his nationality, two points of discussion closely connected. Every one of the Talmudists inferred Job's epoch and nationality from an analogy between two Biblical words or sentences. According to Bar Ḳappara, Job lived in the time of Abraham; according to Abba b. Kahana, in the time of Jacob, he having married Dinah, Jacob's daughter (*ib.*; B. B. 15b; comp. additions in Targ. Yer. to Job ii. 9). R. Levi said that Job lived in the time of Jacob's sons; and he also said, in the name of Jose b. Ḥalafta, that Job was born when Jacob and his children entered Egypt and that he died when the Israelites left that country. Job consequently lived 210 years (comp. Rashi on Ex. xii. 40). When Satan came to accuse the Israelites of being idolaters, God set him against Job, whence Job's misfortunes (Gen. R. *l.c.*).

Opinions as to Date.

This opinion is supported by the statement that Job with Jethro and Balaam was consulted by Pharaoh as to the means of reducing the number of the children of Israel and that Job was stricken with calamity because he had remained silent (Sanh. 106a; Soṭah 11a). It may be mentioned that this legend is narrated differently in the "Sefer ha-Yashar" (section "Shemot," p. 110a, ed. Leghorn, 1870) as follows: At first Job, who was one of Pharaoh's eunuchs and counselors, advised Pharaoh to have every male child murdered (Ex. i. 16). Afterward Pharaoh, having had a dream which prognosticated the birth of a helper, again consulted Job. The latter answered evasively: "Let the king do as he pleases" ("Sefer ha-Yashar," *l.c.* p. 111a). Levi b. Laḥma also held that Job lived in the time of Moses, by whom the Book of Job was written. Some of the rabbis even declare that the one servant of Pharaoh who feared the word of God (Ex. ix. 20) was Job (Ex. R. xii. 3). Raba, specifying the time more accurately, said Job lived in the time of the spies who were sent by Moses to explore the land of Canaan (B. B. 15a). According to these rabbis, Job was a Gentile—an opinion which is elsewhere expressed more fully, in that Job is said to have been a pious Gentile or one of the prophets of the Gentiles (*ib.* 15b; Seder 'Olam R. xxi.). Other tannaim place Job variously in the reign of Saba, in that of the Chaldees, and in that of Ahasuerus. R. Johanan and R. Eleazar both declared that Job was one of those who returned from the Captivity and that his bet ha-midrash was at Tiberias (Yer. Soṭah v. 8; B. B. *l.c.*; Gen. R. *l.c.*). It is said in B. B. (*ib.*) that these tannaim necessarily considered Job an Israelite; but R. Hananeel (*ad loc.*) has in his text, "All the Tannaim and Amoraim, with the exception of the one who placed Job in the time of Jacob, were of opinion that Job was an Israelite" (comp. also Gen. R. *l.c.*).

Job is prominent in haggadic legends. His prosperity is thus described: Samuel b. Isaac said: "He who received a 'peruṭah' from Job prospered in his affairs." Jose b. Ḥanina inferred from Job i. 10 that Job's goats could kill wolves; and R. Johanan inferred from Job i. 14 that God gave Job a foretaste of the bliss of paradise (B. B. 15b). Satan, seeing Job's extraordinary prosperity, was filled with envy and therefore began in the councils of heaven to disparage Job's piety.

According to the Targum Yerushalmi (Job i. 6, ii. 1) the two councils of heaven took place respectively on Rosh ha-Shanah and Yom Kippur. When the messenger told Job that the Sabeans had seized his oxen, he armed his men and prepared to make war upon them. But the second messenger came, telling him that a fire from heaven had destroyed his sheep, and he then said: "Now I can do nothing" (Lev. R. xvii. 4). The wind that blew down his house was one of the three great winds whose power was sufficient to destroy the world (Gen. R. xxiv. 4). Job was stricken by Satan with fifty different plagues (Ex. R. xxiii. 10). His house was filled with a bad smell, and Job sat down on a dunghill. His flesh was filled with worms which made holes in his body and began to quarrel with one another. Job thereupon placed every worm in a hole, saying: "It is my flesh, yet you quarrel about it" (Ab. R. N., ed. Schechter, p. 164; comp. Kohler, Testament of Job, v. 6-8, in Kohut Memorial Volume, pp. 264-295). Job's sufferings lasted twelve months ('Eduy. ii. 10; comp. Testament of Job, v. 9, where the number of years is given as seven); then God, yielding to the prayer of the angels, healed him and restored to him twofold what he had before (Ab. R. N. *l.c.*). Only the number of Job's daughters was not doubled. Nevertheless their beauty was doubled, and therefore their names (Job xlii. 14), indicating their extraordinary charms, are given (B. B. 16b). The legendary accounts of Job extend also to his three friends. These entered his house simultaneously, though they lived 300 miles apart. Each had a crown or, according to another statement, a tree on which the images of the three friends were carved; and when a misfortune befell any one of them his image was altered (*ib.*; comp. Targ. to Job ii. 11). It has been said that Job lived 210 years; this is inferred from Job xlii. 16, where it is said that he lived 140 years after his recovery (Gen. R. lviii. 3, lxi. 4; comp. Yalḳ., Kings, 243, and Testament of Job, xii. 8). It is said also that the whole world mourned Job's death (Soṭah 35a).

Job's Generosity.

But it was chiefly Job's character and piety that concerned the Talmudists. He is particularly represented as a most generous man. Like Abraham, he built an inn at the cross-roads, with four doors opening respectively to the four cardinal points, in order that wayfarers might have no trouble in finding an entrance, and his name was praised by all who knew him. His time was entirely occupied with works of charity, as visiting the sick and the like (Ab. R. N., ed. Schechter, pp. 33-34, 164; Midrash Ma'yan Gannim, ed. Buber, p. 92; comp. Gen. R. xxx. 9). Still more characteristic is the conclusion of Raba that Job used to take away, ostensibly by force, a field which belonged to orphans, and after making it ready for sowing would return it to the owners (B. B. *l.c.*). Job was also of exemplary piety. Like Abraham he recognized God by intuition (Num. R. xiv. 7). Nothing in his possession had been acquired by rapacity, and therefore his prayer was pure (Ex. R. xii. 4). He, Melchizedek, and Enoch were as spotless as Abraham (Midr. Teh. to Ps. xxxvii.). He took the greatest care to keep himself aloof from every unseemly deed (Ab. R. N. ch. ii., Recension B, ed. Schechter, p. 8). According to Targ. Sheni to Esth. i. Job's name was one of the seven engraved on the seven branches of the golden candlestick.

But these features of Job's character made the Rabbis apprehend that he might eclipse Abraham; and some of them therefore depreciated Job's piety. Johanan b. Zakkai used to say that Job's piety was only the result of his fear of punishment (Soṭah 27a; Yer. Soṭah v. 5). In Ab. R. N., Recension A, p. 34, where the generosity of Job is so much praised, it is concluded that when he, after having been afflicted, complained that he was inadequately rewarded, God said to him: "Thy generosity has not yet attained to the half of that of Abraham." R. Levi even went as far as to exculpate Satan, declaring that he had the same apprehension that God might forget the piety of Abraham (B. B. 16a). Still even among the Tannaim Job had his defenders, *e.g.*, Joshua b. Hyrcanus, whose opinion was that Job worshiped God out of pure love (Soṭah *l.c.*). This difference of opinion existed with regard to Job's attitude at the time of his misfortune. R. Eliezer said that Job blasphemed God (the Talmudic expression being "he desired to upset the dish"), but R. Joshua considered that Job spoke harsh words against Satan only (B. B. 16a). This discussion was continued by Abaye and Raba, of whom the former pleaded for Job, while Raba followed R. Eliezer's opinion. Raba's (according to another text, Rab's) expression was "dust into the mouth of Job." He inferred from the passage "and yet Job sinned not with his lips" (Job ii. 10) that Job sinned in his heart (*ib.*).

In the Talmudic literature it is generally assumed that Job sinned or, as the expression is, "he rebelled" ("ba'aṭ"; Midr. Teh. xxvi.). It is further said that if Job had not sinned people would recite in prayer "and the God of Job," just as they recite "the God of Abraham, Isaac, and Jacob," but he rebelled (Pesiḳ. R. Aḥare Mot, ed. Friedmann, p. 190a; comp. Ex. R. xxx. 8). Job's chief complaint was, according to Raba, that although man is driven to sin by the seducer ("yeẓer ha-ra'"), whom God Himself has created, yet he is punished (comp. Job x. 7). But Eliphaz answered him: "Thou castest off fear" (*ib.* xv. 4), meaning, if God created the seducer, He also created the Torah, by which a man can subdue the seducer (B. B. *l.c.*). Raba concluded also that Job denied resurrection (*ib.*).

A more picturesque treatment of Job's bitterness against God is recorded by Rabbah (according to B. B. 16a), or Raba (according to Niddah 52a): Job blasphemed God by using the term "tempest" when he said, "For he breaketh me with a tempest" (Job ix. 17), which passage is interpreted by the Rabbis to mean, "Perhaps a tempest passed before Thee which caused the confusion between איוב [= "Job"] and אויב [= "enemy"]" (comp. also Ecclus. [Sirach] xlix. 9, the Hebrew, Greek, and Syriac versions, and the commentaries *ad loc.*). God therefore answered him out of the tempest (*ib.* xxxviii.-xxxix., which are interpreted as a refutation of Job's charge). Still, Rabbi's opinion was that Job spoke in praise of God more than Elihu did (Ex. R. xxxiv. 1).

It has already been said that the Book of Job was ascribed by the Rabbis to Moses. Its place in the canon is between Psalms and Proverbs (B. B. 14b). The high priest read the Book of Job for diversion before Yom Kippur (Yoma i. 4 [18b]). According to the Talmudists, he who sees the Book of Job in a dream may anticipate a misfortune (Ber. 57b). There was an ancient Targum to Job which was regarded by the Talmudists as a dangerous work (comp. Tosef., Shab. xiv.).

——**Critical View:** The hero whose name has furnished the title of the Book of Job appears only as a legendary figure. It is idle to inquire whether the story has any historical basis, since nothing definite relating to Job can be ascertained. The story originated in the land of Edom—a background that has been retained in the Hebrew poem. The names of Job and his three friends have been partly Hebraized. "Iyyob," the Hebrew form of "Job," is either passive, meaning "the person attacked [by Satan]" (comp. "yillod" = "the born one"; Ex. i. 22; Josh. v. 5; "shilloah" in Job ix. 7 = *ἀπεσταλμένος*), or active, meaning "the attacker [*i.e.*, of the ancient doctrine of retribution]" (comp. Merx, "Das Gedicht von Hiob," 1871, pp. xvii., xxxv.), like "yissor," Job xl. 2 = "the reprover"; the Arabic etymologies given in Ewald, "Das Buch Ijob" (2d ed., 1854, pp. 19 *et seq.*: "the returning, repenting"), and in Hitzig, "Das Buch Hiob" (1874, pp. xix. *et seq.*: from the Arabic tribe "banu Awwab" = "sons of the evening star," *i.e.*, "of the returning one"), are doubtful.

Eliphaz the Temanite (Job ii. 11) appears also in Gen. xxxvi. 4, 11, 15, as Esau's eldest son. Bildad the Shuhite is mentioned only in the Book of Job. According to Nöldeke (in "Z. D. M. G." xlii. 479), the name means "Bel has loved" (comp. "Eldad"). In Gen. xxv. 2 "Shuah" is the name of a tribe, not of a place. "Zophar" also occurs only in the Book of Job. His home, Naamah, is mentioned in Josh. xv. 41 as a city within the Judaic "shefelah." Job's home, Uz (*Χώρα Αὐσίτις* in the Septuagint), is mentioned in Lam. iv. 21 as being in Edom; according to Wetzstein (in Delitzsch, "Hiob," pp. 576 *et seq.*) it was in Hauran, east of the Jordan. For other opinions see Budde, "Das Buch Hiob," 1896, pp. x. *et seq.*

Composite Nature of Book of Job.

The poem of Job as found in the Old Testament is a combination from two sources. The earlier of these, a folk-book, comprises the prologue (Job i. and ii.) and the epilogue (*ib.* xlii. 7-17). According to this source Job was a rich Edomite sheik, of irreproachable piety (*ib.* i. 1, 3, 8), as is shown especially by his punctiliousness in ritual observances (*ib.* i. 5) according to the customs of the time. The accusing angel Satan (*ib.* i. 6) in the presence of God casts reflections on the causes of Job's piety (*ib.* i. 9-11), and, in agreement with the conceit that the evil upon earth is not caused by God directly, but is brought by one or many intermediary angels, receives permission to test Job by misfortune (Gen. xix.; II Sam. xxiv. 16 *et seq.*; Ezek. ix. 4 *et seq.*; comp. *κολαστικὴ δύναμις* in Philo, "Quis Rerum Divinarum Heres Sit," § 34 [ed. Mangey, i. 496]; "middat ha-din" in the Jewish midrash, Gen. R. xii.).

The first trial consists in the destruction of Job's possessions (Job i. 12-19), in which he is the victor through his resignation (*ib.* i. 20-22). Satan declares this trial to have been insufficient, and demands another to consist in personal bodily suffering. This also is granted, and Job is again victorious (*ib.* ii. 1-10). Job's wife (*ib.* ii. 9, 10) here shows how great in such cases is the temptation to do wrong. That the friends of Job, who come to comfort him (*ib.* ii. 11-13), also sin on this occasion is evidenced in Job xlii. 7-10a, where Job, who alone remains guiltless, has to intercede for them when they bring the burnt offerings. The nature of their sin does not appear, since the folk-book is interrupted at this point by the interpolation of the poem of Job (*ib.* iii. 1-xlii. 6).

The folk-book is further differentiated from the poem by its employment of the name of Yhwh, which it naively puts into the mouth of the Edomites (*ib.* i. 7, 21b; xlii. 7). Here again Job refrains from sinning with his lips (*ib.* ii. 10), even in his deepest suffering, and says to Yhwh only what is just ("nekonah"; *ib.* xlii. 7b, 8b), whereas in the poem he utters the most offensive sentiments against God, beginning by cursing the day of his birth.

In the folk-book the sins consist mainly in unseemly speeches to and about God (*ib.* i. 10; xlii. 7, 8; comp. *ib.* i. 22, "natan tiflah"). He who refrains, like Job, is "sar me-ra'" (= "one who escheweth evil") and "yere Elohim" (= "who feareth God") (*ib.* i. 1). In other respects piety here, as among the Patriarchs (Gen. xxii. 3), is a matter of ritual, consisting in burnt offerings (Job i. 5). Job's dress is that worn by the Patriarchs; his flocks are reminiscent of Gen. xii. 16, xxxii. 5; his servants ("'abuddah"), of Gen. xxvi. 14. According to Duhm ("Das Buch Hiob," 1897, p. viii.) Ezek. xiv. 14 *et seq.* indicates that the writer of that passage knew the folk-book.

E. G. H. C. S.

JOB, THE BOOK OF.—Biblical Data: A dramatic poem in forty-two chapters, the characters in which are Job, his wife (mentioned only once, ii. 9), his three friends—Eliphaz, Bildad, and Zophar—Elihu, and God (see Drama, Hebrew). **Ch. i.-ii.:** Prologue, describing Job's prosperity, its disappearance, and the calamities sent upon him at the suggestion of Satan. **Ch. iii.:** Job's complaint. He curses the day he was born; wishes he had died immediately after birth; thinks death preferable to a life of misfortune. **Ch. iv.-v.:** Reply of Eliphaz. He declares that a truly righteous man is never afflicted; that a man sometimes thinks himself just, though he is unjust; hence his complaint. He exhorts Job to turn to God in sincerity, who will surely restore him to well-being. **Ch. vi.-vii.:** Job resumes his complaint. His afflictions are greater than he can bear; his sole desire is to die at once, all his friends having deserted him. He relates his sufferings, and reproaches God, who takes delight in torturing him. **Ch. viii.:** Reply of Bildad. He reproaches Job for his injustice toward God, declaring that if he were really upright, God would not have so afflicted him, and that the prosperity of the wicked, of which Job complains, is unstable. **Ch. ix.-x.:** Job represents God as a capricious tyrant, who lets His hand fall on both the just and the unjust. He maintains that God knows that he is not wicked, and yet tortures him. **Ch. xi.:** Zophar, in reply, accuses Job of wickedness, for which he is being punished, and exhorts him to repent. **Ch. xii.-xiv.:** Job declares that he is as wise as his friends and that he needs not their counsel. God is ruler, and therefore he complains directly to Him of the prosperity of the wicked and of the suffering of the righteous. God, the Omnipotent, ought not to bring under judgment so frail a creature as man. **Ch. xv.:** Eliphaz replies; Job's own words prove his guilt. He repeats the assertion that the prosperity of the wicked is not of long duration.

Complaint and Rejoinders.

Ch. xvi.-xvii.: Job again accuses God of injustice. **Ch. xviii.:** Bildad confirms his friends' assertion that the wicked, in spite of present prosperity, will come to a bad end. **Ch. xix.:** Job accuses his friends of being unjust toward him, laments that now he has none to whom he may go for comfort: God persecutes him, his friends and acquaintances have abandoned him, even his wife turns against him. **Ch. xx.:** Zophar makes the same reply as Bildad in ch. xviii., but in other words. **Ch. xxi.:** Job refutes his friends' assertions, maintaining that only the wicked prosper, that they spend their lives in pleasure and pass swiftly to the grave. Even if misfortune overtakes their children, the wicked have departed, and will know it not. **Ch. xxii.:** Eliphaz asserts that God has no profit in man's righteousness, only man himself profits by it; that Job is being punished for his manifold sins. He again exhorts Job to repentance, telling him that therein he will prosper at last.

Ch. xxiii.-xxiv.: Job complains that, not knowing the abode of God, he can not bring his case directly before Him. Then, changing his theme, he describes the perverseness of the wicked and marvels that God, who sees everything, does not check them. **Ch. xxv.:** Bildad rejoins that man has no right to complain, as he can not be perfect. **Ch. xxvi.-xxxi.:** Job, after declaring to Bildad that he knows well that God is omnipotent and omniscient, cites a parable, maintaining that he is upright and a stranger to wickedness. The wicked are destined to destruction, and will not profit in their great wealth. In ch. xxviii. he exalts wisdom, and contrasts, in the two following chapters, his present condition with his former prosperity. Formerly, he was respected and beloved by all for his generosity and his charitable deeds, and the wicked feared his power. Now, he is mocked by the meanest, by the outlawed; he again speaks harshly against God. He describes his generosity and his uprightness, calling upon God to witness it.

Ch. xxxii.-xxxvii.: Elihu's speeches. Seeing that Job's three friends remained silent, unable to answer him, Elihu takes their place. He had remained silent because the others were older; but being now convinced that wisdom is not in years, he assumed the duty of replying to Job. The chief points of Elihu's speeches are that God is never wrong, that calamity is a warning from God to man to repent, that God, who neither profits in man's righteousness nor suffers in his sins, always chastises the wicked and rewards the righteous.

Speeches of Elihu.

Ch. xxxviii.-xxxix. are theophanous; they present a cosmographical sketch and take the form of questions addressed to Job by God, who speaks to him out of the whirlwind. They tell of the creation of earth, seas, light, darkness, snow, hail, rain, the heavens, and the celestial bodies; the habits of the wild goat, the unicorn, the peacock, the ostrich, the horse, and the eagle are spoken of in passages of great beauty. **Ch. xl.-xli.:** Continuation of God's address with a brief reply from Job. These two chapters describe the nature and habits of the hippopotamus ("behemoth") and the whale ("leviathan"). **Ch. xlii.:** Epilogue; after a short speech from Job declaring his repentance, an account of his restoration to his former state of prosperity is given. The sublime grandeur of the final theophany, the simple directness of the narrative portions, and the imaginative coloring of the soul-problems raised in the book make it, regarded merely as literature, the most striking production of the Hebraic genius. See Job, Biblical Data.

E. C. M. Sel.

——**Critical View:** The poem which is contained in Job iii. 1-xlii. 6, exclusive of later interpolations, discusses a religious problem which could scarcely have been formulated in the early period of the Israelitic people; for it presupposes a high spiritual development and a maturity of judgment which are acquired by a people only after great trials and sore tribulations. This view excludes all the earlier opinions which assign the date of the composition of the poem either to the patriarchal age (so Eichhorn, Jahn, Bertholdt, Haneberg, and others), or to the time of Moses (B. B. 15a), of David (Herder), of Solomon (Schlottmann, Haevernick, and Hahn), and even of Hezekiah (Ewald).

The special problem discussed in Job concerns the justice of the divine government of the world. It could have been formulated only after the principles of that justice had been announced in Deuteronomy; according to which earthly happiness was promised as a reward to the faithful followers of the Law and of Yhwh, and earthly misfortune was held up as a punishment to the recalcitrant (Deut. xxviii.-xxx.). Hence the poem must have been composed after the promulgation of the Deuteronomic code. And the question as to God's dealings with His world must have become paramount at a time when experience directly contradicted the principles laid down in that code. After the reforms of Josiah (622 B.C.) Israel undoubtedly had a right to unalloyed happiness. Instead there came a succession of catastrophes: the defeat of Megiddo (609), and the Babylonian exile (587), by which the congregation of the Lord in Israel in particular was most deeply smitten.

Merx, Stickel, Reuss, Dillmann, Hirzel, Hitzig, and Ley (in "Studien und Kritiken," 1898, pp. 34–70) assume the seventh century B.C. as the date of composition; Gesenius, Vatke ("Biblische Theologie," i. 563), and Duhm ("Das Buch Hiob," p. ix.) place it as late as the fifth century; while Budde ("Das Buch Hiob," p. xiv.) assigns it even to the year 400. But the question involved in the poem must have become imperative, not when righteous Israel was pitted against the heathen evil-doers (as in Hab. i. 2–5, ii. 4), but when the oppressed Israelitic congregation presented a violent contrast to its wicked oppressors who were joined by traitors to their own religion and people. This contrast is found in the Exile, but still more markedly perhaps at the time of the Maccabees, when Israel was persecuted by Antiochus Epiphanes (2d cent. B.C.). The same designations are applied to him in the Book of Job as are found, according to advanced critical views, in the Psalms. On the one hand there are the "resha'im" (Job xx. 5 *et seq.*, xxi. 7 *et seq.*, 16 *et seq.*); the "po'ale awen" (xxxi. 3); the "'ariẓim" (xxvii. 13); the "ḥanef" (xxvii. 8); the "'awwal" (xxix. 17); the "'ashir" (xxvii. 19), etc.; on the other, the "ẓaddiḳim" (xxii. 19); the "ebyonim" (xxiv. 4); and the "'aniyye areẓ" (xxiv. 4b); comp. "'ani we-ebyon" (xxiv. 14 *et seq.*); "yashar" (xxiii. 7); "naḳi" (xxvii. 17), etc. Many catastrophes had been recently witnessed falling upon great nations (xii. 23); *e.g.*, when the Assyrians were vanquished by the Babylonians, and the latter in turn by the Persians. It had indeed become a matter of daily occurrence to witness countries given into the hands of evil-doers, and to see YHWH mock at the despair of the innocent (ix. 23, 24) and to behold the triumph of the wicked (xxi. 7 *et seq.*). The doom of the evil-doer (xv. 20 *et seq.*) is described in terms which seem to allude to the fate of Alexander Jannæus. The language of the speeches in the Book of Job, the late Hebraic words recurring in it (comp. Barth, "Beiträge zur Erklärung des Buches Hiob," 1876, p. 4; Stade, "Lehrbuch der Hebr. Grammatik," 1879, p. 12), and the many Aramaisms (comp. Budde, "Beiträge zur Kritik des Buches Hiob," 1876, p. 141) and Arabisms (comp. Stade, *l.c.* pp. 12 *et seq.*) all point to a comparatively late time.

From the references to many Egyptian matters, Hitzig has assumed that Egypt was the home of the poet; but the passages referring to the hippopotamus and crocodile may be suspected to be later interpolations. The Egyptian mines (xxviii. 1–11) were known in Palestine, as were also the swift ships of the Nile (ix. 26), the papyrus-rolls (xxxi. 36; comp. viii. 11), the war-horse (xxxix. 19), and the pyramids (A. V. "desolate places"; iii. 14). From "them that go by the way" (xxi. 29), also, much may have been learned of foreign countries. The poet himself may have joined caravans (vi. 15–19); the descriptions of the sufferings of the pious in Israel indicate that he also had suffered (xi. 15, 19a; vii. 1–3). He wrote his poem with his heart's blood (Duhm).

The Doctrine of Retribution.

It had become necessary to assail the popular doctrine that obedience to the Law would be rewarded, and its transgression punished. For both of these principles were interpreted in an entirely external way: reward meaning a long and pleasant life (Ex. xx. 12; Lev. xxvi. 3 *et seq.*), and punishment misfortune and an early death (Deut. xxviii. 20 *et seq.*; Lev. xxvi. 15 *et seq.*; Gen. ii. 17 *et seq.*). The leper especially was considered to be smitten by God; hence the term "nega'" (= "blow"; Lev. xiii. 22) for leprosy. The sufferings of the law-abiding Israelite or of the righteous seemed therefore irreconcilable with YHWH's justice and truthfulness; for He smote him who deserved praise, and punished where He had promised a reward.

The ancient doctrine of retribution is developed at great length by Job's three friends. According to it God shows His anger by inflicting suffering; He turns from man as from an enemy (xiii. 24, xix. 11); looks at him angrily (vii. 19a, xiv. 6a, xvi. 9); smites him with His hand (xiii. 21b, xix. 21); makes him afraid by His terrors (ix. 34, xiii. 21b, xxiii. 16); covers him with darkness (xix. 8b); stands in his way (iii. 23); overwhelms him with His power (ix. 12, 13, 19a; xxiii. 6); pierces him with His arrows (vi. 4, xvi. 14); punishes him with His scourge (ix. 23). The poet introduces also the imagery of the prison (vii. 12, xiii. 27, xiv. 16), the net (xix. 6), the storm (ix. 17, xxx. 22), and an army assailing an unfortunate captive (x. 17, xvi. 13, xix. 12), who in the end succumbs (xxx. 12 *et seq.*). He vainly questions how he may have incurred the inscrutable anger of God (x. 2, xiii. 23). The burning pain will not let him rest (xxx. 17). Imagery from the animal world is also used (x. 16). God's hostility calls up fear of further visitation (ix. 18, x. 13–15, xxx. 23) and despair because of the unending misery (ix. 11 *et seq.*, xxiii. 15 *et seq.*), so that the prayer for a short respite (vii. 16–19, x. 20, xiv. 6) is interwoven with the cry for death (vi. 9, 10; vii. 15).

Added to all these sufferings of the stricken one is the bitterness of seeing that his enemies as well as his friends heartlessly consider him to be a sinner branded by God (xvii. 6). His enemies snatch at the opportunity to vent their malice on him (xvi. 10 *et seq.*, xxx. 1–14); his servants and followers refuse him obedience (xix. 15, 16); his wife and children, as well as relatives and friends, abandon him (xii. 4; xix. 13–14, 17–19, 21 *et seq.*). His guilt is assumed as a matter of course, and no one thinks of doubting it; otherwise God would have to be accused of injustice—an accusation that would be the most grievous blasphemy (iv. 7, viii. 3). Hence it becomes the imperative duty of the sufferer to find out, by a frank examination of his past life and thoughts, in what way he has sinned. For there must be some guilt (iv. 18-19, xv. 14-16, xxv. 4-6)—this must be assumed a priori in order to explain the suffering (viii 11, xxii. 5 *et seq.*). If the sufferer admits his guilt God will forgive him (v. 17-27, viii. 5-7, xi. 13-19, xxii. 21-30); but if he obstinately persists in declaring that he is innocent he adds another grievous sin to his former guilt, and his punishment will increase accordingly (xi. 4, xv. 13, xxii. 3-4).

Job's Replies.

In answer to all these arguments of his friends Job insists, in the first place, that the sufferer has the right to complain (vi. 5-7). He points out the heartlessness to which their doctrine leads: for instead of comforting the sufferer in his pain, they reprove him for his alleged sins (vi. 14-22). But it is cheap wisdom to repeat the ancient doctrine of divine retribution in all sorts of variations and to apply these to an unfortunate man (xii. 2-3, xiii. 2, xix. 2-5). Although the supreme power of God makes it impossible to rebel against His blows, the justice of His decrees is not thereby proved (ix. 2-21, 30-35; x. 15-17; xii. 14; xiii. 3; xix. 6 *et seq.*; xxi. 31). Experience shows that in the catastrophes of nature the perfect and the wicked are alike smitten by God (ix. 22-23); and it often happens that the wicked live prosperously to the end of their days (xii. 6; xxi. 7-15, 32 *et seq.*), being made the judges of right and wrong (ix. 24), although occasionally the ancient doctrine of retribution brought them to the bar of justice (xix. 29).

But no power on earth can take away the feeling of innocence from the sinless sufferer, or force him to declare himself guilty against his better convictions (x. 6, 7; xiii. 18 *et seq.*; xvi. 17; xxvii. 5, 6; xxxi. 1 *et seq.*). He has the right to appeal to God's judgment, as being superior to the condemnation his friends pretend to see in his present misfortunes (xii. 4, xiii. 7-10, xvi. 18-20, xix. 17). It is useless to say that no man is clean in the eyes of God (xiv. 4); for even according to that argument it is incomprehensible why the comparatively just person should be most heavily stricken and the worst evildoers go unpunished (vii. 21, xiii. 26, xiv. 17).

The negative result reached by these arguments of the Book of Job may be stated as follows: What hitherto has been called divine justice is merely the display of the omnipotence of God. His decisions are devoid of all moral qualities, and are pronounced indifferently, as blessings or as curses, upon all men, upon the good and the bad alike. In the same way men are prosperous or unhappy according to the fortuitous events of their lives, quite independently of their ethical qualities. The gifts of fortune and the strokes of calamity are in no wise connected either with God's justice or with man's moral nature.

But as these arguments deprived the divine omnipotence, as manifested in the world, of all ethical quality, the danger arose of excluding this quality altogether from the divine nature, and of actually destroying the attribute of justice in God. Hence the poet attempted to rehabilitate the latter in a roundabout way, succeeding, however, only by means of a postulate. He declares that many of the phenomena of nature are indeed the manifestations of an omnipotence that overwhelms man by the terrors of its sublimity (xxvi. 6-14), but that this is not the only thing that nature declares of God. The marvelous law and order of those phenomena, of nature and the multiplicity and curious modes of life of her creatures, are also the manifestations of a hidden wisdom, to which man simply must submit.

Composition of the Book.

The author of the Book of Job incorporated the folk book into his work in a manner still showing traces of the component parts. The use of this preexisting material very cleverly placed the problem outside of Palestine, thereby excluding the possible objection of orthodox theology that such a case—a perfectly righteous man persecuted by Yhwh—could not occur in Israel. Yhwh, moreover, did not inflict the suffering; it was inflicted by Satan with Yhwh's permission. The problem is discussed in a disputation between Job—who like a leper sits on the dust-heap (Ar. "mazbalah") outside the nomad village (on the separation of lepers see II Chron. xxvi. 21)—and his three friends who, according to the folk-book, come to comfort him (ii. 11). In the body of the book, however, they bring no comfort, but heap the bitterest accusations upon Job.

Job opens the discussion with the ancient cry of all sufferers (iii., Hebr.): "O, that I had never been born! and since I was brought into the world, why could I not, even in the hour of birth, have found the eternal rest of Sheol" (comp. Sophocles, "Œdipus Coloneus," line 1225: *τὸ μὴ φῦναι τὸν ἅπαντα νικᾷ λόγον*; Eccl. iv. 2-3); and in his questionings at the end of this monologue (iii. 26 *et seq.*) he formulates the problem as to the cause of this inexplicable suffering. The friends defend the views of the orthodox doctrine of retribution, according to which all suffering is a punishment for some sin; while Job defends the views of the clear conscience, which knows itself to be free from sin, and declares his suffering to be inexplainable from the Old Testament point of view. The discussion is held in a threefold series of dialogues (iv.-xxxi.), in each of which Job alternates once with each of the three friends. Hence arises the following scheme, aside from the additions to be discussed later on: First series of dialogues: Eliphaz (iv.-v.); Job (vi.-vii.); Bildad (viii.); Job (ix.-x.); Zophar (xi.); Job (xii.-xiv.). Second series: Eliphaz (xv.); Job (xvi.-xvii.); Bildad (xviii.); Job (xix.); Zophar (xx.); Job (xxi.). Third series: Eliphaz (xxii.); Job (xxiii.-xxiv.); Bildad (xxv.-xxvi. 5-14); Job (xxvi. 1-4, xxvii. 2-23, xxviii.-xxxi.); Zophar; Job (not in Hebrew text in the Masoretic arrangement). The third series of dialogues especially has been altered by interpolations. The beginning of Bildad's speech (xxv. 1-6) has been separated from the portion continuing it (xxvi. 5-14). It is followed by Job's answer (xxvi. 1-4; xxvii. 2-6; xxix. 1-6, 19, 20, 7-11, 21-23, 12, 13, 15-17, 24, 25, 14, 18; xxx. 1-24, 26-31; xxxi. 1-20; xxx. 25; xxxi. 21-23, 38-40, 24-37, 40; for this arrangement see C. Siegfried, "The Book of Job," critical ed., especially pp. 42 *et seq.*, Leipsic and Baltimore, 1893).

These speeches do not present a direct, continuous train of thought developing or elaborating some central idea. The art and power of Semitic rhetoric consist rather in the rich elaboration of a single thought expressing the same idea in a varied profusion of imagery (comp. Ecclus. [Sirach] i. 5–10; Franz Delitzsch, "Gesch. der Jüdischen Poesie," pp. 21 *et seq.*, Leipsic, 1836). In general it may be said that Eliphaz represents on the whole the proof of authority, basing his arguments on a vision (iv. 12–21). Bildad appeals chiefly to experience, which proves the truth of the doctrine of divine retribution (viii. 8 *et seq.*, xviii. 5–21). Zophar argues with all the fervor of religious conviction and appeals to the divine decision (xi. 5 *et seq.*).

It appears from Job's speeches that, overawed by the veneration clinging to the old sacred doctrine of retribution (xii. 12), he at first does not dare to proclaim his innocence, of which he is so firmly convinced. He begs his friends to grant him the right to complain (vi. 2–13); not to refuse him the comfort he had expected from them (vi. 14–21), nor to attack him so mercilessly (vi. 24–27). He points out that experience shows only that the misfortunes befalling men are manifestations of God's omnipotence, and that because His decisions are strong enough to overcome all resistance it does not necessarily follow that they are just (ix., xii. 7–25). He therefore boldly asks the reason for his suffering (xiii. 18–23).

Second and Third Dialogues.

In the second dialogue Job develops the thought that while in some cases God's judgment is in accordance with the old doctrine of retribution (xxi. 16–21), very frequently just the opposite happens, as appears in the undisturbed good fortune of the wicked (xxi. 7–15, 22–34). He persists, moreover, even more strongly in declaring his innocence, appealing to the judgment of God, who apparently is so hostile to him, but whose justice will ultimately induce Him to become the avenger (go'el) of that innocence (xvi. 17–19, xix. 25–27).

In the third dialogue, as the friends begin to weaken in their attacks, Job emphasizes the impossibility of contending with such an opponent as God. Of course Job must outwardly succumb; but even against God he will maintain his right, and is willing to prove it, if God will appear and answer (xxvii. 1–6, xxxi.). The discussion is ended by YHWH's appearance in the storm (xxxviii.–xxxix. 30, xl. 1–5). YHWH reminds Job of the limitations of human nature, and Job, humbly admitting them, no longer seeks an answer to his question.

Later Additions and Changes in the Text.

In the course of time various interpolations were made in the text of the poem. These comprise: (1) a number of passages that have been placed among the foot-notes in the edition by Siegfried mentioned above; (2) the parallel texts, so called because they are parallel developments of the corresponding passages in the genuine text; *e.g.*, as vii. 1–10; x. 18–22; xii. 4–6; xiv. 1, 2; xiii. 28; xiv. 5, 7–12, 14, 18–22; xvii. 11–16; xl. 6–32; xli. 1–26; xlii. 1–6; (3) corrections and revisions of Job's speeches made for the purpose of harmonizing them with the orthodox doctrine of retribution (these revisions include xii. 7–10 [11, 12 as glosses], 13–25; xiii. 11; xxi. 16–18; xxiv. 13–24; xxvii. 7–23); (4) passages containing a polemic against the ideas expressed in the poem (xxviii. 1–28 and the so-called speeches of Elihu, xxxii.–xxxvii.). Ch. xxviii. rejects the effort to fathom the divine wisdom and to discover the rule of its workings, these being regions into which human understanding and empiric knowledge can not penetrate. Speculation here must give way to faith. The fear of YHWH ("yir'at Adonai"; xxviii. 28), that is, religion, and the departure from evil ("sur me-ra'"), that is, morality, take the place of science, which here has reached the end of its resources.

The speeches of Elihu contradict the fundamental teachings of the genuine poem of Job, according to which it is impossible that the righteous should suffer, all pain being a punishment for some sin. Elihu, however, assumes that suffering may be decreed for the righteous for pedagogic reasons, as a protection against greater sin, and for moral betterment (xxxiii. 17 *et seq.*, 28–30). How little these Elihu speeches come into the general scheme of the poem is shown by the fact that Elihu is not mentioned either in the prologue or in the epilogue, being entirely ignored by YHWH in the latter. They have been defended as genuine by Umbreit, Stickel, Schlottmann, and Budde (1876; and in his commentary [1896], especially pp. xxxv.–xxxviii.). On Studer's criticism in "Jahrb. für Protestantische Theologie" (1875, pp. 688 *et seq.*; 1877, pp. 545 *et seq.*) and in "Das Buch Hiob für Geistliche und Gebildete Laien" (1881) comp. Budde, "Beiträge zur Kritik des Buches Hiob," pp. 77 *et seq.*

Textual Criticism.

The textual criticism of Job must rest on the Masoretic text (see Baer, "Liber Jobi," 1875). As Lagarde has pointed out ("Anmerkungen zur Griechischen Uebersetzung der Proverbien," 1863. pp. 1 *et seq.*), that text goes back to a single original manuscript, so that nothing in regard to textual corrections is gained by a collation of manuscripts. The recently discovered Babylonian Bible manuscripts are important only for the history of the vocalization and accentuation of the Biblical text (comp. Harkavy and Strack, "Katalog der Hebräischen Bibelhandschriften der K. Bibliothek in St. Petersburg," 2 parts, 1875). Jerome, who in his version of Job closely followed the Hebrew, calls for little notice (comp. Hupfeld, "Beleuchtung Dunkler Stellen in der Alttestamentlichen Textgesch." in "Studien und Kritiken," 1830, pp. 1571 *et seq.*; Nowack, "Die Bedeutung des Hieronymus für die Alttestamentliche Textkritik," Göttingen, 1875).

Translations.

The Septuagint version, being a very free rendering of the Book of Job (comp. Bickell, "De Indole ac Ratione Versionis Alexandrinæ in Interpretando Libro Jobi," 1862), must be used very cautiously; yet it can not be denied that it contains many traces of the correct reading (comp. A. Merx, "Das Gedicht von Hiob," 1891; C. Siegfried, "The Book of Job," 1893). For the Targum of Job see W. Bacher in "Monatsschrift," xx. 208–223. The Syriac translation ("Peshiṭta") may also be consulted, but as it was corrected after the Septuagint, its agreement with the latter does not mean much textually. For the Arabic translation of the poem by Saadia Gaon see I. Cohn, Altona, 1889; "Œuvres Complètes de R. Saadia Gaon," v. (ed. Bacher), Paris, 1899. Emendations of the poem must often be based on conjecture.

E. G. H. C. S.

JOB, TESTAMENT OF: Greek apocryphal book, containing a haggadic story of Job. It was first published by Angelo Mai in the seventh volume of the "Scriptorum Veterum Nova Collectio" (pp. 180–191, Rome, 1833), and was translated in Migne's "Dictionnaire des Apocryphes" (ii. 403), but remained unnoticed by critics until Montague Rhodes James, in his notes to the "Testament of Abraham" (in "Texts and Studies," p. 155, Cambridge, 1892), called attention to it. Kohler, in the "Kohut Memorial Volume" (1897, pp. 264–338), republished and translated Mai's text, with introduction and notes, and about the same time M. R. James reedited the work, after a Paris manuscript (which gives a text by no means superior in value to Mai's), in "Apocrypha Anecdota" (pp. 104–137, Cambridge, 1897, with an introduction). The book was condemned as apocryphal by Pope Gelasius I., about 496, in his decree concerning canonical and noncanonical books. In Mai's version it has a double title: "Testament of Job the Blameless, the Conqueror in Many Contests, the Sainted" (which seems to be the older title) and "The Book of Job Called Jobab, and His Life, and the Transcript of His Testament." For the identification of Job with Jobab (Gen. xxxvi. 33) see Septuagint, Job xlii.; also Aristeas, in Eusebius, "Præparatio Evangelica," ix. 25; comp. Kohler, *l.c.* pp. 267 *et seq.*, and James, *l.c.* p. lxxxv.).

Contents of the Book.

Like the Patriarchs (comp. Test. Patr., Adam, 14, and Tan., Wayeḥi, 8, ed. Buber, and Bo, 2), Job in a farewell address to his children reviews his life, telling them that he is of the generation of Abraham, a descendant of Esau (Gen. *l.c.*), and was known as "Jobab," a rich ruler of the land of Uz (Ausitis), before God called him "Job" because of his martyrdom (see Job, Critical View); that his second wife, their mother, was Dinah, the daughter of Jacob (comp. B. B. 15b). Like Abraham, he had changed from idolatry to the worship of the true God, the Maker of heaven and earth (comp. Num. R. xiv.); yet as he had set out to destroy the idols of the land, the work of Satan, he had been told by the archangel of God to prepare for a lifelong battle with Satan, but at the same time he had been promised lasting renown as a great spiritual athlete and a crown of amaranth in the world to come, after the resurrection. "I shall from love of God endure until the end," Job said, and received from the angel the seal of life (comp. Soṭah v. 5, and Kohler, *l.c.* pp. 271, 316). Satan, after having first attempted, in the guise of a beggar, to get Job into his power, but without success, secured from God permission (comp. Targ. Job i. 12) to take away all his possessions (ch. i.–ii., ed. Kohler; ch. i.–viii., ed. James). Job then relates how he used his great wealth for the benefit of the poor; how of the 130,000 sheep he owned he separated 7,000 for the clothing of orphans and widows, of poor and sick; 800 dogs watched his sheep (comp. Job xxx. 1), and 200 his house. Of his 9,000 camels he caused 3,000 to work for the poor; and he sent out ships laden with goods for the feeble, sick, and unfortunate. Of the 130,000 (340,000, Mai's text) wild asses in his possession he set 500 aside, and the offspring and all the proceeds therefrom were given to the needy.

His Wealth and Charity.

The four doors of his house were opened to the poor, who came from all parts of the country to enjoy his hospitality (comp. Gen. R. xlviii., lxix.; Ab. R. N., ed. Schechter, i. 7, ii. 14). Thirty tables loaded with all kinds of food were set for the strangers, twelve of them for widows, and none were turned away hungry. Of his 3,500 yokes of oxen, 500 were for the use of the poor. He employed fifty bakeries for the bread of the poor (comp. Ber. 58b; Ḥana b. Ḥanilai) and assigned special slaves to serve them at the tables. Some poor persons were hired for that purpose, so that they might support themselves; he released many poor from their indebtedness. The milk of his cows and ewes flowed in such plenty that passers-by were invited to take a share (comp. Job xxix. 6), and the servants that distributed the meat among the widows and the poor were so overburdened with their task that they broke out into cursings (comp. Job xxxi. 31). At the table slaves played on harps and on other musical instruments, and he himself took the cithara, intoning a song of thanksgiving and praise to God (comp. Gen. R. xlix., liv., and Ab. R. N., ed. Schechter, Text A, vii.; Text B, xiv. 33–34). After each feast held by his children in turn, to atone for any possible offenses committed by them through pride, he not only offered sacrifices (Job i. 5) but also gave gifts of charity to the poor.

Satan's Mischief.

These things, however, Satan begrudged Job, so he destroyed his sheep and camels and herds by fire, or had them taken by marauders. Finding that Job in his piety still gave praise to God, instead of blaspheming, he came in the guise of the King of Persia and besieged his city, capturing all the goods thereof; then he overthrew the house of Job and killed all his children, and everything he possessed was taken. Yet under all these sad happenings Job bravely spoke the words: "The Lord gave, and the Lord hath taken away; blessed be the name of the Lord" (Job i. 21). While Job sat on his throne mourning over his children, Satan came in the form of a great hurricane (comp. "ruaḥ ḳozmiḳon," Gen. R. xxiv.; Yer. Ber. ix. 13d; Mek., Beshallaḥ, to Ex. xiv. 24), threw him upon the ground, and smote him from head to foot with leprosy, so that his whole body was covered with sores and worms (comp. Ab. R. N. *l.c.*; Tischendorf, "Apocalypses, Apocrypha," p. 67). For seven years (48 years; Paris MS.) he sat on a dunghill outside of the city, while his wife, Sitis, who had been brought up in royal luxury, served as water-carrier to win bread for herself and him. Afterward (after 15 years; Paris MS.), when she was no longer allowed to take him bread, Satan, disguised as a bread-seller, went to meet her, asking, as the price of three loaves of bread for her starving husband, for the hair on her head; to save her husband from famishing, she consented (comp. Shab. 59a; Akiba's wife). At last, when under the influence of Satan, her patience gave way, and in an impassioned appeal, full of pathos (contrasting her former riches and glory with her present state of gloom and poverty) and poetic grandeur, she called upon Job to curse God and die (comp. LXX. Job ii. 9). Job, however, indignantly rebuked her, and challenged Satan, who had been hidden behind her all this while, saying: "Only a coward fights with frail woman; come forth and wage war with me!" Then Satan broke forth into tears, and said, "I yield to thee who art the great wrestler," and left him, abashed (ch. iii.-vi., ed. Kohler; ix.-xxvii., ed. James; comp. B. B. 16a: "The grief of Satan was greater than that of Job"). As to Job, the great "athlete" or "wrestler," see IV Macc. vi. 10, xvii. 15-16; and Philo [where Job is frequently characterized as such]; comp. Heb. x. 32.

The Three Friends of Job.

The three friends of Job, kings like himself, Eliphaz, King of Teman (comp. Targ. to Gen. xxxvi. 12; "Ma‘yan Gannim," ed. Buber, p. 9), Bildad of Shuah (Gen. xxv. 2), and Zophar (B. B. 15b; Yalḳ. i. 766), who had come with their body-guards to see him, were dumfounded at finding Job, who had excelled them all in wealth, in such a state; Eliphaz offered a song of lamentation, in which all joined, recalling all Job's former splendor, each strophe ending with the refrain "Whither has thy glory gone?" Job in his reply pointed to "the splendor and glory that will be mine at the right hand of the Savior in heaven among the Holy Ones in the imperishable world. Kings perish and their glory vanishes like the shadow in a mirror, but God's kingdom lasts forever, and its glory is in the chariot of my Father" (ch. vii., ed. Kohler; xxviii.-xxxiii., ed. James). The whole chapter is a most powerful effusion of Ḥasidean sentiment, and has its exact parallel in the penitential prayer of Asenath (see Jew. Encyc. ii. 173, *s.v.* Asenath).

"The Dead Shall Live."

Eliphaz, on hearing Job in his abject state speak thus contemptuously of his friends and their glory, became furious, and said, "Let us go hence!" but Bildad, pacifying him, said, "Instead of upbraiding a man thus afflicted, let us see whether his mind has not given way under his great ordeal." Bildad accordingly began arguing with Job concerning God and destiny. Job, however, proved to be his superior in wisdom, and showed that he was initiated into the mysteries of God which he (like the Essenes) would not betray. Finally, Zophar, stepping forth, said: "We have brought our physicians with us to cure you"; but Job declined, saying, "My cure cometh from God, the Maker of physicians." Here follows a remarkable scene. While the friends were thus conversing Sitis appeared, dressed in rags, and prostrated herself before the kings, asking them for the sake of their former friendship to have the bodies of her children taken out from the ruins of her house in order that they might be given decent burial. But Job interfered, saying, "My children will not be found; they have been taken up to their Master in heaven." "Behold, he raves!" the kings exclaimed; but instantly Job spelled the Ineffable Name, and all beheld the children of Job, with crowns on their heads, near the throne of God. Sitis, overcome with emotion, went back to her master, lay down in the manger of his cattle, and died. The animals and afterward all the people of the city wept and mourned for her, and the dirge that was sung (says the writer) "is found in the Chronicles" (ch. ix., ed. Kohler; xxxiii.-xl., ed. James).

Elihu, the Satanic Beast.

These marvelous things, however, did not prevent the friends of Job from contending that he must have sinned terribly to have brought upon himself so much suffering, and when he resented these insinuations, Elihu came forward, imbued with the spirit of Satan, and spoke hard words to Job. God showed Job afterward that Elihu was a wild beast ("serpent"), not a man (comp. Elihu as identified with Baalam in Yer. Soṭah v. 20d). The three friends finally confessed their error, brought to Job animals to be offered as sin-offerings to the Lord, and obtained pardon through Job; Elihu, however, was not pardoned. A peculiar lyric song closes this episode, in which the three friends offer praise that their sin is taken away, while Elihu, "the evil one, the son of darkness, the lover of the Serpent, the Northern One ["Zephoni"], and the hater of the saints," is cast into Sheol.

The story of Job's restoration to health is missing in the narrative. It continues with Job's return to the city, where he held a feast of thanksgiving, asking the people each to give him a lamb for the clothing of the poor and four drachmas of gold or silver for their support. Thus taking up again his former work of charity, he soon became rich, married Dinah, and became the father of ten children, as before. Job finally admonishes his sons, summing up his ethics and his religion in the following precepts: "Forsake not the Lord! Be charitable to the poor and do not disregard the feeble. Take not unto yourselves wives from strangers." This last command proves beyond the possibility of doubt that the book is Jewish in character and conception.

After having distributed his property among his seven sons, Job gave to each of his three daughters, out of a hidden treasure-box, three-stringed girdles which God had given him that by their magic power he might be cured of his leprosy and be endowed with new physical and spiritual strength, so that he might forecast all the secrets of the future. As soon as his daughters put these girdles around their bodies they were transfigured, and, in the voices of angels, archangels (heavenly archons), and cherubim, sang hymns echoing the mysteries of heaven, all of which were written down by Nahor, the brother of Job.

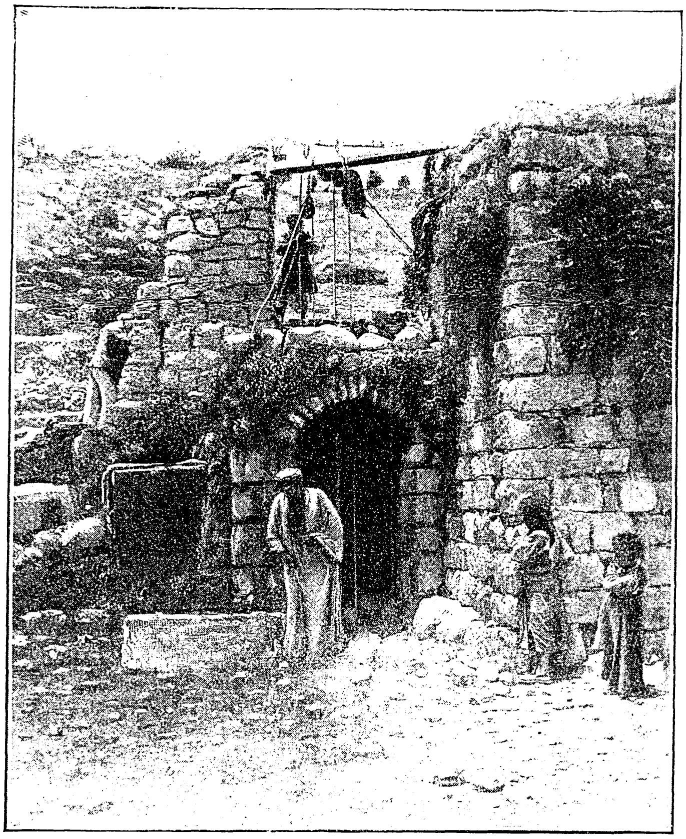
Job's Three Daughters.

Job, on seeing death approach, gave a cithara to his first daughter, Day ("Yemimah"), a censer to his second, Kassiah ("Perfume"), and a timbrel to his third, Amaltheas Horn ("Ḳeren ha-Puk"), that they might welcome the holy angels who came to take his soul; and while they played and glorified God in the holy dialect, He who sitteth upon the Great Chariot came and took the soul of Job away with a kiss and carried it eastward, where the Heavenly Throne is erected. Amid the singing of his daughters and the great mourning of the people, particularly the poor and the fatherless, his body was taken to the grave. The dirge is given at the close of the book (ch. xi.-xii., ed. Kohler; xli.-lii., ed. James).

James (*l.c.* Introduction) hesitates to assign the whole book to Jewish sources, but the Midrashic parallels in Kohler (*l.c.*) sufficiently prove that the work is one of the most remarkable productions of the pre-Christian era, explicable only when viewed in the light of ancient Ḥasidean practise.

T. K.

JOB, WELL OF (the modern Bir Ayyub and the Biblical **En-rogel** [Josh. xv. 7, lxviii. 26; II Sam. xvii. 17; I Kings i. 9]): A deep well, situated just below the junction of the valley of Hinnom with that of Jehoshaphat, the channel of the Kidron being at this point 345 feet lower than the level of the Temple plateau. The well is of an irregular quadrilateral form, walled up with large square stones—according to Al-Ḳasim, five yards in length and two in height (Mujir al-Din, "History of Jerusalem," anno 1495 P.C., published in "Fundgruben des Orients," ii. 130). Titus Tobler (in "Das Ausland," 1866, No. 12) reports its depth to be 38 meters. When Robinson ("Bibl. Researches," i. 332) visited it, he found 50 feet of water, which he describes as sweet but not very cold. In the rainy season the well fills up and sometimes overflows at the mouth, the overflow being considered by the inhabitants of the adjacent village of Silwan to be the augury of a fertile year. Usually, however, the water runs off under the surface, finding an outlet 40 yards below.



Job's Well, South of Jerusalem.
(From a photograph by the American Colony, Jerusalem.)

Besides in Mujir al-Din's history, "Well of Job" occurs for "En-rogel" in the Arabic version of Joshua in the Paris and London polyglots (Josh. xv. 7). The well is not mentioned by the earlier historians of the Crusades; but later it is designated the "Well of Nehemiah," and is identified with the "Well of Fire," on the supposition that it was in this well that Nehemiah hid the sacred fire during the Captivity (II Macc. i. 19-22; Robinson, *l.c.* p. 331, note 5). It is designated also the "Well of Jeremiah" (Tobler, "Die Topographie von Jerusalem," etc., ii. 50, note 3).

The Jewish itinerary published by Hottinger in his "Cippi Hebraici" gives it the name "Well of Joab," supposedly on the strength of I Kings i. 7, 9 (see Schwarz, "Palästina," pp. 288 *et seq.*). But as this designation occurs only after the sixteenth century, "Job" in this connection can not be, as has been suggested, a corruption of "Joab," the reverse being true. The identification given by Brocardus with the En-rogel of the Old Testament admits of no doubt, Josephus notwithstanding ("Ant." vii. 14, § 4, where En-rogel is described as situated in the royal gardens). E. G. H.

JOBAB: 1. Son of Joktan the Shemite (Gen. x. 29; I Chron. i. 23).

2. Son of Zerah of Bozrah; second king of Edom (Gen. xxxvi. 33, 34; I Chron. i. 44-45). In the Greek version of the Book of Job, at the end, there is the following addition: "This man is described in the Syriac book as living in the land of Ausis, on the borders of Idumæa and Arabia; and his name before was Jobab: and he, having taken an Arabian wife, begot a son whose name was Ennon. And he himself was the son of Zare, who was one of the sons of Esau, and Bosorrha; so that he was the fifth in descent from Abraham. And these were the kings who reigned in Edom, which country he also ruled over: first Balak, the son of Beor, and the name of his city was Dennaba; and after Balak Jobab," etc. From this it has been supposed that this Jobab was identical with Job.

3. Canaanitish king of Madon (LXX. "Maron"), whose aid Jabin, King of Hazor, invoked in the struggle with the Israelites (Josh. xi. 1).

4. Son of Shaharaim by his wife Hodesh (LXX. "Ada"); of the tribe of Benjamin, although apparently born in Moab (I Chron. viii. 8–9). In the Septuagint this Jobab is called "Jolab."

5. A Benjamite, son of Elpaal (I Chron. viii. 18).

E. G. H. B. P.

JOCEUS (JOCE) OF YORK: English Jew of the preexpulsion period; leader of the York community at the time of the massacre in 1190. He is mentioned in the first English sheṭar, of 1176 (Jacobs, "Jews of Angevin England," p. 58). He was one of those who attended the coronation of Richard I., doubtless as the representative of the York congregation, and escaped the massacre (*ib.* p. 101). On his return to York, where he had a house which rivaled a citadel in the scale and magnificence of its construction, he was attacked by the mob, and with his wife and children joined other fugitives who sought refuge in Clifford's Tower. When the decision was reached to put one another to death rather than fall into the hands of the enemy, Joceus was the first to act, slaying his wife, Anna, and his children; he himself was slain last by Yom-Ṭob of Joigny (*ib.* p. 127).

It is probable that Joceus and Samuel Hoppecole held the land in London on which the chief synagogue was built (*ib.* p. 234). J.

JOCHANAN. See JOHANAN.

JOCHEBED (יוכבד).—Biblical Data: Wife and aunt of Amram, and mother of Aaron, Moses, and Miriam (Ex. vi. 20). She was the daughter of Levi, and was born in Egypt (Num. xxvi. 59). In the account of Moses' birth, Jochebed is indicated merely as being the daughter of Levi, her name not being given (Ex. ii. 1).

E. G. H. M. SEL.

——**In Rabbinical Literature:** Jochebed is identified by the Talmudists with Shiphrah, one of the midwives ordered by Pharaoh to kill the new-born male children (Ex. i. 15 *et seq.*); the name is given various interpretations (Soṭah 11b; Ex. R. i. 17). The "houses" with which God recompensed the midwives (Ex. i. 21) were those of priesthood and royalty, realized, in the case of Jochebed, in the persons of her two sons Aaron and Moses (Ex. R. xlviii. 5). She is further identified with Jehudijah (I Chron. iv. 18), this name, interpreted as "the Jewess," being given to her because, by disobeying Pharaoh's order, she founded the Jewish nation (Lev. R. i. 3). To elucidate Gen. xlvi. 15, where the children of Leah are said to be thirty-three, while only thirty-two are enumerated, the Midrash names Jochebed as the thirty-third. But as this would appear to conflict with Num. xxvi. 59, where Jochebed is said to have been born in Egypt, it is further explained that she was born when her parents were entering Egypt, in the "gateway of the city" (Gen. R. xciv. 8; Ex. R. i. 23).

Moses was eighty years old when the Israelites went out from Egypt (comp. Ex. vii. 7), and the Israelites were in Egypt 210 years; Jochebed therefore was 130 years old when she bore Moses. An allusion to this is found in the weight (130 shekels) of the silver chargers offered by the princes for the dedication of the altar (Ex. R. i. 23; Num. R. xiii. 19).

The Midrash also explains why Jochebed could hide Moses no longer than three months. When Pharaoh had given the order to throw the male children into the river, Amram repudiated Jochebed, who had been pregnant three months. But, urged by Miriam, he immediately remarried her, and the Egyptians calculated the time for Moses' birth from that day (Ex. R. i. 17). The second wedding was as splendid as the first; Jochebed sat in her nuptial chamber, and Miriam and Aaron danced before her (*ib.* i. 23). The story of Jochebed was used by Rabbi (R. Judah ha-Nasi) to divert his audience when they became sleepy. There was once a woman in Egypt, he told them, who gave birth to 600,000 children at once; on being asked who that woman was, he said she was Jochebed, whose son Moses was worth 600,000 Israelites (Cant. R. iv. 2).

In the Maḥzor Romi (p. 79a, Mantua, 1718) there is a piyyuṭ for Simḥat Torah, beginning "Azlat Yokebed," the subject of which is Jochebed's lamentation over Moses' death (comp. Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," pp. 128 and xlv.).

S. S. M. SEL.

JOCHELSON, WALDEMAR: Russian explorer and ethnologist; born in Wilna Jan. 1, 1856. He graduated from the gymnasium of Wilna, and became identified with the revolutionary movement. Compelled to leave Russia (1880), he went to Switzerland, where he remained four years, studying at Zurich and Bern, and keeping in touch with the revolutionary movement as editor of the "Vyestnik Narodnoi Voli," which had a clandestine circulation in Russia. On his return to Russia in 1884 he was arrested and confined for three years in the Petro-Pavlovsk fortress in St. Petersburg, and in 1887 was sentenced by order of the czar to exile for ten years in northern Siberia, in the province of Yakutsk.

In Siberia Jochelson made a special study of the language, manners, and folk-lore of the aboriginal inhabitants, especially that of the Tungus, Yakuts, and the fast-disappearing Yukaghirs. His articles on those subjects began to attract attention, and in 1894 he and a fellow exile, **Bogoras (Tan,** also of Jewish descent), were by special permission attached to the first expedition of the Imperial Russian Geographical Society (1894–97), which had been sent to that part of Siberia at the expense of a wealthy Russian promoter of art and science named Sibiryakov. On that expedition Jochelson discovered among the natives in the outlying regions two Yukaghir dialects then considered as extinct. The Imperial Geographical Society published his discoveries in the field of ethnology, while the linguistic reports of his investigation were acquired for publication by the Imperial Academy of Science.

When the Jessup expedition to north Asia was being fitted out by the American Museum of Natural History (New York), the Russian Imperial Academy of Science, in answer to a request, recommended Jochelson and the above-named Bogoras as the men best fitted to contribute to its success by knowledge of the country and of the native dialects. After another two years and a half in the distant north, Jochelson returned with the expedition to the United States, and is now (1904) studying there the material which he and his wife, who accompanied him in the last journey, have collected. Jochelson's chief work on his special subject is "Materyaly po Izucheniyu Yukagirskavo Yazyka i Folklora" (Material for the Study of the Language and Folk-Lore of the Yukaghirs), published by the Imperial Academy of Science (vol. i., St. Petersburg, 1900). He wrote also "Ueber die Sprache und Schrift der Jukagiren" (Bern, 1900). He has contributed largely to scientific journals in various languages.

JOEL.—1. Biblical Data: The superscription of the second book of the so-called Minor Prophets names as the author of the book "Joel, the son of Pethuel." Further historical record is wanting. It is even impossible to get an idea of the prophet's personality from the contents of his book, because, in correspondence with its partly oratorical, partly visionary style, all personal traits have been omitted. Only this can be concluded from his writing, that he was a Judean and that at the time of his prophetical activity he lived in Jerusalem. On the other hand, imaginative suppositions try to prove from passages like Joel i. 9, 13; ii. 17 that he belonged to the tribe of Levi.

——**Critical View:** The name "Joel" was quite common, being borne by the first-born son of Samuel (I Sam. viii. 2), and by prominent Levites of the time of David (I Chron. vi. 18 *et seq.*) and of Hezekiah (II Chron. xxix. 12). "Joel" means "Yhwh is God" (comp. Ps. l. 1; Jer. xxii. 24); it is, therefore, the transposed form of אליהו. In the face of this clearly recognizable and wholly appropriate meaning of the name, it is not necessary to suppose (with Baudissin) that it is the jussive of הואיל (= "may He [*i.e.*, God] prove"); nor (with Nestle) that it is the participle of יאל, which, corresponding to the proper names ויל or ואל (Arabic, "wa'il") occurring often in the Sinaitic inscriptions, is supposed to mean "strong-willed." The fact that יאל is found also as a Phenician proper name (see "C. I. S." 132), proves nothing against the most natural interpretation of the name.

What non-Biblical sources tell of the prophet belongs to the realm of fable. According to pseudo-Epiphanius (ii. 245), Joel was from the town Bethor of the tribe of Reuben; but according to the Syrian pseudo-Epiphanius, the true reading is "Bet Me'on" (to be read instead of בית מרון), the place mentioned in the Mesha inscription (line 9) as Moabitic, but which, according to Josh. xiii. 17, originally belonged to Reuben.

V. Ry.

2. Eldest son of Samuel and father of Heman the singer (I Sam. viii. 2; I Chron. vi. 18 [A. V. vi. 33]). His name is omitted in I Chron. vi. 13 (A. V. vi. 28); the word והשני (= "and the second one"), corrupted into ושני, is erroneously supposed to be the name given by the chronicler to the eldest son of Samuel. Joel and his younger brother Abiah, or Abijah, were made judges in Beer-sheba when Samuel was old and could no longer make his usual circuit (comp. I Sam. vii. 16, 17). They disgraced their office by taking bribes and perverting judgment; and their misdeeds provoked the people to ask for a king (*ib.* viii. 5 *et seq.*). For the different opinions of the Talmudists with respect to the sins of these two judges see Abijah in Rabbinical Literature.

3. An ancestor of Samuel who is mentioned in I Chron. vi. 21 (A.V. 36), and who in verse 9 (A.V. 24) is called "Shaul." **4.** A Simeonite prince (*ib.* iv. 35). **5.** A Reubenite; father of Shemaiah (*ib.* v. 4, 8). **6.** A Gadite chief (*ib.* v. 12). **7.** A chief of Issachar (*ib.* vii. 3). **8.** One of David's mighty men, indicated as the brother of Nathan (*ib.* xi. 38). In the parallel list of II Sam. xxiii. 36 he is called "Igal, the son of Nathan." **9.** A Gershonite Levite, a prince in the time of David (I Chron. xv. 7, xxiii. 8, xxvi. 22). **10.** Son of Pedaiah; a Manassite chief in the time of David (*ib.* xxvii. 20). **11.** A Kohathite Levite in the time of Hezekiah (II Chron. xxix. 12; comp. No. 2, above). **12.** One of those who married foreign wives (Ezra x. 43). **13.** Son of Zichri; a Benjamite overseer after the Exile (Neh. xi. 9).

E. G. H. M. Sel.

JOEL, BOOK OF.—Biblical Data: The prophecies of the Book of Joel are divided into two parts, comprising respectively (1) ch. i. 2–ii. 17 and (2) ch. ii. 18–iv. 21. The contents of the first part may be summarized as follows:

The prophet at the beginning calls the attention of the elders and of all the inhabitants of the land to a coming event the like of which has never been seen, a terrible visitation by locusts (i. 2–7), which will be coincident with a famine, and which will together reduce the entire land to the bitterest misery (i. 10–12, 16–20). The prophet exhorts the people to fast, to pray, and to mourn (i. 13 *et seq.*, ii. 1–12 *et seq.*). In this double visitation the prophet perceives the approach of the "day of the Lord" (i. 15), which is to be ushered in by a terrible affliction (ii. 2–11) unless the people become truly repentant (ii. 12–17).

In the second part it is first related how the people did actually bring about a gracious change in God's plans by obeying the prophet's injunctions (ii. 18); this is followed by Yhwh's answer to the prayer of the people (ii. 19 *et seq.*); then there is the promise of relief from famine through abundant rains and through a marvelous fruitfulness, after which the spirit of prophecy is to be poured out over all flesh, and the day of the Lord will draw near, accompanied by terrifying signs in heaven and earth. These terrors, however, are not for the Jews, who will be rescued in the day of judgment because they called on the Lord, but for their enemies (iii. 1–5). At the time of the change in the fate of Judah and Jerusalem the Lord will gather all nations into the valley of Jehoshaphat (see Jehoshaphat, Valley of), there to be destroyed through the fulfilment of the divine judgment of wrath (iv. 11–13), because they have plundered the treasuries of the Lord and have sold the sons of Judah and of Jerusalem to the sons of the Grecians (iv. 5–8). God will be a refuge for His people (iv. 16); strangers will no longer pass through Jerusalem (iv. 17); the soil of Judah will become exceedingly fruitful, and a fountain will even water the valley of Shittim (*i.e.*, the unfruitful Jordan valley), whereas Egypt and Edom will be changed into a wilderness on account of the evil they have done to Judah (iv. 18–19).

Duplicate Character.

——**Critical View: § 1.** That Joel consists of two parts appears from ii. 18, which, if the rules of Hebrew syntax are applied, must be construed as a narrative reporting the change of God's attitude subsequent to the exhortation to repentance. Only through a misunderstanding of the method of Hebrew narrative will the demand be urged, in opposition to this construction, that such a report should necessarily include the story of the actual accomplishment of penitence. Stylistic carelessness is very usual in Hebrew narrative; and the act of penitence is left to be supplied by the reader from the context—*i.e.*, in this instance from the prophetical exhortation to repentance (the accomplished penitence must be supplied between verses 17 and 18). On the other hand, neither the interpretation of the imperfects in verse 17 as jussives nor even the reading of the consecutive imperfects (וַיְקַנֵּא, etc.) as simple historical imperfects (וְיקַנֵּא, etc.) justifies the following translation approved by De Wette, Baudissin, and others: "Then will Yhwh be jealous for His land and will protect His people; and Yhwh will speak and say to His people," etc. In this rendering, which is inadmissible on linguistic grounds, the words following verse 17 appear as a promise connected with the foregoing petition for a return to favor, and the prophecy of Joel would then form a consecutive whole. But even the acceptance of this theory would not remove the difficulties in the way of fixing the time of Joel's prophecy.

§ 2. Date of the Book: Theory of a Pre-Exilic Period: (*a*) According to the formerly generally accepted opinion, Joel wrote in the beginning of the reign of King Joash (836–797 B.C.), and was therefore the oldest prophet to leave a book of prophecies. This theory of an early date of composition was, above all, strongly supported by the fact that no mention is made of the Assyrians.

The beginning of the reign of Joash was urged in view of the failure of the book to refer to or to name the Damascus Syrians, who, according to II Kings xii. 18 *et seq.*, seriously threatened Jerusalem under Joash (comp. Hazael).

Reasons for the Time of Joash.

In further support of this theory stress was laid on the absence of any reference to the king, which would point to the period of the minority of Joash, while the predominance of the priestly influence led to the conclusion that Joash, at the beginning of his reign, was under the influence of the high priest Jehoiada. Another point of agreement in favor of this date was the hostility shown to the Israelites by the nations, mentioned in iv. (A.V. iii.) 4, 19, which was made to refer to the rebellion of the Edomites under King Jehoram of Judah (849–842 B.C.), on which occasion the Arabs and the Philistines plundered Jerusalem (II Chron. xxi. 8 *et seq.*, 16 *et seq.*; comp. § 3, below).

Reasons for the Time of Josiah.

(*b*) König places the composition of the book at a much later date, but still in the pre-exilic period; namely, in the time of King Josiah, or in the period immediately following. His reasons are these: The form of the prophecies is too finished to date from the beginning of the prophetic style of writing; indeed, the linguistic character is that of about the seventh century B.C. Moreover, the contents reflect the time of Josiah, because it was then that the great famine occurred which Jeremiah (Jer. xiv. 2–6) describes in a similar way to Joel. Finally, the mention of the Egyptians points to the last years of Josiah (or else those immediately following), referring to Josiah's campaign against the Egyptians. The fact that neither the Assyrians nor the Babylonians are alluded to militates against König's dating, since all the other pre-exilic prophets, from Amos to Jeremiah, recognize God's judgment, which is to fall on His people precisely in the extension of the Assyrian and, later, of the Babylonian empire.

Theory of a Post-Exilic Period: This theory was first, and in the beginning rather hesitatingly, brought forward by Vatke; since then it has been adopted by Merx (who takes the book for a midrash written after 445 B.C.), by Stade, Kuenen, Wellhausen, Wildeboer, Nowack, Kautzsch, Duhm, Oort, Cornill, and others. The last-named scholar, holding the book to be a compendium of late Jewish eschatology, places it in the year 400 B.C., because Jerusalem at that time not only was inhabited, but had a temple (i 14, ii 15), as well as a wall (ii. 9), which would indicate a period after Nehemiah. But he overlooks the fact that the walls mentioned in the text are certainly those of the houses within the city.

Of all that has been adduced in support of the post-exilic theory, only passages like iv. (A. V. iii.) 17 really have any weight. The statement, "Then shall Jerusalem be holy, and there shall no strangers pass through her any more," indicates a city that had been destroyed—a fate that befell Jerusalem only under Nebuchadnezzar (see further § 3, below).

On the other hand, iv. (A.V. iii.) 1 can not be appealed to, since the words שוב שבות do not mean, as was formerly believed, "to bring back the captivity"—which would indeed lead to the presupposition that deportation of the inhabitants of Judea and Jerusalem had preceded—but more correctly "to turn the fate."

Objections to Post-Exilic Date.

The other reasons advanced for the post-exilic theory are not very plausible. Thus the fact that the king is not mentioned is not remarkable, since the king is likewise not mentioned in Nahum and Habakkuk. If silence of this sort is of weight, it ought to be considered just as decisive against a post-exilic dating if the governor and high priest were not mentioned in a work. Neither is the absence of any mention of the high places and their cult beside the Temple at Jerusalem remarkable, since Isaiah and, before him, Amos recognize only the Temple at Jerusalem as the habitation of God; and Isaiah, unlike Amos and Hosea, even polemizes against other places of worship. When, however, Joel in i. 9 speaks of the discontinuance of the meat- and drink-offerings as a calamity, and in i. 13 *et seq.* calls on the priests to fast in consequence, this should not be considered as proof of any high regard for the ritual, an attitude so utterly foreign to the pre-exilic period. Isaiah also mentions the meat-offering (Isa. i. 13), and Amos emphasizes the observance of the Sabbath (Amos viii. 5); and when the pre-exilic prophets reject the external worship of God, they do so only in so far as it tends to represent the whole of man's religious life and to displace entirely the true inner relationship to God (obedience).

On the other hand, the appointment of a fast on the occasion of exceptional afflictions is found in the narratives of the Book of Kings (I Kings xxi. 9; comp. II Chron. xx. 3). It has justly been pointed out that the way in which Joel, by dint of his prophetic office, gives, as it were, higher commands to the priests, does not at all agree with the position which the priesthood occupied during the time of the Persians and later. The post-exilic composition of the book can least of all be proved from the mention of the "elders" (see especially i. 14, where, however, זקנים is accusative, not vocative), since Joel does not speak of them as official persons, but connotes by "old men" only the most respected of the people.

The post-exilic theory, moreover, far from removing difficulties, gives rise to various additional ones of a serious nature. In the first place, the acceptance of the post-exilic theory of composition necessitates the wholly improbable hypothesis that the prophet in i. 1 *et seq.* places himself at the end of time and speaks to the generation of the last day. Since there is no announcement of the final day, the conclusion is natural that the opening address of the book was intended for the contemporaries of the speaker; but, if so, the apocalyptic interpretation of the opening words becomes impossible, and this negatives one of the most weighty arguments in favor of the late date of composition. It must be noticed, moreover, that no mention of a future judgment is made until after iii. 1 (A. V. ii. 28), for which reason the nations hostile to Israel are not mentioned until then (*e.g.*, in iv. [A. V. iii.] 2).

The Plague of Locusts.

Another difficulty arises when, for the sake of the post-exilic theory, the locusts are taken to mean not real but "apocalyptic locusts"; that is, such as the fantasy of the prophet has invented to illustrate the final judgment. But the plague of locusts is represented as actually having begun; the prophet describes it without indicating that it is to be expected in the future; and he therefore exhorts his countrymen, who have suffered this affliction with him, to lamentation and repentance. Moreover, by "locusts" is not meant, as some have held, the mounted army of a human enemy, for there is nothing in the description to indicate anything else than a real plague of locusts. If it were true that by them the prophet intended horsemen of the enemy, there would result the incongruity of comparing an army of horses and riders to heroes and warriors (ii. 4. *et seq.*). When the swarms of locusts are called "northern" (צפוני) in ii. 20, it is indeed most natural to think of an army coming from the north, because locusts in Palestine always come from the south. Whereas it is not unreasonable to argue that the locusts here described might have been driven into Palestine by a northeast wind from the Syrian desert (so Volck), this theory, in face of the more natural explanation of צפוני, appears only a makeshift. But the difficulty disappears with the hypothesis next to be considered.

§ 3. Theory of the Origin of Joel in Two Different Parts Written at Different Times: The theory that ch. iii.-iv. (A. V. ii. 28-iii.) are to be separated from i.-ii. was first brought forward by Rothstein in the German translation of Driver's "Introduction to the Old Testament," Berlin, 1896 (p. 333). He starts out with the fact that the general assumptions in the two parts are wholly different: in ch. i. *et seq.* people and state (Judah) appear in unimpaired integrity; the evil of the day is a terrible plague of locusts together with an all-devouring drought; in the passages where the relation to other nations is characterized, there is no trace of a distressing condition brought about, in a political sense, by the enemy (ii. 17; comp. *ib.* 19b). On the other hand, in iii. *et seq.* (A. V. ii 28 *et seq.*) the whole historical background is a political one; a reference to the time of need indicated in i. 1 *et seq.* is not to be discovered (no more so in ii. 18); moreover, the people, at least a very large part of them, are in exile; the judgment from which they are to be saved according to i. *et seq.* has long since come to pass; and Jerusalem is already trodden down and desecrated by Gentiles.

Difference of Background.

Finally, it must be added that a large number of passages in iii. (ii. 28 *et seq.*) are wholly lacking in originality (with the exception of iv. [iii.] 9 *et seq.*, where probably fragments of a vigorous original have been preserved). Rothstein concludes from this that ch. i. and ii. were written by Joel during the minority of King Joash; that, on the other hand, ch. iii. (ii. 28 *et seq.*) and iv. (iii.) date from a post-exilic period, and were written by an author who was lacking in originality, so that he connected his elaboration with the older prophecy in ch. i. and ii., as is the recognized case with Obadiah, verses 10–21 (with which section many parallels are found in Joel iii. *et seq.* [ii. 28 *et seq.*]) and 1–9. This author, however, who for his part regards the plague of locusts announced in ch. ii. as a symbolic reference to the inroad of hostile hordes, also wrote ii. 20, in which place he expressly chose expressions which would lead one to think of the "northern" army (*i.e.*, the army of heathen which had already entered the country) together with the swarms of locusts which he interprets symbolically. In the same way ii. 10–11 (or else only 11a) originated from the same hand, since these verses give the impression that the author meant powerful armies rather than locusts.

Reasons for the Division.

When, on the other hand, it is objected (by Baudissin, in "Einleitung in die Bücher des Alten Testaments," 1901, p. 499) that in this way the difficulties attendant on the time determination are by no means removed, since the reasons for and against a pre-exilic date apply to both halves of the book, it must still be recognized (as Baudissin himself admits) that the difficulties of the pre-exilic theory are greater in the second part. Moreover, it can not be admitted that the reasons which could justify the acceptance of the pre-exilic theory are found almost entirely in the second part only. The placing of the prophecy in the opening period of King Joash's reign, which rested on the identification of the hostilities mentioned in iv. (iii.) 4 *et seq.* with the revolt of the Edomites under Jehoram, will, however, have to be abandoned. The difficulty arises that these descriptions apply even less to a post-exilic period than to the time of King Joash (see below). At any rate the prophetic character of ch. i. and ii., in contrast to the apocalyptic character, which actually begins with iii. 1 (ii. 28), is alone sufficient (as is also emphasized by Baudissin) to justify the chronological determination of the two parts. Furthermore, the oratorical attitude, the vigorous language, and the originality of expression and of illustrations—of which the picture of being spread out like the morning upon the mountain is found only in Joel (ii. 2)—speak for the older date of composition of the first part.

It is wrong to suppose that the perfection of form of this prophecy indicates that it was not written in the first period of prophetical composition, because, in the face of the song of Deborah and of the elegies on Saul and Jonathan, the possibility of perfection of form in the period in which Joel wrote can not be denied; just as in other literatures also the first poetical writings have always been preceded by a longer stage of poetic development. Whether or not Joel really prophesied under Joash, or is to be placed only shortly before Amos, is irrelevant, if one separates ch. iii. and iv. and at the same time ii. 4, 11, which are based on the early theory. In favor of the time shortly before Amos, Baudissin has suggested, not without justice, that also in Amos a plague of locusts together with a drought is mentioned as a divine punishment (Amos iv. 6–9; comp. vii. 1–6), and that in this book, as also in Joel iv. (iii.) 4 *et seq.* (if this passage as well as iv. [iii.] 9 *et seq.* also dates from an older prophecy), there is a complaint concerning the delivery of captured slaves (Amos i. 6, 9) which, in spite of single variations, makes it easy to suppose that the same event is here meant, namely, the killing of the Judeans at the time of the revolt of Edom against Judah under Jehoram (comp. Amos i. 11 and Joel iv. [iii.] 19). The mention of the "sons of the Grecians" (in iv. [iii.] 6, if this still belongs to the older part) can hardly be taken as a proof against this theory (although it has been brought forward to prove a very late date of composition), since there is no reason why Greeks should not have been mentioned in an early pre-exilic period.

Reasons for Later Composition.

On the other hand, the fact that most of the data pointing to a post-exilic composition are found in the second half of the book, after ch. iii. (ii. 28), speaks for the later composition of ch. iii. and iv. (ii. 28–iii.). This is assumed on the following grounds: Only Judah is expressly mentioned, whereas the idea seems to be to connote both Judah and Israel (thus ch. iv. [iii.] 2; but not so in ii. 27); also because in the description of the approaching day of judgment for the nations and the glorification of God's people there is no reference to Ephraim; finally, above all, because in iv. (iii.) 17, as has already been remarked, not only the destruction of Jerusalem is presupposed, but also the dispersion of God's people, Israel, among the nations, and the division of Israel's land.

As to the question concerning the prophetic sources of the respective passages, it is probably easier to derive the passages iii. 5 (ii. 32) from Obadiah, verse 17; iv. (iii.) 18 from Ezek. xlvii. 1 *et seq.*; and iv. (iii.) 16 from Amos i. 2—all of them in a part which gives the impression of a dull and barren style of writing—than to suppose these passages in Joel to have been original. For these reasons the supposition that iii. and iv. (ii. 28–iii.) were written in a post-exilic period seems to offer the easiest solution of the difficulty.

§ 4. Theory of the Revision of an Older Book in a Later Period: The division of the book into two parts convinces Baudissin (*l.c.* p. 499) that such a revision must have taken place. He considers the description of the judgment of the nations with its reference to the scattering of Israel, the division of the land of Yhwh, and the passing of strangers through Jerusalem as additions of the reviser. But the theory leaves open the possibility that single parts of the second half of the book may have belonged to the original composition and were incorporated in the compilation of the later writer, directly or else with certain changes to suit the times. In view of this, and of the further supposition, first suggested by Rothstein, that the second author made changes and additions also in the first part, there is little difference between the two theories. Moreover, it is possible to agree with Baudissin that the original writing does not need to have originated in the Persian period. It is indeed advisable to place its composition as late as the time of the Ptolemies, since then the mention of Egypt might refer to the war in Egypt.

E. G. H. V. Ry.

JOËL, DAVID: German rabbi and author; born Jan. 12, 1815, at Inowrazlaw, Posen; died Sept. 7, 1882, at Breslau; brother of Manuel Joël. His father, who went in 1832 as chief rabbi to Schwerin-a-W., as well as R. Akiba Eger of Posen, instructed him in the Talmud. In 1836, in order to complete his education, he went to Berlin, where he attended the Talmudic lectures of Rabbis Oettinger and Landsberg, and, at the same time, the secular courses of Friedrich von Raumer, H. Steffens, and Neander at the university. After being ordained rabbi (1842) he accepted (1843) a call to Schwersenz, Posen. There he wrote "Midrash ha-Zohar," or "Die Religionsphilosophie des Sohar und Ihr Verhältniss zur Allgemeinen Theologie" (Leipsic, 1849). This book, which is at the same time a criticism of Adolphe Franck's "La Cabale," is indispensable to every student of the Zohar. A year after the publication of his work he received his degree as Ph.D. From 1859 to 1879 he acted as rabbi at Krotoschin, Posen. In the latter year he accepted a call to the Jewish Theological Seminary at Breslau, and entered upon his duties with the beginning of the year 1880.

During the period that he remained at Breslau—somewhat less than three years—he wrote his book "Der Aberglaube und die Stellung des Judenthums zu Demselben," only two parts of which appeared: part i., accompanying the annual report of the seminary at Breslau for 1881; part ii., published after the death of the author by his brother Manuel Joël, and accompanying the annual report of the seminary for 1883.

S. B. Z.

JOEL B. ISAAC HA-LEVI: German tosafist of the twelfth century; born probably at Bonn; died at Cologne about 1200. Joel studied in his youth at Ratisbon under Ephraim b. Isaac, Isaac b. Mordecai, and Moses b. Joel, with whom he later, kept up a learned correspondence. It is not known whether he also studied under Isaac b. Asher ha-Levi of Speyer; but as Isaac b. Mordecai and Moses b. Joel were pupils of this great tosafist, they would naturally have communicated to their own pupils the doctrines of their master. Joel studied also at Würzburg and Mayence, where he was the pupil of Eliezer b. Nathan, who speaks of him with much affection, and whose son-in law he became. Joel taught chiefly at Bonn and Cologne, and at his death was succeeded by his son Eliezer b. Joel as rabbi and teacher in the latter city. Another son, Uri, died as a martyr at the stake in 1216; and his friend Mordecai b. Eliezer wrote a dirge on his death.

Joel, who was among the most eminent Talmudic authorities of his time, wrote tosafot to various treatises of the Talmud. They have not, however, been preserved; though they are quoted in the manuscript of the "Mordekai," where Joel's "Yesod" and "Perishah" are also mentioned. It is difficult to determine the nature of these two works, but they were probably short commentaries to the Talmud. Many of Joel's responsa and decisions are found in the works of his son Eliezer; in the "Mordekai," whose author was Eliezer's great-grandson; as well as in Isaac b. Moses' "Or Zarua'" and in Asher b. Jehiel's halakot.

Joel's relation to Ephraim b. Isaac is noteworthy. Although he was originally a pupil of this peculiar man, he subsequently became his persistent antagonist, the teacher assuming an attitude of exasperation toward his former pupil. Joel attempted to uphold the authority of later tradition against Ephraim's excessive independence; his manner was very decisive, though he never forgot the respect due to his old master.

Joel also wrote liturgical poems, of which six have been preserved, and which all deal with the bloody persecutions of the Jews of Germany. Though simple in language and not very artistic in form, they are touching dirges on the sorrows of Israel.

JOEL B. JUDAH SELKI HA-LEVI (LÄMMEL?): Author of "Dibre ha-Iggeret," a description of the sufferings of the Jews of Glogau when that town was besieged by the Prussians in the winter of 1740-41. It was published at an unknown place in 1741, but became so rare that many of the bibliographers did not know of it. It was recently reprinted by Joseph Fischer (Cracow, 1895) together with Nathan Hannover's "Yewen Meẓulah," under the title "Shene Sefarim Niftaḥim." In the "Dibre ha-Iggeret," which is written in the style of piyyuṭim common to that period, the name of the author occurs several times, but the surname "Lämmel" is never added. At the end there is a song by his brother **Asher Lämmel**, who was a dayyan in Glogau; and this is probably the reason why the name "Lämmel" was added by Steinschneider to Joel's name.

S. S. P. Wi.

JOËL, KARL: German philosophical writer; born March 27, 1864, at Hirschberg, Silesia; son of Rabbi H. Joël of that city and nephew of David and Manuel Joël. Educated at the gymnasium of his native town and the universities of Breslau and Leipsic, he graduated as Ph.D. in 1886. The following year he went to Basel, where he was admitted to the philosophical faculty as privat-docent in 1893, becoming assistant professor in 1897, and professor in 1902.

Joël has written many philosophical and philosophico-historical essays in specialist journals, as the "Zeitschrift für Philosophie und Philosophische Kritik" (vols. xcvii., cix. *et seq.*); "Archiv für die Gesch. der Philosophie" (vols. viii. *et seq.*); "Wochenschrift für Classische Philologie"; etc. He is also the author of: "Zur Erkenntnis der Geistigen Entwicklung und der Schriftstellerischen Motive Platos," Berlin, 1887; "Der Echte und der Xenophontische Sokrates," vol. i., *ib.* 1893; vol. ii., *ib.* 1901; "Philosophenwege," *ib.* 1901.

s. F. T. H.

JOEL, LEWIS: British consul-general to Chile; born in Dublin 1824; died in London Feb. 28, 1899. He was educated at Bristol; in May, 1861, was appointed unpaid British vice-consul at Cobija; and from Sept., 1863, to June, 1866, was acting French consul there. In 1867 he was for a short time acting chargé d'affaires at Caracas, and in the following year was named commissioner in the mixed British and Venezuelan commission for the settlement of British claims against the government of Venezuela. In 1869 Joel was again acting chargé d'affaires as well as consul-general at Caracas, and in the following year was promoted to be consul at Rosario, a position which he occupied for seven years. Subsequently he became consul successively at Brindisi, Italy; Georgia, U. S.; and Cadiz, Spain; and he was then promoted to be consul general for the departments of Panama, Bolivar, Magdalena, and Cauca. Later on Joel became consul-general to Chile, and had charge of the legation of Santiago, from which he retired on a pension in Jan., 1894.

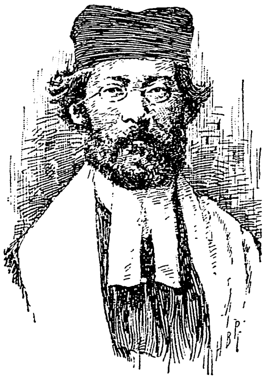
Joel was the author of "A Consul's Manual," London, 1879.

Bibliography: *Jew. Chron.* March 17, 1899; *Times* and other London daily newspapers of same date.

J. G. L.

JOËL, MANUEL: German rabbi; born Oct. 19, 1826, at Birnbaum, province of Posen; died at Breslau Nov. 3, 1890; son of Rabbi Heimann Joël of Birnbaum. In 1849 he went to the University of Berlin to study classical philology and philosophy. In 1852 Joël passed his examination as "Oberlehrer," and took the Ph.D. degree at Halle in 1854. In that year he accepted a call to the Jewish Theological Seminary of Breslau, where he taught for nine years. In 1864 he was appointed successor to Abraham Geiger, rabbi of the Breslau congregation.

Joël's first literary work consisted of biographies of the most prominent followers of R. Akiba—R. Meïr, R. Simeon ben Yoḥai, R. Jose ben Ḥalafta, and R. Judah ben 'Ilai ("Monatsschrift," 1855–57). His preference, however, was for religious philosophy, in which he was to do pioneer work. His series of essays on Ibn Gabirol ("Monatsschrift," 1857–59; reprinted in his "Beiträge zur Gesch. der Philosophie," 1876) was intended as a critical review of Solomon Munk's "Mélanges." He shows Ibn Gabirol's "Meḳor Ḥayyim" to be nothing but a text-book of Neoplatonic philosophy, and that its author had no claim whatever to originality. Joël then turned his attention to Maimonides, devoting two papers to him, one being a comprehensive account of Maimonides' system ("Die Religionsphilosophie des Moses ben Maimon," in the Breslau Jew. Theol. Seminary Program of 1859; reprinted in "Beiträge," i.), the other proving him to be one of the sources of Albertus Magnus ("Verhältniss Albert des Grossen zu Maimonides," in the Breslau Jew. Theol. Seminary Program of 1863; reprinted in his "Beiträge," i.).



Manuel Joël.

After this Joël devoted himself to the exposition of the systems of two almost forgotten Jewish philosophers, Levi ben Gershon ("Levi b. Gershon als Religionsphilosoph," in "Beiträge," i.) and Ḥasdai Crescas ("Don Chasdai Crescas' Religionsphilosophische Lehren in Ihrem Geschichtlichen Einflusse Dargestellt," in "Beiträge," ii.). Inquiry into the philosophy of the latter led Joël to the discovery of Spinoza's dependence on Jewish thinkers ("Spinoza's Theologisch-Politischer Tractat auf Seine Quellen Geprüft; zur Genesis der Lehre Spinoza's," in "Beiträge," ii.). Joël's object in his publications was twofold: first, he wished to make possible a better comprehension of the Jewish philosophy of the Middle Ages; secondly, he desired to show the influence which had been exerted by Jewish philosophy on the Christian scholastics ("Etwas über den Einfluss der Jüdischen Philosophie auf die Christliche Scholastik," in "Beiträge," i.) and on the non-Jewish world in general ("Ueber den Wissenschaftlichen Einfluss des Judenthums auf die Nicht-Jüdische Welt," in "Beiträge," ii.).

Of Joël's other publications the following may be mentioned: "Zur Orientirung in der Cultusfrage" (1867); "Festpredigten" (1867); "Notizen zum Buche Daniel"; "Etwas über Sifra und Sifre" (1873); "Religionsphilosophische Zeitfragen" (1876); "Gutachten über den Talmud" (1877); "Die Angriffe des Heidenthums Gegen Juden und Christen in den Ersten Jahrhunderten der Römischen Cæsaren" (1879); "Blicke in die Religionsgesch." (2 vols., 1880–83), a work of profound research and of great value for the student of Jewish and Christian literature of the first and second Christian and pre-Christian centuries; "Gegen Gildemeister" (1884); "Predigten aus dem Nachlasse von Dr. M. Joël" (3 vols., 1892–98). The "Jahrbuch für Jüdische Geschichte und Litteratur," pp. 25–90, Berlin, 1904;

contains a posthumous essay by Joël entitled "Der Mosaismus und das Heidenthum."

Bibliography: *Gedenkblätter zur Erinnerung an Dr. Manuel Joël*, Breslau, 1890; J. Freudenthal, *Ueber die Wissenschaftliche Thätigkeit Dr. M. Joël's*, in *Allg. Zeit. des Jud.* 1890, pp. 589 *et seq.*; Eckstein, *Zu Dr. M. Joël's Jahrzeitstage*, ib. 1891, p. 558; *Meyers Konversations-Lexikon*.

JOEL IBN SHU‘AIB. See Ibn Shu‘aib, Joel.

JOHANAN B. BAROḲA: Teacher of the second century (second and third tannaitic periods); disciple of Joshua b. Hananiah and colleague of Eleazar b. Ḥisma (Tosef., Soṭah, vii. 9; Ḥag. 3a). He maintained a scholarly intercourse with Johanan b. Nuri. Quite a considerable number of halakot has been handed down in his name, and many of them, particularly those concerning marital and civil affairs, were adopted as law (‘Er. viii. 2; B. Ḳ. x. 2; B. B. viii. 5; Kelim, xvii. 11). He is also cited in the Haggadah. According to him, the saying (Gen. i. 28), "Be fruitful, and multiply, and replenish the earth," implies that the duty of racial propagation devolves upon woman as well as upon man (Yeb. vi. 6). He taught that whoever profanes the name of God, even secretly, is punished publicly, whether the deed is committed intentionally or unintentionally (Ab. iv. 4; Ab. R. N., ed. Schechter, p. 35a).

Bibliography: Bacher, *Ag. Tan.* i. 448; Brüll, *Mebo ha-Mishnah*, i. 137; Frankel, *Darke ha-Mishnah*, p. 131; Weiss, *Dor*, ii. 122.

s. s. S. M.

JOHANAN GADI (Greek, Γαδδις): Eldest of the five sons of Mattathias the Maccabee (I Macc. ii. 2; Josephus, "Ant." xii. 6, § 1), though the least important. When Jonathan took the leadership and was being hard pressed in the country east of the Jordan, he sent Johanan with the baggage to the friendly Nabatæans; but another tribe, the sons of Jambri, seized it and killed Johanan. His death was avenged by his brothers Jonathan and Simeon (I Macc. ix. 35–42; Josephus, "Ant." xiii. 1, §§ 2–3; "B. J." i. 1, § 6). This tragic end is in strong contrast to the surname "Gadi" (גדי, meaning probably "the Lucky"). The rabbinical sources ascribe more importance to Johanan, but these accounts are confused (see "R. E. J." xxx. 215).

G. S. Kr.

JOHANAN B. GUDGADA: Scholar and chief gatekeeper at the Temple in the last years of its existence (Tosef., Sheḳ. ii. 14); senior of Joshua b. Hananiah. He survived the destruction of Jerusalem, and was present at the memorable sessions of the Jabneh (Jamnia) Sanhedrin that laid the foundation of the Talmudic treatise ‘Eduyot, and before which he gave certain "evidences" (Yeb. xiv. 2; Giṭ. v. 5; comp. ‘Eduy. vii. 9). One rabbinical source makes of him a disciple of Gamaliel II. and an expert mathematician (Hor. 10a): but this evidently rests on an error, ריב"נ (= R. Johanan b. Nuri) having been mistaken for ריב"ג (= R. Johanan b. Gudgada). As it reads, the story is anachronistic, since Johanan was older than Joshua, who was the senior of Gamaliel. Of Johanan's life and work nothing more is known than that he gave the abovementioned evidences (see also Ḥul. 55b), and that he was a Ḥaber (Ḥag. ii. 7).

Two of Johanan's grandsons, or nephews, are said to have lived in the days of Rabbi. They were deaf-mutes, but regularly attended Rabbi's lectures, and by the motions of their heads and lips appeared to follow and understand him (Ḥag. 3a). Now, as Johanan had reached the age of manhood prior to the destruction of the Temple (70 C.E.), it is chronologically incredible that his nephews, or even his grandsons, should have attended Rabbi's lectures in the last decades of the second century. It might therefore be assumed that here also ריב"נ was misread ריב"ג, were it not that another, more reliable source precludes that assumption. There it is said: "The sons of Johanan b. Gudgada were deaf-mutes; still they were entrusted with the direction of ritualistic matters in Jerusalem" (Tosef., Ter. i. 1; Yer. Ter. i. 40b). They were therefore contemporaries of Joshua; and accordingly it may be conjectured that in the Babylonian version the initial sign in ר"י (= R. Joshua) was converted into the letter ב; hence the erroneous name רבי ("Rabbi").

Bibliography: Brüll, *Mebo ha-Mishnah*, i. 93; Frankel, *Darke ha-Mishnah*, p. 99; Heilprin, *Seder ha-Dorot*, ii., *s.v.*; Weiss, *Dor*, ii. 122.

s. s. S. M.

JOHANAN BEN HA-ḤORANIT: Palestinian tanna of the first generation; disciple of Hillel (according to Frankel, "Darke ha-Mishnah," p. 53, note 8, a disciple of Shammai) and teacher of Eleazar b. Zadok. Once, during a famine, his pupil Eleazar found him eating dry bread with salt and told his father thereof, whereupon the latter, a disciple of Shammai, sent Johanan some olives. But Johanan, noticing that the olives were wet, and therefore, according to Hillel, liable to be unclean, refused to eat them (Tosef., Suk. ii. 3; Yeb. 15b). It is also recorded that a visit was paid to him, on the Feast of Tabernacles, by the elders of both Hillel's and Shammai's schools (Suk. 28a; ‘Er. 13b).

Bibliography: Heilprin, *Seder ha-Dorot*, ii.; Weiss, *Dor*, i. 177.

s. s. M. Sel.

JOHANAN BEN ISAAC OF HOLLESCHAU: Rabbi of the German community of London at the beginning of the eighteenth century. He edited "Teshubot ha-Geonim," responsa of contemporary rabbis on the pronunciation of the divine names, with additions of his own (Amsterdam, 1707), and wrote "Ma‘aseh Rab," in which he sharply criticized the action of a certain London rabbi in regard to a divorce and an excommunication (published together with the preceding work). See Hambro' Synagogue.

Bibliography: Fürst, *Bibl. Jud.* s.v. *Holleschau*, i. 405; Steinschneider, *Cat. Bodl.* col. 1397.

J. S. Man.

JOHANAN BEN JEHOIADA: High priest under Artaxerxes Ochus (359–338 B.C.); perhaps identical with the one mentioned in Neh. xii. 11 ("Johanan" being read instead of "Jonathan") and 22. He murdered his younger brother Jesus in the Temple, probably fearing that, supported by the Persian general Bagoas, whose favor he enjoyed, Jesus would deprive him of the dignity of high priest (Josephus, "Ant." xi. 7, § 1; see Artaxerxes III.; Bagoas). The incident is not historically authenticated, the account being perhaps based upon events that happened in the reign of Antiochus Epiphanes. A similar story is narrated in Tosef., Yoma, i. 12: Two brothers, both priests, attempted to ascend to the altar at the same time, when one stabbed the other to the heart with a dagger. The high priest Jaddua was the son of Johanan.

G. S. Kr.

JOHANAN BEN KAREAH (קרח): General of the Israelites at the time of Nebuchadnezzar (*c.* 586 B.C.). After the kingdom of Judea had been destroyed by the Chaldeans, the Babylonian king appointed Gedaliah b. Ahikam governor, with residence at Mizpah, over the remnant of the people that had remained in the country. Before him, as the representative of the government, appeared the Israelitish generals Ishmael b. Nethaniah, Johanan and Jonathan, the sons of Kareah, and others. This is the reading of the Masoretic text (Jer. xl. 8), but the name of Jonathan seems incorrect, and is omitted in the Septuagint, in Josephus ("Ant." x. 9, § 2, where, furthermore, the name Ἰωάδης, hence "Joiada," replaces "Johanan" in Niese's text), and also in II Kings xxv. 23.

The generals noticed that Ishmael intended to kill Gedaliah; and Johanan, who seems to have had an especial feeling of friendship for Gedaliah, volunteered secretly to kill Ishmael before it might be too late; Gedaliah, however, would not consent (Jer. xl. 15–16). Ishmael carried out his intention, and Johanan b. Kareah, at the head of the other generals, fought with Ishmael "by the great water in Gibeon." The people who had been imprisoned by Ishmael at once went over to Johanan, and Ishmael had to flee (Jer. xli. 11–15). Johanan then gathered about him the generals and all the people he had saved in the hamlet of Chimham (Jer. xli. 17; Josephus, "Ant." x. 9, § 5, has Μάνδρα = "hamlet," the name apparently having been lost), intending to lead them into Egypt, beyond the reach of the Chaldeans. The people sought counsel of Jeremiah, who advised them, addressing himself chiefly to Johanan (Jer. xlii. 8), to stay in the country. But the generals and the much-tried people rejected the prophet's advice, and emigrated to Egypt under Johanan's leadership (Jer. xliii. 1–7). Here all trace of him is lost.

G. S. Kr.

JOHANAN BEN MERIYA: Palestinian amora of the fifth or sixth generation (4th and 5th cent.). Johanan is frequently mentioned in the Talmud of Jerusalem in connection with both halakic and haggadic subjects, instances of the latter, however, predominating. In a controversy between R. Mana and R. Hananiah as to whether any high place may temporarily be used by a prophet as an altar, Johanan used Josh. viii. 30 and I Sam. vii. 9 to support the affirmative opinion of Hananiah (Yer. Meg. i. 14; Lev. R. xxii. 6; Midr. Teh. to Ps. xxvii. 6, where the name "Jacob" occurs). He also transmitted a haggadah of Johanan b. Nappaḥa (Yer. Peah i. 1).

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 722; Frankel, *Mebo ha-Yerushalmi*, p. 97b.

S. S. M. Sel.

JOHANAN B. NAPPAḤA (HA-NAPPAḤ): Palestinian scholar; born at Sepphoris in the last quarter of the second century; died at Tiberias 279. He is generally cited as "Johanan," but sometimes by his cognomen only (Yer. R. H. ii. 58b; Sanh. 96a), which he himself uses once (Mak. 5b); but he is never cited by both together. He traced his descent from the tribe of Joseph (Ber. 20a), but he knew neither of his parents, his father having died before, and his mother at, his birth; he was brought up by his grandfather. His first teachers were the last Tannaites or semi-Tannaites Yannai, Ḥanina b. Ḥama, and Hoshaiah Rabbah. For a short time he also attended the lectures of Judah I. (Rabbi); but, as he himself said, his acquaintance with Rabbi was only slight (see Yer. Beẓah v. 63a.) He mentions again his pupilage under Rabbi in a reference to an occasion when he sat seventeen rows behind Rab (Abba Arika), and could not comprehend the discussions (Pes. 3b; Ḥul. 137b). But in the short time he sat under him he is said to have manifested such aptness as to convince Rabbi that great things might reasonably be expected of him (Yoma 82b). By Ḥanina he was instructed in the homiletic interpretation of the Bible—except the books of Proverbs and Ecclesiastes (Yer. Hor. iii. 48b)—and probably in medicine, in which he became skilled (‘Ab. Zarah 28a).

His Teachers.

Johanan had an agreeable presence and a pleasing disposition; he was kind and considerate to the stranger as well as to his brethren; to the non-observant as to the pious; to the ‘am ha-areẓ as to the ḥaber; wherefore he was beloved by his teachers and honored by all (B. M. 84a; Yer. ‘Ab. Zarah iii. 42c; Meg. 10b, 16a; ‘Ab. Zarah 26b; Yer. Dem. ii. 23a; Bek. 31a). For a time he subsisted on the proceeds of some arable land, a vineyard, and an olive-orchard, which he had inherited, and which he sold one after another in order to obtain an education. As he expressed it, he exchanged the things that God created in six days for the things the delivery of which required forty days (Ex. xx. 11, xxxiv. 28; Deut. ix. 10; Cant. R. viii. 7). But all his resources having been at last exhausted, he was compelled to follow some bread-winning occupation. After a short time, however, he felt impelled to return to his school, where he earned, not without a struggle, the encomiums of his masters (Ta‘an. 21a; Yeb. 57a; Yer. Yeb. viii. 9b; Yer. R. H. ii. 58a *et seq.*; Shab. 112b; ‘Er. 24a). At last, owing to the universal homage paid to the young master, the patriarch accorded him a pension, and soon a lecturer's place was found for him.

His Teaching.

Johanan began teaching at his native place, Sepphoris, and quickly became very popular there. One day his former teacher Ḥanina noticed unusually large crowds hurrying toward one place. Inquiring the reason of his attendant, he was told that Johanan was to lecture at the college lately presided over by R. Banna'ah, and that the people were flocking to hear him. Ḥanina thereupon thanked God for permitting him to see his life's work bearing such blessed fruit (see Ḥanina b. Ḥama). How long Johanan continued to act as teacher at Sepphoris can not be ascertained; but he removed some time before Ḥanina's death. They had disagreed on two points of ritual, and Johanan, not wishing to oppose his master at his home, removed to Tiberias (Yer. Beẓah i. 60a; Yer. Sheb. ix. 38c, where the text is mutilated). It is doubtful whether the two ever met again. With his other teachers he maintained intimate relations to the end of their days. This was particularly the case with Hoshaiah. He, too, removed from Sepphoris and settled at Cæsarea, where he opened a college and whither Johanan often went from Tiberias to consult him on difficult problems (Yer. Ter. x. 47a; Yer. Ḥal. i. 58b). These visits to his aged teacher Johanan continued during the last thirteen years of Hoshaiah's life, but they were merely social visits, Johanan no longer needing Hoshaiah's help: "He that pays his respects to his teacher is considered as one waiting on the Divine Presence" (Yer. Sanh. xi. 30b).

His Pupils.

At Tiberias Johanan opened an academy, which soon drew large numbers of gifted students, native and foreign, among whom were the great scholars Abbahu, Ammi, Assi II., Eleazar ben Pedath, Ḥiyya ben Abba, Jose ben Ḥanina, and Simon ben Abba; as many scores of his disciples accepted and taught his decisions, and as he himself did not confine his labors to the precincts of the college, but visited and lectured at other places (Yeb. 64b; Ket. 7a), his fame spread far and wide, and his name more than that of any other teacher was on the lips of scholars. In the Diaspora, whither his teachings were carried by his disciples, his authority was almost as great as in his native land, and few contemporary scholars in Babylonia opposed him. As for Johanan himself, he recognized no foreign authority except that of Rab (Abba Arika), his senior schoolmate under Judah I. With Rab, Johanan kept up a correspondence, and addressed him as "our master in Babylonia." After Rab's death Johanan wrote to Rab's colleague Samuel, but addressed him as "our colleague in Babylonia." Samuel sent him a complete calendar covering the intercalations for a period of sixty years; Johanan, however, admitted merely that Samuel was a good mathematician. But when Samuel transmitted to him a mass of disquisitions on the dietary laws, Johanan exclaimed, "I still have a master in Babylonia!" He even resolved to pay him a visit, but rumor made him believe that Samuel had in the meantime died (Ḥul. 95b).

Halakic Method.

Johanan pursued a strictly analytical method in his studies of the Halakah. Penetrating deeply into the sense of the Mishnah, and subjecting every part to a thorough examination and careful comparison with more or less related laws, he soon perceived that Rabbi's compilation contained contradictory decisions, based in many cases on the opinions of individuals. These he endeavored to reconcile; but as that could not always be done, he perforce rejected many halakot adopted in the Mishnah, preferring the authority of baraitas taught by his former masters Ḥiyya and Hoshaiah. To carry out his line of thought systematically and consistently he laid down certain rules for the final decision of cases where two or more tannaim were found to have entertained opposite opinions, or where halakot are ascribed to recognized authorities, but are in conflict with anonymous opinions given elsewhere (see Conflict of Opinion). Some rules of this kind had been devised before his, but had proved insufficient. Johanan therefore elaborated and supplemented them (see Yer. Ter. iii. 42a; Shab. 39b; 'Er. 46a *et seq.*; Yeb. 42b; Giṭ. 75a), and most of his rules are to this day authoritative for the student of Talmud. All of them were collected in the geonic period and embodied in the so-called "Order of the Tannaim and Amoraim" (סדר תנאים ואמוראים; abridged, סתו״א), which is ascribed to Naashon b. Zadok of the ninth century (see Grätz, "Einleitung in den Talmud von Ibn-Aknin," p. vii.). Later Talmudists, seeing that Johanan was so prolific an amora that his name is more frequently mentioned in the Gemara than any other, ascribed to him the compilation of the Palestinian Gemara (see Maimonides, "Haḳdamah," ed. Hamburger, p. 58, Berlin, 1902). Modern scholars for obvious reasons deny this, but admit that he projected the compilation, which, however, was not completed till over a century after him (see Talmud Yerushalmi). The Midrash to the Book of Psalms also has been erroneously ascribed to Johanan (see Buber, "Midrash Tehillim," Introduction, p. 2a). He was one of the most prolific haggadists.

His Decisions.

In his religious decisions Johanan was comparatively liberal. He aided Judah II. in the repeal of the prohibition against using oil made by pagans ('Ab. Zarah 36a); he permitted Greek to be studied by men, because it enabled them to defend themselves against informers, and by women because familiarity with that language is an attractive accomplishment in their sex (Yer. Peah i. 15c); he allowed the painting of decorative figures on the walls (Yer. 'Ab. Zarah iii. 42d). Under certain circumstances he permitted emigration from Palestine: "If thou art mentioned [nominated by the Romans] for office make the Jordan thy boundary friend [escape over the Jordan], even on a semiholiday" (Yer. M. Ḳ. ii. 81b).

Johanan is the subject of many legends (Ber. 5b; Yer. Ber. v. 9a; Ḥag. 15b; B. Ḳ. 117a *et seq.*; B. M. 84a; B. B. 75a), in which some further traits of his are preserved. His servants he treated with great kindness: "Did not he that made me in the womb make him?" (Job xxxi. 15; Yer. B. Ḳ. viii. 6c). He was blessed with many children, but lost ten sons. The last one is said to have died by falling into a caldron of boiling water. The bereft father preserved a joint of the victim's little finger, which he exhibited to mourners in order to inspire resignation. "This is a bone from the body of my tenth son," he would say (Ber. 5b; see Ḥiddushe Geonim *ad loc.*). However, he himself was not resigned at the death of his brother-in-law Resh Laḳish, his fellow amora, whom he affectionately called "my counterpart" (שכנגדי—Ket. 54b, 84b). He mourned for him long and deeply, weeping often and crying, "Bar Laḳish, where art thou? O Bar Laḳish!" At last he became melancholy, and for three years and a half could not attend his college;

but it seems that he finally recovered his health and resumed his labors (Yer. Meg. i. 72b; B. M. 84a). On his death-bed he ordered that he should be dressed neither in white nor in black, but in scarlet, so that on awaking after death he would not feel out of place in the company either of the pious or of the wicked (Yer. Ket. xii. 35a; Gen. R. xcvi. 5).

S. S. S. M.

JOHANAN B. HA-NAZUF: Friend of Gamaliel II. (first and second centuries). It is related that Ḥalafta once went to Tiberias and found Gamaliel at the house of Johanan b. ha-Nazuf (= "the excommunicated"), reading a targum of the Book of Job. Ḥalafta informed the patriarch that he had been present at Jerusalem when a targum of the same book was laid before his grandfather Gamaliel I., and that that patriarch had ordered it entombed in a wall. Thereupon the second Gamaliel also ordered that the targum be suppressed (Tosef., Shab. xiii. [xiv.] 2; Shab. 115a). This Johanan has been identified by Levy ("Wörterbuch," i. 470) and Berliner ("Onkelos," ii. 90) with Johanan Sofer, scribe or secretary to Gamaliel II. J. Derenbourg, however, thinks that he was the son of Eliezer b. Hyrcanus, and, consequently, the nephew of Gamaliel II. ("Magyar Zsidó-Szémle," iii. [1885] 434; comp. Sanh. 68a).

S. S. S. M.

JOHANAN B. NURI: Tanna of the first and second centuries; junior of Gamaliel II. and senior of Akiba (Sifra, Ḳedoshim, iv. 9; 'Ar. 16b; comp. Sifre, Deut. 1). A great halakist, always provided with satisfactory answers to all questions, he was familiarly called "pedler's basket" or "bundle of halakot" (Ab. R. N. xviii.; Giṭ. 67a); the number and diversity of halakot cited under his name in the Mishnah alone, about forty, justify those appellations. Besides exhaustive rabbinical knowledge, he acquired familiarity with the general science of his time, especially geometry. It was said of him, as of his colleague Eleazar b. Ḥisma, that he could approximately state the number of drops contained in the sea; like Eleazar, also, he was very poor. Through the influence of Joshua b. Hananiah both were appointed by Gamaliel to remunerative offices (see Eleazar b. Ḥisma; comp. Sifre, Deut. 16).

Johanan showed himself grateful to Gamaliel. When, after that patriarch's death, Joshua proposed a change in a rule established by Gamaliel, Johanan opposed him: "I have observed that the head is always followed by the trunk; as long as Gamaliel lived we observed the rule laid down by him, and now you propose to veto his directions. Joshua, we shall not harken to thee" ('Er. 41a). Between him and Ḥalafta also intimate scholarly relations existed (comp. Tosef., B. B. ii. 10 with B. B. 56b and parallels).

In his discussions of halakot Johanan considered expediency and economy as well as law and authority. When Ṭarfon declared that only olive-oil was appropriate for the Sabbath-lamp, Johanan became impatient: "And what shall the Babylonians do where none but sesame-oil is to be had; and what shall the Medians do, who have nothing but nut-oil; and the Alexandrians, who have nothing but radish-oil; or the Cappadocians, who have only naphtha?" (Shab. 26a). On another occasion, when Akiba suggested that a married woman who has become the common talk of the "spinsters by the moon" ought to be divorced, Johanan remarked, "In that case there is no chance for a daughter of Judah to live with a husband! Only where infidelity is fully established by legal evidence may a divorce be imposed" (Giṭ. 89a; see Deut. xix. 15, xxiv. 1). In the Haggadah he is not often cited. He was very pious, and therefore later rabbis said that when one dreams of Johanan b. Nuri one may hope to develop a wholesome fear of sin (Ab. R. N. xl. [ed. Schechter, p. 64b]).

S. S. S. M.

JOHANAN HA-SANDALAR ("the sandal-maker"): Tanna of the second century; one of Akiba's disciples that survived the Hadrianic persecutions and transmitted the traditional law (Gen. R. lxi. 3; Eccl. R. xi. 6; comp. Yeb. 62b). With several colleagues he repaired to the Valley of Rimmon to institute a leap-year, and in the course of the discussions that ensued he betrayed considerable passion. Meïr had just cited an opinion which he ascribed to Akiba, but the authenticity of which Johanan denied, adding, "I have waited on R. Akiba standing [by his side as an advanced student] longer than thou didst sitting [as a mere hearer]." The learned company took umbrage at this derogatory remark, and murmured, "Johanan ha-Sandalar is a true Alexandrian [given to gasconade]." The incident, however, ended in reconciliation, and the disputants did not leave the session without kissing each other (Yer. Ḥag. iii. 78d; see Rapoport, "'Erek Millin," p. 102a). Because he is called here "a true Alexandrian," it is assumed that he was a native of Alexandria.

As a halakist he is sometimes cited in the Mishnah (Yeb. xii. 5; Ket. v. 4; Kelim v. 5), and Simon b. Gamaliel II. reports two halakot from him (Tosef., Kelim, B. Ḳ. iv. 2, 5). To obtain an authoritative decision in a doubtful case he once exposed himself to great danger; it was during the Hadrianic persecutions, when many rabbis had been put to death for teaching Judaism, and Akiba was imprisoned and awaiting his doom at the command of Rufus. A marital question agitated the collegians, and Johanan undertook to procure the closely guarded master's advice upon it. Disguised as a pedler, he offered some trifle for sale near the prison: "Who wants needles? Who wants hooks? How about private Ḥaliẓah?" Akiba, looking out through an aperture, said in reply, "Hast thou spindles? Hast thou kasher?" (= "valid!"—Yer. Yeb. xii. 12d). At one time during the persecutions, Johanan and Eleazar I. (b. Shammua) left Palestine, intending to betake themselves to Judah b. Bathyra in Nisibis; but they did not carry out their intention. By the time they arrived at Sidon they felt too homesick to proceed any farther, and returned (Sifre, Deut. 80).

In the Haggadah Johanan is not mentioned, except as author of the following maxim: "An assembly that aims to glorify the name of the Omnipresent will have permanence, but one that does not so aim will not endure" (Ab. iv. 11; comp. Ab. R. N. xl. [ed. Schechter, pp. 64b, 65a]).

S. S. S. M.

JOHANAN B. TORTA: Scholar of the first and second centuries; contemporary of Akiba. When Akiba hailed Bar Kokba as the Messiah, the latter exclaimed, "Akiba, grass will have grown out of thy jaws ere the Son of David appears" (Yer. Ta'an. viii. 68d; Lam. R. ii. 2). To a legend of a cow that refused to work on a Sabbath, and thereby caused the conversion of Johanan, who had been a pagan, is referred Johanan's by-name "ben Torta" (son of a cow; Pesiḳ. R. xiv. 56b *et seq.*). No halakot are ascribed to him, and only one haggadah bears his name: "Shiloh was destroyed because there sacred things were treated contemptuously" (see I Sam. ii. 17); "the first Jerusalem Temple was destroyed because at the time people perpetrated the sins of idolatry, incest, and bloodshed. But we know that in the age of the later Temple people studied the Law and carefully tithed their produce: why then were they exiled? Because they loved Mammon and hated one another! From this we may learn that to hate man is grievous in the eyes of the Omnipresent, and that it is paramount to idolatry, incest, and bloodshed" (Tosef., Men. xiii. 22; comp. Yoma 9a *et seq.*).

Bibliography: Bacher, *Ag. Tan.* ii. 557; Grätz, *Gesch.* 2d ed., iv. 150; Heilprin, *Seder ha-Dorot*, ii. (see *ib.* s.v. *Ḥanina b. Torta*).

S. S. S. M.

JOHANAN B. ZAKKAI: The most important tanna in the last decade of the Second Temple, and, after the destruction of Jerusalem, the founder and first president of the academy at Jabneh. According to the theory formulated in the Mishnah (Ab. ii. 8), that traditions were handed down through an unbroken chain of scholars, Johanan, in receiving the teachings of Hillel and Shammai, formed the last link in that chain. But it is rather as a pupil of Hillel than of Shammai that he is known (Suk. 28a). Before his death Hillel is said to have prophetically designated Johanan, his youngest pupil, as "the father of wisdom" and "the father of coming generations" (Yer. Ned. v., end, 39b). Like that of Hillel, Johanan's life was divided into periods of forty years each. In the first of these he followed a mercantile pursuit; in the second he studied; and in the third he taught (R. H. 30b). Another version has it (Sifre, Deut. 357) that in the last forty years of his life he was a leader of Israel. If the last statement be accepted as approximately correct, and it is assumed that Johanan lived at the latest one decade after the destruction of Jerusalem, his public activity as the recognized leader of the pharisaic scribes must have begun between the years 30 and 40 of the common era.

Activity Before Destruction of Temple.

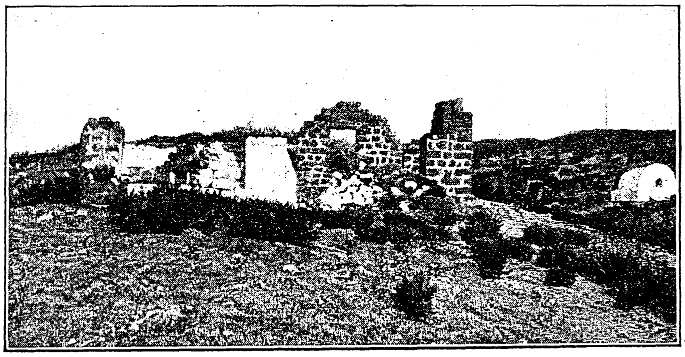
Residence in Galilee.

Some data have been preserved concerning Johanan's public activity in Jerusalem before the destruction of the Temple. Together with Simon b. Gamaliel I. he sent orders to the different districts of Palestine concerning the delivery of the tithe (statement of his pupil Joshua b. Neḥunya in the Mekilta of Simeon b. Yoḥai; Midr. ha-Gadol to Deut. xxvi. 13). He refuted the objections of the Sadducees to the Pharisees (Yad. iv. 5), and opposed the halakah of the Sadducees (Men. 65a; B. B. 115b). He prevented a Sadducean high priest from following the Sadducean regulations at the burning of the red heifer (Tosef., Parah, iii. 8; comp. Parah iii. 7, 8). It was Johanan's activity as a teacher in Jerusalem which was especially extolled by tradition. His school was called the "great house," after the expression in II Kings xxv. 9 (Yer. Meg. 73d). It was the scene of many incidents that formed the subjects of anecdote and legend (Lam. R. i. 12, *passim*; Gen. R. iv.). The oft-repeated story concerning Johanan's most important pupil, Eliezer b. Hyrcanus, shows Johanan's bet ha-midrash (academy) as the scene of a pathetic meeting between son and father (Tan., ed. Buber, to Gen. xiv. 1). An old tradition (Pes. 26a) relates that Johanan sat in the shadow of the Temple and lectured the whole day; but that of course was not the permanent place for his teaching. The statements regarding five of his pupils, his verdict concerning them, and the question he put to them as to the best road for a person to pursue through life (Ab. ii. 8) are reminiscences of the period before the destruction. Johanan's residence in 'Arab, a place in Galilee, which was perhaps his home, belongs to this period. Two questions of a legal nature (regarding the observance of the Sabbath) which he answered while there (Shab. xvi. 7, xxii. 3) gave rise to the statement that he lived there for eighteen years (probably a round number) and that he was moved by the religious indifference of the inhabitants to exclaim: "O Galilee, Galilee, thou hatest the Torah; hence wilt thou fall into the hands of robbers!" Another prophetical exclamation of a similar nature is ascribed to Johanan. The gates of the Temple had ominously opened of themselves, whereupon he apostrophized the sanctuary: "O Temple, Temple, why dost thou frighten thyself? I know of thee that thou shalt be destroyed; Zechariah the son of Iddo [Zech. xi. 1] has already prophesied concerning thee: 'Open thy doors, O Lebanon, that the fire may devour thy cedars'" (Yoma 39b; comp. Ab. R. N., Recension B, vii., ed. Schechter, p. 21).

Johanan's part in the last struggle of Jerusalem against Rome has been immortalized in the legends concerning the destruction of that city, which, however, have a historical kernel (Giṭ. 56b; Lam. R. i. 5; Ab. R. N. iv.). He counseled peace; and when the strife of parties in the besieged city became unbearable he had himself carried to the Roman camp in a coffin. Like Josephus, Johanan prophesied imperial honors for the general Vespasian, quoting the words of the prophet Isaiah: "Lebanon [that is, the sanctuary] shall fall by a mighty one" (Isa.

After the Destruction.

x. 34). He sought and obtained permission to settle in Jabneh (Jamnia) and to exercise his profession of teacher there. In Jabneh, surrounded by his pupils, Johanan received the terrible news that the Temple was burned to ashes. They tore their garments, wept, and made lamentation as for the dead (Ab. R. N. iv.). But the aged master in the catastrophe which had befallen the Jewish people kept his vigor unimpaired. He converted the school at Jabneh into a center for Judaism in Palestine. The college, of which he was president, exercised the functions of the great law court (Sanhedrin) of Jerusalem, and by this institution of an authorized board the continuity of spiritual leadership was maintained uninterrupted. Johanan saw to it that Jabneh took the place of Jerusalem as the Jewish religious center. He ordained that certain privileges peculiar to Jerusalem and the sanctuary should be transferred to Jabneh (R. H. iv. 1, 3). Other regulations of his dealt with the determination of the exact time when the new month begins—a matter then very important—and with the acceptance of the testimony on which such determination is based (*ib.* iv. 41; Baraita, R. H. 21b). His order that, as had been customary in the Temple, the trumpets should sound in Jabneh on New-Year's Day even when it fell on the Sabbath, was opposed, but unsuccessfully, by some of the members of the council (Baraita, R. H. 29b).



Traditional Tomb of Johanan ben Zakkai, near Tiberias, with the Grave of Maimonides to the Right.

(From a photograph by Dr. W. Popper.)

It is not known how long Johanan remained at the head of the bet ha-midrash and of the legal council. It may be accepted as certain that Johanan was succeeded by Gamaliel II. while the former was still living, inasmuch as he did not die in Jabneh; for it is related (Eccl. R. vii. 7; comp. Ab. R. N. xiv.) that his pupils went to Jabneh after his death. And furthermore, since a place, Berur Ḥayil, is mentioned as the seat of a legal council over which Johanan presided (Sanh. 32b; Sifre, Deut. 144), and at another time it is related that Joshua b. Hananiah visited his teacher in Berur Ḥayil (Tosef., Ma'aser al-Rishon, i. 1), it may be concluded that Johanan spent the last years of his life and died at this place, which was near Jabneh (concerning the name comp. Krauss's conjecture in Berliner's "Magazin," xx. 119; Derenbourg, in "Monatsschrift," xxxvii. 304). His pupils were present at his death. The solemn conversation between the dying master and his disciples (Ber. 28b) begins with a question from the latter: "Light of Israel, pillar of the sanctuary, strong hammer, why dost thou weep?" These remarkable epithets characterize the work of Johanan and his importance for his period. The blessing which just before his death he pronounced upon his pupils at their desire consisted of the prayer: "May it be God's will that the fear of heaven be as strong in you as the fear of flesh and blood" (*ib.*). His last words were: "Put the vessels out of the house, that they may not become unclean, and prepare a throne for Hezekiah, the King of Judah, who is coming" (*ib.*). By this puzzling reference to Hezekiah, Johanan plainly meant the coming of the Messiah, of which he was thinking in his last moments. A son of Johanan died before him (Ab. R. N. xiv., end). In one anecdote (B. B. 10b) his sister's sons are mentioned. One of these nephews, Ben Baṭiaḥ, is named as one of the Zealot leaders (Lam. R. to i. 4; Jew. Encyc. ii. 673).

His Teaching.

Johanan ben Zakkai's motto was, "If thou hast learned much of the Torah, do not take credit for it; for this was the purpose of thy creation" (Ab. ii. 8). He found his real calling in the study of the Law. The following description of him was handed down by tradition (Suk. 28a): "He never spoke an idle word; he did not go four yards without reflecting on the Torah and without the phylacteries; no one ever preceded him in entering the bet ha-midrash; he never slept in the bet ha-midrash, and was always the last to leave it; no one ever found him engaged in anything but study." His knowledge was spoken of as though it included the whole of Jewish learning (Ab. R. N. xiv., end; Suk. 28a; B. B. 134a; Masseket Soferim xvi. 8). He advises a priestly family in Jerusalem, the members of which died young, to occupy itself with the study of the Torah so as to ward off the curse of dying in the prime of life, which is laid upon the descendants of Eli (from whom they may have descended) in I Sam. ii. 23 (R. H. 18a). He, however, warned against a one-sided devotion to study, as in his verdict concerning scholars and those free of sin: "Whoever possesses both these characteristics at the same time is like an artist who has his tools in his hands" (Ab. R. N. xxii.).

In the halakic tradition Johanan is but seldom referred to as an originator of maxims. His halakah is doubtless to be found in that of Hillel's school and in the sayings of his pupils, especially of Eliezer and Joshua. The haggadic tradition, on the other hand, connects numerous and varied sayings with his name. Mention may first be made of conversations between him and his pupils, or between

His Exegesis.

him and unbelievers who were versed in the Bible, in which questions of textual interpretation were discussed. At one time he asked his pupils what the words in Prov. xiv. 34 meant (Pesiḳ., ed. Buber, 12b; comp. B. B. 10b, where the accounts of two conversations have been confused). He himself interpreted them as follows: "Benevolence [ḥesed] on the part of a nation has the atoning power of a sin-offering" (B. B. *l.c.*). In the same sense he interpreted the words of the prophet (Hosea vi. 6), "I desired mercy [ḥesed], and not sacrifice," with which he comforted his pupils for the destruction of the Temple and the discontinuance of the sacrifice of atonement (Ab. R. N. iv.). He answered several questions of a polemical tendency put by a Roman commander (ἡγεμών), who can not be identified owing to the different ways in which his name is written. These questions referred to the contradiction between the figures in Num. iii. 22, 28, 34 and the total sum in verse 39 of the same chapter (Bek. 5b), between Ex. xxxviii. 26 and 27 (*ib.*), and between Gen. i. 20 and ii. 19 (Ḥul. 27b); also to the legal regulation in Ex. xxi. 29 (Yer. Sanh. 19b), and to the law concerning the red heifer (Pesiḳ. 40a). In connection with the last-mentioned question Johanan refers the Gentile to a Gentile analogy: Just as the evil spirit is driven out of a person possessed through burning certain roots and by other means, so the process of purification drives out the "unclean spirit" (Zech. xiii. 2). To his pupils, however, who were not satisfied with this answer, he said: "By your lives, death does not make impure, nor water clean; but it [the law concerning the red heifer] is a decree of the All Holy, whose reasons we must not question" (comp. Lazarus, "Die Ethik des Judenthums," i. 189, 246).

The Homer.

A special group of Johanan's haggadic text interpretations is given the name "ḥomer," which term is related to the designation "doreshe ḥamurot," applied to the ancient expositors of the Bible. In this group the interpretations are symbolic, seeking to penetrate into the spirit of the Bible text.

One source (Tosef., B. Ḳ. vii. 3 *et seq.*) puts five such explanations of Johanan together. They answer the following questions: "Why is the ear of a Hebrew slave bored who voluntarily refuses to be made free?" (Ex. xxi. 6; comp. Ḳid. 22b). "Why is iron excluded from the building material of the altar?" (Ex. xx. 25; Deut. xxvii. 5; comp. Mek., Yitro, Baḥodesh, 11). "What does the remarkable word 'asher' in Lev. iv. 22 mean?" (comp. Hor. 10b). "Why was Israel exiled specially to Babylon?" (comp. Pes. 87b). "Why were only the first tables of the testimony, and not the second, considered to be the work of God?" (Ex. xxxii. 16).

Besides the explanations to these questions, Johanan gave others of a similar character. He explained why a thief is punished more severely than a robber (B. Ḳ. 79b), and by explaining the Biblical numbers symbolically he answered the question: "Why does the Scripture [Ex. xxii. 1] ordain fivefold restitution for an ox and only fourfold for a sheep?" (*ib.*). The forty days of rain during the Flood which destroyed sinful man (Gen. vii. 12) corresponded, he said, to the forty days of the formation of the human embryo (Gen. R. xxxii.). The ten gerah (= a half-shekel) of the atonement money (Ex. xxx. 13) corresponded to the Ten Commandments, for the transgression for which atonement is to be made (Pesiḳ. 19b).

Among other things Johanan explained the following:

The exhortation to those who are freed from military service to return home (Deut. xx. 5-7):—this, he said, was given in order that the cities of Israel might not become depopulated in times of war (Sifre, Deut. 192). The passage Gen. ii. 19:—he does not find that the account of the creation of the animals is here repeated but that their subjection to man is described (Gen. R. xvii). The words "And the eyes of them both were opened" (Gen. iii. 7):—this means that God opened their eyes to the evil they had brought upon future generations (Gen. R. xix.). Abraham's vision of the future (Gen. xv. 18):—this showed Abraham the present world only, not the future one (Gen. R. xliv.).

Johanan's views on piety (comp. his motto given above) correspond to his teaching that Job's piety was not based on the love of God, but on the fear of Him (Job i. 1; Soṭah v. 5, reported by Joshua b. Hananiah). He explains the exhortation in Eccl. ix. 8 allegorically: "White garments and costly oils are not meant here," he says (Eccl. R. ix. 6), "for the Gentile peoples have these in plenty: it is rather an exhortation to fulfil the Law, to do good deeds, and to study the Scriptures."

Esoteric Doctrines.

In a tradition concerning the knowledge of esoteric doctrines ("Ma'aseh Bereshit" and "Ma'aseh Merkabah"), related by Jose b. Judah, a tanna of the second half of the second century, it is said that Joshua b. Hananiah, the pupil of Johanan, under the eye of his master occupied himself with esoteric doctrines and that Akiba learned them from him (Ḥag. 14b). According to another tradition (*ib.*), it was Eleazar b. 'Arak with whom Johanan studied the mystic doctrines. A remarkable saying of Johanan's has been preserved, which is in accord with his study of mystic doctrines (Ḥag. 13a; comp. Pes. 94b). In this saying man is advised to bring the infinity of God, the Creator of the world, nearer to his own conception by imagining the space of the cosmos extended to unthinkable distances.

In conclusion may be mentioned the historical meaning which Johanan, on a certain sad occurrence, gave to a verse of the Song of Solomon (Yitro, Baḥodesh, 1). In Ma'on, a town of southern Judea, Johanan saw, probably not long after the destruction of Jerusalem, a young Jewess picking out grains of barley from the ordure of an Arab's horse, in order to still her hunger. Johanan said to his pupils who were with him: "My whole life long I have tried to understand that sentence in the Song of Solomon [i. 8]: 'If thou know not, O thou fairest among women,' etc. Now for the first time I catch its meaning: 'You did not wish'—so goes the word reproving Israel—'to submit to God; hence you are made subject to foreign peoples. You did not wish to pay God a half-shekel for each person; now you pay 15 shekels to the government of your enemies. You did not wish to repair the roads and streets for the holiday pilgrims; you must now repair the road-houses and watch-towers for your oppressors. And in you is fulfilled the prophecy [Deut. xviii. 47-48, R. V.]: Because thou servedst not the Lord thy God with joyfulness, and with gladness of heart, by reason of the abundance of all things, therefore shalt thou serve thine enemies, which the Lord shall send against thee, in hunger and in thirst, and in nakedness, and in want of all things.'"

Johanan felt the fall of his people more deeply than any one else, but—and in this lies his historical importance—he did more than any one else to prepare the way for Israel to rise again.

JOHANNES DE CAPUA. See John of Capua.

JOHANNES HISPALENSIS: Baptized Jew who flourished between 1135 and 1153; his Jewish name is unknown and has been corrupted into "Avendeut," "Avendehut"="Aven Daud," "Avendar." He was a native of Toledo, and hence is called also **Johannes (David) Toletanus.** He was one of the earliest translators from the Arabic. As Steinschneider—who was the first to determine his identity—has shown, he was for a time associated with the archdeacon Dominicus Gundisalvi, for whom he probably interpreted the few translations ascribed to that cleric.

Johannes translated principally astrological and astronomical, likewise some philosophical and a few medical works. With Gundisalvi's assistance he translated Gabirol's "Fons Vitæ" from the Arabic into Latin. In 1142 Johannes compiled from Arabic sources his "Epitome Totius Astrologiæ," Nuremberg, 1548. Johannes Hispalensis must be distinguished from the archbishop John of Seville, who corresponded with Hugo a St. Victor.

G. M. K.

JOHANNES PAULI: German humorist and convert to Christianity; born about 1455; died at Thann 1530. He became a distinguished preacher of the Franciscan Order at Oppenheim and Strasburg, at which latter place he took notes of Geiler's sermons, which he edited at Schlettstadt 1517. He is known chiefly, however, for his collection of jests under the title "Schimpf und Ernst" (Thann, 1519), which went through innumerable editions, imitations, and explanations, making it the "Joe Miller" of Germany. Some of his stories were taken over into the "Hundred Merry Tales" used by Shakespeare.

JOHANNES (DAVID) TOLETANUS. See Johannes Hispalensis.

JOHANNESBURG: Largest city in the Transvaal and principal center of Jewish life in South Africa. The Jewish community there is estimated at 12,000 in a total population of 120,000—the largest relative number, outside of Aden and Gibraltar, in the entire British empire. From its foundation, immediately upon the discovery of the Witwatersrand gold-fields at the end of 1885, Jews have formed about 10 per cent of the white population. The first attempts at religious organization took place July 10, 1887, when about eighty-eight pioneers, mostly from the Barberton gold-fields, the Kimberley diamond-fields, the coast towns, England, and Australia, formed the Witwatersrand Gold-Fields' Jewish Association. A death having occurred as early as May 12, 1887, the Boer government made a grant of the present Jewish cemetery, in which, up to the end of 1903, 829 burials had taken place. During the greater festivals of 1887 the Rev. Joel Rabbinowitz of Cape Town conducted the services. On Jan. 29, 1888, the association bought two building-plots on President street for a synagogue, and at the same time changed its name to "Witwatersrand Hebrew Congregation." The Rev. Mark L. Harris of Kimberley, who preached at the laying of the foundation-stone (Nov. 9, 1888), was elected rabbi, retaining that post till March 31, 1898. He was succeeded by the Rev. W. Wolf (reader) and Dr. J. H. Hertz (rabbi).

In 1891 two secessions occurred: a small Russian section formed the Bet ha-Midrash, with miḳweh, synagogue, and dayyan (Rabbi Dagutzky, succeeded by Rev. M. Friedman); and a larger Anglo-German-Polish section constituted the Johannesburg Hebrew Congregation. The senior body in consequence inserted the word "Old" in its name. The new congregation obtained from the government a free grant of valuable ground on which it erected a synagogue, which President Kruger, delivering bareheaded a speech in Dutch, declared open "in the name of our Lord Jesus Christ." The Rev. P. Wolfers became its rabbi, and was succeeded by the Revs. H. Isaacs, David Wasserzug, S. Manne (reader since 1899), and Dr. J. L. Landau (since 1903). The membership of the two larger synagogues is about 450 each. There is also a synagogue in the suburb of Jeppestown (1903), as well as various "ḥebrot" in Fereiras Township and in the suburb of Fordsburg. A Reform congregation—the Rand Modern Hebrew congregation—formed on semi-American lines, dissolved after a few months' existence in 1898–99.

Johannesburg has a ladies' benevolent society; a flourishing Gemilut Ḥasadim society for free loans to deserving poor; the Jewish Ladies' Communal League (maintains the South-African Jewish Orphanage); the Jewish Guild, a young people's charitable and literary society; a Talmud Torah; religious classes in connection with the English congregations; a Jewish social club; several Yiddish newspapers; and, intermittently, a Yiddish theater. The Witwatersrand Jewish Helping Hand and Burial Society, founded in 1887, combines the functions of a ḥebra ḳaddisha with those of a "United Hebrew Charities," has a membership of two thousand, and an income (July, 1902–June, 1903) of £4,801, with an expenditure of £3,972. The Jewish School, with an attendance of 400, is subsidized by the British government. Johannesburg is the seat of the executive of the Jewish Board of Deputies for the Transvaal and Natal, of the South-African Zionist Federation, and of the Transvaal Zionist Association. The Jewish population has always formed an integral portion of the business, intellectual, social, and political life of the city. Since the British occupation, Johannesburg Jews have sat in the Legislative Council of the Transvaal. See South Africa.

JOHLSON, JOSEPH (Asher ben Joseph Fulda): German Bible translator and writer on educational topics; born in 1777 at Fulda; died at

Frankfort-on-the-Main June 13, 1851. He was sometimes called "Fulda," after his native place, where his father was acting rabbi. In 1813 he was called to Frankfort as teacher at the Philanthropin, the recently founded Jewish school. He introduced systematic religious instruction, and in 1814, devotional exercises in connection with the school. He published the Twelve Minor Prophets, Carlsruhe, 1827, and "Die Heiligen Schriften der Israeliten: Nach dem Masoretischen Texte Wortgetreu Uebersetzt" (Genesis to Kings, 1831–36). Johlson's chief work was "Alume Yosef," an elementary book for Jewish schools, consisting of: (*a*) "Shoroshe ha-Dat," lessons in the Mosaic religion, 1814 (4th ed. 1840); (*b*) "Shire Yeshurun," Hebrew hymn-book, 1816 (4th ed., containing 600 hymns, 1840); (*c*) "Toledot Abot," a chronologically arranged Bible history, 1820 (2d ed., 1839). He wrote also: "Yesod ha-Lashon," a Hebrew grammar for schools (1833); "'Erek Millin," a Biblical Hebrew dictionary, with the corresponding synonyms, 1840; and, under the pen-name "Bar Amittai," "Ueber die Beschneidung in Historischer und Dogmatischer Hinsicht" (1843). Several letters addressed by him to L. Zunz have been published by S. Maybaum in the twelfth report of the "Lehranstalt für die Wissenschaft des Judenthums in Berlin."

JOHN. See NEW TESTAMENT.

JOHN ALBERT (Jan Albrecht or Olbracht): King of Poland (1492–1501). He ascended the throne of Poland in the same year in which his brother Alexander Jagellon became grand duke of Lithuania. The one-sided training received by John Albert showed itself in his attitude toward the Jews. He placed Buonocorsi Callimachus at the head of his advisers, who were as unpopular as the king himself. The hatred of the Jews instilled into him in his boyhood and youth by his teachers Buonocorsi and John Dlugosz led him to adopt repressive measures toward the Jews, although he had at first confirmed the privileges granted them by his father, Casimir IV. He ratified at the general diet of Petrokov (1496) the Nyeshav statute limiting the rights of the Jews. To him is also ascribed the creation of the first ghetto in Poland. In 1494 a conflagration destroyed the greater part of Cracow, and the mob availed itself of the opportunity to plunder the Jewish houses. In consequence of this the king ordered that the Jews, who were then scattered throughout the city, should move to Kazimierz, a suburb of Cracow, and there live alone. From that time Kazimierz became an isolated Jewish town, which had for centuries a life of its own, connected with the outer world only by economic interests. On the expulsion of the Jews from Lithuania (1495) by ALEXANDER JAGELLON, John Albert allowed them to settle in Ratno and its vicinity; later he extended their right of residence to all Polish towns already inhabited by Jews.

JOHN THE BAPTIST: Essene saint and preacher; flourished between 20 and 30 C.E.; forerunner of Jesus of Nazareth and originator of the Christian movement. Of his life and character Josephus ("Ant." xviii. 5, § 2) says:

> "He was a good man [comp. *ib.* 1, § 5], who admonished the Jews to practise abstinence [ἀρετὴν = "Pharisaic virtue" = "perishut"; comp. "B. J." ii. 8, § 2], lead a life of righteousness toward one another and of piety [εὐσέβειαν = "religious devotion"] toward God, and then join him in the rite of bathing [baptism]; for, said he, thus would baptism be acceptable to Him [God] if they would use it not simply for the putting away of certain sins [comp. II. Sam. xi. 4] or in the case of proselytes [see Soṭah 12b; comp. Gen. R. i.], but for the sanctification of the body after the soul had beforehand been thoroughly purified by righteousness. The people flocked in crowds to him, being stirred by his addresses. King Herod Antipas, fearing lest the great influence John had over the people might be used by him to raise a rebellion, sent him to the fortress of Macherus as a prisoner, and had him put to death.
>
> "The people in their indignation over this atrocious act beheld in the destruction which came soon afterward upon the army of Herod a divine punishment."

Legend of Birth.

John the Baptist was made the subject of a legendary narrative embodied in Luke i. 5–25, 57–80, and iii. 1–20, according to which he was the son of Zacharias, a priest of the section of Abia, and of Elisabeth, also of priestly descent, and was born in their old age. The angel Gabriel announced John's birth to Zacharias while that priest stood at the altar offering incense, and told him that this child would be a Nazarite for life ("nezir 'olam"; Nazir i. 2); filled with the Holy Spirit from his mother's womb, he would be called upon to convert the children of Israel to God, and with the power of Elijah would turn the hearts of the fathers to the children while preparing the people for the Lord (Mal. iii. 24 [A. V. iv. 6]). Zacharias, hesitating to believe the message, was struck dumb, and his mouth was opened again only after the birth of the child, when at the circumcision a name was to be given him; then he answered simultaneously with his wife that he should be called "John," as the angel had foretold. Zacharias, filled with the Holy Spirit, blessed God for the redemption of the people of Israel from the hand of their enemies (the Romans) through the house of David (a Messianic view altogether at variance with the New Testament conception), and prophesied that the child John should be called "Prophet of the Highest," one that would show how salvation should be obtained by remission of sins (through baptism; comp. Midr. Teh. to Ps. cxix. 76), so that through him a light from on high would be brought to "those that sit in darkness."

John remained hidden in the desert until, in the fifteenth year of Tiberius, the word of God came to him, and he stepped forth, saying in the words of Isa. xl. 2–5: "Repent ye: for the kingdom of heaven is at hand" (Matt. iii. 2), and preaching to the people to undergo baptism in repentance for the remission of their sins, and instead of relying on the merit of their father Abraham like hypocrites ("many-colored vipers"; see HYPOCRISY), to prepare for the coming day of judgment and its fiery wrath by fruits of righteousness, sharing their coats and their meat with those that had none. To the publicans also he preached the same, telling them to exact no more taxes than those prescribed; to the soldiers he declared that they should avoid violence and calumny (as informers) and be content with their wages. (The sermon of John the Baptist given here is obviously original with him, and the similar one of Jesus, Matt. xii. 33–34, xxiii. 33, is based thereon.) When asked whether he was the Messiah, he answered that with his baptism of repentance he would only prepare the people for the time when the Messiah would come as judge to baptize them with fire, to winnow them and burn the chaff with fire unquenchable (the fire of Gehenna; comp. Sibyllines, iii. 286; Enoch, xlv. 3, lv. 4, lxi. 8)—a conception of the Messiah which is widely different from the one which saw the Messiah in Jesus.

Among the many that came to the Jordan to undergo the rite of baptism in response to the call of John, was Jesus of Nazareth, and the influence wrought through him created a new epoch in those circles among which Christianity arose, so that henceforth the whole life-work of John the Baptist was given a new meaning—as if in his Messianic expectations he had Jesus in view as the true Messiah (see Matt. iii. 14; John i. 26–36).

His Appearance.

John the Baptist was regarded by the multitude as a great prophet (Matt. xiv. 5; Mark xi. 32). His powerful appeal (see Matt. xi. 12) and his whole appearance reminded the people forcibly of Elijah the prophet; "he wore raiment of camel's hair, and a leathern girdle about his loins; and his meat was locusts and wild honey" (Matt. iii. 4; comp. xi. 7–8). He stationed himself near some water-fountain to baptize the people, at Bethabara (John i. 28) or Ænon (John iii. 23). While he "preached good tidings unto the people" (Luke iii. 18), that is, announced to them that the redemption was at hand, he made his disciples prepare for it by fasting (Matt. ix. 14, xi. 18, and parallel passages). The prayer he taught his disciples was probably similar to the so-called Lord's Prayer (Luke xi. 1). John, however, provoked the wrath of King Herod because in his addresses he reproached the king for having married Herodias, his brother Philip's wife, and for all the evil things he had done. Herod therefore sent for him and put him in prison. It was while in prison that John heard of the work of preaching or healing done by Jesus (Matt. xi. 2–19; Luke vii. 18–35). Herod was afraid of the multitude and would not put John to death; but Herodias, says the legend (Matt. xiv. 6; Mark vi. 19 *et seq.*), had plotted revenge, and when on Herod's birthday a feast was given at which Herodias' daughter ingratiated herself into his favor by her dancing, she, at the instigation of her mother, asked that the head of John the Baptist be given her on a charger, and the cruel petition was granted. John's disciples came and buried his body.

The influence and power of John continued after his death, and his fame was not obscured by that of Jesus, who was taken by Herod to be John risen from the dead (Matt. xiv. 1–2 and parallel passages). His teaching of righteousness (Matt. xxi. 32) and his baptism (Luke vii. 29) created a movement which by no means ended with the appearance of Jesus. There were many who, like Apollos of Alexandria in Ephesus, preached only the baptism of John, and their little band gradually merged into Christianity (Acts xviii. 25, xix. 1–7). Some of the disciples of John placed their master above Jesus. John had thirty apostles, of whom Simon Magus claimed to be the chief (Clementine, Recognitions, i. 60, ii. 8; *ib.* Homilies, ii. 23).

No doubt along the Jordan the work begun by John the Baptist was continued by his disciples, and later the Mandæans, called also "Sabians" (from "ẓaba'" = "to baptize") and "Christians according to John," retained many traditions about him (see Brandt, "Die Mandäische Religion," pp. 137, 218, 228; "Mandäer," in Herzog-Hauck, "Real-Encyc.").

K.

JOHN OF CAPUA: Italian convert to Christianity, and translator; flourished between 1262 and 1269. He translated Rabbi Joel's Hebrew version of "Kalilah wa-Dimnah" into Latin under the title "Directorium Vite Humane"; and his translation was the source from which that work became so widely spread in almost all European tongues (see Jacobs, "Fables of Bidpai," Table of Versions, 1887). It was edited by Joseph Derenbourg (Paris, 1887). John of Capua translated also Maimonides' "Dietary" (Steinschneider, "Hebr. Bibl." xi. 76), and Ibn Zuhr's (Avenzoar's) "Al-Taisir," on diseases.

Bibliography: Steinschneider, *Hebr. Uebers.* pp. 748, 772, 875.

E. C. J.

JOHN CASIMIR: King of Poland (1648–68). He was elected to the throne with the aid of Chmielnicki, who after the election returned to the Ukraine. To the commission sent to him by the king he dictated that no Jew should be allowed on the Cossacks' lands. When the Jews who had escaped the Cossack massacres returned to the country John Casimir allowed those who had been baptized by the Cossacks under fear of death to return to Judaism. He could do that without conscientious scruples, for, although he was a Jesuit, he did not recognize the validity of the Greek Orthodox faith, to which the Jews had been converted by force during the Cossack uprising. This privilege was especially sought by the Jewish women who had been compelled to marry Zaporogians. Hundreds of Jewish children who had lost their parents and relatives were brought back to Judaism; and in order to prevent marriage between near relatives, the Jews took pains to ascertain the descent of such children, and supplied them with parchment-rolls containing records thereof, which they hung around their necks. In 1651 Chmielnicki renewed the war on the Jews.

John Casimir confirmed, Feb. 17, 1649, the privileges conferred by his predecessors on the Jews of Wilna, Brest, Moghilef, Minsk, Grodno, Pinsk, Orsha, and other places. He reaffirmed the Magdeburg rights for Kremenetz Jan. 20, 1650; for Pinsk, Dec. 31, 1650; he confirmed the privileges of the Jews of Kremenetz Jan. 26, 1650, and of the Jews of Pruzhany Dec. 31, 1650. On Feb. 22, 1653, he issued a decree forbidding the Jews of Wilna to keep Christian servants. They were given a period of six weeks within which to discharge any such servants, and they were to pay a fine on their failure to do so. If Christian servants should again be hired after the payment of the fine, Jews employing them were to pay a second fine, and the third time the community was to be deprived of its synagogue, which was to be removed to a place assigned for it outside of the city gates.

By a decree dated June 23, 1655, it was ordered that no infringement of the rights of the leaseholders of Brest should be allowed. A decree dated June 16, 1661, granted privileges to the Jews of Kamenetz, permitting them to have, besides the regular market-day on Saturday, a special market-day on Tuesday. Casimir also permitted them to build a synagogue, provided it was inferior in its dimensions and ornamentation to the Catholic and Greek Orthodox churches; and also to build a bath-house and to lay out a cemetery. Besides these privileges he also granted them special rights in trading and in industrial occupations, in the purchase of lands, houses, etc.

Enactments.

In July of the same year he ordered that the Jews of Brest be relieved for three years from the payment of excise duties because of the ruin of their houses, stores, and other buildings, and reaffirmed the rights given to them by the law of the land. By a decree of June 20, 1662, Casimir ordered that the Jews of Lithuania, in consideration of their great poverty, be relieved from the payment of that portion of the 12,000 gold ducats levied upon them by the Diet which was still unpaid. On Feb. 21, 1663, he issued another decree in reference to the employment of Christian servants by the Jews, and ordered the discharge of servants within four weeks, under heavy penalties in cases of disobedience.

On April 18, 1664, he decreed that the Jewish butchers of Moghilef be forbidden to sell meat in any other place than that adjoining the synagogue; and on June 8 of the same year he prohibited the Jews of Wilna from dealing in non-Hebrew books. On March 16, 1666, he decreed that the Jews of Brest be relieved from all military duties, in order to avert their entire ruin, and he further ordered the commander of the garrison not to require from the Jews of Brest either the quartering of soldiers or the supply of provisions, nor to burden them with any other requisitions.

The same exemption from taxation of the Jews of Brest was reaffirmed by a decree dated Warsaw, May 23, 1667. For in spite of the explicit orders of the king, the Jews of Brest had been compelled to pay the exactions of the military commanders, as appears from the order of Hetman Patz, who also ordered the military not to make any levies on the Jews, and informed the officers that they would be held responsible for any injury inflicted.

H. R.

JOHN OF GISCALA (Johanan ben Levi): Native of the small Galilean city of Giscala (גוש חלב), who took an important part in the great war against Rome (66–70). He was originally poor, weak in body, and not at all eager for battle; but the vices that Josephus ascribes to him, saying that he was covetous and bloodthirsty, a cunning and ready liar, and greedy for glory ("B. J." ii. 21, § 1; iv. 2, § 1; comp. *ib.* vii. 8, § 1), may have been strongly colored by that writer, his mortal enemy. Josephus says also that John was so unwarlike and unambitious that he endeavored to persuade his native city to remain loyal to the Romans; but when the city was attacked and burned by the Gadarenes, the Baraganeans, and the Tyrians he called together his fellow citizens, armed them, conquered the invaders, and rebuilt Giscala so that it was more beautiful than before. He also built walls for future protection (Josephus, "Vita," § 10; comp. *ib.* § 38), but not at Josephus' command, as the latter says in another passage ("B. J." ii. 20, § 6).

Gathers Troops.

Four hundred fugitives from Tyrian districts gathered about John (*ib.* ii. 21, § 1), their number quickly increasing to between 4,500 and 5,000 (*ib.* § 7; "Vita," § 66). He realized large sums of money from the sale of his oil to Jewish customers in Cæsarea Philippi; and this money he used in paying his soldiers ("Vita," § 13). He asked permission of Josephus, at that time governor of Galilee, to seize the grain stored for the emperor; and when Josephus, unwilling to break with the Romans, refused, John took the grain with the permission of Josephus' fellow ambassadors, and built the walls of Giscala with the proceeds. These coambassadors, therefore, who were very prominent men and loyal patriots, had confidence in John. This was the beginning of the conflict between John and Josephus, which grew still more serious.

Conflict with Josephus.

Josephus takes false credit for having refrained from injuring John when the latter was in his power (*ib.* § 15); for at first the enmity between the two men was not deep enough to call for any act of violence; and later on John was always on his guard. Among the cities of Galilee, Tiberias and, later, Tarichеæ were especially devoted to Josephus, while Giscala and Gabara sided with John (*ib.* §§ 25, 45). When John asked Josephus' permission to use the warm baths of Tiberias, Josephus not only granted the request, but also provided lodgings and ample food for John and his companions (*ib.* § 16). This happened after the affair of Josephus with the youths of Daberath (*ib.* § 26; "B. J." ii. 21, § 3); for it was then that John first became suspicious of him. As Josephus was at that time absent, John seized the opportunity to persuade the people of Tiberias to secede from Rome, and was much alarmed at Josephus' unexpected return. The latter now began to exhort the people; but when he heard that John had picked out, for the purpose of killing him, the most reliable men from among the 1,000 that he (John) had with him, he immediately fled to Tarichеæ ("Vita," §§ 17–18). John, seeing his scheme frustrated, returned to Giscala, and wrote to Josephus, with many protestations, that he had not instigated the attack.

Measures Against Josephus.

John now began an agitation against Josephus in Jerusalem itself. He sent his brother Simon and Jonathan, son of Sisenna, with 100 armed men to that city to demand the recall of Josephus. Simon b. Gamaliel, the leader of the Pharisees, was John's friend; Josephus, on the other hand, was supported by the high-priestly families. The priests, however, decided to recall Josephus. The latter had intercepted letters in which John had attempted to incite the people of Galilee against him ("Vita," § 46). John and the envoys of the government of Jerusalem had assembled at Tiberias in the house of Jesus b. Sapphia, which was strongly fortified, hoping to take Josephus prisoner there; but this attempt also failed; and John finally returned to Giscala. According to Josephus' account, the Galileans desired to seize John and turn him over to his enemy; but Josephus prevented them, as they would thereby have occasioned a civil war.

Josephus, however, was again in great danger, as John marched against him at Tiberias with an army, obliging him once more to fly to Taricheæ (*ib.* § 59), whereupon John returned to Giscala. The latter, however, had succeeded in inciting the people of Tiberias against Josephus, sending them a detachment of his men. Josephus was compelled to subdue Tiberias with an armed force (*ib.* § 63), John's 4,000 followers (3,000 according to "B. J.") surrendering, and he himself retaining only 1,500 men (2,000 according to "B. J."). Thenceforward he remained at Giscala ("Vita," § 66; "B. J." ii. 21, §§ 7, 8).

John showed himself a true patriot and hero in open war with the Romans much more than in the petty strife with Josephus. When Josephus had been conquered and Galilee was in the hands of the Romans, Giscala still held out ("B. J." iv. 2, § 1). Titus, commissioned by his father, Vespasian, to reduce the city, attacked it with 1,000 horse. John did not dare to engage in battle, having probably only his countrymen, peaceful tillers of the soil, about him. On the pretext that the Sabbath was approaching he asked for a truce of one day, which Titus granted. But John left the city secretly in the night; and the next day the citizens opened the gates. Titus was so angry at this deception that he sent men in pursuit; but John found refuge in Jerusalem ("B. J." iv. 2, §§ 2-5).

John at Jerusalem.

The second stage of John's activity began at Jerusalem. Here he persuaded the people that it was better to repulse the Romans from behind strong walls than to die to no purpose in the small towns of Galilee. His followers, several thousand strong, who passed in Jerusalem under the name of "Galileans," distinguished themselves by wild bravery; more than 2,000 men from Tiberias alone were in the city ("Vita," § 65). Josephus accuses them of plunder and rape. John made himself the tyrant of Jerusalem, then rent by parties; and to the end he remained a chief personage of the war. His headquarters were at first on Ophel ("B. J." iv. 9, § 11); and from this position he forced the Zealots back into the Temple. He was joined by the Idumeans that had remained at Jerusalem. The peace party of Jerusalem now called Simon BAR GIORA and his army into the city; but this was to their detriment, as they now had two tyrants over them (*ib.* § 12; comp. *ib.* v. 13, § 1). Another party now arose, Eleazar b. Simon seceding from John's command and occupying the inner court of the Temple (*ib.* v. 1, § 2; Tacitus, "Hist." v. 12). This step must have materially weakened John's power, especially as the Idumeans he had called to his aid were no longer in the city. The latter had murdered the high priest Anan b. Anan, a deed for permitting which John must be blamed; and Eleazar's defection proves that likewise after that event he did not hesitate to commit acts of violence. Circumstances almost justified John in seizing the dictatorship ("B. J." iv. 7, § 1; comp. 9, § 10).

The three parties in Jerusalem now fell upon one another. John fought both with Bar Giora and with Eleazar. He repulsed the followers of the former from the colonnades of the Temple; and the missiles that the Eleazarites hurled from the Temple he stopped by machines, in the construction of which he used even the timber that had been provided for alterations to the holy house (*ib.* v. 1, § 5; comp. vi. 3, § 2). On the occasion of the last Passover that the Jews ever celebrated in the Temple Eleazar admitted the country people into the building; but John's followers pressed in among them with concealed weapons and attacked them (*ib.* v. 3, § 1). When Eleazar disappeared from the scene, John took possession of the Temple. He now had 8,400 followers, including 2,400 Zealots. They burned the part of the city lying between the forces of John and those of Simon that they might be better able to fight; and John and Simon bar Giora did not unite until the Romans were at the gate. Then they so arranged matters that the followers of John defended the part of the wall at ANTONIA and the northern stoa of the Temple, while the followers of Simon defended the rest (*ib.* 7, § 3; comp. 9, § 2).

John's End.

When the engines were brought, John had from within undermined the space that was over against the tower of Antonia, as far as the banks themselves, and had supported the ground over the mine with beams laid across one another, whereby the Roman works stood upon an uncertain foundation. Then he ordered such materials to be brought in as were daubed over with pitch and bitumen and set them on fire; and as the cross-beams that supported the banks were burning, the ditch yielded on the sudden, and the banks were shaken down and fell into the ditch with a prodigious noise (*ib.* v. 11, § 4).

As the people had nothing more of which they could be robbed, John laid hands upon the vessels of the Temple. All being nearly lost, John was asked to surrender; but even now he reviled Josephus—who had been commissioned by Titus to make the demand—still hoping that the city would not be conquered. After the Temple fell John succeeded in escaping to the upper city, and when again asked to surrender he demanded free retreat with his arms. As this request was not granted the fighting was continued. In Elul, 70, the upper city also fell into the hands of the Romans: the leaders, however, did not surrender, but hid in subterranean passages. John was finally forced by hunger to give himself up to the Romans. Condemned to lifelong fetters, he was reserved for the Roman triumph of Titus, and he probably died in a prison at Rome (*ib.* vii. 5, § 3).

JOHN, THE GOSPEL OF. See New Testament.

JOHN HYRCANUS. See Hyrcanus.

JOHN SOBIESKI: King of Poland (1674–96). During his reign Poland had already lost its prominent position among European peoples, and, except during a few years, her lost prestige was never regained. With the loss of Poland's power came also the waning prosperity and influence of her Jewish communities. The poverty of the Polish Jews at that time increased to such an extent that many sought work in Prussia, where they hired themselves out as common laborers in the fields of Catholic landlords (König, "Annalen der Juden in den Preussischen Staaten," p. 85).

Commission to Polish Karaites.

During the reign of Sobieski, King Charles XI. of Sweden, who was actuated by the desire to convert the Jews to Christianity, commissioned Prof. Gustavus Perringer of Lillienblad (*c.* 1690) to go to Poland in order to study the manners of the Karaite Jews and to purchase copies of their writings at any cost. Perringer first went to Lithuania, where there were a number of Karaite communities. He probably failed to get much information or to secure many books, for the Lithuanian Karaites had become ignorant, and were of less intelligence than their brethren in Constantinople, in the Crimea, and in Egypt; and they knew little of their own origin and history. About this time the Polish Karaites were ordered by King Sobieski to leave their most populous communities, such as Troki, Lutsk, and Halicz, and to disperse in the smaller towns. The Karaite judge Abraham ben Samuel of Troki, who was a favorite of Sobieski, transmitted this order, and the Karaites thus became distributed (Easter, 1688) as far as the northern province of Samogitia. In this manner the Polish Karaites were made to mingle more intimately with their neighbors, and gradually assumed the manners and customs of the Polish peasants.

His Stanch Friendship for the Jews.

Sobieski always showed himself to be a stanch friend of the Jews. He granted them many privileges in Lithuania and Poland, endeavored to counteract the agitation of the priests against them, and sought to discredit the false accusations brought forward by their enemies. At the same time he often found himself unable to intervene effectually in their behalf, since the royal power had become to a great extent nominal. The Jesuits had already succeeded in imbuing the lords and the minor nobility ("schlyakhta") with a spirit of intolerance and suspicion, as is shown by the charge of host-desecration made in 1670 against the Jews of Mlava. The increase of the influence of the clergy was favored also by the frequent absences of Sobieski in times of war. Still, the Jews found in him a powerful protector. During his reign the Jewish communities partly regained their former prosperity, and their organization, including that of the Council of the Four Lands, was strengthened.

Besides the special privileges granted to the Jewish community of Zolkiev situated on his personal estate, Sobieski also issued about twenty decrees in favor of the Jews of Lemberg, which edicts included warnings to the magistrates and priests not to oppress the Jews ("Acta Grodzkie i Ziemskie Miasta Lwowa," vol. x.). When the four districts of the Lithuanian council — Wilna, Grodno, Brest, and Pinsk—could not agree as to spheres of influence, Sobieski ordered (Feb. 8, 1682) that the question be settled within twelve weeks (Bershadski, "Litovskiye Yevrei," p. 19). In 1682 he ordered, in response to a petition of the Jews of Wilna, that they be relieved from the supervision of the magistrates (Bershadski, *l.c.* pp. 18–19). He also renewed the old edicts by a decree dated May 6, 1672.

H. R.

JOHN OF VALLADOLID: Jewish convert to Christianity; born 1335. An able speaker, and possessed of some knowledge of rabbinical literature, he persuaded King Henry of Castile that he could convince the Jews of the truth of Christianity if they were obliged to listen to him and to answer his questions. An order was accordingly issued, compelling the Jews to attend John's lectures in their synagogues and to discuss them with him. In company with another Jewish convert, John traveled throughout the Castilian provinces and lectured and debated in the synagogues, but with a signal lack of success.

At Avila he assembled the Jews four times and discussed with them the tenets of Christianity before numerous Christian and Moslem audiences. At Burgos he summoned Moses ha-Kohen of Tordesillas to a religious controversy in the presence of Archbishop Gomez of Toledo. John endeavored to demonstrate from the Bible the Messianic claims and the divinity of Jesus, and the truth of the dogma of the Trinity and of other Christian doctrines. Thus, for instance, he claimed that the final closed "mem" used in the word לםרבה (Isa. ix. 6) is an allusion to the immaculate conception. Moses ha-Kohen had no difficulty in refuting arguments of this kind, and the controversy was broken off in the middle of the fourth sitting.

K. I. Br.

JOHNSON: American family, members of which have attained distinction in Ohio, Texas, and New York. The family is from England, the most important members being:

David Israel Johnson: The earliest known member of the family; married Eliza Davis May 16, 1816. Before leaving England one son was born to them—**Edward I. Johnson**, Feb. 14, 1817. This son enlisted in the Texan War of Independence, became lieutenant of artillery, and lost his life at the Alamo, in 1836, at the age of nineteen.

Edgar M. Johnson: Youngest child of David Israel Johnson; born Nov. 5, 1836; admitted to the Cincinnati bar in 1854, at the age of eighteen. He became prosecuting attorney of the police court of Cincinnati by appointment in 1857, and was elected to the office in 1859, serving one full term. Johnson was a member of the school board of Cincinnati from 1867 to 1871, and was mainly instrumental in bringing into the courts the famous controversy as to the reading of the Bible in the public schools, the controversy resulting in the discontinuance of the reading.

In 1864 Johnson, with John P. Jackson and the Honorable George Hoadly, then a judge of the superior court of Cincinnati, formed a partnership under the name of "Hoadly, Jackson & Johnson." In 1877 Johnson and Hoadly went to New York city and associated themselves with Edward Lauterbach under the firm name of "Hoadly, Lauterbach & Johnson," which partnership continued until the death of Johnson on Dec. 8, 1893. In 1881 Johnson was nominated as lieutenant-governor of Ohio, but failed of election.

Frederic A. Johnson: Third son of David Israel Johnson; the first Jewish child born in Ohio; born in Cincinnati, Ohio, June 2, 1821; died Jan. 20, 1893. He was elected justice of the peace of Cincinnati township, Hamilton county, Ohio, in 1869, and served continuously until 1884. In 1885 he was elected to the General Assembly of Ohio as a member of the House of Representatives. In 1889 he was again elected to a justiceship, and served until 1892.

Henry D. Johnson: Second son of David Israel Johnson; born at Connersville, Ind., Feb. 21, 1819. He was the first Jewish child born in Indiana—in fact, the first, so far as known, born west of the Alleghanies. Henry served in the Mexican war and died in California.

James W. Johnson: Sixth child of David Israel Johnson; born April 23, 1830; died Oct., 1889. He wrote the music and words of the following songs, which were very popular for a time: "At home thou art remembered still"; "Wipe away each dripping tear"; "Awake from thy slumber." He wrote also "Affinity," a novel, published in the "Cincinnati Times" about 1867. He served as deputy treasurer of Hamilton county, Ohio, from 1874 to 1880.

Selina Emma Johnson: Fourth child of David Israel Johnson; born Sept. 13, 1823; still living (1904); the first Jewish female child born in Ohio. She married Eleazar Ezekiel Dec. 8, 1841, became a teacher in the public schools of Cincinnati, and was for a time acting principal of the girls' department of the Center street school. Eleazar Ezekiel having died, she married Abraham Abraham Sept. 24, 1851.

A. D. P.

JOIADA (יוידע; in LXX. once Ἰωδαε): Son of Eliashib, high priest about 450 B.C. (Neh. xii. 10-11, 22). One of his children became a son-in-law of Sanballat the Horonite, and was removed from the Temple by Nehemiah (Neh. xiii. 28).

G. S. Kr.

JOIGNY: Chief town in the department of the Yonne (the ancient Champagne), France, situated on the River Yonne. It had an important Jewish community, which flourished especially in the twelfth century. The "notables of Joigny" are mentioned in the Maḥzor Vitry (No. 244). The rabbis of this place were reckoned among the most important of France; *e.g.*, Menahem ben Perez (died toward the end of the twelfth century) and Yom-Ṭob ben Isaac, surnamed "the Holy," *i.e.*, the martyr, who died at York, England, in 1190.

JOINT OWNERS: In the Mishnah joint owners are known as "shuttafin." When the joint owners are coheirs the Mishnah speaks of them as "the brothers"; but the relation arises apart from common descent, as when two or more people make a purchase in common, or when a sole owner sells shares in his land or chattels to another.

Limits of Division.

I. For cases in which some of the joint owners desire a division, against the wish of the others, the Mishnah (B. B. i. 6) lays down this principle: "Whenever the several parts, after division, are great enough, so that each of them can bear the name of the whole, any part-owner is entitled to claim a division; otherwise not; but a sacred book can not be divided, though all the owners be willing." Thus a courtyard for two or more houses should not be divided unless large enough to leave four cubits square for each part. The smallest field deserving of the name would be sown with nine cabs of grain, which, according to the commentators, would mean an area of 3,750 square cubits, or 6,666⅔ square feet; a garden must have for each share an area enough for half a cab of seed; similarly a dining-hall, or a dove-cot, or a bath-house, or an irrigation sluice, or an oil-press, or a shawl. In the Gemara (B. B. 12a) the minimum of an orchard ("pardes") is fixed at the area for three cabs of seed. But all these measurements are meant for Palestine; in Babylonia a field for each part-owner must be large enough for one day's plowing, and an orchard or vineyard must be sufficient for thirty-six trees or vines—as many as one man can dress in a day; and these greater limits were generally recognized in the countries of the Diaspora (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 171, 3).

It is the opinion of some rabbis (*ib.* 171, 4-5) that if a part-owner has land adjoining the land held in common, he can be compelled to divide, though his share of the latter by itself would be below the minimum; also that the part-owner can not be compelled to take a share which has no other outlet than over the share of a companion. When the rule of partition applies as above any joint owner can call for its enforcement, no matter how the joint ownership arose. Where the land is all of the same quality and can be partitioned by measurement alone, a part-owner who has an adjoining field may ask that his share be laid off next to that field, and it must be done; but if there are countervailing qualities (*e.g.*, one part being nearer to the river, another having better soil) each owner must be satisfied with what the lot gives him, and none has a right to choose. According to later authorities, in case of need a division in which the quality of the land is taken into account may be made by three unlearned men, provided they are known to be men of integrity and well acquainted with land-values.

Assignment by Lot.

The first-born son gets his double share in one continuous tract, and so does one of several purchasers of land who has a share twice as large as any of the others. But one who has bought out another part-owner must be satisfied to have the old and the newly bought share both assigned by lot, and take the chance of their being together or apart. So the "yabam" (a brother who has taken his childless brother's widow to wife, and whose eldest son by her is heir to the dead brother's share) must draw separately for his own and for his son's share.

When the land is flanked on two sides by a river, and on the other sides by roads, it should be cut diagonally so as to give, as far as possible, to each part-owner access to the river as well as to the roads (Maimonides, "Yad," Shekenim, xii. 1–3, following B. B. i. 6). Where there are two parcels, such as two houses, of like uses and of nearly the same value, held jointly by two owners, the court should rather listen to him who proposes to assign one to each part-owner than to divide each separately; but where two things jointly owned have different uses, such as two women slaves, one being a spinner and the other a cook, or two pieces of land, one a vineyard and the other a corn-field, neither of the owners can demand a division by assignment of one to each.

Division by Compulsory Purchase.

II. Where, by the above principles, a partition in kind can not be adjudged, the next alternative, when there are only two part-owners, is for either of them to say "gud o agud" (buy, or I shall buy; B. B. 13b), of course at the same price. The price so named may be far above the appraisement or true value. But one who is unwilling to buy can not compel his companions to buy, even at the lowest price. However, if of the two owners, say the two coheirs, of something indivisible, as a bath-house or a wine-press, one is too poor to buy out his companion and is unable to borrow the money for the purpose, he may sell his half with the incident right of saying "gud o agud," to a third person. It is the better opinion that this offer must always be made on a cash basis. "Buy thou on time payments or I will buy on time payments!" might be very unfair where one part-owner is amply solvent and the other is irresponsible. In the case of two articles used for different purposes, instanced above, the "gud o agud" proposition may be made for both jointly. Where one of the joint owners is an infant the proposition can not be made, for the guardian appointed for the infant has no power to sell real estate.

III. When neither a division in kind nor the "buy or sell" alternative is possible, the parties can, of course, sell the land, or whatever thing is held in common, to others; or the court can order such a sale on the application of any one of them (Hoshen Mishpaṭ, 171, 7); in such a case the law of Appraisement, of valuation and advertisement, applies, and the proceeds in money can be divided.

Common User.

IV. But when for any reason none of the parties will ask for a settlement by sale, they must enjoy the thing in common; and this common enjoyment is also regulated by law. When they are coheirs of a former owner who has leased the property, they divide the rent as it comes in.

R. Moses Isserles (on Ḥoshen Mishpaṭ, 171, 8) thinks that in leasing the plan of "gud o agud" should be tried before a lease is made to a stranger; that is, each of the two part-owners can offer to buy or sell half of the rights for a year. But if the place is not intended for renting, and the owners can not or do not wish to occupy it jointly, they should alternate in occupation by years; and if one owns two-thirds and the other one-third, the former should occupy for two years and the other for one year at a time. A bath-house, however, can be used by two or more owners successively every day; and so in the case of other indivisible things.

Results of Division.

V. When a division in kind has been made, new duties between the former joint owners arise. Where a courtyard is divided, and each part-owner takes a house and part of the yard, each can claim the right of privacy (*i.e.*, that his new neighbor shall not look over into his ground), and insist on the building, at the common expense, of a partition wall four cubits in height, to be placed in the middle (*i.e.*, one-half on the ground of each). The Mishnah (B. B. i. 1, 4) prescribes the thickness of the wall according to the material, which, after the custom of the several parts of Palestine, was either of rubble-stone, or cut stone, or half-baked brick, or full-baked brick—a wall of the last-named material having at least the thickness of three palms' breadth (*ib.* i. 2). In dividing a garden a stone fence can be required, unless the custom is to the contrary; and custom may require such a fence in a divided field also (B. B. 4a). Should the wall or fence fall the place and stones belong to both in common. In that case each must contribute one-half to rebuild it to the height of four cubits. So in any division of a court for which a watchman is kept, each of the new owners must contribute toward building a gate-house.

VI. What the Talmud in this connection (B. B. 13b *et seq.*) says about the division of sacred books is not a matter of jurisprudence but of ritual, for a bodily division is unlawful with or without the consent of the owners. The duties of part-owners often run into communal duties toward their fellow citizens, in a town, a community, or among the dwellers of some court or alley.

The term "shuttafin," which in the Talmud stands for "part-owner," is in the later law literature applied also to "partners" (see Partnership). For other aspects of joint ownership see Bererah.

JOINVILLE (Old French, **Joanville**): French town in the department of Haute-Marne; in the Tosafot occur יונביל, יינביל, יונבילא, מנייבילא, and other variants (Yoma 81; 'Er. 24; Ber. 8; Bek.

32; etc.). The counts of Champagne drew abundant revenue from the Jews of Joinville, who were practically their serfs. In 1284, when Philip the Fair took possession of Champagne, they had to contribute 25,000 livres as a gift "on his happy advent."

Among the Jewish scholars of Joinville were the following: R. Bonet or Benoit (בנייט) of אינבילא (Gross, "Gallia Judaica," p. 255); Samuel ben Aaron, the tosafist; Simeon ben Samuel, son of the preceding and himself an eminent tosafist and Bible commentator.

JOKTAN (יקטן).—Biblical Data: Younger son of Eber and progenitor of thirteen Arabic tribes (Gen. x. 25–29; I Chron. i. 19–23), many of which—as Hazarmaveth, Shebah, Ophir, and Havilah—have been identified. The name seems to mean "the younger" or "the smaller," but in Gen. R. xxxvii. 10 it is interpreted as "he who humbles himself," and for his humility Joktan was rewarded by being made the ancestor of thirteen tribes. The place of settlement of Joktan's descendants is given as "from Mesha, as thou goest unto Sephar, a mount of the east" (Gen. x. 30). The district indicated is in Arabia, but Targum pseudo-Jonathan identifies Sephar with Sepharvaim. Josephus ("Ant." i. 6, § 4) asserts that their dwelling was "from Cophen, an Indian river, and in part of Asia adjoining it."

M. Sel.

——In Arabic Literature: Joktan in Arabic literature bears the name "Ḳaḥṭan." In Gen. x. Joktan is described as the ancestor of several south-Arabian tribes. In accordance with this statement Arab genealogists hold Ḳaḥṭan to be the first king of Yemen, and his son and successor Ya'rub the first person who spoke Arabic. This is but the legendary form of the tradition that Ḳaḥṭan was the progenitor of the southern Arabs, or Arabs proper, while the Ishmaelite Arabs were originally of non-Arab stock; but, pretending to be Arabs, they adopted Arab customs and intermarried with genuine Arabs, being therefore called "Musta'rabs." Another son of Ḳaḥṭan, who was called Jurhum, emigrated to northwest Arabia, and founded a kingdom in the Ḥijaz. This tradition was probably invented at a later date in order to establish a close relationship between the northern and southern Arabs, because it is added that Ishmael married a woman of the tribe of Jurhum and became a member thereof.

E. G. H. H. Hir.

JOLLES, ZECHARIAH ISAIAH B. MORDECAI: Rabbinical scholar and author; born at Lemberg about 1814; died at Minsk, Russia, May 14, 1852. In 1834, after having married the daughter of Jacob Dokshitzer, one of the wealthiest Jews of Minsk, he settled in that city. Jolles sympathized with the Haskalah or progressive movement, and is said to have sided with Lilienthal when the latter visited Minsk in 1844 for the purpose of inducing the Jews to establish schools in accordance with the governmental program.

Jolles' published works are: "Dober Mesharim" (Lemberg, 1831), on the emendations of the Talmudical text by Mordecai Jaffe, surnamed "Lebush"; "'Et le-Dabber" (*ib.* 1834), an epistle to candidates for the rabbinate, in which various phases of contemporary Jewish life are discussed in the spirit then prevailing among the progressists; "Zeker Yeshayahu" (Wilna, 1882), novellæ on the code of Maimonides, and responsa, published posthumously by his son Süssman Jolles. He is said to have written more than twenty-five other works on rabbinical and scientific subjects. It is understood that R. Akiba Eger's responsum No. 176 is addressed to Jolles.

Bibliography: Eisenstadt, *Rabbane Minsk wa-Ḥakameha*, pp. 29–30, 46, Wilna, 1898; Zeitlin, *Bibl. Post-Mendels.* p. 161.

JOLOWICZ, HEYMANN (ḤAYYIM BEN ABRAHAM): German preacher and author; born Aug. 23, 1816, at Santomischl, province of Posen; died at Königsberg, Prussia, Jan. 31, 1875. He attended the University of Berlin and then filled the position of preacher in Marienwerder, Kulm, and finally in Köslin. He belonged to the ultra-Reform party and always expressed his views fearlessly. After he retired from his office, he settled at Königsberg, where he delivered a series of lectures (1864–1865) on the history and development of Judaism and on the history of the Synagogue service. He established a radical Reform congregation, with Sunday services and German liturgy, which, however, was of short duration.

Jolowicz was very active as an author, beginning in his student years. The following is a list of his publications:

Die Fortschreitende Entwickelung der Kultur der Juden. Reprinted from "Orient, Lit." Berlin, 1841.
Das Buch Kusari Uebersetzt und Commentirt (together with D. Cassel, parts i. and ii.). Leipsic, 1841–43.
Rationalismus und Supranaturalismus, Ihr Verhältnis und Ihre Beziehung zur Auslegung der Bibel. Königsberg, 1844.
Harfenklänge der Heiligen Vorzeit. Leipsic, 1846.
Geist und Wesen der Israelitischen Religion. Köslin, 1847.
Moses Mendelssohn's Allgemeine Einleitung in die Fünf Büchern Moses. Köslin, 1847.
Zwei Bücher Rabbinischer Weisheit, 2d ed. Thorn, 1849.
Polyglotte der Orientalischen Poesie. Leipsic, 1853.
Die Himmelfahrt und Vision des Propheten Jesaias (translated from the Ethiopian). *Ib.* 1854.
Die Germanische Welt in Ihrer Berührung mit dem Christenthume. *Ib.* 1854.
The First Epistle of Baruch (translated from the Syriac). London, 1855.
Sharpe's History of Egypt, German transl. Leipsic, 1857.
Bibliotheca Aegyptiaca. Leipsic, 1858; supplement, *ib.* 1861.
Blüthenkranz Morgenländischer Dichtung. Breslau, 1860.
Gesch. der Juden in Königsberg. Posen, 1867.
German translation of Lecky's "History of the Rise and Influence of the Spirit of Rationalism." Leipsic and Heidelberg, 1868.

Bibliography: Jolowicz, *Gesch. der Juden in Königsberg*, pp. 180 *et seq.*; *Allg. Zeit. des Jud.* xxxix. 153.

JONADAB. See Jehonadab.

JONAH.—Biblical Data: Prophet in the days of Jeroboam II.; son of Amittai of Gath-hepher. He is a historical personage; for, according to II Kings xiv. 25, he predicted in Yhwh's name the extent to which Jeroboam II. would restore the boundaries of the Northern Kingdom, "from the entering of Hamath unto the sea of the plain." The wording of the passage may also imply that Jonah's prophecy was uttered even before Jeroboam II., perhaps in the time of Jehoahaz (thus Klostermann to II Kings xiii. 4). In any case Jonah is one of the prophets who advised the house of Jehu, and it is not unlikely that with him the series of prophets that began with Elijah came to a close. The next succeeding prophet, Amos of Tekoa, whose activity fell in the reign of Jeroboam II., begins an entirely new series, as regards not only his position toward the king and the people, but also his method of communication, in that he resorted to writing instead of the spoken word.

Jonah belongs only seemingly to the prophets who were also writers; for the book bearing his name does not afford the least evidence of having been written by the prophet himself. It merely tells his history, as the Books of the Kings tell of Elijah, Elisha, Micaiah, or Yimlah ben Zimlah. The book, however, doubtless refers to the same prophet Jonah as is mentioned in II Kings xiv. 25; for the name of both is Jonah ben Amittai. This identity has recently been denied by Hugo Winckler ("Altorientalische Forschungen," 1900, ii. 260 *et seq.*; see also Cheyne in "Encyc. Bibl." ii. 2570), but Winckler's reasoning, however ingenious, does not suffice to make his theory more than possible. It is one and the same prophet that is mentioned in both places: in the superscription to the Book of Jonah, with the name of his father; in the historical narrative, with the name of his home also. Indeed, the account in the Book of Jonah depends on that in the Book of Kings; nor has it been proved, as some have held, that the Book of Jonah was written to account for the non-fulfilment of the predictions against Nineveh contained in the prophecy of NAHUM, and that the Jonah of Kings and the Jonah of the prophetical book can consequently not be identical. Winckler retracted his opinion in "Allgemeine Evangelisch-Lutherische Kirchenzeitung," 1903, p. 1224.

E. G. H. K. B.

——**In Rabbinical Literature:** The tribal affinities of Jonah constitute a point of controversy; generally assigned to Asher, he is claimed for Zebulun by R. Johanan on the strength of his place of residence (II Kings xiv. 24); these opinions were harmonized by the assumption that his mother was of Asher while his father was of Zebulun (Yer. Suk. v. 1; Gen. R. xcviii. 11; Yalḳ., Jonah, 550; Abravanel's commentary to Jonah). According to another authority his mother was the woman of Zarephath that entertained Elijah (*ib.*; Pirḳe R. El. xxxiii.). As this prophet, who was also of priestly descent, would have profaned himself if he had touched the corpse of a Jew, it was concluded that this woman, whose son (Jonah) he "took to his bosom" and revived, was a non-Jew (Gen. R. *l.c.*). He received his prophetic appointment from Elisha, under whose orders he anointed Jehu (II Kings ix.; Ḳimḥi, *ad loc.*; and Ẓemaḥ Dawid). He is said to have attained a very advanced age (more than 120 years according to Seder 'Olam; 130 according to Sefer Yuḥasin), while Ecclesiastes Rabbah viii. 10 holds that the son (Jonah) of the Zarephath widow never died. The "holy spirit" descended on him while he participated in the festivities of the last day of Sukkot (Yer. Suk. v. 1, 55a). His wife is adduced as an example of a woman voluntarily assuming duties not incumbent on her, for she is remembered as having made the pilgrimage to Jerusalem on the "regel" (holiday; Yer. 'Erubin x. 1, 26a; "Seder ha-Dorot"; and "Shalshelet ha-Ḳabbalah").

Reason for Flight.

Jonah was induced to flee because, after having won his reputation as a true prophet (אמתי = "one whose words always came true") by the fulfilment of his prediction in the days of Jeroboam II. (II Kings xiv.), he had come to be distrusted and to be called a false prophet, the reason being that when sent to Jerusalem to foretell its doom its inhabitants repented and the disaster did not come. Knowing that the Ninevites also were on the point of repenting ("ḳerobe teshubah"), he anticipated that among them, too, he would earn the reputation of being a false prophet; he therefore resolved to flee to a place where the glory of God, or His Shekinah, could not be found (Pirḳe R. El. x.; but comp. Ibn Ezra's commentary). The phrase in Jonah iii. 1, "and the word of God came unto Jonah the second time," is interpreted by Akiba, however, to imply that God spoke only twice to him; therefore the "word of YHWH" to him in II Kings xiv. 25 has no reference to a prophecy which Jonah delivered in the days of Jeroboam II., but must be taken in the sense that as at Nineveh Jonah's words changed evil to good, so under Jeroboam Israel experienced a change of fortune (Yeb. 98a).

When Jonah went to Joppa he found no ship, for the vessel on which he had intended taking passage had sailed two days before; but God caused a contrary wind to arise and the ship was driven back to port (Zohar, Ḥayye Sarah). At this Jonah rejoiced, regarding it as indicating that his plan would succeed, and in his joy he paid his passage-money in advance, contrary to the usual custom, which did not require its payment until the conclusion of the voyage. According to some he even paid the full value of the ship, amounting to 4,000 gold denarii (Yalḳ., *l.c.*; Ned. 38a). But all this happened to teach him the fallacy of his conclusion that God could be evaded (Yalḳ., *l.c.*; and Rashi, *ad loc.*), for the contrary wind affected his ship only; all others on the sea at that time proceeded uninterruptedly on their courses.

The Ship.

The storm which overtook Jonah is quoted as one of three most noteworthy storms (Eccl. R. i. 6). After the sailors' prayers to their idols, as well as their efforts to turn about and lighten the ship, had proved futile, the crew finally was compelled to believe Jonah's statement that this calamity had befallen their craft on his account, and assented to his petition to be thrown overboard. Praying that they might not be held accountable for his death, they first lowered him far enough for the waters to touch his knees. Seeing that the storm subsided, they drew him back into the ship, whereupon the sea at once rose again. They repeated this experiment several times, each time lowering him deeper, but taking him out again, and each time with the same result, until finally they threw him into the sea (Yalḳ., *l.c.*).

The fish which swallowed Jonah had been created

The Fish.

in the very beginning of the world in order to perform this work (Zohar, Wayaḳhel; Pirḳe R. El. x.; see also Gen. R. v. 5). Therefore this fish had so large a mouth and throat that Jonah found it as easy to pass into its belly as he would have found it to enter the portals of a very large synagogue (*ib.*). It had eyes which were as large as windows, and lamps lit up its interior. According to another opinion, a great pearl suspended in the entrails of the fish enabled Jonah to see all that was in the sea and in the abyss. The fish informed Jonah that he was to be devoured by Leviathan. Jonah asked to be taken to the monster, when he would save both his own life and that of the fish. Meeting Leviathan, he exhibited the "seal of Abraham," whereupon the monster shot away a distance of two days. To reward him for this service the fish showed Jonah all the wondrous things in the ocean (*e.g.*, the path of the Israelites across the Red Sea; the pillars upon which the earth rests). Thus he spent three days and three nights in the belly of the fish, but would not pray. God then resolved to put him into another fish where he would be less comfortable. A female fish quick with young approached the male fish in which Jonah was, threatening to devour both unless Jonah were transferred to her, and announcing her divine orders to that effect. Leviathan confirmed her story at the request of both fishes, and then Jonah was ejected from one fish into the over-filled belly of the other. Cramped for room and otherwise made miserable, Jonah finally prayed, acknowledging the futility of his efforts to escape from God (Ps. cxxxix.). But he was not answered until he had promised to redeem his pledge to capture Leviathan. As soon as God had his promise, He beckoned to the fish and it spat out Jonah upon the dry land, a distance of 968 parasangs. When the crew of the ship saw this they immediately threw away their idols, sailed back to Joppa, went to Jerusalem, and submitted to circumcision, becoming Jews (Yalḳ., *l.c.*; Tan., Wayiḳra, ed. Stettin, 1865, pp. 370 *et seq.*; see also Pirḳe R. El. x.).

In the Zohar (Wayaḳhel) it is related that the fish died as soon as Jonah entered, but was revived after three days. When Jonah was thrown into the sea his soul immediately left his body and soared up to God's throne, where it was judged and sent back. As soon as it touched the mouth of the fish on its way back to the body, the fish died, but was later restored to life. The fish's name is given in "Shalshelet ha-Ḳabbalah" as ציטון (*i.e.*, "cetos" = "whale"). The fate of Jonah is allegorized in the Zohar (Wayaḳhel) as illustrative of the soul's relation to the body and to death. In the assumption that Jonah is identical with the Messiah, the son of Joseph, the influence of Christian thought is discernible (comp. Matt. xii. 39-41).

The gourd of Jonah was enormous. Before its appearance Jonah was tortured by the heat and by insects of all kinds, his clothes having been burned by the heat of the belly of the fish; he was tortured again after the worm had caused the gourd to wither. This brought Jonah to pray that God should be a merciful ruler, not a strict judge (Pirḳe R. El. x.; Yalḳ. 551).

S. S. E. G. H.

JONAH, BOOK OF.—**Biblical Data:** The Book of Jonah stands unique in the prophetical canon, in that it does not contain any predictions, but simply relates the story of its hero, beginning for that reason with "wa-yehi," like a passage taken from history. The contents may be summarized as follows:

Ch. i.: Jonah is commanded by Yhwh to prophesy against Nineveh. Hoping to escape from this commission by flight into another country, he goes down to Joppa to take ship for Tarshish (Tartessus in Spain). Yhwh then sends a terrible storm, and the pious heathen mariners, after all their labors to lighten the ship and all their prayers prove vain, cast lots to find out on whose account this misfortune has come upon them (comp. Achan in Josh. vii. and Jonathan in I Sam. xiv.). The lot falls upon Jonah, and upon being questioned he answers that he is a Hebrew and worships Yhwh, the God of Heaven; he admits his guilt and requests that he be thrown into the sea. After having prayed to Yhwh the mariners comply with his wish, and when the storm has subsided they give thanks to Yhwh with sacrifices and vows.

Ch. ii.: Yhwh prepares a great fish to swallow Jonah, who remains for three days and three nights in the monster's belly; after having there praised Yhwh, Jonah is cast up by the fish upon the dry land.

Ch. iii.: Yhwh's command being repeated, Jonah goes to Nineveh, and announces to the city that it shall be destroyed within forty days. Then all the inhabitants, following the example of the king and the nobles, repent in sackcloth and ashes; even the flocks and herds fast and are covered with sackcloth. Yhwh, repenting of the punishment He had intended for them, permits the Ninevites to go free.

Ch. iv.: Yhwh's action displeases Jonah exceedingly; he prays Yhwh to let him die. Yhwh comforts him by preparing a "ḳiḳayon" (castor-oil plant?) to spring up beside his booth, which gives Jonah great pleasure. But Yhwh prepares a worm to smite the plant, so that it withers; the sun beating upon the head of Jonah causes him to faint; and again he begs for death. Yhwh then says that if Jonah is sorry for the gourd, which sprang up of itself in one night, and withered also in one night, how much more must Yhwh feel sorrow for the mighty city which contains more than twelve myriads of innocent people besides much cattle.

E. G. H. K. B.

——**Critical View:** The text on the whole has been fairly well preserved. The following variants of the Septuagint deserve notice: i. 2: צעקת רעתם, probably a combination of two variants, צעקתם being placed side by side with רעתם (comp. Gen. xviii. 21, xix. 13); i. 4: גדולה is lacking and not needed; verse 16: זבחים instead of זבח; iii. 2: *κατὰ τὸ κήρυγμα τὸ ἔμπροσθεν ὃ ἐγὼ ἐλάλησα*, equivalent to כקריאה הראשנה אשר אנכי דברתי, probably correct, since only absolute obedience to the first command would agree with the context; iii. 4: שלשת instead of ארבעים, but probably only an error following verse 3, end; iii. 7: מעם instead of מטעם; iii. 9: ישוב is lacking, probably correctly so in view of the following וישב; iv. 2: אַל is lacking; iv. 6: מעל לראש יונה; iv. 11: ישבו instead of יש—hardly the original reading, but a possible one.

H. Winckler ("Altorientalische Forschungen," ii. 260 *et seq.*), especially, has proposed important emendations of the text that are all worthy of careful examination. He transposes i. 13 to come directly after i. 4, which makes a better connection at both places. Again, he transposes i. 10 to follow immediately i. 7, at the same time striking out in verse 8 the words ויאמרו אליו and (like many other emendators and critics) באשר to לנו, besides 10b entirely. This will not do, however, as verse 10a, depicting the fright of the men, with their exclamation, "Why hast thou done this?" is intelligible only after Jonah has told the men why he was on the ship. Still this explanation should not have been given in 10b, but rather either in 9b*a* (which would then read ומלפני יהוה אלהי השמים אני ברח) or as an addition to verse 9 (*i.e.*, ומלפניו אני ברח). If this phrase be inserted here it is necessary merely to delete the corresponding phrase in verse 10 (*i.e.*, 10b), and to omit also 8a*β*, which disturbs the context. Winckler also transposes iv. 5 to follow iii. 4, which is at the first glance a simple and entirely obvious emendation. The verse could follow ch. iii. only with the introduction ויונה יצא, and even then would have to precede iv. 1. Ch. iv. 4 must be stricken out (as Böhme has proposed), being a poor repetition of iv. 9, which probably came in with the erroneous interpolation of iv. 5. Ch. iv. 3 connects closely with iv. 6. In the latter verse Wellhausen, and after him Nowack, strike out להציל לו מרעתו; Winckler strikes out instead להיות צל על ראשו because Jonah was protected by the booth (iv. 5). Winckler furthermore says that the sun could not have stricken Jonah if he had been protected by the booth; he therefore proposes to insert the statement in verse 8 that the east wind blew down the booth. This is a happy conjecture; for ותהרם את־סכתו could have easily been corrupted to form the enigmatical חרישית (even Cheyne's בשחר, "Encyc. Bibl." ii. 2566, is unsatisfactory). It must be remarked, however, that this would duplicate the motive, while verse 9 mentions the gourd only. It may be questioned therefore whether the mention of the booth is not a later interpolation, in which case iv. 5 should not be transposed after iii. 4, but should be simply stricken out together with iv. 4 and the mention of the east wind in iv. 8, so that the text would read simply: ויהי כזרח השמש ותך השמש וגו'. Verse 6 would then remain unchanged.

The last-named considerations, which were touched upon by Hitzig and Böhme, lead to the question whether Böhme (in Stade's "Zeitschrift," vii. 224 *et seq.*; for earlier attempts see Cheyne, *l.c.* p. 2565, note) is correct in attempting to trace the Book of Jonah to various sources. Since his attempt the question has been answered everywhere in the negative, probably correctly. This popular story, in its present state, rather creates the impression that extraneous matter has been added here and there, as in the cases of the Book of Daniel and that of Esther, or that such additions were transferred to the Masoretic text from manuscripts going more into detail. To this might be due the grotesque detail in ch. iii. that even the flocks and herds should take part in Nineveh's general penitence, by fasting in sackcloth, and perhaps also by uttering loud cries (verse 8). Yet the words האדם והבהמה (iii. 8) must not be simply stricken out as an addition, as Böhme, Wellhausen, and Nowack propose; for they now fit in admirably with the legendary tone of the whole. Cheyne rightly refers to what Herodotus (ix. 24) recounts of the Persians. The psalm (ii. 3-10) was in any case added to the original composition later (comp. Stade's "Zeitschrift," 1892, p. 42). As a prayer of thanks it is undeniably in the wrong place, since Jonah is still in the belly of the fish. That it was added at this point is probably due to the fact that the words ויתפלל יונה אל־יהוה ממעי הדגה (verse 2) offered a convenient connection, the interpolator wishing to give the exact words of the prayer. Originally verse 2 was immediately followed by verse 11 thus: "Then Jonah prayed to the Lord his God out of the fish's belly; and the Lord spake unto the fish, and it vomited out Jonah upon the dry land." The psalm certainly seemed appropriate, because it speaks, even if only metaphorically, of Jonah being cast into the midst of the seas, and of the salvation which is of the Lord. And it was perhaps added also partly because the book contained no connected speech of the prophet. The time at which this interpolation was added can be conjecturally fixed only after the sources and the origin of the book have been discussed.

Age and Origin.

The book does not bear the least evidence of having been written by the prophet or even during his time; and its age must be gathered from different indications. It has long since been held that it is one of the latest books of the Hebrew canon. This is proved in the first place by the language, as considered lexically, grammatically, and stylistically (comp. on this point the commentaries, and books like S. R. Driver's "Introduction"). Only Esther, Chronicles, and Daniel are of later date. Again, the way in which Nineveh is referred to shows that the city had long since vanished from the face of the earth and had faded into legend (comp. iii. 3). The King of Nineveh, also (iii. 6), could have been referred to only in a late myth; and the legendary atmosphere of the whole story, from beginning to end, is in accord with the length of time that had elapsed since the events recounted took place. This becomes evident both in the episode of the fish which swallows a man and then casts him up alive after three days, and in that of the plant which in one night grows high enough to overshadow Jonah. These things might, it is true, be considered as divine miracles; but such an explanation can not be offered for the three days' time that it takes to pass through Nineveh (iii. 3), nor for the fasting, sackcloth, and penitent cries of the animals (iii. 7 *et seq.*), much less for the conception that an Israelitish prophet could preach penitence to the city of Nineveh, and that the king and the citizens would listen to him. Everything about the story is, and was intended to be, miraculous and legendary.

The Book of Jonah is a midrash. The book must undoubtedly be placed in this class; and it remains only to see whether a more definite position can be assigned to it in the Midrashic literature. The writer of this article has attempted to do this (in Stade's "Zeitschrift," 1892, pp. 40 *et seq.*), suggesting that the Book of Jonah is a section from the Midrash of the Book of the Kings mentioned in II Chron. xxiv. 27, which in all probability was the chief source used by the author of the Chronicles. The suggestion is supported by the simple fact that the prophet Jonah ben Amittai is referred to in no other place except in II Kings xiv. 25. Furthermore, it is highly improbable that at the time of the earliest Midrashic literature any other notice of him could have existed; and, finally, since the Book of Jonah begins without any superscription—it begins not simply with the word "wayehi," which introduces a period of time (comp.

Ruth i. 1; Esth. i. 1), but with the phrase ויהי דבר־יהוה אל יונה ב'א', which certainly assumes a previous mention of Jonah—the suggestion proposed is the most natural one. If this be correct, then Chronicles of course omitted the passage found in its source and mentioning the prophet, a circumstance that is explained by the fact that the scene is laid in the Northern Kingdom, with which Chronicles has nothing to do.

The suggestion would be invalid if Winckler (see, however, Jonah, Biblical Data, end) and Cheyne were correct in maintaining that the Jonah of the story is a different person from that mentioned in the Book of Kings. It is impossible, however, to refute the suggestion by referring to the distinctive character of that midrash, as König (Introduction, p. 379) and Smend ("Alttestamentliche Religionsgesch." 1st ed., p. 409) have done. If extensive stories of personal events happening to Elijah have been included in the Book of Kings (*e.g.*, I Kings xvii., xix.), why should not the same have occurred (against König) in the case of Jonah? And Smend's assertion that, compared with the Book of Jonah the Midrash of the Book of the Kings was "a work of such a different character that its (Jonah's) author would not have buried his book therein," can not be substantiated.

On the contrary, just the passage in the midrash referring to Jonah seems to be closely related to the Book of Jonah as regards the contents. The author of the Book of Kings puts into Yhwh's mouth warm words of mercy toward the sinful Northern Kingdom (II Kings xiv. 26 *et seq.*). It is easy to see how a midrash could be added showing that this mercy was extended even to an alien, heathen empire. If there were any reasons for assuming the existence of another Midrash of the Book of the Kings than the one mentioned in Chronicles, the Book of Jonah might have been taken from the latter; but at present the writer of this article does not see what reasons could be brought forward in support of such a theory. In any case the connection of the book with II Kings xiv. 25 must be insisted upon. In agreement with the view here expressed, the date of the book would fall some time toward the end of the fourth or in the fifth century; such a date is supported by other considerations.

Inclusion in Canon.

The inclusion of the Book of Jonah among the Minor Prophets is paralleled by the inclusion of II Kings xviii.-xx. in the Book of Isaiah (ch. xxxvi.-xxxix.), but with this exception that in the latter (as also in Jer. lii.) historical passages are added to an already existing prophetical book, while an entirely new personality and an entirely new book are added to the canon of the Prophets with the Book of Jonah. How may this have happened? Smend's assumption (*l.c.*), that the author wrote the book with the intention of adding it to the "Twelve Minor Prophets," may be set aside, for the styles of the two differ too widely, as noted above; nor, if that had been the intention, would it have been necessary to introduce a psalm in order to make the book fit into its surroundings: there are numerous examples to show that the writers of later periods knew how to reproduce the style of the Prophets when they desired to do so. On the other hand, it can not have been the intention of inserting stories of the Prophets in the books of the Prophets; for if it had been, the "Earlier Prophets" would have offered the right place therefor. This is proved in the case of I Kings xiii., a story, relating to a prophet, which has many points of similarity to the story of Jonah and is of about the same length. It likewise is probably derived from the Midrash of the Book of the Kings (comp. Stade's "Zeitschrift," 1892, xii. 49 *et seq.*) and was added later to the canonical Book of Kings. The reasons for the inclusion of Jonah in the "Twelve Minor Prophets" must be sought in the book itself. The fixing of the number of the "Minor Prophets" at twelve was certainly intentional, and the Book of Jonah must have been included in order to make up that number, although it does not harmonize with the other books, and originally belonged elsewhere. The necessity for including it arose, perhaps, only in later times; for the enumeration (without Jonah) of precisely eleven books in the canon is not entirely self-evident. It need only be pointed out that Zech. ix.-xi. and xii.-xiv. are added very loosely to Zechariah, and may equally well have been regarded as independent books; that Malachi, on the contrary, at first probably had no superscription (comp. Mal. iii. 1), and might have been added as an appendix to Zechariah. According as these matters were arranged, it might occur that there were only eleven books found where formerly twelve had been counted. The passage in Num. R. xviii. seems in fact to refer to a time when the Book of Jonah was not included in the twelve Prophets.

Purpose and Teachings.

It becomes necessary to inquire into the purpose and teaching of the book, because of the fact that it is not a historical narrative, but a midrash, and also because of its conclusion. The whole story ends with the lesson received by Jonah, the purpose of the book having thus been accomplished; and as one can not follow the effects of this lesson on Jonah's further career (unlike the story of Elijah in I Kings xix.), the lesson itself is in reality addressed to the reader, *i.e.*, to the Jewish congregation. It is not probable that the story was carried on further in its original place in the Midrash of the Book of the Kings.

This short story, as Wellhausen has best expressed it, is directed "against the impatience of the Jewish believers, who are fretting because, notwithstanding all predictions, the antitheocratic world-empire has not yet been destroyed;—because Yhwh is still postponing His judgment of the heathen, giving them further time for repentance. Yhwh, it is hinted, is hoping that they will turn from their sins in the eleventh hour; and He has compassion for the innocent ones, who would perish with the guilty." In agreement with this synopsis of the purpose, the book is closely akin to and emphasizes the basic passage, II Kings xiv. 26 *et seq.*, which also shows, and as it were explains, how it is possible that Yhwh can grant a prophecy of good things to come to the disloyal Northern Kingdom and to a king who, according to verse 24, persists in all the sins of all his predecessors, and can then fulfil what He has promised. This purpose harmonizes perfectly with the idealized description of the piety of the heathen mariners (ch. i.) and of the king and the inhabitants of Nineveh (ch. iii.). The book is therefore in a way the negative pole to the positive pole in the Book of Ruth. The first shows why Yhwh does not destroy the heathen; the second, why and how He can even accept them among His people and bring them to high honor. Both these tendencies became apparent in Israel after the puristic reforms of Ezra and Nehemiah, which rigorously drew a sharp line between Israel and the pagan world. The opposition to this dominating doctrine was clothed in the unassuming but all the more effective garb of poetry and of story, as has happened time and again in similar cases. Cheyne rightly points to the parable of the good Samaritan in the New Testament and to the story of the three rings in Lessing's "Nathan der Weise."

Details of the Story.

All the details of the book are subordinated and made subservient to this one purpose; and there is every probability that it was invented only for that purpose, whereby of course appeal to other, well-known motives also is not excluded. The story of Elijah on Horeb (I Kings xix.) furnished the model for the general outline, and for the lesson taught the prophet, who was filled with doubts and was weary of his office. No search was necessary for the name of the hero, which was given in I Kings xiv. 25. The fact that "Jonah" means "dove" is a coincidence which must not be interpreted allegorically, as Cheyne has done. Nor must the fact that Israel is spoken of as a prophet in Deutero-Isaiah and is called "Servant of Yhwh" be used in order to attenuate the personality of Jonah to an allegory of the people of Israel; nor that he was swallowed by the sea, to an allegory of the Exile. All these are comparisons, it is true, which may easily be made and which are fully justified as secondary considerations, but they must not be allowed to confuse the simplicity of the original story.

Nor must mythological motives, although they may easily be deduced from the story, be regarded as constitutive elements that were introduced consciously. This applies to the Andromeda myth as well as to that of Oannes, of Nineveh as the "Fish City" ("nun"), etc., and to the chaotic dragon Tiamat, which has recently become a favorite myth with scholars (comp. Cheyne, *l.c.*, s.v. "Jonah," for details). The author of the story was of course familiar with all the current conceptions regarding the sea; and he probably had in mind, whether consciously or not, the myths and sagas clinging to it (comp. the rich collection of material relating to these myths in Hermann Usener, "Die Sintfluthsagen," 1899). It was probably the intention of the author, however, to confine himself to the narration of a story which, dealing with the prophet Jonah known to tradition, should be a vehicle for the lesson he meant to teach.

Later Uses and Interpretation.

In the New Testament Jesus (Luke xi. 29-32) makes use of the book in its original sense, referring to the people of Nineveh as examples of the faith and repentance that he missed among his contemporaries, while refusing them the miracle that they were asking at his hands. The endeavor to find more than this simple reference in the "sign of Jonas," which is akin to the tendency of the artificial interpretations mentioned above, has led in the parallel passage (Matt. xii. 39-41) to the interpolation (verse 40), according to which Jonah's three days in the belly of the fish are a prophecy of the three days that Jesus would spend in the grave. The early Christian Church more correctly elevates Jonah's rescue from the belly of the fish into the standing type of the resurrection from the grave, a type which is found in all the plastic representations that decorate the early Christian sarcophagi and other monuments.

As far as can be seen, the canonicity of the book has never been seriously doubted. One might rather find in the Midrash ha-Midbar and perhaps also in Ta'an. ii. a vague reference to a time when the book was classed, not with the "Nebi'im," but with the "Ketubim." In that place it would at least find a sufficient counterpart in Ruth. This, however, is only a remote probability, and does not touch the question of the origin of the work.

E. G. H. K. B.

JONAH: Palestinian amora of the fourth century; leading rabbinical authority in the fourth amoraic generation. With Jose II., his early schoolmate and lifelong colleague and business partner, he studied under Ze'era I. and Ela (Bek. 30a; Yer. Ter. ii. 41d); and when, as young men, they called on Abbahu to express their sympathy with him in his bereavement, he treated them as prominent scholars (Yer. Sanh. vi. 23d). But Jonah's special master was Jeremiah (Yer. Ḥal. i. 57c, ii. 58b). From these masters and others the youths acquired a thorough familiarity with the traditions, and gradually rose from pupils to fellows. Thus, it is said, "Haggai opened the discourse and Jonah and Jose closed it" (Yer. R. H. ii. 58b). Finally they succeeded to the rectorate of the academy at Tiberias. In his office Jonah was distinguished by his paternal care for his pupils, to whom he gave both advice and material support (Yer. Beẓah i. 60c). According to the Biblical and rabbinical requirement he gave away the tithe of his income, but to those who studied the Law, not to priests or Levites, deriving his authority from II Chron. xxxi. 4 (Yer. Ma'as. Sh. v. 56b). When he discovered a worthy man who was poor, he would aid him in such a way as not to hurt his self-respect. "I understand," he would say to him, "that you have fallen heir to an estate" or "that your debtors will soon pay you; borrow some money of me, which you may repay when you come into possession of your fortune." As soon as the proffered loan had been accepted he would relieve the borrower from his promise by telling him, "This money is thine as a gift." This procedure he regarded as suggested by the Psalmist: "Blessed is he that considereth

[Hebr. משכיל = "dealeth prudently with"] the poor" (Ps. xli. 2 [A. V. 1]; Yer. Peah viii. 21b; Midr. Teh. to passage).

Jonah also enjoyed a certain respect among the Romans (Yer. Ber. v. 9a; Ta'an. 23b). He was included among those styled תקיפי דארעא דישראל ("the mighty ones of the land of Israel"), because, the Rabbis explained, of the efficacy of his prayers in times of drought. The following miracle is related of him: Once, on a Sabbath, fire broke out on his premises. A Nabatæan whose property adjoined Jonah's attempted to extinguish it, but Jonah would not permit him thus to profane the Sabbath. "Dost thou rely on thy good luck?" mockingly asked the Nabatæan; to which Jonah replied, "Yes"; whereupon the fire was quenched (Yer. Yoma viii. 45b). As rectors of the academy at Tiberias, Jonah and Jose had many disciples, some of whom became leaders in the next generation, and spread and perpetuated their master's doctrines. Jonah left a worthy son and successor in the person of Mani II.

JONAH (ABU AL-WALID MERWAN IBN JANAḤ). See IBN JANAḤ.

JONAH BEN JUDAH GERSHON: Rabbi and author; died in Wilna 1808. He was dayyan of that city, and devoted his time to the study of the Tosefta, which he considered indispensable to a better understanding of the Mishnah and Gemara. But, finding the text corrupt, he undertook the work of preparing a critical edition of it and of providing it with a commentary by the aid of the citations from the Tosefta in the Babylonian and Jerusalem Talmuds and their early commentaries. He made use also of the annotations of Elijah Wilna, in manuscript. Only the first part of Jonah's work, on "Zera'im," was published (Wilna, 1799). The commentary on the part "Mo'ed" is still in manuscript, in the possession of his grandson Jonah Gerstein.

JONAH LANDSOPHER. See LANDSOPHER, JONAH.

JONAS, BENJAMIN FRANKLIN: American lawyer, soldier, and statesman; born in Williamstown, Grant county, Kentucky, July 19, 1834. In early youth he removed to Adams county, Illinois, where he received his education. In 1853 he went to New Orleans, where he took up the study of law, receiving his diploma from the law department of the University of Louisiana in 1855. Throughout the Civil war Jonas fought on the Confederate side, as a private of artillery, and subsequently as acting adjutant of artillery, in Hood's corps of the Army of Tennessee.

From 1865 until the consummation of reconstruction Jonas was a member of the Louisiana legislature; and in the Democratic National Convention of 1868 he was chairman of the Louisiana delegation. Jonas was the Democratic candidate in 1872 for the office of lieutenant-governor of Louisiana, but resigned in favor of the Fusion nominee. The same year he was elected state senator.

In 1874 Jonas was elected to the office of city attorney of New Orleans, and was reelected in 1876. In the latter year he became a member of the National House of Representatives, serving up to the end of the session of 1877. In Congress Jonas was chairman of the judiciary committee. During this period he was the Democratic national committeeman from his own state. From March 18, 1879, to March 3, 1885, Jonas was United States senator from Louisiana in succession to James B. Eustis. On the expiration of his term of office President Cleveland appointed him surveyor of the port of New Orleans.

JONAS, EMIL (JACOB; pseudonym, **Graf Löwenbalk v. Hohenthal):** German writer and publicist; born July 14, 1824, at Schwerin, Mecklenburg; educated at the gymnasium of his native city and at Heidelberg. In 1845 he became editor of the "Flensburger Zeitung." This paper took the part of the Danish government, which had emancipated the Jews in Denmark as early as 1836, while in the duchies of Sleswick and Holstein Jews were merely tolerated. Weary of the lengthy political struggles, Jonas went to Copenhagen in 1847, where he engaged in teaching. A pamphlet that he wrote on the political conditions in Denmark and in the two duchies attracted the attention of the crown prince, who on his accession to the throne in 1848 as King Frederick VII. called Jonas to the Ministry of Foreign Affairs, and entrusted him with several important missions. In 1849, when a liberal constitution was under discussion, Jonas published a pamphlet entitled "Das Ein- und Zweikammersystem," which met with the approval of the king, who in 1851 appointed Jonas "Kammer-Assessor" and private secretary. In 1852 he was transferred as "Kammer-Rath" to the ministry of Holstein. He resigned in 1854 for political reasons, although he remained connected with the court down to the king's death.

After the war of 1863-64 Jonas went to Berlin, where he engaged in literature, devoting himself chiefly to the translation of Scandinavian works and to the publishing of travelers' guide-books, among which may be mentioned: "Reise- und Skizzenbuch für Schweden," 1875; "Illustrirtes Reisebuch für Norwegen," 1876; "Reisehandbuch für Kopenhagen," 10 editions, 1886. His works include also a history of the Franco-Prussian war, a text-book for self-instruction in Swedish according to the Toussaint-Langenscheidt system, a German-Danish lexicon, and also "König Oscars Gedichte und Prosa-Schriften," 1872-94, and "Anthologie Hervorragender Skandinawischer Dichter," 1903. S.

JONAS, ÉMILE: French musician; born at Paris March 5, 1827. He entered the Conservatoire in 1841, where he took the first prize in harmony in 1847 and the Grand Prix de Rome in 1848. Two overtures by him were played in the Conservatoire in 1851 and 1852 respectively. He later devoted himself principally to the composition of comic operettas in the style of Offenbach's, his principal productions being: "Le Duel de Benjamin" (Bouffes Parisiens, 1855); "La Parade" (1856); "Le Roi Boit" and "Les Petits Prodiges" (1857); "Job et Son Chien" (1863); "Avant la Noce" (1865); "Deux Arlequins" (1865); "Le Canard à Trois Becs" (1869); "Javotte" (1871; afterward given in London as "Cinderella"); "Le Premier Baiser" (1883).

From 1847 to 1866 Jonas was professor of solfeggio at the Conservatoire, where he also conducted a class in harmony for students of military music. He was musical director at the Portuguese synagogue of Paris, and has published a work entitled "Recueil de Chants Hebraïques" (1854).

JONAS, MOSES. See BONN, JONAS BEN MOSES.

JONATHAN, JEHONATHAN (יונתן, יהונתן): **1.** Son or descendant of Gershom, son of Moses. He officiated as a priest to the idol of Micah—a service continued in his family till the Israelites were driven from their country (Judges xviii. 30). In the passage in which Jonathan's parentage is mentioned "Moses" is written with a suspended נ, so that it may be read "Manasseh"; and this reading is given by the Septuagint. On the other hand, the only son of Gershom, son of Moses, is called "Shebuel" in I Chron. xxiii. 16. Still, according to the Talmudists and to Jerome, Jonathan was the descendant of Moses. The Talmudists declare (B. B. 109b) that the "nun" was inserted in the name of this Moses out of respect to the great lawgiver, and that the former's name was changed to "Manasseh" because the wickedness of Jonathan resembled that of King Manasseh. They identify Jonathan with the above-mentioned Shebuel (*ib.* 110a), saying that he was so named because he repented (שבו אל = "he returned to God"). The same interpretation is given by the Targum to I Chron. xxiii. 16.

The adventure of Jonathan is narrated as follows: A young Levite of Beth-lehem-judah, in search of a home, happened to come to the house of Micah, and he was appointed by the latter to be his private priest. He was afterward recognized by the five Danite spies who were sent by their tribe to select a territory. When, later, the spies came that way with the warriors of their tribe, they attacked Micah's house, and carried off the gods and the young Levite. The Danites conquered Laish, established there the idol of Micah, and appointed Jonathan to be their priest (Judges xvii. 7-xviii. 30).

E. G. H. M. SEL.

2. Biblical Data: Eldest son of Saul (I Chron. viii. 33). Soon after his father's accession (I Sam. xiii. 2) Jonathan is represented as sharing his father's perils and enterprises, as the leader of a thousand men—one-third of the force kept under arms by Saul. Like Saul, Jonathan possessed great strength and agility, and, as becoming in a Benjamite, was a clever archer (II Sam. i. 22-23; I Chron. xii. 2). It was Jonathan who put to the sword the garrison of the Philistines in Geba, and thereby gave the signal for a general rising of the Israelites (I Sam. xiii. 3). This led to the complete overrunning of the land by the Philistines. The two armies, Israelitish and Philistine, met at the passage of Michmash, and took up positions on opposite sides of the ravine (I Sam. xiii. 16, 23). Jonathan, accompanied by his armor-bearer, scaled the opposite rock and surprised the Philistines, having previously decided to take an omen from the conduct of the enemy: if the enemy, on seeing him, should make a move as though about to attack him, he would wait in the ravine; but if the enemy dared him to ascend, he would do so. The latter took place, and the daring act of Jonathan put the Philistines to flight (I Sam. xiv. 6-23). On that occasion Jonathan narrowly escaped death at the hands of his father. Before pursuing the Philistines Saul had pronounced a curse upon any one who should eat before the evening; Jonathan, unaware of this, ate some honey, and Saul sentenced him to death; the people, however, interfered on his behalf and saved him (I Sam. xiv. 24-45).

Jonathan and David.

Jonathan's attachment to David began soon after the latter's victory over Goliath; "the soul of Jonathan was knit with the soul of David, and Jonathan loved him as his own soul" (I Sam. xviii. 1). The latter expression is repeated in I Sam. xx. 17, their love being further described in II Sam. i. 26 as "passing the love of women." The friendship was confirmed by a covenant, Jonathan giving David his garments, sword, and bow, and on several occasions David escaped death at the hands of Saul through the intervention of Jonathan. Their parting was full of pathos, and was marked by passionate embraces and tears (I Sam. xviii. 3-4; xix. 1-7; xx. 1-34, 41-42).

The disinterestedness of Jonathan's affection for David is emphasized in the fact that Saul himself reminded him that while he had nothing to gain through David he had much to lose. It seems that Jonathan fully understood that popular feeling was running toward David, and that his father's insanity was weakening the probability that the throne would remain with his family. Jonathan himself said to David at their last meeting, "Thou wilt reign over Israel and I will be thy second" (I Sam. xx. 30-31, xxiii. 17; comp. xviii. 5). In fact, their covenant stipulated that David should not exterminate Jonathan's posterity (I Sam. xx. 15, 42).

The greatest affection is said to have existed between Jonathan and Saul; and when Jonathan undertook the dangerous attack on the enemy he had to conceal his intention from his father (I Sam. xiv. 1). Saul's words, "though it be . . . Jonathan my son, he shall surely die" (I Sam. xiv. 39), show the father's love for his son. When Saul decided on the death of David he consulted Jonathan, who induced him to abandon his intention (I Sam. xix. 1, 4-6). Jonathan was incredulous when told that his father, without revealing to him his decision, had again decided to slay David (I Sam. xx. 2). During Saul's growing insanity the mutual attachment of father and son seems to have weakened. Saul on one occasion rebuked Jonathan, and cast his spear at him, whereupon Jonathan left the table (I Sam. xx. 30-34). Jonathan fell with his father and two younger brothers on Mount Gilboa (I Sam. xxxi. 2, 6).

E. G. H. M. SEL.

——**In Rabbinical Literature:** Jonathan's omen (see Biblical Data, above) is considered by Rab to be the typical omen (Ḥul. 95b). When it became known that Jonathan had transgressed Saul's vow (comp. I Sam. xiv. 45), Saul would have slain him with the sword, but the people argued that Jonathan did it through ignorance, and redeemed him with a burnt offering (Pirḳe R. El. xxxviii.). In Midrash Shemuel (xvii. 3) the incident is stated differently. According to R. Eleazar, the people gave to the sacred treasury Jonathan's weight in gold; according to R. Johanan, the people merely argued that Saul cursed only him who would eat bread, whereas Jonathan ate honey; R. Simeon b. Laḳish assumed that Jonathan tasted, but did not eat.

According to the Rabbis, when the virtues of David were enumerated before Saul (I Sam. xvi. 18), the latter in his jealousy exclaimed, "My son Jonathan possesses them too" (Sanh. 93b). The battle between Jonathan and the Philistines (I Sam. xiv. 13) was one of the three in which the heathen combined against the children of Israel, but were hindered by God from achieving their evil intentions (Gen. R. lxxxi. 4). Jonathan's love for David is considered the type of disinterestedness (Ab. v. 17). Jonathan is ranked by R. Judah the Saint among the great self-denying characters of Jewish history, though one of the rabbis remarked that his love for David may have been a result of his conviction that David's great popularity was certain to place him on the throne in the end (B. M. 85a). Jonathan is declared guilty of the destruction of Nob (I Sam. xxii. 18–19), and of its consequences, which he could have prevented by lending David two loaves of bread (Sanh. 104a).

S. S. M. Sel.

3. Son of Shimeah and nephew of David, who slew a giant of Gath (II Sam. xxi. 20–21; I Chron. xx. 6–7); perhaps identical with the Jonathan, uncle of David, who is styled "a wise man, and a scribe" (I Chron. xxvii. 32). **4.** Son of Abiathar the priest, and last descendant of Eli. As a courier, he rendered great services to David during Absalom's rebellion (II Sam. xv. 27, 36; xvii. 17, 20). He also brought to Adonijah the news of Solomon's accession (I Kings i. 42 *et seq.*). **5.** Son of Shage the Hararite; one of David's mighty men (I Chron. xi. 34). The parallel list gives "Shammah the Hararite" (II Sam. xxiii. 33). **6** (Jehonathan). Son of Uzziah; one of David's treasurers (I Chron. xxvii. 25). **7** (Jehonathan). Scribe in whose house Jeremiah was imprisoned (Jer. xxxvii. 15, 20). **8.** Son of Kareah and brother of Johanan; one of the captains after the fall of Jerusalem (Jer. xl. 8). In the Septuagint his name is omitted. **9.** Father of Ebed, who returned from captivity at the head of fifty males of the children of Adin (Ezra viii. 6). **10.** Son of Joiada. See Johanan ben Jehoiada. **11.** Son of Asahel; he opposed (R. V.) or assisted (A. V.) Ezra in regard to marriage with foreign women (Ezra x. 15). **12.** Father of Zechariah the priest, who was one of the musicians in the time of Nehemiah (Neh. xii. 35).

E. G. H. M. Sel.

JONATHAN (NATHAN): Tanna of the second century; schoolfellow of Josiah, apart from whom he is rarely quoted. Jonathan is generally so cited without further designation; but there is ample reason for identifying him with the less frequently occurring Jonathan (or Nathan) b. Joseph (or Jose; comp. Mek., Yitro, Baḥodesh, 10, with Sifre, Deut. 32; Mek., Ki Tissa, 1, with Yoma 85b; Tosef., Niddah, ii. 2, Ket. 60b, and Yer. Soṭah vii. 19c). In consequence of the Hadrianic religious persecutions he determined to emigrate from Palestine, and with several other scholars started on a journey to foreign parts. But his patriotism and innate love for the Holy Land would not permit him to remain abroad (Sifre, Deut. 80). Jonathan and Josiah were educated together at the academy of Ishmael b. Elisha (Men. 57b), whose dialectic system, as opposed to that of Akiba, they acquired. It is even reported that Jonathan all but converted Ben 'Azzai, a "fellow student" of Akiba, to Ishmael's system, and made him deeply regret his failure to study it more closely. Ben 'Azzai then exclaimed, "Wo is me that I have not waited on Ishmael" (Ḥul. 70b *et seq.*). Nevertheless, in later years, probably after Ishmael's death, both Jonathan and Josiah adopted some of Akiba's principles. Of Jonathan it is expressly stated that "he followed the system of his teacher Akiba" (Yer. Ma'as. v. 51d).

Together, Jonathan and Josiah devoted their analytical minds to halakic midrashim, interpreting laws as they understood them from the corresponding Scriptural texts, but not suggesting them. Only one halakah unconnected with a Scriptural text bears their names. Their argumentations are mostly embodied in the Mekilta (about thirty) and in the Sifre to Numbers (over forty; see Hoffmann, "Zur Einleitung in die Halachischen Midraschim," p. 38). Neither Jonathan nor Josiah appears in Rabbi's compilation of the Mishnah, with the exception of a single sentence, in the name of Jonathan, in Abot iv. 9: "Whoso observes the Law in poverty shall live to observe it in affluence; and whoso neglects the Law in affluence shall at last be compelled to neglect it because of poverty" (comp. Ab. R. N. xxx. 1 [ed. Schechter, pp. 41b, 45a]). Of other ancient compilations, the Tosefta cites these scholars once (Tosef., Sheb. i. 7: the text has "Nathan," but the context shows unmistakably that "Jonathan" is meant), while the Sifra mentions them twice (Sifra, Ḳedoshim, ix. 5, 11) by their names; once (Sifra, Behar, i. 9; comp. Ket. 60b) "Jonathan b. Joseph" occurs; and some of Josiah's midrashim are cited, but anonymously (comp. Sifra, Wayiḳra, Ḥobah, xx. 8, with B. M. 54a; Sifra, Aḥare, iv. 9, with Yoma 57b).

Jonathan was the author of many aphorisms, among which is the following: "Consoling the mourner, visiting the sick, and practical beneficence bring heavenly grace into the world" (Ab. R. N. xxx. 1). Contrary to the astrological views of his times, Jonathan taught the Scriptural idea of natural phenomena; quoting Jer. x. 2, he added: "Eclipses may frighten Gentiles, but they have no significance for Jews" (Mek., Bo, 1; comp. Yalḳ., Ex. 188). To the question as to the permissibility of profaning the Sabbath to save human life he answered, "The Law says (Ex. xxxi. 16), 'The children of Israel shall keep the Sabbath, to observe the Sabbath throughout their generations'; but one may profane one Sabbath in order to preserve a man that he may observe many Sabbaths" (Mek., Ki Tissa; comp. Yoma 85b). According to him an 'Am ha-Areẓ is one who has children and does not train them in the knowledge of the Law (Soṭah 22a; comp. Ber. 47b). Jonathan contradicted the general opinion of earlier and of contemporaneous rabbis that a "rebellious son" as defined by the teachers of traditional law never was and never will be executed, and that communal apostasy never did and never will occur (see Capital Punishment); he declared that he himself had sat on the grave of an executed prodigal and had seen the ruins of a city which had been razed to the ground for general apostasy (Sanh. 71a).

S. S. S. M.

JONATHAN BEN ABSALOM: General of Simon Maccabeus. At the command of the latter he took possession of Joppa, and drove out the inhabitants in order that they might not be able to surrender the city to Ṭarfon (I Macc. xiii. 11; Josephus, "Ant." xiii. 6, § 4).
G. S. Kr.

JONATHAN B. 'AKMAI: Palestinian amora of the third generation. According to Yer. Ter. xi. he was one of the teachers of Abbahu. It is probable that he was a descendant of the 'Akmai family of Jerusalem, in which there were many high priests (Yeb. 15b).

Bibliography: Frankel, *Mebo*, p. 99.
S. S. A. H. R.

JONATHAN (NATHAN) B. AMRAM: Semi-tanna of the second and third centuries; disciple of Judah I. and senior of Jannai, who consulted him concerning ritual questions (Ḥag. 20a; 'Ab. Zarah 26b). Reluctance to make the possession of learning a means of material gain, so insistently inculcated by the Rabbis (Ab. iv. 5 *et al.*), was characteristic of him. When there was a famine in the land, Judah I. offered food to any needy ones who were possessed of some learning. Jonathan, forced by want, applied for aid, but not on the ground of scholarship. He denied his identity, and when asked what entitled him to Judah's bounties, he replied, "Nothing more than being an animal and feeling the want of sustenance." His plea was admitted; and when Judah's son discovered the dissimulation and brought it to the notice of the patriarch, the condition was removed, and relief was thereafter granted to all applicants indiscriminately (B. B. 8a).
S. S. S. M.

JONATHAN B. ANAN: Son of the high priest Anan; was appointed by Vitellius high priest in the place of Joseph Caiaphas, at the time of the Passover in the year 36 (Josephus, "Ant." xviii. 4, § 3). For reasons unknown he was deposed by Vitellius when the latter was in Jerusalem the second time, and his brother Theophilus was appointed in his place (*ib.* 5, § 3). When King Agrippa I. deposed Simon Cantheras (*c.* 43) he wished to appoint Jonathan again as high priest; but the latter refused the office, saying he was satisfied to have once worn the high-priestly garments. He recommended his brother Matthias for the office; and the latter was appointed (*ib.* xix. 6, § 4).

During the sanguinary conflict between the Judeans and the Samaritans, under the procurator Cumanus, Jonathan together with several nobles represented the cause of the Judeans before the Syrian legate at Tyre, and he also went in the same capacity to the emperor Claudius at Rome. He brought about the appointment of Felix as procurator in the year 52 (Josephus, "B. J." ii. 12, §§ 5, 6; comp. "Ant." xx. 8, § 5). Jonathan often exhorted Felix to mend his ways, in order that the people might not reproach him (Jonathan) for having brought the procurator into the country. As Jonathan was hated by the Sicarii also, this just and peaceable man was treacherously assassinated at the instigation of Felix ("B. J." ii. 13, § 3; "Ant." xx. 8, § 5).
G. S. Kr.

JONATHAN (NATHAN) OF BET GUBRIN (= Eleutheropolis; Rapoport, "'Erek Millin," pp. 53 *et seq.*): Palestinian scholar of the third century; junior of Joshua b. Levi and senior of Simon b. Pazzi (Cant. R. i. 1). He confined his labors to the Haggadah, and contributed to the Midrash several homilies, some of which, however, are given under different names in other compilations. One of his sayings was: "Four great languages have been given to the world: Greek for song, Aramaic for dirges, Hebrew for conversation, Latin for war" (Yer. Meg. i. 71b; comp. Esth. R. iv. 6; Midr. Teh. xxxi. 21).

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 592.
S. S. S. M.

JONATHAN BEN DAVID HA-KOHEN OF LUNEL: French philosopher; flourished in the twelfth and thirteenth centuries. He defended Maimonides against the severe attacks of Abraham ben David of Posquières (RABaD), and at Jonathan's instance Maimonides sent to Lunel his "Moreh Nebukim," which Samuel ibn Tibbon translated into Hebrew. Jonathan is the author of a commentary on a work by Alfasi. About 1210, shortly before his departure for Palestine, whither he went with Tobiah and Samuel ben Simson, he corresponded with Isaac ben Abraham of Dampierre, who had sent him a Talmudic responsum on a subject concerning the Holy Land.

G. S. K.

JONATHAN BEN ELEAZAR: Palestinian scholar of the third century; contemporary of Ḥanina b. Ḥama (Shab. 49a *et seq.*); disciple of Simon b. Jose b. Laḳonya. Rabbah b. Ḥana twice reports communications which he had with Jonathan in which the latter speaks of his intercourse with Simon (Pes. 5a; see Rabbinowicz, "Diḳduḳe Soferim," *ad loc.*; Bek. 38b). It is also related that Jonathan once propounded to Simon a ritualistic question, and that the teacher misunderstood it and chided him. But when Jonathan respectfully corrected his teacher, explaining his problem more clearly, Simon found it too difficult for him to solve, and invited his pupil to follow him to another school in quest of the needed solution, which they obtained from a baraita taught by Hezekiah (Yer. Hor. ii. 45d; comp. Sheb. 18b). Sometimes he is cited as "Jonathan b. Eleazar Sar [Ish] ha-Birah [Castellan]," or as "Jonathan Ish ha-Birah" (Tan., Wayiggash, 12, ed. Buber; Gen. R. xcv. 3). Generally, however, he is cited without either patronymic or cognomen, and his name appears in this form quite frequently in both Talmuds.

Jonathan was a Babylonian by birth, and his first associates in Palestine were the foremost Babylonian immigrants, Ḥiyya Rabbah and Ḥanina b. Ḥama (Ḥul. 45a; Yer. Ber. v. 9a; Yer. Pes. vi. 33b). In company with the latter and Joshua b. Levi he once made a pilgrimage to Jerusalem (Yer. Ma'as. Sh. iii. 54b). He was very charitable; when a prominent official came to his city he would make him costly presents, in order, as he said, to pave the way for eventual intercession on behalf of a widow or an orphan whose suit might be subject to the decision of that official (Yer. 'Ab. Zarah ii. 41d). To him is also ascribed the halakah that a son may be compelled to support his parent; and it is related that once, while he was in the company of Yannai, he was humbly kissed by a stranger. Yannai asked whether he knew the man, and Jonathan informed him that the man had once appealed to him against his hard-hearted son, who would not support him, and that he had forced the son to do his duty toward his father (Yer. Peah i. 15d; comp. Ket. 49b).

As a halakist he paid due regard to expediency. According to him, one may do anything or use anything (otherwise forbidden) as a remedy against disease—idolatrous objects, lawless cohabitation, and bloodshed excepted (Yer. Shab. xiv. 14d; comp. Pes. 25a). He taught that "One must appear justified before men as well as before God." He based this doctrine on dicta in the Prophets and Hagiographa (Josh. xxii. 22; Prov. iii. 4), but mainly on Num. xxxii. 22: "Ye shall . . . be guiltless before the Lord, and before Israel" (Yer. Sheḳ. iii. 47c).

S. S. S. M.

JONATHAN BEN HORḲINAS (ARCHINAS): Palestinian scholar of the first century; contemporary of Eleazar b. Azariah and a disciple of the school of Shammai. He was reputed for his acuteness, in recognition of which he was styled "bekor saṭan" (= "first-born as adversary," *i.e.*, a fierce disputant; Yer. Yeb. i. 6; Yeb. 16a; comp. Rashi *ad loc.*, and rabbinic dictionaries, *s.v.* "Bekor"). R. Ẓemaḥ, however, amends the reading to "bekor shoṭeh" (lit. "foolish first-born son"; applied to a son first-born to the mother—but not to the father; Zacuto, "Yuḥasin," ed. Filipowski, p. 11). Although the school of Hillel was the standard authority in halakic matters, Jonathan prevailed upon some of the Rabbis to permit, in accordance with the school of Shammai, marriage between a man and his brother's widow, where she was the co-wife of his daughter. The Jerusalem Talmud (Yeb. *l.c.*) relates concerning this the following incident: The disciples of Hillel, having heard that a son of Horḳinas had granted this permission, credited it to Dosa b. Horḳinas, Jonathan's older brother, of the school of Hillel, and consequently went to Dosa for an explanation. Dosa referred them to his brother Jonathan, who, he said, had three hundred arguments in favor of such a marriage. The Rabbis then went to Jonathan, whom Dosa had warned by letter to prepare for a visit from the wise men of Israel. Jonathan, accordingly, explained to the Rabbis his arguments, but they could not understand them. Becoming impatient, he cast clods of earth at them and drove them out through three different doors. Then he wrote to his brother: "Thou hast informed me of the visit of the wise men of Israel, but those that came to me are in need of learning." Meeting Akiba, Jonathan said to him: "Thou art lucky to have acquired such renown while thou hast not yet acquired the knowledge of a cowherd" (Yeb. *l.c.*).

JONATHAN BEN JACOB: Hungarian Talmudist and author; flourished at Buda (Ofen) toward the end of the seventeenth century. In 1688, when Buda was taken by the imperial troops, Jonathan was among the captives, but he was ransomed by the Jews of Nikolsburg. Jonathan wrote: "Ḳeset Yehonatan" (Dyhernfurth, 1797), a treatise on morals and asceticism taken from the "Shene Luhot ha-Berit"; "Sefer Ḥasidim," and other cabalistic works; "Neu Ma'aseh-Buch" (*ib.* 1797), a collection of Judæo-German stories. He had previously edited the "Ma'amar ha-'Ittim" of Menahem Azariah di Fano (*ib.* 1693).

G. M. SEL.

JONATHAN BEN JOSEPH: Lithuanian rabbi and astronomer; lived at Risenoi, government of Grodno, in the seventeenth and eighteenth centuries. In addition to his Talmudical acquirements Jonathan was proficient in astronomy and mathematics. In 1710 a terrible plague visited the town of Risenoi, and Jonathan and his family lived an entire year in the fields. He then vowed that, should he be spared, he would disseminate astronomical knowledge among his coreligionists. To fulfil this vow Jonathan, although he became blind, went to Germany, where the bibliographer Wolf met him in 1725. Jonathan was the author of "Yeshu'ah be-Yisrael," an astronomical commentary on Maimonides' laws on the neomenia (Frankfort-on-the-Main, 1720), and "Bi'ur," a commentary on Abraham ben Ḥiyya's astronomical work "Ẓurat ha-Areẓ" (Offenbach, 1720).

G. I. BR.

JONATHAN LEVI ZION: Representative of the Jewish community of Frankfort-on-the-Main in its defense against the attacks of John Pfefferkorn. When the latter had obtained from Emperor

Maximilian I. an edict ordering the confiscation of all Hebrew books (Aug. 19, 1509), Jonathan Levi Zion went to Worms to obtain its suspension by the imperial court. Failing in this, he was sent to Italy to plead before the emperor personally. When he reached the emperor's headquarters at Verona, he met there Isaac of Triest, through whose influence he obtained an audience with the emperor, who promised that he would send them his decision. A week later the Margrave of Baden, whom the emperor appointed procurator, promised Jonathan to do everything in his power in favor of the Jews. But Pfefferkorn's arrival (Oct. 29, 1509) frustrated the hopes of the Jewish delegate. Whenever he met Jonathan in the streets of Verona he intimidated him by threats and insults. Fearing for his personal safety, Jonathan threw himself at the feet of the emperor and asked for protection. For a time Maximilian was inclined to submit the affair to a committee of princes. But the two Jewish delegates asked for a postponement in the hope of finding substitutes more able to plead their cause against their opponent.

A letter from Archbishop Uriel of Mayence, exposing Pfefferkorn's ignorance, and a renewed appeal of the Jews made some impression upon the emperor. At the beginning of November he issued a decree authorizing the archbishop to examine the confiscated books; in a second decree he enjoined the magistrate of Frankfort to submit to the decision of the archbishop. Through Erwin Hutten, Jonathan had knowledge of these decrees before they were sent, and reported to Frankfort this favorable turn of affairs. But on Nov. 10 the emperor modified the first decree and ordered the continuance of the confiscation. After vainly protesting Jonathan returned to Frankfort.

D. S. MAN.

JONATHAN MACCABEUS: Son of Mattathias; leader of the Jews in the Maccabean wars from 161 to 143 B.C. He is called also **Apphus** ('Απφοῦς [Syriac, חפוש] = "the dissembler," "the diplomat," in allusion to a trait prominent in him; I Macc. ii. 5). With his brother Judah, Jonathan had taken an active part in the battles against the Syrians, and although he displayed less bravery than Judah, his courage had been frequently tried, and he gave brilliant proof of it on many occasions in his career. After Judah's death the Syrian general Bacchides proceeded with crushing rigor against the Maccabean party; and at the same time a famine broke out in the land. In this extremity the Jews chose Jonathan for their leader. Noticing that Bacchides was trying to entrap him, he retired with his brother Simeon and his followers to a desert region in the country east of the Jordan, camping near a morass by the name of Asphar. As Bacchides followed him even there, overtaking him on a Sabbath, Jonathan gave all the baggage into the hands of his brother Johanan. Johanan went to the friendly Nabatæans; but a hostile tribe, the sons of Jambri of Medaba, killed him and his companions and seized the baggage (I Macc. ix. 32-36; Josephus, "Ant." xiii. 1, § 2). Jonathan subsequently avenged this treachery.

Leader of the Jews.

On that Sabbath Jonathan and his companions were forced to engage in battle with Bacchides. Jonathan had encountered and had raised his hand to slay Bacchides, when the latter evaded the blow; the Jews, defeated, sought refuge by swimming through the Jordan to the western bank. In this first encounter Bacchides lost about 1,000 men. Soon after this event, informed that one of the sons of Jambri was leading home a noble bride in great pomp, the Maccabean brothers proceeded to Medaba, ambushed the bridal procession, killed the entire party, to the number of 300, and seized all the treasure (I Macc. ix. 37-49; Josephus, *l.c.* xiii. 1, §§ 3-4). They remained, however, in the swamp in the country east of the Jordan, and Bacchides thought them so insignificant that, after the death of the high priest Alcimus, his creature, he left the country. Two years afterwards the Hellenistic Jews in the ACRA, whom Jonathan had certainly endeavored to injure, went, as in the time of Judah, to King Demetrius and asked to have Bacchides sent back, thinking that Jonathan and his followers could be destroyed in a night. But this proved impossible, as Jonathan was on his guard, and Bacchides in his anger killed fifty of the leaders of the Hellenists. Jonathan and Simeon thought it well to retreat farther, and accordingly fortified in the desert a place called Beth-hogla ("Bet Ḥoglah" for Βηθαλαγά in Josephus; I Macc. has Βαιδβασὶ, perhaps = Bet Bosem or Bet Bassim ["spice-house"], near Jericho); there they were besieged several days by Bacchides. Jonathan left his brother Simeon in charge of the defense, while he himself made inroads into the neighboring country, fought with a certain Odares and his brothers, and with the sons of Phasiron, and attacked the rear of the army of Bacchides, who, compelled to retire, again punished the Hellenists at Jerusalem.

When Jonathan perceived that Bacchides regretted having set out, he asked for peace and an exchange of prisoners. Bacchides readily consented, swore that he would nevermore make war upon Jonathan, and then returned home. Jonathan now took up his residence in the old city of Michmash, and cleared the land of the godless and the apostate (I Macc. ix. 55-73; Josephus, *l.c.* xiii. 1, §§ 5-6). The chief source, the First Book of the Maccabees, says that with this "the sword ceased in Israel"; and in fact nothing is reported for the five following years (158-153).

But Jonathan must have used this period to good advantage, for he was soon in possession of great power. An important event brought the design of the Maccabeans to fruition. Demetrius I., Soter, lost the friendship of the kings of Pergamus and Egypt, who set up against him an adventurer, Alexander Balas, as rival king. Demetrius was now forced to recall the garrisons of Judea, except those in the Acra and at Beth-zur; he also made a bid for the loyalty of Jonathan, whom he permitted to recruit an army and to take the hostages kept in the Acra. Jonathan gladly accepted these terms, and took up his residence at Jerusalem, which he began to fortify (153). Balas, however, offered Jonathan still more favorable terms, even appointing him high priest; Jonathan thereby became the official leader of his people, and the Hellenistic party could no longer attack him. On the Feast of Tabernacles in 153 Jonathan put on the high priest's garments and officiated for the first time. He had determined to side with Balas, not trusting Demetrius, who in a second letter made promises that he could hardly have kept and conceded prerogatives that were almost impossible (I Macc. x. 1-46; Josephus, "Ant." xiii. 2, §§ 1-4). The events justified Jonathan's action; Demetrius lost his throne and life, and Balas became King of Syria. The Egyptian king, Ptolemy Philometor, gave Balas his daughter Cleopatra to wife, taking her as far as Ptolemais to meet him. After the wedding, Jonathan was invited to that city. He appeared with presents for both kings, and was permitted to sit between them as their equal; Balas even clothed him with his own royal garment and otherwise accorded him high honor. He would not listen to the Hellenistic party that still accused Jonathan, but appointed Jonathan as strategus and "meridarch" (*i.e.*, civil governor of a province; details not found in Josephus), and sent him back with honors to Jerusalem (I Macc. x. 51-66; Josephus, "Ant." xiii. 4, § 1).

Jonathan High Priest.

Victory over Apollonius.

Jonathan proved grateful. Demetrius II. tried to win back his father's throne (147), and Apollonius Taos, governor of Cœle-Syria, who probably had joined Demetrius, challenged Jonathan to battle, saying that the Jews might for once leave the mountains and venture out into the plain. Thereupon Jonathan and Simeon appeared, with 10,000 men, before Joppa, where the forces of Apollonius lay, and the gates of which were opened to them out of fear. But reenforced from Azotus, Apollonius appeared with 3,000 men in the plain, relying on his cavalry, and forced Jonathan to engage in battle. The missiles of the horsemen rebounded from the shields of Simeon's men, who successfully resisted the enemy's onslaughts. Jonathan in the meantime vanquished the infantry, scattered it in wild flight, and pursued it to Azotus, which city he took by assault, burning it and its villages, including the Temple of Dagon. In reward, Balas gave him the city of Ekron with the outlying territory. The people of Azotus vainly complained to King Ptolemy Philometor, who had come to make war upon his son-in-law Balas, that Jonathan had destroyed their city and temple. Jonathan met Ptolemy at Joppa, accompanied him as far as the River Eleutherus, and then returned to Jerusalem (I Macc. x. 67-89, xi. 1-7; Josephus, *l.c.* xiii. 4, §§ 3-5).

Balas was vanquished by Ptolemy, and Demetrius II. ascended the throne of the Seleucids (145). Jonathan took this opportunity to conquer the Acra, still garrisoned by a Syrian force and inhabited by the Jewish Hellenists (I Macc. xi. 20; Josephus, *l.c.* xiii. 4, § 9). The king was greatly incensed; he appeared with an army at Ptolemais and ordered Jonathan to come before him. Without raising the siege Jonathan, accompanied by the elders and priests, went to the king, and pacified him with presents, so that the king not only confirmed him in his office of high priest, but gave to him the three Samaritan toparchies of Ephraim, Lydda, and Ramathaim. In consideration of a present of 300 talents the entire country was exempted from taxes, the exemption being confirmed in writing. Jonathan in return left the Acra in Syrian hands. A new pretender to the throne appeared in the person of the young Antiochus VI., son of Balas, in the care of a certain Trypho, who himself had designs on the throne. In face of this new enemy, Demetrius not only promised to withdraw the garrison from the Acra, but also called Jonathan his ally and requested him to send troops. The 3,000 men of Jonathan protected Demetrius in his capital, Antioch, against his own subjects (I Macc. xi. 21-52; Josephus, *l.c.* xiii. 4, § 9; 5, §§ 2-3; "R. E. J." xlv. 34).

Under Demetrius II.

Friendship with Rome and Sparta.

Trypho.

As Demetrius did not keep his promise, Jonathan thought it better to support the new king when Trypho and Antiochus seized the capital, especially as the last-named confirmed all his rights and appointed his brother Simeon strategus of the seacoast, from the "Ladder of Tyre" to the frontier of Egypt. Jonathan and Simeon were now entitled to make conquests; Ashkelon submitted voluntarily, and Gaza was forcibly taken. Jonathan vanquished even the strategi of Demetrius far to the north, in the plain of Hazar, and Simeon at the same time took the strong fortress of Beth-zur on the pretext that it harbored Demetrians (I Macc. xi. 53-74; Josephus, *l.c.* xiii. 5, §§ 3-7). Like Judah in former years, Jonathan sought alliances with foreign peoples. He renewed the treaty with Rome, and exchanged friendly messages with Sparta and other places. (It should be added that this point and the documents referring to it are open to question.) The followers of Demetrius collected at Hamath, but scattered again at the approach of Jonathan. The latter vanquished an Arabian tribe, the Zabadeans, entered Damascus, and went through the whole country. On his return to Jerusalem he had a conference with the elders, fortified the city, and cut off all intercourse with the Acra (I Macc. xii. 1-22, 24-37; Josephus, *l.c.* xiii. 5, §§ 8, 10-11). Even before this, Simeon had sent a Jewish garrison to Joppa and fortified the city of Hadid in the west of Judea. This made Trypho suspicious; he went with an army to Judea, invited Jonathan to Scythopolis for a friendly conference, and persuaded him to dismiss his army of 40,000 men, promising to give him Ptolemais and other fortresses. Jonathan fell into the trap; he took with him to Ptolemais 1,000 men, all of whom were slain; he himself was taken prisoner (I Macc. xii. 33-38, 41-53; Josephus, *l.c.* xiii. 5, § 10; 6, §§ 1-3).

When Trypho was about to enter Judea at Hadid, he was confronted by the new Jewish leader, Simeon, ready for battle. Trypho, avoiding an engagement, demanded one hundred talents and Jonathan's two sons as hostages, in return for which he promised to liberate Jonathan. Although Simeon did not trust Trypho, he complied with the request in order that he might not be accused of the death of his brother. But Trypho did not liberate his prisoner; angry that Simeon blocked his way everywhere and that he could accomplish nothing, he killed Jonathan at Baskama, in the country east of the Jordan (143; I Macc. xiii. 12–30; Josephus, *l.c.* xiii. 6, § 5). Jonathan was buried by Simeon at Modin. Nothing is known of his two captive sons. One of his daughters was the ancestress of Flavius Josephus (Josephus, "Vita," § 1). See JUDAS MACCABEUS.

G. S. KR.

JONATHAN THE SADDUCEE: Friend of the Hasmonean prince John Hyrcanus (135–104 B.C.). As the Pharisees belittled the prince's fitness for the office of high priest, Jonathan incited the prince against them, with the intention of driving them out of office. He succeeded in doing so, for toward the end of his life John Hyrcanus turned from the Pharisees and favored the Sadducees (Josephus, "Ant." xiii. 10, § 6). Josephus calls Jonathan 'Ιωνάθης. In the corresponding Talmudic account (Ḳid. 66a) Eleazar b. Po'era is mentioned as having worked for the same object.

G. S. KR.

JONATHAN SAR HA-BIRAH. See JONATHAN BEN ELEAZAR.

JONATHAN BEN UZZIEL: Hillel's most distinguished pupil (Suk. 28a; B. B. 134a). No halakot of his have been preserved, though a tradition makes him the author of a halakah which, if authentic, proves him to have possessed the quality of unselfishness in a marked degree. A man whose children had misconducted themselves had bequeathed to Jonathan the whole of his property. Jonathan, however, kept only one-third, giving one-third to the sanctuary, and one-third to the children of the deceased (B. B. 134a). According to another version, Jonathan's father, Uzziel, disinherited him and left his estate to Shammai, who, however, declined to receive it (Yer. Ned. v. 6). According to Meg. 3a, Jonathan wrote a targum to the Prophets to remove all impediments to the understanding of the Scriptures. It is, however, generally conceded to be doubtful whether the targum to the Prophets that has been preserved is his. He is said to have desired to translate the Ketubim also.

JONATHANSON, AARON B. ẒEBI: Russian Hebraist and poet; born about 1815; died in Kovno July 27, 1868. His father, a great-grandson of Jonathan Eybeschütz, settled in Wilna, and there Aaron followed the profession of teacher until about 1859, when he removed to Yanova, near Kovno. He corresponded with Isaac Erter; and Judah Löb Gordon, who was one of his pupils, remembered him with great affection and thought well of his poetry. Jonathanson was the author of "Kele Shir" (Wilna, 1864), a collection of poems and epigrams.

His son **Ẓebi Jonathanson** (born in Wilna 1841) is the author of "Shire Ẓiyyon" (Warsaw, 1893), a volume of poetry. Another son, **Jonathan Jonathanson** (born in Wilna July 5, 1858), now (1904) residing in New York, is a contributor to the Yiddish periodical press under the nom de plume "Ḳal wa-Ḥomer."

H. R. P. WI.

JONES, ALFRED T.: American editor and communal worker; born in Boston July 4, 1822; died at Philadelphia Oct. 3, 1888. In 1842 he became a resident of Philadelphia, and was successively engaged in the wholesale clothing and printing businesses. In 1875 he established the "Jewish Record," a newspaper which remained in existence until 1886.

Jones was the secretary of the first Jewish Publication Society (organized 1845), president of the Jewish Benevolent Society and of the Hebrew Society for the Visitation of the Sick and Mutual Assistance, manager of the Hebrew Relief Society, secretary of the Fuel Society, director of the United Hebrew Charities, member of the advisory board of the Jewish Foster Home, secretary and vice-president of the Hebrew Education Society, past master of the Shekinah Lodge of Masons, and for over thirty years its secretary, besides being prominent in other lodges. Jones was first president of the Jewish Hospital Association, first president of the Jewish Immigrants' Aid Society, and president of the Congregation Beth-El-Emeth, all of Philadelphia.

A. D. SU.

JONES, THOMAS: English publisher; convert to Judaism; born in 1791; died in London May 25, 1882. By birth a Roman Catholic, his change of faith was the result of deep study and conviction. Jones, who for many years pursued the business of publisher and bookseller in Paternoster row, was well versed in Biblical literature, and was a frequent attendant at the Spanish and Portuguese synagogue, being specially scrupulous in his observance of the sacred festivals. Later, by reason of ill health and reduced circumstances, he resided with his daughter, who was a Sister of Mercy at the Hospital of St. John of Jerusalem. Here he remained steadfast to his adopted faith.

JORAM. See JEHORAM.

JORDAN, THE (ירדן): Principal river of Palestine, formed by the confluence of three streams rising respectively at (1) Ḃaniyas (Paneas), (2) Tell al-Ḳadi (Dan), and (3) Ḥasbeyah (Baal Gad) at the foot of Mt. Hermon. The Jordan flows south through the Bahr al-Ḥulah (Lake Merom) and Baḥr al-Ṭabariyyah (Lake of Tiberias or Gennesaret) and empties into the Dead Sea at its northernmost point, 137 miles in a straight line from the river's source. The Jordan's course is so winding that between Tiberias and the Dead Sea, a direct distance of 65 miles, it measures 200. At Tiberias the water is clear, but farther down it becomes yellow. The stream is very rapid, for it has a fall of 3,000 feet from its source to its mouth. The Jordan valley (in Arabic "Al-Ghor") is geologically remarkable as compared with the remainder of Palestine. The lower portion lies far below the level of the sea, and it is furthermore lined on both sides by cliffs which rise precipitously above it in abrupt terraces and shut it off from all breezes. Its climate is therefore tropical, the temperature being rarely below 77° and sometimes as high as 130°. In flora and fauna it is to a corresponding degree distinct: plants characteristic of Nubia, Abyssinia, and the Sahara grow in rank luxuriance; fishes proper to Lake Tanganyika are found in the Sea of Galilee; and birds which belong naturally in Ceylon and India are seen throughout the valley.

——**Biblical Data:** Except in Ps. xlii. 7 (A. V. 6) and Job xl. 23, "Jordan" occurs with the definite article, its meaning being "the descender." The Jordan is pointed out as the source of fertility to a large plain ("Kikkar ha-Yarden"), called on account of its luxuriant vegetation "the garden of God" (Gen. xiii. 10). There is no regular description of the Jordan in the Bible; only scattered and indefinite references to it are given. Jacob crossed it and its tributary, the Jabbok (the modern Al-Zarḳa), in order to reach Haran (Gen. xxxii. 11, 23–24). It is particularly noted as the line of demarcation between the "two tribes and the half tribe" settled to the east (Num. xxxiv. 15) and the "nine tribes and the half tribe of Manasseh" that, led by Joshua, settled to the west (Josh. xiii. 7, *passim*).

The sources of the Jordan are not mentioned; and only in the short description of the eastern boundary of the latter tribes (Num. xxxiv. 10–12) is the Jordan mentioned in connection with Chinnereth (Gennesaret) and the Dead Sea, the latter being the southern end of the boundary-line. Opposite Jericho it was called "the Jordan of Jericho" (Num. xxxiv. 15, xxxv. 1, *passim*). The Jordan in general is very deep (comp. I Macc. ix. 48), but it has a number of fords, and one of them is famous as the place where 42,000 Ephraimites were slain by Jephthah (Judges xii. 5–6). It seems that these are the same fords mentioned as being near Beth-barah, where Gideon lay in wait for the Midianites (Judges vii. 24). In the plain of the Jordan, between Succoth and Zarthan, is the clay ground where Solomon had his brass-foundries (I Kings vii. 46).

In Biblical history the Jordan appears as the scene of several miracles, the first taking place when the Jordan, near Jericho, was crossed by the Israelites under Joshua (Josh. iii. 15–17). Later the two tribes and the half tribe that settled east of the Jordan built a large altar on its banks as "a witness" between them and the other tribes (Josh. xxii. 10, 26 *et seq.*). The Jordan was crossed dry-shod by Elijah and Elisha, each of whom divided the waters with a stroke of the mantle (II Kings ii. 8, 14). Elisha performed two other miracles at the Jordan: he healed Naaman by having him bathe seven times in its waters, and he made the ax of one of the children of the prophets float by throwing a piece of wood into the water (II Kings v. 14, vi. 6). The Jordan was crossed by Judas Maccabeus and his brother Jonathan during their war with the Nabatæans (I Macc. v. 24). A little later the Jordan was the scene of the battle between Jonathan and Bacchides, in which the latter was defeated (I Macc. ix. 42–49).

E. G. H. M. SEL.

——**In Rabbinical Literature:** According to the Talmud ירדן is a compound, ירד דן (= "which descended from Dan"), and the river was called thus because it takes its source in the grotto of Paneas, in the city of Dan (the Biblical Leshem; Bek. 55a; comp. Josephus, "B. J." iii. 10, § 7). The Jordan is one day's march from Jerusalem (Ma'as. Sh. v. 2). It traverses lakes Samko (Samachonitis) and Tiberias, the Dead Sea, falls into the Mediterranean, and there flows into the mouth of Leviathan (Bek. 55a; B. B. 74b). However, by a miracle, the water of the Jordan, the use of which in the Temple was prohibited on account of its impurity (Parah viii. 9), does not mingle with the waters of the Lake of Tiberias (Gen. R. iv.). The river bears the name "Jordan" only below Bet Jericho (Bet Jerah, according to the reading proposed by Neubauer, "G. T." p. 30), on the Lake of Tiberias (Bek. 55a). Its current is so strong that boats can not ascend it, but can only cross from one shore to the other (Yer. Shab. iv. 2).

When the Israelites came to the Jordan the water piled itself into a pillar twelve miles in height, leaving dry a space equivalent to that occupied by the Israelitish camp, so that the whole people could cross together. According to Eleazar ben Simeon the water formed itself into arches more than three hundred miles in height, which were seen by all the kings of the East and West (Soṭah 34a; Yer. Soṭah vii. 31b). The hornet which fought for the Jews stopped at the Jordan, but did not cross it (Soṭah 36a).

JOSE (Joseph), ABBA, BEN DOSITAI (Dosai; Derosai; Dosa): Palestinian tanna of the second century; mentioned as both halakist and haggadist. He transmitted a halakah of R. Jose the Galilean (Tosef., Ta'an. ii. 6). His haggadot consist chiefly of reconciliations between contradictory Biblical passages, almost all of them being transmitted by Rabbi (Judah I.). A series of them is in the Sifre to Num. 42; they are reproduced in Num. R. xi. 19, and single haggadot occur in Sanh. 52a, Yoma 22a, Zeb. 116b, and elsewhere. Lev. R. xxiv. 3 and Tan., Ḳedoshim, 9, preserve a demon-story the hero of which is called Jose of Ẓitor; while according to Midr. Teh. to Ps. xx. 7, where the same story occurs, the hero is Abba Jose b. Dositai.

Bibliography: Bacher, *Ag. Tan.* ii. 388; idem, *Ag. Pal. Amor.* ii. 450; Heilprin, *Seder ha-Dorot*, ii.

S. S. M. Sel.

JOSE, ABBA, BEN ḤANIN: Palestinian tanna of the last decades before the destruction of the Temple; contemporary of Eliezer b. Jacob and of Ḥanina b. Antigonus, with both of whom he is mentioned in a halakic discussion (Tosef., Suk. iv. 15). His name occurs also as "Abba Jose b. Hanan," or "b. Johanan" (which is erroneously followed by "ish Yerushalayim"), "Abba Joseph," and

"Abba Issi." Jose's halakot are also mentioned in Sifre, Num. 8, Mid. ii. 6, and Soṭah 20b. He transmitted a haggadah of Abba Cohen Bardela (Sifre, Deut. 2) and one of Samuel ha-Ḳaṭon (Derek Ereẓ Zuṭa ix.). A sentence of Jose's, rebuking the priestly families that acted violently toward the people, transmitted by Abba Saul b. Boṭnit, reads as follows: "Wo unto me for the house of Baithus and its rods; wo unto me for the house of Ḥanin and its calumnious whispering; wo unto me for the house of Ḳatros and its pens; wo unto me for the house of Ishmael b. Phabi and its fists" (Pes. 57a, where he is called "Abba Joseph").

In Yeb. 53b an "Abba Jose b. Johanan" ("b. Hanan" in Rashi) is mentioned as having transmitted a halakah of R. Meïr, who lived a century later. Bacher ("Ag Tan." i. 46, note 2) therefore supposes that the author of the sentence quoted above was Abba Saul b. Boṭnit, and that it was transmitted by the Abba Jose of Yebamot (comp. Büchler, "Die Priester und der Cultus," p. 30).

S. S. M. Sel.

JOSE, ABBA, OF MAḤUZA: Scholar of the third (?) century; mentioned once only (Mek., Beshallaḥ, Wayeḥi, 3), a haggadah of his being transmitted by R. Nathan. In Mek., Bo, 17, there is mentioned an Abba Jose together with R. Jonathan; and as the above-mentioned haggadah of Abba Jose is ascribed in Men. (37a) to R. Jose ha-Ḥorem, Weiss (introduction to his edition of the Mekilta, p. xxix.) conjectures that "ha-Ḥorem" may be amended to "ha-Maḥuzi."
S. M. Sel.

JOSE B. ABIN (called also **Jose b. Abun** and **Jose b. R. Bun**): Palestinian amora of the fifth generation (4th cent.); son of R. Abin I. (Bacher, "Ag. Pal. Amor." iii. 724) and the teacher of R. Abin II. (Yer. Ned. 3b). He was at first the pupil of R. Jose of Yodḳart, but the latter's indifference to his own family caused Jose to leave him and follow R. Assi or Jose II. (Ta'an. 23b; Weiss, "Dor," iii. 117). Jose was the most important among the last halakists of the Palestinian amoraim. He had a thorough knowledge not only of the Palestinian customs and halakot, but of the Babylonian, a fact that has led some scholars to maintain that Jose must have resided at some time in Babylonia. It is probable, however, that he derived his knowledge of Babylonian teaching from his father, who had traveled in Babylonia.

Jose's chief work in the field of the Halakah was the expounding of the Mishnah and the halakot of the Amoraim, though some halakot are credited to him. In Haggadah he excelled in the transmission and elucidation of the sayings of his predecessors, especially those of R. Ḥiyya, Joshua b. Levi, R. Johanan, and R. Simeon b. Laḳish.

His chief halakic opponents were R. Mana and Jose b. Zebida.

S. S. A. S. W.

JOSE (ISI, ISSI) BEN AḲABYA (AKIBA): Tanna of the beginning of the third century. The name "Issi" or "Assa" is derived from "Jose," and was borne by many tannaim and amoraim; hence the confusion that prevails in the Talmud concerning the identity of each of them, the same halakic or haggadic saying being attributed sometimes to one and sometimes to another of that name. Thus the prohibition against riding on a mule is reported in the Yerushalmi (Kil. 31c) in the name of Issi ben Aḳabya, while in the Tosefta (Kil. v. 6) it is attributed to Issi ha-Babli, who is undoubtedly identical with Issi ben Judah. Bacher supposes that Issi ben Aḳabya was the brother of Hananiah ben Aḳabya, the interpreter ("meturgeman") of R. Judah. Issi was a diligent student of the Bible, and some of his interpretations have been preserved in the midrashic literature. From I Kings viii. 64 he infers that the expression מזבח אדמה (Ex. xx. 24) means an altar of copper filled with earth (Mekilta to Ex. xx. 24). In reference to Ex. xxi. 14 he says that though the murderer of a heathen can not be convicted by a Jewish tribunal, he must answer for his crime to God (Mekilta, *ad loc.* 80b). The permission expressed in Deut. xxiii. 25 is, according to Issi, extended to everybody and not only to the workers in the field; but the permission applies only to the harvest-time (Yer. Ma'as. 50a).

S. S. I. Br.

JOSE THE GALILEAN: Tanna; lived in the first and second centuries of the common era. Jose was a contemporary and colleague of R. Akiba, R. Ṭarfon, and R. Eleazar b. Azariah. Neither the name of his father nor the circumstances of his youth are known, though his name ("ha-Gelili") indicates that he was a native of Galilee. He suffered from the prejudice commonly held against the Galileans by the Judeans; on one occasion a woman whom he had met on the street and had requested to direct him to Lydda called him a "stupid Galilean" ("Gelili shote"; 'Er. 53b). When he entered the academy at Jabneh, he was entirely unknown. It is also noted that he was extremely modest and addressed R. Ṭarfon as "my master" ("rabbi"; Zeb. 57a). He was, nevertheless, a thorough scholar even then, and his arguments nonplused both R. Ṭarfon and R. Akiba. His first appearance at Jabneh thus obtained for him general recognition, and the two rabbis considered him not as a pupil, but as a colleague. Akiba was obliged to endure more than one sharp criticism from Jose, who once said to him: "Though thou expound the whole day I shall not listen to thee" (Zeb. 82a). R. Ṭarfon expressed his high esteem of Jose by interpreting Dan. viii. 4-7 as though it contained an allusion to him: "I saw the ram, that is, R. Akiba, and saw that no beast might stand before him; and I beheld the he-goat, that is, Jose the Galilean, come, and cast him down to the ground" (Tosef., Miḳ. vii. 11; Sifre, Num. [ed. Friedmann, p. 44a]). As a matter of fact, Jose was the only one who opposed Akiba successfully, and the latter frequently abandoned his own interpretation in favor of his opponent's (Ḥag. 14a; Pes. 36b).

Jose frequently showed a tendency to revert to the older Halakah (see Midrash Halakah), explaining the text according to its literal meaning (Mek., Bo [ed. Weiss, pp. 4b, 9b]; Mek., Beshallaḥ [ed. Weiss, p. 44a]; Sifre, Deut. [ed. Friedmann, p. 97b]; 'Ab. Zarah 45a; *et al.*). But generally his halakic exegesis differed little from that of Akiba, and both often employed the same rules of interpretation (comp. Ket. 44a; Ḳid. 32b; Pes. 23a, 36a; Beẓah 21a, b). Only two of his halakot need be cited here. He taught that poultry may be cooked in milk and eaten (Ḥul. 113a), as was done in his own native town (*ib.* 116a); also that at the Passover one may enjoy anything that is leavened, except as food (Pes. 28b). Of his haggadic opinions the two following may be mentioned: The command of the Torah that the "face of the old man" shall be honored (Lev. xix. 32) includes, by implication, the young man who has acquired wisdom (Ḳid. 32b). The words "He shall rule over thee" (Gen. iii. 16) do not refer to power of every description (Gen. R. xx.).

Jose's married life was unhappy. His wife was malicious and quarrelsome, and frequently insulted him in the presence of his pupils and friends; on the advice of the latter he divorced her. When she married again and was in straitened circumstances, he was magnanimous enough to support her and her husband (Gen. R. xvii.).

Jose was famed, moreover, for his piety. An amora of the third century says: "When, for their sins, there is drought in Israel, and such a one as Jose the Galilean prays for rain, the rain cometh straightway" (Yer. Ber. 9b). The popular invocation, "O Jose ha-Gelili, heal me!" survived even to the tenth century. This invocation is justly condemned by the Karaite Sahal b. Maẓliaḥ (comp. Pinsker, "Liḳḳuṭe Ḳadmoniyyot," p. 32).

s. J. Z. L.

JOSE BEN ḤALAFTA (called also simply **Jose**): Palestinian tanna of the fourth generation (2d cent.). Of his life only the following few details are known: He was born at Sepphoris; but his family was of Babylonian origin (Yoma 66b). According to a genealogical chart found at Jerusalem, he was a descendant of Jonadab b. Rechab (Yer. Ta'an. iv. 2; Gen. R. xcviii. 13). He was one of Akiba's five principal pupils, called "the restorers of the Law" (Yeb. 63b), who were afterward ordained by Judah b. Baba (Sanh. 14a). He was, besides, a pupil of Johanan b. Nuri, whose halakot he transmitted (Tosef., Kelim, B. Ḳ. lxxxii. 7; B. B. lxxxvii.), and of Eutolemus ('Er. 35a; R. H. 15a). It is very likely that he studied much under his father, Ḥalafta, whose authority he invokes in several instances (B. Ḳ. 70a; Me'i. 17b). But his principal teacher was Akiba, whose system he followed in his interpretation of the Law (Pes. 18a; Yeb. 62b). After having been ordained in violation of a Roman edict (Sanh. *l.c.*), Jose fled to Asia Minor (B. M. 84b), where he stayed till the edict was abrogated. Later he settled at Usha, then the seat of the Sanhedrin. As he remained silent when his fellow pupil Simeon b. Yoḥai once attacked the Roman government in his presence, he was forced by the Romans to return to Sepphoris (Shab. 33b), which he found in a decaying state (B. B. 75b). He established there a flourishing school; and it seems that he died there (Sanh. 109a; comp. Yer. 'Ab. Zarah iii. 1). Jose's great learning attracted so many pupils that the words "that which is altogether just shalt thou follow" (Deut. xvi. 20) were interpreted to mean in part "follow Jose to Sepphoris" (Sanh. 32b). He was highly extolled after his death. His pupil Judah ha-Nasi I. said: "The difference between Jose's generation and ours is like the difference between the Holy of Holies and the most profane" (Yer. Giṭ. vi. 9).

His Halakot.

His halakot are mentioned throughout the greater part of the Mishnah, as well as in the Baraita and Sifra. His teaching was very systematic. He was opposed to controversy, declaring that the antagonism between the schools of Shammai and Hillel made it seem as if there were two Torahs (Sanh. 88b). For the most part, Jose adopted a compromise between two contending halakists (comp. Ter. x. 3; 'Er. viii. 5 [= 86a]; Yoma iv. 3 [= 43b]). Like his master Akiba, Jose occupied himself with the dots which sometimes accompany the words in the Bible, occasionally basing his halakot on such dots (Pes. ix. 2 [= 93b]; Men. 87b). He was generally liberal in his halakic decisions, especially in interpreting the laws concerning fasts (Ta'an. 22b) and vows (Ned. 21b, 23a). In those cases where there was a difference of opinion between Jose and his contemporaries, it was Jose's decision that was adopted as the norm for the practise (Yer. Ter. iii. 1; 'Er. 51a).

Bible Chronology.

Jose was also a prominent haggadist; and the conversation which he had with a Roman matron, resulting in her conviction of the superiority of the Jewish religion (Gen. R. lxviii. 4), shows his great skill in interpreting Biblical verses. Jose is considered to be the author of the Seder 'Olam Rabbah, a chronicle from the Creation to the time of Hadrian, for which reason it is called also "Baraita de R. Jose b. Ḥalafta" (Yeb. 82b; Niddah 46b; comp. Shab. 88a). This work, though incomplete and too concise, shows Jose's system of arranging material in chronological order.

Jose is known for his ethical dicta, which are characteristic, and in which he laid special stress on the study of the Torah (comp. Ab. iv. 6). He exemplified Abtalion's dictum, "Love the handicrafts" (*ib.* i. 9); for he was a tanner by trade (Shab. 49a), and followed a craft then commonly held in contempt (Pes. 65a). A series of Jose's ethical sayings in Shab. 118b shows his tendency toward Essenism. As has been said above, Jose was opposed to disputation. When his companion Judah desired to exclude Meïr's disciples from his school, Jose dissuaded him (Ḳid. 52a; Nazir 50a). One of his characteristic sayings is, "He who indicates the coming of the Messiah [הנותן את הקץ], he who hates scholars and their disciples, and the false prophet and the slanderer, will have no part in the future world" (Derek Ereẓ R. xi.). According to Bacher, in

"Monatsschrift," xlii. 505–507, this was directed against the Hebrew Christians.

Owing to Jose's fame as a saint, legend describes him as having met Elijah (Ber. 3a; Sanh. 113b). Jose, complying with the Law, married the wife of his brother who had died childless; she bore him five sons: Ishmael, Eleazar, Menahem, Ḥalafta (who died in his lifetime), and Eudemus (Yer. Yeb. i. 1).

S. S. M. SEL.

JOSE B. JACOB B. IDI: Palestinian amora of the fourth generation (4th cent.). He was the colleague of R. Judan of Magdala (Yer. Ta'an. i. 3), and one of the expounders of the haggadot of R. Aha the Lydian. He has also some original sayings, in one of which he makes the statement—based on I Kings xii. 27, and with reference to Deut. xxxi. 11—that Jeroboam was elected king in the Sabbatical year, when the head of the nation was required to read publicly in the Temple at Jerusalem the prescribed portion of the Law; and that, in order to avoid celebrating the festival in the Holy City, where he would have had the mortification of seeing the King of Judea read the Law, he (Jeroboam) set up another place of worship with the golden calves (Yer. 'Ab. Zarah 39b). Only one halakah of Jose's has been preserved (Yer. Yeb. 10d).

S. S. A. S. W.

JOSE BEN JOEZER OF ZEREDAH: Rabbi of the early Maccabean period; possibly a disciple of Antigonus of Soko, though this is not certain. He belonged to a priestly family. With him and Jose ben Johanan of Jerusalem, his colleague, begins the period known in Jewish history as that of the "zugot" (duumvirate), which ends with Hillel and Shammai. According to an old tradition, the member of the "zugot" mentioned first occupied the office of president of the Sanhedrin, while the one mentioned second served in the capacity of vice-president. Jose belonged to the party of the Ḥasidim, and was a decided adversary of Hellenism. To prevent Jews from settling beyond Palestine he declared all heathen countries "unclean" (Shab. 46a). He declared also glass utensils "unclean," probably because they were manufactured in heathen countries. In other respects, however, he was very liberal, and received the surname "Sharaya" ("one who permits") for having rendered three liberal decisions on certain ritual questions ('Eduy. viii. 4; Pes. 15a).

The first halakic controversy known in the Talmud was that between Jose ben Joezer and his colleague Jose ben Johanan. It arose over the question whether the laying of hands on the heads of the sacrifices is permitted on feast-days (Ḥag. ii. 2). Jose ben Joezer was distinguished for his piety, and is called "the pious of the priesthood" ("ḥasid shebi-kehunnah"; Ḥag. ii. 7). He professed great veneration for scholars, one of his sayings being: "Let thy house be a meeting-place for the wise; powder thyself in the dust of their feet, and drink their words with eagerness" (Abot iv. 4). Jose was probably among the sixty pious men who, at the instigation of the high priest Alcimus, the son of his sister, were crucified by the Syrian general Bacchides (I Macc. vii. 16).

The Midrash reports the following dialogue between Alcimus and Jose ben Joezer while the latter was on the way to execution:

> Alcimus: "See the profit and honors that have fallen to my lot in consequence of what I have done, whilst thou, for thy obstinacy, hast the misfortune to die as a criminal." Jose, quietly: "If such is the lot of those who anger God, what shall be the lot of those who accomplish His will?" Alcimus: "Is there any one who accomplished His will more than thou?" Jose: "If this is the end of those who accomplish His will, what awaits those who anger Him?"

On this Alcimus was seized with remorse and committed suicide (Gen. R. i. 65; comp. ALCIMUS). Jose ben Joezer left a son whom he had disinherited for bad conduct (B. B. 133b). See ALCIMUS.

S. S. I. BR.

JOSE (JOSEPH) BEN JOHANAN: President of the Sanhedrin in the second century B.C.; a native of Jerusalem. He and Jose b. Joezer were the successors and, it is said, the disciples of Antigonus of Soko (Ab. i. 4–5), and the two together formed the first of a series of duumvirates that transmitted the traditional law; in each pair one, according to tradition, was prince-president ("nasi"), and the other vice-president, of the Sanhedrin ("ab bet din"; Ḥag. ii. 2 [16a]). One of Jose's sayings was: "Let thy house be opened wide; and let the needy be thy household; and prolong not converse with woman" (Abot i. 5). A disagreement between the two colleagues in regard to halakic decisions gave rise to the formation of two different schools (see JOSE B. JOEZER). Both men were opposed to Hellenism, and both belonged to the Ḥasidim. Jose b. Joezer and Jose b. Johanan were the last of the "eshkolot" (derived by some from σχολή; Rapoport, "'Erek Millin," p. 237) (Soṭah ix. 9 [47a]; comp. Tosef., B. Ḳ. viii. 13; Yer. Soṭah ix. 10).

S. S. M. SEL.

JOSE BEN JOSE: The earliest payyeṭan known by name; flourished, at the latest, about the end of the sixth century in Palestine. He is called "ha-yatom" (the orphan), probably because, bearing his father's name, it was assumed that the latter died either before his son's birth or before his circumcision. Earlier sources state that Jose was a priest, even a high priest, but this assertion is not supported. As a poet Jose deserves the recognition and appreciation which have been accorded him. His style is raised above the level of mere prose by his use of new though not difficult words and paraphrases, and by frequent archaic expressions. He employs no rime, nor is he conversant with the other self-imposed restrictions of payyeṭanic poetry. The use of acrostics constitutes the only external ornamentation of his compositions, which are distinguished by depth of thought, conciseness of expression, imagination, and tenderness. The parallelism characteristic of his verse lends it additional charm. In one of his poems (No. 2, below) he employs the refrain.

The following poems of his are known: (1) אהללה אלהי אשירה עזו, an intercalation in the Musaf prayer for New-Year's Day designated by the term "teḳi'ata," a term which is found already in the Talmud. The "teḳi'ata" is recited on the second day of the New-Year in the Polish and German rituals. (2) אמנם אשמינו עצמו, a sort of confession of sins ("widdui") for the evening of the Day of Atonement (Kol Nidre), with quadruple alphabet and two alternating refrains, included in the Polish and German rituals, although in most communities only a part of it is recited. (3) אזכיר גבורות אלוה, an "'abodah" for the Day of Atonement, including the alphabet ten times in acrostics, while the letter ת occurs eighteen times. Saadia has included the poem in his Siddur (Oxford MSS.), and Rosenberg has reprinted it in "Kobeẓ Ma'ase Yede Ge'onim Kad" (Berlin, 1856). (4) אתה כוננת עולם ברב־חסד, another 'abodah that has been assigned to Jose. Zunz quotes many passages to show that it frequently corresponds in phraseology with the "Azkir." The initial letters of its verses form a quadruple alphabet, which is followed by a second quadruple alphabet. It was formerly recited in Burgundy and France, and is still used in the communities of Asti, Fossano, and Moncalvo, in Piedmont. Luzzatto has printed it in Rosenberg's "Kobeẓ" (pp. 111 *et seq.*), and as an appendix to the Italian Maḥzor (ed. Leghorn, 1861, ii. 212 *et seq.*); it is also printed in the separate edition of Luzzatto's "Mebo." The introduction אתן תהלה (reprinted in Zunz's "Literaturgesch." p. 646) by an unknown author—said to be the apostle Peter—belongs to this 'abodah. The 'abodah אתה כוננת עולם מראש, included in Spanish rituals, was written before Jose's time, and has been ascribed to him only through being confounded with his poem dealing with the same subject and beginning in the same way. (5) A piyyuṭ, of which only one verse has been preserved.

אור עולם has also been ascribed to him, though its authorship is doubtful. It is a short fragment of the earliest known "Yoẓer," which originally contained probably the entire alphabet quadrupled in acrostics. In the Polish and German rituals it precedes the "Yoẓer" on feast-days; in the Roman ritual it precedes the Sabbath prayers also.

Zeit.* ii. 306; idem, *Literaturgesch.* pp. 26, 643; Harkavy, *Studien und Mittheilungen*, v. 105.

G. H. B.

JOSE B. JUDAH: Tanna of the end of the second century. He is principally known through his controversies with R. Judah I. As specimens of his exegeses, the following may be given here. On the expression הין צדק (Lev. xix. 36) he comments, "Let thy yea be yea and thy nay nay" (Sifre to the verse; B. M. 49a; comp. Matt. v. 37). Deut. viii. 5 he explains thus: "Dear to God are the afflictions destined for man, for on whomsoever they come, the glory of God reposes, as it is said, 'It is the Lord thy God who chastiseth thee'" (Sifre, Deut. vi. 5). As characteristic of his poetical mind, the following may be cited as his view on the repose and peacefulness of the Sabbath: "Two angels, a good and a bad one, accompany man on the Sabbath eve from the synagogue into his house. When the man finds the lamp lit, the table laid, and the bed made, the good angel prays, 'May it be Thy will, O Lord, that it be the same next Sabbath!' to which the evil angel, against his will, responds 'Amen!' If, however, the man finds his house in disorder, the wicked angel says, 'May it be the same next Sabbath!' to which the good angel is forced to respond 'Amen!'" (Shab. 119b).

Of a controversial nature is probably the saying in which Jose insists that the proselyte must show his readiness to accept even the precepts of the sages in their capacity as interpreters of the Law (see Tosef., Demai, ii. 5; Sifra, Lev. xix. 34). Jose, like his father, Judah b. 'Ilai, and through the teachings of his father, was the depositary of many old traditions, which appear in his name.

S. S. S. LEV.

JOSE B. ḲAẒRATA (Ḳuẓira; Ḳaẓra): Palestinian amora of the first amoraic generation; son-in-law of R. Jose. Kohut is of the opinion that the surname is derived from "Ḳaẓẓara" (washer); but in Tan., Wayeḥi, the name "Ḳaẓra" is found. Two other amoraim with this patronymic are mentioned in the Talmud—R. Johanan b. Ḳaẓrata and R. Isaac b. Ḳaẓrata; but as both of them cite R. Jona, an amora of the third generation, they can not have been Jose's brothers. Jose b. Ḳaẓrata taught that the Creator chose the finest earth with which to make the first man (Gen.R. xiv.). In Yer. B. B. x. 17 Jose discusses a halakah concerning marriage in which he maintains the interests of woman.

S. S. A. H. R.

JOSE HA-KOHEN ("the Pious"): Tanna of the second generation; flourished in the first and second centuries; pupil of Johanan ben Zakkai. It is said of him that he never allowed any writing of his to remain in the hands of a heathen, lest he should carry it on Sabbath (Tosef., Shab. xvii. 13; Shab. 19a). Jose valued friendship above all worldly goods. "The good a man should cleave to is a good friend, and the evil a man should shun is an evil neighbor" (Ab. ii. 12). His maxim was: "Let the property of thy friend be precious unto thee as thine own; set thyself to learn the Torah, for it is not an heirloom unto thee, and let all thy actions be taken in the name of Heaven" (*ib*). Jose's name is associated in the Halakah with that of Zechariah ha-Ḳaẓẓab (Ket. 27a). The Haggadah has preserved two sayings of Jose. One is connected with the death of the son of Johanan ben Zakkai. Jose endeavored to console the father by reminding him that the high priest Aaron lost two sons in one day and yet he continued his services in the Tabernacle without interruption (Ab. R. N. xiv.). The other was in answer to a question addressed by a female proselyte to the patriarch concerning the seeming contradiction between Deut. x. 17 and Num. vi. 26. Illustrating his answer by a parable, Jose said that Deut. x. 17 refers to offenses against man that can not be forgiven, while Num. vi. 26 refers to offenses against God that are always forgiven (R. H. 17b). Jose is said to have been devoted to mystical studies (Yer. Ḥag. ii.).

S. S. I. Br.

JOSE OF MALLAḤAYA: Palestinian amora of the fourth generation. According to his explanation of Ps. lvii. 5 the disasters that overtook the Jews were caused by their inclination to slander, common among them even in the time of David (Lev. R. xxvi.). There are two halakot emanating from him, one referring to the transfer of land (Yer. Ḳid. 60c), the other prescribing the rules governing the purification of utensils that have been used by Gentiles (Yer. 'Ab. Zarah 41c).

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 724; Heilprin, *Seder ha-Dorot*; Kohut, *Aruch Completum*.
S. S. A. H. R.

JOSE OF MAON: Popular preacher of the beginning of the third century; delivered his addresses in a synagogue at Tiberias which bore the name of the locality—"Maon" (מעונאה), whence probably his surname מעונאה (= "of Maon"). He is said to have been aggressive in his speeches and to have been no respecter of persons; he attacked even the house of the patriarch (Yer. Sanh. ii.; Gen. R. lxxx. 1). See Judah II.

Bibliography: Heilprin, *Seder ha-Dorot*, ii. 221; Frankel, *Mebo*, p. 101b; Bacher, *Ag. Pal. Amor.* ii. 114, note 5; iii. 595 *et seq.*
S. S. I. Br.

JOSE B. NEHORAI: Palestinian amora of the first generation; halakot are transmitted in his name by Johanan (Rashi, B. M. 41a). Of his haggadic explanations the following may be cited: With reference to Eccl. iii. 15 he explains the word נרדף to mean "the persecuted," "the hunted," and gives the passage the meaning that God will always assist the persecuted, and that even when a righteous man persecutes a wicked man God will assist the latter. Jose gives various Scriptural instances in support of this view (Lev. R. xxvii. 5). As to the religious rites which children are required to perform R. Jose thought that they have an educational purpose, but are not obligatory (Yer. Ber. iii. 6b). He taught also that, except in the case of taxes for maintaining schools, the tax-collectors must not be harsh in their dealings (Lev. R. xxx. 1).

Bibliography: Bacher, *Ag. Pal. Amor.* iii. 597; Heilprin, *Seder ha-Dorot*; Frankel, *Mebo*.
S. S. A. H. R.

JOSE B. SAUL: Palestinian amora of the first generation (3d cent.). He is known chiefly as a transmitter of the sayings and traditions of the patriarch Judah I., whose disciple he was. These as well as his own sayings are further transmitted by R. Joshua b. Levi and by Ḥiyya ben Gamda. In one place the following order is given: Simon b. Pazzi says in the name of R. Joshua b. Levi in the name of R. Jose b. Saul in the name of R. Judah ha-Nasi in the name of the holy assembly of Jerusalem (Beẓah 14b, 27a; Tamid 27b). The Palestinian Talmud has preserved only one anecdote of his in the Aramaic ('Ab. Zarah ii. 3). His brothers were Johanan and Ḥalafta, with the former of whom he used to hold halakic controversies (Shab. 125b).

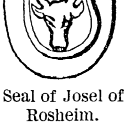
Bibliography: Bacher, *Ag. Pal. Amor.* iii. 598; Heilprin, *Seder ha-Dorot*, ii. 221, Warsaw, 1882.
S. S. A. S. W.

JOSEFFY, RAFAEL: American piano virtuoso; born in 1852 in Hunfalu, Hungary. In the following year the family moved to Miskolcz, where he spent his childhood and received his first musical instruction. At the age of ten he made his first public appearance at a concert in Budapest; and such was its promise that in 1864 his father took him to the Conservatorium at Leipsic, where he studied under Wenzel and Moscheles. Thence he went in 1866 to the Berlin Conservatorium, where for three years he was taught by Carl Tausig. After two summers (1869–70) with Liszt in Weimar, and considerable practise and study, he made successful concert tours through Europe, making Vienna his home until 1879, when Herman Colell took him to America. His New York début at Chickering Hall was successful. He became domiciled in the United States, and in 1900 took the oath of citizenship.

Joseffy lives at Tarrytown-on-the-Hudson, and devotes himself to music, occasionally giving public concerts. He has written a "Schule des Höheren Clavierspieles" for advanced players, in addition to a great number of compositions for the piano. He is the head of the department of piano in the National Conservatory of Music in New York.
A. B. L.

JOSEL (JOSELMANN, JOSELIN) OF ROSHEIM (JOSEPH BEN GERSHON LOANZ): The great advocate ("shtadlan") of the German Jews during the reigns of the emperors Maximilian I. and Charles V.; born about 1480; died March, 1554, at Rosheim, Alsace.

While still young he worked for the welfare of his coreligionists, and probably was instrumental in thwarting the hostile plans of Pfefferkorn. In 1510 he was made by the Jewish communities of Lower Alsace their "parnas u-manhig" (sworn guide and leader). As such he had "to keep his eyes open in special care of the community," and possessed the right to issue enactments for the Jews of his district and to put under the ban ("ḥerem") refractory members. On the other hand, he had to defend individuals and communities against oppression, and, if necessary, to appeal to the government and to the emperor. During the first years of his public activity Josel lived in the town of Mittelbergheim. In 1514 he with other Jews of this place was accused of having profaned the consecrated host, and was put in prison for several months, until his innocence was established. Soon afterward Josel moved to Rosheim, in which place he remained until his death.



Seal of Josel of Rosheim.

In 1515–16 he aided his oppressed brethren in Oberehnheim by bringing their complaints personally before the emperor Maximilian I. and obtaining a special imperial safe-conduct for them. During the peasants' war in 1525 Josel succeeded in protecting the Alsatian Jews against oppression and in inducing the army of the peasants, already drawn up at the gates of Rosheim, to leave the town in peace.

Advocate of the German Jews.

Josel was the advocate of all the Jews in the German empire. Soon after Charles V. had ascended the throne (1520) Josel procured a letter of protection from him for the whole German Jewry; ten years later he obtained its renewal. Several times he interceded successfully with King Ferdinand, brother of the emperor, in favor of the Jews of Bohemia and Moravia. In 1530, in presence of the emperor and his court at Augsburg, Josel had a public disputation with the baptized Jew Antonius Margarita, who had published a pamphlet full of libelous accusations against Judaism. The disputation terminated in a decided victory for Josel, who obtained Margarita's expulsion from Augsburg. At this same Reichstag Josel defended the Jews against the strange accusation that they had been the cause of the apostasy of the Lutherans. Josel's most important action at the Reichstag of Augsburg was the settlement of rules for business transactions of the Jews. They were forbidden to exact too high a rate of interest, to call a negligent debtor before a foreign court of justice, etc. Josel announced these articles to the German Jews as "governor of the Jewish community in Germany."

In Bohemia.

While still occupied with the Augsburg articles Josel had to hurry to the court of Charles V. of Brabant and Flanders in order to defend the calumniated German Jews there (1531). In this to him most inhospitable country—for no Jews were living there then—he spent three months, occupying himself, when he was not officially engaged, with Hebrew studies. Though his life was once in danger, he succeeded in attaining the object of his journey. At the Reichstag of Regensburg (1532) he tried in vain to dissuade the proselyte Solomon Molko from carrying out his fantastic plan to arm the German Jews and to offer them as a help to the emperor in his wars with the Turks. Molko did not follow Josel's advice, and soon after was burned as a heretic. In 1534 Josel went to Bohemia to make peace between the Jews of Prague and those of the small Bohemian town of Horowitz. He succeeded in his mission, but the Jews of Horowitz plotted against his life, and he had to seek refuge in the castle of Prague.

In 1535 Josel traveled to Brandenburg-Ansbach to intercede with the margrave Georg in favor of the Jews of Jägerndorf, who had been falsely accused and thrown into prison; and he obtained their freedom. Two years later Josel tried to help the Saxon Jews, who were threatened with expulsion by the elector John Frederick. He went to Saxony with letters of high recommendation to that prince from the magistrate of Strasburg, and to Luther from Capito, the Alsatian reformer. But Luther had become embittered against the Jews on account of their faithfulness to their creed, and he refused every intercession, so that Josel did not obtain even an audience with the elector. But at a meeting in Frankfort (1539) he found occasion to speak to the prince, whose attention he attracted by refuting, in a public dispute with the reformer Butzer, some spiteful assertions about the Jews. In the same Reichstag Melanchthon proved the innocence of the thirty-eight Jews who had been burned in Berlin in 1510, and this helped to induce Kurfürst Joachim of Brandenburg to grant Josel's request. The Elector of Saxony then also repealed his order of expulsion.

Refutes Luther's Charges.

The same year Josel heard that the Hessian Jews had to suffer many persecutions because of a pamphlet by Butzer. He therefore wrote a defense of Judaism in Hebrew, to be read in synagogue every Sabbath for the comfort of his coreligionists. The magistrate of Strasburg having expressed the belief that attacks on Christianity were contained in the defense, Josel had a verbatim translation made and sent to him. Soon Josel had to defend the Jews against the attacks of Luther himself, who in 1543 had published a very spiteful pamphlet entitled "Von den Juden und Ihren Lügen," which had led to harsh treatment of Jews in different Protestant districts. Josel refuted Luther's assertions in a voluminous petition to the magistrate of Strasburg, and the latter thereupon inhibited a new edition of Luther's book. In 1541 Josel appeared as "chief of the Jews in the German lands" at the Reichstag of Regensburg, and succeeded in averting a dangerous edict which would have forbidden the Jews to engage in any monetary transaction. He succeeded at the Reichstag of Speyer in 1544 in obtaining a new letter of protection for the German Jews from the emperor, wherein they were expressly allowed to charge a much higher rate of interest than the Christians, on the ground that they had to pay much higher taxes than the latter, though all handicrafts and the cultivation of land were prohibited to them. At the same time Josel paid to the emperor in the name of the German Jews a contribution of 3,000 florins toward the expenses of the French war. In the Speyer letter of protection, referred to above, the emperor disapproved of the accusation of ritual murder, and he ordained that no Jew should be put in prison or sentenced for this crime without sufficient proof. Josel was anxious to obtain this order because in 1543 at Würzburg five Jews accused of ritual murder had been imprisoned and tortured. After having personally interceded in favor of these prisoners Josel at length obtained their pardon from the emperor.

In 1546 Josel was called upon to interfere in behalf of the whole body of German Jews, who suffered much during the Smalkaldic war. Through Granvella, the influential counselor of the emperor, Josel obtained an imperial order to the army and a mandate to the Christian population in favor of the Jews, so that they were not molested in the course of the war. As a proof of their gratitude Josel caused the Jews to provide the imperial army with victuals wherever it passed. In recognition of the great services rendered by Josel to the emperor on this occasion and previously, Charles V. renewed at Augsburg in 1548 the safe-conduct for Josel and his family, which thereby received the right of free passage throughout the German empire and free residence wherever Jews were allowed to live. Josel's life as well as all of his belongings was thus protected by a special imperial order. Even in the last years of his life Josel was able to make himself useful to Charles V. In 1552 he sent to the emperor at Innsbruck by a special messenger a warning that Elector Moritz of Saxony intended to invade Tyrol, and the emperor was thus enabled at the last moment to effect his escape.

Literary Activity.

Josel worked for the welfare of his people to the last, dying suddenly in March, 1554. In his active life he always found time to study religious literature, and besides his apologetic pamphlets he wrote several religious and ethical works, which in part are still extant. His most important books are: (1) "Derek ha-Ḳodesh," written 1531 in Brabant, containing rules for a pious life, especially in cases where a Jew has to bear martyrdom. Two fragments of this work, otherwise lost, are retained in the book "Yosif Omeẓ," by Joseph Hahn, Frankfort-on-the-Main, 1723. (2) "Sefer ha-Miḳnah," finished 1546, the first part of which contains words of admonition against traitors in the midst of Israel, the second part being cabalistic. A manuscript in the Bodleian Library, Oxford (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2240), contains the greater part of this work. Josel's memoirs (printed in the Hebrew original with a French translation in "Rev. Études Juives," xvi. 84) contain reports (incomplete) of some important events in his life until 1547, especially some relating to his public activity. They seem to have been written down soon after that year.

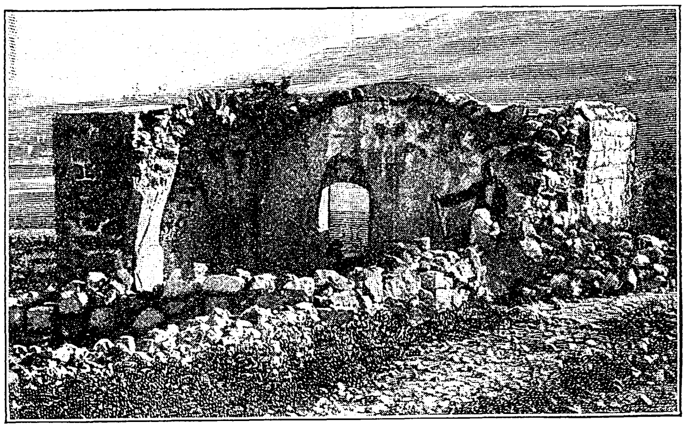
JOSEPH (יוסף; יהוסף in Ps. lxxxi. 6).—**Biblical Data:** Eleventh son of Jacob and the elder of the two sons of Rachel; born at Haran (Gen. xxx. 24). The meaning given to the name (*l.c.*) is "shall add": "The Lord shall add to me another son." It seems probable, however, from Ps. lxxxi. 6, that, like all other Hebrew names beginning with the syllable "Jo," it has Yhwh as its first element, and is a contraction, the original form being "Jehoseph," while in Gen. xxx. 23 there is an allusion to the connection of "Joseph" with אסף ("to take away"). Upon Joseph centered the love of his father, Jacob, who showered upon "the son of his old age" many tokens of special favor and arrayed him in a "coat of many colors." This favoritism, however, excited the envy of his older brothers, and Joseph increased their envy by telling them of two dreams which prognosticated his ruling over them (Gen. xxxvii. 2–11). When a lad of seventeen, Joseph was sent by his father to inquire after his brothers, who were pasturing the flocks in Shechem. He found them at Dothan, and when his brothers saw him approaching they planned to kill him. Reuben, however, took his part, and, in order to remove him from the fury of the others, advised them to throw Joseph into a pit (Gen. xxxvii. 13–24). Different accounts are given of the sale of Joseph, which immediately followed; according to one, the brothers, while eating at some distance from the pit, sighted a caravan of Ishmaelites, to whom they decided, at Judah's advice, to sell Joseph. In the meantime some Midianite merchants passing the pit drew Joseph out and sold him for twenty pieces of silver to the Ishmaelites, who took Joseph to Egypt (Gen. xxxvii. 25–28).



Traditional Tomb of Joseph near Nablus (Shechem).
(From a photograph by Bonfils.)

Sold as Slave.

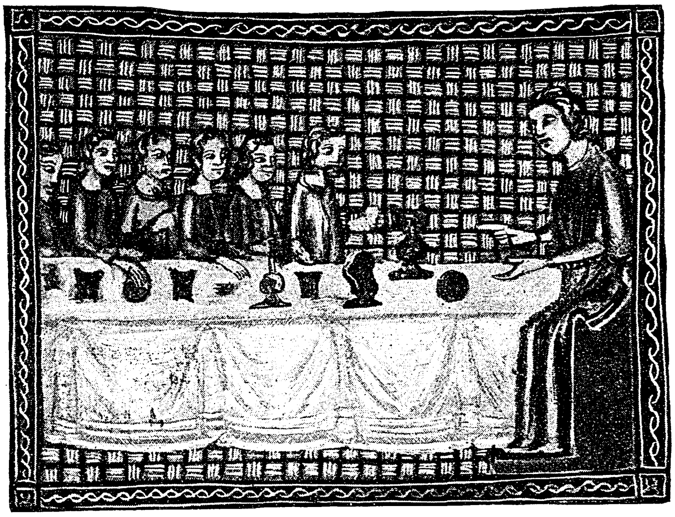
The last statement is repeated in Gen. xxxix. 1, while in Gen. xxxvii. 36 it is said that the Midianites (Hebr. "Medanites") sold him to Potiphar in Egypt.

Cast into Prison.

In Potiphar's house Joseph fared well, for, seeing that he prospered in all that he did, his master appointed him superintendent of his household. But Joseph was "a goodly person and well favored," and his master's wife conceived a passion for him. Her repeated advances being repulsed, she finally attempted compulsion; still failing, she brought a false accusation against him before her husband, and Joseph was thrown into prison. There, too, Yhwh was with Joseph; the keeper of the prison, seeing that he could place confidence in him, committed the other prisoners to his charge (Gen. xxxix.). Soon afterward two of Pharaoh's officers, the chief cupbearer and the chief baker, having offended the king, were thrown into the prison where

Joseph was, and Joseph was appointed to serve them. One morning both officers told Joseph their dreams of the previous night, which they themselves were unable to interpret. Joseph concluded from their dreams that the chief cupbearer would be reinstated within three days and that the chief baker would be hanged. Joseph requested the chief cupbearer to mention him to Pharaoh and secure his release from prison, but that officer, reinstalled in office, forgot Joseph (Gen. xl.).

Joseph remained two years longer in prison, at the end of which period Pharaoh had a dream of seven lean kine devouring seven fat kine and of seven withered ears devouring seven full ears. Great importance was attached to dreams in Egypt, and Pharaoh was much troubled when his magicians proved unable to interpret them satisfactorily. Then the chief cupbearer remembered Joseph and spoke of his skill to Pharaoh. Accordingly he was sent for, and he interpreted Pharaoh's dream as foretelling that seven years of abundance would be followed by seven years of famine and advised the king to appoint some able man to store the surplus grain during the period of abundance. Pleased with his interpretation, Pharaoh made him viceroy over Egypt, giving him the Egyptian name of Zaphnath-paaneah and conferring on him other marks of royal favor. Joseph was then thirty years of age. Pharaoh married him to Asenath, the daughter of Potiphera, priest of On, through whom he had two sons, Manasseh and Ephraim (Gen. xli. 1-52).



Joseph and His Brothers.

(From the Sarajevo Haggadah, 14th century.)

As Viceroy of Egypt.

During the seven years of abundance Joseph amassed for the king a great supply of corn, which he sold to both Egyptians and foreigners (Gen. xli. 48-49, 54-57). The famine having extended to all the neighboring countries, Joseph's brothers, with the exception of Benjamin, went to Egypt to buy corn. Joseph recognized his brothers, who prostrated themselves before him and therein fulfilled, in part, his dreams. He received them roughly and accused them of being spies, thereby compelling them to give him information about their family. Desiring to see Benjamin, Joseph demanded that they substantiate their statements by sending one of their number for Benjamin while the others remained behind. He accordingly imprisoned them for three days, and then sent them away with corn, retaining Simeon as a hostage (Gen. xlii. 1-25). The famine in Canaan continuing, Jacob was again obliged to send his sons to Egypt for corn. As Joseph had commanded them not to appear before him again without Benjamin, Jacob was compelled to let Benjamin go with them. He sent also a present to Joseph in order to win his favor, together with the money which had been, by Joseph's orders, put into their sacks.

Makes Himself Known to His Brothers.

The second time Joseph received them very kindly and prepared a feast for them, but paid special attention to Benjamin (Gen. xliii.). Desiring to know what his brothers would do if under some pretext he retained Benjamin, Joseph gave orders to fill their sacks with corn, put their money into their sacks, and put his silver goblet in Benjamin's. On the following morning the brothers departed, but before they had gone far a messenger overtook them, accusing them of stealing the goblet. The messenger searched their sacks and found the goblet in Benjamin's sack; this compelled them to return. Joseph reproached them for what they had done, and Judah, speaking on behalf of his brothers, expressed their willingness to remain as slaves to Joseph. The latter, however, declined their offer, declaring that he would retain Benjamin only (Gen. xliv. 1-17). Overcome by Judah's eloquent appeal (Gen. xliv. 18-34) and convinced of his brothers' repentance, Joseph disclosed himself to them. He inquired after his father, but as they were too much amazed and startled to answer him, he assured them that in treating him as they did they had been carrying out the will of God. He then urged them to return home quickly, loaded them with presents for his father, and supplied them with vehicles for the transportation of the whole family (Gen. xlv.). Joseph met his father in the land of Goshen. He recommended his brothers to represent themselves as shepherds so that they might remain in Goshen unmolested. Then he presented five of his brothers to Pharaoh, who granted them a domain in Goshen; and, after having introduced Jacob to Pharaoh, Joseph domiciled the whole family, at Pharaoh's command, "in the land of Rameses," where he supplied them with all they needed (Gen. xlvi. 29-xlvii. 12).

As a ruler, Joseph changed the system of land-tenure in Egypt. The famine being severe, the people first expended all their money in the purchase of corn, then they sold their cattle, and finally gave up their land. Thus all the cultivated land in Egypt, except that of the priests, became the property of the crown, and the people farmed it for the king, giving him one-fifth of the produce (Gen. xlvii. 14-26). Hearing of his father's sickness, Joseph went to him with his two sons, whom Jacob blessed, conferring upon Joseph at the same time one portion more than the portions of his brothers (Gen. xlviii.). Joseph carried Jacob's remains to the land of Canaan, where he gave them stately burial. His brothers, fearing that he would avenge himself upon them, then sent to implore his forgiveness. Joseph allayed their fears and promised that he would continue to provide for their wants. He lived to the age of one hundred and ten, and saw his great-grandchildren grow up. Before his death he made the children of Israel take an oath that when they left the land of Egypt they would take his bones with them. His body was embalmed and placed temporarily in a coffin. At the Exodus his bones accompanied Moses, and were finally buried in Shechem (Gen. l.; Ex. xiii. 19; Josh. xxiv. 32).

Joseph Sold by His Brothers.

(From the Sarajevo Haggadah, 14th century.)

Like His Father.

——**In Rabbinical Literature:** Joseph occupies a very important place in the Haggadah, and no patriarch was the subject of so many Midrashic legends. As Rachel was visited by the Lord on Rosh ha-Shanah (R. H. 10b), Joseph was born in due course on the 1st of Tammuz, 2199 (Book of Jubilees, xxviii. 32). He is represented as a perfectly righteous man ("ẓaddiḳ gamur") and as the counterpart of his father; not only did Joseph resemble his father in appearance and in having been born circumcised, but the main incidents of their lives were parallel. Both were born after their mothers had been barren for a long time; both were hated by their brothers; both were met by angels at various times (Gen. R. lxxxiv. 6; Num. R. xiv. 16). Joseph is extolled by the Rabbis for being well versed in the Torah, for being a prophet, and for supporting his brothers (Tan., Wayesheb, 20). According to R. Phinehas, the Holy Spirit dwelt in Joseph from his childhood until his death (Pirḳe R. El. xxxviii.). Jacob's other children came into the world only for Joseph's sake; the Red Sea and the Jordan were passed dry-shod by the children of Israel through the virtue of Joseph (Gen. R. lxxxiv. 4; Leḳaḥ Ṭob to Gen. xxxvii. 2). When Joseph and his mother bowed to Esau (Gen. xxxiii. 7), Joseph shielded his mother with his figure (Targ. pseudo-Jonathan, *ad loc.*), protecting her from the lascivious eyes of Esau, for which he was rewarded through the exemption of his descendants from the spell of the evil eye (Gen. R. lxxviii. 13; comp. Ber. 20a; Soṭah 36b).

When Joseph reported to his father the evil doings of his brothers (Gen. xxxvii. 2), his design was merely that his father might correct them (Leḳaḥ Ṭob, *ad loc.*). The nature of the "evil report" is variously given by the Rabbis. According to Pirḳe R. El. xxxviii., Joseph spoke only against the sons of Bilhah and Zilpah, that they ate meat which they had not slaughtered in accordance with the Law (comp. Targ. pseudo-Jonathan, *ad loc.*). According to R. Judah, Joseph reported that the sons of Leah slighted the sons of the concubines by calling them slaves. R. Simeon's opinion was that Joseph spoke against them all, accusing them of "looking at the daughters of the land" (Gen. R. lxxxiv. 7). The reason for Jacob's special love toward Joseph was, according to R. Judah, that Joseph resembled Jacob in appearance; but according to R. Nehemiah it was that he transmitted to Joseph all the halakot he had studied in the school of Shem and Eber (*ib.* lxxxiv. 8).

Sent to Brothers.

Joseph is represented as an exemplar of filial respect, for when his father requested him to go and see how his brothers fared, he went promptly and with gladness of heart, although he knew that they hated him (Mek., Beshallaḥ, Wayehi, 1; Gen. R. lxxxiv. 12, 15). When he went to his brothers, he was accompanied to Dothan by three angels (*ib.* lxxxiv. 13; comp. Targ. pseudo-Jonathan to Gen. xxxvii. 15, and "Sefer ha-Yashar," section "Wayesheb"). When the brothers saw Joseph approaching from a distance, they decided to set the dogs upon him (*l.c.*). After being beaten by his brethren, Joseph was thrown by Simeon into a pit, among serpents and scorpions; but Joseph prayed to God and the reptiles retired to their holes (*ib.* lxxxiv. 15; Targ. pseudo-Jonathan, *ad loc.*). Afterward, Simeon ordered stones thrown into the pit (Tan., Wayesheb, 13; Yalḳ., Gen. 142). The brothers encamped at a distance from the pit that they might not hear Joseph's cries, and while they were eating a company of Midianites passed by the pit, heard Joseph calling for help, and drew him up. A struggle then ensued between the brothers and the Midianites. The former declared that Joseph was their rebellious slave; the latter regarded their statements with suspicion; but the difference was settled by the sale of Joseph to the Midianites ("Sefer ha-Yashar," *l.c.*). The brothers then divided among themselves the purchase-money—twenty pieces of silver (Gen. xxxvii. 28), each taking two pieces, with which they bought shoes (Pirḳe R. El. xxxviii.). As Joseph had been thrown naked into the pit, the Midianites would have compelled him to accompany them so, but God, not willing that so righteous a man should travel in an unseemly manner, sent Gabriel to transform into a long garment the amulet Joseph wore on his neck. The brothers, however, on seeing the garment, demanded it of the Midianites, saying that they had sold them a naked slave, but, after some altercation, consented to take four pairs of shoes in exchange. Joseph wore the same garment when he was Potiphar's slave, when he was in prison, and when he became the viceroy of Egypt (Jellinek, "B. H." v. 157, vi. 120).

Joseph in Captivity.

When the Midianites noticed the nobility of Joseph's countenance, they understood that he was not a slave and regretted having bought him. They would have taken him back to his father had not the distance been too great; but when they met, soon after, a company of Ishmaelites they sold Joseph to them. Passing his mother's grave, Joseph prostrated himself upon it, weeping bitterly and imploring her assistance; from her grave she answered that she was afflicted by his troubles, but that he must hope and await the intervention of God. The Ishmaelites violently dragged Joseph away, beat him cruelly, and continued their journey. They finally met four merchants, descendants of Medan, to whom they sold Joseph; and the Medanites in turn sold Joseph to Potiphar for four hundred pieces of silver ("Sefer ha-Yashar," *l.c.*; comp. Gen. R. lxxxiv. 20.)

Joseph was sold by his brothers on Yom Kippur (Book of Jubilees, xxxiv. 15). In reward for his righteousness, the Ishmaelites, who generally dealt in ill-smelling articles, were on that occasion influenced by Providence to carry fragrant spices in order that Joseph's journey to Egypt might be more agreeable (Gen. R. lxxxiv. 16). When Jacob's sons reached home, affirming that Joseph had been devoured by a wild beast (comp. Gen. xxxvii. 33), Jacob ordered them to arm themselves and capture the beast. They accordingly went forth and returned with a wolf; but when Jacob began to reproach the beast for its cruelty, the wolf answered, in human language, that it had not committed the crime of devouring Joseph, and that it was itself searching for its lost cub; Jacob therefore let the wolf go ("Sefer ha-Yashar," *l.c.*).

Jacob did not wholly believe that Joseph was dead, because he could not forget him, while the dead are soon forgotten. He therefore hewed out twelve stones and placed them in a row, after writing on them the names of his twelve sons with their corresponding months and zodiacal signs. Then he commanded them to bow to the stone of Reuben, but no stone moved; then he commanded them to bow to Simeon's stone, with the same result; but when he came to the stone of Joseph, all the other stones bowed to it. Even then Jacob was not sure that Joseph was alive, and repeated the same experiment with sheaves, getting the same result, without, however, reaching a conviction. He was finally convinced by a vision which he had of the future priestly organization, interpreting the names of Eliashib, chief of a division of the sons of Aaron (I Chron. xxiv. 12), and Elkanah, a noted Levite (I Sam. i. 1), as signifying respectively "God will bring him back" and "he was bought by Potiphar" (Soferim xxi. 9).

Joseph's Temptation.

The prosperity of Joseph in Potiphar's house is described by the Rabbis as follows: "The wishes of Potiphar were executed in an instant; when he desired that the cup which Joseph handed him should be warm, it was warm; and if he desired that it should be cold, it was cold" (Tan., Wayesheb, 16; Gen. R. lxxxvi. 6). At first Potiphar was of the opinion that Joseph was a magician, and he wondered, saying, "Is there a lack of magicians in Egypt?" but afterward he saw that the Shekinah dwelt in Joseph (Gen. R. *l.c.*; Leḳaḥ Ṭob to Gen. xxxix. 3). Joseph's character was antithetical to the characters of all the other slaves; the latter were rapacious, while Joseph never enjoyed anything that was not his (Zeb. 118b); the other slaves were given over to lust, while Joseph was chaste; the others ate the priestly portions because they were slaves of the priests (see Lev. xxii. 11), while Joseph, through his righteousness, caused the descendants of his master, who were his own descendants as well, to eat those portions; this identifies Joseph with Putiel, Eleazar's father-in-law (Gen. R. lxxxvi. 3; comp. Mek., *l.c.*; Soṭah 43a). Like all other righteous men, Joseph was tried by God (Gen. R. lxxxvii. 3; comp. Test. Patr., Joseph, 2). He was one of the three men who successfully resisted temptation; for this he was rewarded by having the letter ה (one of the letters composing the Tetragrammaton) added to his name (Lev. R. xxiii. 10; comp. Ps. lxxxi. 6). The day on which Joseph "went into the house to do his work" (Gen. xxxix. 11–12) was the Sabbath day, and the work consisted in repeating the Torah, which he had learned from his father (Midrash Abkir, quoted in Yalḳ., Gen. 146). Some rabbis, however, charged Joseph with vanity, saying that, even before being sold, he took too much pains with his personal appearance (Gen. R. lxxxiv. 7), and that he continued to do so as ruler over Potiphar's house, forgetting his father, who was mourning over his disappearance. God punished him, therefore, by setting against him Potiphar's wife (Gen. R. lxxxvii. 3). Certain rabbis declared even that Joseph was ready to yield to his mistress, but that his father's image suddenly appeared to him and called him to his duty (Soṭah 36b; Gen. R. lxxxvii. 9; comp. Pirḳe R. El. xxxix.).

The story of Joseph and Zelikah (Zulaikha), the wife of Potiphar, is narrated in the "Sefer ha-Yashar" (*l.c.*, following Arabic sources, as the very name "Zelikah" shows) as follows: Zelikah at first attempted to seduce Joseph by arraying him in fine garments, putting before him the most delicious viands, and speaking to him in amorous terms. These means failing, she used threats, but without effect, for Joseph remained inflexible (comp. Test. Patr., Joseph, 3). The vehemence of her unrequited passion soon impaired her health. On one occasion, when some noble ladies of Egypt had come to see her, she told her maid to give them oranges and sent Joseph in to wait upon them; the women, unable to turn their eyes from Joseph, cut their fingers while peeling the oranges, and when Zelikah asked them the cause, they answered that they could not help looking at Joseph. She then said: "What would you do if, like myself, you had him every day before your eyes?" According to Gen. R. lxxxvii. 5 and Test. Patr., Joseph, 4–5, Zelikah told Joseph that she was ready to kill her husband so that he might marry her legally. But Joseph exclaimed: "After inducing me to commit adultery, thou desirest me to become a murderer!" Zelikah promised that, if he would yield to her, she would embrace his religion and induce all the Egyptians to do the same. Joseph answered that the God of the Hebrews does not desire unchaste worshipers. She next brought Joseph into her chamber in the inner part of the house and placed him on her bed, over which was the image of her Egyptian god. Then she covered her face with a veil, and Joseph said: "Thou art afraid of an idol; shall I not fear YHWH, who sees all things?" (Gen. R. *l.c.*).

It happened that, at the Nile festival, all the people of the house except Joseph and Zelikah had gone to see the ceremonies; Zelikah feigned illness as her reason for not attending the festival (comp. Soṭah 36b). With one hand she grasped a sword and with the other caught Joseph's garment, and when he attempted to release himself a rent was made in the garment. Afterward, when Joseph was brought before the priests for judgment, and while they were deliberating, Zelikah's child of eleven months suddenly began to speak, accusing its mother and declaring Joseph's innocence. The priests then ordered the garment to be brought in order that they might see on which side it had been rent: seeing that it was rent in the back, they declared Joseph innocent. Joseph was nevertheless thrown into prison by Potiphar, who was anxious thus to save his wife a public exposure ("Sefer ha-Yashar," *l.c.*; comp. Gen. R. lxxxvii. 10). According to Midrash Abkir (Yalḳ., Gen. 146), Zelikah requested her female friends to testify that Joseph had assailed them also. Potiphar was going to kill him, but his wife prevailed on him to imprison him and then sell him, so as to recover the money he had paid for Joseph. According to the same Midrash, it was Asenath who told Potiphar of her mother's false accusation.

Joseph in Prison.

Joseph's duties took him every day to his master's house, and this gave Zelikah opportunities to renew her entreaties and threats. As Joseph continued to look downward, she put an iron spear under his chin to force him to look at her, but still Joseph averted his gaze (Gen. R. lxxxvii. 11; comp. "Sefer ha-Yashar," *l.c.*). There is a disagreement among rabbinical writers as to the length of time Joseph spent in Potiphar's house and in prison. According to Seder 'Olam (Neubauer, "M. J. C." ii. 28) and Gen. R. (lxxxvi. 7, after the correction of "Mattenot Kehunnah"), Joseph was one year in Potiphar's house and twelve years in prison; according to Pirḳe R. El. (*l.c.*), he was in prison ten years; according to the Book of Jubilees (xlvi. 7), he was ten years in the house and three years in prison. The last opinion seems to be supported by Gen. R. lxxxix. 2 and Tan., Miḳḳeẓ, 2, where it is said that Joseph remained two years longer in prison as a punishment for having trusted in the promises of man (comp. Gen. xl. 14–15). When the chief butler told Pharaoh of Joseph's skill in interpreting dreams (Gen. xli. 12–13), he endeavored at the same time to discredit Joseph, but an angel baffled the chief butler's design (Gen. R. lxxxviii. 6, lxxxix. 9). According to Soṭah 36b, Gabriel taught Joseph the seventy languages which a ruler of Egypt was obliged to know, and it was then that he added the letter ה to Joseph's name (comp. Num. R. xiv. 16). Joseph was released from prison on Rosh ha-Shanah (R. H. 10b).

Joseph as Ruler.

When Joseph interpreted Pharaoh's dreams, the king asked him for a sign by which he might know that his interpretation was true. Joseph then told him that the queen, who was about to be delivered of a child, would give birth to a son, but that at the same time another son, two years of age, would die; and it so happened. As a viceroy, Joseph built himself a magnificent palace, placing in it a great number of slaves. He equipped also a considerable army, with which he marched to help the Ishmaelites against the Tarshishites, winning a great victory ("Sefer ha-Yashar," section "Miḳḳeẓ").

Joseph showed great discernment in preserving the grain which he gathered, by storing in each district only the amount which had grown there (Gen. R. xc. 5). Later, when the famine waxed sore and the Egyptians went to Joseph for grain, he compelled them to undergo circumcision, refusing food to uncircumcised people (*ib.* xc. 6, xci. 5). He stored up in Egypt all the gold and silver of the world, and it was carried away by the Israelites when they left Egypt. According to another opinion, Joseph placed the gold and silver in three hidden treasuries, of which one was discovered by Korah, one by Antoninus, son of Severus, and one is being kept for the righteous in the future world (Pes. 119a; comp. "Sefer ha-Yashar," section "Wayiggash").

Joseph always kept in mind his father and brothers, and during the twenty-two years he was away from home he drank no wine (Shab. 139a; Gen. R. xciv. 25; Test. Patr., Joseph, 3). It is said also that Joseph wore sackcloth and fasted much (Gen. R. lxxxv. 2; Test. Patr. *l.c.*). He is represented as very modest, so that though viceroy of Egypt he was not vain of his power (Ex. R. i. 7). Knowing that his brothers would come to buy grain, Joseph gave orders that nobody should be permitted to enter until he had given in writing his own and his father's names. His brothers, fearing the evil eye,

Joseph and His Brethren.

entered the city at ten different gates, and in the evening the gatekeepers brought their names to Joseph. Three days passed, and the brothers had not appeared before Joseph; so Joseph sent seventy strong men to search for them. The brothers were found in the street of the harlots, whither they had gone with the object of looking for Joseph. When they were brought into Joseph's house, Joseph, feigning divination through his goblet, enumerated all their deeds, how they had destroyed Shechem, how they had sold their brother; and the fact of being found in the street of the harlots proved, he said, that they were spies. A struggle ensued between Joseph's men and his brothers, who were on the point of destroying Egypt, but they were subdued by Manasseh, who imprisoned Simeon (Gen. R. xci. 6; comp. "Sefer ha-Yashar," *l.c.*). Later, when, under the pretext of his having stolen the goblet, Benjamin was detained by Joseph (Gen. xliv.), another violent struggle ensued between Joseph and his brothers, who would have carried Benjamin off by force. Seeing that his brothers, especially Judah, were again becoming furious, Joseph, with his foot, struck a marble pillar on which he was sitting, shattering it into fragments (Gen. R. xciii. 7).

Why He Died Before His Brothers.

According to the "Sefer ha-Yashar" (section "Wayiggash"), where the whole struggle is narrated at great length, Manasseh was the hero of that exploit (see Targ. Yer. to Gen. xliv. 19). Joseph allowed himself to be recognized by his brothers for fear they might destroy Egypt (Gen. R. *l.c.*). Certain rabbis underrated Joseph's merit by declaring that he died before his brothers because he had made them feel his authority (Ber. 55a; comp. Tan., Wayiggash, 3). According to other opinions, Joseph died before them because he embalmed his father's body instead of relying on God to keep the body from decay; or because he heard Judah say "thy servant my father" several times without correcting him (Pirḳe R. El. xxxix.; Gen. R. c. 4). Joseph's solicitude on behalf of his brothers is pointed out by Pesiḳ. R. 3 (ed. Friedmann, p. 10b) as follows: Although he honored his father greatly, he always avoided meeting him, so that he would not have known that his father was sick had not a messenger been sent to him (Gen. xlviii. 1); Joseph apprehended, perhaps, that his father would ask him how he came to be sold by his brothers, and would curse them. When Jacob prepared himself to bless Joseph's two sons, the Holy Spirit had left him, but it returned to him through Joseph's prayer (Pesiḳ. *l.c.* p. 12a). Joseph is said to have himself superintended his father's burial, although he had so many slaves; he was rewarded in that Moses himself carried his bones (Soṭah 9b; comp. Ex. xiii. 19), and in that his coffin was carried in the wilderness side by side with the Ark of the Covenant (Mek., *l.c.*).

According to most rabbinical authorities, Joseph's coffin was sunk in the Nile (Targ. pseudo-Jonathan to Gen. l. 26; Mek., Beshallaḥ, Wayyehi, 1; Ex. R. xx. 17); but according to R. Nathan, Joseph was buried in the royal palace. In the time of the Exodus, Serah, daughter of Asher, showed Moses where the coffin was sunk. Moses threw a pebble into the water there and cried out: "Joseph! Joseph! the time has come for the Israelites to be rescued from their oppressors; come up and do not cause us any further delay!" The coffin thereupon floated up (Mek., *l.c.*; Ex. R. *l.c.*). It may be added that the piyyuṭ beginning "Arze ha-Lebanon" and recited on Yom Kippur is based on the legend that Joseph was bartered for shoes (comp. Amos ii. 6).

S. S. M. Sel.

——**Critical View:** The narratives concerning Joseph (Gen. xxxvii. and xxxix.-l.) are composed of two principal strata: a Jahvistic stratum and an Elohistic one, with a few details here and there from the compiler of the Priestly Code (for details see J. E. Carpenter and G. Harford-Battersby, "Hexateuch," pp. 58-79). According to the Jahvistic narrative, Joseph is rescued by Judah when his brethren plot against him, and is afterward sold to Ishmaelites, who in turn sell him to an Egyptian of high position whose name is not given. The wife of this Egyptian brings an accusation against Joseph, and he is cast into prison; but the jailer makes him overseer of the other prisoners. The Jahvistic account of his escape from prison has been omitted; and in the sequel nothing is said about Simeon's becoming a hostage. The brethren open their sacks at a halting-place and find their money; Judah offers to become surety to his father for Benjamin's return; the Israelites settle in the land of Goshen; and Jacob's life closes with his poetic blessing.

In the Elohistic portions Joseph is rescued from his other brethren by Reuben and thrown into a pit, from which he is taken and sold to the Midianites; they in turn sell him to Potiphar, captain of the guard, who makes him ruler over the prisoners confined in his house. Afterward, when his brethren are accused of being spies, they volunteer the information about the younger brother. Simeon is left in Egypt as a hostage; the others open their sacks at the end of their homeward journey; Reuben offers to become security for Benjamin's return; and there is no mention of Goshen. In other respects the narratives seem to have been closely parallel. The Priestly Code adds a few statistics and gives a list of the people who went down to Egypt.

Modern critics have made various estimates of the historical worth of these narratives of Joseph. As the reputed ancestor of the tribes of Ephraim and Manasseh, he is regarded by some as altogether legendary or even mythical. Thus Winckler held the story of Joseph to be a sun-myth ("Gesch. Israels," part ii., pp. 73-77; see, however, his "Abraham der Babylonier, Joseph der Egypter," 1903); while the fact that "Jacob-el" and "Joseph-el" appear in a list of Thothmes III. as the names of places in Palestine (W. Max Müller, "Asien und Europa," pp. 163 *et seq.*), lends to the legendary view some probability. Still, even if these narratives should prove to be legendary, not every legend is a sun-myth.

On the other hand, archeological evidence has been urged in favor of the historical character of Joseph. Two of the El-Amarna tablets (Schrader, "K. B." v., Nos. 44, 45) show that a Semite held a position in Egypt quite analogous to that attributed to Joseph. The Egyptian "Tale of Two Brothers" shows that such situations as that in which Joseph found himself with the wife of his master were not unknown in Egypt (comp. Sayce, "Verdict of the Monuments," pp. 209–211).

The Egyptians attached great significance to dreams, as they are said to have done in the Biblical narrative (comp. Brugsch, "History of Egypt," pp. 200, 314, 406); famines of long duration were also not infrequent, being produced by the failure of the Nile overflow. One such, from 1064 to 1071, is attested by the Arabic historian Al-Makrizi (comp. Stanley, "Jewish Church," i. 79). Such instances of the correctness of the portraiture from an Egyptian standpoint might be greatly multiplied. At the most, however, they do not prove the historical character of the narrative, but that, if it is fiction, it is very realistic fiction. In either case the narratives were not written till after the ninth century B.C.; for such names as "Potiphar" (Gen. xxxix. 1) and "Zaphenath-paneah" (Gen. xli. 45) do not occur in Egyptian before that century (comp. Brugsch in "Old Testament Student," xi. 481).

Those who regard the Joseph stories as historical generally hold that the Pharaoh by whom Joseph was made the practical ruler of Egypt was one of the Hyksos kings. This result is reached partly by reckoning back from Rameses II., who is regarded as the Pharaoh of the oppression, and partly by assuming that the Hyksos were Semitic or Asiatic, and that such a situation was more possible under them. The El-Amarna tablets cited above make it clear, however, that it would have been equally possible under the kings of the eighteenth dynasty, such as Amenophis III. or Amenophis IV. (about 1400 B.C.).

E. G. H. G. A. B.

——**In Arabic Literature:** The story of Joseph or Yusuf as it is told in Arabic literature has the same general outlines as the Biblical narrative; but in the Arabic account there is a wealth of accessory detail and incident. Some of these amplifications have been borrowed by Jewish writers (as in the "Sefer ha-Yashar"; see Grünbaum, "Zu 'Yussuf und Suleicha,'" in "Z. D. M. G." xliii. 1 *et seq.*). Joseph is regarded by the Arabs as a prophet (Koran, suras vi. 84, xl. 36). He is also a type of manly beauty; so that one often finds the expression "a second Joseph," meaning one extraordinarily beautiful. He is likewise called the "Moon of Canaan." A great many public works in Egypt have been attributed to him. Some believe that he built the city of Memphis, and that he was instrumental in building the obelisks and pyramids. He also instructed the Egyptians in science. In the Koran a whole chapter (sura xii.) is devoted to Joseph; and the commentators add many details to this "best of stories," as Mohammed calls it (sura xii. 3).

Joseph and Zuleikah.

The story of Yusuf and Zulaikha is a favorite love-song in the East, and the Persian poet Firdusi has written on the subject an epic which begins with Jacob's suit for Rachel (published by Schlechta-Wssehrd, Vienna, 1889). The narrative, however, among the Mohammedans is more than a simple love-tale. Their theologians use it to symbolize the spiritual love between God and the soul (D'Herbelot, "Bibliothèque Orientale," iii. 371). Zulaikha or Ra'il is the wife of Kitfir or Itfir (the Biblical Potiphar), through whose accusations, although they are proved to be false, Joseph is thrown into prison. After his phenomenal rise to power, as he is passing through the street one day his attention is attracted by a beggar woman whose bearing shows traces of former greatness. Upon stopping to speak to her he discovers Zulaikha, who has been left in misery at the death of her husband. Joseph causes her to be taken to the house of a relative of the king, and soon obtains permission to marry her, she having lost none of her former beauty nor any of her first love for him.

Other features in the Arabic history of Joseph which are lacking in the Old Testament narrative, are the stories of Jacob and the wolf and of Joseph at his mother's tomb (contained in a manuscript at Madrid). After Joseph's brothers had returned to their father with the coat dipped in blood, Jacob was so prostrated that for several days he was as one dead. Then he began to wonder that the garment had no rents or marks of claws and teeth, and suspicions of the truth arose in his mind. To allay his doubts the brothers scoured the country and caught in a net a wolf, which they brought alive to their father. Jacob, after reproaching the wolf for its cruelty, asked it to relate how it came to commit so wicked a deed; whereupon Allah opened the mouth of the dumb beast and it talked, disclaiming any connection with the death of Joseph. It even expressed sympathy for the grieving father, saying that it had itself lost its own dear child. The patriarch was much affected by this tale, and entertained the wolf hospitably before sending it on its way with his blessing.

The story of Joseph at his mother's tomb shows the boy's piety and forgiving nature. As the caravan bearing him to Egypt passed near his mother's grave Joseph slipped away unnoticed and fell upon the tomb in an agony of tears and prayer. For this he was severely abused, whereupon a storm suddenly arose, making further progress impossible. Only when Joseph had forgiven the offender did the storm disappear (Ticknor, "Hist. of Spanish Literature," 3d American ed., i. 85 *et seq.*, Boston, 1864). This "Poema de José" was written in Spanish with Arabic characters by a Morisco, who had forgotten the language of his forefathers, but still remembered their traditions. These stories are found in the "Sefer ha-Yashar" also; but their origin is certainly Arabic (see Grünbaum, *l.c.*).

Differences of Tradition.

There are certain minor points in which the Arabic story differs from the Biblical. In the Koran the brothers ask Jacob to let Joseph go with them. In the Arabic story the pit into which Joseph is thrown is a well with water in it, and Joseph escapes by climbing upon a rock. Joseph's face possessed such a peculiar brilliancy that his brothers noticed the different light in the sky as soon as he appeared above the edge of the well, and they came back to claim him as their slave. This same peculiarity was noticeable when they went to Egypt: although it was evening when they entered the city, his face diffused such a light that the astonished inhabitants came out to see the cause of it. In the Bible Joseph discloses himself to his brethren before they return to their father the second time after buying corn. In the Arabic story they are compelled to return to Jacob without Benjamin, and the former weeps himself blind. He remains so until the sons have returned from Egypt a third time, bringing with them Joseph's garment which Gabriel had given him in the well, and which, having come from paradise, healed the patriarch's eyes as soon as he put it to his face.

Joseph was buried in the Nile, as there was some dispute as to which province should be honored by having his tomb within its boundaries. Moses was able by a miracle to raise the sarcophagus and to take it with him at the time of the Exodus.

JOSEPH (High Priest): 1. Son of Ellem (אילם) of Sepphoris; installed by Herod for one day (Yom Kippur) as a substitute for the high priest, who had become unclean (Tosef., Yoma i. 4; Yer. Yoma i. 1; Yer. Hor. iii. 3; Hor. 12b; *et al.*). Josephus, who tells the same story ("Ant." xvii. 6, § 4), says that "Mattathias, son of Theophilus" (4 B.C.) was the name of the priest for whom he substituted. The Rabbis forbade him afterward to officiate, even as a common priest (Yoma 12b; Hor. 12b). **2.** Son of Ḳimḥit (Ḳamḥit); he became a substitute for his brother Ishmael, or Simeon, when the latter had become unclean (Yoma 47a). Josephus ("Ant." xx. 5, § 2), calling him "Joseph, son of Kamythus" (Κάμῖθος), speaks of him as having been removed from the high-priesthood by Herod II. **3.** Son of Simeon Kabi (61–62 C.E.; Josephus, "Ant." xx. 8, § 11); installed in the high-priesthood by Agrippa II. Grätz ("Gesch." 4th ed., iii. 739) concludes that this Joseph was the son of Simeon Kamithus. See ISHMAEL BEN ḲIMḤIT.

G. M. SEL.

JOSEPH II.: German emperor; born March 13, 1741; died Feb. 20, 1790, at Vienna. As German emperor his sovereignty was one in name only, but as ruler of Austria in succession to his mother, Maria Theresa (d. Nov. 29, 1780), his activities were as manifold as they were beneficent. Joseph was a believer in the principles of humanitarianism as taught by the philosophers of his time, and while he remained a strict Romanist in matters of dogma, he opposed the Church strongly in its policy toward the adherents of other creeds. This change of policy affected the Jews almost from the moment that he ascended the throne. He abolished the poll-tax and the Jew's badge (1781) and issued the "Toleranzpatent" (Jan. 2, 1782), in which the principles were laid down that the restrictions on the Jews should be gradually removed and that the Jews should be encouraged in taking up handicrafts and agriculture; the schools were expressly declared to be open to them, and special Jewish schools were to be established. In individual questions, such as the frequent cases of baptism of infants by midwives contrary to the will of the parents, he strongly demanded that justice should be done, that the children should be returned to their parents, and that midwives should not be permitted to baptize Jewish children (Wolf, "Judentaufen," p. 97, Vienna, 1863). When a Jew made a bid for the renting of a brewery on the imperial family estate at Göding, and the administration rejected the bid on the ground that Jews had been expelled from that town, the emperor said: "The only reason for the expulsion of the Jews is that they are not Christians; to me they are human beings, consumers, and taxpayers, and consequently useful, if properly kept in check" ("Allg. Zeit. des Jud." 1844, p. 655).

Of great importance was the law of 1787 requiring the Jews to serve in the army, the first enactment to that effect in history. Many Jews objected, and sent petitions to the emperor, but he would not repeal it. Upon the request of the community of Presburg he repealed the law demanding that the Jews should shave off their beards, the object of which was to oblige them to relinquish a distinction that marked them off from their Christian fellow subjects. Consistently with his principles he abolished the annual collective tax upon the Jews, and substituted for it the "Familientaxe," which the community paid for every member who had contracted a legal marriage (see FAMILIANTEN GESETZ), and a tax on every article of food, the object of the change being to abolish the use of the invidious word "Schutzgeld," implying that the Jews were merely tolerated. From the surplus of these taxes over the amount of the former "Toleranzsteuer" the Jewish fund in Moravia ("Landemassafonds") was accumulated. However, most of the disabilities remained, as the restriction upon marriage, the confinement to ghettos, and the inability to hold office. 'See AUSTRIA.

D.

JOSEPH: Prominent Jewish family which settled in Canada toward the close of the eighteenth century. It was descended from **Naphtali Joseph,** of an Anglo-Jewish family which had come from the Netherlands.

1. Abraham Joseph: A brother of Henry Joseph (No. 4); followed the latter to Canada some years after he had settled in the country. He became prominent in public affairs.

2. Abraham Joseph: Born in Berthier, Canada, in 1815; died in Quebec in 1886; son of Henry Joseph (No. 4). He removed to the latter city in 1832, and became a member of the city council. He was a candidate for the mayoralty. During the rebellion of 1837–1838 he served in the Quebec Light Infantry, attaining the rank of major.

Joseph was president of the Dominion and the Quebec boards of trade, president of the Stadacona Bank, one of the founders of the Banque Nationale, and a director of the Quebec and Gulf Ports Steamship Company.

3. Gershom Joseph: Born in 1821; youngest son of Henry Joseph (No. 4); studied jurisprudence at Toronto University (M.A. and B.C.L.). He practised law in Montreal, but abandoned the profession in 1849 to embark in gold-mining in California. In 1863 he returned to Montreal, and resumed his law practise. In 1892 Joseph was appointed a queen's counsel, being the first Canadian Israelite to attain that distinction. At the time of his death Joseph was president of the Spanish and Portuguese synagogue.

4. Henry Joseph: Born in London, England, in 1775; son of Naphtali Joseph. His mother was a sister of Commissary Aaron Hart, seignior of Bécancourt. Joseph moved to Canada in 1790, being the first member of the family to settle there, and became connected with the commissariat of the garrison at Fort William Henry, at the mouth of the Richelieu River. Afterward he established a chain of trading-posts from Hudson's Bay to Berthier, Montreal, and Quebec, and he gradually became an important factor in the development of Canadian commerce. He was the first to build and charter Canadian ships for the transatlantic trade, and was one of the founders of Canada's merchant marine.

During the war between Great Britain and the United States (1812–14) Joseph took part in several engagements. After the war his business interests centered in Montreal, where he eventually took up his residence. Here he became deeply interested in Hebrew communal affairs, and was one of the most active members of the Spanish and Portuguese synagogue. He also generously aided a number of non-sectarian institutions. In 1832 he and his eldest son, **Samuel,** fell victims on the same day to the cholera epidemic. Joseph was married to Rachel Solomons and was the father of a very large family, including four sons, **Jacob Henry, Abraham, Jesse,** and **Gershom,** and four daughters, **Catherine, Rebekah, Sarah,** and **Esther.** Catherine married Dr. Aaron Hart David, and Esther became the wife of Dr. Abraham de Sola.

5. Jacob Henry Joseph: Born in Berthier in 1814; eldest son of Henry Joseph (No. 4); married Sara Gratz Moses, a niece of Rebekah Gratz of Philadelphia. He took up his residence in Montreal in 1830. He was prominent in the establishment of the first telegraph-line between Canada and the United States, and was associated with the Newfoundland Telegraph Company. He also took an active interest in Canadian railways and was prominent in financial circles, helping to found the Union Bank, the Ontario Bank, and the Provident Savings Bank, besides being for many years the president and controlling stockholder of the Montreal Elevator Company.

During the Canadian rebellion of 1837–38 Joseph served as an officer in a loyalist regiment sent to oppose the rebels advancing from Lacolle. Joseph was for some years treasurer of the Spanish and Portuguese synagogue in Montreal.

6. Jesse Joseph: Born in Berthier in 1817; died in Montreal Feb. 24, 1904; son of Henry Joseph (No. 4). He was the first to establish a direct line of ships between Antwerp and Montreal. In 1850 he was appointed consul for Belgium at Montreal, and in recognition of his eminent services in establishing trade relations between Belgium and Canada was twice decorated by the King of the Belgians. He also maintained very extensive commercial relations between England and Canada.

In 1864 Joseph retired from business and became identified with the promotion of many public undertakings. He was for thirty years president or director of the Montreal Gas Company, afterward the Light and Heat Power Company. He was elected president of the Montreal Street Railway Company in 1884, and was also for many years a director of different telegraph companies and financial institutions.

In 1893 Joseph became president of the Corporation of Spanish and Portuguese Jews of Montreal. He was also a governor of the Montreal General Hospital, and was an active supporter of many other charities.

7. Judah Joseph: A son of Naphtali Joseph. With his brother Abraham (No. 1) he joined Henry Joseph some years after the latter had settled in Canada. He was a member of the board of the Montreal synagogue, and an active communal worker. After acquiring considerable weath he returned to England.

A. C. I. de S.

JOSEPH BEN ABBA: Gaon of Pumbedita for a period of two years; died in 816 (Sherira Gaon; Neubauer, "M. J. C." i. 37). Abraham ibn Daud ("Sefer ha-Ḳabbalah," *ib.* i. 64) calls him Joseph b. Judah and places his death in 824. After the death of the preceding gaon (R. Abumai, or, according to Abraham ibn Daud, Aḥinai) in 814 or 822, Joseph was preferred to Mar Aaron, who, though a greater Talmudist, did not possess the former's miraculous powers. Joseph was believed to have conversed with Elijah, and once, when he was on the point of beginning a lecture before a numerous audience, he exclaimed: "Make room for the old man who is now entering!" The old man, who was invisible to all save Joseph, was believed to be Elijah. On the day of Joseph's death there was an earthquake (Sherira Gaon, *l.c.*). Judah Gaon, Sherira's grandfather, was Joseph's secretary, according to Sherira Gaon and Abraham ibn Daud (*l.c.*). These two authorities mention further that Joseph as a boy diligently studied the Talmud, and that his teacher, Mar Shinai Gaon, blessed him, declaring that he would become the head of the people. See Gaon.

JOSEPH IBN ABITUR. See Abitur, Joseph.

JOSEPH BEN ABRAHAM: Liturgical poet. Seven prayers bearing the name "Joseph ben Abraham" are found in the Siddur of Avignon. Zunz identifies this Joseph with Joseph of Monselice, whose seliḥah for the seventeenth of Tammuz is inserted in the ritual of Carpentras (Amsterdam ed., 1762). It is possible that the liturgical poet Saul ben Joseph, whose poem is found in the same ritual, was a son of this Joseph.

JOSEPH BEN ABRAHAM ISSACHAR BÄRMAN MINKDAM: Dutch scholar of the seventeenth and eighteenth centuries. He translated into Judæo-German the Targum to Canticles (Amsterdam, 1711); the translation was inserted in Jacob b. Isaac's "Ẓe'enah u-Re'enah," the well-known homiletic paraphrase of the Pentateuch.

JOSEPH BEN ABRAHAM HA-KOHEN HA-RO'EH (Arabic, **Abu Ya'ḳub al-Baṣir**): Karaite philosopher and theologian; flourished in Babylonia or Persia in the first half of the eleventh century; teacher of Joshua ben Judah (Abu al-Faraj Furḳan ibn Asad). By way of euphemism he was surnamed "ha-Ro'eh" (= "the seer"), on account of his blindness. This infirmity, however, did not prevent him from undertaking long journeys, probably as a Karaite missionary. In the course of his travels he frequented the religio-philosophical schools of the Motazilites, whose teachings he defended in his works. Of these the most important is the "Muḥtawi," translated from the Arabic into Hebrew, perhaps by Tobiah ben Moses, under the title "Sefer ha-Ne'imot," or "Zikron ha-Datot." It is divided into forty chapters, in which all the main principles of the Motazilite "kalam" are applied to the Karaite dogmas: the five principles of the unity of God; the necessity of admitting atoms and accidents; the existence of a Creator; the necessity of admitting certain attributes and rejecting others; God's justice and its relation to free will; reward and punishment; etc. The author often argues against the Christians, the Dualists, the Magians, the Epicureans, and various other sects, with whose tenets he shows himself well acquainted. He cites the founders of the Motazilite sects of Al-Jabaiyah and Al-Bahshamiyyah, Abu 'Ali Mohammed ben 'Abd al-Wahhab al-Jabai, and his son Hashim 'Abd al-Salam, whose teachings he closely follows. The "Muḥtawi" is still extant in manuscript, both in the Arabic original and in its Hebrew translation; the former in the David Kaufmann Library, the latter in the libraries of Leyden, Paris, and St. Petersburg.

His "Muḥtawi."

His "Al-Tamyiz."

Another extant work of his is "Al-Tamyiz," called also "Al-Manṣuri" (Brit. Mus. Or. No. 2568). It was translated into Hebrew, with some additions, by Tobiah ben Moses under the title "Maḥkimat Peti" (Oxford, Leyden, Paris, St. Petersburg). It is divided into thirty-three chapters, and treats in abridged form all the non-polemical subjects contained in the "Muḥtawi." In the fourteenth chapter the author criticizes the "Shi'ur Ḳomah," and refutes the theory of Benjamin ben Moses Nahawandi, who, holding God too sublime to concern Himself directly with the material world, believed that it was created by an angel acting as God's representative. From the similarity between some passages of the "Maḥkimat Peti" and of the "Emunot we-De'ot" it may be inferred that Joseph knew Saadia's work and often used it. The "Maḥkimat Peti" (xxiii.) is quoted, under its Arabic title "Al-Manṣuri," by Joseph ibn Ẓaddiḳ in reference to God's sufficiency; Ibn Ẓaddiḳ criticizes also the Motazilite theory adopted by Joseph ben Abraham (xxvii.) concerning the reward reserved in the next world for animals and children in return for the sufferings inflicted upon them in this world (" 'Olam Ḳaṭan," ed. Jellinek, pp. 46, 70).

Joseph quotes in the "Muḥtawi" and "Al-Tamyiz" the following works of his, which are no longer in existence: "Ṣihat al-Istidlal bi-al-Shahd (Shahr) 'ala al-Ghaib," probably on the proofs of the existence of a Creator; "Aḥwal al-Fa'il"; "Al-Muḥiṭ," in Hebrew, "Shefoṭ ha-Shofeṭim"; a writing on, perhaps against, Abu Ghalib Thabit; "Meliẓat Iḳre al-Lubad" (?); "Al-Isti'anah"; "Al-Istibṣar," on the precepts ("Sefer ha-Miẓwot"), a fragment of which, comprising the laws of inheritance and purity, is still extant (Brit. Mus. Or. 2567). The laws concerning the festivals were translated into Hebrew by Tobiah ben Moses, under the title "Sefer ha-Mo'adim." They are divided into eight chapters, in which Joseph discusses the arguments used by Samuel ben Ḥofni against the Karaites in regard to the neomenia and the celebration of the Feast of the First Fruits. Harkavy supposes that these arguments were discussed also in another work of Joseph's entitled "Kitab al-Hidayah." Joseph is supposed to have been the author also of: "Ẓidduḳ ha-Din," on eschatology; "She'elot u-Teshubot" (Arabic, "Mas'ail wa-Jawa'ib"), containing thirteen philosophical questions addressed to Jewish and non-Jewish scholars; "Peri Ẓaddiḳ," a chapter on theodicy.

His Influence on Karaism.

Joseph was considered one of the greatest authorities among the Karaites. To him was due the reform introduced in the laws of incest (" 'arayot "), he having been the first to protest against exaggerations of the scope of the hermeneutic rule of analogy ("heḳesh") by which the successors of Anan had prohibited intermarriage between the most distant relatives. His philosophical system was adopted by all his Karaite successors down to Aaron ben Elijah of Nicomedia, who, in his " 'Eẓ Ḥayyim," cites him often. In this field, however, Joseph has no claim to originality, for he only reproduced the "kalam" of the Motazilites, and his main work, the "Muḥtawi," but for the few Biblical quotations contained therein, might have been signed by any Moslem.

Joseph discussed only the general questions of monotheism, which are the common ground of both Jews and Mohammedans, and carefully avoided those on which Jews and Mohammedans are divided, as, for instance, the question whether the Mosaic law has been abrogated. The value of his works lies only in the information they furnish concerning the "Kalam" of the Motazilites. It is probable that in representing the Karaite theologians as Mutakallamin ("Moreh," lxxi.) Maimonides alluded to Joseph.

K. I. BR.

JOSEPH BEN AḤMAD IBN ḤASDAI: Egyptian physician and medical writer; lived in Cairo at the beginning of the twelfth century. Although his biographer, Ibn Abi Uṣaibi'ah, does not affirm his Jewish descent, there is no doubt that Joseph belonged to the Judæo-Spanish family of Ḥasdai. Early in life he went to Egypt, where he found a protector in the vizier Ma'mun Abu 'Abd Allah ibn Nur al-Daulah al-'Amiri. Joseph carried on a scientific correspondence with the Arabic philosopher Avempace (Ibn Baja). He was the author of the following works: "Al-Sharḥ al-Ma'muni," commentary on Hippocrates' work on the oath ("Kitab al-Iman"); "Sharḥ al-Fuṣul," commentary on the first book of Hippocrates' "Aphorisms"; "Ta'aliḳ"; "Fawa'id," extracts from Ali ibn Riḍwan's commentary on Galen's work on nature; "Al-Ḳaul 'ala Awwal al-Ṣina'ah al-Ṣaghirah," on Galen's first book of "Ars Parva"; "Al-Ajmal," on logic, with notes.

G. I. BR.

JOSEPH THE APOSTATE: Jewish convert to Christianity in the first half of the fourth century. He was one of the assessors of the rabbinical school of the patriarch Judah III. at Tiberias, and in this capacity was sent as delegate to the Jewish communities of Cilicia. There he associated with the Christian bishop, by whom he was induced to read the New Testament. While engaged in reading he was surprised by some Cilician Jews who suspected his orthodoxy. Joseph then publicly acknowledged his conversion to Christianity. On his return to Palestine his zeal for his new faith took the form of persecuting his former coreligionists. He thereby won the favor of the ecclesiastical dignitaries, such as Epiphanius and Eusebius. They were especially impressed by the wonderful tales he related concerning the progress Christianity was making among the Jews. According to him, all the enlightened Jews nourished a secret predilection for Christianity; the patriarch himself, under the pretext of obtaining medical advice, had invited to his house a bishop of the neighborhood of Tiberias. Joseph's zeal did not remain without reward. At the recommendation of Eusebius the emperor Constantine elevated Joseph to the rank of comes, a dignity which conferred upon its holder an immunity from punishment for any violation of the law.

JOSEPH BEN ARDUT. See NASI, JOSEPH.

JOSEPH OF ARIMATHÆA: Wealthy Jew (probably a member of the Essene fraternity) who, out of sympathy with Jesus, gave him burial in one of the tombs cut in the rocks near the city of Jerusalem. The story is told with some variations in all the Gospels, but in the simplest form in Mark (xv. 42 *et seq.*). According to Mark, Joseph was a member of the Sanhedrin, of noble birth, and belonged to those who "waited for the kingdom of God" (or for the Messiah): that is to say, he was one of the Essenes (comp. Luke ii. 25, 38; Pesiḳ. R. xxxiv.-xxxvii.). He asked Pilate for the body of Jesus, which he placed in a tomb newly hewn in the rocks near the city of Jerusalem. Luke xxiii. 50 *et seq.* represents him as having been a member of the Sanhedrin which, under the presidency of Caiaphas, condemned Jesus, but as not having given his consent to the conviction. In Matt. xxvii. 57 *et seq.* his (Essene) hope for the Messiah is transformed into a discipleship of Jesus, and the tomb in which he buries Jesus is represented as having been his own new tomb, hewn out for himself. In John xix. 38 Joseph is represented as acting in conjunction with NICODEMUS, another prominent and pious Jew, and called "a ruler of the Jews," the two together burying Jesus in a tomb just hewn out in the place where Jesus had been crucified.

Arimathæa, the birthplace of Joseph (called "Ramathem" in I Macc. xi. 34), is the same as the Ramathaim-zophim of I Sam. i. 1, spoken of in Targum Yerushalmi: "Ramata, where the pupils of the prophets [seers] reside" (comp. Meg. 14a). In fact, Ramah, or Bet Ramata, was, according to Ab. R. N. xii. (see ed. Schechter, p. 56), the seat of a Hasidæan colony. Like Simeon and Anna (Luke ii. 25, 36), Joseph (perhaps the leader of an Essene colony near Jerusalem) was claimed for nascent Christianity, as was Nicodemus (comp. "Nicodemus" in Cheyne and Black, "Encyc. Bibl."). Possibly the well-known passage Isa. liii. 9—"He made his grave with the wicked, and with the rich in his death"—led to Matthew's story of Jesus' burial in the tomb of the wealthy Joseph (see Weiss, "Das Leben Jesu," ii. 592).

According to the later Gospel of Nicodemus (xii.), Joseph was imprisoned by the Jews on Friday evening shortly before the Sabbath; but when they went to release him, he was gone, though the gate had been sealed and the key was in the possession of Caiaphas. Another legend sends him to Great Britain as one of the Seventy Apostles, to erect there the first oratory; and out of the staff which stuck in the ground as he stopped to rest himself on the hilltop there grew, they say, a miraculous thorn, said still to grow and bud every Christmas-Day. Out of these legends grew another, connecting Joseph of Arimathæa with the legend of the Holy Grail. The vessel from which Jesus had eaten at the Last Supper Joseph is said to have held in his hand when he took down Jesus' body; and drops of the blood that was still running from his wounds fell into the vessel and endowed it with transcendent thaumaturgic properties. It sustained Joseph's life in prison during forty-two years and instructed him in heavenly knowledge.

JOSEPH OF ARLES: French Talmudist and cabalist of the sixteenth century. A letter signed "Joseph ריליׅ" (= "of Arles") is found among the halakic decisions of Menahem Carmi, written in 1584 (Almanzi collection). Joseph is identical with Joseph מארלי, who, in a letter addressed about 1560 to Immanuel di Cropulo, complains of the publication of the Zohar, on the ground that those who are hardly able to explain a Biblical verse allow themselves to draw conclusions which are harmful to religion. According to him the Zohar made its appearance in the eleventh century. Joseph's letter was included by Judah Modena in his "Ari Nohem" (ch. xxx.). Joseph was the author of a work on gematriot, fragments of which are found in the Almanzi collection (No. 140, 4).

JOSEPH DE AVILA. See ZOHAR.

JOSEPH BEN BARUCH: Tosafist of the twelfth and thirteenth centuries. Gross identifies him with Joseph of Clisson. Joseph resided for some time in Paris, where he associated with Judah Sir Leon and instructed Samuel of Falaise in special subjects.

In 1211 he emigrated with his brother Meïr to Palestine by way of Egypt. It was probably Joseph who took to England the Hebrew translation of the "Cuzari" which had been made by Judah CARDINAL. Judah al-Ḥarizi met Joseph and his brother as heads of the new congregation of Jerusalem ("Taḥkemoni," xlvi.). Joseph is cited in the Tosafot as "Joseph of Jerusalem" (Pes. 15a), "Joseph, inhabitant of Jerusalem" (Meg. 4a), and "R. Joseph of Palestine" (Ḳid. 34a). Explanations of his are quoted by Bezaleel Ashkenazi in his "Shiṭṭah Meḳubbeẓet," and in various commentaries on the Pentateuch. To Joseph of Clisson are attributed consultations ("Maimoniyyot," קניין, No. 31) and divers ritual decisions (Mordecai on Ḥul. iii., No. 635; *idem* on Giṭ. iv., No. 465). Joseph was also the author of liturgical poems; a confession of sins for the Day of Atonement written by him, beginning with אבואה בתחנון, has been preserved in the ritual.

He is referred to as "Joseph קאינון" in a manuscript tosafist commentary to the Pentateuch belonging to E. N. Adler; but in the parallel passages in "Minḥat Yehudah," 21b, "Da'at Zeḳenim," 20b, and "Hadar Zeḳenim," 18a, he is cited as "the man of Jerusalem." Berliner ("Zeit. für Hebr. Bibl." iv. 148) identified him with Joseph b. Johanan the Jerusalemite (see Gross in "Monatsschrift," xlv. 370).

JOSEPH AL-BAṢIR. See JOSEPH BEN ABRAHAM HA-KOHEN.

JOSEPH BEKOR SHOR. See JOSEPH BEN ISAAC BEKOR SHOR.

JOSEPH BEN BERECHIAH: Rabbi of Kairwan and a pupil of Jacob bar Nissim; flourished in the tenth century. He carried on a scientific correspondence with Hai Gaon, whom he consulted on halakic decisions, among which was that on the Tetragrammaton published among the Gaon's responsa by Eliezer of Tunis in the "Ṭa'am Zeḳenim" (p. 54b). Joseph is mentioned in the letter of Ḥushiel ben Hananeel published by S. Schechter in the "Jewish Quarterly Review" (1899, p. 643).

JOSEPH CASPI. See CASPI, JOSEPH.

JOSEPH OF CHARTRES (called also **Joseph b. Asher**): French elegiac poet; born in the second half of the twelfth century (Zunz ["Literaturgesch." p. 470] says that he flourished about 1200–10); brother-in-law of Joseph b. Nathan of Etampes, and great-uncle of the author of "Joseph le Zélateur." The latter reports in that work (No. 24) a discussion which Joseph had with an ecclesiastic. "A monk asked R. Joseph of Chartres why God had manifested Himself in a bush rather than in a tree. Joseph answered: 'Because it is impossible to make an image [crucifix] thereof.'"

Joseph was a disciple of R. Tam and of Rashbam. He is cited in the "Semag" of Moses of Coucy (Prohibition 113) in connection with the ordinance forbidding the descendants of Ammon and of Moab to enter the Jewish community. He composed an elegy commencing with the words אלהים בעלונו, on the massacre of the Jews of York, England, in 1191. He is doubtless identical with the Bible commentator Joseph me-Karṭesh, erroneously called "Joseph me-Ḳarpenṭras" (of Carpentras) in the "Semag" (*ib.*) and the "Minḥat Yehudah" (p. 78b). According to a happy conjecture by Gross ("Gallia Judaica," p. 604), the mathematician Joseph מקיירון, mentioned in the "Minḥat Yehudah" (p. 4a), is identical with Joseph of Chartres; קיירון designating not the locality of Charon, as Zunz ("Z. G." p. 98) and Renan ("Les Rabbins Français," p. 441) believe, but that of Chartres, being a corruption which should be changed to קרטרש, or rather קרטרן, *i.e.*, "Chartrain," the ancient name of the county of Chartres.

G. S. K.

JOSEPH OF CHINON: French Talmudist; lived about the middle of the thirteenth century. According to Zunz, Joseph was a son of Nathanael the Holy, but Gross points out that this was not the case. He is quoted in "Minḥat Yehudah" (Renan-Neubauer, "Les Rabbins Français," p. 441) and in the responsa of Solomon ben Adret.

Joseph is better known through the reputation of his three sons than through his own. These three, Eliezer, Nathanael, and Jacob, it has been supposed, suffered martyrdom at the same time in Chinon; but this, according to Gross, is not probable, because Nathanael did not live in Chinon at that time.

JOSEPH OF CLISSON. See Joseph ben Baruch.

JOSEPH, DAVID: German architect; born July 4, 1863, at Königsberg, eastern Prussia; educated at the gymnasium of his native town and at Gnesen, at the Technische Hochschule and the University of Berlin, and at the University of Heidelberg, passing his examination as architect in 1888. In the same year he established himself as architect in Berlin. In 1894 he received the degree of doctor of philosophy from Heidelberg University, and was admitted to the Humboldt Akademie in Berlin as privat-docent. Two years later he received the "venia legendi" at the University of Ghent, and became professor of archeology and the history of art at the New University and Polytechnic School at Brussels. He resigned his chair in 1898, and, returning to Berlin, resumed the profession of architect. He also became chief editor of the "Internationale Revue für Kunst, Kunstgewerbe und Technik" in Berlin.

Joseph is a prolific writer. He has contributed many essays to "Literarischer Merkur" (1885 and 1886); "Der Bau" (vols. ii. *et seq.*); "Deutsche Bauzeitung" (vols. xxix. *et seq.*); "Der Bär" (vols. xxi. *et seq.*); "Repertorium für Kunstwissenschaft" (vols. xviii. *et seq.*); "Centralblatt der Bauverwaltung" (vols. xv. *et seq.*). He is the author also of: "Die Paläste des Homerischen Epos, mit Rücksicht auf die Ausgrabungen Heinrich Schliemanns," Berlin, 1895 (2d ed. 1895); "Architektonische Meisterwerke in Deutschland, Belgien, Holland, und der Schweiz," *ib.* 1896; "Bibliographie de l'Histoire de l'Art de la Première Renaissance (Trecento et Quattrocento) en Italie," Brussels, 1898; "Stiftshütte, Tempel- und Synagogen-Bauten," Berlin, 1902; "Geschichte der Baukunst vom Altertum bis zur Neuzeit," 2 vols., Berlin, 1902; "Architekturdenkmäler von Rom, Florenz, Venedig," Leipsic, 1904.

S. F. T. H.

JOSEPH DAVID: Rabbi of Salonica; flourished in the first half of the eighteenth century; contemporary of Solomon Amarillo and Joseph Covo I. According to Azulai ("Shem ha-Gedolim," i.), Joseph David, "the Saint," was the chief rabbi of Salonica; if so, he must have officiated between Amarillo and Covo. He was the author of: "Bet Dawid," halakic novellæ on the four Ṭurim (Salonica, 1740–46); "Yeḳara de-Shikbe," sermons (*ib.* 1774); "Ẓemaḥ Dawid," a homiletic commentary on the Pentateuch, with rules for preaching (*ib.* 1785–1811); "Batte Abot," a commentary on Abot (*ib.* 1825).

Bibliography: Zedner, *Cat. Hebr. Books Brit. Mus.* p. 354.

S. S. M. Sel.

JOSEPH BEN DAVID HEILBRONN OF ESCHAU: German Masorite; lived at The Hague in the eighteenth century. He was the author of "Sefer Mebin Ḥidot" (Amsterdam, 1765), an important work on the Masorah, with an appendix containing a reply to a criticism of Asher Worms. Joseph edited, under the title "Seder Tefillot li-Yeme Simḥat Torah" (*ib.* 1769), prayers for the feast of Simḥat Torah and other occasional prayers.

D. I. Br.

JOSEPH BEN DAVID HA-YEWANI (= "the Greek"): Greek grammarian and lexicographer; flourished at the end of the thirteenth or about the middle of the fourteenth century. He was the author of a still unpublished work entitled "Menorat ha-Ma'or," a Hebrew lexicon preceded by a short grammar, the latter being dedicated to a certain Elijah b. Hananeel ha-Levi. The lexicon reached no further than the root חשב. Joseph often quotes Judah Ḥayyuj, Ibn Janaḥ, Rashi, Ḳimḥi, Abraham ibn Ezra, and others; but Saadia, Sherira, and Hai are quoted less frequently. He quotes also the poets, as Moses ibn Ezra and Judah ha-Levi, giving occasionally some of their verse. In his grammar Joseph explains allegorically the forms of the Hebrew letters, using chiefly Judah ibn Matḳah's "Midrash ha-Ḥokmah"; and he complains of the indifference with which Hebrew grammar was regarded by the Jews. Extracts from the lexicon were published by Dukes in "Orient, Lit." (xi. 173, 183, 215), but Dukes erroneously placed Joseph at the beginning of the thirteenth century, though the "Midrash ha-Ḥokmah" quoted by Joseph was first written in Arabic in the middle of the thirteenth century (see Ibn Matḳah). The sale-contract at the head of the manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1485) is dated 1649 Seleucidan era (=1337 C.E.). Both Benjacob ("Oẓar ha-Sefarim," p. 338, No. 1442) and Fürst ("Bibl. Jud." ii. 168) confounded the author of the "Menorat ha-Ma'or" with Joseph b. Moses Kalti, a Greek of the second half of the fifteenth century, and author of a treatise on logic entitled "Minḥat Yehudah" (still unpublished; comp. Zunz, Notes to Benjamin of Tudela, ed. Asher, ii. 29).

T. M. Sel.

JOSEPH DAVID BEN ẒEBI: Russian rabbi and author; born in Zetil, government of Grodno, 1767; died in Mir, government of Minsk, 1846. He was the grandson of the rabbi of Zetil and son-in-law of R. Moses of Kletzk. At an early age he was appointed rabbi of his native city, and at twenty-six he received a call to the rabbinate of Mir. Young men came from many places to attend his yeshibah, and hundreds of them were ordained by him as rabbis.

Joseph David wrote novellæ, some of which are incorporated in the book "Nir Dawid" by his pupil R. Mordecai Rabinowitz, while a responsum by him is to be found in "Galya Masseket" by R. David of Novogrodek.

Bibliography: Eisenstadt-Wiener, *Da'at Ḳedoshim*, p. 23; M. Rabinowitz, *Toledot Ẓaddiḳ*, in *Gan Peraḥim*, part i., Wilna, 1882.
S. S. N. T. L.

JOSEPH OF DREUX: French Talmudist of the first half of the thirteenth century. His name occurs in a manuscript in the British Museum collection of commentaries on the Pentateuch (MS. Brit. Mus. Add. No. 22,092; see Geiger's "Jüd. Zeit." ix. 231). Gross takes him to be a son of Solomon of Dreux, in the present department of Eure-et-Loire, and identical with the Bible commentator Joseph of רדום (which is a misspelling of דרום = "Dreux"), who is mentioned in a manuscript of "Minḥat Yehudah" (Renan-Neubauer, "Les Rabbins Français," p. 441). Gross states also that this Joseph ben Solomon corresponded with Isaac ben Abraham of Dreux.

Bibliography: Gross, *Gallia Judaica*, p. 173.

JOSEPH OF GAMALA: Son of a midwife (Josephus, "Vita," § 37). With Chares he incited the inhabitants of Gamala to revolt against Agrippa, and hence also against the Romans, in 66 C.E. (Josephus, "B. J." iv. 1, § 4). When the Romans took the city, Joseph was killed (66 C.E.).

Bibliography: Grätz, *Gesch.* 4th ed., iii. 481, 500.
G. S. Kr.

JOSEPH BEN GORION (JOSEPHUS GORIONIDES; referred to also as Yosippon and Pseudo-Josephus): Author of the "Sefer Yosippon," a history of the Jews from the time of the destruction of Babylon (539 B.C.) to the downfall of the Jewish state (70 C.E.), with historical accounts of Babylonia, Greece, Rome, and other countries. In the current text the author professes to be the old Greek historian Flavius Josephus, giving to the name "Joseph" the Greek ending "on" ("Josephon," "Joseppon," or "Josippon" [יוסיפון]. His Arabic name "Yusibus" is, according to Wellhausen, identical with "Egesippus"). A gloss gives the form גושיפוש, from the Italian "Giuseppe." Down to the eighteenth century, his work was universally known as the "Hebrew," or the "smaller, Josephus" as contrasted with the work now commonly known under the name of Josephus and written in Greek. It is generally held that the work was composed by a Jew living in southern Italy. Scaliger and Zunz believed that he lived in the middle of the ninth century; but Zunz later modified his view, placing the date at 940. The Mohammedan writer Ibn Ḥazm (d. 1063) was acquainted with the Arabic translation of the "Yosippon" made by a Yemen Jew, and Chwolson believes therefore that the author of the "Yosippon" lived at the beginning of the ninth century. No Jewish author mentions this chronicle before Dunash ibn Tamim (10th cent.), and even the passage in Dunash supposed to refer to the "Yosippon" does not certainly do so. Trieber holds the singular view that the author lived in the fourth century.

Date of the "Yosippon."

Commencing with Adam and the geographical conditions of the first millennium, the author passes to the legendary history of Rome and Babylon, to the accounts of Daniel, Zerubbabel (according to the Apocrypha), the Second Temple, and Cyrus, and to the histories of Alexander the Great and his successors. He then gives the history of the Jews down to the destruction of the Temple. The last part contains, among other things, a brief history of Hannibal and an account of the coronation of an emperor, which, according to Basnage ("Histoire des Juifs," vii. 89, Paris, 1710), refers to that of Otto the Great (crowned 962); this would be the only and a most valuable source of information concerning this event. If Basnage's conjecture is correct, the date of the composition of the "Yosippon" may be placed at the end of the tenth century. The "Yosippon" is written in comparatively pure Biblical Hebrew, shows a predilection for certain Biblical phrases and archaisms, and is rich in poetical passages and in maxims and philosophical speculations.

By the Jews of the Middle Ages the "Yosippon" was much read and was highly respected as a historical source. Scaliger in his "Elenchus Trihæresii Nicolai Serarii" was the first to doubt its worth; Jan Drusius (d. 1609) held it to be historically valueless on account of its many chronological mistakes; Zunz and Delitzsch have branded the author as an impostor. In fact, both the manuscripts and printed editions are full of historical errors, misconceptions of its sources, and extravagant outbursts of vanity on the part of the author. But there is scarcely any book in Jewish literature that has undergone more changes at the hands of copyists and compilers; Judah Mosconi knew of no less than four different compilations or abridgments. The later printed editions are one-third larger than the editio princeps of Mantua.

It was perhaps due to Jerahmeel ben Solomon that the work received its traditional title "Yosippon." He supplemented his copy from Josephus, whom he designates as "the great Joseph," or, according to a gloss, "the Gentile Joseph" (יוסיפון שלנוצרים; Wolf, "Bibl. Hebr." i. 521; Neubauer, "M. J. C." i. 20); a copyist, however, considered the Hebrew work (יוסיפון העברי)from which he copied to be an abridged Josephus (יוסיפון מינור). The original title of the work, according to Trieber, was probably "History of Jerusalem" (as in ed. Mantua, p. 133a), or, as a manuscript suggests, "History and Wars of the Jews." It is quoted in the Hebrew-Persian dictionary of Solomon ben Samuel (14th cent.), under the title "History of the Second Temple" (דברי הימים בית שני; see Bacher in Stade's "Zeitschrift," xvi. 242; *idem* in "R. E. J." xxxvii. 143 *et seq.*; Fränkel in "Monatsschrift," xliii. 523).

Sebastian Münster's edition (Basel, 1541) omits as not genuine the legendary introduction (ch. i.–iii.) with its genealogical list (which addition, however,

Literary Criticism of the Work.

was made as early as the twelfth century; see Abraham ibn Ezra on Psalm cx. 5; David Ḳimḥi, "Sefer ha-Shorashim," *s.v.* משך), and also ch. lxvii. to the end, narrating the expedition of Vespasian and Titus against Jerusalem. Azariah dei Rossi also recognized that the Alexander romance of Pseudokallisthenes in a Hebrew translation had been smuggled into the first edition; and, following David Ḳimḥi, Rapoport showed that the last chapter belonged to Abraham ibn Daud (see Ḳimḥi on Zech. xi. 14; also "Sefer ha-Shorashim," *s.v.* חבל). Zunz has shown many other portions of the work to be Spanish additions, made in the twelfth century. Almost the whole account of Alexander and his successors has been proved by Trieber to be of later origin. According to that critic, the part of the work original with its author ended with ch. lv. (the dedication of Herod's Temple), more or less of the remainder being taken from Hegesippus, and perhaps added as early as the fifth century. This would explain the numerous contradictions and style-differences between these two parts. There remains, as the nucleus of the whole chronicle, a history of the Second Temple, beginning with the apocryphal stories concerning Daniel, Zerubbabel, etc., and finishing with the restoration of the Temple under Herod. A copyist of HEGESIPPUS, however, identified the "Joseph ben Gorion" (Josephum Gorione Genitum), a prefect of Jerusalem, mentioned in iii. 3, 2 *et seq.*, with the historian Josephus ben Mattithiah, at this time governor of the troops in Galilee. This may account for the fact that the chronicle was ascribed to Joseph b. Gorion. Wellhausen, agreeing with Trieber, denies that the genuine part has any historical value whatever. Trieber contends that the author did not draw his information directly from Josephus or from the Second Book of Maccabees, as is usually believed, and as Wellhausen still maintains. He believes that both II Maccabees and the "Yosippon" used the work of Jason of Cyrene, and Josephus and the "Yosippon" that of Nicholas of Damascus. A study of the "Yosippon" would reveal the manner in which Josephus and II Maccabees used their sources. Apart from the Chronicle of Panodorus, which was largely used by the interpolators, the work in its original, as well as in its later form, seems to have been influenced by other sources, hitherto unascertained. Further light may in the future be thrown upon the subject by a more extended criticism of the text.

EDITIONS: (1) The first edition of the "Yosippon" was published in Mantua by Abraham Conat (1476-79), who also wrote a preface to it. Other editions are: (2) Constantinople, 1510; arranged and enlarged, with a preface by Tam ibn Yaḥya ben David. It is borrowed to a great extent from that of Judah Leon ben Moses Mosconi (b. 1328), published in "Oẓar Ṭob," 1878, i. 017 *et seq.* (see Berliner's "Magazin," 1876, p. 153). The text in this edition is divided into ninety-seven chapters. (3) Basel, 1541; with a Latin preface, and a translation from the text of the editio princeps, by Sebastian Münster. The edition, however, contains only chapters iv. to lxiii.; the remaining chapters have been translated into Latin by David Kyberus ("*Historia Belli Judaici,*" in *De la Bigne's* "*Bibliotheca Patroni,*" Paris). (4) Venice, 1544; reprinted from the Constantinople edition, as were all the following editions. (5) Cracow, 1588 and 1599. (6) Frankfort-on-the-Main, 1689. (7) Gotha, 1707 and 1710; with Münster's preface and a Latin translation and notes by Friedrich Breithaupt. Other editions appeared at Amsterdam (1723), Prague (1784), Warsaw (1845 and 1871), Jitomir (1851), and Lemberg (1855; see Steinschneider, "Hebr. Bibl." xi. 62).

TRANSLATIONS AND COMPILATIONS: A Judæo-German translation, with excellent illustrations, was published by Michael Adam (Zurich, 1546; Prague, 1607; Amsterdam, 1661); it was later revised by Menahem ben Solomon ha-Levi, and published under the title "Keter Torah" (Amsterdam, 1743). Another Latin translation, with Tam ibn Yaḥya's preface, was published by Joseph Gagnier (Oxford, 1706); a French translation of Kyberus' Latin supplement by F. de Belleforest was published in Genebrard's French translation of Fl. Josephus (Paris, 1609). The oldest extant abstract was made in southern Italy, about 1150, by Jerahmeel ben Solomon (see the fragments published by Neubauer—"M. J. C." i. 190; "J. Q. R." xi. 364—and the translation of a portion by M. Gaster—"The Chronicles of Jerahmeel," London, 1899). Another abstract, made in 1161 by Abraham ibn Daud and used as the third book of his "Sefer Seder ha-Ḳabbalah," was published (Mantua, 1513; Venice, 1545; Basel, 1580, etc.), with Münster's Latin translation, at Worms (1529) and Basel (1559). An English translation of this abstract was made by Peter Morvyn (London, 1558, 1561, 1575, 1608). A Judæo-German compendium by Edel bat Moses was published in Cracow in 1670; the oldest German extract, under the title "Joseppi Jüdische Historien" (author not known) is described in Wolf, "Bibl. Hebr." (iii. 389). Some short extracts, in German, are given in Zedner, "Auswahl aus Hebräischen Schriftstellern" (pp. 16 *et seq.*), and in Winter and Wünsche, "Die Jüdische Litteratur" (iii. 310 *et seq.*). For the Arabic and Yemenite translations, in which the author is called "Yusuf ibn Ḳaryun," see ZECHARIAH IBN SAID.

JOSEPH ḤAZZAN BEN JUDAH OF TROYES: French Talmudist and ḥazzan; flourished at Troyes about the middle of the thirteenth century. From quotations in "Minḥat Yehudah" (pp. 1b, 19b, 24a, 28a, 38a) it is known that he wrote a commentary on Ecclesiastes and a grammar, "Sefer Yedidot." In a Pentateuch manuscript (Neubauer, "Cat. Bodl." No. 25) are contained a few of his Masoretic notes. He wrote also a treatise on the calen-

JOSEPH, HENRY SAMUEL: English convert to Christianity; born in 1801; died at Strasburg, Alsace, Jan. 28, 1864. At first a preacher in the synagogue at Bedford, he became converted to Christianity and was ordained in 1839 as a literate in the Church of England, and afterward he became traveling secretary to the London Society for Promoting Christianity Among the Jews. From 1847 to 1856 he acted as chaplain to Chester Castle.

Joseph was the author of "Reasons for Embracing Christianity" (1834) and "Memoirs of Convicted Prisoners" (Chester, 1853).

JOSEPH BAR ḤIYYA: Gaon of Pumbedita from 828 to 833. In the controversy between Daniel and the exilarch David ben Judah, the gaon Abraham ben Sherira seems to have been deposed by one party and Joseph bar Ḥiyya, the "ab bet din," appointed gaon of Pumbedita. Abraham, however, by means of influential friends, regained his position, and Joseph was compelled to recognize Abraham's authority. Both nevertheless continued as geonim of the same school until, on the occasion of an annual meeting at Bagdad in the synagogue of Bar Nasla, Joseph, moved by the weeping of the congregation because of the dissensions between the heads of the school, rose and declared: "I herewith voluntarily renounce the office of gaon and resume that of ab bet din." Thereupon Abraham rose and blessed him, saying: "May God give you a share in the world to come." After Abraham's death (828) Joseph bar Ḥiyya became his legal successor and retained the office until his death in 833 (Letter of Sherira, in Neubauer, "M. J. C." i. 38). See GAON.

JOSEPH BEN IBRAHIM IBN WAḲAR. See IBN WAḲAR, JOSEPH BEN ABRAHAM.

JOSEPH BEN ISAAC BEKOR SHOR OF ORLEANS: French tosafist, exegete, and poet; flourished in the second half of the twelfth century; pupil of Jacob Tam, Joseph Caro, and Samuel ben Meïr (RaSHBaM). The identity of Joseph Bekor Shor and the tosafist Joseph ben Isaac of Orleans has been sufficiently demonstrated by Gross, who showed that the same explanations given in the Tosafot (Ḥul. 112b; Yeb. 25b, 36b) in the name of Joseph ben Isaac, are quoted in the "Semaḳ" (No. 205) and in Meïr of Rothenburg's Responsa (ed. Prague, No. 863) as those of Joseph Bekor Shor. Joseph was on very friendly terms with his teacher Jacob Tam, with whom he carried on a learned correspondence ("Sefer ha-Yashar," p. 71a). Besides tosafot on the greater part of the Talmud, he wrote a Biblical commentary marked by considerable acumen. Even more than Rashi, to whose exegetical school he belonged, he confined himself to literal interpretations ("peshaṭ"). Anticipating later Biblical criticism, he assumed the presence of duplicate narratives in the Bible; and he strove to give rational explanations to the miraculous stories. Thus he interprets "tree of life" (Gen. ii. 9) as "tree of healing," explaining that the fruit of the tree possessed the virtue of healing the sick, without, however, bestowing eternal life. In regard to the transformation of Lot's wife into a pillar of salt (Gen. xix. 26) he explains that, disbelieving in the destruction of Sodom and Gomorrah, she lingered on the road, and was overtaken by the rain of brimstone and fire, which are usually mixed with salt.

Well acquainted with the Vulgate and Christian Biblical exegesis, Joseph, in commenting on Psalm ii., cites Jerome, whose explanation of the word בר he criticizes. His commentary on the Pentateuch is still extant in manuscript in the libraries of Leyden and Munich. Part of it, on Genesis and Exodus, was published by Jellinek (Leipsic, 1855). Extracts from the remaining books were published by Berliner in "Peleṭat Soferim" (1872).

Joseph was the author also of a number of liturgical poems. Besides the short hymns in the style of Ibn Ezra with which he concludes each section of the commentary, he wrote the following seliḥot: ד' אליך עיני ישברו, believed by Zunz to have been written on the martyrs of Blois and Bray; אדון כתקח מועד (fourteen strophes); אדון רב העלילה (with two refrains—והשב and ושוב); אין לבנון די בער (fifteen strophes, ending with לה' אלהינו הרחמים והסליחות); אל אלהי האלהים ואדוני (fourteen strophes); אלהים ממכון שבתך (twenty-six strophes).

JOSEPH B. ISAAC OF CHINON: French tosafist; lived in the second half of the twelfth and at the beginning of the thirteenth century. He is mentioned as a prominent Talmudist in "Ha-Terumah" (ed. Zolkiev, No. 44) and in "Roḳeaḥ" (ed. Lemberg, p. 475). He is quoted in the Tosafot under the name of "Joseph" ('Ab. Zarah 67b). Joseph corresponded with the somewhat younger Judah Sir Leon of Paris. Some of his Talmudic decisions are quoted in "Or Zarua'" (ed. Jitomir, ii. 115a, 116a; ed. Jerusalem, 111) to B. B. 34. The last-cited decision, which is also included in the responsa of Meïr of Rothenburg, is addressed to Isaac b. Samuel of Dampierre, or Isaac the Elder.

works, and when in Prague was asked by Yom-Ṭob Lipman Heller to explain to him the "Moreh Nebukim." He then wrote "Gib'at ha-Moreh," containing criticisms on the "Moreh," published with annotations by Yom-Ṭob Lipman Heller, Prague, 1611. The work is divided into three parts: the first criticizing Maimonides' proofs of the existence of God; the second, on the negation of anthropomorphisms; and the third, on Maimonides' proofs of the unity of God. It is quoted by Joseph Delmedigo in his "Miktab Aḥuz," and was approved by Ephraim Lentschutz, Isaac Katz, and Mordecai Jaffe. In another work, entitled "Ketonet Passim" (*ib.* 1614), Joseph expounded the principles contained in the "Moreh."

JOSEPH ISRAEL. See JACOB BEN JOSEPH ISRAEL.

JOSEPH, JACOB: Russian-American rabbi; born at Krozhe, government of Kovno, Russia, 1848; died at New York July 28, 1902. He studied in the yeshibah at Volozhin under Hirsch Leib Berlin and Israel Salanter, and his aptness as a student won him the title "ḥarif" (= "sharp-witted"). He became successively rabbi of Vilon (1868), Yurburg (1870), and Zhagory, Kovno, and his fame as a preacher spread, so that in 1883 the community of Wilna selected him as its "maggid" (preacher).

In response to a call from a number of congregations in New York Joseph emigrated to the United States, and on July 8, 1888, was chosen chief rabbi of the Russian Orthodox communities of New York. His funeral (July 30, 1902), which was attended by more than 50,000 Jews, was marked by a public disturbance in which a number of persons were injured. He published "Le-Bet Ya'aḳob" (Wilna, 1888), a collection of homilies and novellæ.

JOSEPH BEN JACOB (known also as **Bar Saṭya** [סטיא]): Gaon of Sura about 930–936 and 942–948. He was chosen by the exilarch David ben Zakkai to fill the place of Saadia (*c.* 930) when the latter was deposed. In 936, however, when the exilarch became reconciled to Saadia, Joseph was deprived of his position, though the income attached to it continued to be paid to him. After Saadia's death (942) Joseph was reappointed gaon, which office he held until 948, when, on account of the impoverishment and general decadence of the Academy of Sura, he left for Bassora, where he died. See GAON.

JOSEPH BEN JACOB OF PINCZOW: Lithuanian Talmudist of the seventeenth century. He was a pupil of Ẓebi Hirsch, rabbi in Lublin. In 1687 he was rabbi at Kosowi, Russia, whence he was called to Syeltzy. In 1702, compelled to leave Syeltzy on account of the persecution of the Jews under the temporary rule of the Swedes, he went to Hamburg, where he remained until 1706. He returned to Syeltzy in that year, but in 1710 was compelled again to leave it by the outbreak of an epidemic. This time he went to Berlin, where he published his "Rosh Yosef," notes on various Talmudic treatises.

S. S. A. PE.

JOSEPH BEN JACOB IBN ẒADDIḲ (Arabic, **Abu Omar**): Spanish rabbi, poet, and philosopher; died at Cordova 1149. A Talmudist of high repute, he was appointed in 1138 dayyan at Cordova, which office he held conjointly with Maimon, father of Maimonides, until his death. Joseph was also a highly gifted poet, as is attested by Al-Ḥarizi (Kämpf, "Nichtandalusische Poesie," i. 13). Several of Joseph's religious poems are found in the Sephardic and African maḥzorim; and a poem addressed to Judah ha-Levi, on his visit to Cordova en route to Palestine, is included in the latter's diwan.

His Microcosmus.

Joseph's reputation rests, however, not on his rabbinical knowledge or his poetical abilities, but on his activity in the field of religious philosophy. In a short treatise written in Arabic (the title being probably "Al-'Alam al-Ṣaghir") and, according to Steinschneider, translated by Nahum ha-Ma'arabi into Hebrew under the title "'Olam Ḳaṭan," he expounds his views on the most important problems of theology. Though not an original thinker he shows himself to be thoroughly familiar with the philosophical and scientific literature of the Arabs, and imposes the stamp of his own individuality on the subjects treated. The "'Olam Ḳaṭan" comprises four main divisions, subdivided into sections. After stating the elementary and primary principles of the knowledge of God, the acquisition of which is the highest duty of man, and explaining how the human soul builds up its conception of things, Joseph treats, in the manner of the Arabic Aristotelians, of matter and form, of substance and accident, and of the composition of the various parts of the world. He concludes the first division with the central idea from which the book is evolved, namely, the comparison between the outer world (macrocosm) and man (microcosm), already hinted at by Plato ("Timæus," 47b), and greatly developed by the Arabian encyclopedists known as "the Brethren of Sincerity," by whom Joseph was greatly influenced.

Conceptions of the higher verities are to be attained by man through the study of himself, who sums up in his own being the outer world. Joseph therefore devotes the second division of his work to the study of physical and psychological man. There is nothing in the world, he holds, that does not find a parallel in man. In him are found the four elements and their characteristics; for he passes from heat to cold, from moisture to dryness. He participates in the nature of minerals, vegetables, and animals: he comes into being and passes out of being like the minerals; nourishes and reproduces himself like the plants; has feeling and life like the animals. Further, he presents analogies to the characteristics of things: his erect figure resembles that of the terebinth; his hair, grass and vegetation; his veins and arteries, rivers and canals; and his bones, the mountains. Indeed, he possesses the characteristics of the animals: he is brave like a lion, timid like a hare, patient like a lamb, and cunning like a fox.

From the physical, Joseph passes on to deal with the psychical man. Man, he says, is made up of three souls, vegetative, animal, and rational. Of these the rational soul is the highest in quality: it is of a spiritual substance; and its accidents are equally spiritual, as, for instance, conception, justice, benevolence, etc. Imbecility, injustice, malice, etc., are not accidents, but are negations of the accidents of conception, justice, and benevolence. Thus from the knowledge of his physical being man derives his conception of the material world; from that of his soul he acquires his conception of the spiritual world; and both of them lead to the cognizance of the Creator.

His Theological Views.

The third division deals with the doctrine of God, the divine attributes, and similar theological problems. Like Saadia and Baḥya, though more precisely and more systematically, Joseph proves the creation of the world (and consequently the existence of a Creator) from its finiteness. He criticizes the theory of the Motekallamin (as expounded in the "Maḥkimat Peti" of Joseph ha-Ro'eh), who assert that the world was produced by the created will of God. For him the will of God has existed from all eternity, and can not be separated from the essence of God. He claims that creation is timeless, and that before the production of the spheres time did not exist.

From the notion of the existence of God results the conception of the uniqueness of God; for the supposition of a plurality in His essence would nullify the notion of His existence. What the unit is to other numbers—forming and embracing them, yet still differing from them in essence—God is to the created beings. With the doctrine of the unity of God is connected the doctrine of the divine attributes. Here Joseph is in advance of his predecessors Saadia and Baḥya; and, like Maimonides, he concludes that no positive attributes, whether essential or unessential, can be posited of God, who is indefinable.

His Ethics.

The fourth division deals with the duties of man, reward and punishment, and resurrection. Man must serve God with all his heart, and carry out all His precepts, though, owing to the weakness of his intellect, he may not grasp the reason for some of them. With Plato, Joseph says that man ought to know three things: (1) that there is a Creator who protects all and disposes of everything; (2) that nothing can be hidden from God; (3) that man can not win the favor of God by sacrifices, but must gain it by good deeds. Joseph asserts man's free will, without which there could be no reward or punishment (see Free Will); and he follows Saadia in the solution of the problem of God's prescience. The inequality in the distribution of worldly goods, the transitoriness of the world, the relativeness of the happiness procured by worldly goods, are for Joseph so many proofs that reward and punishment can take place only in the next world. He argues against the doctrine of bodily resurrection in the Messianic time. Though not himself a Motazilite, Joseph accepted a number of Motazilite theories and views (Schreiner, "Der Kalam," p. 27).

The "'Olam Ḳaṭan" was little studied in the Middle Ages, and is very rarely quoted. Although paying a high tribute to Joseph's learning, Maimonides, in his letter addressed to Samuel ibn Tibbon ("Pe'er ha-Dor," p. 28b), acknowledges that he has never seen the work, in which, he believes, are expounded the teachings of "the Brethren of Sincerity." The "'Olam Ḳaṭan" is cited by David Ḳimḥi, Jedaiah Bedersi, Meïr ibn Aldabi, Isaac ibn Laṭif, and by the author of "Ma'amar Haskel." It was edited for the first time by A. Jellinek at Leipsic in 1854. A critical edition was published by S. Horovitz in the "Jahresbericht des Jüd.-Theol. Seminars," Breslau, 1903. Joseph was the author also of an Arabic work on logic, entitled "Al-'Uyun wal-Mudhakarat," quoted in the "'Olam Ḳaṭan."

G. I. Br.

JOSEPH BEN JOHANAN: French rabbi of the fourteenth century. He was a native of Treves (טריויש, read by Carmoly "Troyes"), and seems to have been the first to adopt "Treves" as a family name. He is called also "the Great" ("ha-Gadol"), owing to his erudition. He emigrated to France in 1306, and in 1343 he was rabbi of Marseilles, where he was prominent in a decision concerning the marriage law (Isaac de Lattes, Responsa, ed. Vienna, p. 88). Isaac b. Sheshet (Responsa, Nos. 271–272) speaks of Joseph as "the ornament of the wise men, the crown of the ancients."

Joseph's wife, also, was very learned in the Talmud; and a decision by her has been preserved by Simeon b. Ẓemaḥ Duran (Responsa, iii., No. 78). In 1363, when as a widow she was living in Paris, where her son Mattithiah was rabbi, she was excused from wearing the Jewish badge ("Ordonnances des Bois de France," v. 498).

G. M. Sel.

JOSEPH B. JOSHUA B. LEVI: Amora of the third century; educated by his father (Shab. 68a; Ber. 8b; Yeb. 9a). He was the son-in-law of Judah ha-Nasi; and therefore his father, Joshua b. Levi, did him the honor to rise at his approach, in order to show his (Joshua's) esteem for the house of the patriarch (Ḳid. 33b).

Once Joseph was at the point of death, and fancied he had a glimpse of the mysteries of the world beyond. When he awoke from his vision he declared he had seen the highest abased and the lowest exalted, implying the existence of a world in which men are judged according to standards far different from earthly ones. There he had also heard the greeting: "Blessed is the man who came here with his Talmud [that is, with the proof of his devotion to the study of the Torah] in his hands" (Pes. 50a).

JOSEPH BEN JOSHUA BEN MEÏR HA-KOHEN: Historian and physician of the sixteenth century; born at Avignon Dec. 20, 1496; died at Genoa in 1575 or shortly after. His family originally lived at Cuenca, then at Chuete, Spain; when the Jews were expelled from Spain it settled at Avignon. At the age of five Joseph left Avignon with his father and went to Genoa, where they remained until 1516; driven from that city, they went to Novi, but returned to Genoa in 1538, where Joseph practised medicine for twelve years. On June 3, 1550, he and all his coreligionists there were driven from Genoa as a consequence of the rivalry of the non-Jewish physicians. Joseph then settled at Voltaggio, at the request of the citizens of that small town, practising there down to 1567. When the Jews were driven out of the territory of Genoa, he went to Costeletto (Montferrat), where he was very well received; in 1571 he was again established at Genoa, where he died.

Joseph ha-Kohen had three sons (Joshua, Isaac, Judah) and two daughters. He was highly regarded, not only as historian and physician, but also for the interest he took in all Jewish matters. One of his chief concerns was the release of the many Jewish captives taken by the vessels of the Italian republics and by the Corsairs; as in 1532, when André Doria captured many Jews on taking Coron, Patras, and Zante; in 1535, when the emperor Charles V. took Tunis; in 1542, when the galleys of Cegala Visconti had imprisoned a number of Jews.

In Hebrew literature Joseph ha-Kohen achieved prominence by two great historical works. The first of these, "Dibre ha-Yamim le-Malke Ẓarfat we-'Oṭoman," is in the nature of a history of the world, in the form of annals, in which he represents the sequence of events as a conflict between Asia and Europe, between Islam and Christianity, the protagonist for Islam being the mighty Turkish empire, and for Christianity, France. With these two great groups he connects European history, beginning with the downfall of the Roman empire. The work was completed Nov., 1533, printed the next year at Venice, and reprinted at Amsterdam in 1733; parts were translated into German and French; the entire work was issued in English, but badly translated, by Bialloblotzky.

Joseph was a careful historian. He gathered his facts from all possible sources, made notes, kept registers, and conducted a wide correspondence. He added continually to the first redaction of his works, carefully dating each one. Of the "'Emeḳ" he made, or caused to be made, at least nine copies; of the "Book of India," at least five. His work is valuable also on account of its brilliant narrative, excellent characterization, and fine Biblical style. Having lived in Italy from his childhood and become acquainted with persons prominent politically, he is a valuable source for the history of his time; concerning many events, he had closely examined competent witnesses. He also mentions a number of important facts ignored by other historians. He is less happy in the treatment of ancient history, for which he often was obliged to consult untrustworthy sources.

His Jewish Annals.

In writing his annals Joseph ha-Kohen at first intended to devote a special work to the great Jewish persecutions, with which he had become acquainted through then unused sources, and accounts of which he inserted in the annals. This idea he carried out, drawing upon Samuel Usque's "Consolaçam as Tribulaçoens de Ysrael" (1557), in his "'Emeḳ ha-Bakah," in which he dwells upon the sorrows and sufferings the Jews endured in various countries in the course of centuries. The book, which is a martyrology from beginning to end, closes with the 24th of Tammuz, 5335 (1575). The author's moderation and self-control are admirable. He does not make use either of the chronicle of Abraham ibn Daud or of those written by any of the other Judæo-Spanish chroniclers. Variants to the printed text will be found in "R. E. J." x. 248, xvi. 5.

Joseph ha-Kohen began this work in 1558, at Voltaggio, and concluded it, in its initial form, toward the end of 1563, the book circulating in Italy in manuscript. It was finally carried by the author down to 1575. M. Letteris has edited it with notes (Vienna, 1852), and M. Wiener has issued a German translation (Leipsic, 1858).

Joseph ben Joshua wrote also a Hebrew version, with the title "Meḳiẓ Nirdamim," of Meïr Alguadez's Spanish medical work giving prescriptions for the healing of various diseases; to these prescriptions he added some of his own (comp. Wolf, "Bibl. Hebr." iv. 853 *et seq.*; Steinschneider, in Berliner's "Magazin," x. 166; *idem*, "Hebr. Uebers." p. 775; *idem*, in "J. Q. R." xv. 137).

Other Works.

Less known is his work upon the New World ("Dibre ha-Yamim"). It contains a reference to Columbus (whom, however, he confounds with Amerigo); the work is very meager in its information (Harrisse, in "Centralblatt für Bibliothekswesen," 1888, p. 136). After writing it he became acquainted with Francisco Lopez de Gomara's "Historia General de las Indias" and Joan Boemus' "Omnium Gentium Mores Leges et Ritus." From these, in 1557, he compiled his "Maẓẓib Gebulot 'Ammim" (see Deut. xxxii. 6), a history of the conquest of Mexico, to which he added a full account of the discoveries of Columbus. A small work of a different kind was his "Peles ha-Shemot," written in 1561, containing an alphabetical list of Hebrew nouns, with Scripture illustrations of their occurrence given for the purpose of fixing their gender—a matter in which (as he says) "many writers in Hebrew erred." He also compiled, in 1567, a book of polite formulas to be used in addressing letters, and a large number of verses, which are found, written in his own hand, at the end of his works. A large number of letters, evidently meant to serve as models, are found in the MSS. Rabbinowicz, No. 129 (now in the library of the Alliance Israélite Universelle at Paris); two-thirds of these are by Joseph ha-Kohen; they give a good insight into his private life.

E. N.—G.

JOSEPH BEN JUDAH IBN 'AḲNIN (in Arabic, **Abu al-Hajjaj Yusuf ibn Yaḥya ibn Sham'un al-Sabti** [*i.e.*, "of Ceuta"] **al-Maghrabi**): Disciple of Moses Maimonides; born about 1160; died 1226. For the first twenty-five years of his life he lived with his father, who was an artisan at Ceuta in Maghreb. His youth fell in the period of the religious persecution of the Jews by the fanatic 'Abd al-Mu'min; and he had probably, like Maimonides and other Jews, to abstain from publicly practising any Jewish rite. He may have been compelled to learn the Koran; but he certainly was instructed in the Bible and in Hebrew literature. This contradiction between the outward appearance and the inner conviction ceased as soon as circumstances permitted him to leave the country. He must then have been about twenty-five years old, as he was already engaged in the practise of medicine (Munk, "Notice sur Joseph b. Jehudah," in "Jour. Asiatique," 1842, p. 14). When not occupied with professional work he wrote Hebrew poems, which were known to Al-Ḥarizi, and in his "Taḥkemoni" (xviii.) the latter speaks highly of them. Maimonides, to whom Joseph sent his poems together with other compositions from Alexandria, was not so lavish with his praise. He appreciated only the great longing for higher studies which found expression in Joseph's poems.

Physician and Poet.

To satisfy this longing Joseph went from Alexandria to Fusṭaṭ (Cairo) and studied logic, mathematics, and astronomy under Maimonides' direction. Maimonides likewise expounded the writings of the Prophets, because Joseph seemed perplexed as to the possibility of reconciling the teachings of the Prophets with the results of metaphysical research. Maimonides advised patience and systematic study; but the disciple left Fusṭaṭ before Maimonides had completed his course of lectures on the Prophets (Maimonides, "Moreh Nebukim," Introduction). His stay with Maimonides was short (Munk, *l.c.* p. 34)—less than two years. He went further east and settled in Aleppo. Here he established himself as a medical practitioner, married, and made a successful commercial journey which enabled him to live henceforth independently and free from care. It was probably in the course of this journey that he witnessed at Bagdad the burning of the works of the philosopher 'Abd al-Salam (1192).

Correspondence with Maimonides.

After the departure of Joseph from Fusṭaṭ the intercourse between master and disciple was continued in writing. Maimonides' "Moreh Nebukim" (Guide for the Perplexed) was written for Joseph and for those like him who found it difficult to harmonize the results of philosophical research with the teachings of the Prophets.

Joseph, however, was not convinced; for he writes allegorically to his master as follows: "Thy daughter Kimah [*i.e.*, Maimonides' method of reconciling theology and philosophy: the most difficult point in his theory seems to have been the explanation of prophecy], whom I loved and married according to law and custom, in the presence of two witnesses, 'Abd Allah and Ibn Rushd, turned her face from me to follow other men. There must be something wrong in her education. Restore the wife to her husband, 'for he is a prophet.'" Maimonides replies in the same style, declaring the innocence of his daughter and the guilt of the husband; and he advises his disciple to have faith in God, and to be more modest and more careful in his utterances lest he bring evil upon himself.

Joseph remained, however, a true disciple of his master. He abandoned his other pursuits and wished to open a school. Maimonides dissuaded him from the undertaking, unless he should do it without seeking material profit from his teaching. When, thirty years later, Al-Ḥarizi visited Aleppo (1217) he found Joseph in the zenith of his glory. He praised him as the "Western light," and applied to him the words of Scripture, "and Joseph was ruler over the whole land; he supplied food for all" ("Taḥkemoni," xlvi., l.). He must indeed have had great authority when he defended his master and silenced the opposition expressed by some rabbis in Bagdad against the works of Maimonides. The latter, true to his character, exhorted Joseph to moderation, begging him, being young in years, not to oppose an old rabbi whose authority was recognized in the congregation (see "Birkat Abraham," Lyck, 1859; "Zikronot," ii.: a letter written by Maimonides in 1192).

Joseph was twice married: by the first wife he had two daughters; by the second, several sons.

His Works.

His poems are all lost except one in praise of Maimonides (see Maimonides, "Ḳobeẓ," ed. A. Lichtenberg, ii. 29, Leipsic, 1859), and the beginning of another preserved by Al-Ḥarizi ("Taḥkemoni," xviii.; Munk, *l.c.* p. 49). He wrote also a treatise on three problems: (1) the nature of the Absolute; (2) the derivation of all things from the Absolute; and (3) "creatio ex nihilo." Not satisfied with his master's explanation, he submits to the consideration of Maimonides a new solution of his own. The treatise was written in Arabic, but it is known only in the Hebrew translation published by M. Levy, "Drei Abhandlungen," Berlin, 1879. Either this essay must have been written before Maimonides wrote the "Guide," or the "unsatisfactory explanations" referred to are those given by Maimonides in that work.

Ibn 'Aḳnin wrote also an allegorical commentary on Canticles (Salfeld, "Hohelied," pp. 81–85, Berlin, 1879). Two of his writings on Talmudical subjects are referred to by himself and are probably identical with an introduction (edited by Grätz, Breslau, 1871), and a treatise on Talmudic weights and measures, extant in Hebrew translations. He wrote also an ethical work entitled "Tabb al-Nufus," fragments of which, in Arabic and Hebrew, have been published by Güdemann in his "Das Jüdische Unterrichtswesen," pp. 42 *et seq.* (Vienna, 1873). The identity of the author of "Tabb al-Nufus" with Ibn 'Aḳnin has been questioned.

JOSEPH KARA. See KARA, JOSEPH BEN SIMEON.

JOSEPH, KING OF THE CHAZARS. See CHAZARS.

JOSEPH (JOSE) B. ḲISMA: Tanna of the first and second centuries; contemporary and senior of Hananiah b. Teradion. He is never cited in connection with halakot, but some ethical and eschatological sayings of his are preserved in the Talmud. He prized association with scholars more than gold; and when a rich man once offered him great wealth as an inducement to follow him to a place where no sages lived, he declined it: "If all the precious metals of the world were offered me, I would not live but in the atmosphere of the Torah; as David has said, 'The Law of Thy mouth is better unto me than thousands of gold and silver'" (Ps. cxix. 72). Nevertheless, when, in disregard of the Roman prohibition against teaching the Law, Hananiah b. Teradion held public assemblies and taught, Jose endeavored to dissuade him from pursuing that dangerous course (see HANANIAH B. TERADION). This came to the ears of the Romans, and when Jose died the foremost among them attended his funeral ('Ab. Zarah 18a). On one occasion at the bet ha-midrash of Tiberias, he witnessed a warm controversy between Jose b. Ḥalafta and Eleazar b. Shammua', in which the debaters became so excited that they rent a scroll between them; thereupon he severely reprimanded them, and predicted that the bet ha-midrash eventually would be converted into a pagan temple. It is said that his prediction was fulfilled (Yer. Sheḳ. ii. 47a). Asked by his pupils "When will the Messiah come?" he exacted from them a promise not to call for signs to satisfy them of the accuracy of his prediction before he answered their question; and when they had promised, he replied: "When this gate shall have twice fallen and been restored, and fallen again, then, before it shall be restored the third time, the Messiah will come." Before his death he ordered that his coffin be placed deep in the ground; for, said he, "a time will come when to every palm in Babylonia a Persian horse will be tethered, and out of every coffin in Palestine Median horses will feed" (Sanh. 98a *et seq.*).

The word "Ḳismaḥ" is a locative noun, probably identical with "Ḳesam," by which Targ. Yer. (Num. xxxiv. 4) renders "Azmon." Neubauer ("G. T." p. 280) suggests its identity with "Ḳasmeya," name of a place in Upper Galilee.

JOSEPH (B. JACOB) OF MANDEVILLE (MORELL): French exegete; pupil of Abraham ibn Ezra. He wrote a supercommentary on that scholar's commentary on Exodus (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1234, 9). It is probable that he is identical with the Joseph b. Jacob to whom Abraham ibn Ezra dedicated his "Yesod Mora."

JOSEPH BEN MEÏR: Liturgical poet of the thirteenth century; perhaps uncle of Meïr of Rothenburg. He was the author of a dirge beginning with the words ארמון נוטש עוזב טוב, which is believed to have been written on the occasion of the burning of the Talmud at Paris. It is possible that Joseph is identical with Joseph ben Meïr of Saulieu, whom Meïr of Rothenburg cites as having been his master (comp. Gross, "Gallia Judaica," p. 575).

JOSEPH BEN MEÏR TE'OMIM. See TE'OMIM, JOSEPH BEN MEÏR.

JOSEPH BEN MORDECAI GERSHON HA-KOHEN: Polish Talmudist; born at Cracow 1510; died 1591. He began his studies in the Talmud at an early age, and became the head of a yeshibah founded for him by his father-in-law. The many pupils who attended this school soon made him famous for his scholarship; and his views on religious questions were widely sought. Solomon Luria was one of his correspondents.

Joseph was the author of "She'erit Yosef" (Cracow, 1590), containing responsa and discussions on various rabbinical subjects, as well as a commentary on the "Mordekai," treating Neziḳin, Berakot, and Mo'ed. In the preface the author states that he published this work at the request of his sons, Tanḥuma and Aaron Moses, who were members of the

Jewish community of Cracow. He also corrected the manuscript from which was printed the "Aggudah" of Alexander Suslin ha-Kohen of Frankfort.

JOSEPH BEN MORDECAI HA-KOHEN: Turkish rabbi and liturgist of the seventeenth and eighteenth centuries; born in Jerusalem. He was a pupil of Moses Galante (the younger), whose "Zebaḥ ha-Shelamim" he brought to Amsterdam, where it was printed in 1708. Joseph wrote "Dibre Yosef" (Venice, 1751), a collection of homilies, and "Sha'are Yerushalayim" (*ib.* 1707), hymns and songs to be recited on the week-days in praise of Jerusalem, partly of his own composition and partly by other authors.

JOSEPH B. MORDECAI TROKI. See Troki, Joseph b. Mordecai.

JOSEPH, MORRIS: English rabbi; born in London May 28, 1848; educated at Jews' College in that city. He was appointed rabbi of the North London Synagogue in 1868, and in 1874 went to the Old Hebrew Congregation of Liverpool, where he officiated as preacher until 1882. He became delegate senior minister of the West London Synagogue in 1893, when Professor Marks retired from active service. Joseph has published a collection of sermons, "The Ideal in Judaism," London, 1893, and a valuable popular work on Jewish theology, entitled "Judaism as Creed and Life," *ib.* 1903. His position is conservative, midway between Reform and strict Orthodox.

BIBLIOGRAPHY: *Jewish Year Book*, London, 1903.

J.

JOSEPH (JOSLEIN) BEN MOSES: Bavarian Talmudist; born at Höchstädt about 1420; died after 1488. A few details of Joseph's life are known through his "Leḳeṭ Yosher," of which only one copy is extant in manuscript (Munich MSS., Nos. 404, 405). Having studied for five years under Israel Isserlein, Joseph traveled to the Rhine provinces, but returned to his teacher, whose decisions, at the request of his fellow students, he committed to manuscript, subject to Isserlein's corrections. In 1463, three years after Isserlein's death, Joseph began to arrange the material for publication, continuing the task at Cremona (1474) and finishing it in 1488. It is arranged in the order of the four Ṭurim. The work, besides its halakic value, is historically interesting, containing as it does many passages bearing on the lives of Isserlein and his students and illustrating the manners and customs of rabbinical academies in that period. Judah incorporated in the "Leḳeṭ Yosher" the decisions of a pupil of Shalom of Austria, for which he was praised by Isserlein; he included also some of the collectanea of Judah Obernik.

JOSEPH B. MOSES PHINEHAS (surnamed **Ha-Ẓaddiḳ**): Polish rabbi; born 1726; died at Posen 1801. He was a man of wealth and influence, and of great piety. His father-in-law, R. Ezekiel Landau of Prague, frequently cites him in his "Noda' bi-Yehudah." Joseph was successively rabbi of Yaworow, Sokoli, and Posen. He was the author of "Zikron She'erit Yosef" (Kolomea, 1881), novellæ on the Babylonian Talmud.

Joseph was succeeded in the rabbinate of Posen by his brother **Samuel,** author of "Bet Shemuel Aharon," who had been rabbi of Tarnopol. Samuel died at Posen in 1806.

JOSEPH BEN MOSES OF TRANI. See Trani, Joseph b. Moses di.

JOSEPH BEN MOSES OF TROYES: French Talmudist of the first half of the twelfth century. Isaac ben Samuel the Elder quotes in his responsa Talmudic explanations which he received orally from Joseph of Troyes. The latter is probably identical with Joseph ben Moses, who was an elder contemporary of Rabbenu Tam. The latter addresses Joseph in a letter as "my honored teacher"; while Joseph designates R. Tam as one of his most intimate friends, and regrets that he has been obliged to leave the place (Troyes) where R. Tam is staying. It is doubtful whether this Joseph is identical with the tosafist Joseph ben Moses who is quoted in the earlier tosafot to Yoma 20b and in Judah Sir Leon's tosafot to Ber. 22b.

JOSEPH HA-NAGID. See Nagdela (Nagrela), Abu Ḥusain Joseph ibn.

JOSEPH NASI OF NAXOS. See Nasi, Joseph (João Migues).

JOSEPH BEN NATHAN OFFICIAL (surnamed **ha-Meḳanne** = "the Zealot"): French controversialist; lived, probably at Sens, in the thirteenth century. He was a descendant of Todros Nasi of Narbonne. His father held a public office to which Joseph probably succeeded; whence the surname "Official." Coming thus in contact with high officials and ecclesiastical dignitaries, Joseph, like his father, was often invited to take part in religious controversies, in which he acquired great skill. Accounts of these controversies, together with those of his father and of some French rabbis, were collected by Joseph in a work entitled "Yosef ha-Meḳanne" or "Teshubot ha-Minim," which is still extant in manuscript (Paris, Bibliothèque Nationale, Hebr. MS. No. 712; Steinschneider, "Cat. Hamburg

Controversies with Officials.

Hebr. MSS." No. 187, 7). The Christian personages who figure in the discussions are: Pope Gregory (probably Gregory X.); the bishops of Sens, Mans, Meaux, Vannes, Anjou, Poitiers, Angoulême, and St. Malo; the bishop of the king (St. Louis); the confessor of the queen (probably Guillaume of Auvergne); the chancellor; friars of the Cordelier and Jacobite orders; and some Jewish converts. All the Christian dogmas which are derived from Scriptural texts, such as the immaculate conception, the divinity of Jesus, his mission on earth, his birth, death, and resurrection, are analyzed and discussed; and there occur refutations of some attacks on Judaism, such as the accusation of ritual murder, which the chancellor endeavored to base upon Num. xxiii. 24.

The characteristic feature of these controversies, which in the main have no claim to great originality as regards the arguments used, is the freedom of speech and boldness displayed by the Jewish participants, who do not content themselves with standing upon the defensive, but very often attack their opponents not with dialectics, but with clever repartee. Of this kind of controversy the following may serve as examples:

Examples.

Nathan ben Meshullam was asked to give a reason for the duration of the present exile, while that of Babylon, which was inflicted upon the Jews as a punishment for the worst of crimes, idolatry, lasted only seventy years. He answered: "Because in the time of the First Temple the Jews used to make stone images of Astarte and statues which had no chance of duration, while in the time of the Second Temple they deified one of themselves, Jesus, to whom they applied the holy prophecies, and thus created a durable idol which attracted many worshipers. The gravity of the fault, therefore, occasioned equal severity in the punishment."

Nathan was also asked why the usual expression "And God saw that it was good" is lacking in the account of the second day of the Creation, to which he replied: "Because among the things done on that day was the division of the waters, which God had foreseen would be used for idolatrous purposes [baptism]."

Elijah, Joseph ben Nathan's brother, was asked by the chancellor why the Mosaic law declared contact with, or being in the presence or neighborhood of, a dead body to be a cause of impurity. "Because," answered he, "God foresaw that a time would come when a nation would pretend that He had voluntarily submitted Himself to death; therefore He showed Himself so severe against the impurities of death."

Joseph's compilation furnishes much valuable information concerning the condition of the French Jews in the twelfth and thirteenth centuries. The numerous accusations brought against them by the Christian population, such as ritual murder and the crucifixion of Jesus, found an echo in the discussions. In an explanation of a text may very often be detected an expression of the anguish of the persecuted.

Influence.

Although the "Yosef ha-Meḳanne" is nowhere expressly quoted, it may be assumed that it was used by the polemists. The "Niẓẓaḥon Yashan," published by Wagenseil, and the "Niẓẓaḥon" of Lipmann of Mülhausen have some analogical passages. A great number of the answers of Joseph are reproduced almost verbatim in many Bible commentaries of French origin. Specimens of such commentaries, in which many passages can thus be traced, were published by Berliner in his "Peleṭat Soferim" and by Neubauer in Geiger's "Zeitschrift" (1871).

Joseph seems to have been the author also of a commentary on the Pentateuch, and of the Hebrew version of the controversy of Jehiel of Paris, at the end of which is a short poem containing his initials.

S. S. I. Br.

JOSEPH NAZIR BEN ḤAYYIM MOSES HA-LEVI: Palestinian rabbi; born at Hebron about 1650; died probably at Cairo 1719. He studied under Moses Galante and became rabbi at Hebron, from which community he was sent to Europe to solicit alms. Ẓebi Ashkenazi met him in this capacity at Belgrade in 1679, and states that the name "Nazir" was given him as a Nazarite ("Ḥakam Ẓebi," No. 168). Joseph ha-Levi wrote two volumes of responsa under the title "Maṭṭeh Yosef" (Constantinople, 1717–26), edited by his son-in-law, Jeshua זין (Shababo). Joseph also edited the responsa ("Ginnat Weradim," *ib.* 1717–19) of his friend Abraham ben Mordecai ha-Levi, whom he succeeded as rabbi of Cairo.

D. L. Grü.

JOSEPH BEN NOAH HA-BAṢRI (Abu Ya'ḳub Yusuf ibn Nuḥ): Karaite scholar of the eighth and ninth centuries; brother of Nissim ben Noah. He translated the Pentateuch into Arabic, with a commentary, an abridgment ("talkhiṣ") of which was made by Abu al-Faraj Harun, and excerpts from which, on Numbers and Deuteronomy, are given by 'Ali ben Sulaiman in his Pentateuch commentary. Hadassi says that Joseph recognized only two canons for religious law: Scripture (כתב) and harmony in the totality (קבוץ) of the laws; and that he rejected logical deduction (היקש; "Eshkol ha-Kofer," § 168).

Luzki confounded Joseph ben Noah with Joseph al-Ḳirḳisani, and attributed to the former the "Sefer ha-Ma'or," which really belonged to the latter ("Dod Mordekai," p. 11b).

JOSEPH (MAESTRO) DE NOVES: French physician of Avignon who lived in the middle of the fifteenth century, and was highly esteemed throughout the south of France (Joseph Colon, Responsa, No. 181). During the first part of the seventeenth century a rabbi of the same name, Joseph de Noves, lived at Nicopolis, Bulgaria; he wrote prefaces to Abraham di Boton's "Leḥem Mishneh" and Abraham ibn Asus' "Leḥem Abbirim."

G. S. K.

JOSEPH B. PETROS: Palestinian amora of the first generation (3d cent.). He was the father of Joshua b. Levi's first wife (Yer. M. Ḳ. iii. 5). He stood in friendly relations with Bar Ḳappara and had a discussion with him in regard to the exposition of a certain Biblical verse (Gen. R. xciv.). He is mentioned also as having had an argument with Zabdai b. Levi on a point of Biblical exegesis.

JOSEPH B. PHINEHAS. See FRANKFORT-ON-THE-MAIN.

JOSEPH IBN PLAT (פלט, rarely פלאט; not "Pilat," as Grätz deduces from the form בילאת, occurring once in "Temim De'im," p. 40; and not identical with Ibn Bulat, or Bolat, of Estella): Rabbinical authority of the twelfth century; born presumably in southern Spain, whence he went to Provence and settled in Lunel, though Epstein is of opinion that he was born in the Byzantine empire. If this is so, he may be identical with the Joseph ibn פלאת whom Benjamin of Tudela met in Damascus ("Itinerary," ed. Asher, i. 48). He also spent some time in Rome, and may have traveled in France, Lorraine, Lombardy, and Spain. According to Joseph ibn Ẓaddiḳ, he was flourishing in the year 1205; according to Abraham b. Solomon of Torrutiel, he died in 1225; but according to others he died before 1198. Abraham b. David, Asher b. Meshullam, and Zerahiah ha-Levi Gerondi, all of Lunel, received oral instruction from him, and he corresponded with Zerahiah, and also with Abraham b. David of Posquières, Maimonides, and Abraham b. Isaac of Narbonne. He wrote a treatise on the prayers entitled "Tiḳḳun Soferim," of which a fragment is extant. His halakic treatises, commentaries on various Talmudic books, such as Nedarim and Ḥullin, are quoted in the "'Ittur" (ii. 18c), the "Kol Bo" (No. 106), and "Shiṭṭah Meḳubbeẓet" to Nedarim (fol. 7d), and extracts are to be found in the Pardes; his name, however, is cited in the last-named only in one long citation on the Benedictions (ed. Constantinople, fol. 39b–41c).

Epstein, in *Monatsschrift*, xli. 475, xliv. 290.

M. K.—G.

JOSEPH PORAT BEN MOSES (French, **DON BENDIT**): Tosafist of the thirteenth century. The surname "Porat" is an allusion to Gen. xlix. 22. According to Gross, Joseph Porat is identical with Joseph of Caen, who is cited by Samuel of Falaise as a rabbinical authority; but he can not, as supposed by Dembitzer ("Ha-Ḥoḳer," ii. 48 *et seq.*), be identified with Joseph ben Moses of Troyes, the codisciple and opponent of Jacob Tam. Joseph Porat was the pupil, and perhaps the grandson, of Samuel ben Meïr (RaSHBaM), but certainly was not his son, as erroneously given by Zacuto ("Sefer ha-Yuḥasin," ed. London, p. 218). Joseph Porat wrote a commentary on the Talmud, fragments of which are found in the Tosafot to Shabbat (52a) and Yoma (37b, 46a). According to Dembitzer (*l.c.*), all the passages cited in the Tosafot in the name of Joseph without any further indication are to be attributed to Joseph Porat, who is probably also the author of a mathematical work found in the Oppenheim collection under the name of Joseph ben Moses Ẓarfati. Probably it is Joseph Porat who is designated as "Joseph, grandson of Samuel ben Meïr," in the manuscript commentary on the Pentateuch in the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." No. 271; see, however, Neubauer in Geiger's "Zeitschrift," ix. 216).

JOSEPH, SAMUEL A.: Australian pioneer and politician; born in London 1824; died in Sydney, New South Wales, Sept. 25, 1898. At the age of eighteen he emigrated to New Zealand, and there acquired so thorough a knowledge of the native language that he acted as interpreter to Sir George Grey when the latter undertook his expedition to pacify the Maoris. In 1855 Joseph removed to Sydney, where he became associated in business with Jacob Levi Montefiore. He was a member first of the lower and then of the upper house of the legislative assembly, besides filling the offices of president of the chamber of commerce and chairman of the City Bank.

JOSEPH SAMUEL BEN ABRAHAM BEN JOSEPH BEN ABRAHAM BARUCH BEN NERIAH: French rabbi; born at Aix, Provence; flourished at Avignon toward the end of the thirteenth century. Like his father, Abraham ben Joseph of Aix, he was an adherent of Abba Mari of Lunel. During the religious controversy of 1303–1306, which greatly excited the whole of southern France, he sent assurances of his support to Solomon ben Adret of Barcelona, who calls him, in the correspondence between the two, "Joseph ben Samuel ben Abraham."

JOSEPH BEN SAMUEL HA-ḤAZZAN (also called **Joseph ha-Mashbir**): Karaite ḥakam of Halicz, Galicia; died in 1700; pupil of R. Nissim. He was the author of the following works, none of which has been published: "Porat Yosef," on Hebrew grammar and on the excellence of the Hebrew language; "Sheber Yosef," on religious philosophy; "Birke Yosef," the subject of which is not known; a commentary on the ten Karaite articles of faith; "Ner Ḥokmah" or "Perush Seder ha-Tefillah," a commentary on the prayer-book. The last-named work remained unfinished at the time of the death of the author. Joseph composed also numerous liturgical poems, which have been inserted in the Karaite prayer-book. A funeral oration was pronounced over him by Mordecai, author of "Dod Mordekai," who had consulted him on the answer he was to give to Jacob Trigland about the origin of Karaism.

JOSEPH BEN SAMUEL IBN REY: Italian rabbi; died prematurely in Venice April 2, 1608. His epitaph (Wolf, "Bibl. Hebr." iv. 1213) leaves it to be supposed that his surname was an equivalent for "son of a king." Wolf, however (*ib.*), spells it דיי (= "Dei"). He was the author of a work entitled "Sefer Massoret," a treatise on the Masorah, in which he endeavored to prove that there are no reasonless or unjustified repetitions in the Bible. Joseph is mentioned by Samuel Aboab in his responsa "Debar Shemuel" (No. 56).

D. M. Sel.

JOSEPH SHALLIṬ BEN ELIEZER RICHETTI (RIQUETI): Italian scholar; born at Safed, Palestine; lived in the second half of the seventeenth century at Verona, where he directed a Talmudical school. He was the author of "Ḥokmat ha-Mishkan" or "Iggeret Meleket ha-Mishkan" (Mantua, 1676), on the construction of the First Temple. He also published a map of Palestine which Zunz supposes to have been prepared as one of the illustrations of a Passover Haggadah. Besides his own works Joseph edited "Ḥibbur Ma'asiyyot" (Venice, 1646), a collection of moral tales, and Gershon ben Asher's "Yiḥus ha-Ẓaddiḳim," to which he added notes of his own (Mantua, 1676).

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 213; Zunz, in Asher's edition of Benjamin of Tudela's *Massa'ot*, ii. 286; Steinschneider, *Cat. Bodl.* col. 1526; Mortara, *Indice*, p. 54.

JOSEPH BEN SOLOMON (JOSEPH DARSHAN OF POSEN): German preacher; born at Posen in 1601; died there in 1696. When a youth Joseph studied at Byelaya Tzerkov, Russia, where he seems to have settled, for in 1648 he was an eyewitness of the Chmielnicki massacres. Joseph succeeded in escaping to his native town, where he was appointed preacher in 1676, holding the office till his death. The following three works of his appeared at Frankfort-on-the-Oder in 1679: "Yesod Yosef," a denunciation of certain sins; "Sedeh Bokim," a homiletic commentary on Pereḳ Shirah; and "Tiḳḳun Ḥaẓot," a collection of psalms and prayers. Among his many unpublished works the following two may be mentioned: "Wa-Yekalkel Yosef," sermons arranged in the order of the parashiyyot, and "Wa-Yelaḳḳeṭ Yosef," collectanea of cabalistic and midrashic works, in the same order.

JOSEPH BEN TOBIAH: Farmer of the Egyptian royal revenues from about 220 to 198 B.C.; nephew, on his mother's side, of the high priest Onias II.; founder of the Tobiade family, which held an important place in the politics of Judea until the execution of its last member, Menelaus (162 B.C.). When Onias withheld the tribute at the time of Ptolemy IV., Philopator, Athenion was sent to Judea to insist upon its payment. Onias, however, persisted in his attitude, and when matters came to a crisis Joseph hastened from his native village Phicola to Jerusalem, remonstrated with his uncle for thus endangering the welfare of the Jews, and succeeded in obtaining permission to go to Alexandria to settle the matter with Ptolemy himself. He then convoked the people in the court of the Temple, tranquilized them in regard to the issue of the conflict, and caused himself to be proclaimed leader. As such he received Ptolemy's ambassador with the greatest honors, made him costly presents, and persuaded him to return to Alexandria, whither he promised to follow soon afterward.

Having no means of his own, Joseph borrowed money from friends in Samaria so as to appear with dignity at the Egyptian court, and proceeded to Alexandria. Already predisposed in his favor through the recommendations of Athenion, Ptolemy was charmed with Joseph's humor and wit, and asked him to consider himself a guest during his stay in the Egyptian capital. The offense given by Onias was attributed to his great age, and Joseph was recognized as political leader of Judea. This victory was followed by another: he cleverly managed to obtain the office of chief tax-collector of Phenicia and Cœle-Syria. A force of two thousand soldiers was given to him by Ptolemy, and he did not scruple to use the greatest severity in levying taxes. Thus in Ascalon and Scythopolis he beheaded, and then confiscated to the crown the possessions of, twenty of the most distinguished citizens for refusing to pay their taxes.

Visits Egypt as Envoy Extraordinary.

Joseph occupied the position of tax-collector, or rather of governor, for twenty-two years, and accumulated immense riches, the influence of which was felt throughout Judea. But though Joseph's administration was materially beneficial to Judea, it was ethically pernicious; he and the members of his family introduced that corruption and dissoluteness which were characteristic of the Hellenic court of Alexandria. The poor Jewish agriculturists, becoming suddenly rich, began to copy degenerate Greek customs. To these evils were added the dissensions that arose between the seven sons of Joseph by his first marriage and Hyrcanus, his son by his second wife, which dissensions divided Judea into two hostile camps—Oniades and Tobiades.

JOSEPH BEN URI SHERAGA: Russian liturgist of the seventeenth century; born in Kobrin, government of Grodno. He was the author of "Ma'arakah Ḥadashah" (Frankfort-on-the-Main, 1699), containing three seliḥot in commemoration of the persecutions of the Jews of Ḳaidan and Zausmer in 1698. The first, beginning "Alluf baṭuah," is unique in that not only are the verses arranged in alphabetical order, but each verse begins with the name of the corresponding letter. This seliḥah is provided with a commentary written by the author himself.

K. M. SEL.

JOSEPH BEN UZZIEL: Supposed author of a cabalistic work which is often quoted by Recanati, in his commentary on the Pentateuch, under the title of "Baraita de-R. Yosef b. 'Uzziel," which is entitled "Mishnat Yosef b. 'Uzziel" in Neubauer, "Cat. Bodl. Hebr. MSS." (No. 1947, 3a). Neubauer describes this work as a commentary on the "Sefer Yeẓirah," but it seems from Oppenheim ("Ḳohelet Dawid," p. 352, No. 965) that it is a supplement to it. Under the title "Shorashim" a copy is found in the Parma Library (De Rossi, No. 1138, 12). Joseph b. Uzziel is often cited in the commentary to the Alphabet of Ben Sira, where he is called Ben Sira's grandson and where his opinion sometimes differs from that held by his father. Steinschneider (in Benjacob, "Oẓar ha-Sefarim," p. 84) identifies this Joseph b. Uzziel with the author of the cabalistic work. Apparently Oppenheim was of the same opinion, for he appended to the name of Joseph b. Uzziel the words "a disciple of Jeremiah." Some marginal notes on a Maḥzor (Neubauer, *l.c.* No. 1038) are headed משם יוסף בן עזיאל.

G. M. SEL.

JOSEPH ZABARA (Joseph ben Meïr Zabara): Spanish physician, satirist, and poet of the beginning of the thirteenth century; born and died in Barcelona. He studied in Narbonne under Joseph Ḳimḥi, who twice quotes Zabara on Proverbs. The only work known to be his is the "Sefer Sha'ashu'im," published by Isaac Arish, Constantinople, 1577, and republished in 1865 in "Ha-Lebanon," and again by Senior Sachs ("Yen Lebanon," Paris, 1866). The Constantinople edition contains three other sections, probably of the same work. It is a book of stories and fables, after the model of the "Kalilah wa-Dimnah," which are supposed to be communicated to the author by a giant named "Enan Manatash" during a series of visits. Many of them relate to the wickedness and guile of women, including a parallel to the "Widow of Ephesus." Another is a variant of "the clever girl" (comp. Jacobs, "Indian Fairy Tales," p. 251), while an abstract of the story of Tobit forms the subject of another tale. The book concludes with the return of the author to Barcelona, "where dwells the great prince R. Sheshet Benveniste."

G. J.

JOSEPH B. ZACHARIAH: Jewish general of the Maccabean period. He, together with Azariah, was left in charge of the forces when the Maccabean brothers Judah, Jonathan, and Simon were obliged to go to Gilead and Galilee for the protection of the Jews there (I Macc. v. 18; Josephus, "Ant." xii. 8, § 2). Although Judah had expressly commanded Joseph and Azariah to fight no battles, they, being ambitious to make a name for themselves, attacked the city of Jabneh. The Syrians under Gorgias repulsed them with a loss of 2,000 men, and pursued them into Judea (I Macc. v. 56-62; Josephus, *l.c.* § 6).

G. S. KR.

JOSEPH BEN ẒADDIḲ: Rabbi in Arevalo, Spain, during the fifteenth century; author of a treatise entitled "Zeker Ẓaddiḳ," on ritual matters, in fifty chapters, still in manuscript. The last chapter contains a chronicle of Jewish worthies from the Creation down to the day of the writer; the last entry being dated 1487. A few of the events near or in his own time are treated somewhat fully. The rest is made up of names and dates which are often sadly distorted, both by the author and by the writer of the manuscript. Nearly all the data given in the historical chapter are found in the "Yuḥasin" of Abraham Zacuto. According to Neubauer (who has printed the chapter in his "M. J. C." i. 85-100), the two authors drew from a common source.

G.

JOSEPH ẒARFATI (so called because he belonged to the French synagogue): Convert to Christianity and missionary to the Jews at Rome; died before 1597. He accepted Christianity in 1552, taking the name of **Andrea (Filippo?) di Monti** (more correctly **del Monte**) in honor of Julius III. He was born in Fez, and hence is sometimes called "Joseph Moro." Beginning with 1576, he delivered sermons having for their object the conversion of the Jews, which the latter were compelled to attend. He also wrote, in Italian, works against the Jews, as "Confusione dei Giudei," which he published in Hebrew under the title מבוכת היהודים. The Roman Jews thereupon protested to the Curia, and refused to listen to his sermons. Nor was he more successful with his "Lettera di Pace" (אגרת שלום), which he issued in 1581. As censor of Hebrew works in Spoleto and later in Rome he did much harm to the Jews. He was suspected of having embezzled money and of having accepted bribes.

Margulies believes him to be identical with the Joseph Moro mentioned by Joseph ha-Kohen ("'Emek ha-Bakah," pp. 111, 119) as having on the Day of Atonement, 1558, forced his way into the synagogue at Recanati with a crucifix in his hand, which he placed in the Ark. Joseph ha-Kohen says that Ẓarfati's Christian name was "Filippo," which name he may have taken in addition to "Andrea."

JOSEPHS, MICHAEL (known also as **Myer Königsberg**): English Hebraist and communal worker; born in Königsberg Oct. 8, 1763; died in London Feb. 9, 1849. He left his native town in his thirteenth year for Berlin, where he attended the Talmudical colleges and met Moses Mendelssohn. In 1781 he went to London, where while engaging in commercial pursuits he retained his attachment to Hebrew literature. He contributed to Hebrew periodicals; and his poetical writings appeared in the "Hebrew Review," the "Voice of Jacob," and the "Jewish Chronicle." In conjunction with Chief Rabbi Herschell and Dr. Van Oven, he established in 1818 the Jews' Free School, which became thereafter the chief object of his devotion, he himself instructing and examining both pupils and teachers. He served also as life-governor of the Jews' Hospital.

As a Hebraist Josephs excelled all his contemporaries in England. He edited an English-Hebrew dictionary under the title "Midrash Millin."

Bibliography: *Jew. Chron.* Feb. 16, 1849; May 1, 1903; Morais, *Eminent Israelites*, s.v.

J. G. L.

JOSEPHS, WALTER: English educationist and communal worker; born in London Nov. 22, 1804; died Jan. 24, 1893. He was closely connected with the management of the following institutions: Jews' Free School; Jews' Infant School (honorary secretary from its foundation in 1840); West Metropolitan Jews' School; Jews' Emigration Society; Jews' Hospital; and the Anglo-Jewish Association. In Jan., 1877, he was presented with a testimonial in recognition of his long services in the cause of Jewish education.

Josephs was a frequent contributor to the Jewish press on questions of ritual modification; and in 1874 he formed the Association for Effecting a Modification in the Liturgy of the German Jews. In 1837 he had been presented with the freedom of the city of London; and he was the first Jew to be admitted a member of the Drapers' Company.

Bibliography: *Jew. Chron.* and *Jew. World*, Jan., 1893.

JOSEPHSTADT. See Prague.

JOSEPHUS, FLAVIUS: General and historian; born in 37 or 38; died after 100. He boasts of belonging to the Hasmonean race on his mother's side ("Vita," § 1). His great-grandfather was Simon "the Stammerer." As a boy Josephus was distinguished for his good memory and his ease in learning. He passed through the schools of the Pharisees, the Sadducees, and the Essenes in turn, and then spent three years in the desert with a certain Banus. When nineteen years old he attached himself finally to the party of the Pharisees (*ib.* § 2). In his twenty-sixth year he had occasion to journey to Rome in the interests of certain priests who had been sent thither in chains by the procurator Felix. Here he obtained the favor of the empress Poppæa.

Appointed Governor of Galilee.

Shortly after the return of Josephus to Jerusalem (66) the great Jewish war broke out, and the defense of Galilee was entrusted to him by the Sanhedrin in Jerusalem ("B. J." ii. 20, § 4; "Vita," § 7). Why this most important post was allotted to him is not known. In his autobiography he states that he was sent there in order to tranquilize the province and to keep it faithful to the Romans, for only part of it had revolted ("Vita," § 7; comp. § 14). This is plainly a distortion of the facts, since Galilee was always most inclined to war. He was accompanied by two men learned in the Law, Joazar and Judas, sent by the Sanhedrin to watch over his actions. He sent them back to Jerusalem (*ib.* §§ 7, 12, 14), and then proceeded to organize the administration of the province; instituting a sanhedrin of seventy members, and governing the cities through a council of seven men, an institution afterward extended throughout Palestine under the title "The Seven Best of the City." He maintained strict discipline among the troops, which numbered about 100,000 infantry and 5,000 cavalry; he surrounded himself with 500 guards; and he fortified and provisioned a considerable number of cities (*ib.* §§ 12–14; "B. J." ii. 20, §§ 5–8).

Though a strict adherent of the Law, he was accused of treachery by some of the zealous patriots and especially by John of Giscala. But the deeds of which Josephus was accused may be interpreted to his honor. Young men from the village of Dabaritta had stolen treasure from the governor of King Agrippa. Josephus had taken it with the intention of restoring it to the king. The report was spread that he was a traitor, and the people were incited against him by John of Giscala and Jesus b. Zappha in Tarichæa. He was in danger of being killed, but he succeeded in making the Taricheans believe that he intended to use the treasure for the fortifications of their city. People from Tiberias, however, surrounded his house with the intention of setting it on fire. Their leaders were enticed within and there whipped and mutilated; and the Tiberians thereupon took to flight ("B. J." ii. 21, §§ 3-5; somewhat differently, "Vita," §§ 26-30). Not long afterward John went to Tiberias with the intention of murdering Josephus; but the latter fled to Tarichæa, which city was so devoted to him that war would have ensued between it and Tiberias had he not restrained the inhabitants ("B. J." ii. 21, § 6; "Vita," §§ 16-18).

Antagonism of John of Giscala.

John's next scheme was to have Josephus accused before the Sanhedrin at Jerusalem. The most influential members, being convinced of Josephus' guilt, sent four of their number with a force of 2,500 men to depose him. He, however, pretended to be occupied with preparations for war; and the delegates could not see him. Several Galileans went voluntarily to Jerusalem to demand the recall of the envoys. The latter then ordained a day for general fasting and prayer in Tiberias, but Josephus fell upon his opponents with his armed guards. A few days afterward messengers from Jerusalem brought letters in which the leaders of the people confirmed him in his position as governor of Galilee. He sent the Sanhedrin delegates back to Jerusalem in chains, and subdued by force the inhabitants of Tiberias, who were in revolt against him ("B. J." ii. 21, § 7; "Vita," §§ 38-64). They, however, still refused to recognize Josephus; but by a ruse he again overcame them ("B. J." *ib.* §§ 8-10; "Vita," §§ 32-34; comp. §§ 68, 69).

Sepphoris now asked for and received a Roman garrison in order to be safe from the rebels. Josephus, who was obliged to heed the insistence of his followers, tried to punish the city before the Romans arrived; but hearing that the last-named were on the way he beat a retreat. When the troop sent by Cestius Gallus had entered Sepphoris, it was no longer possible for Josephus to storm the city. A few days later the Romans made a sortie, and Josephus was defeated ("Vita," §§ 67-71). He was more successful against Sylla, a lieutenant of King Agrippa, whom he put to flight beyond the Jordan (*ib.* §§ 72, 73).

In the spring of 67 the Romans under Vespasian and Titus began the war. Josephus was encamped near the village of Garis, not far from Sepphoris; but he was forced to draw back upon Tiberias because his men had fled at the approach of the Romans (*ib.* § 71; "B. J." iii. 6, §§ 2-3). He demanded of Jerusalem whether or not he should treat with Vespasian, and asked for reenforcements. The Sanhedrin was unable to comply with his request; and Josephus entrenched his troops at JOTAPATA (May, 67), which place was besieged by Vespasian on the following day. Josephus had recourse to all possible stratagems; but in spite of these and of marvelous deeds of valor performed by the defenders, the Romans, after a siege of forty-seven days, forced their way into the city, which with the fortifications was razed to the ground (July, 67). Josephus escaped into a cistern connected with a cave in which he found forty soldiers. Their hiding-place was discovered; and Josephus, whose life had been assured to him by the Romans through the intervention of a friend named Nicanor, escaped only by playing a trick on his companions. He persuaded them to kill each other after drawing lots, but arranged to be the last, and then surrendered to the Romans with one companion ("B. J." iii. 8, §§ 1-8). Led before Vespasian, Josephus, asserting earnestly that he possessed the prophetic gift, prophesied that that general would become emperor (*ib.* § 9). According to the Talmud, Johanan b. Zakkai had made the same prophecy, and heathen priests had foretold the accession of Vespasian and Titus to the imperial throne (see Schürer, "Gesch." i. 613). Josephus' actions from this time on do not cover him with glory; and the suspicion of treachery rests heavily upon him.

Wins Favor of Vespasian.

Josephus, when Vespasian gave him his freedom ("B. J." iv. 10, § 7), according to custom adopted Vespasian's family name, "Flavius"; and when Vespasian became emperor, Josephus accompanied him to Alexandria ("Vita," § 75). While still a prisoner he married, at Vespasian's command, a Jewish captive from Cæsarea. She, however, did not remain with him long, but left him when he was in Alexandria. It seems, however, that he had already been married some time before, and that his first wife, as well as his mother and all his aristocratic relatives, remained in Jerusalem during the siege ("B. J." v. 9, § 4). Josephus returned to Palestine in the suite of Titus ("Vita," § 75; "Contra Ap." i. 9); and during the siege of the capital he was compelled, at the risk of his life, to call upon the rebellious Jews to surrender. On the one hand, the Jews desired to capture and punish him; on the other, the Romans, whenever they were beaten, held him for a traitor. Titus, however, paid no heed to the accusations of the soldiers ("Vita," § 75). After the capture of Jerusalem, he gave Josephus permission to take whatsoever he chose. The latter took a few sacred books and asked only for the freedom of certain persons. He rescued 190 women and children who had been shut up in the sanctuary. He also begged Titus to rescue three persons whom he found crucified; and one of them actually recovered by careful nursing (*ib.*). As a Roman garrison was to be placed upon Josephus' estate near Jerusalem, Titus gave him other land in the plain. He returned with Titus to Rome, and there received high honors from Vespasian, including Roman citizenship and a yearly pension. He received also a fine estate in Judea, so that he was able to devote himself to writing without pecuniary anxiety. Josephus was occasionally calumniated by his coreligionists. Thus a certain Jonathan, who had raised a rebellion in Cyrene, claimed that he had received arms and money from Josephus; but Vespasian was not misled by the falsehood (*ib.* § 76; "B. J." vii. 11, §§ 1-3). The emperor Domitian punished certain Jews who had slandered Josephus; and he freed the Judean estate of his favorite from taxes. Josephus was also in favor with the empress Domitia.

The woman married by Josephus in Alexandria bore him three sons, of whom only one, Hyrcanus, was living at the time that the "Vita" was written. He divorced her and married a Jewess from Crete, who bore him two sons, Justus, in the seventh year of Vespasian, and Simonides, surnamed "Agrippa," two years later. Josephus' autobiography was written after the death of Agrippa II. ("Vita," § 65), which occurred in the third year of Trajan (*i.e.*, 100). The date of Josephus' death is uncertain. It is said that a statue of him was erected in Rome after his death (Eusebius, "Hist. Eccl." iii. 9; Jerome, "De Viris Illustribus," § 13).

Josephus' numerous and comprehensive writings are of value not only for the historical data which they contain, but also as an apology of Judaism. His works are:

(1) **"Concerning the Jewish War"** (Greek, *Περὶ τοῦ 'Ιουδαϊκοῦ Πολέμου*), usually cited as "Bellum Judaicum," in seven books ("Ant." xx. 11; "Vita," § 74); in some manuscripts and in Stephan Byzant (*s. v. Φασαηλίς*), *Ιστορία 'Ιουδαϊκοῦ Πολέμου Πρὸς 'Ρωμαίους*, which Niese holds to be correct. Von Gutschmid, however ("Kleine Schriften," iv. 343), accepts the title *Περὶ 'Αλώσεως* ("Concerning the Capture"), found in most manuscripts; but this title probably originated in Christian circles. The division into seven books belongs to Josephus himself ("Ant." xiii. 10, § 6; xviii. 1, § 2), and was known to Porphyry ("Peri Apoches," iv. 11, p. 76). In addition to a long introduction, they cover the period from Antiochus Epiphanes to the minor events that followed the war. Josephus wrote this history originally in Aramaic, in order that it might be read by the Jews in Parthia, Babylonia, Adiabene, Arabia, etc. ("B. J." Preface, § 2). At a later time he decided to publish the history of the war in Greek also, and for this he had to receive help from others in the matter of style ("Contra Ap." i. § 9). The supposition is possible that the original, which is entirely lost, was not as favorable to the Romans as was the Greek version.

The Works of Josephus.

Josephus gives as his reason for writing this history the contradictory reports circulated either to flatter the Romans or to disparage the Jews (*ib.* § 1). He himself pretends not to have flattered the Romans, though he is distinctly partial to them. He emphasizes his exactness (*e.g.*, "Vita," § 4); but his claim thereto is justified only when he states bare facts. He writes partly as an eye-witness and partly from reports obtained from eye-witnesses ("Contra Ap." i. § 9); and he had already begun to make notes during the siege of Jerusalem. Both Vespasian and Titus, to whom the work was submitted, praised his accuracy. The latter even wrote on the manuscript that it ought to be published ("Vita," § 65). King Agrippa II. testified in no less than sixty-two letters that he found the account accurate (*ib.*); and similar praise was given by relatives of the king ("Contra Ap." i. § 9). His rival, Justus of Tiberias, wrote his history twenty years later, while Josephus described the war immediately after the events ("Vita," § 65).

The work was presented to Vespasian, and must therefore have been completed before the year 79. The last events mentioned are of the year 73; but the account must have been written after the year 75: for Josephus refers to the Temple of Peace as being already finished ("B. J." vii. 5, § 7). It is necessary to assume a period of a few years between the end of the war and the final composition, other works on the war having already been published, as the introductions to the "Bellum Judaicum" and to the "Antiquitates Judaicæ" show. For the events preceding the war the same sources must be assumed as for the "Antiquities." The events of the war itself he knew exactly except the occurrences in the beleaguered city of Jerusalem, which facts he could get only from deserters. For the events within the Roman camp he doubtless made use of Vespasian's "Memorabilia." The statement of Sulpicius Severus ("Chron." ii. 30, § 6), that the Temple was burned at the express command of Titus, has not the credence possessed by Josephus' account ("B. J." vi. 4, §§ 5–7), which is to the effect that this happened contrary to the will of Titus. Schlatter's supposition, that Josephus is less creditable than Julianus Antonius, is unfounded.

(2) **"The Antiquities of the Jews"** (Greek, *'Ιουδαικὴ 'Αρχαιολογία*; Latin, "Antiquitates Judaicæ"). This is the most important of his works, and, indeed, one of the greatest of all antiquity. It comprises twenty books, and is so arranged that it might be placed side by side with the Roman history of Dionysius of Halicarnassus, which likewise consisted of twenty books. It was the purpose of Josephus to glorify the Jewish people, so often misunderstood, in the eyes of the Greco-Roman world. He wrote it in the thirteenth year of Domitian (93) and in the fifty-sixth year of his life. It commences with the creation of the world, and carries the history of the Jews down to the outbreak of the war in 66. In this stupendous work the individual books are preceded by an introduction which briefly indicates their contents; but it is doubtful whether these originated with Josephus. The work falls into the following divisions:

(a) **Book i. ch. 7 to Book xi. ch. 6,** parallel with the books of the Bible from the creation of the world to the rescue of the Jews under Artaxerxes in Persia. Here Josephus desires only to reproduce in Greek what may be read in the Hebrew Scriptures ("Ant." Preface, § 3; x. 10, § 6). He has, however, omitted or endeavored to excuse whatever might give offense. The story of the Golden Calf is wholly lacking; and excuses are found for the murmuring of the children of Israel. The Septuagint is used throughout, and even its style is imitated, though at times he deviates from this source (comp. "Ant." vi. 4, § 1, with I Sam. ix. 22). As a learned Pharisee, Josephus must have known enough Hebrew to make use of the original: this is shown by his explaining numerous Hebrew proper names, as the Hellenist Eupolemus had done before him; see, for example, "Ant." i. 1, § 2 (comp. Gen. iii. 20); i. 4, § 3 (comp. Gen. xi. 9, LXX.); iii. 7, § 3 (comp. Ex. xxviii. 40; xxxi. 2, LXX.); iii. 12, § 3 (comp. Gen. xxv. 10); viii. 5, § 3 (comp. I Kings ix. 13, LXX.).

The myths and legends scattered through this narrative deserve special attention. Eusebius ("Demonstratio Evangelica," vi. 39) had already noticed that the traditions (*δευτερώσεις*) of the Rabbis are to be found in Josephus' work; and it is from him that many haggadot came to the Church Fathers. Josephus remarks (see B. M. 86b) that every one of the three angels who appeared to Abraham had a special mission. This is also found in Philo ("De Abrahamo," §§ 22, 28) and in Justin Martyr ("Dial. cum Tryph." § 56). The story of the Patriarchs and of Moses is especially rich in such legends. He extols the beauty of Moses and relates how even as a child the latter frightened Pharaoh; and he gives the name of Pharaoh's daughter, all of which is to be found in Talmud and Midrash. The haggadot are told in an attractive manner; and their appearance here shows their antiquity.

Importance for Biblical Exegesis.

Although Josephus' treatment of Biblical data is very free, it is of importance for the history of Biblical exegesis. He gives the number of books in the Bible as twenty-two, whereas the Rabbis count twenty-four. He makes use of Hellenistic allegory; and his symbolization of the Tabernacle and of the priestly garments is similar to that of Philo ("Ant." iii. 7). He is very careful to emphasize the humanity and the high moral contents of the Law (*ib.* xvi. 2, § 4). He is usually in harmony with the rabbinical Halakah. The blasphemer against God, after having been stoned, is hanged (*ib.* iv. 8, § 6; comp. Sanh. 45b). The law concerning injury done to a woman with child (Ex. xxi. 22) makes a second fine obligatory, besides the one paid to the woman's husband, because the population has been diminished ("Ant." iv. 8, § 33)—a point of view not taken in the Halakah. Wishing to represent Jewish law as favorably as possible, he states that a judge who accepts a bribe is to be punished with death ("Contra Ap." ii. 27), which is not at all the case. The command in Ex. xxii. 28 is used by Josephus for the following excellent doctrine: "Let no one blaspheme those gods which other cities esteem such; nor may any one steal what belongs to strange temples nor take away the gifts that are dedicated to any god" ("Ant." iv. 8, § 10), which was not in the spirit of the Pharisees toward idolatry. He says that the whole city was interdicted to leprous persons ("B. J." v. 5, § 6), whereas it was only the Temple which they might not enter. Josephus goes farther than the Bible, in order to destroy the fable that Moses was afflicted with leprosy. He teaches that the first-born, not only of an ass, but of all unclean animals, is to be redeemed ("Ant." iv. 4, § 4), in order to remove all grounds for the idea that this animal occupied a peculiar position in Jewish law (see Ass-Worship), an elaboration of the law found also in Philo. In other respects Josephus presents an older stratum than does the rabbinical Halakah; *e.g.*, when he interprets Lev. xxii. 28 to mean that an animal may not be sacrificed on the same day with its mother (*ib.* xii. 9, § 4), having in view an older period when people ate only the meat of sacrifices. This is also held by Geiger, who sees in it traces of the Sadducean standpoint. In other cases Josephus gives the practise as it obtained in his day; namely, that the high priest, and not the king, read the Law on the Feast of Tabernacles in the seventh year ("Ant." iv. 8, § 12).

That Josephus wrote wholly from a Jewish point of view may be seen from his misunderstanding of the use of terms by non-Jewish authorities. This was the cause, for instance, of his placing the capture of Jerusalem by Pompey upon the Day of Atonement ("Ant." xiv. 4, § 3), where really a Sabbath was intended; he does not seem to have known that the Gentile authorities were in the habit of calling the Sabbath a fast-day. Josephus shows himself perfectly familiar with Jewish practical life; and it is wrong to suppose that his knowledge is faulty, or that with the lapse of time he had forgotten much (Olitzki, "Flavius Josephus und die Halacha," pp. 25, 27). He had intended to write a separate work on the laws; and therefore he treats some briefly, while others he does not mention at all.

Non-Biblical Authors Cited.

Josephus wished to confirm the Biblical data wherever they came in touch with the history of other peoples. In the first eleven books the following non-Biblical authors are cited: Berosus, Hieronymus the Egyptian, Mnaseas, Nicholas of Damascus (i. 3, § 6); Manetho, Berosus, Mochus, Hestiæus, Hieronymus, Hesiod, Hecatæus, Hellanicus, Acusilaus, Ephorus, Nicholas (*ib.* § 9); the "Sibyl" (apparently the pagan Sibyl, as the term *οἱ θεοί* shows; see Stade's "Zeitschrift," 1895, xv. 161), Hestiæus (i. 4, § 3); Berosus, Hecatæus, Nicholas (i. 7, § 2); Malchus, after a quotation from Alexander Polyhistor (i. 15); Homer (vii. 3, § 2); Nicholas (vii. 5, § 2); Menander, Dion (viii. 5, § 3); Herodotus (*ib.* 6, § 2; 10, §§ 2, 3); Menander (*ib.* 13, § 2; ix. 14, § 2); Herodotus, Berosus (x. 1, § 4); Berosus (*ib.* 2, § 2); Berosus, Megasthenes, Diocles, Philostratus (*ib.* 11, § 1). Josephus had not read all these authors; but he probably obtained his citations from the great works of Alexander Polyhistor, Nicholas of Damascus, and Strabo (the citations have been collected by Th. Reinach, "Textes d'Auteurs Grecs," Paris, 1895). It may here be noted that just as frequently as in the early parts of his "Antiquities," Josephus refers to ancient authors in his "Contra Apionem"; indeed he quotes the same passage from Herodotus (ii. 104) incorrectly in the former work ("Ant." viii. 10, § 3), while he gives it correctly in the latter ("Contra Ap." i. § 22).

Von Gutschmid (*l.c.* iv. 562) believes that Josephus follows Herodotus in Egyptian matters only, and that he uses Manetho from a secondary source. This is denied by Sethe ("Sesostris," pp. 3, 5, 19), but is justly affirmed by A. Wiedemann (in "Theologische Litteratur-Zeitung," 1901, p. 186). In the "Contra Ap.," however, Josephus has undoubtedly made use of Manetho. His familiarity with ancient history is evidenced by his information concerning Shalmaneser IV. (Lehmann, "Beiträge zur Alten Gesch." 1902, ii. 125–140).

(b) Book xi. ch. 7 to Book xiii. ch. 7, covering the period from Ezra and Nehemiah to the death of Simon Maccabeus. Here Josephus is very poorly informed. In addition to the canonical Ezra and Nehemiah he had before him an apocryphal Ezra. He uses the Septuagint to Esther together with its addenda, and, for the history of Alexander the Great, some Hellenic account containing legendary material. This is followed by a longer extract from pseudo-Aristeas (xii. 2), and by the history of the Tobiads, which has been variously estimated. On account of the chronological difficulties, it has been held by many to be purely legendary; whereas

A. Büchler holds at least the kernel to be historical (see TOBIADS). Josephus certainly had it from a written source. For the period 175–135 B.C. Josephus has a reliable authority in I Maccabees. He does not seem to have been acquainted with II Maccabees. He uses Polybius (see xii. 9, § 1) where Jewish history touches that of neighboring peoples; and where Polybius ceases (143 B.C.) he uses other historians. He must also have had access to the genealogy of the high priest; it is known that such genealogies were kept by the Jews.

(c) Book xiii. ch. 8 to Book xvii. ch. 12, from the death of Simon to the accession of Archelaus. For the beginning of this period Josephus must have used a Jewish source—probably the chronicle mentioned at the end of I Maccabees—containing much legendary material, because he praises Hyrcanus highly and credits him with the gift of prophecy ("Ant." xiv. 10, § 7). He relates similar legends concerning Aristobulus I.; and only for the period beginning with Alexander Jannæus did he make use of a good authority. Here a Talmudic narrative (Ḳid. 66a) makes it possible to control Josephus ("Ant." xiii. 10, §§ 5, 6; "R. E. J." xxxv. 28). For the years 137–135 B.C. Josephus had good authorities in Strabo, whom he often quotes, and Nicholas of Damascus, not only where he cites them by name, but also for the general narrative (B. Niese, in "Hermes," xi. 470, and H. Bloch, "Die Quellen des Flavius Josephus," p. 92, to the contrary). Both Strabo and Nicholas go back to Posidonius, whom Josephus once names explicitly ("Contra Ap." ii. § 7). He also cites Timagenes ("Ant." xiii. 11, § 3; 12, § 5), Asinius Pollio, and Hypsicrates (xiv. 8, § 3), the latter two in quotations from Strabo. Livy is mentioned once (xiv. 4, § 3). For the story of Herod, Nicholas is the chief source; perhaps also the "Memorabilia" of Herod (xv. 6, § 3).

(d) Book xvii. ch. 13 to Book xx. ch. 11 (ch. 12 is an epilogue of the whole work), divided into three groups: (1) a meager history of the successors of Herod; (2) a description of events in Rome under Caligula and Claudius, given in much detail, for which Josephus' authority seems to have been Cluvius Rufus ("Ant." xix. 1, § 13); also the history of Agrippa I. from verbal information; and (3) the chronicle of the high priests (*ib.* xx. 10).

Throughout divisions (*b*), (*c*), and (*d*) Greco-Roman decrees in favor of the Jews are interspersed, which Von Gutschmid (*l.c.* iv. 351) believes to be the most valuable records that writers have handed down from antiquity. Josephus claims to have seen them in the state archives at the Capitol at Rome ("Ant." xiv. 10, § 26). These, however, can have been only the records of the deliberations of the Senate. The decrees of the cities in Asia Minor must have come from the archives of the Jewish communities there. They are so loosely connected with the main work that Ritschl (in "Rheinisches Museum," xxviii. 599) and Mendelssohn ("Senatus Consulta Romanorum," etc., pp. 112, 156) believe that the later part of the "Antiquities" contains merely a collection of material. Niese, however (in "Hermes," xi. 466), holds that the work is uniform and that the decrees are those collected by Nicholas of Damascus. Willrich ("Judaica," p. 40) considers them to be the decrees collected by Agrippa I. in defense of the Jews (Philo, "Legatio ad Caium," § 28). The following corrections must be made in the dates: "Ant." xiii. 9, § 2, year 122 (not 133); xiv. 8, § 5, year 128 (not 139); xiv. 10, § 22, year 112 (not 133) (Unger, in "Sitzungsberichte der Münchener Akademie," 1895, p. 551).

Josephus uses throughout the Macedonian names of the months (Niese, in "Hermes," 1893, p. 197), commencing with Nisan 1 of the year 311–310 (Unger, *l.c.* 1896, p. 360). In dating the Maccabean princes, Josephus uses the Egyptian system, in which the governmental and calendric years were harmonized by making the two begin with every first of the month Toth. The Mishnah shows that this system of dating was in use among the Jews (R. H. i. 1). Josephus had taken the system either from Nicholas or from Strabo; with Agrippa I. he ceases to use it. Olympiads and consular dates are found only in accounts which go back to Nicholas and Strabo; the Seleucid era in that period is based upon I Maccabees. Not one of the dates of the Persian kings mentioned in the Old Testament has been converted into its corresponding Olympiad year (Unger, in "Sitzungsberichte," 1896, pp. 360–364).

(3) "Autobiography" (Βίος; "Vita"), chiefly a description of the author's activity as governor of Galilee, written because Justus of Tiberias had placed the blame for the revolt on Josephus. From the beginning the author represents himself as a partizan of the Romans, and therefore a traitor to the interests of his people. He thereby flatly contradicts many things said in the "Jewish War," which latter is more trustworthy. The "Vita" must have been written after the death of Agrippa II. (100 C.E.). From the conclusion of the "Antiquities" it appears that the "Vita" pretends to be merely an appendix; and Eusebius ("Hist. Eccl." iii. 10, § 8) cites a passage from it, designating it as occurring at the end of the "Antiquities," which was written in 93 C.E. It seems that Josephus had the plan of the "Vita" in mind when he wrote the concluding words of the "Antiquities," but did not publish it until after the death of Agrippa, when he inserted the remark that Justus had not dared to appear with his history while Agrippa was yet alive.

(4) "Against Apion," or "The Great Age of the Jewish People," directed against the calumnies which were circulated at that time against the Jews, and therefore a valuable apology even to-day. The author's chief aim is to prove the antiquity of the Jewish people; and the real title was therefore *Περὶ τῆς τῶν 'Ιουδαίων 'Αρχαιότητος* ("Concerning the Antiquity of the Jews"); *Πρὸς τοὺς "Ελληνας* or *κατὰ 'Ελλήνων* ("Against the Hellenes"). The present title, "Contra Apionem," is first found in Jerome ("De Viris Illust." ch. xiii.). The two books are found intact only in the Latin translation. The work must have been written later than 93 C.E., since the "Antiquities" is cited ("Contra Ap." i. 1, § 10). Like the "Antiquities," the "Contra Apionem" is dedicated to Epaphroditus, who was either a freedman and secretary of Nero or a grammarian in Rome.

A few other works are incorrectly attributed to Josephus; *e.g.*, the so-called "Fourth Book of Maccabees," or a work entitled "Concerning the All," cited by Photius ("Bibliotheca," Codex 48).

At the conclusion of the "Antiquities" Josephus says that he proposes to write "Concerning our [the Jewish] doctrine, in four books: concerning God, His nature, and concerning the laws, why, according to them, certain things are permitted and others are forbidden." He refers at times to his intention to treat more fully of some of the laws ("Ant." i. 10, § 5; iii. 11, § 2), which is partially carried out in the "Contra Apionem." This would then stand in the same relation to the "Antiquities" as the "Vita" does to the "Jewish War." He refers also to a more extensive historical work in such terms as "As has already been stated in other works," or "we have stated." Most of these references are in the "Antiquities"; but some are found in the "Jewish War," which can not therefore be the work referred to. Destinon ("Die Quellen des Josephus," p. 21) supposes that Josephus simply copied this formula from his original, perhaps from Nicholas of Damascus (A. Büchler, in "J. Q. R." ix. 318). Unger, however, more properly concludes that Josephus refers to a large work, now lost, and dealing with the history of Syria from the time of Alexander the Great to its incorporation in the Roman empire.

When his people in Galilee wished to compel two Gentiles, who had come to them, to enter the Abrahamic covenant, Josephus would not permit it, saying, "Every one ought to worship God according to his own inclinations, and ought not to be constrained by force" ("Vita," § 23). The Jews were to have one holy city, one temple, and one altar ("Ant." iv. 8, § 5). That he interprets even Biblical subjects freely only to please his Greek readers is seen in his mention of the destruction of Sodom as though it were only a mere incident that people would casually relate ("B. J." iv. 8, § 4). Otherwise, he naturally holds that the Biblical books "are truly reliable" ("Contra Ap." i. 8). He asserts that the Prophets wrote all the old historical Jewish writings, and he ascribed the gift of prophecy to John Hyrcanus and claimed it for himself. He frequently refers to the Divine Providence watching over Israel: but he also knows of the "Fatum" of the Greeks and Romans; and he himself inclines to the teachings of the Stoa ("Vita," § 2). He shows familiarity with the teachings of Plato in regard to the soul and the Pythagorean doctrine of its preexistence ("B. J." vii. 8, § 7). A new and better life beyond the grave is assured to those who preserve the laws and are capable of dying for them ("Contra Ap." ii. 31). He often speaks of the Messianic idea as having caused the revolution; but he never expresses his own opinion in regard to the Messiah, doubtless out of consideration for the Romans. The godless zealots are to blame for the destruction of the Temple ("B. J." iv. 6, § 3); but the people will come again to its senses during its servitude ("Ant." xx. 8, § 5; "B. J." v. 1, § 3); and the reestablishment of the sanctuary may be hoped for ("B. J." *l.c.*; "Ant." iv. 8, § 46).

His Biblical Interpretation.

Josephus' orthodoxy and piety are thus beyond doubt; but his conduct during the great Jewish war shows him in a very doubtful light. Justus of Tiberias and John of Giscala accuse him of treachery, hypocrisy, and of the perversion of facts. The other witnesses of his deeds, the Rabbis, are silent concerning him. Josephus lost his importance for following generations, which practically ignored him, yet some references to him exist. Although it has not been proved that the Joseph ha-Kohen mentioned in Ḥallah iv. 11 and M. Ḳ. 23a is really Josephus, the story of the four wise men of Jerusalem who sought out a philosopher in Rome (Derek Ereẓ R. v.) may, however, refer to him (Vogelstein and Rieger, "Gesch. der Juden in Rom," i. 29). In place of Josephus there appeared in the tenth century a Hebrew pseudo-Josephus (see Joseph ben Gorion). The idea which the later Jewish chroniclers had of Josephus is wholly false (see "Seder ha-Dorot," i. 123, Warsaw, 1903). Isaac Abravanel complains of his distortion of the Biblical narratives in order to curry favor with the Romans. Azariah dei Rossi is the first Jew to value him at his real worth.

The works of Josephus were rescued by the Christian Church, for whom, like Philo, the author occupies the rank of a Church father. The "Antiquities" was of importance because it illuminates the history of the New Testament and on account of the few notes which it contains dealing with Christendom. Josephus mentions John the Baptist; James, the brother of Jesus; and Jesus himself ("Ant." xviii. 3, § 3). In its present form, this passage can not have originated with Josephus (see Jesus). Eusebius ("Hist. Eccl." iii. 9, § 2) considers Josephus to have been the most learned man of his day; and Jerome ("Ep. xxii. ad Eustachium") calls him "the Greek Livy." The Byzantine chroniclers based their writings largely upon Josephus; and his "Antiquities" was taken over into many works (see Hegesippus). It can not be denied that he possessed extraordinary literary talents; and his desire to glorify his people ought not to be accounted to his dishonor. It is true that he was disingenuous in his dealings with his people; but he wrote an exemplary apology for them. He was vain and self-seeking; but he also fought and worked much; and his condemnation by such historians as J. Salvador and Graetz is certainly too severe.

Importance for the Christian Church.

Editions and Translations of Josephus' Works: In the Occident Josephus has become known chiefly through a Latin translation of all his works, with the exception of the "Vita," and through a free Latin redaction of the "Jewish War." Jerome ("Ep. lxxi. ad Lucinium") says that he could not accomplish the difficult task of translation, but that it was generally recognized that a Latin translation was necessary. Cassiodorus ("De Institutione Divinarum Literarum," ch. xvii.) caused a translation of the "Antiquities" and "Contra Apionem" to be made in the sixth century; but one of the "Jewish War," generally ascribed to Rufinus, had existed from about the fourth century. A free Latin translation was made under the name of Hegesippus or Egeosippus. Hegesippus compresses the seven books of the "Jewish War" into five; he shows himself throughout to be a Christian; and has inserted extraneous matter (*e.g.*, concerning Simon Magus, "B. J." iii. 2), especially of a geographical nature. The author, therefore, was probably a pilgrim to Palestine. The first edition of Hegesippus appeared in Paris in 1510, and the work has often been republished. The best edition is that of Weber and Cæsar, Marburg, 1864.

A correct Latin translation appeared first in Augsburg in 1470; the best edition is that of Basel, 1524. A critically correct text of the "Vetus Latinus" exists as yet only for the two books of "Contra Apionem" (ed. C. Boysen in "Corpus Scriptorum Ecclesiasticorum Latinorum," vol. xxxvii., Vienna, 1898). Concerning the character of the translation, Boysen observes (p. xlii.) that the translator has neither grasped the meaning of Josephus nor been able to accommodate himself to his style; nor has he understood how to translate the difficult Greek words.

A Syriac translation of book vi. of the "Jewish War" is contained in the Peshitta manuscript of the Ambrosianus in Milan, in which it is called "The Fifth Book of Maccabees." The beginning of it was published by Ceriani in 1871; the complete text—a photographic reproduction of the manuscript—was issued by him at Milan in 1876–83, and was republished with German translation by H. Kottek, Berlin, 1886 (see R. Gottheil in "Hebraica," iii. 3, 136, New Haven, 1887).

Syriac and Hebrew.

In consequence of the apologetic character of the "Contra Apionem," a Hebrew translation of it exists, printed together with Abraham Zacuto's "Yuḥasin" (Constantinople, 1566; London, 1857) and also separately under the title "Ḳadmut ha-Yehudim" (Lyck, 1858). The translation was not made by Zacuto, though he often made use of Josephus in his chronicle, but was appended to the "Yuḥasin" by its first publisher, Samuel Shullam. This Hebrew translation is very free, whole phrases of the text being omitted, and was probably made with the aid of the Latin translation.

In Modern Languages.

New Latin translations of most of the works are contained in the editions by Hudson, Havercamp, Oberthür, and Dindorf. A German translation made from the Latin (Strasburg, 1531) appeared even before the first Greek editions, and was later revised after the Greek (*ib.* 1561). Mention should also be made of the German translations of all the works, by Ott (Zurich, 1735–36), Cotta (Tübingen, 1736), and C. R. Demme (7th ed. Philadelphia, 1868–69); of the translation of the "Antiquities" by K. Martin (Cologne, 1852–53; 2d and 3d eds. by Kaulen) and by Clementz (Halle, 1900). German translations have been made by Jews as follows: books xi. and xii. of the "Antiquities" by Horschetzky (Prague, 1826); book xiii. by the same (Gross-Kanizsa, 1843); the "Vita" by M. J(ost); "Contra Apionem" by the same, both in the "Bibliothek der Griechischen und Römischen Schriftsteller über Judenthum und Juden," Leipsic, 1867; "Contra Apionem," abridged by Z. Frankel (in "Monatsschrift," 1851-52). In English may be mentioned the translation of the "Vita" and of the "Jewish War" by R. Traill (ed. J. Taylor, London, 1862), especially prized on account of its valuable supplements; and Whiston's translation of the entire works, revised by Shilleto (3 vols., London, 1890). In French: "Œuvres Complètes de Flavius Josephe," by Buchon, Paris, 1894. Of a new French translation there have appeared to date: "The Antiquities," by Julien Weill, and "Contra Apionem," by Léon Blum, both under the direction of Th. Reinach. A Hungarian translation of the "Jewish War" from the Latin was made by V. Istóczi, Budapest, 1900. In Italian, the complete works were translated by Frater Angiolini (Verona, 1779; 2d ed. Rome, 1792). There are also Spanish, Portuguese, Dutch, Danish, Bohemian, and Russian translations of Josephus.

Greek.

The editio princeps of the Greek text of the entire works appeared at Basel in 1544. It was followed by the Geneva editions of 1611 and 1634, and by Ittig's, with learned prolegomena, Leipsic, 1691. The edition by Bernard, Oxford, 1700, based upon manuscripts, remained incomplete. For a long time Hudson's edition (Oxford, 1720), corrected after the manuscripts, was held with that of Havercamp (Amsterdam, 1726) to be the best. The editions of Oberthür (Leipsic, 1782–85) and of Richter (*ib.* 1826–1827) followed Havercamp's; also that by Dindorf, which is still used (Paris, 1845–47). Bekker's edition (6 vols., Leipsic, 1855–56) was also much used in its day. The "Jewish War," corrected after the manuscripts by Cardwell, appeared at Oxford in 1837. The most painstaking and valuable work has been done by Benedict Niese, who has published the text of Josephus' works in a large edition (Berlin, 1887–94) and also in a small one (*ib.* 1888–95). The review by Naber (Leipsic, 1888–96) was based upon Niese's works. Niese's labors have done much but by no means all that is necessary for the purification of the text. He committed the mistake of correcting the text independently of any manuscript authority; so that Josephus' works still await philological treatment by a master.

JOSHUA (JEHOSHUA): Name of several Biblical personages.

In Hebrew יהושוע (Deut. iii. 21; Judges ii. 7) and commonly יהושע (Judges ii. 7a; Ex. xvii. 9; Josh. i. 1) correspond to אלישוע = "helped by Yhwh," the shorter form being הושע = "help" or "one who helped" (Num. xiii. 8; Deut. xxxii. 44; here probably an error for יהושוע). The Septuagint has Ἰησοῦς; the Vulgate, usually "Josue," but "Jesus" in Ecclus. (Sirach) xlvi. 1; I Macc. ii. 55; II Macc. xii. 15, identical with ישוע, the post-exilic form of the name.

1. Biblical Data: The son of Nun; servant and successor of Moses. An Ephraimite (Num. xiii. 8), the grandson of Elishama, he is described as the chief of his tribe (I Chron. vii. 26, 27). At first named "Hoshea" (Num. xiii. 8 [A. V. "Oshea"]; Deut. xxxii. 44), he was called by Moses "Jehoshua" (Num. xiii. 16). Joshua first leaps into notice in the account of the defeat of the Amalekites in the desert, where he leads the picked troops of the Israelites (Ex. xvii. 8-14). Afterward he appears successively at the side of Moses as his servant (*ib.* xxiv. 13; xxxii. 17, 18); as the guardian of the Tabernacle (*ib.* xxxiii. 11); and as the zealous defender of Moses' prestige on the occasion of Eldad's and Medad's prophesying in the camp (Num. xi. 27-29). He is one of the spies sent to explore Canaan (*ib.* xiii. 9, 17). Returning from this errand, it is he who with Caleb allays the apprehension of the excited people, bravely taking the risk of being stoned to death (*ib.* xiv. 6-10). For this fidelity he and Caleb, alone of all the Israelites twenty years old and upward at the time of this episode, are to enter the promised land (*ib.* xiv. 30-38, xxvi. 65, xxxii. 12).

Nevertheless, during the following thirty-eight years of the desert migration no further mention is made of him. But when Moses is apprised of his own impending death, Joshua is pointed out as the one man to carry to completion the great leader's unfinished task. Moses is bidden to lay his hand upon him—"a man in whom is the spirit"—and thus to give him charge as his successor; which command is carried out (*ib.* xxvii. 16 *et seq.*). Joshua is to preside over the division of the land (*ib.* xxxiv. 17), but must keep the compact entered into with Reuben, Gad, and the half of Manasseh (*ib.* xxxii. 28).

Appointed Moses' Successor.

God assures Joshua of success in the leadership (Deut. xxxi. 14, 23); and he as the designated successor is with Moses when the great prophet addresses his last counsel to the people (*ib.* xxxii. 44).

At Moses' death Joshua was filled with "the spirit of wisdom" (*ib.* xxxiv. 9). Upon him devolved a twofold duty: to conquer the land, and to apportion it among the tribes (Josh. i. 1-5). Yhwh Himself encouraged him to be strong and to cling to the Law, which was never to "depart out of his mouth." After enlisting the cooperation of the kindred east-Jordanic tribes (*ib.* i. 6-18), his first concern was to spy out Jericho (*ib.* ii. 1). On receiving the report of his emissaries (*ib.* ii. 23, 24) he gave the necessary instructions for the crossing by the Israelites of the Jordan (*ib.* iii. 1-13). With the Ark of the Covenant carried by the priests in the van, on the tenth day of the first month of the forty-first year after the Exodus the Israelites set out to conquer the land. The river, miraculously divided as long as the priests with the Ark remained in its bed, was crossed north of Adam; and in memory of this occurrence Joshua erected over the place where the priests had been stationed a monument of twelve stones (*ib.* iv. 9). He also ordered that one man from each tribe should take each another stone from that spot and deposit it on the western bank as a memorial (*ib.* iv. 1-8, xx. 24). Here, at Gilgal, Joshua pitched his camp and remained for some time; and in order that all might be able to participate in the Passover, he directed that every Hebrew that had been born in the desert should be circumcised (*ib.* v. 2-8).

Jericho was the first city captured. After exploring it by spies Joshua invested it, finally capturing it in a miraculous manner (*ib.* v. 13-vi.). The ban was pronounced over the ruins, and all the inhabitants were destroyed save Rahab and her paternal family; they being spared because she had shown hospitality to the spies. Joshua became famous by this victory, but met a reverse at Ai in consequence of Achan's misdeed; however, after visiting condign punishment upon the offender he made himself master of the town, which was the key to the mountains rising west of the plain of Jericho. The Gibeonites made their peace with him, gaining advantageous terms by means of a clever ruse (ix. 3 *et seq.*). On Ebal and Gerizim he caused the blessings and the curses to be read (comp. Deut. xxvii.).

Conquest of Jericho.

While Joshua was thus engaged in the north, five of the southern rulers made an alliance to punish Gibeon; but they were completely routed at Makkedah by Joshua, who had hastened to the assistance of the Gibeonites. It was during this battle that a furious hail-storm set in, proving more deadly than the sword (Josh. x. 11), and on this occasion also, at Joshua's command, the sun stood still upon Gibeon and the moon in the valley of Ajalon (*ib.* x. 12-13a). The fugitive five kings were discovered hiding in a cave at Makkedah. By Joshua's orders the cave was closed with huge stones until the pursuit was over, when it was reopened and the kings, after having been thoroughly humiliated, were slain, their bodies being hanged on trees until the evening, when they were taken down and cast into the cave. Then followed the conquest of Libnah, Lachish, Eglon, Hebron, and Debir. In the south Joshua penetrated as far as Kadesh-barnea; in the west as far as Gaza (*ib.* x. 29 *et seq.*). Later on he routed the allied kings of the north at Lake Merom—Hazor being the head of these kingdoms—killing the inhabitants and burning the city of Hazor (*ib.* xi.).

Division of the Land.

In this manner Joshua within a few years (*ib.* xiv. 7; comp. verse 10) had made himself master of the whole country with the exception of the Philistine and Phenician coasts. Still he continued to guard in Gilgal his fortified camp; thence he governed the land (*ib.* xiv. 6), and there he began to allot the districts to the various tribes. Judah, Ephraim, and the half of Manasseh were the first to be settled, Caleb being allowed to take Hebron (*ib.* xiv. 12, xv.-xvii.). After this, Joshua removed the Tabernacle and the Ark from Gilgal to Shiloh, and took up his residence there (*ib.* xviii.). Here he continued the work of apportioning the rest of the land by lot according to the families (*ib.* xviii.-xix.). Cities of refuge, in accordance with the Law, were appointed (*ib.* xx.). Joshua himself received the city of Timnath-serah in Ephraim for an inheritance (*ib.* xix. 49, 50; xxiv. 30). Having thus completed his task, he gave Reuben, Gad, and the half of Manasseh permission to return to their east-Jordanic territory (*ib.* xxii. 1-9).

When he was "old and stricken in age" Joshua convened the elders and chiefs of the Israelites and exhorted them to have no fellowship with the native population (*ib.* xxiii.). At a general assembly of the clans at Shechem he took leave of the people, admonishing them to be loyal to their God, who had been so mightily manifested in the midst of them (*ib.* xxiv.). As a witness of their promise to serve Yhwh, Joshua set up a great stone under an oak by the sanctuary of Yhwh (*ib.* xxiv. 26-28). Soon afterward he died, at the age of 110, and was buried in Timnath-serah (*ib.* xxiv. 29-30).

E. G. H.

——**In Rabbinical Literature:** Joshua is regarded as the type of the faithful, humble, deserving, wise man. Biblical verses illustrative of these qualities and of their reward are applied to him. "He that waiteth on his master shall be honored" (Prov. xxvii. 18) is construed as a reference to Joshua (Num. R. xii.), as is also the first part of the same verse, "Whoso keepeth the fig-tree shall eat the fruit thereof" (Yalḳ., Josh. 2; Num. R. xii. 21). That "honor shall uphold the humble in spirit" (Prov. xxix. 23) is proved by Joshua's victory over Amalek (Num. R. xiii.). Joshua was a wise man; hence in him was verified the saying, "With me [wisdom] kings shall rule" (Prov. viii. 15, Hebr.). Not the sons of Moses—as Moses himself had expected—but Joshua was appointed successor to the son of Amram (Num. R. xii.). Moses was shown how Joshua reproved Othniel (Yalḳ., Num. 776). Joshua's manliness recommended him for this high post. David referred to him in Ps. lxxxvii. 25, though without mentioning the name, lest dissensions should arise between his sons and those of his brothers (Yalḳ., quoting Sifre, *l.c.*).

Joshua was always at the front of the army, and did not, as other generals, remain in the rear (*ib.*) or in his tent. Moses in his lifetime appointed Joshua as his interpreter, ("meturgeman"), in order to forestall the possibility of his being looked upon as an upstart after Moses' death (Yalḳ., *l.c.*). Yet Moses' face was like the sun, and that of Joshua like the moon (*ib.*). Joshua had deserved the honor by his faithful service. He used to rise early in the morning and set in order the chairs in the house of assembly. Therefore, according to some, Moses raised up Joshua from the ground and took him on his knees, and he and the whole of Israel would lift up their heads to hear Joshua's words; but Joshua in his modesty exclaimed: "Blessed be Yhwh, who gave the Torah to Israel through Moses, our master" (Yalḳ., *l.c.*, quoting the Midrash Yelammedenu). The wisdom of Joshua is emphasized also in other connections (Ex. R. xi. and parallels). The prediction (Deut. xxxiii. 17) in the blessing of Moses is held to have come to pass in Joshua (Sifre, *ad loc.*). Moses possessed "hod" (splendor), but Joshua, only "hadar" (a lesser degree of fame; according to Friedmann, Sifre, 146b, note 11, this has reference to the fact that kingship was denied to Joshua); for if the former had been Joshua's portion he would have been absolutely irresistible. Joshua was given the strength of the ox but the beauty of the "re'em" (Sifre, *l.c.*; Yalḳ., Deut. 959). When Joshua upon his return with the spies found the people ungrateful, he was the only one that was shocked to the extent of both falling on his face, like Moses and Aaron, and rending his garments, like Caleb (Yalḳ., Num. 744).

His Faithful Service.

The Change in His Name.

Moses added the letter י to the name "Hoshea" (Num. xiii. 16) because he had prayed that God (יה) would keep Joshua from joining the conspiracy of the spies, and also because, as Caleb's reward was a portion of the land, Joshua's compensation was to be his own allotment and that of the other ten (= "yod") spies (Soṭah 34b; Tan. *ad loc.*; Num. R. xvi.). According to Yer. Sheb. vi. 1, the name "Hoshea" was changed as soon as Joshua entered the service of Moses, or at the latest after the victory over Amalek.

Joshua was among those who, too modest to call themselves "'ebed," were so dignified by God Himself (Sifre, Wa'etḥanan, cited in Yalḳ., Josh. 1). The spies whom Joshua sent to Jericho were Phinehas and Caleb (Yalḳ., *l.c.*). When Joshua commanded the sun to stand still he used the phrase דום (= "be still"; Josh. x. 12); for the sun kept on singing a song of praise as long as it was moving. The sun would not obey Joshua until he had assured it that he would sing God's praises himself (Yalḳ., *l.c.* 22). Joshua led and governed the people during thirty-eight years (Seder 'Olam R.; Yalḳ., *l.c.* 35). Israel is represented by the Rabbis as not very eager to pay him honor at his obsequies (Yalḳ., *l.c.*).

Married to Rahab.

Rahab is said to have become Joshua's wife. They had daughters but no son. From this union many prophets descended, and Hannah was Rahab's reincarnation. Rahab was ten years old when Israel left Egypt, and during the forty years intervening she was a great sinner; but when the spies visited her she became a proselyte. There is some doubt as to her having had only daughters by Joshua (see Zeb. 116b; Mek., Yitro [beginning]; Rashi to Josh. ii.; Yalḳ., Josh. 9; Meg. 14a; Gedaliah ibn Yaḥya, "Shalshelet ha-Ḳabbalah," p. 14a).

According to Pirḳe R. El. xlii., when Joshua was fighting for the Gibeonites the Sabbath was about to set in. Seeing the disinclination of his people to continue the battle at the risk of desecrating the Sabbath, and perceiving that the magicians of the heathen were inciting the constellations to help the cause of Israel's enemies, he spread out his hand toward the light of the sun and of the moon and "remembered upon them" the Ineffable Name, when both sun and moon stood still for thirty-six hours (Yalḳ., Gen. Lek Leka). The song intoned by Joshua after his victory is given in full in the "Sefer ha-Yashar" (chapter on Joshua). Joshua had appealed to Israel before crossing the Jordan not, as the text has it in the literal sense, to prepare provisions for the journey—that was not necessary, since the manna had not yet ceased falling—but to repent (Pirḳe R. El. vi.).

Joshua's name is associated with many "taḳḳanot," *e.g.*, the benediction upon entering the holy land (Ber. 48b); the license to graze on the plowed field of others without liability to a charge of robbery (B. Ḳ. 60b); the permission to gather wood in a neighbor's field (*ib.* 61b); the permission to gather grass anywhere (*ib.*); and seven other measures enumerated in Maimonides ("Yad," Nizḳe Mamon, viii. 5), regulating certain privileges, permitting certain natural or necessary acts (in open fields or when walking through vineyards), and assuring to the unknown dead buried by the community the undisturbed possession of his grave (see DEAD, DUTY TO THE; Bloch, "Die Institutionen des Judentums," i. 54-68, Vienna, 1879).

E. G. H.

——**Critical View:** Joshua's historical reality has been doubted by advanced critics, who regard him either as a mythological solar figure (Winckler, "Gesch. des Volkes Israel," ii. 96-122; Schrader, "K. A. T." 3d ed., p. 225) or as the personification of tribal reminiscences crystallized around a semi-mythical hero of Timnath-serah (= "Timnat Ḥeres"). Eduard Meyer, denying the historicity of the material in the Book of Joshua, naturally disputes also the actuality of its eponymous hero (Stade's "Zeitschrift," i.). These extreme theories must be dismissed. But, on the other hand, it is certain that Joshua could not have performed all the deeds recorded of him. Comparison with the Book of Judges shows that the conquest of the land was not a concerted movement of the nation under one leader; and the data concerning the occupation of the various districts by the tribes present so many variants that the allotment in orderly and purposed sequence, which is ascribed to Joshua, has to be abandoned as unhistorical.

Yet this does not conflict with the view that Joshua was the leader of a section of the later nation, and that he as such had a prominent part in the conquest of the districts lying around Mount Ephraim. The conquest of the land as a whole was not attempted; this final achievement was the result of several successive movements of invasion that with varied success, and often with serious reverses, aimed at securing a foothold for the Israelites in the trans-Jordanic territories. Joshua was at the head of the Josephite (Leah) tribes (comp. Judges i. 22, according to Budde; Joshua dies at the age of 110, as does Joseph), for whom the possession of the hill-country of Ephraim—Gibeon in the south and Ebal in the north—was the objective point. This invasion on the part of the Josephites was probably preceded by others that had met with but little success (comp. the story of the spies, Num. xiv.). But the very fact that while earlier expeditions had failed this one succeeded impressed for centuries the imagination of the people to such an extent that the leader of this invasion (Joshua) became the hero of folk-lore; and in course of time the plan of the conquest of the whole land and its execution were ascribed to him. He thus grew to be in tradition the leader of the united people—especially in view of the supremacy enjoyed by the tribe of Joseph, in whose possession was the Ark at Shiloh—and therefore the successor of Moses, and as such the chief in authority when the land was divided among the tribes.

Leader of Josephites.

Recollections of valorous feats performed in the days of these fierce wars with the aboriginal kings were transferred to Joshua and his time; battles remembered in fable and in song were connected with his name; natural phenomena (the blocking of the waters of Jordan by rocks, the earthquake at Jericho, the hail-storm before Gibeon) which had inspired semi-mythological versions were utilized to enhance his fame, all the more since they helped to vindicate his dignity as a second Moses. Snatches of popular songs, no longer understood because their original mythology had become unintelligible, were applied to his feats, and in turn gave rise to new accounts of his marvelous accomplishments (*e.g.*, at Ajalon). This process is perfectly natural, and has its analogues in the stories concerning other heroes; in fact parallels between his biography and that of Jacob have been discovered (Steuernagel, "Joshua," p. 150). But all this makes the historical reality of Joshua as the chief of a successful army of invasion all the more strongly assured. The chapters dealing with the division of the land must be dismissed as theoretical speculation, dating from a period when the tribal organization had ceased to exist; that is, from the Exile and perhaps later. The epilogues (the story of Joshua's gathering the elders or the whole people at Shechem before his death, Josh. xxiii.-xxiv. 28) are clearly the work of a Deuteronomic writer; and the scenes are conceived in imitation of Jacob's blessing (Gen. xlix.) or of Moses taking leave of the people and admonishing them before his transition. The cruelty imputed to Joshua—the ban against Jericho, for instance—is a trait corroborative of the historical kernel of the military incidents of his biography.

According to the Biblical accounts, Joshua had nowhere to meet a non-Canaanite power. The Flinders Petrie inscription recording Me(r)neptah's battle with Israel, located in Palestine (before 1200 B.C.; see EXODUS), is thus not to be referred to this period. Egypt's claim to suzerainty had become merely nominal after 1250 B.C. The empire of the

Hittites (*c.* 1200) had become disrupted into a number of small principalities. This would indicate that the incursion of Joseph-Israel must have taken place about 1230-1200 B.C. E. G. H.

2. Son of Jozadak or Josedech; high priest when the Jews returned under Zerubbabel from the Babylonian exile. His father had died in exile, and on the return from the Captivity Joshua was the first high priest to officiate (Hag. i. 1, 12, 14; ii. 2, 4; Zech. vi. 11; Ezra iii. 2, 8; v. 2; x. 18; Neh. xii. 26). Joshua was therefore born during the Exile. On the arrival of the caravan at Jerusalem, he naturally took part in erecting the altar of burnt offering and in laying the foundations of the Temple (Ezra iii. 2 *et seq.*). With Zerubbabel he opposed the machinations of the Samaritans (*ib.* iv. 3). Several of Haggai's utterances are addressed to Joshua (Hag. i. 1, ii. 2), and his name occurs in two of the symbolical prophecies of Zechariah (iii. 1-10, vi. 11-15). He is eulogized in Ecclus. (Sirach) xlix. 12, in the list of worthies, as one who "builded the house and exalted a people holy to the Lord, prepared for everlasting glory." In Ezra (ii., iii., iv., v., x.) and Nehemiah (vii. 7; xii. 1, 7, 10, 26) he is called "Jeshua."

E. G. H. B. P.

JOSHUA, BOOK OF.—Biblical Data: The first book of the second greater division in the Hebrew canon, the "Nebi'im," and therefore also the first of the first part of this division, the "Nebi'im Rishonim." It bears in Hebrew the superscription יהושע; in the Septuagint, using the post-exilic form of the name (ישוע; Neh. viii. 17), Ἰησοῦς (in some manuscripts with the addition of *υἱὸς Ναυῆ*); in the Peshiṭta, "Ketaba de-Yeshu' bar-Nun Talmideh de-Mushe" (Book of Joshua, son of Nun, the Disciple of Moses). It belongs to the historical books of the Old Testament, its theme being the invasion and conquest under Joshua of west-Jordanic Palestine and its apportionment among the tribes, with an account of the closing days and death of the great leader.

The book, which comprises twenty-four chapters, readily falls into two main parts and an appendix, which may be summarized thus: (1) the events following Moses' death; the invasion and capture of the land; (2) the division of the country; (3) the conduct of the Reubenites, etc.; two hortatory addresses by Joshua shortly before his death, followed by a brief gloss on his burial-place and the disposition made of the bones of Joseph. In detail the contents are as follows:

Part I., ch. i.-xii.

i.: After Moses' death, Joshua, by virtue of his previous appointment as Moses' successor, receives from YHWH the command to cross the Jordan. In execution of this order Joshua issues the requisite instructions to the stewards of the people for the crossing of the Jordan; and he reminds the Reubenites, Gadites, and the half of Manasseh of their pledge given to Moses to help their brethren.

ii.: Joshua sends out from Shittim two spies to explore the city of Jericho. They are saved from falling into the hands of the king by the shrewd tactics of Rahab. The spies return and report.

iii.-iv.: Camp is broken at Shittim. A halt is made at the Jordan. Joshua addresses the people; assuring them that YHWH, the living God, is in the midst of them, that He will drive out the Canaanites, and that the Ark will cross the Jordan, whereupon a miraculous change will be worked in the waters of the river. The predicted miracle takes place as soon as the priests with the Ark wade into the water. In commemoration of the event, Joshua orders two monuments to be erected: one in the river-bed; the other on the west bank, at Gilgal.

Crossing of Jordan.

The Reubenites, the Gadites, and the half of Manasseh number 40,000 warriors. The priests are bidden to come up out of the river's bed after the people have crossed over. This happens on the tenth day of the first month; and the camp is pitched at GILGAL.

v.: Joshua is bidden to make flint knives wherewith to circumcise the Israelites, for those born in the desert had not been circumcised. This is done; Pesaḥ is celebrated; and the manna ceases. Joshua in front of Jericho receives the visit of a "captain of the host of the Lord" in the guise of a man, who declares that the soil on which Joshua is standing is holy ground.

vi.: The siege and capture of Jericho; after thirteen circuits—one every day for six days, and seven circuits on the seventh day—with seven priests blowing seven rams' horns and the people shouting, the walls cave in. Jericho is put under the ban; but RAHAB is excepted. A curse is pronounced against any one who should rebuild the city. Joshua becomes famous throughout the whole land.

vii.: The miscarriage of the expedition against Ai, undertaken, upon the counsel of spies, with a very small force, strikes terror into the heart of the people and brings Joshua to the verge of despair. But YHWH announces that the people have sinned. As stated in the first verse, Achan has not respected the ban. The people must be reconsecrated. The sinner must be discovered by the casting of YHWH's lot. This is done. By a process of elimination the guilt is limited to the tribe of Judah, then to the clan of the Zarhites, then to the sept of Zabdi; the individual members of Zabdi are then brought forward, man by man, and finally Achan is detected as the culprit. He admits having taken a costly Babylonian garment, besides silver and gold; and his confession is verified by the finding of the treasure buried in his tent. Achan is taken into the valley of Achor, and there stoned to death.

viii.: Expedition against Ai, this time with the whole army. The city is taken by clever strategy, 30,000 men being placed overnight in an ambush. The attacking force feigning flight, the King of Ai is drawn far away from the city; Joshua points with his lance toward the city; whereupon the men in ambush rush into it, while Joshua and the army with him face about. Thus the pursuing enemy is taken between the two sections of Israel's array. Not one man escapes; the city is burned; 12,000 inhabitants are killed, and the spoils are taken. The King of Ai is hanged to a tree until nightfall, when his body is thrown into a pit, whereon a stone heap is raised. Joshua erects an altar on Mount Ebal as Moses had commanded, offering to YHWH holocausts and sacrificing peace-offerings.

On the stones of the altar he engraves a copy of the law of Moses; the people being ranged in two sections—one facing Ebal; the other, Gerizim—while the blessings and curses are read as ordained by Moses.

The Confederacy Against Joshua.

ix.: Confederacy of the native kings to fight Joshua. The Gibeonites by craft obtain a treaty from the Israelites, which even after the detection of the fraud practised upon the invaders is not abrogated. They are, however, degraded to be "hewers of wood and drawers of water" for the altar of Yhwh.

x.: Adoni-zedek brings about an alliance between the kings of Jerusalem, Hebron, Jarmuth, Lachish, and Eglon, and they ("the five kings of the Amorites") besiege Gibeon. In their distress the Gibeonites implore Joshua's help. Joshua, assured by Yhwh of victory, comes up from Gilgal by a forced night march and attacks the allies suddenly. Thrown into confusion, the Amorites flee as far as the ascent of Beth-horon. To this battle is referred a song from the Book of Jashar, commanding the sun to be still at Gibeon and the moon in the valley of Ajalon. The five kings are captured, first being incarcerated in the cave where they had hidden for safety, then, after the pursuit had been discontinued, —scarcely one of the enemies escaping—being by order of Joshua humiliated and hanged. Then follows a detailed enumeration of the cities captured and put under ban. Joshua becomes master of the whole land—the hill-country, the southland, the lowland, and the slopes—leaving not one king alive, and banning all men from Kadesh-barnea unto Gaza, and all the district of Goshen unto Gibeon. After this expedition he returns to Gilgal.

xi.: Jabin, King of Hazor, and his allies rendezvous at Merom. Joshua is assured by Yhwh of their total defeat, which in fact is brought about by a sudden attack on the part of Joshua. Pursuing them to a great distance (the cities are named), he hamstrings their horses and burns their chariots, capturing Hazor, killing all of its people, and burning the town. Other royal residences he takes by the sword, putting them under the ban. The spoils are taken, and the men are put to death. The cities on the hill are allowed to stand. Joshua drives the Anakim from the mountains, from Hebron, and from other places. Only in Gaza some remain. Finally the land has peace.

xii.: Recapitulation of Joshua's conquests, with statistical details of the number of the kings (30) captured and subdued.

Part II., ch. xiii.-xxi.

xiii.: After an enumeration of the places still unconquered (mainly the coast districts of the Philistines) Joshua is bidden to apportion the land, the unconquered as well as the conquered (verse 6b), among nine and one-half tribes of Israel, the other two and one-half tribes having under Moses been given their portion on the east of the Jordan (verses 14b-32).

xiv.: Résumé of the foregoing reference to Reuben, Gad, and the half of Manasseh, with a gloss concerning Levi's non-inheritance save as regards detached cities, while Joseph receives a double heritage (verses 1-5). Caleb's claim to Hebron is allowed.

xv.: The "lot" of Judah (verses 1-12). Caleb's share (13). Expulsion by him of the three Anakim (14). Story of Kirjath-sepher (16). Othniel takes it and wins, as promised, Caleb's daughter for wife (17). Her successful plea for the gift of wells (18). Catalogue of the heritage of Judah (20 *et seq.*). Gloss on the continued dwelling of the Jebusites in Jerusalem (63).

xvi.: Lot of the Josephites (1-3). The Ephraimites own cities in the territory of Manasseh (9). Gloss to the effect that the Canaanites dwelling in Gezer had not been driven out, but had been reduced to slavery (10).

xvii.: Lot of Manasseh, Machir as a warrior taking for his prize Gilead and Bashan (1). Delimitation of Manasseh (7). Manasseh's assignments in Issachar and Asher (11). Gloss stating that these cities had not been captured (12). Protest of the Josephites against receiving one share only (14). Joshua advises them to conquer the wooded hill-land (15). Plea on their part that the mountain is not extensive enough, while the plains are held by Canaanites equipped with iron chariots (16). Joshua's consolatory encouragement (17).

xviii.: Erection of the Tabernacle at Shiloh (1). Seven tribes without allotment. Joshua urges these to appoint commissions of three men out of each tribe to go and take the land and to report to him, when, after dividing it into seven portions, he will cast the lot (2-7). The commissions carry out the errand and lay their book of record before Joshua, who then casts the lot (8-10). Benjamin's share (11). The boundaries (12-20). List of the cities (21-28).

xix.: Simeon's share, in the territory of Judah. List of the cities (1-8). Reason why Simeon's lot was in Judean territory (9). Zebulun's share; its boundaries (10-14). Twelve cities not specified (15b). Issachar's share: its cities and boundaries (17-23). Asher's lot; its boundaries; summary gives twenty-two as the number of its cities (24-31). Naphtali's share; its boundaries and fortified cities (32-39). Dan's share; its cities enumerated (40-46). Why the Danites took Leshem = Dan (47). Joshua receives as his own share Timnath-serah (49-50). Eleazar and Joshua had assigned the lots before Yhwh at the gate of the Tabernacle at Shiloh (51). Cities of refuge established (51b-xx.).

xxi.: The Levites' assignment (1-8). Concluding paragraph, emphasizing God's fulfilment of His promise to the fathers (43-45).

Appendix, ch. xxii.-xxiv.

xxii.: Dismissal to their homes of Reuben, Gad, and the half of Manasseh with Joshua's blessing and an admonition to take heed of Yhwh's Law as commanded by Moses. Now that they have become rich in cattle, silver, gold, iron, and garments they are to divide the booty with their brethren (1-8). Return of the east-Jordanic tribes; they build an altar at the stone-heap on the bank of the Jordan; the Israelites desire to punish them for this act; but they first send Phinehas and ten princes to the Reubenites, etc., to censure them, recalling the Peor episode and advising them to remove to Palestine. The Reubenites explain that in building the altar their intention was to show their fidelity to Yhwh, that their descendants might not be taunted with being untrue to Him. The delegation rejoices at the explanation, and upon their report the Israelites abandon the projected punitive expedition (9-34).

xxiii.: Joshua, now old, calls an assembly of all Israel, at which he admonishes the people to remain loyal to the Torah of Moses.

xxiv.: An account of a gathering of Israel at Shechem, at which Joshua delivers an impressive address, reviewing the past, and makes the people vow to remain faithful. He erects a great stone as a witness to the promise (1-28). Joshua dies (29). Joseph's bones are buried in Shechem (32). Eleazar dies and is buried (33). E. G. H.

——**Critical View:** The Rabbis ascribe the authorship of the book, as of the last eight verses of Deuteronomy, to Joshua (B. B. 14b); the account of Joshua's death (Josh. xxiv. 29-32) was added, according to them, by Eleazar, the son of Aaron (B. B. 15a), and that of Eleazar's demise (Josh. xxiv. 33) by Phinehas (B. B. *l.c.*). But this view has been rejected by Isaac Abravanel (see preface to his commentary on the Earlier Prophets), who correctly observes that the use of the phrase עד היום הזה = "unto this day" (Josh. iv. 9, vii. 26, ix. 27, xiv. 14, xv. 62, xvi. 10) controverts this assumption, and that certain events mentioned in the Book of Joshua are recorded in the Book of Judges (xix. 45) as occurring "long after the death of Joshua" (Abravanel, "Comm. in Prophetas Priores," pp. 2b, col. 2; 3a, col. 1; Leipsic, 1686).

Views as to Authorship.

Christian commentators have for similar reasons contended that the book was by a later author, who had access to documents composed by Joshua or by contemporaries of his (Theodoret, "In Josue Quæst." xiv.). In the "Synopsis Sacræ Scripturæ" (xxviii., col. 309), attributed to St. Athanasius, the title of the book is explained not as the name of the author, but as indicating the hero of the events. Alphonsus Tostat ("Opera," Cologne, 1613; "In Josue I. Quæst." xiii.) rejects the authorship of Joshua, and advances the theory that the book is the work of King Solomon, while Maes ("Josue Imperatoris Historia," Antwerp, 1574) ascribes it to Ezra, who had access to ancient Hebrew archives. These and modern Catholic critics also (Cardinal Meignan, "De Moïse à David," Paris, 1896) thus make the book posterior to the time of Joshua, but, for the greater part, pre-exilic and always based on documents coeval with the events reported.

Among modern Jewish critics L. Wogue ("Histoire de la Bible," Paris, 1881) defends the traditional view, with reference to B. B. 14b and 15a. More recently the passage in Ecclus. (Sirach) xlvi. 1 has been invoked in proof of the authorship of Joshua; *προφητεῖαι* in Ecclesiasticus means "books," so that Joshua being designated (*ib.*) as *διάδοχος Μωϋσῇ ἐν προφητείαις* would imply that he was the "author" of the "book." The Hebrew text, however, has משרת משה בנבואה (see Israel Lévi, "L'Ecclésiastique," Paris, 1898), but this has also been construed, with reference to II Chron. ix. 29, where נבואה means "book," as supporting the traditional view.

Keil in his commentary has endeavored to defend this view by urging the force of עד עברנו = "until we had passed over" (Josh. v. 1) as demonstrating that the narrative must have been written by an eye-witness; but the ancient versions show this reading to be erroneous. Nor is xviii. 9 conclusive: at the utmost it proves that the catalogue of cities (xviii. 11–xix. 46) was abstracted from a document contemporary with Joshua. In the same way xxiv. 26 may be taken as evidence only that xxiv. 1-25 is by him, though upon closer inspection even this passage is seen to be merely the honest opinion of a later writer. The objections by Abravanel have not been answered.

Later Biblical books exhibit incidents which demonstrate that the situation assumed in Joshua could not have been that of the period of invasion. For instance, Jericho, represented in Joshua as completely overthrown and upon the rebuilding of which a solemn curse is invoked, is found to exist at a much later date, even as a city of the Prophets (see Elisha; comp. Josh. vi. 2-27, xvi. 1; Judges iii. 12-30; II Sam. x. 5; II Kings ii. 5, 15; v. 19-22; I Chron. xix. 5; for the curse see I Kings xvi. 34). Ai, reported burned, is known to Isaiah (as "Aiath"; Isa. x. 28). Gezer (Josh. xvi. 10), described as being reduced to vassalage, is not rendered tributary until the time of Solomon (I Kings ix. 16).

Comparison with Judges.

But a comparison with the Book of Judges suffices to discredit the theory that the Book of Joshua is an autobiography of its eponymous hero. The narrative in Judges reveals the fact that the invasion was not directed by a general-in-chief, nor undertaken at one time by the tribes united under a national commander, nor accomplished in the lifetime of one man, much less in two decades.

Nor is the book the work of one man. Contradictions abound, *e.g.*, in the chronology: in iii. 1 the crossing is set for the next day; iii. 2, three days intervene; iii. 5, the start is again delayed one day; comp. v. 10 with iv. 19 and v. 2-9. In xi. 21 the Anakim are expelled by Joshua, while in xv. 13 Caleb is reported as having performed this feat. Double and variant versions are given, as, for instance, the explanation of the name Gilgal (iv. 20; comp. v. 9 and xiv. 6 *et seq.* with xv. 13 *et seq.*).

The Book of Joshua must be regarded as a compilation; and analysis of its contents makes it certain that its sources are of the same character as those of the Pentateuch. This, to a certain degree, was the impression of the Rabbis. According to Mak. 11a, the chapter (xx.) concerning the cities of refuge was taken from the Pentateuch. The Book of Joshua was regarded by them as written in the light of the Deuteronomic legislation (Gen. R. vi. 14). At all events, Joshua and the Pentateuch are treated as of one character in the saying that the sins of Israel alone necessitated the adding of other books to these (Ned. 22b). Joshua is often compared with Moses (Ta'an. 20a; Soṭah 36a; B. B. 75a; Sanh. 20a; Mak. 9b).

While modern critics generally are agreed that the Book of Joshua is a compilation from sources that have been utilized in the Pentateuch (J, E, JE, D, and P), with additions by the editor (R = Redactor), they differ very widely as regards the details. According to Steuernagel ("Joshua," in Nowack's

"Hand-Kommentar"), Albers' attempt in his "Die Quellenberichte in Josua," i.-xii., 1891, to separate the components of J from E in part i. (i.-xii.) is unsatisfactory. In fact, Steuernagel assumes that J and E combined as JE never were accessible to the compiler of Joshua, the two being then still uncombined. A few fragments from J (after Budde, in Stade's "Zeitschrift," vii.), parallel with passages in Judges i., and others somewhat more numerous from E, are all that he finds in Joshua. He insists that for i.-xii. another work, D, was the main source. This D is not identical with the author of Deuteronomy, but is rather D^2 (= the author of Deut. i.-iii.), and is on the whole an independent elaboration of E. The few fragments of J and E in Joshua he concedes were added by R, and only after D^2 had been combined with P (mostly in part ii.).

Steuernagel's analysis has not been accepted by Holzinger ("Josua," in Marti's "K. H. C."), who rejects D^2 and works out a scheme on the basis of J, E, and JE, with a pronounced Deuteronomic coloring: Deuteronomist, Priestly Code, and Redactor. Contrary to the Pentateuchal R, who makes P the original document, in Joshua JED is the basis, supplemented by extracts from P. Still later additions are noticeable as well as changes in phraseology (*e.g.*, the use of אלהי ישראל in vii. 13, 19 *et seq.*; viii. 30; ix. 18, 20; x. 40, 42; xiii. 14, 33; xiv. 14; xxii. 16, 24; xxiii.; xxiv. 2, 23). For a detailed analysis on this basis see Holzinger, "Das Buch Josua," pp. xvii.-xxi.

Steuernagel in his translation prints the different sources in different types. W. H. Bennett in "The Book of Joshua" (in "S. B. O. T." 1895) indicates the various documents by the use of different colors.

Redaction.

Summing up, these various analyses have certainly demonstrated that, on the whole, in the narrative portion of the book (i.-xii.) the introduction (i.) is Deuteronomic, as is the conclusion of the whole book (xxi. 43-xxii. 6, xxiii.), and that Deuteronomic coloring is to be found in both parts, naturally in a greater degree in the narrative chapters. The basis of the book was a Deuteronomic history of Joshua, founded on material from J and E perhaps not as yet combined as JE, thus excluding Rje (=Redactor of JE). The main current of the narrative is not originally Deuteronomic, the Deuteronomic editor heightening its coloring, and dwelling on the moral and religious implications of the story. The narrative is not always consistent. In xiii.-xix. many fragments are for the most part parallels to Judges i., which make it appear that the conquest was a slow, laborious process, the tribes acting without concerted plan and nowhere under united central command. These belong to J.

But even in the narrative portion, strictly so-called, as distinct from the statistical, a twofold account is almost always discernible: one apparently older and more prosy; the other, with a clear tendency to magnify the importance of the events and the absolute annihilation of the inhabitants (though this may be set down as by Rd), and to emphasize the miraculous. The older recalls the method of J in the Pentateuch; the younger, that of E. P's share in the narrative section is very limited. Additions of a few verses may be ascribed to it. In xiii.-xxii. the contributions from P are much more extensive. The boundaries and the lists of the cities of refuge and of the Levitical towns belong to it. The combining of the Deuteronomic Joshua (Rd, J, E, perhaps JE [Rje]) with P was the work of R, who made verbal changes to suit his ends. But even after this additions were made, *e.g.*, xxii. 9-24 (comp. Num. xxxii.-xxxiii.; Judges xx.). Ch. xvi. and xvii. have come down in mutilated form. When they were abridged can not be determined. The duplication of Joshua's farewell also is by a later hand; or it is possible that one account of it (xxiv.) is from E, while the other is clearly Deuteronomistic, resembling Deut. iv. 29-30.

Historical Character of the Book.

After eliminating the pragmatic elements and toning down the Deuteronomic coloring, the critical study of the Book of Joshua penetrates to a bed of traditions that in a more or less confused way reflect actual occurrences; but these did not take place in the sequence here assumed, nor in the manner detailed. The division of the land is, on the whole, the work of a theorist who utilizes actual conditions to a certain extent, but always to bring into prominence his priestly program. Local legends, snatches of folk-lore and folk-songs, the tendency to concentration in one man of the experiences of tribes and generations (always characteristic of legend), have had a decisive share in the shaping of the original material. Explanations of names (Achor, Gilgal), old local shrines, and reminiscences of former religious usages are also detectable as the raw data upon which popular fancy had been at work long before the various literary sources had leaped into existence. To deny in toto, with Eduard Meyer (in Stade's "Zeitschrift," i.), the historical character of the book is dogmatic. It may, however, be noticed that, in contrast with Judges, the Book of Joshua has no chronological scheme (comp. xi. 18, xiv. 10, xxiii. 1, xxiv. 31).

The Hexateuch.

In view of the identity of its sources, and also of the fact that throughout the Pentateuch the conquest of the land is presupposed and emphasized as the goal (Gen. xiii. 14-17, xv. 13-16, xxvi. 3, xxviii. 13-15; Ex. iii. 8, 17; xxxii. 13; xxxiii. 1-3; Num. xiii. 17 *et seq.*, xiv., xxxii.; Deut. i. 38, iii. 21, xxxi. 3-6; P Gen. xvii. 6-8, xxviii. 3; Num. xxvii. 18-23, xxxiii. 50-54, xxxiv., xxxv.; Deut. xxxiv. 9), critics have held that Joshua at one time formed with the Pentateuch the so-called HEXATEUCH. If this was the case, it must have been at a time anterior to the separation of the Samaritans from the Jews, as the Samaritans have only the Pentateuch; but the books of Ezra and Nehemiah give no intimation of the existence of a hexateuch. In all probability the sources J, E, as well as D and P, carried the narrative to the conquest of the land; but in their present forms the Pentateuch and Joshua were never combined. Volck (in Herzog-Hauck, "Real-Encyc." ix. 390), assuming that P is older than JE and D, argues that before D was incorporated into the present Pentateuch, Joshua (i.-xxiv.) formed a part of a work composed of P, JE, and Deut. xxxi. 14-23, xxxii. 1-44, 48-52, xxxiii., xxxiv.

1-9, and that it was when Deut. v.-xxviii. was incorporated that Joshua was made a separate book. This theory, while not convincing, helps to make plain that the sources must have contained the story of the conquest. That Hosea, Amos, and Micah knew this Hexateuch (minus Deuteronomy) is not proved by such passages as Micah vi. 5 *et seq.* (or Hosea ix. 10, xii. 4 *et seq.*, and Amos ii. 10, v. 25, vii. 4). The traditions at the base of the histories were known to these early prophets. More than this can not be inferred from their references to Shittim and Gilgal (*e.g.*, in Micah vi. 5 *et seq.*).

The Text.

The fact that in Joshua the Pentateuchal archaic forms (נער for נערה or הוא for היא) are not found is not evidence against the Hexateuchal hypothesis. This circumstance merely indicates that at the time (post-exilic) when the consonantal text was fixed Joshua was not one work with the Pentateuch. Jericho is pointed יְרִיחוֹ for Pent. יְרֵחוֹ. The text is in fairly good condition. The Septuagint is without some of the glosses (v. 4-7, vi. 3-5, xx. 4-6). The omissions in the Hebrew (in xv. 59, names of eleven cities; in xxi., a passage between verses 35 and 36) are supplied in the Greek. At the end of xxiv. the Septuagint presents additions of interest.

The Samaritan Book of Joshua.

The Samaritan Book of Joshua, an extracanonical book written in Arabic, pretends to be a translation from the Hebrew ("Chronicon Samaritanum Cui Titulus Est Liber Josuæ," ed. Juynboll, Leyden, 1848). It relates the consecration of Joshua (Deut. xxxi.), the Balaam episode, and the war under Joshua as general against the Midianites; then, with a new title ("Book of Joshua the Son of Nun"), the conquest of the land and its division, continuing the story from Joshua's demise to Eli's death. Interpolations (xxvi.-xxxvii.) deal with other personages, and in the concluding chapters Nebuchadnezzar, Alexander, and Hadrian are the heroes. This book is a medieval compilation of the time when the Samaritans were under Mohammedan rule, but contains also old haggadic material (see SHOBACH).

E. G. H.

JOSHUA, THE SAMARITAN BOOK OF: Samaritan chronicle, written in Arabic; so termed because the greater part of it is devoted to the history of Joshua. It was published from an Arabic manuscript written in Samaritan characters, with a Latin translation and a long preface by Juynboll (Leyden, 1848). Though based on the Hebrew canonical Book of Joshua, it differs greatly from the latter in both form and content. The author, who, as will be shown, was of a much later period, amplified the Biblical narratives by weaving into them legends of a later date and developing the narratives themselves, at the same time altering certain statements in accordance with Samaritan views on history. It is divided into fifty chapters, and contains, after the account of Joshua, a brief description of the period following Joshua, agreeing to that extent with the Book of Judges. Then follow histories of Nebuchadnezzar, Alexander the Great, and the revolt against Hadrian; it ends with an incomplete account of Baba Rabbah. The following is a synopsis of its contents:

Contents.

Ch. i.-viii.: Introduction: Ch. i.: The author claims to have translated the following narratives from the Hebrew. Ch. ii.: Moses appoints Joshua as his successor, investing him with royal power. Ch. iii.: Account of Balaam and the King of Moab (comp. Num. xxii. 2-41). Ch. iv.: Balaam advises the King of Moab to draw the Israelites into lust and thus cause their destruction (comp. Num. R. xx. 23). Ch. v.: Moses sends Joshua and Phinehas to the war with the Midianites (comp. Num. xxxi. 2 *et seq.*). Following the account of the fall of Jericho (Josh. vi.), the author relates that the walls of Midian's stronghold fell at the blast of the trumpets. Balaam, found in the Midianite temple speechless from terror, was killed by the soldiers in spite of Joshua's desire to take him alive before Moses. Ch. vi.-viii.: Moses' death; his testament; the mourning of the Israelites over him.

Variations from Biblical Accounts.

Ch. ix.-xliii.: Main Part of the Book: Ch. ix.-xii. (written in the same strain as the first chapter of the canonical Book of Joshua): Joshua's activity; his organization of the army and preparations for the war. Ch. xiii.: The sending of the spies to Jericho. Imitating the Biblical account of the Gibeonites (comp. Josh. ix. 4 *et seq.*), the writer says that the spies, who knew several languages, disguised themselves as travelers, telling those they met that, having heard of the exploits of Joshua, they had come from a distant land for the sake of further information about him. At Jericho, suspected of being spies, they hid themselves in the house of Rahab. The remainder of the chapter follows the canonical version. Ch. xiv.-xvii.: The Israelites cross the Jordan (as in Josh. iii.); Joshua's song, an imitation of the song of Moses in Ex. xv. 1-19; account of the fall of Jericho. Ch. xviii.: Achan is discovered to have taken possession of some of the accursed things. Here the account differs from that in Josh. vii.; there is no mention of the Israelites being defeated at Ai; but the gem in the high priest's breastplate that bore the name of Judah having become dim, it was known that one of that tribe had sinned. The wedge of gold stolen by Achan is said to have weighed 2,250 shekels. Ch. xix.: An account of the Gibeonites, similar to that in Josh. ix., except that only three Gibeonite cities are mentioned, Chephirah being omitted. Ch. xx.-xxiii.: The continuation of the war and the partition of the land. Joshua sends surveyors to divide the land into ten parts, assigning to the Levites forty-eight cities, which are to be taken from the other tribes. Joshua dismisses the two and a half tribes whose allotment was east of the Jordan, appointing Nabiḥ ("Nobah" in Num. xxxii. 42), son of Gilead, king over them; they number 110,580. Ch. xxiv.: The surveyors having returned, Joshua assigns to the tribes their respective lots. He then founds the city of Samaria and builds a temple on Mount Gerizim (comp. Josh. viii. 30). Ch. xxv.: Description of the prosperous state of the Israelites after the partition of the land, over which peace reigns for twenty years.

Additions.

Ch. xxvi.-xxxvii. give a long account of the war between Joshua and the league formed by Shaubak (Shobach), King of Persia. Shaubak, desiring to avenge the death of his father, Ḥammam, who has been killed in battle with the Israelites, enters into a league with all the neighboring kings, who decide to wage war with Joshua. Shaubak first sends an ambassador with a minatory letter to Joshua, who thereupon consults the senate as to the steps to be taken. The ambassador is amazed at the splendor with which Joshua is surrounded and at the dignity and order with which Joshua administers justice. He returns with Joshua's answer, that the Israelites are prepared for the war, and attempts to dissuade Shaubak from his design. Shaubak, however, encouraged by his mother and by the Magi, marches to the war with an immense army. Joshua, arrived with his army at 'Ajlun, one of the enemy's cities, is enclosed by seven iron walls, called into existence by magic. At Joshua's prayer a dove appears, and by it he sends a letter to Nabiḥ, who marches with a great army against Shaubak. The latter is defeated. At the shouting of Nabiḥ's soldiers the walls about Joshua disappear. Ch. xxxviii.-xliii.: After a reign of forty-five years Joshua dies, and is buried at Kafar Ghawirah (comp. Josh. xxiv. 30); account of his appointment of his successors and of the prosperous state of Israel during the ensuing period of 260 years—the "days of satisfaction" ("ayyam al-riḍa" or "yeme ha-raẓon"). For the original legend concerning Shaubak, see Soṭah viii. 1, 42b, with reference to II Sam. x. 16, 18.

Ch. xliv.-l.: Ch. xliv. contains an account of the division under Eli and of the period of sin ("al-ḍalal" or "fanuta"). Ch. xlv.-l. give accounts of Nebuchadnezzar, King of Mauṣil (Mosul), Alexander the Great, the revolt against Hadrian; the high priests 'Aḳbon and Nathanael, and Baba Rabbah (see SAMARITANS).

The Manuscript.

The manuscript from which Juynboll prepared his edition was the property of Scaliger, who, it is supposed, obtained it from the Egyptian Samaritans in 1584. Later, it was studied by Johann Heinrich Hottinger, who described it in his "Exercitationes anti-Morinianæ" (1644, pp. 109-116) and in his "Smegma Orientale" (1657). Two other manuscripts (in the British Museum and at Trinity College, Cambridge) have since come to Europe. An English translation of Juynboll's text has been made by O. T. Crane ("The Samaritan Chronicle or Book of Joshua," New York, 1890). Contrary to Reland, Juynboll (preface to his edition) concluded that the Samaritan Joshua was the work of one author, who did not live later than the thirteenth century, basing his conclusion on the fact that Abu al-Fatḥ, who wrote in 1355, drew from it much material for his own chronicle. It is also quoted by Maḳrizi (d. 1441). Juynboll further concluded that the author compiled the work from four sources—one Hebrew-Samaritan (the basis of the first twenty-four chapters) and three Arabic. The Hebrew-Samaritan source is based upon the Septuagint translation of Joshua. A Hebrew résumé of the story of Shaubak (ch. xxvi.-xxxvii.) was inserted in Zacuto's "Sefer Yuḥasin" by Samuel Shullam, who declared that he found it in a Samaritan chronicle ("Sefer Zikronot shel Kutim"), where it is said to have been taken from a Jewish Midrash. It is evident that Shullam saw it in an Arabic work, probably the Samaritan Book of Joshua, for he reads "Yaniaḥ" instead of "Nabiḥ," a change possible only if the original was in Arabic characters. Samuel Shullam's résumé was copied afterward by Ibn Yaḥya, in his "Shalshelet ha-Ḳabbalah," and by Reuben Hoshke, in his "Yalḳuṭ Re'ubeni" (section "Debarim").

G. M. SEL.

JOSHUA (BRUNO): Physician and scholar of Treves; lived in the eleventh and twelfth centuries. He treated Bruno, Archbishop of Treves (1102–4), who granted him the privilege to wear knightly garments. The archbishop had frequent religious discussions with his Jewish physician, which resulted in Joshua's acceptance of Christianity. At baptism he received the name "Bruno."

G. M. SEL.

JOSHUA B. ABIN: Palestinian amora of the fourth century whose name is associated chiefly with haggadot. He transmitted a haggadah of Levi and a halakah of 'Anani b. Sason. There are also extant some of his own haggadic sayings, and some paraphrases by him of Biblical verses (Bacher, "Ag. Pal. Amor." iii. 731; Heilprin, "Seder ha-Dorot," ii. 195).

S. S. A. S. W.

JOSHUA (Jesus) BEN DAMNAI: High priest about 62-63 C.E. He was appointed by King Agrippa II., after Anan, son of Anan, had been deposed (Josephus, "Ant." xx. 9, § 1). Joshua also was soon deposed by the king, and in his place Jesus (Joshua) b. Gamaliel (Gamla) received the high-priestly dignity. A strife ensued between the deposed and the new high priest; they insulted each other in the public streets and even threw stones at each other (*ib.* § 4), but Jesus b. Gamaliel remained the victor.

G. S. KR.

JOSHUA (Jesus) BEN GAMLA: A high priest who officiated about 64 C.E. He married the rich widow Martha of the high-priestly family Boethos (Yeb. vi. 4), and she by bribing Agrippa II. (not Jannai, as Talmudic sources say) secured for him the office of high priest (Yeb. 61a; Yoma 18a; comp. "Ant." xx. 9, § 4). Although Joshua himself was not a scholar, he was solicitous for the instruction of the young, and provided schools in every town for children over five years of age, earning thereby the praises of posterity (B. B. 21a). The two lots used on the Day of Atonement, hitherto of boxwood, he made of gold (Yoma iii. 9).

Joshua did not remain long in office, being forced, after a year, to give way to Matthias ben Theophil ("Ant." xx. 9, § 7). Together with the former high priest Anan and other men of rank, he opposed, but without success, the election of Phinehas b. Samuel (68) as high priest ("B. J." iv. 3, § 9). He attempted peaceably to prevent the fanatic and pugnacious Idumeans from entering Jerusalem, then torn by internal dissensions. After they had come into possession of the city, these fanatics took bloody vengeance on him, by executing him, as well as Anan, as traitors to their country (68) ("B. J." iv. 5, § 2).

G. S. Kr.

JOSHUA B. HANANIAH: A leading tanna of the first half-century following the destruction of the Temple. He was of Levitical descent (Ma'as. Sh. v. 9), and served in the sanctuary as a member of the class of singers ('Ar. 11b). His mother intended him for a life of study, and, as an older contemporary, Dosa b. Harkinas, relates (Yer. Yeb. 3a), she carried the child in his cradle into the synagogue, so that his ears might become accustomed to the sounds of the words of the Torah. It was probably with reference to his pious mother that Johanan b. Zakkai thus expressed himself concerning Joshua ben Hananiah: "Hail to thee who gave him birth" (Ab. ii. 8). According to another tradition (Ab. R. N. xiv.) Johanan b. Zakkai praised him in the words from Eccl. iv. 12: "And a threefold cord is not quickly broken." Perhaps he meant that in Joshua the three branches of traditional learning, Midrash, Halakah, and Haggadah, were united in a firm whole; or possibly he used the passage in the sense in which it was employed later (Eccl. R. iv. 14; B. B. 59a), to show that Joshua belonged to a family of scholars even to the third generation.

Pupil of Johanan b. Zakkai.

Joshua ben Hananiah was one of the five who formed the inner circle of Johanan's pupils (Ab. ii. 8). In enumerating them tradition places him at the head together with Eliezer b. Hyrcanus. Tradition also frequently mentions these two together as upholders of opposite views. They were both present at the celebration of the circumcision of Elisha b. Abuyah (Aḥer), in Jerusalem, and diverted themselves by connecting passages in the Pentateuch with others in the Prophets and the Hagiographa (Yer. Ḥag. 77b). It was also Eliezer and Joshua who rescued Johanan ben Zakkai from the besieged city and brought him into the camp of Vespasian.

An Opponent of Asceticism.

After the destruction of the Temple Joshua opposed the exaggerated asceticism with which many wished to show their grief, *e.g.*, in going without meat and wine because the altar on which they had sacrificed animals and poured libations of wine had been destroyed. He represented to them that to be consistent they ought to eat no figs or grapes, since no more first-fruits were offered, and that they ought even to refrain from bread and water, since the festival of drawing water (Joshua describes this festival in Yer. Suk. 55b) had been discontinued, and the showbread as well as the two loaves of the feast of first-fruits could no longer be sacrificed (Tosef., Soṭah, end; B. B. 60b). With such arguments Joshua supported the efforts of his teacher to make the grief at the loss of the Temple, which until then had been the center of religious life, less bitter. His opposition to asceticism, however, was due also to his mild and temperate nature, which caused him to say in regard to the severe regulations which had been adopted by the school of Shammai shortly before the destruction of the sanctuary: "On that day they overstepped the boundary." As he declared in a dispute on this subject with his colleague Eliezer, "they have poured water into a vessel full of oil, thus causing the costly oil to run to waste" (Yer. Shab. 3c; comp. Shab. 153b).

Joshua saw the greatest danger to the community in the sickly offshoots of piety. The following he calls "enemies of general prosperity": the foolishly pious (pious at the wrong time); sly sinners; the woman who shows an overpious bearing; and the "plague of the Pharisees," the hypocrites who pretend to be saints (Soṭah iii. 4, 21b; Yer. Soṭah 21b). In his motto of life (Ab. ii. 11) he recommends temperance and the love of mankind as a security for individual happiness. An evil eye (grudging), evil inclination (passion), and hatred of mankind, he says, bring people out of the world. In the same spirit he answers the question put by Johanan ben Zakkai to his pupils as to the best standard of conduct. He declares that one should seek association with a good companion and avoid a bad one (Ab. ii. 11). Various anecdotes illustrate the opposition between Joshua, who represented the teachings of Hillel, and his colleague Eliezer, who represented the teachings of Shammai, much in the same way as the opposition between Hillel and Shammai is depicted elsewhere (Gen. R. lxx., beginning; Eccl. R. i. 8; Ḳid. 31a).

He Works at a Trade.

Joshua's permanent residence was in Beki'in, a place between Jabneh and Lydda (Sanh. 32b), where he followed the trade of a needler (Yer. Ber. 7d). This occupation did not in any degree diminish the respect paid to him as one of the influential members of the academy at Jabneh. After the death of Johanan b. Zakkai, he was the heartiest supporter of Gamaliel's efforts to bring about the predominance of the views of Hillel's followers over those of Shammai's, and thus to end the discord which had so long existed between the schools. But he was the very one whom Gamaliel humiliated on a certain occasion when the authority of the president was in question (R. H. 25a; Yer. R. H. 58b).

Joshua's pliant disposition did not shield him from humiliation by Gamaliel a second time; and the wrong done to this highly esteemed scholar was the cause of Gamaliel's removal from office. He soon obtained Joshua's forgiveness, and this opened the way for his reinstatement; but he was now obliged to share his office with Eleazar b. Azariah, who had originally been appointed his successor (Ber. 28a).

Joshua esteemed Eleazar very highly, and on one occasion called out in his emphatic manner: "Hail to thee, Father Abraham, for Eleazar b. Azariah came forth from thy loins!" (Tosef., Soṭah, vii.; Ḥag. 3a; Yer. Ḥag., beginning). When it became necessary to present the case of the Palestinian Jews at Rome, the two presidents, Gamaliel and Eleazar, went as their representatives, and Joshua b. Hananiah and Akiba accompanied them. This journey of the "elders" to Rome, and their stay in the Imperial City, furnished material for many narratives. In one of these the Romans call on Joshua b. Hananiah to give proofs from the Bible of the resurrection of the dead and of the foreknowledge of God (Sanh. 90b). In another, Joshua comes to the aid of Gamaliel when the latter is unable to answer the question of a "philosopher" (Gen. R. xx.). In one anecdote, concerning a sea voyage undertaken by Gamaliel and Joshua, the astronomical knowledge of the latter is put to use. He is said to have calculated that a comet would appear in the course of the voyage (Hor. 10a).

After Gamaliel's death (comp. M. Ḳ. 27a; Yer. M. Ḳ. 83a), the first place among the scholars fell to Joshua, since Eliezer b. Hyrcanus was under a ban. Joshua wished to do away with a regulation of Gamaliel's, but met with opposition on the part of the council ('Er. 41a). Joshua stood by the deathbed of his colleague Eliezer b. Hyrcanus and called to him: "O master, thou art of more value to Israel than God's gift of the rain; since the rain gives life in this world only, whereas thou givest life both in this world and in the world to come" (Mek., Yitro, Baḥodesh, 10; Sifre, Deut. 32; comp. Sanh. 101a). When, after Eliezer's death, the other law scholars, Eleazar b. Azariah, Ṭarfon, and Akiba, contested some of his opinions, Joshua said to them: "One should not oppose a lion after he is dead" (Giṭ. 83a; Yer. Giṭ. 50a). Eleazar, also, seems to have died some time before Joshua.

Under Hadrian.

Relations with the Emperor.

In the beginning of Hadrian's rule Joshua appears as a leader of the Jewish people. When the permission to rebuild the Temple was again refused, he turned the excited people from thoughts of revolt against Rome by a speech in which he skilfully made use of a fable of Æsop's concerning the lion and the crane (Gen. R. lxiv., end). About the same time Joshua by his eloquence prevented the whole area of the Temple from being pronounced unclean because one human bone had been found in it (Tosef., 'Eduy. iii. 13; Zeb. 113a). Joshua lived to witness Hadrian's visit to Palestine; and he followed the emperor to Alexandria (130). The conversations between Joshua and Hadrian, as they have been preserved in the Babylonian Talmud and the Palestinian Midrash, have been greatly modified and exaggerated by tradition; but they nevertheless present in general a just picture of the intercourse between the witty Jewish scholar and the active, inquisitive emperor, the "curiositatum omnium explorator," as Tertullian calls him. In Palestinian sources Joshua answers various questions of the emperor: how God created the world (Gen. R. x.); concerning the angels (*ib.* lxxviii., beginning; Lam. R. iii. 21); as to the resurrection of the body (Gen. R. xxviii.; Eccl. R. xii. 5); and with reference to the Decalogue (Pesiḳ. R. 21). In the Babylonian Talmud three conversations are related, which resemble that on the Decalogue, in that Joshua silences the emperor's mockery of the Jewish conception of God by proving to him God's incomparable greatness and majesty (Ḥul. 59b, 60a). Joshua also rebukes the emperor's daughter when she mocks at the God of the Jews (*ib.* 60a); in another place she is made to repent for having mocked Joshua's appearance (Ta'an. on Ned. 50b). The emperor's question concerning the odor of Sabbath food is a mocking one (Shab. 119a). Once Joshua told the emperor that he would dream of the Parthians (Ber. 56a). At another time he excused his own non-appearance at a meeting by cleverly describing the infirmities of his old age (Shab. 152a). In one conversation, preserved by a later authority (Jellinek, "B. H." v. 132), Joshua defended the justice of God, which was doubted by the emperor. Once a dispute in pantomime took place in the emperor's palace between Joshua and a Judæo-Christian ("Min"), in which Joshua maintained that God's protective hand was still stretched over Israel (Ḥag. 5b). In another conversation Joshua defended the honor of Israel against a heretic, who had attacked it, by quoting from Micah vii. 4 ('Er. 101a).

Opposes Judæo-Christians.

Some of the questions addressed to Joshua by the Athenian wise men, found in a long story in the Babylonian Talmud (Bek. 8b *et seq.*), contain polemical expressions concerning Christianity (Güdemann, "Religionsgeschichtliche Studien," pp. 89, 136 *et seq.*). The historical basis for this remarkable tradition is found in Hadrian's association with Joshua b. Hananiah, in Joshua's visit to Athens, and in his intercourse with Athenian scholars and philosophers. Its conclusion is an echo of the myth of the Danaides; and it is supposed to demonstrate the superiority of the "wise men of the Jews" over the "elders of Athens." Embodied in this tradition are the stories in which the wit of Athens is conquered by the cleverness of the men of Jerusalem (Lam. R. i. 1, *s.v.* "Rabbati"). In one of these the pupils of Johanan b. Zakkai make sport of an Athenian. That the tradition contains in parts polemics against Christianity is explained by the fact that Joshua b. Hananiah fought the heresy of the Judæo-Christians. The same spirit is manifested in the story concerning his nephew Hananiah (Eccl. R. i. 25). It is related that when Joshua ben Hananiah was about to die, the scholars standing round his bed mourned, saying: "How shall we maintain ourselves against the unbelievers?" Joshua comforted them with words from Jer. xlix. 7: "If counsel has been taken away from the children [of God, *i.e.*, Israel], the wisdom of these [the enemy] has also perished" (Ḥag. 5b).

After his death Joshua's importance was extolled in the words: "Since Rabbi Joshua died, good counsel has ceased in Israel" (Baraita, Soṭah, end). Not long after Joshua's death the thinkers were superseded by the men of action; and Bar Kokba, enthusiastically greeted by Joshua's most influential pupil, Akiba b. Joseph, raised the flag of rebellion against Rome. That this step had not been taken earlier was due to Joshua's influence.

His Exegesis.

In the haggadic tradition Joshua b. Hananiah's exegetical controversies with two of his most prominent contemporaries occupy an important place. These two are his colleague Eliezer ben Hyrcanus, who is frequently mentioned in the Halakah also as holding an opposite opinion, and Eleazar of Modi'im, who belonged to the school of Jabneh and was especially known as the author of haggadic expositions of the Bible. The controversies between Eliezer and Joshua refer to cosmology; to eschatology, comprising views on the Messianic period as well as on the future world and the resurrection; and to the interpretation of various Biblical passages. The controversies between Joshua b. Hananiah and Eleazar of Modi'im are found in the tannaitic midrash to Exodus; and they form at the same time a continuous double commentary on the sections concerning the stay of the Israelites at Marah (Ex. xv. 22-27), the miracle of the manna (*ib.* xvi.), the fight with Amalek (*ib.* xvii.), and the visit of Jethro (*ib.* xviii.). In these controversies Joshua, as a rule, stands for the literal meaning of the words and the historical interpretation of the contents, putting emphasis on the meaning demanded by the context. The Alexandrian Jews addressed twelve questions to Joshua (Niddah 69b). They fall into four groups: (1) three halakic, (2) three haggadic, (3) three foolishly ignorant questions (a sort of parody on the questions of halakic casuistry), and (4) three questions taken from practical life. Eleven questions also were addressed to him concerning the special position of woman in physical, spiritual, social, and religious matters (Gen. R. xvii., end). Some of these with his answers are: "Why is a man easy, a woman difficult, to persuade?" "Man was created out of earth, which easily dissolves in water; woman was created from bone, which is not affected by water."—"Why does a man have his head uncovered while a woman has hers covered?" "Whoever has committed a sin is ashamed before people; thus woman is ashamed on account of Eve's sin, and consequently covers her head."—"Why do women take precedence in funeral processions?" "Because they have brought death into the world."

Sayings.

Joshua ben Hananiah was regarded by posterity as a man always ready with an answer, and as the victorious representative of Jewish wit and wisdom. This is shown in the accounts of his conversations with heathens and in other narratives. He himself tells of three encounters in which he had to yield the palm to the wit of a woman and a child. He introduces the story in these words: "No one ever overcame me except a woman, a boy, and a maid" ('Er. 53b; comp. Lam. R. i. 1, section "Rabbati," end). Joshua explains the end of verse 18 of Ps. ix. to mean that there are even among the Gentiles pious people who will have a share in the life everlasting (Tosef., Sanh. xiii. 2; comp. Sanh. 105a). "The Psalms," he also said, "do not refer to the personal affairs of David, but to the affairs of all Israel" (Pes. 117b). If a man learns a halakic sentence in the morning and two sentences in the evening, and he is busy the whole day at his trade, it will be accounted to him as though he had fulfilled the whole Torah (Mek., Beshallaḥ, Wayassa', 2). Holidays are intended to be employed one-half for worldly enjoyment, one-half for study (Pes. 68b; Beẓah 15b). From Ruth ii. 19 it may be concluded that the poor person who receives does more for the giver than the giver does for the recipient (Lev. R. xxxiv.; Ruth R. *ad loc.*).

S. S. W. B.

JOSHUA HÖSCHEL BEN JOSEPH: Polish rabbi; born in Wilna about 1578; died at Cracow Aug. 16, 1648. In his boyhood he journeyed to Przemysl, Galicia, to study the Talmud under Rabbi Samuel ben Phoebus of Cracow. He returned to his native country, and continued his Talmudic studies in the city of Lodmir (Vladmir, Volhynia) under Rabbi Joshua Falk. After his marriage to the daughter of Rabbi Samuel of Brest-Litovsk he became rabbi of the city of Grodno, whence he was called to the rabbinate of Tiktin (Tykotzin), and later to that of Przemysl. In 1639 he became rabbi of Lemberg, and in the following year he was appointed head of the yeshibah of Cracow. At Cracow Joshua devoted all his time to matters pertaining to the yeshibah, "din" (law), and religious decisions. As he was a man of wealth, he accepted no salary for all the laborious services he rendered to the Jewish community of Cracow.

Joshua was one of the most eminent Talmudical analysts of his age. Like many of his learned contemporaries, Joshua had also a taste for the Cabala; but he did not allow mystical teachings to influence his halakic decisions. On account of his extensive erudition in Talmudic literature, the number of his pupils at the yeshibah constantly increased. Many of them became noted rabbis.

Joshua's published works are: (1) "Maginne Shelomoh" (Amsterdam, 1715), novellæ on various tractates of the Talmud, in which the author attempts to refute the strictures made by the schools of the Tosafists on the commentaries of Rashi; (2) "She'elot u-Teshubot Pene Yehoshua'," Amsterdam, 1715; Lemberg, 1860. Other works of his are still in manuscript.

S. S. B. Fr.

JOSHUA HÖSCHEL BEN MEÏR: Rabbinical author; lived in the eighteenth century; died at Jerusalem; a contemporary of Elijah Wilna. He wrote "Maẓmiaḥ Yeshu'ah" (Nowydwor, 1782), in two parts: the first consists of a commentary on the "Mordekai" of R. Mordecai b. Hillel; and the second, entitled "Yeshu'ot Ya'aḳob," comprises objections to the critical notes written on the "Bet Ya'aḳob," besides novellæ on Baba Ḳamma. Joshua was also the author of "Yeshua' be-Rosh" (Shklov, 1788), a commentary on Rosh to Baba Ḳamma, Baba Meẓi'a, and Baba Batra.

S. S. N. T. L.

JOSHUA HÖSCHEL BEN SAUL: Polish rabbi; died in Wilna at an advanced age Sept. 9, 1749. He was named after his grandfather, R. Höschel of Lublin, Brest-Litovsk, and Cracow (d. 1663), and is referred to in a document dated 1745 as being very old. He became rabbi of Wilna in 1712 and held that position until his death. He is mentioned with great reverence by contemporaneous writers; and there are approbations by him in "Geon Ẓebi" by Ẓebi Horwitz (Prague, 1736) and in the Jerusalem Talmud with the commentary "Ḳorban ha-'Edah" by his brother-in-law David of Dessau (Dessau, 1743; Shklov, 1812). A letter written from Padua (1729) to R. Höschel by the physician Jekuthiel of Wilna, who studied in Italy, describing the writer's enthusiasm for Moses Ḥayyim Luzzatto, is published in Jacob Emden's "Torat ha-Ḳena'ot" (Amsterdam, 1752). The letter on cabalistic questions, presumably written to the subject of this article by Benjamin Cohen Vitali of Reggio in 1691, was probably really addressed to the cabalist Joshua Höschel ben Joseph Ẓoref of Wilna, who died at Cracow in 1720.

JOSHUA JOSEPH BEN DAVID HA-LEVI: Rabbi of Venice and Hebrew poet; lived in the seventeenth century. He composed elegies ("ḳinot") on the deaths of Samuel Aboab and Moses Zacuto (Venice, 1694), and one, entitled "Kos Tanḥumin," on the death of Moses Levi Majo, rabbi of Venice (*ib.* 1707).

S. S. M. SEL.

JOSHUA B. ḲARḤA: Tanna of the second century; contemporary of the patriarch Simeon b. Gamaliel II. Some regard him as the son of Akiba who was named "Kereaḥ" = "bald" (Rashi on Bek. 58a; Rashbam on Pes. 112a). This is incorrect (comp. Tosef., Pes. 112a), for he never mentions Akiba, and would have done so had Akiba been his father. Only a few halakot of his have been preserved, his utterances having been mostly haggadic.

Joshua was bald; and once in a dispute with a heretic who taunted him on this score, he refuted his opponent with remarkable readiness of wit (Shab. 152a). His affection for his people is shown by the indignation with which he rebuked Eleazar b. Simeon, who had delivered the Jewish freebooters over to the Romans, upbraiding him with the words: "Thou vinegar son of wine [= "Degenerate scion of a noble father"], how long wilt thou give the people of our God unto death?" (B. M. 83b).

He lived to a great age; and when he blessed Judah ha-Nasi he added the wish that the latter might live half as long as himself (Meg. 28b).

S. J. Z. L.

JOSHUA B. LEVI: Palestinian amora of the first half of the third century. He was the head of the school of Lydda in southern Palestine, and an elder contemporary of Johanan bar Nappaḥa and Simeon b. Laḳish, who presided over the school in Tiberias (Gen. R. xciv.). With the former, Joshua often engaged in haggadic discussions (B. B. 116a; Meg. 27a; Shebu. 18b). It is doubtful whether the words "ben Levi" mean the son of Levi, whom some identify with Levi ben Sisi, or a descendant of the tribe of Levi (Grätz, "Gesch." iv. 263; Frankel, "Mebo," p. 91b; Weiss, "Dor," iii. 60; Bacher, "Ag. Pal. Amor." i. 124).

Joshua b. Levi was a pupil of Bar Ḳappara, whom he often quotes; but he considers his greatest indebtedness as being due to R. Judah b. Pedaiah, from whom he learned a great number of halakot (Ex. R. vi.; Eccl. R. vii. 7; Gen. R. *l.c.*). Another of his teachers was R. Phinehas ben Jair, whose piety and sincerity must have exerted a powerful influence upon the character of Joshua. Joshua himself was of a very gentle disposition. He was known for his modesty and piety; and whenever he instituted public fasting and prayer, it was said that his appeals were answered (Yer. Ta'an. 66c).

His love of peace likewise prevented him from making any attacks against the "Christian heresy" ("minut") that was then gaining ground. He was tolerant even to the Jewish Christians, though they often annoyed him; and he forbore cursing one of them, pronouncing rather Ps. cxlv. 9, "God's mercies extend over all His creatures" (Ber. 7a; 'Ab. Zarah 4b). His love of justice and his fear lest the innocent should suffer on account of the guilty (Yoma 19b) led him to pronounce against the custom then prevailing of removing from office a reader who, by omitting certain benedictions, had aroused the suspicion of heresy (Yer. Ber. 9c).

Representative Position.

Joshua was a public-spirited man and devoted a considerable portion of his time to furthering the public welfare (Eccl. R. vii. 7). His wealth, and the additional circumstance of his being allied to the patriarchal family through the marriage of his son Joseph (Ḳid. 33b), must have added to his authority. He was recognized as a representative of Palestinian Jewry, for he is found in company with his friend R. Ḥanina interceding on behalf of his people before the proconsul in Cæsarea, who accorded Joshua and his colleague much honor and respect (Yer. Ber. 9a). On another occasion, when the city of Lydda was besieged because a political fugitive had found refuge there, Joshua saved the city and its inhabitants by surrendering the refugee (Yer. Ter. 46b; Gen. R. *l.c.*). He also made a journey to Rome, but on what mission is not known (Gen. R. xxxiii.).

Although R. Joshua b. Levi was connected through family ties with the patriarchal house, and always manifested his high esteem for its members (Ḳid. 33b), yet it is largely due to him that the friendship between the southern yeshibot and the patriarchal house diminished (that such friendship existed see 'Er. 65b; Yer. Pes. 32a). For Joshua was the first to ordain fully his own pupils in all cases where ordination was requisite (Ned. 42b), thus assuming a power that hitherto had lain in the hands of the nasi alone.

In the field of Halakah Joshua was of considerable importance, his decisions being generally declared valid even when disputed by his contemporaries R. Johanan and Simeon ben Laḳish. He was lenient, especially in cases where cleanliness and the preservation of health were involved (Shab. 121b; Yer. Yoma 44d). Joshua devoted himself to the elucidation of the Mishnah; and his own halakot resemble in their form and brevity the mishnayot of the Tannaim.

In the Haggadah, however, he is even of greater importance. Of that study he entertained a high opinion, and he explained Ps. xxviii. 5, "the works of God," as referring to the Haggadah (Midr. Teh. xxviii. 5). Similarly in Prov. xxi. 21 he identifies "glory" ("kabod") with Haggadah (B. B. 9b). There is also a reference to a book ("pinḳes") by Joshua ben Levi which is presumed by some to have presented haggadic themes (Weiss, "Dor," p. 60); but this can not be well reconciled with the fact that Joshua disparaged greatly the writing down of haggadot (Yer. Shab. 15c; Midr. Teh. xxii. 4; Bacher, *l.c.* p. 129, against Weiss, *l.c.*, who assumes that the "pinḳes" was the work of another rabbi of the same name).

It is beyond doubt, however, that the Haggadah occupied a very important place in the teaching of Joshua b. Levi; this is evident from the many haggadot quoted in his name directly or given in his name by his disciples and contemporaries.

As an exegete Joshua b. Levi is of some importance, his interpretations often enabling him to deduce halakot. Some of his explanations have been accepted by later commentators (*e.g.*, Ibn Ezra and others on Ex. xv. 1; see Ex. R. xxiii.).

His Maxims.

Joshua b. Levi was an earnest student, and his emphasis of study is seen when he speaks of God as saying to David (Ps. lxxxiv. 11) that "better" in His sight is "one day" of study in the Law "than a thousand" sacrifices (Mak. 10a; Midr. Teh. cxxii. 2). Though learning is of paramount importance (Meg. 27a), still he also insists on piety. He who attends morning and evening the synagogue service will have his days prolonged (Ber. 8a), and he who moves his lips in prayer will surely be heard (Lev. R. xvi., end; Yer. Ber. 9d). He instituted a number of rules regulating the reading of the Law in the synagogue on week-days (Ber. 8a) and other matters relating to the service, many of which are to this day in force in the synagogue (Soṭah 39b).

Some of Joshua's philosophical and theological opinions are recorded. Speaking of the attributes of God, he represents Him (Yoma 69b; Yer. Ber. 11c; Yer. Meg. 74c) as "great, mighty, and awe-inspiring" (Deut. x. 17). He conceives the relation between Israel and God as most intimate, and he expresses it in the words, "Not even a wall of iron could separate Israel from his Father in heaven" (Pes. 85b; Soṭah 38b). In his doctrine of future reward and punishment, paradise receives those that have performed the will of God, while the nether world becomes the habitation of the wicked ('Er. 19a). In Ps. lxxxiv. 5 he finds Biblical authority for the resurrection of the dead (Sanh. 91b), and in Gen. R. xxvi. he expresses the liberal view that immortality is the portion not only of Israel, but of all other nations as well. In a legend (Sanh. 98a) Joshua is represented as inquiring of the Messiah the time of his advent, which Elijah answers will be the time when Israel shall harken unto God's voice (Ps. xcv. 7). In another connection he speaks of the futility of estimating the time of the coming of the Messiah (Midr. Teh. ix. 1; Lev. R. xix.).

In Legend.

In legend, Joshua b. Levi is a favorite hero. He is often made to be the companion of Elijah the prophet in the latter's wanderings on earth (Pesiḳ. 36a); he likewise has dealings with the Angel of Death (Ber. 51a). While yet alive, he is permitted to visit paradise and the nether world; and he sends thence a description of what he sees to R. Gamaliel through the submissive Angel of Death (Derek Ereẓ Zuṭa i., end). Many of these interesting legends relating to Joshua have been collected in separate small works entitled "Ma'aseh de-Rabbi Yehoshua' ben Lewi" and "Masseket Gan 'Eden we-Gehinnom."

JOSHUA (FALK) LISSER BEN JUDAH LÖB: German Talmudist; born in Lissa, Posen. He was schoolmaster at Hamburg toward the end of the seventeenth century, and was the author of "'Emeḳ Yehoshua'" (Frankfort-on-the-Oder, 1699), annotations to the Pentateuch and to novellæ of other rabbis arranged in the form of questions and answers. In the edition of Offenbach (1722), Joseph Yosbel of Fürth added to this work some notes taken from his "'Emeḳ ha-Shaweh."

Bibliography: Fürst, *Bibl. Jud.* i. 273; Steinschneider, *Cat. Bodl.* col. 1558.

G. M. Sel.

JOSHUA BEN MORDECAI FALK HA-KOHEN: American Talmudist; born at Brest-Kuyavsk, government of Warsaw, in 1799; died at Keokuk, Iowa, in 1864. While still a young man he settled in Kurnik, Prussia, and consequently he sometimes called himself "Joshua of Kurnik." In 1854 he emigrated to America, and was appointed rabbi first at Newburgh, and later at Poughkeepsie, after which he retired from the rabbinate. Joshua has justly been called "the father of American Hebrew literature." He was the author of "Abne Yehoshua'" (New York, 1860), a commentary on Pirḳe Abot. Joshua wrote also "Binyan Yehoshua'," novellæ on the Talmud, and "Ḥomat Yehoshua'," a collection of homilies.

Bibliography: Lebrecht, in *Hebr. Bibl.* iv. 28.

A. M. Sel.

JOSHUA (HA-KOHEN) BEN NEHEMIAH: Palestinian amora of the fourth century. He seems to have devoted himself almost entirely to the Haggadah, for no halakic opinion of his is known. In the Talmud he is mentioned in one passage only (Sheḳ. ii. 4), but his name occurs frequently in midrashic literature. Many of his haggadic sayings have been preserved. Joshua frequently made use of parables. "A king was angry with his queen. The king nevertheless went to a goldsmith and purchased for her an ornament. He did thus after she had angered him; what would he have done had she not angered him! In like manner God wrought miracles for Israel, even though he (Israel) had angered Him by saying, 'Is the Lord among us, or not?' [Ex. xvii. 7, 12-16]. How much more would God have blessed him had he done according to His will!" (Pesiḳ. R. No. 12 [ed. Friedmann, p. 50b]). Some of Joshua's haggadic interpretations are based on the symbolism of numbers (see Tan., Yitro, 19). In addition to his own haggadot he transmitted those of others, especially Eleazar II., Samuel b. Isaac, Ḥanina b. Isaac, and Aḥa.

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 303-309.

S. J. Z. L.

JOSHUA B. PERAḤYAH: President ("nasi") of the Sanhedrin in the latter half of the second century B.C. He and his colleague Nittai of Arbela were the second of the five pairs of scholars who received and transmitted the tradition (Ab. i. 6; Ḥag. 16a; see ZUGOT). At the time of the persecution of the Pharisees by John Hyrcanus, Joshua was deposed—a disgrace to which his words in Men. 109b apparently allude. To escape Hyrcanus, he fled to Alexandria; but he was recalled to Jerusalem when the persecutions ceased and the Pharisees again triumphed over the Sadducees (Soṭah 47a, Talmud ed., Amsterdam and Berlin, 1865). The same passage refers to a pupil of Joshua's who according to many may have been Jesus (comp. Krauss, "Das Leben Jesu," p. 182, Berlin, 1902). Only a single halakah of Joshua's has been preserved (Tosef., Maksh. iii. 4), besides the following ethical maxim which shows his gentle judgment of his fellow men and his eagerness to spread knowledge among the people: "Get thee a teacher; win thee a friend; and in judging incline toward the side of innocence" (Ab. i. 6).

JOSHUA PHABI. See JESUS BEN PHABI.

JOSHUA OF SHIKNIN: Amora of the third century; known especially as a transmitter of Levi's Haggadah. He also quotes a haggadic sentence by Aḥa (Lev. R. xxxi. 5). Of his own work only a haggadic sentence, quoted by Yusta b. Shunam, is known: "The death of sinners excludes them from heaven and earth, whilst the death of the righteous establishes them in both" (Tan., Wayeẓe, 6 [ed. Buber, i. 148]).

S. S. S. KR.

JOSIAH (יאשיה, יאשיהו = "YHWH supports"): King of Judah from 639 to 608 B.C.; son and successor of Amon and grandson of Manasseh. His mother was Jedidah, the daughter of Adaiah of Boscath (II Kings xxii. 1 *et seq.*). His father, Amon, fell a victim to a conspiracy and was murdered by his own servants. According to II Kings xxi. 24, the "people of the land"—that is to say, the citizens of Jerusalem and Judah as distinct, probably, from the court party to which the conspirators belonged—slew the murderers of King Amon and made his son Josiah king. Josiah, then eight years old, reigned thirty-one years.

Reform of Worship.

Of the first eighteen years of his reign the Book of Kings tells nothing. In 626 B.C. Jeremiah began his notable work. The influence of this great prophet, and possibly of Nahum and Zephaniah, made itself felt, and Josiah inaugurated in his eighteenth year that great reformation which marks an epoch in the religious history of Israel. He first undertook the repair of the Temple, with the cooperation of his high priest Hilkiah. During the progress of this work "the book of the law" was found in the house of the Lord. The king was greatly alarmed lest the calamities threatened in the book for non-observance of its commands should come upon him and his people. He sent to consult the prophetess Huldah, who assured him that the evil foretold would indeed come, but not in his day; "because," she said, "thine heart was tender and thou didst humble thyself before the Lord." An assembly of the elders of Judah and Jerusalem and of all the people was called, and the ancient covenant with YHWH was renewed.

The king then set himself to the task of cleansing the land from idolatry. First, the Temple in Jerusalem was purged by the removal of the instruments and emblems of the worship of Baal and "the host of heaven," introduced by Manasseh. Then the corrupt local sanctuaries, or HIGH PLACES, were destroyed, from Beer-sheba in the south to Beth-el and the cities of Samaria in the north. The priests of the high places he brought to Jerusalem, providing for their sustenance out of the priestly revenues (II Kings xxiii. 8-9). The slaughter of some of these priests and the desecration of their altars with their bones gives a glimpse of the darker side of this crusade of reform (*ib.* 19-20). Finally, a great Passover celebration occurred in Jerusalem, such as had not been known since the days of the Judges.

The evidence is very strong that "the book of the law" referred to was DEUTERONOMY, and the measures taken by Josiah are quite in harmony with this view. In one respect, however, it seems to have been impossible or impracticable to carry out the Deuteronomic law. The priests of the high places were not put on an equality with those of the Temple, probably because of the opposition of the Temple hierarchy (comp. II Kings xxiii. 9 and Deut. xviii. 6-8; see also Ezek. xliv. 10-16). The most important of the results which followed this reformation were the centralization of religious worship at the Temple in Jerusalem and the acceptance of a sacred book of spiritual and ethical teaching as canonical and authoritative.

Of the remainder of Josiah's reign very little is known. It would appear that he exercised some authority over at least a portion of the former kingdom of Israel, which had been an Assyrian

Foreign Relations.

province (II Kings xxiii. 15-20). When in 608 B.C. Nineveh was attacked by the Medes and Babylonians, the young and ambitious ruler of Egypt, Necho II., marched northward toward the Euphrates to take possession of Syria. Whether through chivalrous loyalty to his Assyrian suzerain or through fear of Egyptian domination, Josiah gave battle to Necho at Megiddo, in the valley of Esdraelon, but was defeated and slain. Zech. xii. 11 is probably a reference to the great mourning in Jerusalem which followed this disaster (comp. II Chron. xxxv. 24, 25; see HADAD). The story of Josiah's reign in II Chronicles xxxiv.-xxxv. is substantially in accord with that in II Kings xxii.-xxiii. It makes, however, Josiah's work of reform begin in his twelfth instead of in his eighteenth year, and attributes his defeat and death to wilful disregard of the divine warning received through Necho himself, who claimed to have the command of God to go with haste upon this expedition, and who assured Josiah that he had no quarrel with him.

The character of Josiah is highly praised by the editor of Kings and by Jeremiah (II Kings xxii. 2, xxiii. 25; Jer. xxii. 15-17). The one extols his zeal for the purifying of religion, and the other his impartial administration of justice.

E. G. H. J. F. M.

JOSIAH: Tanna of the second century; the most distinguished pupil of R. Ishmael. He is not mentioned in the Mishnah, perhaps because he lived in the south (Sanh. 88b), and his teachings were consequently unknown to the compiler of the Mishnah, Judah ha-Nasi, who lived at Tiberias and Beth-she'arim in northern Palestine. This is the explanation proposed by Frankel and Brüll; but the fact may have been that the Mishnah of Meïr, which served as the basis of Rabbi's Mishnah, did not accept the development of the teachings of Ishmael as formulated by Josiah and R. Jonathan, and they were consequently omitted by Rabbi from his Mishnah (Hoffmann, in Berliner's "Magazin," 1884, pp. 20 *et seq.*). Josiah is frequently mentioned in the Mekilta together with Jonathan. All their differences concerned only interpretations of Biblical passages, never halakot. During Hadrian's persecution Josiah seems to have fled from Palestine; for he was at Nisibis, where he delivered precepts in the college of Judah b. Bathyra (Sifre, Num. 123; *ib.* Deut. 218).

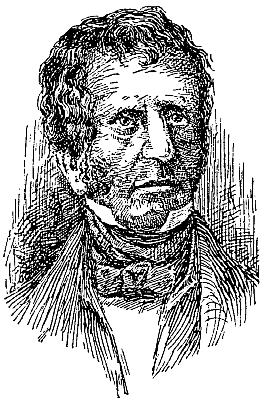
H. R. L. LE.

JOST, ISAAC MARCUS: German historian; born at Bernburg Feb. 22, 1793; died at Frankfort-on-the-Main Nov. 22, 1860. Jost was one of a poor family of eleven, most of whom died in infancy; and when his father became blind, the duty of guiding him fell upon Isaac. At the age of ten he lost his father and was taken to Wolfenbüttel; there he attended the Samsonschule, which at that time was conducted in the style of an old-fashioned ḥeder. This condition improved, however, when S. M. Ehrenberg (1807) took charge of the school; under him Jost began to study the German language. An intimate friendship connected him with Zunz, who was also a pupil in that school, and together they prepared themselves for the entrance examination of the gymnasium. Jost entered the gymnasium at Brunswick, supporting himself during the years 1809-13 as a tutor in the family of one of the trustees of the Samsonschule; then, supported by Israel Jacobson, he entered the University of Göttingen, removing a year later to that of Berlin. He graduated in 1816, and took up the profession of teaching, refusing an offer of Jacobson, who wished him to become a preacher; for Jost believed that the task of modern Judaism lay not in any reform of the services, but rather in an improvement of education. His first charge was the Bock school, where, in accordance with the system then advocated by Jewish and Christian humanitarians, Jewish and Christian pupils were educated together. The reactionary government of Prussia, however, in 1819, prohibited the reception of Christian children; this severely injured the school, as a great many Jewish parents had sent their children to it solely because they desired them to come into contact with Christians. Nevertheless, Jost remained at his post until 1835, when he was called to Frankfort-on-the-Main as teacher in the "Philanthropin," which position he held up to his death.



Isaac Marcus Jost.

Having himself suffered from the lack of system that characterized the yeshibah, Jost took the greatest interest in pedagogics, and his earliest literary work was devoted to the writing of text-books, among

Literary Activity.

which may be mentioned a grammar of the English language ("Lehrbuch der Englischen Sprache"), which went through three editions (Berlin, 1826, 1832, and 1843), and a dictionary to Shakespeare's plays (Berlin, 1830). He wrote also "Theoretisch-Praktisches Handbuch zum Unterricht im Deutschen Stil" (Berlin, 1835; the title of the 2d ed. being "Lehrbuch des Hochdeutschen Ausdruckes in Wort und Schrift," 1852). To the same class belongs his Biblical history, "Neue Jugendbibel, Enthaltend die Religiösen und Geschichtlichen Urkunden der Hebräer, mit Sorgfältiger Auswahl für die Jugend Uebersetzt und Erläutert: Erster Theil, die Fünf Bücher Mosis" (Berlin, 1823). In spite of his duties as a teacher and of his varied interests Jost never neglected Jewish literature, especially Jewish history. His first work in this line was the "Gesch. der Israeliten Seit der Zeit der Makkabäer bis auf Unsere Tage" (9 vols., Berlin, 1820–28), which was followed by a small compendium under the title "Gesch. des Israelitischen Volkes . . . für Wissenschaftlich-Gebildete Leser" (2 vols., Berlin, 1832). The work, which ended with the Napoleonic era, was continued in his "Neuere Gesch. der Israeliten" (Berlin, 1846–47), bringing it down to the date of its publication. Toward the end of his life he wrote another historical work, "Gesch. des Judenthums und Seiner Sekten" (3 vols., Leipsic, 1857–59), which deals with the whole of Jewish history down to 1858. Of other literary works of Jewish interest his edition of the Mishnah with vocalized text, German translation in Hebrew characters, and Hebrew commentary, deserves special mention (6 vols., Berlin, 1832–36).

Jost appeared repeatedly as an apologist of Judaism against political reactionaries and detractors of rabbinical literature; his "Was Hat Herr Chiarini in Angelegenheit der Europäischen Juden Geleistet?" (Berlin, 1830) was directed against Abbé Chiarini's "Théorie du Judaïsme"; and his "Offenes Sendschreiben an den Geheimen Oberregierungsrath Streckfuss" (Berlin, 1833), against Streckfuss' "Verhältnis der Juden zu den Christlichen Staaten." When in the beginning of the reign of Frederick William IV. of Prussia the rumor was spread that the king contemplated an alteration of the legal position of the Jews in a reactionary sense, Jost wrote "Legislative Fragen Betreffend die Juden im Preussischen Staate" (Berlin, 1842) and "Nachträge zu den Legislativen Fragen" (*ib.* 1842). He edited (1839–41) the "Israelitische Annalen," a weekly chiefly devoted to the collection of historical material, and (1841–42) the Hebrew periodical "Zion" (in collaboration with his friend and colleague Michael CREIZENACH). He was also a frequent contributor to the Jewish press, to almanacs, and to year-books.

As Historian.

When Jost published his first historical work Jewish historiography was still in its infancy. Of older works, that of Basnage was the best in existence; the sources had not yet been collected; and for the religious history the unsystematic and uncritical works of the chroniclers were the only guide and source. It was inevitable that, with the appearance of Zunz's monographs and the numerous similar works, published either independently or in magazines, the work of Jost should soon become antiquated. He recognized this himself at the end of his life by taking up the work again. Another shortcoming is his rationalistic attitude toward the narratives in Talmudic sources, which leads him to see in many of the Talmudic authors shrewd impostors who played on the credulity of their contemporaries by feigning miracles (see his presentation of Eliezer ben Hyrcanus in his "Allgemeine Gesch." ii. 108). His earlier works lack to a great extent the strictly historical interest, and evidence too much of Jewish sentiment (*ib.* ii. 387). His rationalism is found also in the bitterness with which he speaks of Judæo-German ("Jahrbuch," ii. 43). His best work is in the presentation of modern Jewish history, in which he is singularly exact and conscientious, and to which he gives an exhaustive literature of sources; here he exhibits not only a fine discernment of what is historically important, but a spirit of fairness which is the more creditable because he wrote in the midst of the struggle for Reform.

Jost endeavors to do justice to Samson R. Hirsch's mysticism as well as to Aaron Chorin's rationalism; he recognizes the importance of M. A. Günzburg and of Isaac Bär Lewinsohn, while Grätz, who wrote on this period a quarter of a century later, ignores Günzburg and Lewinsohn and speaks of Chorin with the bitterness of a partizan. It is undoubtedly due to that impartiality that Jost's work suffered by comparison with the warm Jewish spirit which permeates Grätz's work (see Grätz, "Gesch." xi. 456).

His Personality.

While not a man of public life, Jost devoted himself to the cause of orphans, and to his initiative was due the establishment in Frankfort-on-the-Main of a girls' orphan asylum (1853). He was instrumental also in founding a society (Permissionistenverein, 1843) for the aid of those who, according to the law then in existence, had no claim on the Frankfort charitable institutions, not being freemen of the city; he founded the Creizenach Stiftung, for the aid of aged teachers and their families (1842), and he often assisted young students and poor authors with both advice and influence. While advanced in his views, he was indifferent to Reform, and for years never attended a religious service (Zirndorf, "Isaak Markus Jost und Seine Freunde," p. 130). He married in 1816 a Miss Wolf, niece of Isaac Euchel. She died in 1842. He devoted himself with paternal affection to the pupils of the orphan asylum, whom he liked to call his children.

JOST LIEBMANN: Court Jew and court jeweler of Elector Frederick III. of Brandenburg (King Frederick I. of Prussia), and one of the elders of the Jewish congregation of Berlin; died 1701. As court Jew Jost succeeded Israel Aaron, whose widow he married. His wealth and standing at the court enabled him to exercise a great influence in the early period of the Jewish congregation. He acquired the privilege of having his own synagogue, to which he appointed as rabbi his nephew and son-in-law, Aaron ben Benjamin Wolf. By his quarrels with Marcus Magnus, court Jew of the crown prince, the congregation was split into two factions, and after his death the quarrel was continued by his widow and his sons Israel and Liebmann Jost (see Jew. Encyc. iii. 71, iv. 317). Among his numerous descendants are the brothers Giacomo Meyerbeer, Michael Beer, and Wilhelm Beer.

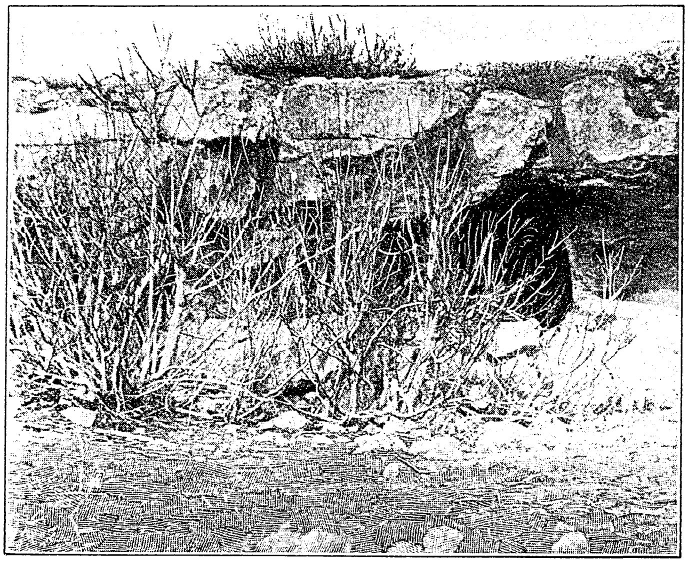
JOTAPATA (Ἰοτάπατα, Ἰοταπάτη): City in Galilee to the north of Sepphoris, strongly fortified by Josephus (Josephus, "Vita," § 37). In the Mishnah ('Ar. ix. 6, 32a) this city is called יודפת, styled "the Ancient," and is supposed to have been fortified by Joshua. The גיבנתא של צפורי mentioned in Gen. R. xcviii. 16 is identified by Reland ("Palästina," ii. 816) with Jotapata. There was a Menahem surnamed יודפאה (Zeb. 110b), which probably means "a native of Jotapata." Neubauer ("G. T." p. 203) thinks that the plain called יטבת (Tosef., Niddah, iii. 11) is the plain of Jotapata.



Cave on the Top of Tell Jafat, Site of Ancient Jotapata.
(From a photograph by Dr. W. Popper.)

The city is famous in Jewish history for the long siege which it sustained in the war with the Romans. As the fortress was very strong, being built on a rock surrounded by steep hills, and accessible on the northern side only, Josephus fled thither with his army (Josephus, "B. J." iii. 7, § 3). Vespasian arrived there after many difficulties and pitched his camp on the northern side of the city (*ib.* § 4). The Jews fought desperately; especially Eleazar b. Sameas of Saab, Netir, and Philip of Ruma. Vespasian himself was wounded. The siege continued for forty-seven days (*ib.* 7, § 33; 8, § 9), and might have lasted still longer had not a deserter betrayed the Jews. The Romans spared nobody; and many of the Jews killed themselves. Forty thousand of them lost their lives during the siege; and about 1,000 women and children were sold as slaves. The citadel was razed and the fortifications burned on the first of Tammuz, 67 (*ib.* 7, §§ 33–36).

The site of Jotapata has been identified with the modern Tell Jafat, north of Sepphoris (E. G. Schultz, in "Z. D. M. G." iii. 49 *et seq.*).

JOTHAM: **1.** Youngest son of Gideon or Jerubbaal. On the death of Gideon (Judges viii. 33) the children of Israel fell back into the slough of idolatry, from the results of which he had so signally delivered them by the battle against Midian (*ib.* vii., viii.). Abimelech, the son of one of Gideon's concubines at Shechem, conspired with the Shechemites, for a given sum of money, to have his seventy brothers slain at Ophrah, Gideon's home (*ib.* ix. 5). All were killed except Jotham, who hid himself.

While the assembly of Shechemites was crowning Abimelech at a given place in Shechem, Jotham suddenly appeared on a point of rock on Mount Gerizim and addressed to the men of Shechem a parable (*ib.* ix. 7–21), the construction and application of which are not entirely plain. The trees of the forest could not persuade either the olive-tree, the fig-tree, or the vine to rule over them. The worthless bramble proposed itself as king, threatening destruction if the trees rejected it. In other words, "this bramble, Abimelech, has proposed his own promotion. If you crown him and trust in him, then rejoice and let him rejoice in you; but if not, let fire come out from Abimelech and devour the men of Shechem, and from the house of Millo and devour Abimelech." Jotham then fled; but within three years his parable or curse was completely fulfilled (*ib.* ix.).

Bibliography: Moore, *Judges*, ad loc.

2. Son of Uzziah or Azariah; tenth king of Judah (751 to 735 B.C.). His father sacrilegiously offered incense in the Temple (II Chron. xxvi. 16–21) and was smitten with leprosy. He was thus compelled to dwell apart from the people, and for nearly fourteen years Jotham was regent, or, in reality, king over Judah. He inherited a strong government, well officered and administered. He himself is said to have built the upper gate of the house of Yhwh and to have avoided the rashness which allowed his father to enter the Temple (II Chron. xxvii. 2). "He built cities in the mountains of Judah, and in the forests he built castles and towers." He also defeated the Ammonites, who paid him an immense annual tribute. His might is attributed by the Chronicler (*ib.* xxvii. 6) to his having "ordered his ways before Yhwh, his God."

But the increasing corruption of the Northern Kingdom began to permeate Judah, as is seen in the words of Isaiah and Micah. Hosea's references to Judah indicate also a lack of purity of life and worship under Jotham's reign.

3. One of the sons of Jahdai, descended from Caleb (I Chron. ii. 47).

JOY (Hebrew, "simḥah," "sason," "ḥedwah," "gil," and "rinnah"): The feeling of gladness and rejoicing.—**Biblical Data:** Cant. R. i. 4 enumerates ten different terms for joy, and Wünsche ("Die Freude in den Schriften des Alten Bundes," 1896) states that no language possesses as many words for joy as does the Hebrew; which fact indicates the cheerful disposition of the Jewish people and the optimism predominant in Judaism (see Optimism). Often the Hebrew poet or prophet transfers the joy of his soul to the surrounding creation; and so heaven and earth, mountains and valleys, fields and trees, are pictured as breaking forth into joy (Ps. xcvi. 11–12, xcvii. 1, xcviii. 4; Isa. xxxv. 1–2, xliv. 23, xlix. 13).

The Bible couples joy with the earnestness of life, in striking contrast to paganism, which at times encourages wanton indulgence in sensual pleasures by rendering wild orgies of passion features of the worship of its lustful deities, and at other times turns to the opposite extreme of absolute world-contempt and avoidance of every healthful enjoyment ("Rejoice not, O Israel, in the joy of the heathen nations"; Hosea ix. 1, Hebr.; see Paganism). The Bible cautions against pleasures which leave behind them heaviness, sorrow, and want (Prov. xiv. 13, xv. 21, xxi. 15; Eccl. ii. 2, vii. 4); but it regards lawful and healthful enjoyments as commendable inasmuch as they are blessings from God (Deut. xii. 7, xxiv. 11; Prov. x. 18; Eccl. ix. 7, xi. 9). To some extent, rejoicing with or before God, the Dispenser of all good, becomes an obligation (Deut. xii. 12, 18; xvi. 11, 15; xxvi. 11; xxvii. 7). Pure joy is the joy of thanksgiving to God, or the joy in God and in His help (Lev. xxiii. 40; Isa. xix. 19, xxv. 9; Joel ii. 23; Ps. vii. 12, ix. 3, civ. 34; I Sam. ii. 1). God Himself is a God of joy, who rejoices in His works (Ps. civ. 31). So do His statutes rejoice the heart (*ib.* xix. 9 [A. V. 8]). "In uprightness of heart there is gladness, wherefore the righteous will rejoice" (*ib.* xcvii. 11–12, Hebr.). "It is joy to the just to do judgment" (Prov. xxi. 15). "The key-note of the old Hebrew cult was joy, because it was a communion of man with his God" (Smend, "Religionsgesch." p. 125, Freiburg, 1893). Fulness of joy is promised for the soul when in the presence of God (Ps. xvi. 11). Moreover, the Law consecrated joy, for it was destined to impart joy to those deprived of joy by poverty and privation. The festivals of thanksgiving were ordained to be occasions of beneficence to the homeless and fatherless (Deut. xvi. 9–11). The worship of God should be offered in joy (Ps. c. 2); and the house of prayer should be joyful (Isa. lvi. 7). An enemy's fall should not cause joy (Prov. xxiv. 17).

——**In Rabbinical Literature:** The same spirit of joyfulness, moderated by the consciousness of duty, pervades rabbinical literature. "Simḥah shel miẓwah" (= "joy emanating from sacred duty well performed") is regarded as the only state of the soul in which the Shekinah rests on man (Shab. 30b), and in which communion with God by means of prayer should be sought (Ber. 31a). This joy the Rabbis find commended in Eccl. viii. 15, and the profane form repudiated in Eccl. ii. 2 (Shab. *l.c.*). To cheer the depressed is a meritorious act which may obtain for the lowliest man a share in the world to come (Ta'an. 22a).

Against the ascetic view of the Essenes, Rab declared that man at the Judgment Day will have to give account for every lawful enjoyment offered to him by Providence and refused by him (Yer. Ḳid. iv. to end). Both he and Samuel quoted sayings even of a somewhat hedonistic character in order to discourage the spirit of ascetic world-contempt ('Er. 54a). In a similar sense must be taken the saying of R. Eleazar, "He who lives without a wife lives without joy" (Yeb. 63a), and that of Eliezer ha-Ḳappar, "He who denies himself wine is a sinner" (Ta'an. 11a). But the Rabbis made joy, above all, the characteristic feature of the Sabbath and of the holy seasons of the year. The words "call the Sabbath a delight" (Isa. lviii. 13) were so interpreted as to render the Sabbath the gem of days and the joy of the Jewish home (Shab. 118a, b; see Sabbath); and similarly every festival was invested with the character of joy (Pes. 109a; Meg. 16b). Even the Days of Penitence should have not an austere character like the Lenten days of the Christians but preeminently one of cheerfulness (Yer. R. H. i. 57b).

But more powerful than all rabbinical precepts as an incentive to joy was life itself. In spite of the gloom cast upon the Jew ever since the destruction of the Temple (Ber. 31a; 'Ab. Zarah 3b), in spite of all the persecutions and oppressions endured by him, there is a wondrous outburst of joy noticeable in the Jewish liturgy, in every morning and evening prayer (see Ge'ullah), in the prayers for Sabbath and holy days, and in the songs and benedictions recited at the table. Cheerfulness is the key-note of the Jew's character in his domestic life and in his religious devotion, because it is founded upon optimism, upon faith in God, and upon hope in the final triumph of justice and truth.

JUAN DE ABADIA. See Abadia, Juan de la.

JUAN RODRIGO DE CASTEL-BRANCO (surnamed **Amatus Lusitanus**): Portuguese physician; born at Castel-Branco, Portugal, in 1511;

died at Salonica in 1568. He was a descendant of a Marano family called Ḥabib (= Amatus), and was brought up in the Jewish faith. After having graduated with honors as M.D. from the University of Salamanca, he left his native country in fear of the Inquisition. He went to Antwerp for a time and then traveled through Holland and France, finally settling in Italy. His reputation as one of the most skilful physicians of his time preceded him there, and during his short sojourn at Venice, where he came in contact with the physician and philosopher Jacob Mantino, he attended the niece of Pope Julius III. and other distinguished personages.

In 1546 Juan was in Ferrara, delivering lectures on anatomy and medicinal plants. At one of his lectures he dissected twelve cadavers—a great innovation at that time—in the presence of many scholars, among whom was the anatomist Jean Baptiste Cananus, who through his experience on this occasion discovered the function of the valves in the circulation of the blood. During his sojourn in Ferrara, which lasted for six years, Amatus Lusitanus received an invitation from the King of Poland to remove to that country, which he declined, preferring to settle in Ancona, where religious tolerance existed.

Meanwhile his reputation grew higher and higher. Jacoba del Monte, sister of Pope Julius III., was one of his patients; and he prescribed also for Julius himself, to whose sick-bed he was later summoned.

With the accession of Paul IV., Amatus underwent all the sufferings which the Maranos of Ancona had to endure from this pope. He took refuge in Pesaro, leaving behind him all his possessions, including several manuscript works, the loss of which he greatly deplored. One of these manuscripts, however, the fifth part of his "Centuriæ," was later restored to him and published. During his sojourn at Pesaro he received an invitation from the municipality of Ragusa to settle there. This he accepted, but after staying for some months he left the city for Salonica, where he openly professed the Jewish faith.

Amatus enriched medical literature with several valuable works which for a long time enjoyed the highest reputation. Among these the most important was his "Centuriæ," in which he published accounts of his cases and their treatment. This work, in seven volumes, entitled "Curationum Medicinalium Centuriæ Septem," passed through a number of editions (Florence, 1551; Venice, 1552, 1557, 1560, 1653; Basel, 1556; Leyden, 1560, 1570; Paris, 1620; Bordeaux, 1620; Barcelona, 1628). His other works were: "Enegemata in Duos Priores Dioscoridis de Arte Medica Libros," Antwerp, 1536; "Commentatio de Introitu Medici ad Ægrotantem," Venice, 1557; "De Crisi et Diebus Decretoriis," *ib.* 1557; "In Dioscoridis Anazarbei de Medica Materia Libros Quinque," *ib.* 1557; Leyden, 1558; "Enarrationes Eruditissimæ," Venice, 1553; "La Historia de Eutropio" (Eutropius translated into Spanish); commentary on the first book of Avicenna's Canon, which, as he relates in the preface to the seventh "Centuria," he lost among his possessions at Ancona.

D. I. Br.

JUAN DE SEVILLA: Representative of the Maranos in 1482, and a wealthy tax-farmer; lived in Jerez de la Frontera. In 1481, when ordered to answer to the charge of Judaism before the inquisitors Miguel de Morillo and Fra Juan de S. Martin, he fled, together with Pedro Gonçales Pichon, his brothers Alonso and Stephen Pichon (probably relatives of D. Juçaf Pichon), Martin Sanches Montesino, Rodrigo Dios Ayuda (Help-of-God Eliezer), and Pedro de Prieto—all tax-farmers and his coreligionists. Juan settled in Evora. Proceedings were instituted against him and the above-named Maranos, who owed large sums to the city of Jerez and to various chapters; and their houses, vineyards, and other properties were confiscated by the fiscal authorities. Through his efforts Pope Sixtus IV. issued on Aug. 2, 1483, the bull "Ad Futuram Rei Memoriam," in which he admitted Maranos outside Spain to reconciliation.

Juan de Sevilla induced the Bishop of Evora, Garcia de Meneses, to acknowledge the bull as genuine on Jan. 7, 1484; this kept the Inquisition in Seville in check for ten years. Juan never returned to Spain. With the Maranos who fled with him he was burned in effigy.

G. M. K.

JUAN DE VALLADOLID (called also **Juan Poeta**): Spanish poet and Marano of lowly station; born about 1420 in Valladolid. He lived at the courts of Naples, Mantua, and Milan as improvisator and astrologer. On his return to Spain he was captured by Moorish pirates and taken to Fez, but was soon released. After having married a Jewess named Jamila, and, as some maintain, also a Christian, he married a Moorish woman in Fez. He spent some years at the court of the kings of Navarre and later settled in Cordova, where he received a large honorarium from the city council and exchanged satirical poems with Anton de Montoro. Montoro, after tendering some advice to his "good and great friend," concluded with the words: "We both belong to one and the same race—we are both Jews; the insults offered to you wound me also, and the injury which you suffer I suffer too." Contemporary poets invariably refer to Juan as "Judio" (the Jew). With the great, even with Queen Isabella, he was in high favor. His poems are scattered through various collections of songs, both printed and in manuscript. Several are found in "Concionero de Anton de Montoro" (Nos. 157, 161, etc.).

BIBLIOGRAPHY: Emil Cotarelo y Mori, *Concionero de Anton de Montoro*, pp. 13, 341 *et seq.*

G. M. K.

JUBAL (יובל): Son of Lamech; "the father of all such as handle the harp and pipe" (Gen. iv. 19-21, R. V.); that is, he was the "father" or the first of the class of musicians, the founder of music, the inventor of the "kinnor" or lyre and of

30

the "'ugab" or reed-pipe. It is noteworthy that though the three names "Jabal," "Jubal," and "Tubal" may be derived from the same root (יבל = "to lead" or "bring forth," "to be fruitful"), the name "Jubal" suggests likewise יובל ("the ram's horn"), and hence "music."

E. G. H. J. F. M.

JUBILEE. See Sabbatical Year.

JUBILEES, BOOK OF (Τὰ Ἰωβηλαῖα; known also as **Little Genesis** [Ἡ Κλεινὴ Γένεσις = "Bereshit Zuṭa"]; **Apocalypse of Moses; Life of Adam**): Midrashic commentary on the Book of Genesis and on part of the Book of Exodus, in the form of an apocalypse, containing the views, legends, and religious practises of the most rigid Pharisaic (or Hasidæan) school of the time of John Hyrcanus, in whose reign it was written, between 135 and 105 B.C. Originally composed in Hebrew, the book was translated into Greek (in which form it was known to the Church Fathers down to the sixth century), and from Greek into Latin and Ethiopic. The Latin version, published first by Ceriani (in "Monumenta Sacra et Profana," Fasc. I., 1861), later by Rönsch ("Das Buch der Jubiläen Unter Beifügung der Lateinischen Fragmente," 1874), is incomplete. The Ethiopic version was published by Dillmann in 1859; it was translated into German by him in Ewald's "Jahrbücher der Biblischen Wissenschaft," 1850-51, and then by Littmann in Kautzsch's "Apocryphen und Pseudepigraphen," ii. 1900; the Ethiopic text was published in revised form by Charles in 1895, and was translated by him into English in the "Jewish Quarterly Review," 1893-95; in 1902 it appeared separately in an edition rendered valuable by extensive notes. Epstein is inclined to believe ("R. E. J." xxi. 80 *et seq.*, xxii. 1 *et seq.*) that though the work was scarcely known in Talmudic times, many haggadot peculiar to the Book of Jubilees found their echo in Midrash Tadshe and Pirke R. Eli'ezer. Possibly Jellinek is nearer the truth in claiming an Essene origin for the book ("B. H." iii. 9 *et seq.*); whereas Beer ("Das Buch der Jubiläen und Sein Verhältniss zu den Midraschim," 1856; "Noch ein Wort über das Buch der Jubiläen," 1857), with arguments that are extensive and erudite but not convincing, ascribes it to a Samaritan author. Singer ("Das Buch der Jubiläen oder die Leptogenesis," 1898), following a few suggestions of Rönsch, endeavors to prove that the book was written by a Judæo-Christian, a contemporary of Paul, for the purpose of discrediting the latter's doctrine of the abrogation of the Law. Charles, however, in the notes to his translation, has established beyond doubt the origin and character of the work, and, therefore, his views are, in the main, here followed.

The author of the Book of Jubilees rewrote the history of the Protoplasts, of the Patriarchs, and of the Exodus with the view of inculcating certain principles that found no acceptance afterward in the rabbinical schools; foremost among these are the rules concerning the regulation of the calendar and the festivals. In place of the intercalated calendar, which he condemns in the strongest terms, he proposes a solar calendar consisting of a civil year of 12 months, 8 of 30 days and 4 of 31 days, and an ecclesiastical year of 13 months of 28 days each, so as to make all festivals, except the Day of Atonement, fall on Sunday, and make the Feast of Weeks fall on the 15th of Siwan (Book of Jubilees, i. 1, 26; vi. 22 *et seq.*, 38; xlix. 14; see Epstein in "R. E. J." xxii. 10 *et seq.*; Charles, "The Book of Jubilees," pp. 55 *et seq.*). His leading idea seems to be that the divine plan of the Messianic kingdom rests upon the exact calculation of the week, the common year, and the "Jubilee" year (*i.e.*, the last year of a cycle of 7 × 7, or 49 years), each being based upon the sacred number seven, and the entire history of Israel and the world being divided into "jubilee" periods (see vi. 35; comp. Lev. xxvi. 34-43 and Targ. Yer. *ad loc.*; 'Ar. 10b; Seder 'Olam R. xi.; Assumptio Mosis, i. 2; "Samaritan Chronicle," in "Journal Asiatique," 1869, pp. 421 *et seq.*). As in the Book of Enoch (xlvii. 3, lxxxi. 1, ciii. 2) and the Testaments of the Twelve Patriarchs (Levi, 5; Asher, ii. 5), every event, every statute of the Law, and every custom is, for the author, written down on the tablets of heaven (Jubilees, iii. 10, 31; vi. 17; xxiii. 32; xxviii. 6; xxx. 9; *et al.*); thus social custom and human destiny are alike determined by God's decree. Josephus, "Ant." xiii. 5, § 9, calls this Εἱμαρμένη.

Chronological System of Jubilees.

The Book of Jubilees, presenting itself as "the history of the division of the days of the Law, of the events of the years, the year-weeks, and the jubilees of the world" (i. 1, 26, 29; l. 13), claims to be a revelation of God to Moses, given through the Angel of the Presence (i. 27-29 [probably Michael]) in addition to the written Law received by Moses on Mount Sinai (Ex. xxiv. 12); and, while the written Law was to be imparted to all, this was to be the "Cabala," the secret tradition entrusted only to the saints of each generation, to Enoch, Methuselah, Noah, and Shem (ch. vii. 38, x. 14, xxi. 10), then to Abraham, Isaac, Jacob, and Levi, and finally to the priests and scribes of the latter times (ch. xii. 27, xxi. 10, xxv. 7, xxxix. 6, xlv. 16).

Character and Object.

Obviously, the chief object of the work is to exalt the Law (and Hasidæan practise) as divinely ordained and fixed from eternity, to extol the institutions of the Sabbath and circumcision as heavenly signs distinguishing Israel from the rest of the nations, and, finally, to draw the sharpest possible lines of demarcation between Israel and the Gentiles —in striking contrast to the practise of the Hellenist party. As does the Book of Chronicles regarding the kings of Judah, the Book of Jubilees omits every Biblical narrative which suggests any blemish in the Patriarchs (see Charles, *l.c.* Introduction, p. xlviii.), and transfers to Satan and his hosts those acts of God which seem unworthy of Him—such as the tempting of Abraham, the attempt on Moses' life, the hardening of the heart of Pharaoh, and the slaying of the first-born (ch. xvii. 16; xlviii. 2, 17; xlix. 2). The Patriarchs are represented as saintly exemplars of religion and of filial affection. Abraham knew God from his youth, and did not leave his father, Terah, without his consent and blessing (ch. xi. 16 *et seq.*; xii. 1, 28-31); he married Keturah only after Hagar's death (ch. xix. 11). Jacob, likewise, waited for Isaac's blessing and is represented as being the spiritual heir to Abraham and prompted in all his doings by filial piety and regard (ch. xxii. 10, xxv. 4, xxvii. 9, xxix. 15, xxxv. 9–12); nor does he directly deceive his blind father ("I am thy son," xxxvi. 13 [the word "Esau" being omitted]).

The Twenty-two Works of Creation.

Israel, the people, stands in closest relation to God, the Father, the Israelites being His beloved children (ch. i. 24 *et seq.*, xix. 29). While all other nations are subject to angels or spirits appointed by Him as the Ruler of the world, Israel is subject only to God (comp. LXX. and Targ. Yer. to Deut. xxxii. 8). As a sign of its union with God, both the Sabbath and circumcision have been given to it, privileges which it shares with the angels (ch. ii. 18–21, xv. 26–27: "The two highest angelic orders have been created thus from the day of their creation"; comp. the passage concerning Adam and the rest of the world's saints [fifteen in number] having been born circumcised, derived from Gen. i. 27—"God created man in his own image" [Ab. R. N. ed. Schechter, p. 153]). Upon Jacob, as the end, the whole Creation is centered (ch. ii. 23, xix. 24–25), and the world's renewal is effected through the Messianic kingdom in Jerusalem (ch. i. 29, iv. 26). Accordingly, the twenty-two works of the six days of Creation are enumerated (ch. ii. 2–22): On the first day—heaven, earth, water, the spirits, the abyss, darkness, and light; on the second—the firmament; on the third—the land, the seas, vegetation, and paradise; on the fourth—sun, moon, and stars; on the fifth—the sea-monsters (Behemoth and Leviathan, "the first things of flesh created by His hands"), the fish, and the birds; on the sixth—the wild and the tame animals, the creeping things, and man; these twenty-two works correspond to the twenty-two generations from Adam to Jacob, as well as to the twenty-two letters of the alphabet and the twenty-two books of Holy Scripture (ch. ii. 23; comp. Midr. Tadshe vi.; Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," 1887, p. xx.; and Charles, *l.c.* pp. 11, 18).

Especially significant is it that, writing in a time when the Abrahamic rite was spurned by Jews who desired to be one in the arena with the Greeks (ch. xv. 33–34; I Macc. i. 13–15; "Ant." xii. 5, § 1; Assumptio Mosis, viii. 3; Abot iii. 11), the Hasidæan author represents circumcision as ordained in heaven from the beginning of Creation (ch. xv. 25–27), as well as the law regarding the covering of the loins ("gillui 'erwah") as given to Adam and prescribed on the heavenly tables (ch. iii. 31: "not as the Gentiles uncover themselves"). The Sabbath that comes at the close of the twenty-two generations (ch. ii. 23) was also ordained in heaven, and was, therefore, given to no other nation but Israel, to celebrate as it is celebrated by the angels in heaven (ch. ii. 30–31; comp. Sanh. 58b).

Separation from the Gentiles ("perishut" = ἀμιξία, II Macc. xiv. 38) is rendered the fundamental principle of Jewish law and custom. Israel is forbidden to eat, or associate, or intermarry with them, because "they sacrifice to the dead, worship evil spirits, and eat over the graves; because all their ways are unclean, and they will be destroyed from the earth, nor will they be saved on the Day of Judgment" (ch. xxii. 16–22, xxx. 7–10). Especially singled out as cursed and doomed forever in the heavenly tables are those nations with which the Jews came into contact in the time of the Maccabees: the Philistines (ch. xxiv. 28–32; comp. I Macc. v. 68; x. 60, 84, 89; xi. 60–62; xvi. 10); the Idumeans or the sons of Esau (ch. xxvi. 34, xxxviii. 14; comp. "Ant." xiii. 9, § 1; 15, § 4); the Amorites (ch. xxix. 11, xxxiv. 2–9; comp. the notes on Charles, *l.c.* pp. 200 *et seq.*). The motive of the writer, however, is not, as Charles says (*l.c.* Introduction, p. lv.), "hatred and contempt of the Gentiles," but is expressed in the words of the Rabbis ('Ab. Zarah 2b): "God saw that the Gentiles would not observe the Noachian laws, wherefore He outlawed them."

The Noachian Laws.

According to Jubilees, vii. 20–29 (comp. Laws, Noachian), Noah enjoined his sons to observe justice, to cover the shame of their flesh, to bless their Creator, to honor father and mother, to love their neighbors, and to refrain from fornication, uncleanness, and all iniquity, for because of these last three things the Flood came upon the earth. Possibly the seven Noachian laws enumerated in Sanh. 56a and Tosef., 'Ab. Zarah, viii. 4, were partly misunderstood by the Greek translator. These laws prohibit the following: (1) injustice; (2) blasphemy against God ("birkat ha-shem," a rabbinical euphemism—"blessing of God" instead of "blasphemy"); (3) incest ("gillui 'erwah"); (4) idolatry; (5) murder (comp. Gen. R. xxxi. 6: "ḥamas" [violence] in Gen. vi. 11 includes murder, idolatry, and incest; comp. Tanna debe Eliyahu Zuṭa x.); (6) eating flesh cut from living animals (probably included in the Biblical prohibition in Gen. ix. 4 against eating flesh from which the blood has not been drained; comp. Jubilees, vii. 29); (7) stealing. (For the statement that the men of the Flood were guilty of fornication see Gen. R. xxxi.; and in regard to their going about uncovered see Yalḳ., Job, xxiv. 7.) According to the author, Canaan, the son of Ham, seized by violence the land of Palestine, which belonged, by lot and by mutual agreement sealed by oath, to the sons of Shem; therefore Canaan was cursed by his father, Ham, and by his brothers Cush and Mizraim (ch. x. 29–34), and the Israelites in conquering the land of Canaan simply reclaimed their inheritance. The Garden of Eden, as the dwelling-place of the Lord, fell to Shem (ch. viii. 18–19, with reference to Gen. ix. 26–27), and the rest of the earth was divided by Noah among his three sons for generations to come (ch. viii.–ix.).

The author aims to trace all religious and social institutions and customs to the most ancient times, in order to give them the highest possible sanction; it may often be inferred that certain practises he mentions were observed in his own time. Thus the law distinguishing between the male and the female in regard to the days of uncleanness for a woman after the birth of a child (Lev. xii. 2–5) is attributed to the fact that Adam was created in the first week and brought into Eden on the fortieth day, whereas Eve was created in the second week and brought into Eden on the eightieth day (ch. iii. 8–14; comp. Midr. Tadshe xv.; Jellinek, "B. H." iii. 178).

When Adam went forth from Eden with his nakedness covered, he offered incense to God as a thank-offering at the rising of the sun (obviously a custom practised by the parents when their child thus left the state of infancy).

Hebrew the Language of Heaven.

Until Adam left paradise, all creatures, both animals and man, spoke Hebrew, the language of heaven (ch. iii. 28; comp. Targ. Yer. to Gen. xi. 1, and Shab. 12b). After the overthrow of the Tower of Babel, Hebrew was forgotten on earth until Abraham was taught it again by the angels (ch. xii. 25-26). After the murder by Cain, it was announced and written down on the heavenly tables that both he that committed murder, and he that witnessed it and did not declare it before the tribunal of justice for punishment, should be cursed; wherefore even the angels must declare every sin committed by man (ch. iv. 5-6). Enoch, who was the first man initiated by the angels into the art of writing, and who accordingly wrote down all the secrets of astronomy, of chronology, and of the world's epochs to the end of time, testified against the angels that fell by lusting after the daughters of men; and ever since he was taken to heaven he has been recording the good deeds and the sins of men, and will continue to record them until the Judgment Day (ch. iv. 21-24; comp. Lev. R. xxxiv. 9). Thus all the iniquities of men from the time of the Flood, and all that is done in heaven, earth, or Sheol, are written on the tablets of heaven for final judgment on the Last Day. But in regard to Israel, and Israel only, it was ordained that they should obtain pardon by repenting of their sins once each year—on the Day of Atonement (ch. v. 13-18).

The secret of astrology, divulged by the Heavenly Watchers to men and carved by the latter on rocks, was deciphered by Kainan the son of Arphaxad, whom his father had taught the art of writing (ch. viii. 2-4 ["Nahor" in ch. xi. 8]; comp. "Ant." i. 2, § 3). The distribution of land by lots, that is, by "writings taken out of the bosom," is ascribed to Noah (ch. viii. 11; comp. Prov. xvi. 33); so also is the book on healing herbs and various kinds of medicine for the treatment of sickness, diseases being caused by evil spirits, the host of Satan (ch. x. 7-14; comp. Jellinek, "B. H." iii., pp. xxx. and 155 *et seq.*). To marry the daughter of the father's brother or sister, or some other kinswoman, while not enjoined by a law, at least seems to be recommended, to judge from the fact that all the pious men mentioned in the Book of Jubilees are represented as following the practise (ch. iv. 15 *et seq.*, xi. 7, *et al.*; comp. Tobit iv. 12; Judith viii. 1; Gen. R. xviii.; "J. Q. R." v. 406). The command not to give the younger daughter in marriage before the elder is declared to be written on the heavenly tables (ch. xxviii. 6; comp. Gen. xxix. 26), as is also the command not to give one's daughter to a Gentile (ch. xxx. 9) or to commit incest (ch. xxxiii. 10).

The Festive Seasons of the Year.

The festive seasons of the year, with the rites connected therewith, are represented as having been instituted either by Noah or by the Patriarchs, though they were written from the beginning in the heavenly tables (ch. vi. 17, 31, 35). There are, first of all, the new moons, not of every month, since the lunar year is denounced by the author, but of the four "teḳufot," or seasons of the solar year, namely, the vernal equinox—the 1st of Nisan; the summer solstice—the 1st of Tammuz; the autumn equinox—the 1st of Tishri; the winter solstice—the 1st of Shebaṭ (ch. vi. 23-25; comp. v. 29-30, xiii. 8, xxiv. 22; comp. Enoch, lxxxv. 2, and the four New-Year's days of the year in R. H. i. 1: the 1st of Nisan, of Elul [perhaps originally Tammuz?], of Tishri, and of Shebaṭ). "On the 1st of Tishri, Abraham observed the stars, to forecast the rains of the coming seasons" (ch. xii. 16; comp. Lev. R. xx. 4 with regard to the Day of Atonement). On the 1st of Siwan, after the Flood had subsided, Noah made atonement for the earth by offering a kid (comp. Num. xxviii. 15, xxxv. 33), and other kinds of beasts, with the libation of wine and oil and with frankincense (ch. vi. 1-3). Then God made a double covenant with him—first, that blood should no longer be eaten nor the blood of man shed, while the blood of animals should be offered twice daily on the altar for the pardon of men's sins (ch. vi. 4-16; comp. Gen. ix. 4-6; Num. xxviii. 3-8); secondly, that the seasons and festivals of the year should be fixed according to the course of the sun (ch. vi. 23-38; comp. Gen. viii. 22).

Feast of Weeks.

But it is especially upon the right observance of the Feast of Weeks that the Book of Jubilees lays stress, following the Sadducean practise in insisting that it be celebrated each year on the first day of the week in literal conformity with the words "the morrow after Sabbath" (ch. vi. 17-22; see Lev. xxiii. 15-16). It was to take place on the 15th of Siwan. It was celebrated in heaven from the days of Creation until God ordained it to Noah. On that day God made the covenant with Abraham between pieces of sacrificial beasts, as mentioned in Gen. xv., while Abraham offered the first-fruits of his tillage with other sacrifices (ch. xiv. 10-20, xv. 1-9; see Charles, *l.c.* p. 106, notes). Celebrated, also, by Abraham, as the Feast of the Covenant of Circumcision (ch. xv. 3), and by Isaac (who was born on the 15th of Siwan; ch. xvi. 13) and Jacob (ch. xxii. 1, xxix. 6, xliv. 3), the Feast of Weeks was renewed by Moses for all generations as the Feast of the Covenant of Sinai (ch. vi. 19).

The Feast of Tabernacles was first celebrated by Abraham, in booths; it was maintained during seven days, and each day he brought seven rams, seven he-goats, seven kids, and seven sheep, with seven kinds of fragrant substances, rejoicing in the company of his own household and allowing no stranger nor any uncircumcised to partake of his feast; and he made each day seven circuits around the altar, carrying branches of palm-trees and the fruit of golden trees in his hand (thus the Israelites afterward, as evidently in the time of the author of Jubilees, celebrated the feast, wearing wreaths upon their heads; ch. xvi. 1-31; comp. Lev. xxiii. 39-42; but see Suk. iv. 5, and Crown). Jacob, too, celebrated the Feast of Tabernacles in great pomp and with many sacrifices (ch. xxxii. 4); and after the 22d of Tishri had become for him a day of glad tidings, he added the eighth day, Ḥag ha-'Aẓeret (xxxii. 16-29).

Tabernacles and Atonement.

The Book of Jubilees states also that the Day of Atonement originated in the time of the Patriarchs. It was on the 10th of Tishri that the sons of Jacob sold their brother Joseph and deceived their father by sending him Joseph's coat stained with the blood of a kid; and both Bilhah and Dinah died of grief on hearing of the death of Joseph, so that Jacob mourned three deaths. Thenceforth it was ordained that the children of Israel should afflict themselves on this day each year and bring a young goat as an atoning sacrifice for their sins (ch. xxxiv. 12-19).

Regarding the Passover night, called "lel shimmurim" = "the night of watching" or "of protection" (Ex. xii. 42 [A. V., incorrectly, "a night to be much observed"]), it is stated (ch. xlviii. 15, xlix. 5; comp. Mek. to Ex. xii. 42) that on that night, when all the powers of Satan (Mastema) had been let loose to slay the Egyptians, the angels of heaven bound him (Mastema) and kept him imprisoned until the Israelites reached the Red Sea, in order that he might not accuse them before God for having taken the golden and silver vessels of the Egyptians as payment for their servitude. That night "all Israel was engaged in eating the Pesaḥ and in drinking wine while praising and blessing the Lord, the God of their fathers," therein anticipating the Seder evening of later times, which must have been celebrated in this manner in the time of the author. The meaning of "between the evenings" (Ex. xii. 6) is stated to be "from the third part of the day to the third part of the night" (ch. xlix. 9-12; but comp. Pes. v. 1, and Josephus, "B. J." vi. 9, § 3).

Most striking and valuable, as throwing light on ancient practise, are the observations concerning the Sabbath (ch. xlix. 8-13; comp. ii. 29-30). Doing any of the following things on the Sabbath entails the penalty of death: traveling, by land or sea; buying or selling; drawing water; carrying burdens out of the house; killing or striking; snaring beasts, birds, or fish; fasting or making war; having marital intercourse. All these rigid ordinances of Jubilees (comp. Sanh. 46a) have been observed by the Falashas (see the work on the Sabbath translated by Halévy, "Taazaze Sanbat," in "Bibliothèque de l'Ecole des Hautes Etudes," p. 137, Paris, 1902), the Samaritans (De Sacy, "Notices et Extraits," xii. 175), and the Karaites (see Singer, *l.c.* pp. 198-199; Charles, *l.c.* p. 259). The origin of the saying of grace after meals is ascribed to Abraham (ch. xvi. 26) and to Jacob (ch. xlv. 5).

The Date of the Book.

While the angelology and demonology, as well as other features, of the book point to the same date as that of the Book of Enoch and of the Testaments of the Twelve Patriarchs, there are certain facts presented by the book which warrant the assertion, made by Charles (*l.c.* Introduction, pp. lviii.-lxvi.), that it was written under John Hyrcanus. It refers to the subjection of the Idumeans (Esau) to the Jewish people as still existing (ch. xxxviii. 14), and to Hellenistic Jews endeavoring to pass as heathen in the athletic games (ch. iii. 30-31, xv. 33-34). The hatred toward the Gentiles and the bitter opposition to intermarriage with them, the legend of the war with the Amorites, Idumeans, and Philistines (ch. xxx. 7-17, xxxiv. 1-9, xxxvii.-xxxviii.), and the warlike spirit pervading the book (ch. xxiii. 12-31), indicate the impression of the great events of the Maccabean wars. On the other hand, the haggadic amplifications and, at times, alterations of the Biblical history, as in the narrative of the war with the Shechemites (ch. xxx.) and the attachment of the death-penalty to infringements of Sabbatical laws, conform to the halakah of the austere Ḥasidim, and are explicable only upon the assumption that they emanated not from the late rabbinical schools, but from the leaders of the ancient Pharisees or Scribes.

Especially noteworthy in this connection is the reservation of the lofty position of high priest and ruler to the tribe of Levi, in reward for its destruction of Shechem (ch. xxx. 14-17, xxxii. 1-3). The Levites are represented as the keepers of the sacred books, and of the secret lore entrusted to them by the saints from of yore (ch. xlv. 16; comp. x. 4). This indicates that the priests and Levites still included among themselves, as in the days of the author of the Book of Chronicles, the men of learning, the masters of the schools, and that these positions were not filled by men from among the people, as was the case in the time of Shammai and Hillel. Nor is the fact to be overlooked that the calendric system proposed by the author of the Book of Jubilees (comp. Enoch, lxxii.-lxxxii.) suggests a time when the calendar and the entire religious life of the Jews was as yet in an unsettled condition, and not fixed by rabbinical authorities.

JUDACARIA. See Ghetto.

JUDÆANS, THE: A society organized in New York Jan. 28, 1897, upon lines similar to those of the Maccabæans in London, England. It was formed "for the purpose of promoting and furthering the intellectual and spiritual interests of Jews." According to its constitution, "at least three-fourths of its members shall be engaged in literature, the arts, or science, or be members of a recognized profession." Its first officers were: Henry M. Leipziger, president; Richard J. H. Gottheil, first vice-president; Isaac S. Isaacs, second vice-president; Philip Cowen, secretary; and Albert Ulmann, treasurer. The society holds social and literary meetings from time to time; and it has published, under the title "The Judæans, 1897-1899" (New York, 1899), a detailed report covering its proceedings during the first two years of its existence.

A. G.

JUDÆO-CHRISTIANS. See Ebionites.

JUDÆO-GERMAN: The language spoken by the German Jews in Russia, former Poland, Austria, Rumania, and lately in America and South Africa. It is spoken also by many Jews in Germany, where, however, it is fast dying out. Before the end of the fifteenth century the Hebrew transliteration of

German is sporadically met with in the responsa of the Rabbis, in glosses and exegetic treatises, and occasionally in works of profane literature. In these the language in no way differs from the current idiom of Middle High German; and there is no evidence of the existence of a dialectic form of German among the Jews of central and eastern Europe previous to the invention of printing. The large number of Judæo-German books issued in the first century of the printing-press, and the wide-spread dissemination of such works in Germany, led in the seventeenth century to the writing of a series of grammatical sketches by the missionaries and by the scholars Buxtorf, Wagenseil, and Pfeffer. According to them, the Jews spoke a German dialect which differed from the literary norm in that it made use of antiquated words and of a large number of Germanized Hebrew ones. Its chief distinction, however, lay in its use of the Hebrew characters. The German spoken by the Jews of Moravia, Poland, and Bohemia these scholars stigmatize as corrupt, which goes to prove that the origin of Judæo-German must be assigned to a period much earlier than that of which they treat.

It is hard to ascertain what led to this peculiar development of the German language. The most plausible explanation is the one given by Güdemann, that it was due to the spread of German to Slavic countries, where the Jews were isolated from the purifying influence of the mother tongue; and that later, in the sixteenth century, the modified language was carried to Germany by Polish teachers and rabbis, who monopolized almost completely the learned professions during the next three hundred years. There were Jews in Slavic countries before the eleventh century; but it seems that they spoke Slavic. After the devastation of Galicia by the Tatars, however, Daniel of Galitch (1215-66) invited strangers, among them German Jews, to settle in his wasted province. After that, Polish kings frequently invited them to form town settlements among the agricultural Poles. Their solidarity and privileged self-government were favorable to the preservation of the language which they had brought from their German homes; but their isolation and their predilection for Talmudic and exegetic studies introduced a large number of Hebrew and Aramaic words into the vocabulary of the learned and thence into that of daily life, while their Slavic surroundings furnished them with many others denoting familiar objects. In their present state, the various Judæo-German dialects contain about 70 per cent of German, 20 per cent of Hebrew, and 10 per cent of Slavic words. The construction is chiefly German, though here and there Polish and Russian influences are patent.

Name.

Originally the Jews spoke of their language as "Teutsch," *i.e.*, German, from which it did not differ in any way. This is evidenced in the verb "verteutschen" (= "to translate," *i.e.*, to render into German) and in the common expression "steutsch" (= "What do you mean?"), contracted from "is teutsch," for some such phrase as "Wie ist das auf Deutsch?" (= "What does that mean in German?"). In the sixteenth century, when the written form of the Judæo-German differed considerably from the literary German, mainly in the presence of Hebrew words, the common designation was "Iwre-Teutsch," or "Jüdisch-Teutsch." The early Bible translations and ethical works are written in that "Iwre-Teutsch"; and down to the present time all ethical works and prayer-books have imitated the style found in the older productions. Such a procedure was made necessary by the fact that the "Ẓe'ena u-Re'ena" and similar works had become household books, appearing in an almost unchanged form and in countless editions for more than three centuries. This stage of the language is known under the name of "Tchines-Teutsch," *i.e.*, "Prayer German," or "Korben-Minche-Teutsch," and "Sidder-Teutsch," *i.e.*, "Prayer-book German," and is frequently used by modern writers in semiliturgic works, as by Abramowitsch in his hymns and Saturday prayers. Conformably to its ancient origin, it is comparatively free from Hebrew words.

For the spoken idiom there was no special term, though such words as "mame-loshen," *i.e.*, "mother tongue," and "prost-Jüdisch," *i.e.*, "simple Jewish," were used by writers of the earlier part of the nineteenth century; indeed, they are occasionally heard even now. The Mendelssohnian reform cast a slur on the "simple Jewish," and scornfully called it a "jargon." This contemptuous appellation has been adopted by Judæo-German writers in Russia, and is now the most current name for the language as used for literary purposes. The other common name, "Jüdisch," *i.e.*, "Jewish," has been carried by Jewish emigrants to English-speaking countries, where it has given rise to the form "Yiddish."

Southern, Polish, and Lithuanian.

Judæo-German is not a uniform language; the term is a generic name for a number of dialects that differ considerably among themselves. Rumanian, Hungarian, and Lithuanian Jews speak varieties sufficiently intelligible to one another, just as Bavarians, Silesians, and Alsatians understand one another; but their dialects are distinct, and owe their origin to the different localities in Germany from which the Jews emigrated. From linguistic evidence, it may be assumed that a small territory, with Frankfort-on-the-Main for its center, represents all the variations current in the eastern part. This assumption is sustained by the survival of town names, such as Mainz, Speyer, Worms, as the family names of Russian and Polish Jews. Originally, no doubt, the various colonies spoke their separate dialects; but frequent migrations brought them into competition, and either a fusion took place or the more prominent caused the others to disappear. The dialects of Judæo-German may be conveniently grouped in three divisions: (1) the southern, spoken in the south of Russia, in parts of Galicia, and in Rumania, and corresponding more closely to a variety of Bavarian; (2) the Polish, the dialect of Poland and parts of Lithuania and Galicia; and (3) the Lithuanian, the dialect spoken in the greater part of Lithuania and bearing strong resemblances to the dialects of Henneberg and of parts of Saxony. The most characteristic difference is in the vocalism, the Lithuanian having almost entirely lost its long vowels, the

Polish abounding in diphthongs, while the southern variety has proceeded farthest in the vowel-mutation.

There are many indications of the antiquity of Judæo-German. Many Middle High German forms have been preserved here that have disappeared from the modern German. The long "i" has given "ay" in the Lithuanian and "a" in the Polish, whereas Middle High German "ei" has become "ey" in the Lithuanian and "ay" in the southern dialects. The "u" in "kummen" has not mutated to "o" in the Lithuanian, but has gone over to "i" in the Polish and the southern varieties. Slavic words have frequently undergone the same mutations as German words; and similar mutations have taken place in the Hebrew element of Judæo-German. It is due to this adaptation of the Hebrew to the changed German language that the Polish pronunciation of Hebrew differs so much from the Sephardic.

Grammar.

The grammar has remained strictly Germanic, though much simplified in forms. The genitive has almost entirely disappeared from the declension; the plural formation has been enriched by the Hebrew "im," the German dialectic "ech," and the Hebrew "es," which last, however, is found also in German dialects. Judæo-German is exceedingly rich in diminutives; and this part of its structure is the only one that has been well investigated (by A. Landau). The verb has lost the imperfect tense; and all the prepositions govern the dative case. The order of words is much simpler than in modern German, being very much like that in English. The structure of the sentence is greatly influenced by the Slavic idioms; and Hebrew has left a few traces in the periodic arrangement of the parts.

Judæo-German as used for literary purposes is even more varied than the spoken dialects. The writers attempt to use the native dialect; but, being unhampered by an established grammar, and being accustomed to look upon Judæo-German as a corruption of literary German, they make more or less near approaches to the latter. The pure vernacular was first written in the beginning of the nineteenth century by Phinehas Mendel Lefin, a Galician; and varieties of the southern dialect have since been used by most of the writers of Judæo-German, from Ettinger to Abramowitsch. At first the Lithuanian dialect was but rarely used in literature, Dick being the most prominent writer in the Lithuanian half a century ago. At present, however, the northern idiom seems to be in the ascendent. This is particularly the case with the periodical literature in America, where hardly any other form is met with. The Polish vernacular has a few adherents, and has been used with especial vigor by Perez.

The scant literary development of Judæo-German previous to the middle of the nineteenth century has left the vocabulary poor; and various means have been used to supply its needs. Some have freely introduced the common terms of the other European languages, while others persist in coining new words from Hebrew stems. Others, again, have adopted the current words of the country; so that one may find Russian, Polish, Bohemian, Slovenian, Hungarian, and Rumanian elements in the Judæo-German of the various writers. In America the literary dialect is made to approach German more closely; but there is also a large infusion of English words.

The following series of extracts, representing four centuries and most of the countries in which Judæo-German is spoken, gives but an imperfect idea of all the shades of the vernacular; an investigation of the history of the language from its incipiency to the present time has not yet been made. The examples are given in the transcriptions in which they are found in recent works.

SPECIMENS OF JUDÆO-GERMAN.

Got kunig oberster Got er wont im himel, er ist stark im himel, sterk seines gewalt sie wert derhecht. Ewig un' aumer er wert kunigen. Wen as dein namen Got aso ist dein lob, du bist hert zu derzornen un' du bist senft zu wiligen un' nit du begerst an zu töten der da ist schuldig zu töten um sein sund wenn neuert das er wider kert von seinen tods. du wartest zu ihm ob er wider kert un' tut תְּשׁוּבָה zu hant du onpfangst ihn, wen du Got du bist ir beschefer un' drum du weist un' kenst wol ir gedeknis, wen sie sein vleisch un' blut. (Of the fifteenth century; in Grünbaum, "Chrestomathie.")

Zu dem Ubersiger zu Knecht Gots zu דָוִד das er hot geret zu Got, Red des Gesang das dosig, am Tag da hat beschirmt in Got von tener al sein veinden un' von hant שָׁאוּל. Un' er sprach, ich wil liben dich Got mein Sterk, Got mein Velsen un' mein Geheg un' mein Ontrinner, mein Got mein Sterk, ich beschuz mich an im, mein Schilt un' Horn meiner Hulf, mein Sterk, (1544; *ib.*)

Wol dem man der nit in der רְשָׁעִים rat get, un' in weg der sünder nit er stet, in gesess der speter nit er sizt, neiert auf recht der תּוֹרָה gibt er sein sin ue' wiz. Die recht der תּוֹרָה halt er in groser acht, da inen lernt er tag un' nacht, der selbig wert sein as ein baum der vun wasser nit stet weit, welcher sein ops gibt in seiner zeit. (1586; *ib.*)

Es is ein zeit zum schweigen, es is auch ein zeit zum reden. ale ding hot seine zeit, schweigen iz wol gut, reden vil besser wen es not thut; es is nit ale mol wol getan wen man schweigt, den wen dich einer an deiner eren un' כבוד antast, heisst dich ein גנב רוצח oder der gleichen, un' du woltest derzu schweigen, so thustu nit wol dran. (1615; *ib.*)

תרח der Vater von אברהם hat verkauft צלמים. Un' אברהם is ein mal derbei gestanden, un' wenn einer is gekommen un' hat gewolt kaufen עבודה זרה, da fragt אברהם: Wie alt bistu? Da entfert er fufzig oder sechzig jar, da sagt er wieder: du bist nun alt sechzig jar un' du wilst dich bucken zu einem das da ein tag alt ist? Da hat sich der selbiger geschemt un' is בְּחֶרְפָּה weg gegangen. (1648; *ib.*)

Kumt her libe manen un' frauen, un' tut das schen מעשה בוך anschauen, mit drei hundert und etliche מַעשים die da seinen ale aus die גמרא gemacht, un' ach aus den רבה un' בחיי gemacht. (1753; *ib.*)

SPECIMENS OF THE NINETEENTH CENTURY.

Der dales iz mit dem ĭd'n wi a gŭf mit a n'šóme. Der id bikónt ceχ mit dem dales wen er iz noχ ba der mamen in boŭjχ. In dales wet der id gibór'n, ujfgihódewet, hot χassene, dernoχ kinder, lebt un' štarbt. (Lithuania; "Am Urquell," 111.)

De brumfn iz tajer, de mûs iz klejn, aχ nit trinkn iz âχ nit šejn: byn iχ gegangn inter der tîr, hob iχ getrinkn on a šîr. (Poland; Lublin, in "Mittheilungen," 11.)

Jajnkele majner, šwarzer cigajner, wi bisti giwejn? Af jener wel't. Wus hosti gizejn? A bajtl' mit gelt. Farwus ost ništ ginimen? Men git iber di hent. (South; Odessa; *ib.*)

Oj waj! Gimer tâj! Tâj iz biter, gimer ciker! Ciker iz zîs, gimer fîs! Fîs iz fät, Lajg meχ in bät. (Galicia; *ib.*)

Schloif Kindele schloif, dort in jenem Hoif, steen zwa Schäfeloch bloube, wöllen mei Kindele hoube, kümmt der Halter mit de Geigen, thüt de Schäfeloch zusammen treiben. (Moravia; "Am Urquell," vi.)

Willst de wohin fōhren, nimm drei Kočijašes auf: aner sagt dir auf, anem sagst du auf, mit'm dritten fōhrst de. (Slavonia; *ib.*)

E toppelter Rüch tome hot sich on ihm medabbek gewesen, un dos geht bei ihm a wie bei e Brunn mit zwa Emmern. Kummt der gute Rüch herauf, flieht der Böse unten raus, un e su aach umgekehrt. (Hungary; Reb Simmel Andrichan.)

Haiszt ä Geschäft! Den ganzen geschlogenen Tag steih ich erüm, und kain Mensch braucht ä poar Hoisen, a lumpige West, chotschik bin ich nischt im Stande los zu werden. (Berlin; "Intimes aus der Liliengass.")

Transliteration.

The western European languages were early used by the Jews in Hebrew transliteration. There are in existence various documents in Spanish, Provençal, French, and German that reach back into the thirteenth, and probably into the twelfth, century. The oldest German specimen is a benediction of the womb. The spelling differs little from that current in the other western dialects, and seems to be a direct evolution from the one in vogue in Spain and France. י, ה, ו, א do duty for all vowel combinations, while ע is almost entirely absent. The deviations, if any, from the standard German are slight: ליג דיך = "leg dich"; בוכא = "buche"; ליגן = "legen"; רחטה = "rechte"; ויש = "visch"; מינשליכש = "menschlichs"; דְרִיא = "drie"; ינשטיט = "instet"; ויליוש = "wilius." A similar orthography is followed in the glosses of R. Moses ha-Darshan of the thirteenth century. Explicit rules for spelling are given by Isserlein (d. 1460) in the appendix to his "Sittenbuch." The main change from the earlier practise consists in the use of א to represent "a" and "o," whereas "o" was previously expressed as in Spanish and French by ו. This important change indicates the early mutation of the German "a" to the Judæo-German "o." No material deviations from the spelling established by Isserlein are met with before the middle of the nineteenth century.

(1871; "Sippure Ḳedoshim.")

In the beginning of the nineteenth century א is found fully established as "a" and "o," and is silent at the end of words after vowels and in the beginning before ו and י; ע is universally tonic "e," and at present also atonic "e," for which at first י was used; ו is "u"; יי stands for "ej" and "aj"; וי is "ou" and "oj." This is true in the Lithuanian dialect. But since in the south and in Poland German "ā" has mutated through "o" to "u," א represents such "u"; similarly ו stands there for "i," וי for "oy," "ey," etc. As mentioned above, the so-called Polish pronunciation of Hebrew is nothing else than the mutated German pronunciation, on parallel lines with the changes in German words. Consequently it is not always possible to speak of the pronunciation, but the pronunciations, of Hebrew words; for they vary from place to place. Hebrew words in Judæo-German have suffered still further change owing to the fact that closed syllables are treated differently from open ones, that frequently the construct state or a similar form is the origin of the form in use, and that analogies of various kinds have produced still further deviation from the original Hebrew. All other foreign words are spelled phonetically and offer no difficulty; they have not mutated together with the native German words.

Pronunciation.

The greatest obstacles to reading Judæo-German are the compound words in which the stem is Hebrew while the suffixes are German and Slavic; here the etymological Hebrew, the semihistorical German, and the phonetic Slavic spellings meet in one and the same word. Only those texts which are pointed, and this is now frequently the case, offer a safe guide. Here pathaḥ = "a," ḳameẓ = "o," segol = "e," ẓere = "ey," shureḳ = "u," ḥireḳ = "i." The shewas are all silent in Lithuanian, but the other dialects pronounce them according to the mutations of the German vowels. The transliteration of the consonants has undergone fewer changes and is consequently much simpler. In modern times וו and not ב is used for "w," hence only one letter occurs with rafeh, namely פֿ for "f." In printed books פּ stands generally for "p," while פֿ is "f." The Slavic sound "z" is rendered by זש, and English "j" by דזש, and so forth. The chaos of spelling is best illustrated by the rules laid down and followed by the "Jüdische Volksbibliothek": (1) Write Judæo-German as you speak. (2) Write so that the Polish and the Lithuanian reader alike may understand you. (3) Remember that you are writing for the common people. (4) The German words are to be spelled as in German. (5) Spell differently words of the same sound but different signification; for example: שְׁטֵיין "Stein," and שְׁטֶעהְן, "stehn"; צֶעהְן, "zehn," and צֵאהְן, "Zähne"; etc.

Influence on Other Languages.

The wide-spread dissemination of the German Jews in the central and eastern parts of Europe has not been without an influence on the languages of the nations among whom they have lived. The German, Russian, and Polish languages have incorporated a certain number of Judæo-German words into their vocabularies. The number of such words in Russian is naturally small; in Polish it is not always possible to ascertain whether a given word of German origin has come in directly or through the medium of the Judæo-German; the etymologist has to confine himself, therefore, to those of Hebrew origin in which the changed vocalism points unmistakably to a borrowing from the living dialect of the Jews. A thorough investigation will, probably, prove a greater indebtedness to the Jews than has heretofore been imagined. In German the Judæo-German element is, naturally, confined to the Hebrew stems; such words are: "acheln," "begern," "betuches," "bocher," "dalles," "dallinger," "dibbern," "dokes," "doufes," "flöten," "ganfen," "gauner," "goi," "kaffer," "kapores," "knassen," "kohl," "koscher," "matze," "mauschel," "meschugge," "moos," "schabbes," "schacher," "schächten," "schäkern," "schicker," "schicksel," "schlammassel," "schmuss," "schofel," "schote," "stusz," "trefe," "zores." The remarkable thing in this collection is that many of these words have come in through the "thieves' slang," in which the Hebrew element is not inconsiderable. Steinschneider dissents from the supposition that the vagabonds acquired these terms from their Jewish comrades, on the ground that the number of such Jewish rogues in the Middle Ages was inconsiderable. However this may have been, the thieves found the less-understood Jewish words convenient for their purposes; and thence the words passed through the students' slang into the conversational German.

History of Investigation.

Judæo-German has fared very badly with scientific scholars. While every unimportant dialect of Europe, spoken it may be by but a few thousand people, has found its investigator, Judæo-German, spoken by more than 4,000,000 people, has had a small number of apologists and scarcely any investigators. A large amount of work remains to be done before anything like a history of the language can be written. From the standpoint not only of Judæo-German, but of German itself, a thorough study will repay the philologist. A large number of Middle High German words has been preserved here that have disappeared from modern German. Such are: "onweren," for "ahne werden" = "to lose"; "lajlach," Middle High German "lilach" = "a spread"; "dermonen," Middle High German "ermanen" = "to remember"; "gewinnen" = "to bear"; "nechten" = "yesterday"; "gich," Middle High German "gâch" = "quick"; etc.

One of the most crying needs is a study of the various local subdialects. Şaineanu, in his "Studiu" (see bibliography below), has subjected the Rumanian variety to a general review, while A. Landau, in the "Deutsche Mundarten" (vol. i., part i.), has written a good disquisition on the diminutive in the East-Galician. Wiener, "On the Judæo-German Spoken by the Russian Jews" (in "The American Journal of Philology," vol. xiv.), deals in a general way with the Lithuanian dialect. There are no faithfully transcribed texts, no collections in a uniform scientific alphabet. A few tentative renderings of local varieties may be found in "Am Urquell, Monatsschrift für Volkskunde," published by F. S. Krauss; in "Mitteilungen der Gesellschaft für Jüdische Volkskunde," published by M. Grunwald at Hamburg; and in a few scattered articles in the "Zeitschrift des Vereins für Volkskunde," the "Globus," and the "Zeitschrift für Ethnologie." A few specimens of East-Galician are given in "Zbiór Wiadomości do Antropologii Kra Jowej," vol. xvii., Cracow, 1893; but they contain countless printer's errors.

The older form of Judæo-German has been even more neglected than the modern dialects. Nothing has been done to ascertain the value of sounds in the older writings or to collect the peculiar words contained in them. Zunz ("G. V.") and Güdemann ("Quellenschriften" and "Gesch.") have gathered a few of the more peculiar words, while the older dictionaries of Callenberg, Bibliophilus, and Selig deal only with the Hebrew element in Judæo-German. Grünbaum, in his "Jüdisch-Deutsche Chrestomathie," has discussed a large number of words contained in the extracts of his chrestomathy; but no one period, no one book, has yet been treated in its entirety. Rosenberg's "Ueber eine Sammlung Deutscher Volks- und Gesellschafts-Lieder in Hebräischen Lettern" (Berlin, 1888) deals only with the contents of that interesting collection and not with the language.

There is a number of Judæo-German dictionaries which may serve as a starting-point for lexicological studies. The Judæo-German-Russian and Russian-Judæo-German ones by Lifschitz are particularly valuable on account of the very large collection of rarer words of the southern variety. The one by Dreisin is interesting because it gives the meanings in the Lithuanian and southern dialects. Harkavy has published a Judæo-German-English and English-Judæo-German dictionary, though it must be said that the Judæo-German which it contains is mainly corrupt German.

Bibliography: L. Şaineanu, *Studiu Dialectologic Asupra Graiului Evreo-German*, Bucharest, 1889 (in Rumanian), which gives a list of twenty-eight works with a short discussion of each. A much larger number is given by A. Landau

in *Deutsche Mundarten*, vol. i., part ii., Vienna, 1896. It will also be profitable to consult the Judæo-German magazines, especially the *Jüdische Volksbibliothek* and the *Hausfreund*, for books dealing with the language; see also Wiener, *The History of Yiddish Literature in the Nineteenth Century*, ch. ii., New York, 1899.

G. L. Wie.

JUDÆO-GERMAN LITERATURE: The earliest known Judæo-German translation of the Maḥzor belongs to the fourteenth century, and Isaac ben Eliezer's "Sefer ha-Gan," which has had many editions, as well as Simeon ben Judah's "Sefer ha-Musar," was written in the fifteenth century. The latter two belong to that small class of original ethical-religious works in which early Judæo-German literature attained its highest development. With these exceptions most of the earlier works in that language were translations, beginning with the Bible (see Jew. Encyc. iii. 191-192, *s.v.* Bible Translations) and the prayers, and were dependent on Hebrew, even for their titles. The well-known Baba Buch marks the introduction of translations from other tongues, in the beginning of the sixteenth century, when Judæo-German literature properly began. The equally well-known "Ma'aseh Buch," a collection of tales from Talmudical and rabbinical sources, appeared about a century later (Basel, 1602); it enjoys the rare distinction of having been translated into German by a Christian, one Helvich (Giessen, 1612). Abraham b. Mattathias' "Kuh-Buch" (1555), Moses Enoch's "Brand-Spiegel" (1602 ?), and Isaac b. Eliakim's popular "Leb Ṭob" (2d ed., Prague 1620) belong to the above-mentioned class of ethical works.

Prayers and Minhagim.

Works on "minhagim," or ritual customs, of which that by Jehiel Epstein of Lemberg (1679) is one of the earliest and the best, were much in favor in those times. But the attempt to introduce prayers in Judæo-German was opposed by the Rabbis, and Aaron b. Samuel's "Liebliche Tefillah, oder Kräftige Arznei für Guf und Neshamah" (1709), was interdicted. But there was no opposition to the large number of "teḥinnot" (prayers) composed especially for women, which began to appear as early as 1599 ("Teḥinnot be-Kol Yom," by Akiba Frankfurter, Basel) and multiplied very rapidly (see Jew. Encyc. iv. 551, *s.v.* Devotional Literature). Some of those special prayers, of later periods, are attributed to women, and contain so many absurdities that there is a well-grounded suspicion that they were composed with the object of producing mirth instead of devotion. The same kind of suspicion is entertained in regard to several collections of extravagant stories about the wonder-working "Ẓaddiḳim," or early Ḥasidic rabbis, and it is believed by many that even the well-known "Shibḥe Besht," of which numerous editions have appeared since the first Hebrew and Judæo-German editions about 1815, was written with the object of casting ridicule on the Ḥasidim.

Secular Works.

The number of works on secular subjects in the earlier periods of the literature is very small, and the number of those possessing any merit, either literary or historical, is still smaller. Gershon ben Eliezer's curious book of travels, "Gelilot Ereẓ Yisrael," and Menahem Man b. Solomon's "She'erit Yisrael," which was designed as a supplement to the "Yosippon" (1743), are the best examples in geography and history which this literature produced in the seventeenth and eighteenth centuries. The poetical productions that began with rhythmical paraphrasing of the Bible, as the "Shmuel Buch" (1543), and include poetical descriptions of persecutions, as the "Vinzlied" (1614) and the "Schwedischlied," and some imitations of the "Niebelungenlied," dealing with Biblical subjects and Midrashic tales, as the "Targum Sheni Lied" (1717), also possess very little literary merit. The Judæo-German folk-medicine books, dream-books, lot-books, and other books written for the ignorant masses, mostly by ignorant authors, are of interest to bibliographers only; this is true, indeed, of the bulk of the Judæo-German literature from the sixteenth to the eighteenth century inclusive. The number of Jews able to read Hebrew was so large in those three centuries that talented writers found among them a sufficient number of readers for all their literary productions. The Judæo-German writers were usually the publishers themselves, and they never attempted to produce, and therefore never succeeded in producing, works of real merit.

The quantity, like the quality, of the works of the early period is much more insignificant than is generally supposed. Steinschneider's list of the Judæo-German works contained in the Oppenheim collection includes the great majority of the books printed in that language down to about 1740, and consists of 385 numbers ("Serapeum," 1848, pp. 313 *et seq.*; *ib.* 1849, pp. 9 *et seq.*). The number of Judæo-German works written in the century which followed that period is probably much smaller than the number now (1904) produced in Russia alone in the course of a decade.

Modern Movement.

The modern period of Judæo-German literature began with the works of Isaac Baer Lewinsohn, Abraham Baer Gottlober, and other early leaders of the Haskalah movement, who thus sought adherents among the ignorant masses. The effort of Mendel Levin (Satanov) to imitate his friend and master Moses Mendelssohn by translating the Bible was abortive, and his translation of the Book of Proverbs into Judæo-German as spoken in Russia is known only through the ridicule heaped upon him by Tobias Feder in his "Ḳol Meḥaẓeẓim." The supposition that this translation had any influence on later writers, or was ever popular, is disproved by the fact that so competent a bibliographer as Benjacob, who was almost a contemporary of Levin, hardly knew of it (see "Oẓar ha-Sefarim," p. 644). Aksenfeld of Odessa was the first to raise the Judæo-German drama above the level of the "Purimspiel" and "Mekirat Yosef"; Ettinger of Russian Poland and Ehrenkranz-Zbarzer of Galicia introduced popular poetry surpassing anything that preceded it; and Isaac Meïr Dick of Wilna was the author of short stories that would be considered masterpieces even to-day were his style more in accordance with modern requirements.

The first Judæo-German newspaper was Alexander Zederbaum's "Ḳol Mebasser" (1863); in the same decade appeared Zunser the folk-poet, Abramovich the novelist, and Goldfaden the poet and playwright, none of whom has yet been excelled in his peculiar field. Among the earliest and best satirists were Joel Linetzki ("Polisher Yingel"), Mani Dlugotch ("'Olam ha-Tohu'nik"), M. A. Shatzkes ("Der Jüdischer far Pessaḥ"), and Eliezer Zweifel ("Der Gekaufter Maftir"). Some of the works of the above-mentioned writers have been translated into several European languages.

While the Judæo-German literature of the earlier period is rightly described by Karpeles as an "undercurrent" of Hebrew literature, the modern "Yiddish" literature (as it is preferably called by its devotees) equals, and in some respects rises above, the latter. This is especially true in the domains of belles-lettres, poetry, and periodical literature, and in dramatic works the Hebrew "closet-drama" remains far behind the Yiddish drama, which is successfully presented in several countries (see Drama, Yiddish). In periodical literature, Hebrew long held sway in Russia, where the better classes, almost all of whom are able to read Hebrew, form the bulk of the newspaper-reading public. But the inevitable change is occurring even there, and the oldest Hebrew newspaper ("Ha-Meliẓ") ceased to appear two months after the establishment, in Jan., 1904, of two daily Yiddish papers. In the United States—next to Russia, the most important center of Yiddish literature—where there is no censor to discriminate in favor of Hebrew, the Yiddish press is much more popular, and has been so from the beginning, while the Hebrew periodical press has only a precarious existence.

Novelists and Poets.

Among the later novelists in Russia, Dinesohn, Spektor, and Rabinowitz hold the highest rank, the latter's "Stempenju" and "Yosele Solovei" being considered the best productions of their kind. But most critics are unjust to fertile N. M. Shaikewich, whose stories possess more merit than is usually conceded to them. Of the poets, Frischman, M. Gordon, Frug, Reisen, Bialik, and J. L. Peretz stand preeminent. The last-named, perhaps unduly extolled at first, is now in great danger, owing to the reaction against him in Russia, of being underestimated. Goldfaden and Zunser went to the United States, and have almost ceased to write. The foremost among the Judæo-German poets whose talents were developed outside of Russia is Morris Rosenfeld, who, with A. M. Sharkanski, Ben-Neẓ, Edelstat, Jehoash Bovshoer, and others, represents the latest school of Yiddish poetry, emancipated from the censor and from the predominance of Hebrew which overshadowed it in Russia.

For scientific works of all descriptions, the Judæo-German literature of to-day depends on translations and compilations almost as much as it did in the earlier periods, Jacob Psanter's writings on the history of the Jews in Rumania and Lazar Schulman's researches into the history of Judæo-German literature being exceptions, to which, perhaps, may be added Kranz's "Culturgeschichte" (New York). But the number of original articles on various scientific subjects that have appeared in dailies, weeklies, and monthlies in both hemispheres is very large; some of them are very valuable. The year-books, as the "Jüdischer Volksbibliothek" (Kiev, 1888 and 1889), the "Volksfreund," and "Literatur und Leben," have a permanent literary value, and when the prejudice against the literature of this language has disappeared much that is contained in it will be found worthy of being translated into other European languages.

In America.

In the United States Alexander Harkavy has published a series of Yiddish-English and English-Yiddish dictionaries. Shaikewich, Dolitzki, Bukanski, Tannenbaum, Hermalin, Kranz, Kobrin, Gorin, Gordin, and several others have written original works, of more or less merit, that have helped the Judæo-German literature of the western hemisphere to assume respectable proportions. Its most prominent representatives in the journalistic field are Leon Zolotkoff of Chicago, Maurice Vinchevski (the above-named Ben-Neẓ), Abraham Cahan, John Paley, Feigenbaum, Malitz, Minz, Zevin, and Libin, almost all of whom are authors of works written in America. The sensational stories that appeared in the United States in the last decade of the nineteenth century became very popular in Russia, and the American export of Yiddish works promises soon to exceed, if it does not exceed already, the import of such works from the Old World.

Literary History.

The older Judæo-German literature has been studied and extensively treated by Jewish and non-Jewish literary historians, from the time of Wagenseil down to the present time. Karpeles devoted to it nearly thirty pages, although he has not even mentioned its modern developments. Grünbaum's "Jüdisch-Deutsche Chrestomathie" (Leipsic, 1882) is confined to selections from old works, while his "Jüdisch-Deutsche Literatur in Deutschland, Polen, und Amerika" (Berlin, 1894) hardly deserves notice. The poetical works of the modern division of that literature fared better, as they were introduced to the outside world in Dalman's "Jüdisch-Deutsche Volkslieder aus Galizien und Russland" (Berlin, 1891). A good bibliography of modern poetical works is appended to the excellent collection of Russian-Jewish folk-songs by Ginzburg and Marek ("Yevreiskya Narodnia Pyesni w Rossii," St. Petersburg, 1901).

Bibliography: Delitzsch, *Zur Gesch. der Jüdischen Poesie*, pp. 80-82, Leipsic, 1836; Gosche's *Archiv für Literaturgesch.* i. 93 *et seq.*, Leipsic, 1870; Karpeles, *Gesch. der Jüdischen Litteratur*, ii. 1000-1029; Schulman, in *Jüdische Volksbibliothek*, ii. 115 *et seq.*, Kiev, 1889; Steinschneider, in *Monatsschrift*, xlii. 74 *et seq.*; *Verhandlungen der 26ten Versammlung Deutschen Philologen und Schulmänner in Würzburg*, pp. 215 *et seq.*, Leipsic, 1869; Wiener's *Yiddish Literature in the Nineteenth Century*, New York, 1899 (the only authority for general modern Judæo-German literature).

G. P. Wi.

JUDÆO-GREEK AND JUDÆO-ITALIAN: Although the Greek which is spoken and written by Jews in various parts of the Balkan Peninsula differs scarcely at all from that employed by the non-Jewish inhabitants, the term "Judæo-Greek" is convenient as distinguishing this dialect from that spoken by Jews elsewhere. The same is true of the term "Judæo-Italian," which refers here only to the Venetian and Apulian dialects. The island of Corfu, being, so to speak, a bridge which joins the Balkan Peninsula with Italy, may be regarded also as the rallying-point of modern Greek and of the Venetian and Apulian dialects as spoken and written by Jews. The exclusive sway of the Greek language among the Corfiote Jews was of short duration, and lasted only as long as the first stratum of the community which had come from the so-called Romania remained homogeneous—until from the Angevin possessions of southern Italy other Jews slowly but steadily joined them of their own accord between the twelfth and fourteenth centuries. There were Greek-speaking Jewish communities in various other parts of the Balkan Peninsula (see Greece): in Constantinople, Salonica, Chalcis, Janina, Arta, Zante, and Crete, where Jews are still found, as well as in various places where at present none remain.

Bible Translations.

For the Greek-speaking Jews of the Balkan Peninsula modern Greek translations of several parts of the Bible were made, *e.g.*, that of the Pentateuch printed in Constantinople in the year 1547, and that of Job made thirty years later, which unfortunately is no longer extant. In Candia, a town on the island of Crete, a modern Greek translation of Jonah, manuscript copies of which are preserved in the Bodleian and the Bologna University libraries, was read as part of the afternoon service of the Day of Atonement. No record is extant, however, of a similar custom in Corfu, despite all statements to the contrary. These translations are strictly literal versions of the original, and, although in places very ingenious, show but little knowledge of Hebrew on the part of the translators. The complete absence of Turkish words and the apparent fact that the translators did not know the commentaries of the western European exegetes lead to the belief that the Greek Pentateuch was written at least two centuries before the date of publication. The Greek Jonah is even older and seems to be the earliest known monument of the modern vernacular; it offers, indeed, forms much nearer to the ancient Greek than any remains of the late Byzantine literature. Following the originals very closely, these translations can not be set up as models of Greek style and syntax; but they supply trustworthy material for scientific study in so far as phonology and morphology are concerned. Their value from this standpoint is greater than that of other documents owing to the fact that the translators wrote in Hebrew characters the precise words and sounds of the every-day language, with no attempt at literary improvements.

Poetry.

That the Jews in Greece used to speak without change the same language as their Christian fellow countrymen is proved by their non-Biblical, and therefore freer, translations as well as by their original works. To the first class belongs a rimed poem for Pentecost in lines of unequal length, each stanza of which was chanted after the original Hebrew it purported to translate. A few quatrains of this poem without the Hebrew were sung in the Corfu Greek synagogue and other Jewish places of worship as late as 1884. There are also more or less free versions of some post-Biblical lamentations over the vicissitudes of the Jewish people, in all of which the genuine character of the Greek is noticeable. But the most important specimens in this branch of literature are two original dirges published, with many errors, in Ἐπετηρὶς Παρνασσοῦ (1902). They show the fifteen-syllable line of modern Greek poetry; and the only internal evidence of their being Jewish lies in the subject-matter. The Jews of the Greek-speaking places have drawn freely from the local stock of tales, unwritten poetry, etc., including all subjects except religion. The circular singing-dance, *χορὸς*, is still much in favor with the Jews of Corfu; and an original Greek dirge of a mother over the loss of a son in a far-distant country was mistaken for a specifically Jewish composition only because a copy was found written in Hebrew characters and with the words רבנים and חכמים substituted for others which in the original signified perhaps "dignitaries of the Orthodox Church." This dirge, the second of the two mentioned above as having been published in 1902, is valuable, however, for lines 26–29 (probably containing a lacuna), which were wrongly inserted in the piece, and which evidently are part of a lost festival song. They run as follows:

Κ' *ἡ γὶς πρέπει νὰ χαίρεται,* | *πρέπει νὰ καμαρώνει*
τὴν πασκαλιὰ καὶ τὸ Πουρὶμ | *καὶ τὴ* Μεγάλη Μέρα . . .
Πρέπει *νὰ τὴ* (?) *στολίσουμε* | *καὶ τρεῖς φορὲς τὸ χρόνο,*
γιατί μοῦ συμμαγόνουνται | *μικροί μου καὶ μεγάλοι.*

In Corfu a song beginning

Ἤρταμε
καὶ καλὰ σᾶς βρήκαμε

used to be sung on the first of Adar, which for this reason was called ראש חדש de *ἤρταμε*; and at Janina and Arta a song for Purim is still sung which contains a few Turkish words, and which must therefore have been composed after 1453. In this song the rules of meter, rime, and accent are observed as strictly as in the rest of Greek literature. It consists of quatrains with eight syllables to the line, except in the case of the introductory stanza:

Κ*ίνα γλῶσσα νὰ μιλεῖς,*
θαμάσμαπα νὰ μολοεῖς,
κοιμημένους νὰ ξυπνεῖς,
μὲ κρασὶ νὰ τοὺς μεθεῖς.

In a copy of the song in the British Museum (MS. Or. 5472) two stanzas near the end each lack two lines, and צי' is apparently used as the most approximate rendering of the broken palatal sounds "ke" and "ki" of the modern Greek pronunciation. The concluding quatrain, referring to Pharaoh's rush into the Red Sea, is as follows:

Μ*πῆκε νὰ μᾶς κυνηγήσει,*
εἶπε νὰ μᾶς σιγυρίσει,
τοῦκαμ' ὁ θεγὸς τὴν κρίση,
οὐδὲ ἑνας νὰ μ' ντὴ γλίσει.

The Jews of Zante composed Greek verse to commemorate the granting of civil equality to them by the French occupiers of the island after the fall of

Venice. In their speech they sometimes use words derived from the Hebrew (תן = נתן, אכל, עין, etc.), but in a Greek form; whereas the same roots in Corfu are inflected according to the Venetian or the Apulian morphology.

Use of Venetian.

The better class of the Jewish community of Corfu speaks the Venetian dialect with some modifications, due to the influence of the Greek, which was the only means of oral communication among the first Jewish settlers of the island. The latter language, while gradually disappearing as a living one before the newcomer, bequeathed to it a certain amount of its vocabulary and some of its syntactic peculiarities. The constant solution of the infinitive ("che digo" = *νὰ 'πῶ*, "che ti vegna" = *νὰ ῥθῇς*) is the most important phenomenon. The Venetian of the Corfiote Jews accordingly differs from the same dialect as spoken by non-Jews in the same town. A characteristic of this dialect is the formation in "ò" of the plural of nouns ending in "à," a formation which originated in the Hebrew ending ות, simplified, according to the Italian laws of phonology, into "ò," *e.g.*, the Italianized plural of "berakah" is "berakhò" (for "berakot"); hence "novità," "novitò"; "città," "cittò." There has presumably been no Jewish literature in this dialect, since Venice herself very early adopted pure Italian as her official language, and all documents of the Corfu Jewish community were written in that language, which served too in Hebrew schools as the means of translating the Bible.

The not very numerous Jews who went directly from Spain to Corfu did not long speak their own language, but soon adopted one or the other of the two predominant vernaculars of the place. In Arta is preserved the recollection of a Catalan as well as of a Sicilian and a Calabrian synagogue. All three were obviously built by Jews who went thither after a stay in Corfu which was so short that the very names of such congregations are unknown to the Jews of that town. There was also in the Albanian seaport of Valona (Arlona) a congregation called the ק"ק גירוש, formed by refugees from Spain; but all these congregations must have removed very early from Albania and Epirus to Salonica, where they subsequently had maḥzorim printed according to their own rites.

Permanent residence, however, was found in Corfu by the Apulians, who brought from the Italian coast their vernacular and a few specimens, still preserved, of their literature. Apulian is still spoken by the lower section of the community. Two Apulian love-songs, seemingly original, exist in manuscript, of which one is an independent composition of a rather scurrilous purport, while in the second each stanza is preceded by one of a religious Hebrew poem on a quite different subject. Both are written in Hebrew characters, as is a semioriginal composition containing the rules for the Passover supper, of which the following paragraph (with Italian words retransliterated) may be cited:

> "יהץ. Pigiamu la מצה cu li doi signali, e la spartimu a menzu, e dizzimu: Comu spartimu chista מצה, cussi הקדוש ברוך הוא spartiu lu Mari Ruviu, e passàra li padri nostri intra di issu e fizzi cun issi נסים e נפלאות. Cussì cu fazza cu nùi; chistu annu accà, l'annu che veni a la terra di ישראל omini liberi.—Menza mintimu sotto la tovaggia pir אפיקומן, e l'altva menza infra li doi, pir cu farrimu המוציא."

Apulian.

The Apulian dialect, in supplanting the Greek of the original settlers, took from it more material than did the Venetian. The borrowings extended to words expressing family connections: *e.g.*, "patri," "matri," "fratri" (plural, "fraturi"), "soru," "figgiu," "niputi," "maritu," "muggeri," "carussu"; but *γαμαρὸ*, *νύφη*, *πεθερὸ*, *πεθερὰ*, *λεχῶνα*, *κουμπάρο-α*, *ἀνύπαντρο-η*, and *γάμιι* (= "wedding"; plural, *γάμιιri*) (to express "they married," however, the Apulian "si spussàra" is used). Some vegetables and fruits are known only by their Greek names, both to the Venetian- and to the Apulian-speaking sections, *e.g.*, *σέσκλο*, *σέλινο*, *κοκκινογοῦμ*, *χεμονικὸ*; and many of the terms used in the game of buckle-bones are Greek: *κότσι*, *ἐνέση* (?) *μία*, *ἐνέση δύο*, *ἐνέση τρεῖς*, *ἕνας δύο τρέις*, *βούρδαλο*, *χάσουλο*; but "panza," "buso," and "re," for which last the Epirote Jews say *κερδουλός*, while they call its opposite *χασουλός*.

The simple past tense ("vitti," "vidisti," "vitti") is the only one in use among the Apulian Jews, who agree in this respect with the Apulians of the Italian coast; they differ from the latter, however, in forming the future, which is expressed by means of the auxiliary "anzu" (= "I have"), as on the Continent, and a following infinitive, which is always, as in modern Greek, resolved. Such resolution occurs quite frequently in Apulia itself (with the particles "mu" or "mi"), but not as regularly as in Corfu, where with the exception of the substantivized forms "lu manzari," "lu mbiviri," and a few others, the unresolved infinitive is absolutely unknown. So to-day "dirò," "aggiu diri" and "aggiu mu dicu" occur on the Continent, but only "anzu cu dicu" in Corfu.

The Apulian diminutive suffix "-ddhu" gave way to the Italian-looking "-llu," and is retained only in idiomatic expressions, such as "scazzamurieddhu" (= "funny little fellow"), "javaneddhu" (from יון), "bekozzerjameddhu" (from בקוצר ימים), "cavaddhu" (= "horse"), "capiddhu" (= "hair"), "chiddhu" (= "that"), although "indu," from "ille," is found.

This dialect has brought all borrowed words under its own laws of accidence; but its original vocabulary has been hopelessly impoverished and deprived of its finest elements. A Corfiote Jew visiting any part of Apulia would find difficulty in understanding the spoken vernacular or the songs of the natives, although the grammatical structure is exactly the same as that of his own dialect.

The Jews can boast of having preserved the oldest text in the Apulian dialect, a collection of translations of Hebrew dirges dating from the thirteenth century and now in the British Museum (MS. Or. 6276). It contains many obsolete terms which are very close to the Latin and many of the older and fuller grammatical forms. Among its points of interest are words and phrases such as "tamen sollicitatevi" (= "mind"), "etiam Ribbi Ismahel," "lu coriu" (= "skin"), "di la carni sua," "la ostia" (= "army"), and "di li cieli." In the fourteenth century the decay of Apulian in Corfu had so far advanced that readers were no longer able to pronounce correctly the words of this Hebrew manuscript or to grasp their meanings. Vowel-points were accordingly inserted, but very inaccurately; and later an incompetent scribe incorrectly substituted "duzzini" (= "dozens"), "douzelli" (= "young men"), "macchina" (= "machine") for "magina" (= "image"), and attempted to erase the superlative termination of "grandissima." It was perhaps owing to the influence of the Venetian that he spared all the simple futures; but in four or five places where the pronoun of the first person was erased the substituted words have so thoroughly obliterated the original readings that it is impossible to discover what was the old form of the peculiar "joni" which is now used side by side with "jò."

An adequate idea of the plurality of languages which prevailed among the Corfu Jewry during the last seven centuries may perhaps be derived from the various changes undergone by Biblical and other proper names, of which the following are some examples:

Abraham: Abram, Abram-άκι, Bambi, Bamboli, Abramino, Nino.
Solomon: Selomò, Σελωμάκι, Μάκι, Salamon, Salomon.
Sarah: Sarà, Sarina, Σάρη, Σάρω, Σαροῦλα, Σαρινιὼ, Sandra.
Rebekah: Rifgà, 'Ρίκω, Richetta, Enrichetta.
Simḥah: Μίχω, Μιχώνη, Mihhetta, Σιμιχοῦλα, Allegra, Allegrina, Εὐθυμια.
Στάμω (Stametta, Stamettina, Metti, Mattilde), Χάϊδω, Κόκω (from Byzantine Σὐδοκία), and Ζαφείρω came from the Greek peninsula.

To-day the Jews speak Venetian, Apulian, Italian, and Greek in Corfu; Greek in Arta, Zante, Chalcis, Crete, and Volo; Spanish and Greek in Athens; and Spanish in Larissa and Trikala. . In all these places Jewish children attend classes in the various Greek schools.

G. L. BE.

JUDÆO-PERSIAN: Language spoken by the Jews living in Persia. The earliest evidence of the entrance of Persian words into the language of the Israelites is found in the Bible. The post-exilic portions, Hebrew as well as Aramaic, contain besides many Persian proper names (especially in Esther; see I. Scheftelowitz, "Arisches im Alten Testament," part i., 1901) and titles (*e.g.*, "satrap," "aḥashdarpenim"), a number of nouns (as "dat" = "law"; "genez" = "treasure"; "pardes" = "park") which came into permanent use at the time of the Achæmenidæ. More than five hundred years after the end of that dynasty the Jews of the Babylonian diaspora again came under the dominion of the Persians; and among such Jews the Persian language held a position similar to that held by the Greek language among the Jews of the West. Persian became to a great extent the language of everyday life among the Jews of Babylonia; and a hundred years after the conquest of that country by the Sassanids an amora of Pumbedita, Rab Joseph (d. 323), dared make the statement (Soṭah, end) that the Babylonian Jews had no right to speak Aramaic, but should speak either Hebrew or Persian. Aramaic, however, remained the language of the Jews in Palestine as well as of those in Babylonia, although in the latter country a large number of Persian words found their way into the language of daily intercourse and into that of the schools, a fact which is attested by the numerous Persian derivatives in the Babylonian Talmud. But in the Aramaic Targum there are very few Persian words (see "Z. D. M. G." xxviii. 56, 67), owing to the fact that after the middle of the third century the Targumim on the Pentateuch and the Prophets were accepted as authoritative and received a fixed textual form in the Babylonian schools. In this way they were protected from the introduction of Persian elements. On a possible early Judæo-Persian translation of the Bible see JUDÆO-PERSIAN LITERATURE, § 1.

Among the Jews of Babylonia.

Persian in the Talmud.

The explanation of the Persian derivatives in the Talmud (they are even more numerous in the geonic literature) is one of the most important tasks of Talmudic lexicography. R. Nathan explained about twenty words in the Talmud as being Persian (see Rapoport, "Biographie R. Nathans," note 6; Kohut, "Aruch Completum," Introduction, p. viii.). A comprehensive work on the subject is still a desideratum. Contributions to the subject have been made by Fleischer (addenda to Levy's "Wörterb."), Perles ("Etymologische Studien," 1871; "Zur Rabbinischen Sprach- und Sagenkunde," 1873; and in "Monatsschrift," 1893), and Kohut. The last-named, however, in his edition of the "'Aruk," has not always used the necessary discretion, and frequently declares what is of purely Semitic origin to be derived from the Persian ("Z. D. M. G." xlvii. 501-509).

Earliest Traces of Modern Dialect.

Nothing definite can be said in regard to the diffusion of the Persian language among the Jews during the long period that elapsed between the date of the completion of the Talmud and that of the earliest monuments of the Judæo-Persian literature. It is nevertheless beyond all question that a portion of the extant translations of the Bible originated in a much older period than did the Judæo-Persian writings whose dates may be determined. Even in these writings there are "so many ancient phonetic and lexical and at times even grammatical forms, such as are not found in the oldest Neo-Persian monuments, that this literature must be assigned to a comparatively early date" (Salemann, "Khudâidâd," p. ii.). At any rate the old forms in Judæo-Persian show that Persian had at a very early time become the mother tongue of the Jews that lived in those portions of the dominions of the califs where Persian was spoken. It is even probable that as early as the Sassanids there were Jewish communities which spoke Persian.

The earliest literary monument of Judæo-Persian is the curious document, dating from the eighth century, which Dr. M. Aurel Stein has found in the ruins of Khotan. Its language is almost free from Arabic admixture, and it contains no Hebrew words (D. S. Margoliouth, in "Journal of the Royal Asiatic Society," Oct., 1903, pp. 735-760). The second oldest document (the deposition of witnesses in a family lawsuit) dates from the year 1332 of the Seleucidan era (=1020 C.E.), and was written in Ahwaz (Persian, "Hormshir"), the capital of Khuzistan, in which city there was at an early date a large Jewish population (*idem*, in "J. Q. R." xi. 671 *et seq.*).

Contemporary Dialects.

The Neo-Persian language, which brought forth a flourishing national literature in the tenth century, probably became the mother tongue of the Jews who lived within the smaller territory where Persian was spoken. Persian is spoken to-day by the Jews of Persia proper, and, for the most part, by those under Russian dominion in Central Asia (in Bokhara, etc.). There is a colony of Bokharian Jews in Jerusalem. The total number of Jews who speak Persian is estimated at about 50,000. The so-called "Mountain Jews" of the Caucasus speak a dialect called "Tat," which varies considerably from the ordinary Neo-Persian. Their number is reckoned at 20,000 (see Jew. Encyc. iv. 558b, *s.v.* Dialects; W. Geiger, "Bemerkungen," in "Grundriss der Iranischen Philologie," i., section 2, p. 408; and Vsevolod Miller, in the third report of the Lazarevski Institute for Oriental Languages at Moscow). What Geiger says of the general characteristics of Judæo-Persian should especially be emphasized (*l.c.* p. 410): "It differs from the written language not nearly so much as the other dialects and patois of Persian. It is no more a historically independent dialect than is the Tadshiki (the Persian of the transoxanian lands), but is rather a corruption of the High Neo-Persian with local dialectic color." This is due to the fact that the Persian Jews busied themselves with Persian national literature, transcribing it in Hebrew characters. In their own poetry also the Jews were influenced by this literature, which made itself felt even in their Bible translations. But in course of time corruptions crept in, especially in these Bible translations, as they were carried from place to place. Simeon Ḥakam in the introduction to his translation of the Pentateuch gives interesting examples of Persian words which are corrupted in vulgar speech and are used in this corrupted form by the Jews of Bokhara in their letters to one another. Thus, instead of אסמאן ("âsmân" = "heaven"), they write אספאן; instead of פאדשאה ("pâdishâh" = "ruler"), פאסג̄א; instead of סג̄דה (Arabic, "sajdah" = "bending"), שסדה; instead of כיתף (Arabic, "kitf" = "shoulder"), כיפת; instead of ג̄מע (Arabic, "jam'a" = "congregation"), ג̄עם; instead of עומר (Arabic, "'umr" = "life"), עורם. Of these examples the last three show instances where the corruption consists in the transposition of the consonants. The same occurs in the poem of Chudâidâd (see Salemann, *l.c.* p. vi.). Simeon Ḥakam himself used the vulgar tongue ("lashôn hamôniyi") in his translations intended for his fellow countrymen of Bokhara; and his Persian ritualistic compendium may well be called a treasure-house for the Judæo-Persian idioms of Bokhara. On the other hand, Simeon asserts that the language of his translations is correct Persian, "leshôn pârsi ẓaḥ" (see the title-page of the Pentateuch translation in "Z. D. M. G." lvi. 730).

Corruption from Literary Language.

The following attempt to present an idea of the character of Judæo-Persian will be restricted to grouping the prominent peculiarities under several heads. A distinction is made between the language of the older literary productions (such as the dictionary of Moses Shirwani and the commentary on Samuel), and the most recent Judæo-Persian writings in Bokhara. Among the latter is the poem of Chudâidâd, although it was written at the beginning of the nineteenth century.

Punctuation.

Transcription: All of the Judæo-Persian literature, whether in manuscript or printed, presents the Persian text in Hebrew characters. In Bokhara at an early date the Hebrew vowel-signs were used to represent the Persian vowels in the copies of the poems of Yusuf Yehudi and his circle and of the Chudâidâd poem. In the commentary on Samuel the Persian is also partially punctuated. The Neo-Persian publications in Jerusalem intended for Bokhara are all punctuated. This has the advantage of showing the pronunciation of the Persian within the district in which it originated more clearly than is the case with the common Arabo-Persian alphabet with its scarcity of vowel-signs. Thus, for example, in the Hebrew transcription "k" is always distinguished from "g"; also, as regards vocalization, "i" from "ê," "û" from "ô." The Hebrew transcription shows also very clearly the changes which many sounds have undergone among the Persian Jews partly through dialectic variation of pronunciation, partly through carelessness, or as aids to pronunciation. An example of the transcription of the older period is furnished by the Samuel commentary (about the 14th cent.; see "Z. D. M. G." li. 398). In this work ב, when it designates "b," is frequently written with dagesh; where it stands for "w" it is usually written with rafeh. ג with or without dagesh corresponds to the Persian "g" ("gaf"); ג̄ to Persian "gh," sometimes also to the ordinary "g"; ג̄ is "j" ("jim"), sometimes also "tsh." ד represents also "dh"; כ with or without dagesh is "k"; כ is "kh" or "khw," although the latter is sometimes transcribed by כו. ס = "ṣ" ("ṣad"). פ̄ with rafeh is "f"; without it, "p." צ̇ = "tsh." For the vowels, the following may be noted: Long "ā" is usually left undesignated, though it is often indicated by the vowel-letter א or by ḳameẓ; short "ă" ("ĕ") is often designated by shewa, sometimes by א; final "ăh" ("ĕh") here and there by א. Short "ŭ" is designated by the vowel-letter ו; short "ĭ" by the vowel-letter י (comp. "Z. D. M. G." liii. 412).

Various Forms of Gimel.

As an example of the modern method of transcription may be mentioned the rule that Simeon Ḥakam lays down. He uses four forms of gimel: (1) גּ for the usual, hard "g"; (2) ג̄ for "gh"; (3) גׄ for "j"; and (4) ג̄ for "tsh." He has thus avoided entirely the use of צ̇ for the last sound. In regard to פ, ף, and כ, ך, with or without dagesh, Simeon Ḥakam observes no rule: "We leave this to the reader, since there is a different pronunciation in every city. That of the people of Bokhara is not like that in the cities of Persia or in Balkh." In Simeon's ritualistic compendium the transcription is less methodized than in the translation of the Bible (see "Keleti Szemle," iii. 15b; "Z. D. M. G."

lvi. 759). In one of the Bokhara translations of Abot, printed in Jerusalem, "j" is rendered by ג̣; "tsh," by ג̤.

Consonantal Changes.

Phonetics, Consonants: In the Samuel commentary and in Shirwani's dictionary the following important variations in sound from the written language are found, some of which occur also in the later literary productions: "k" is found for "g," and vice versa (תונכר for "tuwânger," פיכן for "paigān," are, according to Nöldeke, "older forms which have preserved the original 'k'"); "ḳ" for "gh"; "g" for "ḳ"; "ṭ" for "t," and vice versa; final "t" instead of "d"; "d" for "th"; "d" for "ẓ"; "tsh" for "sh" (ספיץ = "shipish"); "j" for "z"; "h" for "ḥ"; "l" for "r" (in a modern publication תפסיל stands for תפסיר); "w" (ו or בֿ) for "b"; "b" for "f"; "m" (before "b") for "n"; "mb" (final) for "m." The changes which, especially among the Bokharian Jews, Arabic derivatives undergo, owing to the permutation of consonants, are such that the word-form often becomes almost unrecognizable (for examples see "Z. D. M. G." liii. 393, lv. 251 *et seq.*, lvi. 746–753); changes due to the transposition of consonants, as the above-cited remark of Simeon Ḥakam shows, are also a peculiarity of the vulgar speech of the Bokharian Jews.

Vowels: A marked characteristic of Judæo-Persian is the very frequent use of the vowel "u," it often being substituted for other vowels, for "a" ("e") or "i." The fact that in the Samuel commentary "u" (written ו) sometimes takes the place of "ĭ," may perhaps be explained by the supposition that in pronunciation the vowel "i" sounded like "ü," and that this was rendered by ו; hence, conversely, a י is sometimes found for "u" (דישמן = "dushman" = "enemy"). It has already been noted that the Judæo-Persian texts carefully designate (by יֵ and וֹ—) the vowels "ē" and "ō," which in Persian writing are not distinguished from "î" and "û." Also the suffixes of the first person plural ("-îm," "-îd") are frequently written ֵים and ֵיד (also ֵית). Modern publications and manuscripts write "segol" instead of "ẓere" (see "Z. D. M. G." lii. 199). For short "ĭ," the pronunciation "ē" is also found (the Samuel commentary writes סֶה, also סֵיה, for "sih" = "three"; גרד, but also גירד, for "gird" = "around," "about"). In the transliteration of Arabic words the Judæo-Persian texts of both ancient and modern times indicate the "imalah" of the "a" sound; the Samuel commentary also writes אשתיו ("ishtew") for the Persian word "shitâb." For the shortening of vowels in Judæo-Persian see Nöldeke, "Litterarisches Centralblatt," 1889, p. 890. The above-mentioned transcription of short vowels by means of "shewa" points to a shortened pronunciation of the vowels.

Sign of the Genitive.

Etymology: The use of the particles "az," "ân" between two substantives to designate the genitive relation is found in the old Samuel commentary as well as in the most modern texts. The original sign of the genitive (the vowel "ĭ"), which was appended to the first substantive ("status constructus"), is attached in these texts to the substantive and to the genitive particle also; thus: פָאדְשָאהִי אַזָאנִי עָאלַם = "king of the world." In the oblique case, besides the suffix "-ra," the particle "azmar" (instead of the "mar" used in the older language) is placed before the substantive both in the modern Bible translations ("Z. D. M. G." liv. 558) and in the old Samuel commentary (*ib.* li. 407). In the latter, "azmar" is also found alone, without the suffix "-ra." The use of the Arabic plural ending "-āt" in Persian words, *e.g.*, "murghāt" (מורגָאת = "birds"), is a peculiarity of the Tadshiki which has naturally affected the dialect of the Bokharian Jews ("Grundriss der Iranischen Philologie," i., section 2, p. 407). The preservation of the ג in the plurals בזוגן ("arms"), זניגן ("knees") in the Samuel commentary is an ancient usage (Nöldeke, in "Z. D. M. G." li. 671). The form "dudum" (second), in the Book of Daniel, goes back to the Old Persian form of this ordinal ("Grundriss," i., section 2, p. 116).

Pronouns.

As regards pronouns, the archaism "ēmā" (we) is found. Noteworthy also are "māyān" and "shumāyān" for the first and second persons plural. The attachment of the enclitic pronoun "sh" by means of "i," in the Ezekiel commentary (Salemann), is important.

Conjugation of Verbs.

In the conjugation of the verb the following points are to be noted: The suffix of the first person singular is "-um" instead of "-am"; *e.g.*, דאדום in the Samuel commentary; דידום, כונום in that on Ezekiel. The suffix of the third person plural, "-and," throughout the Samuel commentary, is shortened to "-an"; Yusuf Yahudi uses both; while Simeon Ḥakam writes the ending sometimes ַן ("-an"), sometimes ִן ("-in"). The second person plural has at times the ending "-ētān." The imperfect plural in the Samuel commentary has the ending "-īn" instead of "-īd" (*e.g.*, בְגִירִיין = "ye wept," instead of "bigiryid"). The apocope of "-ast" to "-as" is frequent (*e.g.*, כַרְדַם for "kardast"). In the Samuel commentary and elsewhere the present participle is preferably formed with "-ā." The same commentary also furnishes many examples of the archaic formation of the passive, that is, with the employment of the verb "âmadan," instead of the usual "shudan." Another form of the passive, without an auxiliary verb, is to be found in the Ezekiel commentary: it is a form which had been known only in Middle Persian (Pahlavi), and can now serve as an important testimony to the survival of that form (Salemann, "Zum Mittelpersischen Passive," St. Petersburg, 1900).

Of prepositions those should be noted in which the original initial "ă-" has been preserved. The Ezekiel commentary has אבא for "bā"; אבאז for "bāz"; אבר for "bar"; אבי for "bē" (Salemann, *ib.* p. 270). The substantive "tăh" ("under part," "ground") is used by the Jews of Bokhara as a preposition meaning "under." Especially remarkable are the particles which are used to-day by the Bokharian Jews, but have not yet been met with elsewhere: (1) The preposition "ḳaṭīr," also "ḳeṭī," meaning "with"; it is used also as a postpositive. Its origin may be traced to an Arabic substantive, "ḳiṭār," "ḳaṭār" (row), which is used also in Persian and Turkish. (2) The particle of comparison "warin," which is always placed after the substantive (probably from the particle "wār," "wārah," which is used only as a suffix to substantives, with the meaning of the Latin "instar"). (3) The adverbial particle "hamtōr" (meaning "at any rate," "certainly," "nevertheless"). (4) The interrogative particle "tshitō" (how?). In reference to these particles see "Z. D. M. G." lvi. pp. 730-739 (for No. 4, *ib.* li. 552). For the particle of negation with the imperative, Simeon Ḥakam uses "nă" instead of "mă" (*e.g.*, "nakun" instead of "makunn").

Prepositions and Particles.

Formation of Substantives.

Among the suffixes employed in the formation of substantives, "-ish" is often found in the older texts. In the written language it is used only in the shortened form "-ish," and is appended to the present stem. In Shirwani's dictionary nearly eighty such substantives are given (see Stade's "Zeitschrift," xvi. 231 *et seq.*; "Grundriss," i., section 1, p. 281). Another abstract ending, "-ih" (יה), of which many examples occur also in Shirwani, is added to adjectives to form substantives, and corresponds to the Pahlavi abstract ending of nouns "-îh" (Stade's "Zeitschrift," xvii. 200, 202; "Z. D. M. G." li. 671). The adjectival suffix "-omand" (instead of "-mand") should also be noted in סהמומנד (in the translation of Isaiah, ed. Lagarde) and בימומנד (in the Ezekiel commentary); both words mean "terrible."

Among the verbal formations are the numerous causatives ending in "-âuîdan" in the Samuel commentary ("Z. D. M. G." li. 672) and in the Ezekiel commentary (Salemann, *l.c.* p. 271).

Syntax.

As regards the syntax of Judæo-Persian the most noteworthy feature is the fact that the translations of the Bible follow exactly the syntactical construction of the Hebrew, in order not to lose any detail of the original text. The Hebrew participle is rendered by the participle without regard to tense; the Hebrew article, by the demonstrative "ān"; and the accusative particle את, by "mar" (or "azmar"). The infinitive which stands before a finite verb in Hebrew is faithfully rendered by the Persian infinitive; and in the same way the infinitive with a pronominal suffix is literally translated. This tradition of the Persian translators of the Bible has been preserved by their most recent representative, Simeon Ḥakam. His Pentateuch in a way furnishes an ideal interlinear translation; and, in order to emphasize its merits as such, he has carried out the plan of using dots to separate single words or groups of words in the translation which correspond to single words in the text. This of course is characteristic only of translations of the Bible into Judæo-Persian; but it is possible that it may also have influenced other productions. However, Nöldeke has stated that the "Narration of Daniel" (a translation from the Aramaic) is free from the Hebraized syntax of the Bible translations ("Litterarisches Centralblatt," 1884, p. 889). A peculiarity in the style of a modern literary production of Bokhara is the use of the "pluralis majestatis." In this work, a popular homily, the third person plural is used in speaking of the person represented as acting or speaking; similarly, a person is addressed in the plural of the second person. The singular is used, however, of wicked persons, and God also is always referred to in the singular. The reason for these two exceptions seems plainly to be the feeling that the polite form of the plural is not in place in speaking of God, whereas the respect implied by that form is not deserved by the wicked ("Z. D. M. G." lv. 250, lvi. 758).

Pluralis Majestatis.

Vocabulary.

The chief importance for Persian philology of the Judæo-Persian texts lies in the surprising wealth of additions to the vocabulary which all of them, without exception, offer. Lagarde has given a number of noteworthy lexical facts in his "Persische Studien aus der Propheten-Uebersetzung," and W. Bacher has also collected important expressions from Shirwani's dictionary and the Samuel commentary, as well as from the most recent Judæo-Persian writer, Simeon Ḥakam (Stade's "Zeitschrift," xvi.; "Z. D. M. G." li., lvi.). A number of words which can be traced back to Middle Persian, in part even to the Avesta language, have been brought to light and incorporated in the Persian dictionary; likewise interesting word-formations and meanings of well-known words which were not to be found elsewhere.

Further interest attaches to the Judæo-Persian texts on account of the large number of Arabic derivatives which they contain. These far exceed the number of Arabic words found in Persian dictionaries. Perhaps the influence of Arabic-speaking Jews, as well as familiarity with the Arabic Bible translations of Saadia, may have contributed to this.

Foreign Words Adopted.

A characteristic of the language of the Jews living in the northern lands where Persian is spoken is the intermixture of Turkish, especially East-Turkish, words. As early a writer as the lexicographer Solomon b. Samuel in the fourteenth century was influenced by Turkish ("Keleti Szemle," i. 27 *et seq.*, 87 *et seq.*; "Ein Hebräisch-Persisches Wörterb." pp. 10, 27). He even explains a Biblical word (קרני, Job xvi. 15) by a Turkish one having a similar sound (meaning "belly"). The above-mentioned homily contains a comparatively large number of Turkish words ("Z. D. M. G." lv. 255); but the greatest number occur in Simeon Ḥakam's ritualistic compendium (see "Keleti Szemle," lv. 157). The latter work is an interesting example of the fact that in modern times many words from European languages, especially from the Russian, have found their way into the language of the Persian-speaking Jews of Bokhara ("Z. D. M. G." lvi. 753 *et seq.*). The German word "Jahrzeit," in its ritualistic meaning, has been adopted by them (see "Zeit. für Hebr. Bibl." v. 154).

That which gives a Jewish character to Judæo-Persian is the use of mixed Hebrew and Persian forms, and the close union of the two elements. Combinations of a Hebrew noun with a Persian verb are frequent in the writings of Solomon b. Samuel ("Ein Hebräisch-Persisches Wörterb." pp. 20–22). By means of the Persian suffix "-î" he forms a word of Persian character from a Hebrew word; *e.g.*, "shelîḥî kunā" = "one who fills the office of prayer-leader" ("sheliaḥ ẓibbur"). He adds the Persian plural ending to a Hebrew word (*e.g.*, שטרהאי). The same Hebrew-Persian form of expression is found in the Samuel commentary. Simeon Ḥakam's ritualistic compendium offers the greatest number and most varied examples of the mixture of Hebrew with the Persian spoken by the Bokharian Jews of to-day ("Z. D. M. G." lvi. 755–758). In many of these a Persian (or Arabic) word is joined with its Hebrew equivalent in order to make the meaning more plain. Hebrew substantives are also joined by means of the Persian genitive suffix (יֵ; which is added to the first word); by the addition of the Persian ending "-nāk" an adjective is formed from a Hebrew substantive (*e.g.*, סַכָּנָה נָאךְ = "dangerous"), etc. Aramaic words also are used in Persian, and are similarly combined with Persian ones. This appears to be due to the influence of the Targumim, many words from which were adopted into the common language of the Persian Jews at an early date. Especially is this noticeable in the writings of Solomon b. Samuel, who, for example, regularly expresses the idea of praying by "ẓelûtâ kardan." The Aramaic "shibṭā" (= Hebr. "shebeṭ") is used throughout to designate a tribe. In the above-mentioned homily the tribe of Dan is called שִׁבְטָאִיִ דָן. Simeon Ḥakam in his translation of the Pentateuch everywhere renders מטה or שבט by the Aramaic word, writing it with ס instead of שׁ. He seems, however, to have kept the pronunciation with "s" for this Aramaic word, on account of the influence of the Arabic "sibṭ."

Admixture of Hebrew and Aramaic.

A curious fact, of interest in the history of language, is the custom of Solomon b. Samuel and of the writer of the Samuel commentary, when writing Hebrew, of using the Hebrew word יֵשׁ exactly like the Persian "ăst," and of placing it at the end of the sentence, which is not done in Hebrew. Solomon b. Samuel furnishes another example of the influence of Persian syntax on Hebrew style (see "Z. D. M. G." li. 396; "Ein Hebräisch-Persisches Wörterb." p. 22).

For the importance of Judæo-Persian for Persian philology see, further, Lagarde, "Persische Studien," p. 68; Paul Horn, in Stade's "Zeitschrift," xvii. 203; Carl Salemann, "Khudâidâd," p. ix.; Wilhelm Geiger, in "Grundriss," i., section 2, p. 408.

Geiger, cited in the article, Salemann, on Middle Persian, in *Grundriss der Iranischen Philologie*, i., section 1, pp. 259, 269, 281, 291, 319, 332; *idem*, in *Litteraturblatt für Orientalische Philologie*, ii. 74–86; Horn, on the literary New Persian, in *Grundriss der Iranischen Philologie*, i., section 2, pp. 19 *et passim*, Index, pp. 526 *et seq.*; Nöldeke, in *Litterarisches Centralblatt*, 1884, cols. 888–891; *idem*, in *Z. D. M. G.* li. 669–676; Ethé, in *Litteraturblatt für Orientalische Philologie*, i. 186–194.

G. W. B.

JUDÆO-PERSIAN LITERATURE: At the present stage of research it is not possible to arrange the literature of the Jews written in Persian but in Hebrew characters either in chronological or even in geographical order, because the origin of the manuscripts does not always show the origin of the works they contain. The following survey is based simply upon a division into prose works and poetry, each of these divisions being subdivided according to the subject-matter of the writings. The greater part of the manuscripts mentioned in this article belongs to E. N. Adler of London, who has published a catalogue of them in the "Jewish Quarterly Review" (x. 584–626; printed separately under the title "גנזי פרס ומדי, The Persian Jews: Their Books and Their Ritual," London, 1899). The manuscripts are here cited according to their provenience: T. = Teheran; B. = Bokhara. Other collections are to be found in the Bibliothèque Nationale, Paris ("Catalogue," 1866), and in the British Museum (Margoliouth, "Descriptive List of the Hebr. and Samaritan MSS. in the Brit. Mus." London, 1893; *idem*, "Cat. Hebr. and Samaritan MSS. in the Brit. Mus." part i., *ib.* 1899). The printed works have for the most part been published within the last few years at Jerusalem for the Jews of Bokhara.

Sources.

Location of Versions.

Prose. § I. Bible Translations: The oldest fragments of Persian translations of the Bible occur in a Parsee polemic dating from the second half of the ninth century, the "Shikand Gumanik Vijar" (see Jew. Encyc. iii. 190b, *s.v.* Bible Translations). Maimonides, in the "Iggeret Teman," refers to the fact that the Pentateuch was translated into Persian several centuries before Mohammed ("Ḳobeẓ," ii. 3d; Zunz, "G. V." p. 9). The Persian Jews at the time of Maimonides ascribed an equally ancient origin to their translation of the Bible; and the Syrian bishop Theodoret, in the fifth century, mentions a Persian Bible translation which existed in his day (Munk, "Notice sur Saadia," p. 63, note 2). This translation must have been in Pahlavi, but it has completely disappeared. There are, however, manuscript translations of the Pentateuch that are centuries older than that of Jacob ben Joseph Tawus, which was printed in the sixteenth century. Joseph b. Moses, the writer of MS. Brit. Mus. Or. 5446, which contains the Pentateuch, finished his work on the 24th Adar, 1319. He was probably also the translator ("J. Q. R." xv. 281). After this comes, according to Seligsohn (*ib.* pp. 278 *et seq.*), a translation contained in the Vatican, Paris, and St. Petersburg manuscripts of the fifteenth and sixteenth centuries (see Guidi in "Rendiconti . . . dei Lincei," 1885, p. 347; the St. Petersburg manuscript differs from the others in its readings; Harkavy-Strack, "Catalog," p. 166). On linguistic grounds Guidi believes that this translation was made in Kurdistan or in one of the border provinces, though the Vatican manuscript came from Laristan in southern Persia. Moreover, it is closely connected with the Targum of Onkelos ("Paris Cat." p. 7). The third translation chronologically is that, mentioned above, by Jacob ben Joseph Tawus, published in the so-called Constantinople Polyglot (1546) and incorporated, in Persian transcription with Latin translation by Thomas Hyde (1657), in vol. iv. of the London Polyglot. Like the preceding two it rests on the old traditions of the Judæo-Persian Bible translations. How the ancient tradition was exposed to later debasing influences is set forth by Simeon Ḥakam of Jerusalem in the preface (p. iv. b) to his work, which contains a carefully punctuated translation of the Pentateuch (ס' מקרא מפורש, 5 vols., Jerusalem, 1901–3). He says that it was the custom from oldest times in Bokhara to translate the Scriptures for school purposes, but that this was done orally, and that a great many changes and errors crept in, especially idioms from the ordinary spoken language. The meaning of certain words had been forgotten and the Hebrew was retained untranslated; Persian words were used in quite different significations because of similarity of sound, or Aramaic ones from Onḳelos were substituted, or the Persian words themselves were corrupted. Instead of this corrupt oral translation of the Torah, Simeon Ḥakam wished to give his fellow countrymen of Bokhara a new and correct translation, fixed by printing. Simeon had as aids to his work (Preface, p. v. b) the translation of Tawus, the poetic work of the Mollah Shahin, the Arabic translation of Saadia, and the commentaries of Rashi, Abraham ibn Ezra, and Samuel b. Meïr. His translation follows the Hebrew text verbatim. The single words are separated from each other by dots; and in order to satisfy the adherents of the traditional translation, he very often inserts in brackets and in smaller print the rendering of certain words as approved by the traditions of Bokhara. Simeon's statement as to the lack of written Bible translations among the Persian Jews is confirmed by the fact that Adler's collection contains only one manuscript of the Pentateuch (B. 61), dated 1776.

Character of Translation.

§ II. A translation of the Earlier Prophets, together with Ruth, Ezra, Nehemiah, and Chronicles, is found in a Paris manuscript (Nos. 90, 91), completed 1601–2 in the city of Lar. MS. Adler, B. 43h, contains a "tafsir" (explanation) of Joshua from the Targum. A Paris manuscript (No. 97), older than the sixteenth century, contains a translation of Isaiah, Jeremiah, and Ezekiel i.–x. (ed. Lagarde, "Persische Studien," 1884; see Nöldeke, in "Literarisches Centralblatt," 1884, p. 888). In it the Targum and the commentary of David Ḳimḥi have been used (Munk, *l.c.* pp. 70–83). The translation of Isa. lii. 13–liii. 12 had been edited earlier, in Persian transcription, by Neubauer in his work, "The 53d Chapter of Isaiah According to Jewish Interpretations" (pp. 137 *et seq.*). The Paris Library also contains a transcription of the translation of Isaiah and Jeremiah, made in Hamadan in the year 1606 (Munk, *l.c.* p. 69). The Targum is the basis of a translation of Jeremiah in a Paris manuscript (No. 100), the writing of which shows the same character as the other Paris manuscripts already mentioned. A codex of Samuel (MS. Adler, B. 43) also contains a tafsir of Isaiah. The commentary on Ezekiel to be mentioned later contains a translation of Ezekiel which follows the text closely and varies considerably from the translation edited by Lagarde. Translations of the twelve Minor Prophets are contained in a Paris manuscript (No. 101), and in two manuscripts in the St. Petersburg Library (Harkavy-Strack, "Cat." pp. 165, 262). MS. Adler, B. 45 (comp. B. 52), contains a collection of the prophetic hafṭarot (Harkavy-Strack, *l.c.* p. 166).

In the year 1740 Baba b. Nuriel in Ispahan completed a translation of the Pentateuch and Psalms at the command of Nadir Shah. The same translation is contained in MSS. Brit. Mus. Or. 4729 (year 1822) and 2452 (Margoliouth, "Cat." p. 120). I. Grill has edited the 68th Psalm ("Indogermanische Forschungen," ii. 142). A further translation of the Psalms is found in MS. Adler, B. 27 (comp. T. 31); but MSS. Vatican 37 and 42 are probably of non-Jewish origin (see Horn in "Z. D. M. G." li. 7; comp. Walton, "Prolegomena," p. 694). A new translation by Benjamin b. Johanan ha-Kohen of Bokhara was published at Vienna in 1883 (see Ethé in "Lit.-Blatt für Orientalische Philologie," i. 186). The same author published a translation of Proverbs at Jerusalem in 1885 (see Zetterstein in "Z. D. M. G." liv. 555). Other translations of this book exist at Paris (MSS. 116, 117) and in the Adler collection (B. 43, 46); translations of Job, at Paris (MSS. 118, 120, 121), St. Petersburg (Harkavy-Strack, *l.c.* p. 167), and Parma (MS. De Rossi 1093). A new translation of Job, made by Solomon Babagan b. Phinehas of Samarcand, was printed at Jerusalem in 1895 (see "J. Q. R." x. 547). Various translations of the Five Scrolls exist in manuscript; *e.g.*, of Canticles, Adler, B. 12, 43, 46; T. 31; Paris 116, 117; of Ruth, Paris 40, 116; of Lamentations, Adler, B. 43; Paris 101, 118 (see also Munk, *l.c.* p. 69, note 1); of Ecclesiastes, Adler, B. 43, 46; T. 31; Paris 116, 117; and of Esther, Adler, B. 43, T. 16; Paris 116, 127 (the last from the year 1280). Simeon Ḥakam has edited a Persian translation of Canticles (see his preface to the Pentateuch translation, p. v. b). The Paris Library has two copies of a translation of Daniel (MSS. 128, 129), the second having been made in the year 1460. The translation of Ezra, Nehemiah, and Chronicles has already been mentioned (MSS. Paris 90, 91).

§ **III. Apocrypha:** The apocryphal books translated from Hebrew redactions are Tobit, Judith, Bel and the Dragon, and the Book of Antiochus (MS. Paris 130, written 1601 in Lar; Munk, *l.c.* pp. 83–86). Especially noteworthy and also of linguistic interest is an Apocalypse of Daniel ("Ḳiṣṣai Daniyal," ed. Zotenberg, in Merx, "Archiv," i. 385 *et seq.*; see JEW. ENCYC. i. 684, *s.v.* APOCALYPTIC LITERATURE) translated from a lost Aramaic original and appended to the translation of the Biblical Daniel (MS. Paris 128). MS. Brit. Mus. Or. 4743 (of the year 1816) contains "Daniyal Namah" (= "History of Daniel"), by Khawajah Bukhari ("J. Q. R." vii. 119).

§ **IV. Bible Commentaries:** Of Bible commentaries in Persian there is only one, on Ezekiel, published by Salemann from a St. Petersburg manuscript (Firkovich collection, ii., No. 1682). The beginning (up to i. 26) is lacking, the existing commentary together with the above-mentioned translation extending to xxxix. 26. The date of the manuscript can not be determined, although the language of the commentary has many old forms (see C. Salemann in "Bulletin de l'Académie Impériale des Sciences de St. Pétersbourg," 1900, xiii., No. 3, pp. 269–276). The Persian commentary on the Book of Samuel, "'Amuḳot Shemuel," written in northern Persia during the fourteenth century (MS. Gaster 77), is only in part Persian. Besides the Persian rendering of single words and sentences it contains principally extracts from the commentary of Rashi. In spite of its brevity it is of peculiar interest from a philological point of view. The beginning of a similar work on the Book of Kings, closely following that on Samuel, is also contained in this manuscript (Bacher, in "Z. D. M. G." li. 392–425). MS. Brit. Mus. Or. 2460 contains, according to Margoliouth ("Cat." i. 184 *et seq.*), a "fragment of a Persian commentary on portions of the Prophets." Only single prophetical haftarot are commented upon. The above-mentioned translation of the Pentateuch of the year 1319 is in individual passages accompanied by explanations in Persian ("J. Q. R." xv. 279). Likewise the translation of the twelve Minor Prophets (MS. Paris 101) contains explanatory remarks in the margin.

Lexicography.

§ V. Lexical glosses accompanying the Bible text were especially popular among the Persian-speaking Jews as an aid to the study of the Bible. Joseph b. Moses, the author of the Pentateuch translation of 1319, refers to the "Master Abu Sa'id," who wrote an explanation of the difficult words in all of the twenty-four books of the Holy Scriptures ("J. Q. R." xv. 282). The commentary on Samuel (MS. Gaster 77; see above) contains such lexical glosses on certain parts only. MS. Brit. Mus. Or. 2454 (of the years 1804–5) contains "A vocabulary of difficult words in the Bible, explained in Persian" (Margoliouth, "Descriptive List," p. 72). Of the Adler collection, B. 1 (perhaps of the year 1183) gives, as an appendix to a siddur, "Perush ha-Millot, Persian translation of the difficult words and passages of the Bible." B. 43 contains a "Sefer Bi'ur Millot ha-Torah," composed in 1708. In the same codex the difficult words (קשיא probably means nothing more than this) of the books of Daniel, Ezra, Nehemiah, and Chronicles are explained. B. 49 contains "A vocabulary of difficult words in the Pentateuch with explanations in Persian." B. 50: "Vocabulary of difficult words in the Bible (Pentateuch, Kings, Ezekiel, Esther, Canticles, and Joel)."

Judæo-Persian literature boasts of two dictionaries that deserve notice: one entitled "Sefer ha-Meliẓah," by Solomon b. Samuel of the fourteenth century; the other, "Agron," by Moses ben Aaron ben She'erit of Shirwan of the fifteenth century. The former, which is contained in one St. Petersburg and in three Adler manuscripts (these supplement one another: one of the Adler manuscripts was written in 1490; the St. Petersburg one is still older), was completed in Urgenj, Russian Turkestan, in the year 1339. The "Sefer ha-Meliẓah" is a literary curiosity not only on account of its place of origin, which is not elsewhere mentioned in the history of Jewish literature, but also on account of its contents. It comprises about 18,000 articles, some of them very short, however, which comprehend the whole vocabulary of the Bible, of the Targum, of the Talmudic-Midrashic literature, and of other writings, in a systematic alphabetical arrangement, with Persian translations of the words explained, hundreds of which are unidentifiable. Some of these may be corruptions of the original forms, or they may be derivatives; but some of them are nothing more or less than linguistic puzzles (see Bacher, "Ein Hebräisch-Persisches Wörterb." Strasburg, 1900).

Of the "Agron," composed in 1459, only a large fragment, from the middle of the letter "yod" to the end, has been preserved (MS. Gaster 77). It deals with the whole vocabulary of the Old Testament, including the Aramaic portions. The articles are arranged alphabetically, and consist partly of roots, partly of word-formations (chiefly substantives and particles). It gives the several different meanings of one root or noun in as many separate articles. The book is a popular aid to the study of the Bible; and in its use of the Persian language it presents many interesting idioms (Bacher, in Stade's "Zeitschrift," xvi. 201–247; xvii. 199–203).

Grammatical writings in Persian are not to be found in Judæo-Persian literature. Nevertheless Baba b. Nuriel's translation of the Psalms is preceded by "A Grammatical Introduction on the Servile Letters, the Vowels, and the Accents" (Margoliouth, "Cat." i. 120).

Talmud and Midrash.

§ VI. Traditional Literature: The Mishnah treatise Pirḳe Abot has frequently been translated on account of its use in the liturgy. It seems that in Bokhara not only is it read on the Sabbaths during the summer, but one chapter is read each day. This is to be seen from the introduction to the Persian translation, or rather explanatory paraphrase, printed at Jerusalem in 1902 (Bacher, in "Zeit. für Hebr. Bibl." vi. 112–118, 156–157). Other translations exist, *e.g.*, that of Jacob b. Palṭiel (MS. Adler, T. 25; see also T. 2, 60; B. 38). The beginning of a metrical translation of Abot by Mollah Amrani ('Imrani) has also been preserved ("J. Q. R." xv. 290). MS. Adler, B. 35, contains a translation of the so-called "Alphabet of Ben Sira," written in 1681; this is also found in MS. Brit. Mus. Or. 4731 (Cowley-Neubauer, "The Original Hebrew of Ecclesiasticus," pp. xv., xxix.). The Persian marginal notes to the Hebrew Genizah text of Ben Sira should also be mentioned here (Stade's "Zeitschrift," x. 308–310). A translation of portions of the Midrash on the death of Moses and Aaron is contained in MS. Adler, T. 32. The same Midrash has recently been translated by Simeon Ḥakam (see his preface to the Pentateuch translation, p. v. b). For a homiletic dissertation on the seven wonders of Egypt by Eleazar ha-Kohen (MS. Adler, B. 36) see "Z. D. M. G." liii. 422. MS. Adler, T. 32, "The Story of the Destruction of the Temple" ("Ḥorban ha-Bayit"), and T. 9, "Persian Hebrew Midrash," also belong here. MS. Adler, T. 65, "Hebrew-Persian Perush Mishnayot," written in the year 1830, probably contains lexical glosses to the Mishnah (comp. B. 43a, "explanation of unusual words which are found scattered throughout the Mishnah"). Persian glosses to the first book of Maimonides' "Yad ha-Ḥazaḳah" are found in MS. Brit. Mus. Or. 2456 (Margoliouth, "Descriptive List," p. 42).

§ VII. Halakah: A catechism on the rules for slaughtering, written in Hebrew some time between the thirteenth and fifteenth centuries in the northern part of the Persian linguistic territory, contains Persian expressions ("Zeit. für Hebr. Bibl." iii. 166). A comprehensive work in Persian on the ritual has recently appeared in Jerusalem. It is the ritual compendium of Abraham Aminof translated by Simeon Ḥakam from the unpublished Hebrew original ("Liḳḳuṭe Dinim," 4 parts, Jerusalem, 1901-3; see Bacher in "Zeit. für Hebr. Bibl." v. 147-154; *idem*, in "Z. D. M. G." lvi. 729-759; "Keleti Szemle," iii. 154-173).

§ **VIII. Liturgy:** Elkan N. Adler has discussed the siddur of the Persian Jews, on the basis of three manuscripts containing it (B. 1, B. 6, T. 79), in "J. Q. R." x. 601 *et seq.* One of these manuscripts, a revision of Saadia's siddur, was written in 1564 in Shiraz. Of the Persian parts of this siddur (p. 605) he says: "Many of the less easy hymns and prayers are translated into Persian." The liturgical rules and directions are frequently given in Persian (see also Neubauer's remarks on the Persian parts of the siddur of the Chinese Jews, in "J. Q. R." viii. 129, 137 *et seq.*). Other manuscripts to be mentioned in this connection are: Adler, T. 43, "Hebrew Prayers, Hymns, Seliḥot, Hosha'not, Stories, etc., with some translations into Hebrew-Persian, written by Ephraim b. Raḥamim"; T. 49, "Confessions of sins and prayers" ("Widduyim," "Taḥanunim"), by Elisha b. Samuel; T. 51-52, "Hebrew-Persian Prayers, Poems," etc.; T. 80, "Seliḥot, etc., Hebrew-Persian translation." T. 66 contains a translation of the Pesaḥ Haggadah.

Reference to a liturgical usage of the Bokhara Jews is made in a small book published by Raḥamim b. Elijah (Jerusalem, 1899), which contains a translation based on the Targum of the hafṭarah for the last day of the Pesaḥ feast (Isa. x. 32-xii.), and, in connection with it, a long homily on the invasion of Sennacherib. Another little book by the same author is a glorification of the seven evenings of the Feast of Tabernacles (the "seven guests"; comp. MS. Adler, B. 23) based on the Luria legend (see Bacher in "Zeit. für Hebr. Bibl." iv. 180-185, v. 131). The liturgical poetry (MSS. Adler, B. 3, 4) will be spoken of later.

§ **IX. Narratives:** Here may be mentioned, besides the works spoken of in § II., and those to be discussed in connection with poetical productions, the story of Eldad ha-Dani, of which several copies exist (MS. Brit. Mus. Or. 4731; see "J. Q. R." vii. 119; MSS. Adler, B. 14, T. 60); T. 26, "Ma'asiyyot," Hebrew-Persian narratives about Maimonides, etc.; and T. 42, historical stories.

§ **X. Miscellaneous:** MS. Adler, T. 5, is designated "Hebrew-Persian Medical Dictionary." MS. Brit. Mus. Or. 2455 (see Margoliouth, "Descriptive List," p. 85) contains various Persian treatises in Hebrew characters on medicine. The same manuscript, dating from the year 1807, contains also the "Ta'bir Nameh," a translation of the book of interpretations of dreams ("Pitron Ḥalomot"), attributed to Hai Gaon. A dream-book in Persian, a translation by Simeon Ḥakam of Nathan Amram's "Sefer ha-Aḥlama" (a compilation from the "Pitron Ḥalomot" and from the "Mefashsher Ḥelmin" of Solomon Almoli), was published in Jerusalem in 1901. It also contains an extract from the "Sefer ha-Pirkus" (on convulsions; see Benjacob, "Oẓar ha-Sefarim," p. 602), likewise attributed to Hai Gaon. The preface states that the work was widely circulated in Bokhara and the adjacent districts in 1877 by the pious R. David Ḥefeẓ. A Persian translation of the "Sefer ha-Bal'i" (by an unknown author), with an appendix entitled "Seder ha-Yamim," accompanies the dream-book. The "Sefer ha-Bal'i" resembles the "Sefer Re'amim u-Re'ashim" of Isaac Ashkenazi. The "Seder ha-Yamim" is attributed on the title-page to Ḥayyim Vidal. In the field of superstitious literature belongs also MS. Adler, B. 25, "Hebrew-Persian Charms."

Poetry. § **XI. Modern Persian:** Modern Persian poetry, which, since Firdusi, has enriched the literature of the world with numerous works of the first rank, has made a lasting impression on the Persian-speaking Jews. The love of poetry and the attention given to its cultivation which have characterized Persian civilization down to the present day, distinguish also the Jews who live among Persian-speaking people, and the classics of Neo-Persian poetry have been warmly appreciated by them. Various manuscripts of the classics transcribed into Hebrew testify to this. The British Museum contains Hebrew manuscripts of Niẓami (Or. 4730) and of Ḥafiẓ (Or. 4745), both of them of the eighteenth century ("J. Q. R." viii. 119). In the Adler collection, T. 78 contains "Niẓami's Romance 'Khosraw and Shirin,' transliterated with twelve three-quarter-page illustrations, highly colored"; T. 77, "The story of Yusuf and Zulaikha by Jami, with an illumination"; T. 27, besides writings on Jewish subjects, the "Gulistan" of Sa'di; the diwan numbered T. 21 contains chiefly poems of Sa'di; T. 19 contains a great deal of the diwan of Ṣā'ib; T. 73 is "the story of the Prince of Bokhara"; B. 36, which will be mentioned again, is a collection of poems by Mohammedan and Jewish poets. Among the poems are the "ghazals" of Sa'di and poems by Ṭufaili, Sayyidi, Zinbu of Samarcand, Mushfiḳi (d. 1585; concerning him see Vambéry, "Gesch. Bokhara's," ii. 97), Shamsi, and others whose names are not given. There are also a poem, interesting from a historical point of view; an elegy by Ḥagi on the death of the Khan 'Ubaid Allah (d. 1711; see "Z. D. M. G." xxxviii. 342); and two narratives in prose: one with verses intermixed, the scene of which is laid in Samarcand in the "madrasah" of Mirza Ulug-Beg; the other by the above-mentioned Sayyidi, written in the year 1680. One of the Hebrew writers of these non-Hebrew works was Simḥah b. David ("Z. D. M. G." liii. 422-427).

Influence on the Jews.

It will be seen further on (§ XVII.) that toward the end of the seventeenth and in the first half of the eighteenth century Persian poetry was especially cultivated by the Jews of Bokhara. Characteristic of earlier times is the fact that Mollah Shahin (see below) incorporated a verse of Sa'di in his poem without further remark (Horn, in "Z. D. M. G." xlvii. 204). Despite the religious and social chasm separating them from the authors and cultivators of Persian literature, the Jews zealously devoted themselves to its productions and made them their own by transcribing them into Hebrew characters. So, in their own poetry, which was based on Jewish tradition, they closely followed the Persian national literature in language and meter, and, in a certain sense, contributed to it.

Epic Poetry.

§ XII. Those Judæo-Persian poems should first be mentioned in which the subject-matter is furnished by Biblical narratives. The chief representative of this Biblical epic poetry is Maulana Shahin Shirazi, a poet of the fourteenth century. Simeon Ḥakam, in the introduction to his Pentateuch translation (p. v. a), states that Shirazi completed his work in the year 1639 of the Seleucid era (= 1328 C.E.). He terms the work itself "Sefer Sharḥ 'al ha-Torah" (= "Commentary on the Pentateuch"), or simply "Sharḥ" (= "Commentary"). In MS. Brit. Mus. Or. 4742, which was finished in 1702 by Molla Amina, the work is entitled merely "Kitab Shahin" (= "Book of Shahin"); and the note of an owner of this manuscript cites it simply as "this Shahin" (see Seligsohn in "J. Q. R." xv. 286 *et seq.*). One of the introductory poems is written in praise of Sultan Bahadir Abu Sa'id of Shiraz, whose reign (1317–36) is considered the golden age of Persian poetry (see Hammer-Purgstall, "Gesch. der Ilchane," ii. 262 *et seq.*).

Shahin, a fellow countryman and an older contemporary of Ḥafiẓ, was plainly under the influence of this florescent period when he undertook to write the narrative parts of the Pentateuch in poetic form. He selected for it the "hazaj" meter, which is especially popular in the narrative poetry of the Persians, and the form of the couplet ("mathnawi"). He strictly follows the sequence of the weekly sections, and enriches the Biblical material with legends, such as occur in the "Sefer ha-Yashar," and with other additions. The whole work is divided into short chapters, each provided with a superscription. Three of these have been published by Seligsohn with an English translation ("J. Q. R." xv. 290–300). Simeon Ḥakam has published the first two parts, on Genesis (Jerusalem, 1903).

Molla Shahin.

In similar fashion Shahin did into poetry the post-Pentateuchal parts of the Biblical narrative. MS. Adler, T. 15, entitled "Milḥamot Adonai," contains "The Wars of Joshua with the Philistines [*i.e.*, Canaanites], Bible stories in Persian verse, by Muley Shahin." An incomplete manuscript in the British Museum (Or. 2453; see "R. E. J." xxiii. 279) contains an anonymous poetical redaction of the books of Samuel (as far as II Sam. v. 11), as has been demonstrated by Horn (in "Z. D. M. G." xlvii. 202-212), who has edited a portion of it (on I Sam. xxv.). The manuscript begins with a poem on Yusuf and Zulaikha, which Horn, on the strength of the catalogue (see Margoliouth, "Descriptive List," p. 69), considers to be a transcription from the work of Jami. It is very probable, however, that it is the corresponding portion from Shahin's poetical redaction of the Pentateuch. The manuscript also contains a versification of the Book of Ruth (before that of Samuel). The contents and form of the work show that Shahin is the author and that he undertook a poetical redaction of the whole Bible narrative.

A metrical redaction of the books of Esther and Ezra and of the Targum Sheni on Esther (MS. Adler, T. 27) should also be mentioned in this connection.

Sacred Poetry.

§ XIII. The translations of liturgical poetry occupy a large place in the Judæo-Persian writings. Two poems of Solomon ibn Gabirol were frequently translated: the "Azharot" and "Keter Malkut." MSS. Adler, B. 35 and 38, contain the text and Persian translation of the "Azharot." The latter of these manuscripts contains a translation of the first part of the "Azharot" ("Tafsir Shemor Libbi") by Samuel, son of the Molla Pir Aḥmad, under the title "Iḥtiraz Namah" (= "Book of Warning"); it contains also a translation of the second part of the same work ("Tafsir Be-Ẓel Shaddai Eḥeseh") by Manasseh, son of the Molla Solomon b. Eleazar, who was called also "Jami Kashmiri." MS. Adler, T. 29, contains "Tafsir Azharot, by Muley Benjamin ben M. Mishael" ("R. E. J." xliii. 101, note 2). T. 64 contains "Azharot by Nathanael b. Moses," an original Hebrew poem, and the translation in Persian by the author himself. The "Keter Malkut" was published in Jerusalem with a Persian translation by Solomon Babagan b. Phinehas in 1895 ("J. Q.R." x. 597). A translation of the same poem is also contained in MSS. Adler, T. 31 and 47. Perhaps the "'Ateret Malkut" of R. Joseph, called "Yadgar" (MS. Adler, T. 48), is another name for the "Keter Malkut."

The translator of the "Azharot," Benjamin b. Mishael, translated the "'Aḳedah" of Judah Samuel 'Abbas b. Abun (Zunz, "Literaturgesch." p. 216; "J. Q. R." xiv. 622) in 1718, and augmented the translation considerably with verses of his own. This translation was first edited in 1902 in Jerusalem. As an appendix are added the Persian translations of the "widdui" of Rabbi Nissim for the morning prayer of the Day of Atonement, and two other confessions of sin for musaf and minḥah of the Day of Atonement. Sabbath hymns with Persian translations are printed in "Seder Kebod Shabbat," published by David Ḥakam, Wilna, 1895 (Salemann, "Chudâidâd," p. iii., note 2).

Numerous metrical translations of various nonliturgical Hebrew poems are found in the Hebrew-Persian book of songs, which will be spoken of later, and in other collections (diwans), of which only the fact that they exist is as yet known. A few other works to be mentioned in this connection are: MS. Brit. Mus. Or. 4744, containing "Liturgical Poems in Hebrew and Persian" ("J. Q. R." vii. 119); MS. Paris 127, at the end of which is a Purim poem in Hebrew and Persian (see "Paris Cat." p. 13); MS. Adler, T. 3, "Baḳḳashot u-Pizmonim; Text and Translation"; and MS. Adler, T. 43, "Prayers, Hymns, etc., with Some Translation into Hebrew-Persian" (see above, § VIII.).

§ XIV. Independent Collections: The translations of liturgical and other religious poetry into Persian are often augmented so as to form independent poems. The literature of this kind contained in the manuscripts is still too little known for it to be possible to give an enumeration of the religious poetry of the Persian Jews that does not rest on a Hebrew basis. Seligsohn, from a Paris manuscript (No. 1356), has published the interesting work of a Persian poet, Moses b. Isaac (of unknown date), in which the "Azharot" of Gabirol are imitated ("R. E. J." xliii. 101 *et seq.*). It is a new redaction in Hebrew verse, to which a translation is added, a Persian tetrastich corresponding to each Hebrew distich. The whole is preceded by a Persian introductory poem. The poem proper, like the above-mentioned Persian translation of Gabirol's "Azharot," is entitled "Iḥtiraz-Namah." MS. Adler, B. 41, contains a poem by R. Benjamin—which is perhaps the original of the above-mentioned one of Benjamin b. Mishael—in Hebrew with Persian translation. MS. Paris 118 contains an elegy on the Ninth of Ab in Persian, interspersed with Hebrew words (Munk, *l.c.* p. 68; "Orient, Lit." vi. 619). In MS. Brit. Mus. Or. 4729, the above-mentioned Persian translation of the Psalms is followed by "several liturgical poems in the same language" ("J. Q. R." vii. 119).

§ **XV. Diwans:** The Adler collection contains a considerable number of compilations of songs, briefly termed "diwans"; and only here and there is a scanty designation of their contents given. They are comprised in the following Adler manuscripts, all of them from Teheran: T. 4, "Poems, Problems"; T. 6, "Diwan of Muley Solomon"; T. 8; T. 17; T. 22; T. 30, "Hebrew-Persian diwan of Israel b. Moses, Samuel b. Nissim, Moses b. Joseph ha-Levi, Refuah Cohen b. Eleazar, Elisha b. Samuel, etc."; T. 40; T. 51-52, "Hebrew-Persian Prayers, Poems, etc."; T. 63, "Hebrew and Hebrew-Persian Diwan, inter alios Abraham, David b. Ma'amin"; T. 72; T. 74, "Seventy Songs from Yezd."

Of the manuscripts brought from Bokhara, B. 18, "Hebrew and Hebrew-Persian Diwan, Shirot," belongs here. B. 38 is a collection (written in Meshed, *c.* 1806) containing "Hebrew and Persian piyyuṭim for weddings, circumcisions, etc." As authors are mentioned: Siman-Ṭob, Israel b. Moses, Shabbethai Ṣaliḥ, and Abraham b. Levi. B. 13 contains ninety-one poems in Hebrew, Hebrew and Persian, and Persian alone.

Najjarah.

Many of the poems of this collection are also found in "Yismaḥ Yisrael" (Jerusalem, 1901), by Israel b. Abraham of Yezd, a collection of songs used by Persian Jews on festive occasions ("J. Q. R." xiv. 116-128). Of the sixty-three poems in the book only a very small number are Persian, although many of the Hebrew poems are followed by Persian translations. Many of the Hebrew poems are by Israel Najjarah; eight are accompanied by a Persian rendering; and "Molla Joseph" or "Molla Joseph the poet" (who is none other than Yusuf Yehudi of Bokhara) is named as the translator of four of them. Among those of Israel Najjarah, the Aramaic Sabbath song, "Yah Ribbon 'Alam," is reprinted in Persian translation in "J. Q. R." xiv. 126. Two others of his, from the collection "Yismaḥ Yisrael," have been published with their translations by Raḥamim b. Elijah (Bacher, in "Z. D. M. G." lv. 241-257; comp. *ib.* lvi. 729). Other authors of Persian poems or Persian translators whose works are found in this collection are: (1) Siman-Ṭob, who mentions, as a source of his "Ḥayat al-Ruḥ," a collection of songs by Israel Yezdi (see "Zeit. für Hebr. Bibl." v. 152). The collection has Hebrew poems of his accompanied with his own Persian translations. (2) Benjamin Amina: a prayer for the master of the house. (3) Tobiah: a "ghazal." (4) Judah: a Hebrew and Persian poem ("J. Q. R." xiv. 127). (5) Manasseh of Kashmir, also called "Jami Kashmiri" (see § XIII.): translations of two poems of Israel Najjarah, one of which is dated 5564 (= 1804). (6) Molla Amin: translation of a poem of Jonah, in which the curious rime of the original is imitated. Where the translator is not named, as in certain poems of Najjarah and in the "'Aḳedah" of Ephraim b. Isaac, the translator is probably Yusuf Yahudi or Siman-Ṭob. The anonymous Persian poems which the collection contains do not show Jewish religious color either in their subject-matter or in their language. Among the authors who contributed only Hebrew poems may be mentioned Shakirsh (on account of his remarkable name, which perhaps is connected with the Persian word "shagird") and Elisha b. Samuel.

Yusuf Yahudi.

§ **XVI.** Of these poets Molla Joseph b. Isaac deserves special attention. Under the name Yusuf Yahudi (= "Joseph the Jew") he was highly regarded even in non-Jewish circles. His name is at times accompanied with the epithet "sha'ir" (poet). In a Hebrew note, found in MS. Adler, B. 16, it is stated that Joseph b. Isaac wrote the "Seven Brothers" in the year 5448 (= 1688), and the two works "Sharḥ (?) Antiochus" and "Sharḥ Mosheh Rabbenu," sixty-one years later (5509 = 1749). He died on the eleventh of Nisan, 5515 (= 1755), and must therefore have reached the age of ninety. The last two works mentioned in the note have not yet been found. The one was plainly a redaction of the Antiochus Megillah (see above, § III.); the other, a poetical rendering of the life of Moses. The name "Sharḥ" (= "commentary") is the same as that of the work of Shahin (see above, § XII.). On the other hand, Yusuf's early work, the "Seven Brothers" ("Heft Biraderan" or "Heft Daderan"; also with Hebrew title "Shibe'ah Aḥim"), has been preserved in several copies (MSS. Adler, B. 7, B. 11, B. 16, B. 28, B. 51; fragment in B. 15), and was printed in Jerusalem in 1884 (see "J. Q. R." x. 588, 597). The poet says that he completed his work on the eighth of Ab, 5448 (= 1688), the day before the fast-day upon which it was to be read. This work, treating of the celebrated martyrdom of the seven brothers and their mother, is based on the narrative of the Palestinian midrash, Ekah Rabbati, to Lam. i. 16 (Bacher, "Jüdische Märtyrer im Christlichen Kalender," in "Jahrb. für Jüdische Gesch. und Litteratur," 1901, iv. 70-85). Another poem of Yusuf's which shows much similarity to the "Seven Brothers" in its phraseology is the eulogy of Moses, entitled "Mukhammas" (ed. Bacher, in "Z. D. M. G." liii. 396 *et seq.*) on account of its strophic form, containing twenty strophes of five lines each. MS. Adler, B. 36, contains also more than a dozen poems composed by Yusuf Yahudi. Part of them have the same strophic form as the eulogy of Moses. One is an elegy (1732) on a Molla Leṭifi, aged eighty-eight. Two poems have distinctly religious contents: a song for Sabbath and an Elijah song for the close of that day (see "Z. D. M. G." liii. 389-396). For Yusuf's translations see § XV.

§ XVII. In the note concerning Yusuf Yahudi, spoken of in the preceding paragraph, mention is also made of his associates ("ḥaberim"), probably meaning his poetical contemporaries. These latter are Molla Uzbek, Molla Elisha, and Molla Solomon. "It was this last who wrote a 'Sharḥ Antiochus' after Molla Joseph's work of the same name had appeared. They all died in Bokhara." Elisha is probably identical with the Elisha b. Samuel referred to in § XV.; and Molla Solomon is probably the author whose diwan is mentioned in the same section.

Other poets whose works are found in MS. Adler, B. 36, and who probably belong to the same circle, are: David b. Abraham b. Maḥji, who wrote an Elijah song in Hebrew and Persian strophes, and Uzziel, two of whose Elijah songs are given in "Z. D. M. G." liii. 417-421. These are the same in form as the Elijah songs of Yusuf Yahudi and of David b. Abraham. At the head of the collection of Bokhara Elijah songs is the poem of Benjamin Amina, mentioned above (§ XV.). With them is placed a short poem by the same author written in Hebrew verses interspersed with Persian (reprinted in "Z. D. M. G." liii. 420 *et seq.*; see also "J. Q. R." xiv. 123). The Molla David, several of whose poems are contained in this collection, is plainly identical with the David b. Abraham mentioned above. His poems include a "ḳaṣidah" in praise of Moses, and three pieces designated as "ḳaṣidahs," but which are really prose pieces, consisting of rather long paragraphs, each ending with the same rime and containing observations and exhortations. The same form of rimed prose is also found in a poem of Yusuf Yahudi; but there it is designated as "ṭawil." Of the poems given without their authors' names may be mentioned an elegy (perhaps by Yusuf Yahudi) on a Molla A'ta, a pious scholar who died on the 25th of Kislew, 1689.

Records of Persecution.

§ XVIII. The facts given in the last two sections seem to show that the Jews of Bokhara in the second half of the seventeenth and in the first half of the eighteenth century lived in comparatively favorable circumstances, and could cultivate Persian poetry without considerations of creed. In Persia proper, however, during the same period, they suffered oppression and repeated persecution, as appears from two remarkable poems written at the time in the same form of the "mathnavi" as are the Biblical poems of Molla Shahin (MS. Paris 1356, written in 1342; the first one also in MS. Adler, 291). Seligsohn has published four extracts from them with a French translation ("R. E. J." xliv. 87-103, 244-259). The longer one relates, in more than twenty divisions, the persecutions endured by the Jews in Ispahan under the rule of Abbas I. (d. 1628) and during the whole of the reign of Abbas II. (d. 1666). He also relates, in chronological order, the persecutions suffered by the Jews in the cities of Hamadan, Shiraz, Ferahabad, Kashan, and Yezd. Other extracts from the work of Babai are published by Bacher ("Une Episode de l'Histoire des Juifs de Perse") in "R. E. J." xlvii. 262-282. The poet was born in one of these cities: the heading of the work calls him "Babai b. Luṭf, known as the Kashani." The work has no title; it is designated simply "Gufta-i Babai" (= "Narrative of Babai"). The same is the case with the second work, the author of which is called in the superscription "Babai b. Ferhad." He describes the persecutions of the Jews under the Afghan dynasty of Maḥmud, Ashraf, and Ṭahmasp II. (1722-32). The Paris MS. contains also a poem composed by Mashiaḥ b. Raphael in honor of Abraham ha-Nasi.

A short poem of Babai b. Luṭf's is contained in MS. Brit. Mus. Or. 4731 (see "R. E. J." xliv. 88, note 2). This Teheran manuscript contains among other things "Timsal Namah, known as the 'Story of the Seven Viziers,' in the redaction of Rabbi Judah" ("J. Q. R." vii. 169). This is perhaps the same Judah whose bilingual poem has been mentioned above (§ XV.). The same manuscript contains further a work entitled "Maḥzan al-Pand." MSS. Brit. Mus. Or. 4732, 4744, from Teheran (of the year 1812), contain a metrical redaction of Abraham b. Ḥasdai's "Ben ha-Melek weha-Nazir" ("J. Q. R." *l.c.*). The Adler collection has four copies of this work—the Persian title of which is "Shahzada wa-Ṣufi"—likewise from Teheran (T. 18, 20, 41, 75).

Chudâidâd.

§ XIX. In the eighteenth century or at the beginning of the nineteenth, during the reign of Emir Ma'ṣum (d. 1802), the Zealot ruler of Bokhara, a pious and learned man by the name of Chudâidâd (Hebr. "Nathaniel") suffered martyrdom because he refused to embrace Islam, which, it was falsely said after his death, he had accepted. This occurrence was celebrated by a Bokhara poet, Ibrahim Abu al-Khair, in a poem containing nearly 400 double lines. It is in contents and meter of the same character as the two Babai poems referred to in the foregoing sections (ed. C. Salemann, in the "Mémoires de l'Académie Impériale des Sciences de St. Pétersbourg," 7th series, vol. xlii.; comp. extracts by Nöldeke in "Z. D. M. G." li. 548-553, and corrections by Bacher, *ib.* lii. 197-212; see, also, "Zeit. für Hebr. Bibl." iii. 19-25). Of a longer poem by Ibrahim Abu al-Khair, completed on the eighth of Shebaṭ, 5569 (= 1809), only the introductory parts are extant, one of which is devoted to the praise of the ruler of Bokhara (see Salemann, *l.c.* pp. iv.-v.).

In MS. Adler, B. 11, the Chudâidâd poem has the superscription: "In memory of ["bi-yadi"] Molla Chudâidâd, the pious." Then follows a poem twelve pages long with a similar superscription: "In memory of Molla Isḥaḳ Kemal; may he rest in Eden."

Modern Literature.

The year 1893, in which the Jews of Bokhara founded a large colony in Jerusalem, marks the beginning of a new epoch in their literary activity. Many of them consider it a pious task to care for the education and edification of the Jews in their native country by publishing liturgical and other writings in the popular tongue of Persia. Among the Bokhara Jews living in Jerusalem, Simeon Ḥakam stands preeminent as an editor and translator.

§ XX. The following is an alphabetical list of the authors mentioned in this article, with references to the sections in which they are treated:

Abu Sa'id (13th or 14th cent.), 5.
Amin, 15.
Baba b. Nuriel (1740), 2.
Babai b. Ferhad (c. 1730), 18.
Babai b. Luṭf Kashani (1665), 18.
Benjamin, 14.
Benjamin Amina (18th cent.), 15, 17.
Benjamin b. Johanan ha-Kohen (1883–85), 2.
Benjamin b. Mishael (1718), 13, 14.
David, 17.
David b. Abraham b. Maḥji (18th cent.), 17.
David Ḥakam (1895), 13.
David b. Ma'min, 15.
Eleazar ha-Kohen, 6.
Elisha (18th cent.), 17.
Elisha b. Samuel, 8, 15.
Ibrahim Abu al-Khair (1809), 19.
'Imrani, 6.
Israel b. Abraham of Yezd (1901), 15.
Israel b. Moses, 15.
Jacob b. Joseph. See Tawus.
Jacob b. Paltiel, 6.
Joseph b. Isaac. See Yusuf Yahudi.
Joseph b. Moses (1319), 1.
Joseph Yadgar, 13.
Judah, 15, 18.
Khawajah Bukhari, 3.
Manasseh b. Solomon b. Eleazar Kashmiri (1804), 13, 15.
Mashiaḥ b. Raphael (18th cent.), 18.
Moses b. Aaron b. She'erit of Shirwan (1459), 5.
Moses b. Isaac, 14.
Moses b. Joseph ha-Levi, 15.
Nathanael b. Moses, 13.
Raḥamim b. Elijah (1899), 8, 15.
Refuah Cohen b. Eleazar, 15.
Samuel b. Pir Aḥmad, 13.
Shabbethai Ṣaliḥ, 15.
Shahin Shirazi (1328), 12.
Shakirsh, 15.
Siman-Ṭob, 15.
Simeon Ḥakam (1903), 1, 2, 6, 7, 10.
Solomon (18th cent.), 15, 17.
Solomon Babagan b. Phinehas of Samarcand (1895), 2, 13.
Solomon b. Samuel of Urgenj (1339), 5.
Tawus, Jacob b. Joseph (16th cent.), 1.
Tobiah, 15.
Uzbek (18th cent.), 17.
Uzziel (18th cent.), 17.
Yusuf Yahudi of Bokhara (d. 1755), 15, 16, 17.

G. W. B.

JUDÆO-SPANISH LANGUAGE (LADINO) AND LITERATURE: Judæo-Spanish is a dialect composed of a mixture of Spanish and Hebrew elements, which is still used as the vernacular and as a literary language by the Sephardim or "Spagnioli," descendants of the Jews expelled from Spain and now scattered throughout Turkey, Servia, Bosnia, Bulgaria, Palestine, and Morocco. The language to which it has the greatest similarity is the Old Spanish or Castilian of the fifteenth century; and it is frequently designated as "idioma Español," "lengua Castellana," or "lengua vulgar." Judæo-Spanish resembles the much more corrupted Judæo-German in that it includes many old Hebrew and Talmudic words, particularly such as have been transmitted from generation to generation or can not be exactly translated into another language; *e.g.*, "ḥen," "raḥmonut," "ẓedaḳah." It differs from modern Spanish in that it contains many Old Spanish forms and words which were still current in Castile toward the end of the fifteenth century, at the time when the Jews were expelled from Spain, but which have entirely disappeared from the vocabulary of modern Spanish, or which are now very rarely used; *e.g.*, "fruchiguar," "ermollecer," "escuentra," "muchiguar," "podestania," "pecilgo" (= Spanish "pellizco"), "espandir," etc.

One of the characteristics of Ladino is that it contains words taken from the Hebrew and Spaniolized; *e.g.*, "meldar" (to read), "meldador" (the reader), "melda" (school), "darsar" (from the Hebrew root דרש = "to investigate," "to instruct"), "chanufer" (from חנף = "the flatterer")—words occurring frequently in Judæo-Spanish, but not found in Spanish proper. Some Spaniolized Hebrew words, however, have become current in Spain and Portugal; for example, "malshin" (= Spanish "malsin," Portuguese "malsim," accuser, slanderer), and its derivatives "malsinar" and "malsindad"; the rabbinical "geṭ" (Spanish "guet"), and others.

Old Spanish Phonetics.

In Judæo-Spanish, as in Old Spanish, "f" and "g" are each used instead of "h"; *e.g.*, "fijo" instead of "hijo"; "fablar" instead of "hablar"; "fambre" instead of "hambre"; "fermosa" instead of "hermosa"; "agora" instead of "ahora." The letter "h," whether occurring at the beginning or in the middle of a word, is frequently omitted, as in "ermano" for "hermano," and in "conortar" for "conhortar." Often "m" changes into "n," as in "muestros" for "nuestros," "mos," "muevo," for "nos," "nuevo"; "m" and "n" are sometimes inserted, as "amvisar" for "avisar," "munchos" for "muchos." Metathesis of "d" before "r" takes place, as "vedrad," "vedre," "acodro," "pedrer," for "verdad," "verde," "acordo," "perder"; or of "r" before "o," as "probe" for "pobre," "proberia" (still used in Galicia) for "pobreria." "b" is not seldom used for "v," as "biuda," "bolar," instead of "viuda," "volar." For the study of Old Spanish, Ladino is a rich mine that has not yet been sufficiently explored. For the Turkish words which have entered the Ladino vocabulary, see Danon in "Keleti Szémle," iv. 215 *et seq.*

Ladino is written in the so-called Spanish cursive characters, and is printed generally in rabbinical, though sometimes in square, Hebrew characters, and not seldom in Latin letters. One of the phonetic characteristics of this dialect is the change of the Spanish "ll" to "y"; *e.g.*, "cabayero" for "caballero," "estreya" for "estrella" (the same change takes place in the Spanish of Andalusia). In printing with Hebrew or rabbinical characters this sound is represented by a "lamed" and a double "yod" (ליי); *e.g.*, לייאמאר for "llamar"; לייבאר for "llevar"; קאליי for "calle" (street). Instead of "q" preceding "e" and "i," קי is used, as קי for "que"; אקי for "aqui"; קיין for "quien"; "s" is used instead of "z" and "c," as in "sielo," "cabeson," for "cielo," "cabezon"; while ז̇, pronounced "j," is used instead of "y" and "g" before "e" and "i," as מוזיר for "muger"; איזו for "hijo." The letter "r" is not doubled in Ladino.

A comparatively rich literature, which arose at the beginning of the sixteenth century and is still diligently cultivated, exists in Ladino. For several centuries this literature was confined to translations. The first work published in Judæo-Spanish, a translation of the ritual rules for slaughtering (Constantinople, 1510, and reprinted several times at Venice, Pisa, London, Amsterdam), was designed to meet immediate religious needs. The translation of the Pentateuch in Hebrew vocalized square characters (Constantinople, 1547) was the first larger work which the Sephardic Jews of Turkey published in the language "which the old Jews use." Twenty years later the entire Bible was published in several parts, the third of which included the Later Prophets. This translation, which agreed almost entirely with the one that appeared at Ferrara in Latin letters in 1553, was followed by another, in four parts (Constantinople, 1739–45), in Ladino ("entero bien Ladinado"); seventy years later Israel

Ladino Literature; Bible.

b. Ḥayyim of Belgrade issued a translation (Vienna, 1813–16); the Constantinople edition was reprinted at Smyrna in 1838 *et seq.*, and again at Constantinople in 1873, all of these being in Rashi characters. New translations and reprints of single books of the Bible were frequently issued: the Pentateuch or "Humas de Parasioth y Aftharoth," generally in Latin letters, eight times at Amsterdam between 1627 and 1733; the Psalms at Salonica in 1582, several times at Amsterdam since 1628, at Vienna 1822 and often, at Constantinople 1836; the Megillot with Ladino translation, *ib.* 1813; and especially Canticles ("Cantares de Selomoh"), which was used in the liturgy, and printed with the Aramaic paraphrase about twenty times, beginning with 1619, at Venice, Amsterdam, Hamburg, Leghorn, and Vienna. A Judæo-Spanish translation of the apocryphal Ecclesiasticus (Sirach), after Ben Zeeb's Hebrew version, was first made by Israel b. Ḥayyim of Belgrade (Vienna, 1818).

Liturgy.

Contemporaneously with the Judæo-Spanish translation of the Bible that of the prayers for the whole year and for Rosh ha-Shanah and Yom Kippur was issued by the same establishment at Ferrara (1553). The prayers, "Orden de Oraciones de Todo el Anno" or "De Oraciones de (del) Mes," and "Orden de las Oraciones Cotidianas," were printed and frequently reissued at Ferrara, at Venice, especially at Amsterdam, and later at Vienna, in various sizes, generally in Latin letters, occasionally in vocalized Hebrew square characters. Sometimes calendars for twenty years or more were added. In the course of time there appeared special translations of: the "selihot" or penitential prayers (Venice, 1552; Amsterdam, 1666; Vienna, 1865); the "ma'amadot" (Venice, 1609; Amsterdam, 1654, and frequently); the Pesaḥ Haggadah (Amsterdam, 1622; Venice, 1629, and frequently there as well as in Leghorn, Vienna, and London); the prayers for the vigils (Hamburg, 1662; Amsterdam, frequently); prayers for the fast-days (Venice, 1623; Amsterdam, 1630, and often); the various blessings, "Orden de las Bendiciones" (Amsterdam, 1640, 1650, and frequently); the "azharot," recited by the Sephardim at Shabu'ot (Venice, 1753; Leghorn, 1777); the Sephardic prayers and songs on the 15th of Shebaṭ, under the title "Peri 'Eẓ Hadar" = "Fruit of the Tree Hadar" (Venice, 1766; Belgrade, 1865); and others. Threnodies and prayers for special occasions, as those recited every year in memory of the earthquake at Leghorn (Jan., 1742), were also translated (Pisa, 1746). The "Peraḳim" or "Sayings of the Fathers," which also served for liturgical purposes, were often translated (first by Moses Belmonte, Amsterdam, 1644), sometimes together with the Book of Ruth or Canticles (Amsterdam and London), but generally alone, and always with the Hebrew text (Venice, Amsterdam, Pisa, Belgrade, and Salonica).

Extracts from Joseph Caro's Shulḥan 'Aruk were translated under the title "ליברו ליאמאדו אין לשון הקדש שלחן הפנים y en Ladino Mesa de el Alma," in order to enable the women and the men who did not know Hebrew to become acquainted with the religious rules and ceremonies (Salonica, 1568; Venice, 1602). In 1609 Moses Altaras issued a revised edition at Venice under the title "Libro de Mantenimiento de la Alma." Joseph de David Pardo compiled a "Compendio de Dinim que Tcdo Ysrael Deve Saber y Observar," which was published by his son David Pardo of London (Amsterdam, 1689). Isaac Nombrado translated the entire ritual code Oraḥ Ḥayyim under the title "שלחן המלך Mesa del Rey, en Ladino Claro, con su הגהה" (Constantinople, 1744).

Apologetics and Homiletics.

An apologetic work, "Fuente Clara," which is now very rare, appeared anonymously at the end of the sixteenth century; and at the beginning of the seventeenth century Isaac Troki's "Ḥizzuḳ Emunah" was translated into Spanish by Isaac Athias. A Ladino translation of the latter work was published by Isaac Emaraji at Smyrna about 1840. Fifteen years later a refutation of McCaul's "Old Paths," made necessary by the efforts of the missionaries, was published at the same place by Raphael b. Elia Katsin.

Books of an ethico-religious nature were published in Ladino, partly as independent works, partly as translations of earlier ones. The initial work was the "Regimiento de la Vida" by Moses Almosnino, which "contains everything that it is necessary for man to know in order to travel the whole journey of life without neglecting his duties." This work was first printed in rabbinical script (Salonica, 1564), with a long treatise on dreams, in the form of a letter to Don Joseph Nasi, at whose request it was written; a revised edition in Latin letters was published at Amsterdam in 1729. Baḥya's "Ḥobot ha-Lebabot," or "Obligacion de los Corazones," translated into Ladino by Ẓaddiḳ b. Joseph Formon before the end of the sixteenth century, and printed at Constantinople, was republished several times (Amsterdam, 1610; Venice, 1713; Vienna, 1822) and was also translated into Portuguese (Amsterdam, 1670). Jacob Ḥagiz translated Isaac Aboab's "Menorat ha-Ma'or" "en lengua bulgar," under the title "Almenara de la Luz," at Leghorn in 1656 (2d ed., Amsterdam, 1708). "Shebeṭ Musar" was translated at Constantinople about 1740 and at Smyrna in 1860, and the popular "Ḳab ha-Yashar" (as "Castigerio Hermoso con Mucho Consuelo") at Constantinople in 1857. Isaac de Moses de Pas issued a kind of religious manual, containing Maimonides' Thirteen Articles of Faith, an explanation of the feast- and fast-days and of the Ten Commandments, in Hebrew and Judæo-Spanish (Leghorn, 1764), and "Medicina de Lengua, Arbol de Vidas" (*ib.* 1734), a compendium in defense of the Hebrew language. The foremost work of Judæo-Spanish literature is "Me'am Lo'ez," an exegetic-midrashic-ethic-homiletic encyclopedia, to which Jacob Culi and several other scholars contributed, and which passed through several editions (see CULI).

One of the earliest poetic works in Ladino is the rimed story of Joseph, "Coplas de Joseph ha-Zaddik (el Justo)," by Abraham Toledo (Constantinople, 1732). Judæo-Spanish literature is comparatively rich in songs—"coplas," "cantares," "roscas"—for Purim, with carnival games composed for the occasion. The first "Coplas de Purim" appeared about 1700. J. Clava wrote "Cancio de Purim," consist-

Poetry.

ing of 110 verses (Amsterdam, 1772); a "Compendio de la Alegria" appeared at Leghorn in 1782; another, at the same place in 1792 and 1875; "Roscas de Purim" was published at Vienna in 1866; and "Coplas Nuevas," at Salonica in 1868. Many other religious and secular poems in Ladino are still extant in manuscript. There are also many Judæo-Spanish proverbs, of which some have been collected and transcribed into Spanish in Kayserling's "Refranes ó Proverbios Españoles de los Judios Españoles" (Budapest, 1889); they have appeared amplified in R. Foulché-Delbosc's work "Proverbes Judéo-Espagnols" (Paris, 1895); and an additional collection has been published by A. Danon ("Recueil de Romances Jud.-Espan." in "R. E. J." xxxii. 102 *et seq.*, xxxiii. 122 *et seq.*).

Philosophy and Grammar.

In the first decades of the eighteenth century a desire for culture and education was gradually awakened in the Judæo-Spanish-speaking Jews of the East; Judæo-Spanish literature was in consequence filled with new life, and many Judæo-Spanish works were published at Vienna, Belgrade, and especially at Constantinople, Salonica, and Smyrna. As the Cabala and mysticism are wide-spread in the East, mystical and cabalistic works were at first most largely published. Even most of the books on morals published more recently are mystical in character; *e.g.*, the anonymous "Miḳra Ḳodesh" (Constantinople, 1818); Immanuel Salem's "Ṭobah Toḳaḥah" (Salonica, 1850), containing passages from the Talmud, Midrash, and Zohar, arranged according to the pericopes; Ḥayyim Abraham Uzziel's "Meḳor Ḥayyim" (Salonica and Smyrna, 1859–61), in four parts; Isaac Farḥi's "Zekut u-Mishor" (Smyrna, 1850); "Imre Binah" (Constantinople, 1863); and the works of the pious Eliezer Papo, as "Dammeseḳ Eliezer" (Belgrade, 1850), and "Pele Yo'eẓ" (Vienna, 1870), translated in part by his son. Elia de Vidas' mystico-cabalistic work "Reshit Ḥokmah" was printed as early as 1703 (Constantinople); that on the death of Moses, in 1763 (*ib.*). The story of the birth and youth of the cabalist Isaac Luria appeared at Smyrna in 1765; and the biography of Israel Shem-Ṭob (Besht) at Belgrade in 1852. As the reading of the "holy" Zohar was regarded as conducive to salvation, an extract therefrom, "Leḳeṭ ha-Zohar," was translated into Ladino (Belgrade, 1859, 1861). It is characteristic of the cultural status of the Jews of the East that a small medical work containing recipes for charms appeared in Ladino (Smyrna, 1865).

Miscellaneous Works.

The first Hebrew grammar in Ladino was published at Vienna in 1823; it was followed by several others (Smyrna, 1852; Bucharest, 1860), and by a "Diccionario de la Lengua Santa" (Constantinople, 1855), the explanations of each word being given in "la lengua Sephardis." Juvenile and popular works also were issued; *e.g.*, a Biblical history (*ib.* 1854), a compendium on astronomy (*ib.* 1850), one on astrology (*ib.* 1847), and an arithmetic (Belgrade, 1867). The Jewish chronicle "Shebeṭ Yehudah," which M. de Leon had translated into Spanish as early as 1640, was transcribed into Judæo-Spanish (Belgrade, 1859), and the "Libro de Acontecimientos de Sabbatai Zewi," on the experiences of Shabbethai Ẓebi, was also translated (Salonica, 1871). Eldad ha-Dani's legendary account of the Ten Tribes in farther Asia was translated into Ladino as early as 1806, a second edition being published at Salonica in 1860; and there also Kalonymus b. Kalonymus' treatise "Iggeret Ba'ale Ḥayyim" was published for the third time in a Judæo-Spanish translation. A short history of the Ottoman empire was issued for the instruction of the people (Salonica, 1860; Constantinople, 1873), and was edited by David Ḥazzan at Smyrna in 1887. Judah Nehama translated from the English a "Historia Universal" (*i.e.*, of Asia; Salonica, 1861); a history of Alexander the Great was translated from the Hebrew (*ib.* 1857); one of Napoleon III., from the French (Belgrade, 1860); and S. Bloch's geography of Asia and Africa was translated by Isaac b. Amaragi (Salonica, 1853, 1857). Several biographies of famous men, as Moses Montefiore, Adolphe Crémieux, and Albert Cohn, whose philanthropies extended also over the East, were written in Judæo-Spanish.

In the last quarter of the nineteenth century novels, stories, and dramas (Racine's "Esther," Molière's "L'Avare") were translated from the French and Hebrew or were worked over independently. The "Historia de Mille y Una Noche" was translated about 1855. Works in Judæo-Spanish in rabbinical script were and still are issued for the conversion of the Jews by the Scotch Missionary Society, which has also published in Ladino "El Manadero," a partly scientific review dealing with Jews and Judaism (Constantinople, 1855, 1885). A number of periodicals are published in Ladino.

JUDAH (יהודה = praised [?]; comp. Gen. xxix. 35, xlix. 8).—**Biblical Data:** The fourth son of Jacob and Leah; born in Padan-aram (Gen. xxix. 35). It is he who suggests the sale of Joseph to the Ishmaelite traders. He becomes surety for Benjamin, and prevails upon his father to let him go down to Egypt according to the request of Joseph, after Reuben has failed (*ib.* xliii. 3–14). In subsequent interviews with Joseph, Judah takes a leading part among the brethren (*e.g.*, "Judah and his brethren," *ib.* xliv. 14), and makes a most touching and persuasive plea for the release of Benjamin (*ib.* xliv. 16–34). In Jacob's blessing (*ib.* xlix.) he seems to be exalted to the position of chief of the brethren, owing apparently to the misconduct of Reuben and the treacherous violence of Simeon and Levi (see *ib.* xxxiv., xxxv. 22; comp. *ib.* xlix. 4, 5–7), who thereby forfeit the birthright. Success in war, booty (under the figure of the lion's prey), the hegemony, at least for a time, among the clans of Israel, and residence in a rich vine-growing and pastoral country are promised to his descendants (*ib.* xlix. 8–12).

According to Gen. xxxviii., he married the daughter of the Canaanite Shuah, by whom he had three sons, Er, Onan, and Shelah. Er married Tamar, but died childless. According to custom his widow was given in marriage to his brother Onan, who was slain for misconduct; and she was then promised to the third son, Shelah. This promise not having been fulfilled, she resorted to stratagem, and became by Judah the mother of Pharez and Zarah. Pharez was ancestor of the royal house of David (Ruth iv. 12, 18–22; I Chron. ii. 3–16).

E. G. H. J. F. M.

——**In Rabbinical Literature:** Judah was born on the fifteenth day of the third month (Siwan), in the year of the Creation 2195, and died, at the age of 119, eighteen years before Levi (Book of Jubilees, xxviii. 15, for the date of birth only; Seder 'Olam Zuṭa; Midr. Tadshe, in Epstein, "Mi-Ḳadmoniyyot ha-Yehudim," Supplement, p. xxiii.; "Seder ha-Dorot," i. 47; comp. Test. Patr., Judah, 12). In the "Sefer ha-Yashar," section "Shemot," p. 104b (Leghorn, 1870), however, it is said that Judah died at the age of 129, eighty-six years after he went to Egypt.

His Name.

Judah's name is interpreted as a combination of "Yhwh" (given as a reward for his public confession, Gen. xxxviii. 26) with the letter "dalet," the numerical value of which is 4, Judah being the fourth son of Jacob (Soṭah 10b; Yalḳ., Gen. 159). With reference to I Chron. v. 2, Judah is represented by the Rabbis as chief over his brothers, who obeyed him and who did nothing without his approval; he is styled "the king" (Gen. R. lxxxiv. 16; Test. Patr., Judah, 1). He is therefore held responsible by the Rabbis for the deception that his brothers practised upon their father by sending to him Joseph's coat dipped in the blood of a kid (Gen. xxxvii. 31–32). Judah was punished for it in a similar manner, Tamar sending to him his pledge, saying, "Discern, I pray thee, whose are these" (*ib.* xxxviii. 25; Gen. R. lxxxiv. 19, lxxxv. 12). The death of his wife and his two sons (Gen. xxxviii. 7–12) is also considered by Tanḥuma (Tan., Wayiggash, 10) as a divine retribution for the suffering which he caused his father by selling Joseph. According to Gen. R. xcv. 1 and Tan., *l.c.*, Jacob suspected Judah of having killed Joseph; Tanḥuma even adds that it was Judah himself who brought Joseph's coat to Jacob. Judah's attempt to rescue Joseph (Gen. xxxvii. 26) is considered insufficient; for, as he was the chief, he should have brought Joseph on his shoulders to his father (Gen. R. lxxxv. 4). His brothers, on seeing their father's grief, deposed Judah and excommunicated him, saying: "If he, our chief, had ordered us to bring Joseph home, we would have done so" (Ex. R. xlii. 2; Tan., Wayesheb, 12). Judah atoned for that fault by confessing that it was he who had given Tamar the pledge; and he was rewarded for that confession by a share in the future world (Soṭah 7b). "Bat Shua'" (Gen. xxxviii. 12), according to Jubilees, xxxiv. 20, was the name of Judah's wife, while in "Sefer ha-Yashar" (section "Wayesheb") her name is given as "'Illit." Judah was the first to institute the levirate marriage (Gen. R. lxxxv. 6).

Judah is furthermore represented as a man of extraordinary physical strength. When he shouted his voice was heard at a distance of 400 parasangs; when he became angry the hair of his chest became so stiff that it pierced his clothes; and when he took into his mouth lumps of iron he reduced them to dust (Gen. R. xciii. 6). According to others, blood flowed from his two bucklers (*ib.* xciii. 7). He was a prominent figure in the wars between the Canaanites and his father's family after the latter had destroyed Shechem. These wars are alluded to by pseudo-Jonathan (on Gen. xlviii. 22) and in Midr. Wayissa'u (Jellinek, "B. H." iii. 1–5), and are described at great length in "Sefer ha-Yashar," section "Wayishlaḥ" (see also Jubilees, xxxiv. 1–9; Test. Patr., Judah, 3–7). Judah's first remarkable exploit was the killing of Jashub, King of Tappuah. The latter, clad in iron armor, came riding on a horse and shooting arrows with both hands. While still at a distance of thirty cubits (according to Midr. Wayissa'u, 177½ cubits) from him, Judah threw at Jashub a stone weighing sixty shekels, unhorsing him. Then in a hand-to-hand fight Judah killed his adversary. While he was stripping the armor from the body, he was assailed by nine of Jashub's companions, of whom he killed one and put to flight the rest. Of Jashub's army he killed 1,000 men (comp. Test. Patr., *l.c.*), or, according to "Sefer ha-Yashar" (*l.c.*), forty-two men. Great exploits were performed by him at Hazar and Gaash, where he was the first to jump upon the wall and create havoc among the enemy. Midr. Wayissa'u describes also the battle between the children of Jacob and those of Esau, in which the chief part was taken by Judah. When Judah interfered in behalf of Benjamin (Gen. xliv. 18–34), he at first had a heated discussion with Joseph, which is given at great length in the "Sefer ha-Yashar" (section "Wayiggash," agreeing in many points with Gen. R. xciii. 7). The following incidents may be mentioned: When Joseph retained Benjamin, Judah shouted so loudly that Hushim, the son of Dan, who was in Canaan at a distance of 400 parasangs from him, heard his voice. Hushim came immediately to Egypt, and with Judah desired to destroy the land. In the "Sefer ha-Yashar" it is stated that Judah lifted a stone weighing 400 shekels, threw it into the air, and finally ground it to dust with his foot. He then told Naphtali to count the districts of Egypt, and when the latter reported that there were twelve of them, he said to his brothers: "I take three for myself and let each one of you take one, and we shall destroy the whole of Egypt." It was this decision that induced Joseph to disclose himself to his brothers.

Judah as Hero.

Because Judah had pledged himself to bring Benjamin back to his father, saying, "If I bring him not unto thee, and set him before thee, then let me bear the blame for ever" (Gen. xliii. 9), his bones were rolled about without rest in the coffin during the forty years that the children of Israel wandered in the wilderness. Moses then prayed to God, arguing that Judah's confession had induced Reuben to confess his sin with Bilhah (Soṭah 7b; B. Ḳ. 92a; Mak. 11b). Judah's name was engraved on the emerald in the high priest's breastplate (Num. R. ii. 6).

The tribe of Judah had the preeminence over the other tribes in that Elisheba, the mother of all the priests; Othniel, the first judge; Bezaleel, the

Preeminence of the Tribe.

builder of the Tabernacle; and Solomon, the builder of the First Temple; and all the pious kings were of the tribe of Judah, as will be the Messiah (Yalḳ., Gen. 159). This distinction was given to the tribe of Judah as a reward for its zeal in glorifying God at the passage of the Red Sea. When the children of Israel were about to cross, a dispute arose among the tribes, each desiring to be the first to enter the water. The tribe of Benjamin sprang in first, for which act the princes of Judah threw stones at it (Soṭah 37a). In Ex. R. xxiv. 1 it is stated, on the contrary, that the other tribes refused to enter the slimy bed of the sea until the tribe of Judah set them the example by plunging in. According to R. Judah, the Temple was erected on Judah's land—another reward to the tribe (Gen. R. xcix. 1); but a different opinion is that only the whole eastern side of the edifice, including the courtyards and the altar, was on Judah's ground, while the Temple proper was on land belonging to Benjamin (Yoma 12a; Zeb. 53b). The people of Judah are said to have been versed in the Law ("bene Torah"), because in the wilderness the tribe was placed on the east side of the camp (Num. ii. 3), being thus near to Moses and Aaron (Num. R. xviii. 4). It seems that the soil of Judah's territory was remarkable for the excellent quality of its grain, one measure of Judean grain being worth five measures of that produced in Galilee (B. B. 122a).

The reason given for the transportation into captivity of the tribe of Judah is that it was a punishment for intemperance (Gen. R. xxxvi. 7).

S. S. M. Sel.

——**Critical View:** It is very generally maintained by recent criticism that Judah is simply the eponymous ancestor of the tribe of that name, and that the narrative in Genesis gives the history of the tribe in the form of personal history (see Judah, Tribe of). It is worthy of note, however, that the thirty-eighth chapter of Genesis, which is held to give an account of the various clans which united to form the tribe, under the figure of the marriages, etc., of Judah and his sons, makes no mention of the Kenites and the Kenizzites (comp. Judges i. 12-15, 16). It is hardly a sufficient answer to say that the Caleb or Kenizzite clan was distinct until the time of David (see I Sam. xxv. 3, xxx. 14); for, according to the commonly received view, Gen. xxxviii. belongs to J and was not written earlier than the ninth century B.C., by which time, in any case, these clans must have been incorporated with Judah.

E. G. H. J. F. McC.

JUDAH, KINGDOM OF: The legitimate successor of the kingdom established by David was the smaller kingdom to the south, which remained true to Solomon's son Rehoboam. Although the first titular king of Judah, he was the third king to reign in Jerusalem. The possession of this great fortress rendered it possible to hold all the country to the south and the most valuable portion of Benjamin in the immediate north. More important than its strategic value was its prestige as the first great national center, the seat of a splendid court of the "thrones of justice," and, above all, of the prescriptive worship of the God of Israel. Moreover, its territory, though small, was compact, homogeneous, and easily defended; and its country population, frugal, hardy, and unspoiled by contact with foreigners, was devotedly attached to the legitimate dynasty.

Early Advantages.

Again, since all the most formidable invaders of Palestine came from the north, the rival kingdom became perforce its protector from spoliation and ruin. Thus it came to pass that, while northern Israel passed through frequent changes of dynasty, became a prey to many terrible invasions, and endured as a nation but a little more than two centuries, the kingdom of Judah was controlled by the "house of David" throughout its existence, which lasted for three and one-half centuries after the disruption.

The history of the kingdom may best be divided with reference to its most decisive external relations. The first period extends from Rehoboam to Jotham (934-735 B.C.); the second, from Ahaz to Josiah (735-608); the third, from Jehoahaz to Zedekiah and the fall of Jerusalem (608-586).

Strife with Israel.

I. Strife between the two kingdoms followed inevitably upon the separation. At first Judah, through the small standing army maintained by David and Solomon, was steadily successful. One victory especially, gained by Abijah (918) over Jeroboam, was made much of in the later traditions of the kingdom. But the next king, Asa (915), was so closely pressed by Baasha of Israel that he was forced to invoke the effective aid of the Arameans of Damascus. Yet before the death of Asa a lasting friendship was made with Israel, now under the new and powerful dynasty of Omri (886). Henceforth Judah assumed its natural subordinate rôle till Israel was crushed by alien foes. From any other serious danger Judah was for a long time almost entirely free. The raid of Shishak of Egypt (929) soon after the schism involved indeed the submission of Jerusalem; but it was quickly over and left no permanent results.

Alliance with Israel.

In the prolonged wars waged by the Arameans of Damascus and Mesha of Moab against northern Israel the Southern Kingdom took no direct share beyond sending aid to the sister kingdom. Thus Jehoshaphat (872), the son of Asa, fought side by side with Ahab of Israel in the fateful battle of Ramoth in Gilead (853). Jehoshaphat further strengthened the alliance by marrying his son Jehoram to Athaliah, the daughter of Ahab and the Phenician Jezebel. One injurious effect of this union was the introduction of the evil cult of the Tyrian Baal from Samaria into Jerusalem. When Jehu rose against Joram of Israel and put him to death (842), Ahaziah, the son of Jehoram, then visiting his uncle in Jezreel, also fell a victim to the fury of the usurper. The consequence was that Athaliah undertook to govern in Jerusalem.

The reign of this foreign queen with her odious cult was tolerated for only six years, when the priests of Yhwh placed upon the throne Jehoash, the youthful son of Ahaziah (836). His reign was chiefly marked by a purification of the Temple services. Under his son and successor, Amaziah, Judah began a career of development and prosperity which finally made it one of the leading kingdoms of the West-land. An essential factor in this achievement was the reconquest of Edom, which had been lost to Judah under Jehoram. This secured a share of the overland traffic of western Arabia, as well as the control of the Red Sea trade from the Gulf of Akaba. Amaziah's successes led him foolishly to provoke to war Joash, King of Israel. The result was the defeat and capture of Amaziah and the submission of Jerusalem, which, however, was released upon the surrender of the treasures of the Temple and of the royal palace (*c.* 790).

Era of Expansion.

With Uzziah (Azariah; sole ruler 769) the prosperity of Judah was renewed and brought to its greatest height. As a powerful ruler and statesman he was the only true successor of King David. His kingdom was extended beyond precedent, embracing much of the Philistine country, and for a time even holding the suzerainty of Moab. In fortifications and standing armies as well as in the development of all the natural resources of his country, he was a successful imitator of the great Assyrian monarchs. Jotham (sole ruler 738?) continued the vigorous régime of his father.

It should be noted that the expansion of Judah was coincident with the equally remarkable recuperation of northern Israel after the long and exhausting Syrian wars. The temporary prosperity of both kingdoms was chiefly due to the opportunities of development afforded by the decline of Damascus. Judah as well as Israel had suffered from the aggression of this powerful Aramean state; for in the early days of Jehoash (*c.* 835), Hazael of Damascus had ravaged the whole country up to the city of Jerusalem, which opened its gates to him and yielded up its spoil.

Vassalage to Assyria.

II. A decisive change took place with the accession of Ahaz, son of Jotham (735). The determining political factor was now the great Assyrian empire, reorganized under Tiglath-pileser III. (Pul). To resist his expected invasion Pekah, King of Israel, made alliance with Rezin of Damascus. Ahaz refused to join the league, and, when threatened with coercion by the allies, called in the help of the invader. The northern half of Israel was annexed by the Assyrians; and Damascus fared still worse. Judah was reprieved; but it became a vassal state of Assyria.

Hezekiah, son of Ahaz (719), prospered as long as he deferred to the prophet Isaiah with his wise policy of "quietness and confidence" in YHWH. But in 701 he joined in a wide-spread insurrection against Assyria, with the result that the whole of Judah was devastated by the Assyrian king Sennacherib, many of its people were deported, and Jerusalem itself was spared only after a plague had broken out in the army of the invader. This national discipline favored the religious reforms of Isaiah: but Hezekiah died in comparative youth; and the reign of his son and successor, Manasseh (690), was marked by degeneracy in faith, worship, and morals. Judah was still the vassal of Assyria; and the prestige of the sovereign state had potent influence in the religious as well as in the political sphere. An attempted insurrection in the latter part of the reign of Manasseh was speedily crushed; and Judah bore until the downfall of Assyria the yoke to which Ahaz had offered submission. The brief reign of Amon (641) showed no improvement upon that of his father, Manasseh.

Reformation; Vassalage to Egypt.

Under the youthful Josiah (639) the reforming priestly party gained the upper hand. The law of Moses was promulgated, and gross abominations in religion and morals were sternly put down (621). But this promising career was soon cut short. Necho II., at the head of the revived native monarchy of Egypt, was now aiming to replace Assyria in the dominion of western Asia. He passed through Palestine with an invading force in 608; and Josiah, offering battle to him at Megiddo, was defeated and slain.

III. At Jerusalem Jehoahaz, second son of Josiah, was put upon the throne, but after three months was dethroned by Necho and exiled to Egypt. He was replaced by Josiah's eldest son, Eliakim, whose name was changed by Necho to "Jehoiakim" to indicate his change of allegiance. Judah's vassalage to Egypt was, however, very brief. In 607 Nineveh was taken and destroyed by the Medes. The whole of the low countries westward to the Mediterranean fell to the ally of the Medes, the new Babylonian monarchy. The Chaldean Nebuchadnezzar shattered the power of Egypt at Carchemish in 604; Syria and Palestine were soon cleared of the Egyptians; and Jehoiakim became a Babylonian subject.

The prophet Jeremiah counseled continued submission; but in 598 Jehoiakim rebelled. Jerusalem was invested; and before the siege had well begun the unhappy king died. His son Jehoiachin (597) held out for three months, and then surrendered at discretion. He and his chief men, with the flower of the kingdom, were deported. Most of the captives, with the prophet Ezekiel, were placed in an agricultural colony by the canal Chebar in central Babylonia.

Fall of Jerusalem.

Over the crippled and enfeebled kingdom was placed Zedekiah, the third son of Josiah. Again symptoms of discontent appeared, fomented by Egyptian intrigues. Again Jeremiah interposed with remonstrance, protest, and invective; and yet again the deluded Judahites rebelled. In Jan., 587, the Chaldean army appeared before Jerusalem. This time a more desperate resistance was offered. Promises of help from Egypt could not be fulfilled. The city was taken (July, 586); the leaders of the rebellion were put to death; and Zedekiah himself was carried, a blinded captive, with the greater portion of his subjects, to Babylon. All valuable property was taken away as spoil; and the Temple and city were destroyed by fire. This was the end of the royal house of David, though not the end of Jewish nationality.

E. G. H. J. F. McC.

JUDAH, TRIBE OF.—Biblical Data: The tribe of Judah is said to have been descended from the patriarch Judah, the fourth son of Jacob and Leah (Gen. xxix. 35). In the Book of Numbers it is represented as sharing with the other tribes, without distinctive fortunes, the experiences of the Exodus and of the sojourn in the wilderness. The clans which then composed the tribe are said to have been the Shelanites, Perizzites, Zerahites, Hezronites, and Hamulites (Num. xxvi. 19-22). In Josh. xv. Judah is said to have received a large inheritance which stretched right across the land from Jericho westward to the Mediterranean and from Jerusalem southward to the desert. The territory is said to have extended south as far as Kadesh-barnea (verse 3), which lay about fifty miles south of Beer-sheba (see Trumbull, "Kadesh Barnea," New York, 1884), and west as far as Gaza, Ashdod, and Ekron (verses 42-47). From the Book of Judges (i. 16) it is learned that the Kenites united with Judah so as to become, probably, a clan of the tribe. To these clans the two Kenizzite clans of Caleb and Othniel appear to have been added (*ib.* i. 12-15, 20; Josh. xiv. 6-15, xv. 13-19). Closely connected with Caleb was Jerahmeel, who is said to have been Caleb's brother (I Chron. ii. 42). In I Sam. xxvii. 10, xxx. 29, the Jerahmeelites appear to be a part of the tribe of Judah; they are therefore to be regarded as another clan of the tribe.

Territory of Judah.

After the settlement in Canaan, Judah seems to have stood apart from the other tribes. It is not mentioned in the song of Deborah (Judges v.); and in the accounts of the kingdom of Saul it is regularly reckoned separately from the other tribes (comp. I Sam. xi. 8, xvii. 52, xviii. 16). Upon the death of Saul, David erected the tribe of Judah into a separate kingdom (II Sam. ii. 1 *et seq.*). As the house of Saul under the weak Ish-bosheth maintained its supremacy over the remaining tribes but seven and one-half years, Judah was after that time reunited to Israel under her own king, David. This union continued for eighty years, through the reigns of David and Solomon. For the further history of the tribe see JUDAH, KINGDOM OF.

——**Critical View:** Possibly the tribe of Judah is mentioned in the El-Amarna tablets (comp. Jastrow in "Jour. Bib. Lit." xii. 61 *et seq.*); but, if so, the reference is too obscure to increase present knowledge. In the judgment of critics the stories of the patriarch Judah are not real biography, but are narratives of an eponymous hero, or portions of the history of the tribe. These being taken in this way, it is gathered that the clan of Judah was at first weaker than the clans of Reuben, Simeon, and Levi; that when Judah entered Palestine it first gained a foothold at Adullam and Timnah (Gen. xxxviii. 1, 12), places which were probably on the eastern side of the Judean ridge. This Timnah is not to be confused with the Timnah of the Shephelah (Judges xiv. 1). An alliance was soon made with the clans of the Perizzites and Zerahites, who had the palm-tree for their totem, and were therefore said to be children of Tamar (Gen. xxxviii. 13-30). Later the Kenizzite clans of Caleb and Othniel were amalgamated with the tribe. These clans were, perhaps, of Edomitish origin, since Kenaz is counted among the descendants of Esau (Gen. xxxvi. 11). These two clans occupied the region around Hebron, Carmel, and Kirjath-sepher, or Debir. Gradually the Jerahmeelites were also incorporated in the tribe of Judah. Their habitat appears to have been in the Negeb (I Sam. xxvii. 10), and as Jerahmeel is said to be Caleb's brother, perhaps they also were of Edomitish origin. A branch of the Kenites from the Sinaitic peninsula added another element to Judah's complex character (see KENITES). This large admixture of foreign blood in the tribe of Judah is probably the reason why the Judahites were so loosely connected with the other tribes of Israel. A consciousness existed on both sides that Judah stood apart in origin and in sentiment.

Joined by Clan of Caleb.

The prophets of Judah framed the Deuteronomic law which led to Josiah's reform. This reform accentuated the uniqueness of Israel's religion; and it was this that held the inhabitants of the Judean kingdom together in exile, that revived their state, and that made them the world's teachers of monotheism. But the inhabitants of the Northern Kingdom were absorbed by the people among whom they were scattered, because their religion lacked this uniqueness. It was this uniqueness, furthermore, which caused the name of the tribe of Judah to be perpetuated in one of the great religions of the world.

E. G. H. G. A. B.

JUDAH (Coadjutor of Josephus): The Sanhedrin of Jerusalem commissioned Judah and Joezar to assist Josephus (66 C.E.) in pacifying the people and inducing them to lay down their arms. Josephus at first calls them noble men ("Vita," § 7), but afterward remarks maliciously that, being priests, they had in their possession much money from the tithes given them. The envoys wished to return home, probably because they perceived Josephus' duplicity, but he persuaded them to remain ("Vita," § 12). He accused them of taking no thought for the future, and of accepting bribes from John of Giscala for permission to seize the grain in the imperial granaries in Galilee ("Vita," § 13); in other words, they sided with the patriot John. Josephus finally was obliged to send his colleagues back to Jerusalem ("Vita," § 14).

G. S. KR.

JUDAH (Jewish Prince): Son of Simeon Tharsi. When Antiochus VII., Sidetes, sent his general Cendebæus against Simeon, the latter, too old for war, gave the command to his two sons Judah and John, who valiantly executed the commission. After a short stay at Modin, their ancient family seat, they met the large army of the Syrians in the plain of Jabneh, defeated them, and pursued them as far as Azotus, inflicting a loss of 2,000 men. Judah was wounded, and John, who subsequently became ruler, led the army back alone to his father (*c.* 137 B.C.; I Macc. xvi. 1-10; Josephus, "Ant." xiii. 7, § 3, where his name is not given). When Simeon was murdered by his son-in-law Ptolemy, his two sons

Mattathias and Judah were also killed (135 B.C.; I Macc. xvi. 11–17). This passage seems to indicate that Judah was the second son, and was probably named after his great-uncle Judas Maccabeus; hence it must be assumed that he was born after 161 B.C. and was about twenty-five years of age at the time of his death.

G. S. Kr.

JUDAH ("Rabbi Mor"): Chief rabbi of the Jews in Portugal and treasurer of King Don Diniz, with whom he enjoyed great favor; died before 1304. He was very wealthy; in 1298 he lent 6,000 livres to Don Raimund de Cardona for the purchase of the city of Mourão. A document dated Oct. 2, 1303, bears the signature "En Judaz Arraby a vij." He was succeeded in office by his son Don Guedelha (Gedaliah), who was also treasurer of the queen mother Donna Brites; the high favor he enjoyed with the king was used in the interests of his coreligionists. The king presented him with two towers at Beja to supply him with the building material for his houses.

G. M. K.

JUDAH (known also as **Thesoureiro Mor Judah**): Treasurer to Ferdinand, King of Portugal; appointed in 1378. After the king's death he became the favorite of his queen, Leonora de Meneyes, whom he accompanied as a page when she was obliged to flee from the infuriated populace of Lisbon. The deposed queen requested her son-in-law John I. of Castile, who had made war upon Portugal, to bestow the chief rabbinate of Castile (not of Portugal, as Grätz says) upon Judah; John, however, at the instance of his young wife, Beatrice, gave the office to Judah's rival, David Negro-Yaḥya. Thereupon the crafty Leonora hired a count to kill her daughter's husband, then besieging Coimbra. But the plot failed; the king was informed of it by David Negro, of his suite, who had been warned by a Franciscan monk. Leonora, Judah, and a maid who was in the conspiracy were immediately arrested. Brought before the king, Judah disclosed everything in presence of Queen Beatrice, David Negro, and a notary, and repeated his confession before Leonora. The last-named was banished to Tordesillas; Judah, whose wife was the sister of a wealthy man by the name of David Alguadez, a relative of Meïr Alguadez, was condemned to death, but was pardoned at the intercession of David Negro. He fled to Castile, accompanied by Judah and Moses Nahum, his tax-collectors. His treasures were given by John I. of Portugal to Gonçalo Rodriguez de Abreu, and his houses and other possessions to the widow of the brave king Pereira.

G. M. K.

JUDAH or **JUDA (American Family):** Family members of which settled in Newport, R. I., New York, Charleston, Richmond, Philadelphia, Montreal, Jamaica, and Surinam. The following is an alphabetical list of those known to have lived in America (the "Publications of the American Jewish Historical Society" are cited as "Publ."):

Abigail Judah, born 1742; died 1819 at Richmond, Va. ("Publ." vi. 111); **Abraham Judah,** son of Hillel Judah; born July 15, 1774 (*ib.* xi. 155); **Andrew Judah,** mentioned in the "South Carolina Gazette," Dec. 31, 1764, as "a physician from London" (see B. Elzas, "Jews of South Carolina," ii. 12, Charleston, 1903); **Andrew Judah,** of Indiana; served in the Civil war (S. Wolf, "The American Jew as Patriot, Soldier, and Citizen," p. 412); **Anna Judah,** daughter of Naphtali Judah; died in New York 1822 ("Publ." iv. 208); **Baran Judah,** enrolled in the New York militia company in 1738 (*ib.* ii. 92).

Baruch Judah: Mentioned under date of Jan. 10, 1715–16, as one of the freemen of New York (*ib.* vi. 101); one of the signers of a petition addressed to the mayor and board of aldermen in New York praying permission to use ground purchased for a cemetery, Aug. 23, 1728 (comp. *ib.* iv. 196; vi. 127, 131). A **Baruch Judah** is also mentioned as one of the electors at a congregational meeting of the Spanish-Portuguese synagogue in New York. He died Jan. 12, 1774, aged 95 years (comp. *ib.* xi. 154). Another **Baruch Judah** was one of the charter members of Congregation Beth Shalome, Richmond, Va. (comp. *ib.* iv. 21, xi. 72), cited in its minute-book, 1791; was born June 21, 1763; died in Richmond, Va., Sept. 26, 1830 (comp. *ib.* xi. 154). Mrs. Baruch Judah was a member of that congregation in 1834 (*ib.* iv. 23).

B. H. Judah was librarian of the Richmond Library Company (comp. *ib.* xi. 73).

Benjamin S. Judah: One of the most prominent merchants of New York in the eighteenth century; a founder of the New York Tontine in 1786. He was an active member of Congregation Shearith Israel in that city. His signature is affixed to an official document, dated Iyyar 20, 5551 = 1791 ("Publ." ii. 51; iii. 120; vi. 130, 131), and to a petition addressed to the legislature, Feb. 13, 1789, to have Vermont admitted as a separate state into the Union (comp. *ib.* xi. 96, 97).

David Judah: Member of Capt. Gregory's Company in the Connecticut Line in 1776 (*ib.* xi. 92).

Emanuel Judah: Romantic actor of wide range; born in New York, where he made his début in 1823 in melodrama and light comedy. His person and talents are described by Daly ("Settlement of the Jews in North America," 2d ed., pp. 103–104, New York, 1893). He was drowned in the Gulf of Mexico in 1839 (Brown, "Hist. of the American Stage"; H. P. Phelps, "Players of a Century").

Gershom Seixas Judah, one of the charter members of Congregation Beth Shalome, Richmond, Va., mentioned in 1791; born Oct. 12, 1767 ("Publ." iv. 21, xi. 155); **Hillel** or **Hilliard Judah,** son of Baruch Judah and Sarah Hilbert; married in 1759 Abigail (daughter of Isaac Mendez Seixas and Rachel Levy), who bore him nine children. Their names are given in "Publ." xi. 154–155, where full data are furnished (comp. *ib.* iv. 202, 211). Mrs. Hillel Judah died in Richmond, Va., Sept. 1, 1819, aged 77 years; **H. Judah** was enrolled in the 90th Indiana Infantry during the Civil war (Wolf, *l.c.* p.

178); **Isaac Judah,** no doubt the same as **Isaac H. Judah,** officially connected with the congregations Shearith Israel in New York and Beth Ahaba in Richmond (comp. "Publ." iii. 120; iv. 21, 22; vi. 131; xi. 154; E. Calish, "Hist. of Congregation Beth Ahaba, Richmond, Va., 1841–1901," p. 8, Richmond, 1901), was born July 10, 1761 ("Publ." xi. 154); **Israel Judah,** served in Company F, 31st Indiana Infantry, during the Civil war (Wolf, *l.c.* p. 178); **Jacob Judah,** mentioned in 1658 as one of the early settlers at Newport, R. I. ("Publ." vi. 67); **Jacob Judah,** cited as one of the members of the Jewish congregation in Charleston, S. C., *c.* 1800 (B. Elzas, "Hist. of Congregation Beth Elohim, Charleston, S. C., 1800–1810," p. 4, Charleston, 1902), was son of Hillel Judah, and born May 4, 1765; **Jacob Samuel Judah,** of Philadelphia; died June 20, 1783 ("Publ." vi. 108); **Joseph Judah,** one of the earliest settlers in Newport, 1658 (*ib.* vi. 67); **Manuel Judah,** one of the charter members of Congregation Beth Shalome, Richmond, in 1791; born July 15, 1769; died in Baltimore, Md., Nov. 8, 1834 (*ib.* xi. 155; see also *ib.* iv. 21, 208); **Michael Judah** figures as a litigant in early Connecticut records, *c.a.* 1763. In 1777 he petitioned the Council of Safety for leave to forward mercantile supplies from Rock Hill to Norwalk, Conn. (comp. *ib.* xi. 90, 93); **Moses Judah,** mentioned, under date of 1768, as a merchant and one of the freemen of New York (*ib.* vi. 102); he was one of the signers of a petition to Congress, dated Philadelphia, Sept., 1779 (*ib.* iii. 149); **Naphtali Judah,** one of the trustees of Congregation Shearith Israel, New York, *c.* 1805 (*ib.* vi. 132); **Rebecca Judah,** daughter of Hillel Judah and Abigail Seixas; married May 31, 1809 (*ib.* iv. 211).

Samuel Judah: New York patriot, son of Baruch Judah, was born in New York Aug. 19, 1728; married, Kislew 29, 1759, Jessie, daughter of Alexander Jonas, of London (died in New York, May 29, 1818, aged 82 years). He was one of the signers of the decision to enforce the non-importation agreement against England in 1770; he died in Philadelphia Oct. 19, 1781, aged 53, the father of twelve children (Wolf, *l.c.* p. 34; "Publ." iv. 89; v. 205; vi. 102, 108); **Samuel Judah,** of Montreal, Canada; sympathizer with the American cause in the Revolutionary war ("Publ." iv. 224); **Samuel Judah,** served in Company K, 20th Indiana Infantry, during the Civil war (Wolf, *l.c.* p. 178).

Samuel B. H. Judah: Dramatist and author; son of Benjamin S. Judah; born in New York 1799. In 1820 he wrote a melodrama, "The Mountain Torrent," produced in the same year with fair success. In 1822 he wrote another, "The Rose of Arragon," received with much favor. Subsequently he wrote "The Tale of Lexington" and "Gotham and the Gothamites; a Medley," produced in 1823. The latter is a versified satire directed against more than a hundred prominent citizens of New York, and is spoken of as "defamatory" by Daly, who gives an admirable critique of it in his sketch of the author (Daly, *l.c.* pp. 139–145). Judah was indicted for libel, and, together with his publisher, was arrested. Unable to pay the fine imposed, he was sent to prison; but, owing to illness, he was soon pardoned by the governor and discharged. Subsequently he became an attorney and counselor of the supreme court. His character and personality are described by Daly, who knew him. W. Dunlap, in his "Hist. of the American Theatre" (p. 409, New York, 1832), mentions another of Judah's plays, entitled "Odofriede" ("Publ." vi. 114); and Daly (*l.c.* p. 145) says he wrote, besides, a work of fiction "of no particular merit." His plays had some vogue in Philadelphia (H. S. Morais, "The Jews of Philadelphia," p. 378). His son, **Emanuel Judah** (see above), was an actor of merit.

Thomas O. Judah, served in Company D, 117th Indiana Infantry, during the Civil war (Wolf, *l.c.* p. 178); **Uriah Judah,** mentioned among the earliest settlers in Montreal, Canada, in 1768 ("Publ." i. 117).

A person named Judah conducted the first school in Mobile, Alabama, *c.* 1820 (comp. "The Mobile Register," Oct. 3, 1822).

The name "Juda" occurs in documents pertaining to the history of the Jews in Surinam, Dutch Guiana, in 1790. **A. M. Juda** was the author of "Four Open Letters on the Finances of Surinam," written in Dutch, and published in Amsterdam in 1869–70. Another person bearing this name was an active abolitionist, and supported the antislavery movement in Jamaica, West Indies, in 1840.

A. G. A. K.

JUDAH (Russian Family): Family prominent in the communal life of Grodno and Lithuania during the greater part of the sixteenth century. **Judah Bogdanovich,** its chief founder, was born about 1475 and died at Grodno about 1546. His father, **Bogdan,** owned an estate in the district of Grodno prior to the expulsion of the Jews from Lithuania by ALEXANDER JAGELLON in 1495. Their departure from the country was followed by the occupation of their real property by their Christian neighbors; and the Bogdan possessions were so appropriated. Judah probably returned to Grodno with the other exiles in 1503. He petitioned for the restoration to him of the estate formerly owned by his father, and his claim was allowed and confirmed by the king. A few years later Judah was engaged in extensive business operations; and he became the farmer of the Grodno wax-taxes (1509). He probably is the "Judah of Grodno" referred to in the list of expenses incurred by the grand duchy of Lithuania for the years 1506–11, as having a claim of 12 kop groschen against the town secretary of Grodno for goods sold to him. His name is again mentioned in a document dated Nov. 11, 1523, wherein King Sigismund Jagellon orders payment to be made to Judah Bogdanovich and Lazar Chatzkovich, Jews of Grodno, for merchandise furnished by them.

Importance of Judah Bogdanovich.

In 1525 Judah Bogdanovich was collector of taxes, and had extensive dealings with the local nobles, many of them being indebted to him. In 1532, in a royal document issued to Judah, authorizing him to collect a debt, he is styled "merchant to the Queen Bona." At the instance of Prince Andrei Vassilivich Polubenski the fifteen servingmen who had been transferred to Judah in payment of the debt were to be turned over to the prince, the latter undertaking to pay to Judah the amount in question. At this time, Judah's oldest son, **Abraham (Avraam Igudich),** is mentioned in connection with the claim.

In the following year King Sigismund confirmed by a decree (June 23, 1533) the findings of the court of rabbis ("doctorov zhidovskikh") held in Lublin, by which Judah's son **Pesaḥ** was honorably acquitted of the charge made against him by the Jew Yesko Shlomich of Biyelsk to the effect that Pesaḥ had taken from him 13,000 kop groschen which he had failed to return. Some months later Judah and his son **Agron (Aaron)** were authorized to state under oath their claim against the nobleman Wilenski, who they alleged had borrowed of them 500 gold ducats and 1,009 kop groschen, and Wilenski was then ordered to pay them such claim.

Several years later Judah's son Abraham had become a prominent merchant. His name frequently occurs in court documents (1539-41) relating to his attempts to collect debts of money, grain, wax, etc., due to him.

Judah himself is mentioned frequently in legal documents of 1540–41. Thus on April 15, 1540, he was one of the three members of a court of citizens (the other two being Tatars) to pass on the claim of a certain Lukash against the Jewess Brenya; and on June 11, 1540, he was a member of another tribunal which had to consider an agreement made between a Jewess of Grodno, Stekhna Lyatzkova, and her stepson Moses Lyatzkovich. Further evidence of the esteem in which Judah Bogdanovich was held is furnished by a court document, dated Feb. 28, 1541, wherein he is accepted as a reliable witness.

On Nov. 8, 1546, Abraham, Agron, and **Moshko (Moses),** the elder sons of Judah by his first wife, Maryama, came to an agreement with **Govash, Ilya,** and **Shmoilo (Samuel),** their brothers by Judah's second wife, Nehama, as to the division of the estate left by their late father. This estate, which was of great value, included gold, silver, houses, lands, and outstanding debts. Breach of the compact on either side was to be subject to a fine of 1,000 kop groschen. Judah had at least three other sons not mentioned in this document, namely, Pesaḥ (mentioned above), **Israel,** and **Bogdan;** and to them should be added, perhaps, **Naḥman.**

Relations with the Grodno Community.

Moshko Igudich appears as one of the three persons elected (May 22, 1549) by the community of Grodno to settle with the Christian merchants of the city the proportion of taxes to be paid by the Jewish community, and to come to an agreement with them as to other relations of the community with their Christian neighbors. About this time the Judah family antagonized a part of the Grodno community in connection with the appointment of a rabbi. Complaints had evidently been made, since in a document dated Oct. 28, 1549, Queen Bona ordered Kimbar, the magistrate of Grodno, to assemble the Jews of the city for the election of a rabbi who should have no family ties in Grodno. In case of disagreement, the members of the community not related to the Judah family were to be given the privilege of electing a rabbi of their own. The trouble was chiefly due to the determination of the Judah family to place the religious affairs of the community in charge of their relative Mordecai, who had married a daughter of Judah Bogdanovich.

The decree of Queen Bona apparently failed to settle the matter; and the leaders of the opposition, Misan Chatzkovich and Isaac Israilovich, made renewed complaints to the queen, who again ordered Misan Chatzkovich and his followers to elect a rabbi of their own, such rabbi to have the same privileges in spiritual matters as the person selected by the Judah family.

On July 11, 1559, Moshko Igudich obtained a decree from King Sigismund relieving him from the payment of debts for a period of three years, because of a misfortune that had befallen Moshko's son Isaac, who had been robbed of a great amount of merchandise near the city of Shklov.

A local census of the Jewish householders in Grodno taken in 1560 gives the names of Agron, Abraham, Pesaḥ, Moshko, and Israel Igudichi, besides those of **Tobias,** the son of Abraham, and **Isaac,** the son of Agron.

H. R. J. G. L.

JUDAH I.: Patriarch; redactor of the Mishnah; born about 135; died about 220. He was the first of Hillel's successors to whose name the title of hereditary dignity, "ha-Nasi" (= "the prince"), was added as a permanent epithet; and accordingly in traditional literature he is usually called "Rabbi Judah ha-Nasi." In a large portion of such literature, however, and always in the Mishnah, he is simply called "Rabbi," the master par excellence. He is occasionally called "Rabbenu" (= "our master"; see Yeb. 45a; Men. 32b; comp. Abbahu's sentence, Yer. Sanh. 30a). The epithet "ha-Ḳadosh" (= "the holy") was occasionally added to "Rabbenu." Two of Judah's prominent pupils, Rab and Levi, in speaking of him (Pes. 37b; Shab. 156a), add to the term "Rabbi" the explanatory sentence, "Who is this?" "Rabbenu ha-Ḳadosh" (Frankel, "Darke ha-Mishnah," p. 191, erroneously considers this as a later gloss). The epithet "holy" is justified by Judah's singularly moral life (Shab. 118b; Yer. Meg. 74a; Sanh. 29c). It may have been borrowed from the terminology which was used by the inhabitants of the city of Sepphoris; for Jose b. Ḥalafta also praises his colleague Meïr as a holy and moral man (Yer. Ber. 5, below; comp. Gen. R. c., where the second term is missing). The epithet "holy" is by no means analogous to the epithet "divus," used to designate the Roman emperors ("He-Ḥaluẓ," ii. 93). It is likewise incorrect to interpret (as Levy, "Neuhebr. Wörterb." iv. 255) the sentence of Ḥiyya, a pupil of the patriarch, in Ket. 103b to mean that the title "holy" was not used after Rabbi's death, for Ḥiyya intends what is repeated elsewhere in different words (Soṭah, end), namely: "At Rabbi's death 'humility and the fear of sin' ceased." The three virtues holiness, humility, and the fear of sin occur in this sequence in the series of virtues enumerated by Phinehas b. Jair (Soṭah ix., end, and parallel passages).

Birth and Education.

According to a statement handed down in Palestine (by Abba b. Kahana, Gen. R. lviii.; Eccl. R. i. 10) and in Babylonia (Ḳid. 72b), Judah I. was born on the same day on which Akiba died a martyr's death. The place of his birth is not known; nor is it recorded where his father, Simon b. Gamaliel II., sought refuge with his family during the persecutions under Hadrian. On the restoration of order in Palestine, Usha became the seat of the academy and of its director; and here Judah spent his youth. It may be assumed that his father gave him about the same education that he himself had received, and that his studies included Greek (Soṭah 49b; comp. Bacher, "Ag. Tan." ii. 325); indeed, his knowledge of Greek fitted him for intercourse with the Roman authorities. He had a predilection for this language, saying that the Jews of Palestine who did not speak Hebrew should consider Greek as the language of the country, while Syriac (Aramaic) had no claim to that distinction (Soṭah *ib.*). In Judah's house pure Hebrew seems to have been spoken; and the choice speech of the "maids of the house of Rabbi" became famous (Meg. 18a; R. H. 26b; Naz. 3a; 'Er. 53a).

Judah devoted himself chiefly to the study of the traditional and of the written law. In his youth he had close relations with most of the great pupils of Akiba; and as their pupil and in converse with other prominent men who gathered about his father at Usha and later at Shefar'am, he laid the foundations of that wide scholarship which enabled him to undertake his life-work, the redaction of the Mishnah. His teacher at Usha was Judah b. 'Ilai, who was officially employed in the house of the patriarch as judge in religious and legal questions (Men. 104a; Sheb. 13a). In later years Judah was wont to tell how when a mere boy he read the roll of Esther at Usha in the presence of Judah b. 'Ilai (Meg. 20a; Tosef., Meg. ii. 8).

Judah felt especial reverence for Jose b. Ḥalafta, that one of Akiba's pupils who had the most confidential relations with Simon b. Gamaliel. When, in later years, Judah raised objections to Jose's opinions, he would say: "We poor ones undertake to attack Jose, though our time compares with his as the profane with the holy!" (Yer. Giṭ. 48b). Judah hands down a halakah by Jose in Men. 14a.

His Teachers.

At Meron, in Galilee (called also "Teḳoa'"; see Bacher, *l.c.* ii. 76), Judah was a pupil of Simeon b. Yoḥai ("when we studied the Torah with Simeon b. Yoḥai at Teḳoa'"; Tosef., 'Er. viii. 6; Shab. 147b; comp. Yer. Shab. 12c). Judah also speaks of the time when he studied the Torah with Eleazar b. Shammua' ('Er. 53a; Yeb. 84a; comp. Men. 18a). Judah did not study with Meïr, evidently in consequence of the conflicts which had separated this famous pupil of Akiba from the house of the patriarch. He regarded it as great good fortune, however, to have beheld even Meïr's back, though he was not allowed to look him in the face, as one should regard one's teacher according to Isa. xxx. 20 ('Er. 13b; Yer. Beẓah 63a, where an anachronistic anecdote is connected with this saying of Judah's). Nathan the Babylonian, who also took a part in the conflict between Meïr and the patriarch, was another of Judah's teachers; and Judah confessed that once, in a fit of youthful ardor, he had failed to treat Nathan with due reverence (B. B. 131a; in different version Yer. Ket. 29a; B. B. 16a). In halakic as well as in haggadic tradition Judah's opinion is often opposed to Nathan's. In the tradition of the Palestinian schools (Yer. Shab. 12c; Yer. Pes. 37b) Judah b. Ḳorshai, the halakic specialist mentioned as assistant to Simon b. Gamaliel (Hor. 13b), is designated as Judah's real teacher. Jacob b. Ḥanina is also mentioned as one of Judah's teachers, and is said to have asked him to repeat halakic sentences (Sifre, Deut. 306). The R. Jacob whose patronymic is not given and in whose name Judah quotes halakic sentences is identical with one of these two tannaim (Giṭ. 14b; comp. Tosef., 'Ab. Zarah, v. 4). In an enumeration of Judah's teachers his father, Simon b. Gamaliel, must not be omitted (B. M. 85b). In the halakic tradition the view of the son is often opposed to that of the father, the latter generally advocating the less rigorous application (see Frankel, *l.c.* p. 184). Judah himself says ('Er. 32a): "My opinion seems to me more correct than that of my father"; and he then proceeds to give his reasons. Humility was a virtue ascribed to Judah, and he admired it greatly in his father, who openly recognized Simeon b. Yoḥai's superiority, thus displaying the same modesty as the Bene Bathyra when they gave way to Hillel, and as Jonathan when he voluntarily gave precedence to his friend David (B. M. 84b, 85a).

His Academy at Bet She'arim.

Nothing is known regarding the time when Judah succeeded his father as leader of the Palestinian Jews. According to a tradition (Mishnah Soṭah, end), the country at the time of Simon b. Gamaliel's death not only was devastated by a plague of locusts, but suffered many other hardships. It was for this reason, it may be assumed, that Judah, on beginning his public activity, transferred the seat of the patriarchate and of the academy to another place in Galilee, namely, Bet She'arim. Here he officiated for a long time. During the last seventeen years of his life he lived at Sepphoris, which place ill health had induced him to select on account of its high altitude and pure air (Yer. Kil. 32b; Gen. R. xcvi.; Ket. 103b). But it is with Bet She'arim that the memory of his activity as director of the academy and chief judge is principally associated: "To Bet She'arim must one go in order to obtain Rabbi's decision in legal matters," says a tradition concerning the various seats of the directors of the academies (Sanh. 32b). The chronology of Judah's activity is based entirely on assumption. The year of his death is deduced from the statement that his pupil Rab left Palestine for good not long before Judah's death, in 530 of the Seleucidan era (hence 219; see "R. E. J." xliv. 45-61). He assumed the office of patriarch during the reign of Marcus Aurelius and Lucius Verus (*c.* 165). Hence Judah, having been born about 135, became patriarch at the age of thirty, and died at the age of about eighty-five.

It is difficult to harmonize the many anecdotes, found in Talmudic and midrashic literature, relating to Judah's intercourse with an emperor named Antoninus (see Jew. Encyc. i. 656) with the accounts of the various bearers of that name; and they therefore can not be used in a historic account of Judah's life and activity. However, as Marcus Aurelius visited Palestine in 175, and Septimius Severus in 200, there is a historical basis for the statement that Judah came into personal relations with some one of the Antonines; the statement being supported by the anecdotes, although they may report more fiction than truth. In many of these narratives references to the emperor apply really to the imperial representatives in Palestine. The assumption that not Judah I., but his grandson, Judah II., is the patriarch of the Antonine anecdotes (so Graetz) seems untenable in view of the general impression made by the personality of the patriarch; the tradition doubtless refers to Judah I. The splendor surrounding Judah's position, a splendor such as no other incumbent of the same office enjoyed, was evidently due to the favor of the Roman rulers. Although the Palestinian Jews had to contend with serious difficulties, and were persecuted during the patriarch's tenure of office, covering more than fifty years, yet it was on the whole a period of peace and one favorable to the activity of the academy. Judah I., who united in himself all the qualifications for internal and external authority, was naturally the chief personage of this period, which was destined, in virtue of its importance, to close the epoch of the Tannaim, and to inaugurate definitely with Judah I.'s life-work the epoch of the Amoraim. Judah's importance, which gave its distinctive impress to this period, was characterized at an early date by the saying that since the time of Moses the Torah and greatness, *i.e.*, knowledge and rank, were united in no one to the same extent as in Judah I. (Giṭ. 59a; Sanh. 36a).

His Patriarchate.

It is a curious fact, explainable by the nature of the sources, that only scattered data concerning Judah's official activity are to be found. These data refer to: the ordination of his pupils (Sanh. 5a, b); the recommendation of pupils for communal offices (Yeb. 105a; Yer. Yeb. 13a); orders relating to the announcement of the new moon (Yer. R. H. 58a, above); amelioration of the law relating to the Sabbatical year (Sheb. vi. 4; Yer. Sheb. 37a; comp. Ḥul. 7a, b), and to decrees relating to tithes in the pagan frontier districts of Palestine (Yer. Dem. 22c; Ḥul. 6b). The last-named he was obliged to defend against the opposition of the members of the patriarchal family (Ḥul. *l.c.*). The ameliorations he intended for the fast of the Ninth of Ab were prevented by the college (Meg. 5b; Yer. Meg. 70c). Many religious and legal decisions are recorded as having been rendered by Judah together with his court, the college of scholars (Giṭ. v. 6; Oh. xviii. 9; Tosef., Shab. iv. 16; see also Yeb. 79b, above; Ḳid. 71a).

The authority of Judah's office was enhanced by his wealth, which is referred to in various traditions. In Babylon the hyperbolical statement was subsequently made that Rabbi's equerry was more wealthy than King Sapor. The patriarch's household was compared to that of the emperor (Ber. 43a, 57b). In connection with a sentence by Simeon b. Yoḥai, Simeon b. Menasya praised Judah I. by saying that he and his sons united in themselves beauty, power, wealth, wisdom, age, honor, and the blessings of children (Tosef., Sanh. xi. 8; Baraita Ab. vi. 8). During a famine Judah opened his granaries and distributed corn among the needy (B. B. 8a). But he denied himself the pleasures procurable by wealth, saying: "Whoever chooses the delights of this world will be deprived of the delights of the next world; whoever renounces the former will receive the latter" (Ab. R. N. xxviii.).

His Redaction of the Mishnah.

No definite statements regarding the redaction of the Mishnah, in virtue of which Judah became one of the most important personages of Jewish history, are to be found either in the Mishnah itself or in the remaining voluminous traditional literature. The Mishnah contains many of Judah's own sentences, which are introduced by the words, "Rabbi says." The work was completed, however, only after Judah's death, sentences by his son and successor, Gamaliel III., being included also (Ab. ii. 2-4). But no proofs are required to show that the Mishnah, aside from this final revision, is Judah's work. Both the Talmuds assume as a matter of course that Judah is the originator of the Mishnah—"our Mishnah," as it was called in Babylon—and the author of the explanations and discussions relating to its sentences. However, the Mishnah, like all the other literary documents of Jewish tradition, can not be ascribed to any one author in the general acceptance of that term; hence Judah is correctly called its redactor, and not its author. The Halakah, the most important branch of ancient Jewish traditional science, found its authoritative conclusion in Judah's Mishnah, which is based on the systematic division of the halakic material as formulated by Akiba; Judah following in his work the arrangement of the halakot as taught by Meïr, Akiba's foremost pupil (Sanh. 86a). Judah's work in the Mishnah appears both in what he included and in what he rejected. The mass of tannaitic Halakah sentences still found in the Tosefta and in the baraitot of both Talmudim shows that Judah had no small task in selecting the material that he included in his work. Also the formulating of halakic maxims on controverted points required both his unusual technical knowledge and his undisputed authority; and the fact that he did not invariably lay down the rule, but always admitted divergent opinions and traditions both of the pre-Hadrianic time and, more especially, of Akiba's eminent pupils, evidences his circumspection and his consciousness of the limits imposed upon his authority by tradition and by its recognized representatives. For questions relating to the Mishnah, including the one whether Judah edited it orally or in writing, see Mishnah.

Contemporaries and Pupils.

Among Judah's contemporaries in the early years of his activity were Eleazar b. Simeon, Ishmael b. Jose, Jose b. Judah, and Simeon b. Eleazar, the sons respectively of Simeon b. Yoḥai, Jose b. Ḥalafta, Judah b. 'Ilai, and Eleazar b. Shammua'; their relations to Judah are discussed in the articles under their respective names. The following among his better-known contemporaries and pupils may be mentioned: Simon b. Manasseh, Phinehas b. Jair, Eleazar ha-Ḳappara and his son Bar Ḳappara, the Babylonian Ḥiyya, Simon b. Ḥalafta, and Levi b. Sissi. Among his pupils who taught as the first generation of Amoraim after his death are: Ḥanina b. Ḥama and Hoshaiah in Palestine, Rab and Samuel in Babylon.

Judah's motto (Ab. ii. 1) is divided into three parts. In the first he answers the question, what course a man should follow in life, with the words: "Let him so act that his deeds will be for his own glory [*i.e.*, approved by his conscience] and praised by men" (another answer by Judah to the same question is recorded in Baraita Tamid 28a). In the second part he remarks that the least commandment should be as rigorously observed as the greatest. In the third he says that the most effective preventive of sin is the consciousness "that there is above us an eye that sees, an ear that hears, and a book in which all the deeds of men are recorded." His deep religious feeling appears in his explanation of certain passages of Scripture—I Sam. xxviii. 15; Amos iv. 13, v. 15; Zeph. ii. 3; Lam. iii. 29; Eccl. xii. 14—which reminded him of the divine judgment and of the uncertainty of acquittal, and made him weep (Yer. Ḥag. 77a; Lev. R. xxvi.; Midr. Shemuel xxiv.).

His Character.

Judah was, indeed, easily moved to tears. He exclaimed, sobbing, in reference to three different stories of martyrs whose deaths made them worthy of future life: "One man earns his world in an hour, while another requires many years" ('Ab. Zarah 10b, 17a, 18a; for a sentence by Judah on the ranking of the pious in the future world see Sifre, Deut. 47). He began to weep when Elisha b. Abuya's (Aḥer's) daughters, who were soliciting alms, reminded him of their father's learning (Yer. Ḥag. 77c; comp. Ḥag. 15b). And in a legend relating to his meeting with Phinehas b. Jair (Ḥul. 7b) he is represented as tearfully admiring the pious Phinehas' unswerving steadfastness, protected by a higher power. He was frequently interrupted by tears when explaining Lam. ii. 2 and illustrating the passage by stories of the destruction of Jerusalem and of the Temple (Lam. R. ii. 2; comp Yer. Ta'an. 68d). Ḥiyya found him weeping during his last illness because death was about to deprive him of the opportunity of studying the Torah and of fulfilling the commandments (Ket. 103b). The following story shows his delicacy of feeling. He said to a calf, which, while being led to the slaughtering-block, looked at him with tearful eyes, as if seeking protection: "Go; for thou hast been created for this purpose!" To this unkind attitude toward the suffering animal he ascribed his years of illness, which he bore with great resignation. Once, when his daughter was about to kill a small animal which was in her way, he said to her: "Let it live, child; for it is written (Ps. cxlv. 9): 'His [the Lord's] tender mercies are over all'" (B. M. 85a; Gen. R. xxxiii.). His appreciation of animal life appears also in the prayer which he said when eating meat or eggs (Yer. Ber. 10b): "Blessed be the Lord who has created many souls, in order to support by them the soul of every living being." When wine seventy years old cured him of a protracted illness, he prayed: "Blessed be the Lord, who has given His world into the hands of guardians" ('Ab. Zarah 40b). He privately recited daily the following supplication on finishing the obligatory prayers (Ber. 6b; comp. Shab. 30b): "May it be Thy will, my God and the God of my fathers, to protect me against the impudent and against impudence, from bad men and bad companions, from severe sentences and severe plaintiffs, whether a son of the covenant or not." In regard to the inclination to sin ("yeẓer ha-ra'") he said: "It is like a person facing punishment on account of robbery who accuses his traveling companion as an accomplice, since he himself can no longer escape. This bad inclination reasons in the same way: 'Since I am destined to destruction in the future world, I will cause man to be destroyed also'" (Ab. R. N. xvi.). It is not unlikely that Judah was the author of the parable of the blind and the lame with which he is said to have illustrated in a conversation with Antoninus the judgment of the body and the soul after death (Mek., Beshallaḥ, Shirah, 2; Sanh. 91a, b; see a similar parable by him in Eccl. R. v. 10). The impulse to sin is the topic of another conversation between Judah and Antoninus (Gen. R. xxxiv.; Sanh. 91b). Judah's sentence, "Let thy secret be known only to thyself; and do not tell thy neighbor anything which thou perceivest may not fitly be listened to" (Ab. R. N. xxviii.), exhorts to self-knowledge and circumspection. On one occasion, when at a meal his pupils expressed their preference for soft tongue, he made this an opportunity to say, "May your tongues be soft in your mutual intercourse" (*i.e.*, "Speak gently without disputing"; Lev. R. xxxiii., beginning). The following sentence shows a deep insight into the social order: "The world needs both the perfumer and the tanner: but happy he who engages in the fragrant trade; and wo to him who engages in the vile-smelling trade! The world needs both the male and the female: but happy he who has male children; and wo to him who has female children" (Pes. 65a; Ḳid. 82b; comp. Gen. R. xxvi.). He praises the value of work by saying that it protects both from gossip and from need (Ab. R. N., Recension B, xxi.). The administration of justice has taken its place beside the Decalogue (Ex. xx., xxi.); the order of the world depends on justice (A. V. "judgment," Prov. xxix. 4); Zion is delivered by justice (Isa. i. 27); the pious are praised for their justice (Ps. cvi. 3).

Sayings on Study.

Judah sums up the experiences of a long life spent in learning and in teaching in the confession, which also throws light upon his character, "I have learned much from my masters, more from my colleagues than from my masters, and more from my pupils than from all the others" (Mak. 10a; Tan., Ta'an. 7a). Judah indicates that one can also learn from a young teacher: "Do not look to the jug, but to its contents: many a new jug is full of old wine; and many an old jug does not even contain new wine" (Ab. iv. 20). He forbade his pupils to study on the public highway (probably in order to put a stop to abuses), basing his prohibition on his interpretation of Cant. vii. 2

(M. Ḳ. 16a, b); and he deduced from Prov. i. 20 the doctrine, "Whoever studies the Torah in secret will find public renown through his scholarship" (*ib.*). He connected with Deut. xi. 12 the question: "Why is it written, 'for whom the Eternal, thy God, cares'? Does not God care for all countries? The answer is: 'Scripture means to say that although God seems to care only for the land of Israel, yet for its sake He also cares for all other countries. God is similarly called the protector of Israel (Ps. cxxi. 6), although He protects all men (according to Job xii. 10), but only for the sake of Israel'" (Sifre, Deut. 38). According to Joshua b. Levi, Judah interpreted Jer. xlix. 20 to mean that the Romans, the destroyers of the Temple, will in time be destroyed by the Persians (Yoma 10a).

In Judah's Bible exegesis those portions may be noted in which he undertakes to harmonize conflicting Biblical statements. Thus he harmonizes (Mek., Bo, 14) the contradictions between Gen. xv. 13 ("400 years") and verse 16 of the same chapter ("the fourth generation"); Ex. xx. 16 and Deut. v. 18 (*ib.* Yitro, Baḥodesh, 8); Num. ix. 23, x. 35 and *ib.* (Sifre, Num. 84); Deut. xiv. 13 and Lev. xi. 14 (Ḥul. 63b). The contradiction between Gen. i. 25 and verse 24 of that chapter, in the latter of which passages among the creatures created on the sixth day is included as a fourth category the "living souls"—a category not included in verse 25—Judah explains by saying that this expression designates the demons, for whom God did not create bodies because the Sabbath had come (Gen. R. vii., end).

Noteworthy among the other numerous Scriptural interpretations which have been handed down in Judah's name are those in which he cleverly introduces etymological explanations, as of the following: Ex. xix. 8-9 (Shab. 87a); Lev. xxiii. 40 (Suk. 35a); Num. xv. 38 (Sifre, Num. 115); II Sam. xvii. 27 (Midr. Teh. to Ps. iii. 1); Joel i. 17 (Yer. Peah 20b); Ps. lxviii. 7 (Mek., Bo, 16).

Use of Scripture.

David did not really commit sin with Bath-sheba, but only intended to do so, according to Judah's interpretation of the words "to do the evil" (II Sam. xii. 9). Rab, Judah's pupil, ascribes this apology for King David to Judah's desire to justify his ancestor (Shab. 56a). A sentence praising King Hezekiah (Ḥul. 6b) and an extenuating opinion of King Ahaz (Lev. R. xxxvi.) have also been handed down in Judah's name. Characteristic of Judah's appreciation of the Haggadah is his interpretation of the word "wa-yagged" (Ex. xix. 9) to the effect that the words of Moses attracted the hearts of his hearers, like the Haggadah (Shab. 87a). The anecdote related in Cant. R. i. 16 (comp. Mek., Beshallaḥ, Shirah, 9) indicates Judah's methods of attracting his hearers' attention in his discourses.

Judah was especially fond of the Book of Psalms (see 'Ab. Zarah 19a; Midr. Teh. to Ps. iii. 1). He paraphrased the wish expressed by David in Ps. xix. 14, "Let the words of my mouth . . . be acceptable in thy sight," thus: "May the Psalms have been composed for the coming generations; may they be written down for them; and may those that read them be rewarded like those that study halakic sentences" (Midr. Teh. to Ps. i. 1). In reference to the Book of Job he said that it was important if only because it presented the sin and punishment of the generations of the Flood (Gen. R. xxvi., end). He proves from Ex. xvi. 35 that in the arrangement of the sections of the Torah there is no chronological order (Sifre, Num. 64). Referring to the prophetic books, he says: "All the Prophets begin with denunciations and end with comfortings" (Midr. Teh. to Ps. iv. 8). Even the genealogical portions of the Book of Chronicles must be interpreted (Ruth R. ii., beginning). It appears from a note in Pesiḳ. R. xlvi. (ed. Friedmann, p. 187a) that there was a haggadic collection containing Judah's answers to exegetical questions. Among these questions may have been the one which Judah's son Simeon addressed to him (according to Midr. Teh. to Ps. cxvii. 1).

His Death.

Judah's death is recorded in a touching account (Yer. Kil. 32b; Ket. 104a; Yer. Ket. 35a; Eccl. R. vii. 11, ix. 10). No one had the heart to announce the patriarch's demise to the anxious people of Sepphoris, until the clever Bar Ḳappara broke the news in a parable, saying: "The heavenly host and earth-born men held the tables of the covenant; then the heavenly host was victorious and seized the tables." Judah's testamentary wishes, which referred to his successor and to his family as well as to his interment, have likewise been handed down (*ib.*). In accordance with his express desire he was buried at Bet She'arim, where he had lived at one time and where he had long since prepared his tomb (Ket. 103b, below); but, according to the work "Gelilot Ereẓ Yisrael," his tomb was shown at Sepphoris.

S. S. W. B.

JUDAH II.: Patriarch; son of Gamaliel III. and grandson of Judah I.; lived at Tiberias in the middle of the third century. In the sources he is called "Judah," "Judah Nesi'ah" (="ha-Nasi"), and occasionally "Rabbi" like his grandfather; as Judah III. is also designated as "Judah Nesi'ah," it is often difficult, sometimes impossible, to determine which one of these patriarchs is referred to. In halakic tradition Judah II. was especially known by three ordinances decreed by him and his academy; one of these ordinances referred to a reform of the divorce laws (Yer. Giṭ. 48d; Giṭ. 46b). Especially famous was the decree permitting the use of oil prepared by pagans, incorporated in the Mishnah with the same formula used in connection with decrees of Judah I.—"Rabbi and his court permitted" ('Ab. Zarah ii. 9; comp. Tosef., 'Ab. Zarah iv. 11). This ordinance, which abrogated an old law, was recognized as authoritative in Babylonia by Samuel and, subsequently, by Rab, who at first hesitated to accept it (see Yer. 'Ab. Zarah 41d; 'Ab. Zarah 37a). Simlai, the famous haggadist, endeavored to induce the patriarch to abrogate also the prohibition against using bread prepared by pagans. Judah, however, refused to do so, alleging that he did not wish his academy to be called the "loosing court" ('Ab. Zarah 37a). Judah could not carry out his intention of omitting the fast-day of the Ninth of Ab when it fell on the Sabbath (Yer. Meg. 70b; Meg. 2b). The patriarch was by no means regarded by his great contemporaries as their equal in scholarship, as appears from a curious meeting between Yannai and Judah II. (see B. B. 111a, b; another version occurs in Yer. Sanh. 16a, where Johanan accompanies Yannai).

Relations with Johanan.

Hoshaiah was in especially friendly relations with Judah (see Yer. Yeb. 9b; Yer. Beẓah 60d, bottom; B. Ḳ. 19b; in another version Yer. B. Ḳ. 2d; Yer. Meg. 70d; Meg. 7a, b; in Pes. 87b, where Hoshaiah refutes an inimical opinion on heretics at the request of the patriarch, Judah I. is probably meant; see Bacher, "Ag. Pal. Amor." i. 96). Together with Joshua b. Levi, Judah assisted at Laodicea at the reception of a female proselyte into Judaism (Yer. Yeb. 8d). Jonathan b. Eleazar was his companion at the baths of Gadara (Yer. Ḳid. 64d). The relations between the patriarch and Johanan, the leader of the Academy of Tiberias, seem to have been friendly (Ta'an. 24a); Johanan accepted the regular material support offered to him by the patriarch (Soṭah 21a). He also induced the patriarch to visit Simeon ben Laḳish, who had fled from Tiberias in consequence of having made offensive remarks in regard to the dignity of the patriarchate, and invite him to return (Yer. Sanh. 19d; Yer. Hor. 47a; Midr. to Sam. vii.).

On another occasion it was Simeon ben Laḳish who succeeded in softening Judah's indignation toward a daring preacher, Jose of Maon, who had denounced the rapacity of the patriarchal house (Yer. Sanh. 20d; Gen. R. lxxx.). Simeon ben Laḳish, moreover, seems to have exhorted the patriarch to unselfishness. "Take nothing," said he, "so that you will have to give nothing [to the Roman authorities]" (Gen. R. lxx.). Simeon ben Laḳish also reminded the patriarch of the need of providing for elementary education in the various cities, referring to the saying, "A city in which there are no schools for children is doomed to destruction" (Shab. 119b; see Bacher, *l.c.* i. 347). Judah was not so unimportant in the field of the Halakah as might appear from some of the details mentioned above, since Simeon ben Laḳish, who was not his pupil, hands down a whole series of halakic sentences in the name of "Judah Nesi'ah" (*i.e.*, Judah II.; see "Seder ha-Dorot," ed. Maskileison, ii. 177; Halevy, "Dorot ha-Rishonim," ii. 30 *et seq.*). Simeon ben Laḳish doubtless survived Judah and repeated his traditions. Simeon handed down also some of Judah's haggadic sentences (see Shab. 119b; Yer. M. Ḳ. 82c). The passage (Nazir 20c) referring to Simeon ben Laḳish as "sitting before Judah" and explaining a midrash does not refer to him as a pupil, but as a member of the college. This view is supported by 'Ab. Zarah 6b, which speaks of Simeon as "sitting before Judah Nesi'ah"; here the patriarch asks Simeon what to do in a certain case, and Simeon clearly appears as the better halakist, not as the patriarch's pupil.

Judah's relations to the scholars of his time in general appear from the following controversy in reference to Ps. xxiv. 6: "One of them says: 'The time is adapted to the leader ["parnas"]'; another says: 'The leader is adapted to the time'" ('Ar. 17a). It was probably the patriarch who expressed the opinion that the leader is adapted to the time in which he is called to leadership, and that he must not be blamed for his own incapacity. In the above-mentioned meeting between Judah and the daring preacher Jose of Maon (Gen. R. lxxx.; Yer. Sanh. 20d) it is the latter who utters the maxim, "As the time, so the prince." On another occasion Judah openly confessed his incapacity. Once during a drought he had ordered a fast and prayed in vain for rain. Thereupon he said, "What a difference between Samuel of Ramah [referring to I Sam. xii. 18] and Judah, the son of Gamaliel! Wo to the time which has such a tent-peg, and wo to me that I have come at such a time!" Rain soon fell in consequence of this self-abasement (Ta'an. 24a).

Relations with Origen.

Various stories of Judah's youth, referring to him and his brother Hillel, have been preserved. "Judah and Hillel, the sons of R. Gamaliel [Gamaliel III.], on their trip to Kabul, in Galilee, and to Biri" (Tosef., Mo'ed, ii., end; Yer. Pes. 30d; Pes. 51a) "offend against the customs of both places. In Kabul they meet with a solemn reception" (Sem. viii.). Grätz identifies this Hillel, Judah's brother, with the "patriarch Joullos" (᾿Ιοῦλλος πατριάρχης), with whom Origen conversed at Cæsarea on Biblical subjects (Origen on Psalms, i. 414; see Grätz, "Gesch." 2d ed., iv. 250, 483; "Monatsschrift," 1881, pp. 443 *et seq.*); but as Hillel himself was not a patriarch, it may be assumed that it was Judah who conversed with Origen. Origen probably misread ΙΟΥΛΟΣ for ΙΟΥΔΑΣ. This assumption agrees with the above-mentioned statement about Hoshaiah's close relations with the patriarch, for it may be assumed as a fact that Hoshaiah had intercourse with Origen at Cæsarea ("Monatsschrift," *l.c.*; "J. Q. R." iii. 357-360; Bacher, "Ag. Pal. Amor." i. 92).

S. S. W. B.

JUDAH III.: Patriarch; son of Gamaliel IV. and grandson of Judah II. The sources do not distinguish between Judah II. and Judah III., and, since the title "Nesi'ah" was borne by both, which of the two in any citation is meant by "Judah Nesi'ah" can be gathered only from internal evidence, especially from the names of the scholars mentioned in the context. Judah III. held the office of patriarch probably during the close of the third and the beginning of the fourth century. He was a pupil of Johanan (d. 279); in a question regarding the time of the new moon, which he sent to Ammi, he introduces a sentence taught to him by Johanan with the words: "Know that R. Johanan has taught us thus all his life long" (R. H. 20a). In a conversation with the famous haggadist Samuel b. Naḥman, he refers to a haggadic sentence by Eleazar b. Pedat (Yer. Ḥag. 77a; Gen. R. xii.). Judah III. commissioned Johanan's pupils Ammi and Assi, who directed the Academy of Tiberias after Eleazar's death, to organize the schools for children in the Palestinian cities (Yer. Ḥag. 76c; Pesiḳ. 120b); Ammi especially appears as his councilor in haggadic questions (Beẓah 27a; M. Ḳ. 12b, 17a; 'Ab. Zarah 33b). Once he questioned Ammi regarding the meaning of Isa. xxvi. 4 (Men. 29a); he also visited the baths of Gadara with Ammi (Yer. 'Ab. Zarah 42a, 45b).

Ammi protested against the number of fast-days which Judah set in times of trouble, saying that the community should not be overburdened (Ta'an. 14a, b). Once Ḥelbo, a pupil of the above-mentioned Samuel b. Naḥman, requested Judah, who had absented himself from a fast-day service held in the public square of the city, to take part in the service, which would thereby become more efficacious (Yer. Ta'an. 65a). The prominent amora Jeremiah is said (Yer. Meg. 74) to have reproached Judah in a letter for hating his friends and loving his enemies (comp. II Sam. xix. 6). Germanus, Judah's Roman slave, is mentioned several times (Yer. Shab. 8c; Yer. Yoma 45b; Yer. 'Ab. Zarah 42a). The most important event of Judah III.'s patriarchate is the visit of the emperor Diocletian to Palestine (see Jew. Encyc. iv. 606, where "Judah III." should be read instead of "Judah II."). One Friday the patriarch was called upon hurriedly to visit Diocletian at Cæsarea Philippi, and his extraordinarily quick journey thither from Tiberias gave rise to a legend (Yer. Ter. viii., end; Gen. R. lxiii.) in which the aged Samuel b. Naḥman appears. (On the Church father Epiphanius' reference to the patriarch see Grätz, "Gesch." 2d ed., iv. 483.) When Judah III. died (*c.* 320) Ḥiyya bar Abba compelled his colleague Ze'era, who was of priestly descent, to ignore, in honor of the dead patriarch, the prescriptions to be observed by the Aaronides (Yer. Ber. 6b; Nazir 5b, c). This scene took place in the "synagogue of the vine" at Sepphoris; hence it is to be assumed that Judah III. was buried at Sepphoris. He was succeeded by his son Hillel II.

S. S. W. B.

JUDAH IV.: Patriarch; son of Gamaliel V. and grandson of Hillel II. Beyond his name and the fact that he officiated during the last two decades of the fourth century, nothing is known of him. He is probably identical with the "Judah Nesi'ah" who addressed a question on Ruth iii. 7 to the haggadist Phinehas b. Ḥama (Ruth R. v.; Bacher, "Ag. Pal. Amor." iii. 312). With his son Gamaliel VI. the patriarchate of Hillel's descendants ceased in Palestine.

Bibliography: Grätz, *Gesch.* 2d ed., iv. 384, 484.

S. S. W. B.

JUDAH BEN ABRAHAM: Pupil of Rashi; flourished at the beginning of the twelfth century. He studied under Rashi with Shemaiah (father-in-law of Rashbam), with whom he was engaged in literary work. Together they arranged the posthumous writings of their teacher, and edited, in accordance with oral instructions, a work on the Passover rite. This work is cited in the Tosafot (Pes. 114a), Rashi and Shemaiah being named as its authors.

Bibliography: Gross, *Gallia Judaica*, p. 508.

S. S. A. Pe.

JUDAH B. ABUN (in Arabic, **Abu Zakariyya**): Spanish poet; lived in Seville. He was probably the son of that Abun to whom Moses ibn Ezra dedicated several poems and whose death Ibn Ezra bewailed in an elegy ("Diwan," No. 12; "Monatsschrift," xl. 198). Judah is classed, in Moses ibn Ezra's works on poetry, among the Spanish poets, and his scholarship is highly praised by Judah ha-Levi. Only one short poem of Judah's has survived; it was addressed in token of friendship to Judah ha-Levi, who answered it by another (Judah ha-Levi, "Diwan," ed. Brody, i. 88, No. 63). Judah b. Abun is not identical with Judah Samuel 'Abbas b. Abun, the author of a well-known "'aḳedah."

Bibliography: Geiger, *Jehuda ha-Levi*, p. 142; Brody, in *Zeit. für Hebr. Bibl.* iii. 178.

G. H. B.

JUDAH B. AMMI: Palestinian amora of the third generation (4th cent.); the son, perhaps, of the celebrated R. Ammi (Bacher, "Ag. Pal. Amor." iii. 715). His house was a rendezvous for scholars, and R. Ze'era, when exhausted by study, would sit at the threshold of Judah's house, so that as the rabbis came and went he could rise in their honor ('Er. 28b). Judah b. Ammi transmitted a number of halakic decisions in the name of Simeon b. Laḳish (Yer. Ter. ii. 3).

Bibliography: Heilprin, *Seder ha-Dorot*, ii. 182; *Ag. Pal. Amor.* iii. 715.

JUDAH ARYEH LÖB BEN JOSHUA HÖSCHEL: Rabbi at Slutsk, government of Minsk, Russia, in the middle of the eighteenth century. He was the author of "Torah Or" (Berlin, 1745), halakot concerning the reading and writing of the Law and the rudiments of Hebrew grammar. Judah wrote also a work entitled "Sha'agat Aryeh," mentioned by him in the twentieth chapter of the preceding work.

JUDAH ARYEH OF MODENA. See Leon (Judah Aryeh) of Modena.

JUDAH ARYEH BEN ẒEBI HIRSCH: French Hebraist; flourished in the beginning of the eighteenth century; born in Krotoschin, Germany. He lived at Avignon and Carpentras, and is generally called after the latter town. He was the author of: "Ohole Yehudah" (Jessnitz, 1719), a Hebrew dictionary, in which special attention is paid to proper names, including their etymology; and "Geza' Yehudah" (Offenbach, 1732), a short concordance. In his introduction to the former work Judah mentions two other works of his: "Pene Aryeh" and "Ḥeleḳ Yehudah," both on the Pentateuch. The grammatical essay which preceded the "Ḥeleḳ Yehudah" was published with a German translation under the title "Yesod Leshon ha-Ḳodesh" (Wilmersdorf, 1724). A Hebrew manuscript in the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2300, 2) contains a grammatical poem, beginning אשר שם ״, and a commentary by Judah, to which are added the paradigms of the verbs, with a Hebrew-German translation, and some grammatical rules.

JUDAH BEN ASHER: German Talmudist; later, rabbi of Toledo, Spain; born in western Germany June 30, 1270; died at Toledo July 4, 1349; brother of JACOB BEN ASHER ("Ba'al ha-Ṭurim"). These dates are deduced from the evidence furnished by Judah's testament and epitaphs (Luzzatto, "Abne Zikkaron," No. 5; see Schechter in "Bet Talmud," iv. 340–346, 372–379).

At the age of thirteen, according to the custom of the German Talmudists of that epoch, Judah began to travel. He set out for Spain July 18, 1283, and arrived at Toledo April 7, 1285, consuming almost two years in his journey. He does not appear to have stayed long in Toledo; for in 1286 he married the daughter of his oldest brother, Jehiel, who is not known to have left Germany before 1305. After her death he married the daughter of Solomon, another brother of his. In 1305 his father, ASHER B. JEHIEL, who was then obliged to leave Germany, sent Judah before him into Spain in order to arrange for his settling there.

Judah says in his testament that when he first came to Toledo he could not profit much by the Spanish Talmudists, as he understood neither their writing nor their language; and as he had sore eyes he could not even occupy himself with writing. After his father's death (1321 or 1328) Judah was chosen by the Toledo community as his successor in the rabbinate. He was held in great esteem by the members of his congregation, and when, on account of some disagreement, he manifested a desire to remove to Seville, they urged him to remain and doubled his salary. Still, he was not favorably inclined toward Spain; for he recommended his five sons to emigrate to Germany, his native country.

Asher, Judah's father, had ordained that every member of his family should give for charitable purposes a tithe of his earnings, and that three-fourths of the amount of such tithe should be confided to two trustees for distribution among the poor. In the agreement signed by Asher and his sons on Oct. 20, 1314, Judah and his brother Jacob were appointed trustees (see JACOB B. ASHER). Judah approved heartily of this charitable institution, and at his request, on Sept. 18, 1346, his sons signed an agreement making a similar arrangement in regard to the disposition of their own earnings (Bet Talmud, iv. 377).

Judah was a recognized authority on rabbinics; and his responsa, together with a fragment of his commentary on Shabbat, were published, under the title of "Zikron Yehudah," by David Cassel (Berlin, 1846).

BIBLIOGRAPHY: Cassel, introduction to *Zikron Yehudah*; Grätz, *Gesch.* 3d ed., vii. 301–302; Steinschneider, *Cat. Bodl.* col. 1291.
S. S. M. SEL.

JUDAH B. BABA: Tanna of the second century; martyred (at the age of seventy) during the persecutions under Hadrian. At that time the government forbade, among other things, the ordination of rabbis, an infraction of the law being punished by the death of both ordainer and ordained and by the destruction of the city in which the ordination took place. Judah b. Baba nevertheless called together five—according to others, seven—disciples qualified for ordination, took them to a defile between Usha and Shefara'm, and duly ordained them. They were detected, and while his disciples, at his urging, fled, he, too old and feeble to flee, was slain by the Roman soldiery, who hurled 300 javelins at his body (Sanh. 14a). So great was the fear of the Romans that people did not dare even to praise him publicly.

In the Haggadah he not only appears as an authority, but is the subject of many sayings and legends. He was known as "the Ḥasid," and it is said that wherever the Talmud speaks of "the Ḥasid," either he or Judah b. Ilai is meant; he was considered by his contemporaries as perfectly stainless (B. Ḳ. 103b). From eight (or eighteen) years of age until his death he enjoyed little sleep; he fasted for twenty-six years in succession; and he defied the Emperor of Rome in his presence (Jellinek, "B. H." ii. 69; vi. 25 *et seq.*, 35).

In the Halakah, he was the author of some decisions; he also transmitted a number of important halakot ('Eduy. vi.), the most remarkable being that one witness to the death of the husband is sufficient to justify permitting the wife to marry again (Hamburger, "R. B. T." ii. 451). Akiba was his most powerful opponent in halakic disputes (Bacher, "Ag. Tan." i. 404).

S. S. A. S. W.

JUDAH BEN BARZILLAI (usually called **Al-Bargeloni** = "the Barcelonian"): Spanish Talmudist of the end of the eleventh and the beginning of the twelfth century. Almost nothing is known of his life. He came of a very distinguished family, on account of which he was not seldom called "ha-Nasi" (the prince), a title of honor borne also by his descendants in Barcelona.

It is very doubtful if Judah was a pupil of Isaac b. Reuben, as some have asserted; nor can the names of his own pupils, and whether Abraham b. Isaac (RABaD II.) of Lunel was among them, be determined. Certain it is that Abraham ben Isaac knew Judah personally and consulted him in difficult cases. Judah once had a controversy with his learned fellow citizen Abraham b. Ḥiyya. The latter, it seems, tried to postpone a wedding because the stars displayed unfavorable omens, while Judah held such a course to be contrary to law, since the regarding of omens is forbidden in the Scriptures. Judah was one of the greatest codifiers of the Middle Ages, although, with the exception of a few fragments, his writings in this department have been lost. They are often cited as authoritative, however, by Rabad II., Isaac b. Abba Mari (for both of whom he is simply "Ha-Rab," or "Ha-Rab ha-Meḥabber"), Abraham b. David (RABaD III.), and Zeraḥiah b. Isaac ha-Levi.

The works of Maimonides and Judah b. Asher, published a century later, caused Judah's codex to be neglected, although individual scholars down to the sixteenth century made use of it. From quotations found in works of more than forty authors it is seen that Judah codified the whole law, ritual and civil. His "Sefer ha-'Ittim," of which manuscript fragments exist in the library of Jews' College, London (Hirschfeld, in "J. Q. R." xiv. 191–192), is cited by name. The fragments contain regulations for the Sabbath; but the book originally included not only regulations for the Sabbath festivals and the New Moon, but also nearly all the material treated of in the first part of the Ṭur, and probably even more than this. Part of the "Sefer ha-'Ittim" is printed in Coronel's "Zeker Natan" (pp. 129 *et seq.*, Vienna, 1872). The part of the codex which deals with marriage laws and kindred topics is called by some "Seder Nashim"; by others, "Yiḥus She'er Bosar." The civil law was contained in the "Sefer ha-Dinim" (so read by Halberstam instead of "Sefer ha-Dayyanim"), which was divided into five "gates," and the extent of which may be judged from that portion of it published as "Sefer ha-Shetarot" (S. I. Halberstam, Berlin, 1898), embracing 138 pages, and treating of the different forms of contracts according to rabbinical law.

Besides this halakic work Judah wrote a detailed commentary on the "Sefer Yeẓirah." Like most commentaries on this remarkable book, that by Judah helps little to an understanding of the text; on the contrary, it contains Judah's own rather diffuse, half-mystical, half-philosophical theological discussions. The author betrays, besides, an astonishing familiarity with the Talmudic-Midrashic literature, and gives extracts from works of the Geonim which are otherwise unknown.

Judah was acquainted with the philosophical writings of Saadia and of Samuel b. Hophni, but not with those of Solomon ibn Gabirol and Baḥya. He shows little talent for dealing with theological or philosophical subjects. He argues strenuously against the charge made by the Karaites that the Rabbis favored anthropomorphisms. The "Sefer Yeẓirah" was first published by Halberstam in 1885 (Berlin).

A treatise on the preparation of scrolls of the Law, published by E. Adler in "J. Q. R." ix. 681–716, is attributed to Judah, but hardly with sufficient reason. In his commentary to the "Sefer Yeẓirah" Judah mentions another of his own works, "Zemannim," about which nothing further is known. To judge from certain allusions of Judah it would seem that he wrote a commentary also on the Bible; at any rate he had planned such a work.

JUDAH BENVENISTE. See Benveniste.

JUDAH DE BLANIS (called also **Laudadeus** [= "Judah"] **Blanis**): Italian physician; lived at Perugia in the middle of the sixteenth century. David de Pomis, in his "De Medico Hebræo," counts Judah among the most prominent Italian physicians. He was a diligent student of Cabala, and associated much with Emanuel of Benevento, the editor of the "Tiḳḳune Zohar." In 1553 Judah caused a copyist to prepare for him a copy of the cabalistic work "Sefer ha-Ḳaneh." It is probable that Judah de Blanis is identical with Judah ben Solomon, who in 1523 copied several letters from Jerusalem, and with a certain Judah ben Solomon de Blanis (דבלניש) of Pesaro, whose authority Lampronti ("Paḥad Yiẓḥaḳ," iii. 26a) invokes.

Bibliography: Grätz, *Gesch.* ix. 42; Brüll, *Jahrb.* i. 237.

JUDAH THE BLIND. See Yehudai ben Naḥman.

JUDAH OF CORBEIL: Tosafist of the thirteenth century. He wrote tosafot to a great number of Talmudical treatises, and is quoted in the "Kol Bo" (No. 87, on Berakot), in the Tosafot Yeshanim (on Yoma 14a), in the tosafot of Asheri (to Yeb. 14a; Ket. 17a; Ḳid. 16b; Naz. 65b; Zeb. 37b), and in the "Shiṭṭah Meḳubbeẓet" of Bezaleel Ashkenazi (on B. Ḳ. 70b). Judah was also the author of ritual decisions which are found in "Haggahot Maimoniyyot" (Hilkot "Ma'akalot Asurot," viii.) and in the responsa of Meïr of Rothenburg (ed. Lemberg, No. 487, on Niddah). Biblical explanations by Judah are quoted in the tosafot to the Pentateuch (Neubauer, "Cat. Bodl. Hebr. MSS." No. 270).

Bibliography; Neubauer, in Geiger's *Jüd. Zeit.* ix. 217; Renan-Neubauer, *Les Rabbins Français*, p. 441; Gross, *Gallia Judaica*, p. 561.

G. I. Br.

JUDAH HA-DARSHAN BEN MOSES: French Bible commentator; lived at Toulouse in the first half of the eleventh century. He is often quoted by Rashi in his commentary on the Pentateuch, and is twice mentioned in a commentary on the Maḥzor (Cod. Munich, No. 346) in connection with an explanation of Zeph. iii. 1 and of an expression of Eliezer ha-Ḳalir's quoted by Menahem of Ḥelbo. According to Geiger, Judah was the son of Moses ha-Darshan of Narbonne; in that case he may be identical with Judah ben Moses, a disciple of Rashi who is cited by Abraham ibn Daud in his "Sefer ha-Ḳabbalah" as having taught in Narbonne.

Bibliography: Geiger, *Parschandatha*, p. 11; Gross, *Gallia Judaica*, p. 214.

G. I. Br.

JUDAH B. DAVID CAGLIARI. See Cagliari.

JUDAH BEN DAVID OF MELUN: French tosafist of the first half of the thirteenth century; son of the tosafist David of Melun (department of Seine-et-Marne). In Perez of Corbeil's tosafot to Baba Ḳamma (ed. Leghorn, p. 53a) he is quoted under the name "Judah of Melun." After 1224 he took charge of the Talmud school at Melun; and he was one of the four rabbis who defended the Talmud against Nicholas Donin in the public disputation at Paris in 1240.

S. S. A. Pe.

JUDAH BEN ELI, or **'ALI ('ALAN), THE TIBERIAN:** Karaite grammarian and liturgical poet; died at Jerusalem, where he was rosh yeshibah, in 932. He was the author of a grammatical work entitled "Me'or 'Enayim," in which he divided the Hebrew nouns into thirty-five classes (see Hadassi, "Eshkol ha-Kofer," alphabets 173, 257). Pinsker ("Liḳḳuṭe Ḳadmoniyyot," p. 5) supposes that the scholar of Jerusalem mentioned by Abraham ibn Ezra at the beginning of his "Moznayim" as author of eight grammatical works was Judah b. Eli. He wrote also two piyyuṭim (Karaite Siddur, iv. 119), and a dirge on the ruin of Zion containing an acrostic on his name (Pinsker, *l.c.* Supplement, p. 139).

Judah is identified by Dukes ("Ḳontres," p. 2) and Abraham Geiger ("Oẓar Neḥmad," ii. 158) with the 'Ali, or Eli, b. Judah ha-Nazir quoted by David Ḳimḥi in his "Miklol" (ed. Fürth, p. 90b). The identity of Judah b. 'Ali and 'Ali b. Judah is confirmed by Abraham b. Azriel in his commentary on the Maḥzor (Perles, in "Monatsschrift," xxvi. 365), who quotes a Judah ha-Nazir, or ha-Nasi, b. 'Ali. Pinsker (*l.c.*) identifies Judah also with Yaḥya ibn Zakariyya the Tiberian, mentioned by the Mohammedan historian Mas'udi.

K. M. Sel.

JUDAH BEN ELIEZER (called **YeSOD**): Lithuanian Talmudist and philanthropist; born at Wilna; died there March 18, 1762, having officiated as dayyan, communal secretary, and, for a short time, rabbi. Although so eminent as a Talmudist that he was consulted in the dispute between Jonathan Eybeschütz and Jacob Emden, he was nevertheless revered by the Jews of Wilna not for his learning, but because of his philanthropy. He lived at a time of continuous persecution (see Wilna), but was ever ready to come to the help of his coreligionists with both word and deed. He renovated the half-ruined synagogue, built a new one that still bears his name, contributed to philanthropic societies, and aided widows and orphans.

The Jews showed their gratitude to their benefactor by appointing him temporary rabbi, with the single purpose that he might keep this important office open for his young son-in-law, Samuel b. Abigdor. Judah also rendered important services as communal secretary; for he not only arranged and carefully preserved all the documents relating to the history of the Jews of Wilna, but also, in his last will, made it obligatory upon every succeeding secretary to continue his work.

Bibliography: Fuenn, *Ḳiryah Ne'emanah*, p. 115.
S. S. A. Pe.

JUDAH BEN ELIJAH TISHBI: Karaite scholar and liturgical poet; flourished at Belgrade in the first half of the sixteenth century; grandson of Abraham ben Judah. He copied and completed the exegetical work of his grandfather, entitled "Yesod Miḳra," and was the author of liturgical poems, several of which have been inserted in the Karaite prayer-book ("Siddur ha-Ḳera'im," ii. 215; iii. 171, 172, 174). Judah was the copyist of the "Yehi Me'orot," on the precepts attributed to Tobiah ben Moses.

Bibliography: Pinsker, *Liḳḳuṭe Kadmoniyyot*, p. 93; Fürst, *Gesch. des Karaert.* ii. 293.
K. I. Br.

JUDAH BEN ENOCH: Chief rabbi and preacher of Pfersee, Bavaria; lived at the end of the seventeenth century. His sermons for the festivals of Passover, Pentecost, and Tabernacles were published with those of his father, Enoch ben Abraham, under the title of "Reshit Bikkurim" (Frankfort-on-the-Main, 1708). A collection of his responsa was published by his son Enoch ben Judah under the title "Ḥinnuk Bet Yehudah" (*ib.* 1709), in which are included some responsa of Judah's father, as well as of Enoch ben Judah himself.

JUDAH B. EZEKIEL: Babylonian amora of the second generation; born in 220; died at Pumbedita in 299. He was the most prominent disciple of Rab (Abba Arika), in whose house he often stayed, and whose son Ḥiyya was his pupil ('Er. 2b). After Rab's death Judah went to R. Samuel, who esteemed him highly and called him "Shinena" (= "sharp-witted"; Ber. 36a; Ḳid. 32a). He remained with Samuel until he founded a school of his own at Pumbedita. Judah possessed such great zeal for learning and such tireless energy that he even omitted daily prayer in order to secure more time for study, and prayed but once in thirty days (R. H. 35a). This diligence, together with a remarkably retentive memory, made it possible for him to collect and transmit the greater part of Rab's, as well as many of Samuel's, sayings; the Talmud contains about four hundred haggadic and halakic sayings by the former, and many by the latter, all recorded by Judah b. Ezekiel; while a number of other sayings of Rab's that occur in the Talmud without the name of the transmitter likewise were handed down by Judah (Rashi to Ḥul. 44a).

Transmits Rab's and Samuel's Sayings.

In recording the words of his teachers, Judah used extreme care, and frequently stated explicitly that his authority for a given saying was uncertain, and that his informant did not know positively whether it was Rab's or Samuel's (Ḥul. 18b). His own memory, however, never failed him, and the traditions recorded by him are reliable. When his brother Rami says, in one place, that a certain sentence of Rab's, quoted by Judah, should be disregarded (Ḥul. 44a), he does not question the accuracy of Judah's citation, but implies that Rab had afterward abandoned the opinion quoted by Judah, and had, in a statement which the latter had not heard, adopted an opposite view.

Judah b. Ezekiel introduced a new and original method of instruction in the school which he built up at Pumbedita; by emphasizing the need of an exact differentiation between, and a critical examination of, the subjects treated, he became the founder of Talmudic dialectics (Sanh. 17b; Ḥul. 110b; B. M. 38b). His method of instruction, however, did not please some of his older pupils, and they left him; among these was Ze'era, who went to Palestine despite Judah's declaration that no man

New Method of Dialectics.

should leave Babylonia for that country (Ket. 111a). But the new method was acceptable to most of his disciples, and was especially attractive to the young, so that the school at Pumbedita steadily increased in importance and popularity. After the death of Huna, head of the Academy of Sura, most of his pupils went to Pumbedita, which, until the death of Judah, remained the only seat of Talmudic learning. Although Judah devoted himself chiefly to dialectics, he did not fail to interpret the mishnayot, to explain peculiar words in them (Pes. 2a; M. Ḳ. 6b), or to determine the correct reading where several were given (Beẓah 35b; Suk. 50b).

Judah gave little attention to Haggadah, and what work he did in that field was almost entirely lexicographical (Ned. 62b; Ḥul. 63a; Ta'an. 9b; Giṭ. 31b). In his daily conversation he took pains to acquire the habit of exact and appropriate expression, for which his contemporary Naḥman b. Jacob praised him (Ḳid. 70a, b). A lover of nature, Judah was a close observer of the animal and plant life around him. "When in the springtime thou seest Nature in her beauty thou shalt thank God that He hath formed such beautiful creatures and plants for the good of mankind" (R. H. 11a). Several of his explanations of natural phenomena have been preserved (Ta'an. 3b, 9b), as well as etymologies of the names of animals and descriptions of their characteristics (Ḥul. 63a; M. Ḳ. 6b; Shab. 77b).

Judah was celebrated for his piety, and it is related that whenever he ordained a fast in time of drought rain fell (Ta'an. 24a). According to him, piety consists chiefly in fulfilling one's obligations to one's fellow creatures and in observing the laws of "meum et tuum" (B. Ḳ. 30a). It was probably for this reason that he applied himself chiefly to the Mishnaic treatise Neziḳin (Ber. 20a).

JUDAH B. ḤIYYA: Palestinian amora of the first generation (3d cent.); son of the famous R. Ḥiyya. In Midr. Shemuel xi., and in Yer. Sanh. 29b, he is called also **Judah be-Rabbi.** He was the twin brother of Hezekiah (Yeb. 65b) and son-in-law of Yannai, who outlived him (Ket. 62b). Judah b. Ḥiyya is sometimes called "Rabbi" (Sanh. 37b), although it would seem that he was never ordained, since he is more frequently mentioned without this title. He and his brother Hezekiah are often termed simply the "sons of Ḥiyya" (Yoma 5b, *et al.*) or "the young people" (Ḥul. 20a), although both were celebrated for their learning and piety. Simeon ben Laḳish states that they left Babylonia with their father and went to Palestine, and spread learning there (Suk. 20a). Their piety is extolled in Ḥul. 86a and B. M. 85b.

Judah was extremely diligent, and would spend the entire week in the seminary away from his family, going home only for the Sabbath (Ket. 62b). Besides the discussions which Judah and Hezekiah held with Johanan ('Ab. Zarah 46a) and Joshua b. Levi (Zeb. 116a), and the sayings that are ascribed to both brothers, many maxims have been preserved that belong to Judah alone. The following sentence of his may be mentioned: "Cain did not know where life leaves the body, and consequently inflicted many blows upon Abel before he finally wounded him in the neck and killed him" (Sanh. 37b).

JUDAH BEN ILAI: One of the most important tannaim of the second century; born at Usha, a city of Galilee (Cant. R. ii.). His teachers were his father (himself a pupil of Eliezer b. Hyrcanus), Akiba, and Ṭarfon. He studied under the last-named in early youth (Meg. 20a), and was so closely associated with him that he even performed menial services for him (Tosef., Neg. viii. 1). Judah b. Baba ordained him as teacher at a time when the Roman government forbade such a ceremony. Almost at the beginning of Hadrian's persecution Judah ben Ilai was forced to flee from Usha and conceal himself; and he often related episodes of the "times of peril" (Tosef., 'Er. viii. 6; Suk. i. 7). When, after the revocation of Hadrian's edicts of persecution, the pupils of Akiba held their reunions and councils in Usha, Judah received the right to express his opinion before all others, thus being "Rosh ha-Medabbebrim" (leader among the speakers), on the ground that he was the best authority on the traditions (for other grounds see Cant. R. ii., 4; Ber. 63b; Shab. 33a). He was intimately associated with the patriarch Simon b. Gamaliel II., in whose house he is said to have been entrusted with the decision in matters pertaining to the religious law (Men. 104a). He was also able to win the confidence of the Romans by his praise of their civilizing tendencies as shown in their construction of bridges, highways, and market-places (Shab. 33a).

Personal Piety.

Judah's personal piety was most rigid; and he observed many of the practises of the Ḥasidim and the Essenes. He drank no wine except on the days when the Law required, and preferred to eat only vegetable food (Ned. 49b). On Friday, after he had bathed and clad himself in white to prepare for the Sabbath, he seemed to his pupils an angel. According to a later rule of interpretation, Judah b. Ilai is meant in all passages reading, "It once happened to a pious man" (B. Ḳ. 104a). He was naturally passionate and irascible (Ḳid. 52b); but such was his self-control that he seemed the reverse. Thus he once showed exceptional mildness when he had an opportunity to reconcile a married pair (Ned. 66b). The study of the Law was his chief and dearest occupation; and he lamented the fact that such a devotion was no longer wide-spread as in former times. Yet his interest in the joys and sorrows of his fellow men was keener still. Whenever a funeral or a wedding-procession passed, he interrupted his study to join it (Ket. 17a).

Judah lived in the utmost poverty. His wife made with her own hands a cloak which served them both in turn: the wife as she went to the market; the husband on his way to the college. Nevertheless, he declined all assistance, since he had accustomed himself to the simplest mode of life, and on principle desired to have no delight in this world (Ned. 40b). His high conception of the calling and the responsibility of a teacher of the Law, as well as his mild judgment of the multitude, was expressed in his interpretation of Isa. lviii. 1: "Show my people their transgression"—that is, the teachers of the Law, from whose errors wickedness arises —"and the house of Jacob their sins"—that is, the ignorant, whose wickedness is only error (B. M. 33b).

Sources of His Teaching.

Judah often teaches the Mishnah of Eliezer, which he had received from his father (Men. 18a), and frequently explains the traditional halakot by particularizations introduced by the phrases "Ematai?" (= "When does this statement apply?") and "Bameh debarim amurim?" (= "In what connection was this said?" Ḥul. v. 3; Ber. ii. 4). His most frequent teachings, however, are the doctrines of his master Akiba. His own halakot he sets forth in the form of midrashim (see Midrash Halakah); for, in his view, mishnah and midrash are identical (Ḳid. 49a). Those who devote themselves only to the Mishnah, that is, to the stereotyped Halakah without its Scriptural basis, he terms "enemies" (B. M. 33b); but those who direct their attention to the Scriptures are "brothers." Yet it is only they who interpret or expound the Bible who receive this latter name; for he who makes a literal translation of a verse of Scripture is a "liar," and he who adds to it a "blasphemer" (Tosef., Meg., end).

Chief Authority of Sifra.

In his interpretation of the Scriptures and in the deduction of legal requirements from it Judah adheres strictly to the method of his teacher Akiba, whose rules of exegesis he adopts. It is thus that he explains a word apparently superfluous (Bek. 43b; Pes. 42a), and employs the rules of "al tiḳri" ('Ar. 13b) and "notariḳon" (Men. 29b). Nevertheless, he interprets also according to the older Halakah in cases where he deduces a definition from the literal wording of a passage, and bases his explanation strictly on its obvious meaning, "debarim ki-ketaban" (Pes. 21b, 91a; Zeb. 59b). The greater portion of the Sifra, or halakic midrash on Leviticus which originated in the school of Akiba, is to be attributed to Judah, nearly all the anonymous statements in it being his, "Setam Sifra R. Yehudah" ('Er. 96b). Of his exegetical principles only one need be noted: "In the Holy Scriptures certain phrases which border on blasphemy have been altered" (Mek., ed. Weiss, 46a).

Many haggadic utterances and traditions of Judah's have been preserved. His traditions regarding the Temple at Jerusalem are very numerous; and special interest attaches to his accounts of the origin of the Temple of Onias (Men. 109b) and of the Septuagint (Meg. 9), as well as to his description of the synagogue at Alexandria (Suk. 51b) and of the conditions and institutions of antiquity (Tosef., Ter. i. 1; Shab. v. 2; and many other passages).

Many of Judah's maxims and proverbs have likewise been preserved; a few are cited here: "Great is beneficence: it quickeneth salvation" (B. B. 10a). "Great is toil: it honoreth the toiler" (Ned. 49b). "Who teacheth his son no trade, guideth him to robbery" (Ḳid. 29a). "The best path lies midway" (Ab. R. N. xxviii.).

Judah attained a very great age, surviving his teachers and all of his colleagues. Among his disciples who paid him the last honors was Judah ha-Nasi. His grave was shown at Ensetim beside the tomb of his father ("Seder ha-Dorot," p. 169).

JUDAH BEN ISAAC (known also as **Judah Sir Leon of Paris**): French tosafist; born in Paris 1166; died there 1224 (Solomon Luria, Responsa, No. 29). According to Gross he was probably a descendant of Rashi, and a pupil of Isaac b. Samuel of Dampierre and his son Elhanan. He married a daughter of Abraham b. Joseph of Orleans, who has been identified by Jacobs ("Jews of Angevin England," p. 409) with Abraham fil Rabbi Joce, chief Jew in London in 1186. In a list of that year associated with Abraham occurs the name of **Leo Blund,** whom Jacobs identifies with Judah ben Isaac (*ib.* p. 88; comp. Bacher, in "J. Q. R." vi. 360).

Sir Leon must have left Paris in 1182, when all Jews were expelled from the French king's dominions; he did not return till 1198. According to Gross, however, he received his chief training at Dampierre under Simson of Sens, Simson of Coucy, Solomon of Dreux, and Abraham b. Nathan of Lunel. Shortly after 1198 he returned to Paris and founded an important school of tosafists, in which were trained, among others, Jehiel b. Joseph (Sir Leon's successor), Isaac b. Moses (author of "Or Zarua'"), Samuel b. Solomon (Sir Morel of Falaise), and Moses of Coucy. He appears to have composed tosafot to most of the tractates of the Talmud, traces being found of his annotations to twenty tractates. The only collection that has been published are his additamenta to Berakot, published at Warsaw in 1863. A long fragment of his tosafot to 'Abodah Zarah is still extant in a manuscript that formerly belonged to Luzzatto and Halberstam ("R. E. J." vii. 55) and that is now in the possesion of Jews' College, London. A few of his responsa are also found, chiefly in various additions to the Mordecai, while reference is also found to his commentary on the Pentateuch, in which he appears to have followed the method of RaSHBaM.

Judah wrote several poems—an Aramaic description of the Decalogue (Zunz, "Ritus," p. 198), a pizmon (*idem*, "Literaturgesch." p. 329), and a piyyuṭ (Landshuth, "'Ammude ha-'Abodah," i. 68). He is not, however, to be identified with the mystical Judah Ḥasid, to whom are attributed the "Sefer ha-Ḥasidim" and an ethical will. Among the writers whom Judah quotes may be mentioned R. Amram, Sherira, Hai, and Nissim Gaon, Alfasi, Maimonides, Elijah b. Menahem, Gershom b. Judah, Jacob of Orleans, Jacob of Corbeil, Joseph Kara, Joseph Bekor Shor, Yom-Ṭob of Joigny, and Rashi.

JUDAH BEN JOSEPH PEREZ: Rabbi at Venice and Amsterdam in the first half of the eighteenth century. He wrote: "Seder Ḳeri'e Mo'ed," cabalistic readings for the holy days (Venice, 1706); "Peraḥ Lebanon," sermons on the Pentateuch, to which he added "Naḥal Etan," sermons and autobiography of his relative and predecessor Isaac Cavallero (Berlin, 1712); "Sha'are Raḥamim," mystical and cabalistic prayers, readings from the Zohar, etc. (Venice, 1716); "Fundamento Solido," compendium of Jewish theology in Spanish (Amsterdam, 1729); "Aseret ha-Debarim," ch. xix.-xx. of Exodus with poetical paraphrases in Aramaic and Arabic, and hymns in praise of Simeon ben Yoḥai (*ib.* 1737). He also edited "Dibre Yosef," responsa of Joseph ben Mordecai ha-Kohen of Jerusalem (Venice, 1715).

JUDAH JUDGHAN. See Yudghanites.

JUDAH B. KALONYMUS B. MEÏR: German historian and Talmudic lexicographer; flourished in the second half of the twelfth century. Judah came from one of the most celebrated Jewish families of Germany. Kalonymus, Judah's father, was a scholar, an elder in Speyer, and respected at court. He was taught by his great-uncle Abraham b. Samuel, by Judah (the brother of the pious Shemaiah b. Mordecai), and by his uncle Moses b. Meïr (of whom nothing more is known). Judah was the author of the following works: (1) "Agron," a Talmudic lexicon, dealing especially with the "termini technici" of the Talmud; (2) a treatise on benedictions, treating especially the linguistic forms used; (3) tosafot to Beẓah and Soṭah; (4) a work in which Judah enumerates all the persons mentioned in the Talmud and the Midrash, and seeks to determine their periods, examining critically and in detail all the statements concerning them to be found in rabbinical literature.

The last-given work is the only one of Judah's writings that has been, partially at least, preserved. The Bodleian Library has two manuscripts containing parts of it; one (No. 2199 in Neubauer, "Cat. Bodl. Hebr. MSS.") extends from ברותן to ישעיה inclusive; the other (No. 2220, *ib.*) extends only to טרפון, and is also otherwise shortened. Portions of this lexicon, now generally called "Yiḥuse Tannaim wa-Amoraim," have been published in Steinschneider's article חדקא in "Oẓar Neḥmad" (ii. 29) and in Goldberg's article בר פדא in "Ha-Maggid" (xi. 85, 93); and R. N. Rabbinowicz has published, under the title "Yiḥuse Tannaim wa-Amoraim," in the publications of the society Meḳiẓe Nirdamim (Lyck, 1874), all that is given under the letter ב in MS. 2199. As the scope of this excerpt shows, the book was laid out on a large scale; in fact, the remnant of it preserved in manuscript comprises 800 pages.

The great knowledge of the author, who was master of the whole Talmudic literature, is excelled only by his critical ability. Quite like a modern critic, Judah went to work cautiously, and sifted his material carefully. He not only compared parallel passages, but in doubtful cases he presented collations from all the manuscripts he could find. Besides Talmudic-Midrashic literature, he made use of all the geonic and rabbinical writings. His lexicon is, therefore, of quite as much value for post-Talmudic literature as for the Talmudic. Judah's book is especially rich in material for the history of German scholars of the eleventh and twelfth centuries.

Bibliography: Epstein, *Das Talmudische Lexicon Yiḥuse Tannaim wa-Amoraim*, reprinted from *Monatsschrift*, xxxix.; Goldberg, in *Ha-Maggid*, xi. 85; R. N. Rabbinowicz, in the introduction to his edition of the fragments of Judah's work; Steinschneider, in *Oẓar Neḥmad*, ii. 29.

S. S. L. G.

JUDAH IBN ḲURAISH: Hebrew grammarian and lexicographer; born at Tahort, northern Africa; flourished in the eighth and ninth centuries. In his grammatical work he advanced little beyond his predecessors, but his contributions to comparative philology are of great value. He recognized that the various Semitic languages are derived from one source, and that, although different in their development, they are subject to the same linguistic laws. His "Risalah," a letter in Arabic to the community at Fez (ed. Bargès and Goldberg, Paris, 1857), is the earliest known contribution to the critical study of the Semitic languages. In the preface he warns the community of Fez not to neglect the study of the Targumim, since they are important for a correct knowledge of the Bible, which contains many Aramaisms. Judah's grammatical researches were original, and he maintained his views regardless of the Mishnah and the Talmud; hence he has been, erroneously, considered a Karaite. He is said to have written, in addition to the "Risalah," a dictionary, and a book on the Commandments. Of these works, however, nothing certain is known, although Judah himself mentions the dictionary in the "Risalah."

Bibliography: Goldberg, preface to the *Risalah*, Paris, 1857; Karpeles, *Gesch. der Jüdischen Literatur*, i. 435 *et seq.*, Berlin, 1886; Winter and Wünsche, *Die Jüdische Litteratur*, ii. 142-144.

J. J. Z. L.

JUDAH BEN LAḲISH: Tanna of the second century. His name occurs only in the Tosefta and the Mekilta. He is the author of the halakah to the effect that a corpse may be carried on the Sabbath to save it from a fire (Shab. 43b). Besides this halakah, which is transmitted by him alone, there is another (Tosef., Sanh. i. 7) which prescribes that after a judge has heard both sides, and has formed an opinion, he may not say: "I will not judge between you."

A few of Judah's haggadic utterances also have been preserved; *e.g.*: "The children of Israel had two Arks of the Covenant. In one were the broken tables of stone; in the other, the Book of the Torah" (Tosef., Soṭah, vii. 18). "The Ark of the Covenant was not carried to Babylon, but was hidden in the Temple itself" (Yoma 53a). "When a scholar neglects learning, Prov. xxvii. 8 may be applied to him" (Ḥag. 9b).

Bibliography: Brüll, *Einleitung in die Mischna*, p. 249, Frankfort-on-the-Main; Bacher, *Ag. Tan.* ii. 494-495.
S. J. Z. L.

JUDAH LEON DI LEONE: Italian rabbi from 1796 to 1835. Sent as a messenger from Hebron to Rome, he became rabbi in the latter city during the troublous times following the struggles of the Jews for emancipation and reform. He was one of the collaborators to the collective work entitled מכתבי הרבנים אשר בערי איטליא ("Letters of Italian Rabbis"), which first appeared at Leghorn, then in a German translation at Hamburg, and was subsequently translated into French. Judah represented the Jewish community when Pius VII. entered Rome in 1800; the pope, however, did not keep the promises of good-will toward the Jews which he then made. While Rome was under French rule Judah was director of the consistory of Rome (1811). He could not preach there, as he did not understand Italian. In his work "Hilkot Bekorot" he appears as a halakic author.

Bibliography: Vogelstein and Rieger, *Gesch. der Juden in Rom*, ii. 400; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 166; Berliner, *Gesch. der Juden in Rom*, ii. 2, 130.
S. I. E.

JUDAH LEONE B. ISAAC SOMMO (DE SOMMI; called also Leone Ebreo): Italian writer and dramatic critic and manager; died after 1591. A scion of the Portaleone family of Mantua, he lived first at Ferrara—where he was the friend of Azariah dei Rossi and became known as a scholar and skilful penman—and then at Mantua (*c.* 1550–1590). At the instance of the ducal court of Mantua he then devoted himself entirely to the stage, as a teacher of the theory and practise of the dramatic art. In 1562, as a result of the appearance of his poem "Drusilla," he was elected member of the Accademia degli Invaghiti, and as he could not become a "cavaliere," being a Jew, he received the title of "Scrittore Accademico."

He was a prolific writer in Italian; and his works, which are extant in manuscript in sixteen volumes at Turin, include dramas, dialogues on dramatic art, and poems. The dialogues deal with: (1) the origin and rules of the art of acting; (2) division of the drama into five acts; (3) delivery, costumes, etc.; (4) the actor; (5) scenery; (6) the entr'acte.

Judah considered Moses, the reputed author of the Book of Job, as the originator of the drama. He pretended to have translated from the Aramaic a book, "Corso della Vita," in which a youth receives instructions for correct living from his guardian angel, and is then seduced by the Tempter. This work, according to Judah, was intended for dramatic representation. For the Accademia Judah wrote ten pieces including allegorical dramas on the accession of princes and on their death. His lyrical poems fill four volumes, and include sonnets, canzones, and satires, which he dedicated to various members of the house of Gonzaga and to the pope as protector of the Accademia.

In the field of Jewish literature, Judah translated forty-five Psalms in ottave rima, with superscriptions in Hebrew. He also wrote "Magen Nashim," in Hebrew, an apology for woman, with an Italian translation, which he dedicated to Hannah da Rieti.

D. I. E.

JUDAH HA-LEVI (Arabic, **Abu al-Ḥasan al-Lawi**): Spanish philosopher and Hebrew poet; born at Toledo, southern Castile, in the last quarter of the eleventh century; died in the Orient after 1140. If his birth is correctly assigned to 1085 or 1086 (Rapoport, in "Kerem Ḥemed," vii. 265), it occurred about the time of the eventful conquest of Toledo (May 24, 1085) by the Christian king Alfonso VI. It is probable that Judah's father, Samuel "the Castilian," sent Judah, who was his only son, to Lucena to be educated in the various branches of Jewish learning at the school of Isaac Alfasi. On the death of his master, Judah composed an elegy (Brody, "Diwan des Abul-Ḥasan Jehuda ha-Levi," ii., No. 14, p. 100). It was probably in Lucena, too, that Judah won the friendship of Alfasi's most prominent pupils, Joseph ibn Migas and Baruch Albalia. Judah chose medicine as his profession; but he early evinced a love for poetry and showed marked poetic talent. **His Youth.** He was well acquainted with the productions of the Arabic and the Castilian poets; yet the muse spoke to him in the old and sacred language of the Bible, in which "he sang for all times and places, soon becoming the favorite of the people" (Zunz, "Literaturgesch." p. 203). He became deeply versed in Greco-Arabic philosophy also. The early ripening of his poetic talent aroused the admiration of his friend and senior, the poet Moses ibn Ezra, who accorded him enthusiastic praise (see Luzzatto in "Kerem Ḥemed," iv. 86; Dukes, "Moses ibn Ezra," p. 987; Geiger, "Diwan des Castilier's Abu'l-Hassan," pp. 15, 120).

After completing his studies, which he, being in easy circumstances, had been able to pursue deliberately, Judah returned to Toledo, where he soon acquired so large a practise that he complained in a letter to his friend David Narboni (Brody, *l.c.* i. 224, 225) of a lack of tranquillity and leisure. He married in Toledo; and from allusions in some of his poems it is evident that his only child was a daughter, through whom he had a grandson, also named Judah.

Judah ha-Levi does not seem to have been contented in Toledo; for he removed to the Mohammedan city of Cordova. Even here he did not feel at ease. Though personally he occupied an honored position as a physician, he felt the intolerance of the Almoravid fanatics toward his coreligionists. He had long yearned for a new, or rather for the old, home—for the Holy Land. **Journey to the Holy Land.** This yearning was deepened by his intense application to his religio-philosophical work and by his resulting clearer insight into Judaism; and at length he decided to set out on a journey to Palestine. For himself at least, he wished "to do away with the contradiction of daily confessing a longing and of never attempting to realize it" (Kaufmann, "Jehuda Halevi"); and therefore, on the death of his wife, he bade farewell to daughter, grandson, pupils, friends, rank, and affluence. There was only one image in his heart—Jerusalem:

> " O city of the world, most chastely fair,
> In the far West, behold I sigh for thee.
> * * * * * * * * *
> Oh! had I eagle's wings, I'd fly to thee,
> And with my falling tears make moist thine earth."
> (Brody, *l.c.* ii. 167; version in Lady Magnus' "Jewish Portraits.")

After a stormy passage he arrived in Alexandria, where he was enthusiastically greeted by friends and admirers. At Damietta he had to struggle against the promptings of his own heart and the pleadings of his friend Ḥalfon ha-Levi that he remain in Egypt, which also was Jewish soil and free from intolerant oppression. He, however, resisted the temptation to remain there, and started on the tedious land route trodden of old by the Israelitish wanderers in the desert. Again he is met with, worn out, with broken heart and whitened hair, in Tyre and Damascus. Here authentic records fail; but Jewish legend has taken up the broken threads of history and woven them further. It is related that as he came near Jerusalem, overpowered by the sight of the Holy City, he sang his most beautiful elegy, the celebrated "Zionide," "Zion ha-lo Tish'ali." At that instant he was ridden down and killed by an Arab, who dashed forth from a gate (Gedaliah ibn Yaḥya, "Shalshelet ha-Ḳabbalah," ed. Venice, p. 40b).

The life-work of Judah ha-Levi was devoted to poetry and philosophy. His poetry is usually classified under the heads of secular and religious, or, as in Brody's new edition of the "Diwan," under liturgical and non-liturgical. Such a division, however, can be only external; for the essential characteristic of Judah's poems—which are the expression of a deeply religious soul—is the lofty key to which they are attuned. Even in his drinking- and love-songs an attentive reader may hear the vibrations of religion's overtones.

His Secular Poetry.

The first place in his secular or non-liturgical poetry is occupied by poems of friendship and eulogy. Judah must have possessed an attractive personality; for there gathered about him as friends, even in his earliest youth, a large number of illustrious men, like Levi al-Ṭabban of Saragossa, the aged poet Judah ben Abun, Judah ibn Ghayyat of Granada, Moses ibn Ezra and his brothers Judah, Joseph, and Isaac, the vizier Abu al-Ḥasan, Meïr ibn Kamnial, the physician and poet Solomon ben Mu'allam of Seville, and Samuel ha-Nagid of Malaga, besides his schoolmates Joseph ibn Migas and Baruch Albalia. He was associated also with the grammarian Abraham ibn Ezra; but the assertion that the latter was the son-in-law of Judah is one of the fictions of Gedaliah ibn Yaḥya ("Shalshelet ha-Ḳabbalah," ed. Amsterdam, p. 41a). Equally incorrect is the statement made by the author of "Yuḥasin" (ed. Amsterdam, p. 186) that the two were cousins. In Cordova Judah addressed a touching farewell poem to Joseph ibn Ẓaddiḳ, the philosopher and poet (Geiger, "Nachgelassene Schriften," p. 159). In Egypt, where the most celebrated men vied with one another in entertaining him, his reception was a veritable triumph. Here his particular friends were Aaron ben Jeshua Alamani in Alexandria, the nagid Samuel ben Hananiah in Cairo ("Monatsschrift," xl. 417 *et seq.*), Ḥalfon ha-Levi in Damietta, and an unknown man in Tyre, probably his last friend. In their sorrow and joy, in the creative spirit and all that moved the souls of these men, Judah sympathetically shared; as he says in the beginning of a short poem (Brody, *l.c.* i., No. 45): "My heart belongs to you, ye noble souls, who draw me to you with bonds of love" (comp. Geiger, *l.c.* iii. 123).

Especially tender and plaintive is Judah's tone in his elegies (Brody, *l.c.* ii. 67 *et seq.*). Many of them are dedicated to friends. Besides those composed on the deaths of the brothers Judah (*ib.* Nos. 19, 20), Isaac (*ib.* No. 21), and Moses ibn Ezra (*ib.* No. 16), R. Baruch (*ib.* Nos. 23, 28), Meïr ibn Migas (*ib.* No. 27), his teacher Isaac Alfasi (*ib.* No. 14), and others, one of the most affecting is that on Solomon ibn Farissel, who was murdered on May 3, 1108. The news of this friend's death suddenly changed Judah's poem of eulogy (Nos. 11, 22) into one of lamentation (*ib.* Nos. 12, 13, 93 *et seq.*), which for grandeur and loftiness of tone has been compared to David's lament over Jonathan.

Love-Songs.

Joyous, careless youth, and merry, happy delight in life find their expression in his love-songs (*ib.* ii. 1 *et seq.*). Many of these are epithalamia, and are characterized by a brilliant Oriental coloring as well as by a chaste reserve (see "Betulat Bet Yehudah," ed. Luzzatto, *passim*). In Egypt, where the muse of his youth found a glorious Indian summer in the circle of his friends, he wrote his swan-song:

> " Wondrous is this land to see,
> With perfume its meadows laden,
> But more fair than all to me
> Is yon slender, gentle maiden.
> Ah, Time's swift flight I fain would stay,
> Forgetting that my locks are gray."
> (Geiger, *l.c.* p. 168.)

Drinking-songs and enigmas in rime by Judah have also been preserved (Brody, *l.c.* ii. 189 *et seq.*).

His Religious Poetry.

If one may speak of religious geniuses Judah ha-Levi must certainly be regarded among the greatest produced by medieval Judaism. No other man, it would seem, drew so near to God as Judah; none else knew how to cling to Him so closely, or felt so safe in His shadow. At times the body is too narrow for him: the soul yearns for its Father in heaven, and would break through the earthly shell (S. D. Luzzatto, "Diwan," No. 14; Heller, "Die Echten Melodien," p. 227). Without God his soul would wither away; nor is it well with him except he prays (Luzzatto, *l.c.* No. 57; Heller, *l.c.* p. 135). The thought of God allows him no rest; early and late He is his best beloved, and is his dearest concern (Heller, *l.c.* p. 82; "Ṭal Orot," No. 12). He occupies the mind of the poet waking and sleeping; and the thought of Him, the impulse to praise Him, rouse Judah from his couch by night (Luzzatto, *l.c.* No. 81; Heller, *l.c.* p. 229). Although

Judah strives to be free from subjection unto many, he rejoices that he is subject to the One, whose servant he gladly designates himself; for he may win the grace of God throughout eternity. Characterized by "noble grandeur and quiet simplicity," the short poem in Luzzatto, *l.c.* (No. 28) and in Heller, *l.c.* (p. 152) is most effective, and might be entitled "The Higher Peace," after a similar poem by the German poet Heinrich von Kleist. When Judah is ill he hopes to be cured by God's grace rather than by the medicines he himself has prepared (Geiger, *l.c.* p. 117). Even during the voyage, amid storms and surrounded by rough sailors, over whom only the pilot has any authority (Brody, *l.c.* ii., No. 16; Geiger, *l.c.* p. 164), Judah finds peaceful trust in God; and his poems (Brody, *l.c.* ii. 168 *et seq.*), composed on the sea, are among the most beautiful of his religious lyrics. In all situations in life God is the friend to whom his heart turns in the fulness of its longing. If God is with him, all is bright in his "narrow prison," and sorrow's gloom dissolves in gladness.

Patriotism.

Next to God, the poet's people stand nearest to his heart: their sufferings and hopes are his. Like the authors of the Psalms, he gladly sinks his own identity in the wider one of the people of Israel; so that it is not always easy to distinguish the personality of the speaker. No other Jewish poet is so steeped in recollections of the ancient history of Israel when singing of the tokens of God's love to His chosen people. Whenever Judah reflects on his coreligionists, the reproachful question rises, despite his reverence: "Why hast Thou sold us to the oppressors?" (Luzzatto, *l.c.* No. 11). "Shall we be captives forever in a strange land?" (Heller, *l.c.* p. 101; "Ṭal Orot," No. 2). "How long must our anxious hopes drag on?" (Heller, *l.c.* p. 126; Brody, *l.c.* No. 70). "When shall the morn of freedom dawn for Israel?" On earth none can or will answer him; yet while "Edom and Ishmael riot in the Holy City" (Heller, *l.c.* p. 44; "Ṭal Orot," No. 6) and Israel everywhere is in bondage, his prayers shall wring from heaven the redemption of his people. How he prays for "new life," for "refreshment for the weary flower"—Israel! Through temporary resignation and despair (Heller, *l.c.* p. 1; "Ṭal Orot," No. 71) the poet fights his way to confidence and hope; for "the prophet hath foretold all" (*ib.*). He represents Israel calling upon God with tender persuasion to set him free:

> "Come, Belovèd, come thou to me,
> In the bower of lilacs woo me;
> Slay the fiends that would pursue me.
>
> "Harps and chimes and cups all golden
> To the joy of old embolden,
> 'Neath the radiant glory olden."
> (Heller, *l.c.* p. 77; "Ṭal Orot," No. 8.)

God answers, giving to His people new comfort together with new strength for endurance (Heller, *l.c.* p. 77; "Ṭal Orot," No. 8):

> "Bide thou thy time—within thy soul be peace,
> Nor ask complaining when thy pain shall cease;
> Speak, rime, and sing, for victory is thine,
> Nigh thee my tent is pitched, and thou art mine."
> (Zunz, "G. S." i. 131.)

Often Judah's poetic fancy finds joy in the radiant thought of the return of his people (Heller, *l.c.* p. 226; Brody, "Diwan," No. 6). Then his words seem to be the music of the harp (Geiger, *l.c.* p. 145); and he summons Israel, "the dove in a strange land," to jubilant rejoicing over her triumphant return (*ib.*). The period of political agitation about 1130, when Islam (so intensely hated by the poet) was gradually losing ground before the victorious arms of the Christians, gave Judah reason to hope for such a return in the near future. The vision of the night, in which this was revealed to him (Geiger, *l.c.* p. 154), remained indeed but a dream; yet Judah never lost faith in the eventual deliverance of Israel and in the eternity of his people. On this subject he has expressed himself in the poem:

> "Lo! sun and moon, these minister for aye;
> The laws of day and night cease nevermore:
> Given for signs to Jacob's seed that they
> Shall ever be a nation—till these be o'er.
> If with His left hand He should thrust away,
> Lo! with His right hand He shall draw them nigh."
> (Luzzatto, *l.c.* No. 61; transl. by Nina Davis in "Songs of Exile," p. 49.)

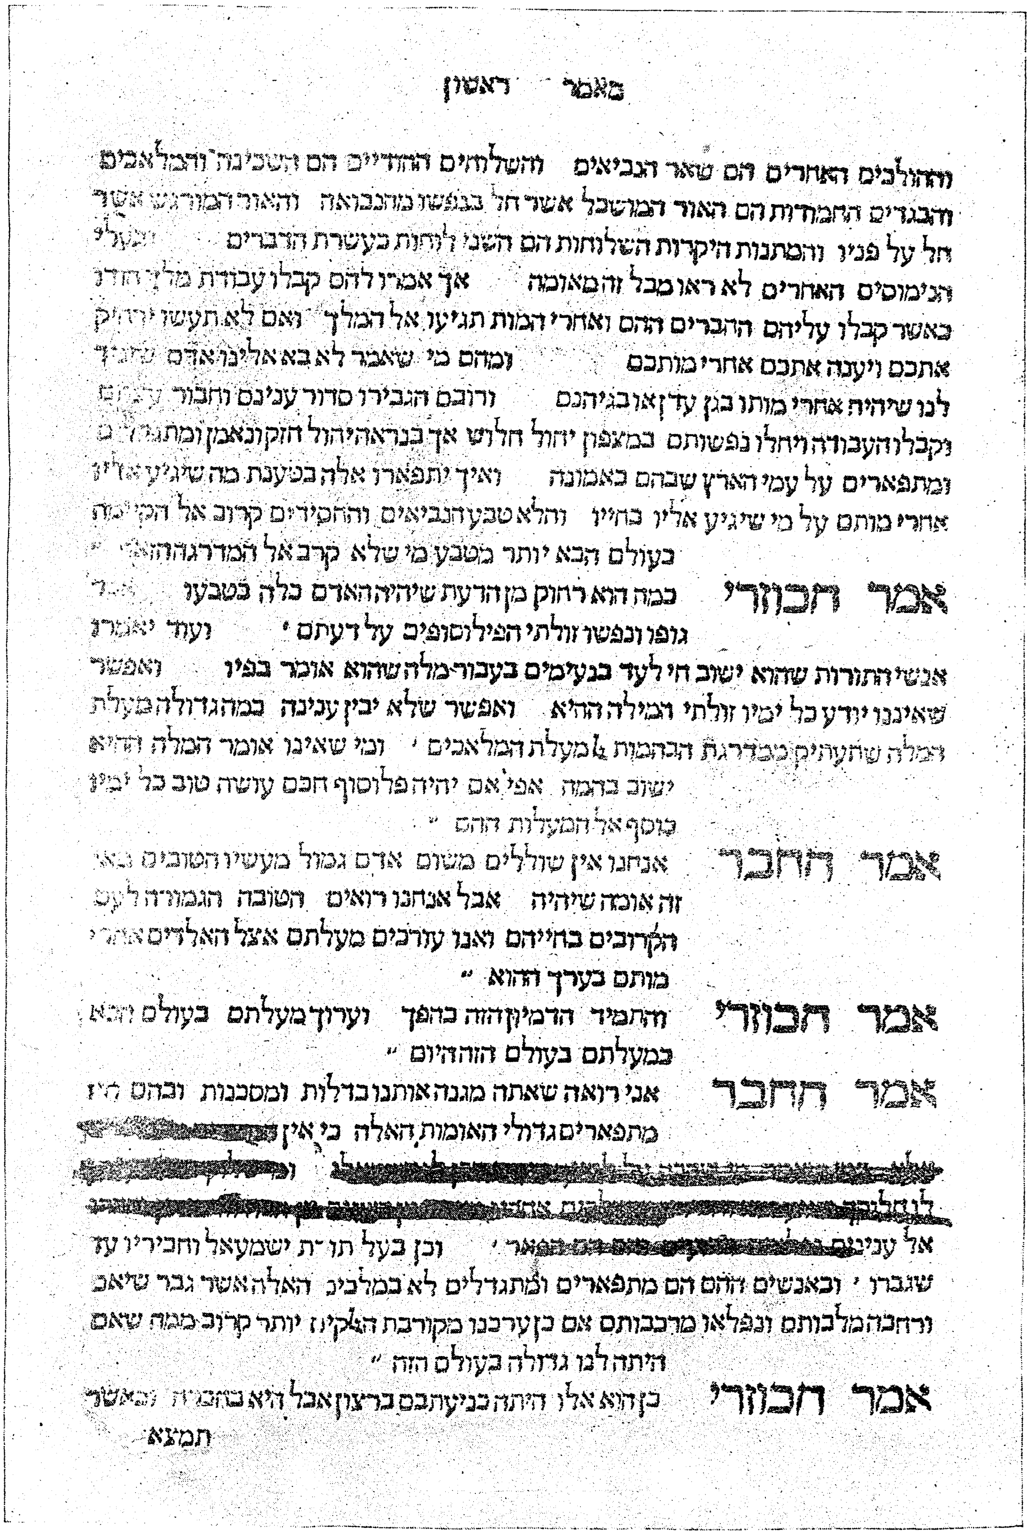
Representative Character of His Poetry.

The remarkable and apparently indissoluble union of religion, nationalism, and patriotism characteristic of post-exilic Judaism reached its acme in Judah ha-Levi and his poetry. Yet this very union in one so consistent as Judah demanded the fulfilment of the supreme politico-religious ideal of medieval Judaism—the return to Jerusalem. Though his impassioned call to his contemporaries to return to Zion might be received with indifference or even with mockery (Luzzatto, *l.c.* No. 86), his own decision to go to Jerusalem never wavered. "Can we hope for any other refuge either in the East or in the West where we may dwell in safety?" he exclaims to one of his opponents (*ib.*). The songs that accompany his pilgrimage (Brody, *l.c.* ii. 153) sound like one great symphony wherein the "Zionides"—the single motive ever varied—voice the deepest soul-life alike of the Jewish people and of each individual Jew. The most celebrated of these "Zionides," with its remarkable monotony, is found in every Jewish liturgy, and is usually repeated in the synagogue on the Ninth of Ab (Brody, *l.c.* ii. 155). It has been translated into German by Herder, Mendelssohn, and many other modern writers; into French by Munk; into Dutch by L. Wagenaar ("Isr. Letterbode," v. 18 *et seq.*); into Italian by Benedetti; into Russian by Harkavy; repeatedly into English; and into other European languages. The following is the English translation by Nina Davis (*l.c.* p. 37) of the opening lines:

> "Zion, wilt thou not ask if peace's wing
> Shadows the captives that ensue thy peace,
> Left lonely from thine ancient shepherding?
>
> "Lo! west and east and north and south—world-wide—
> All those from far and near, without surcease,
> Salute thee: Peace and Peace from every side."

Synagogal Poetry.

The poems of Judah ha-Levi which have been adopted into the liturgy number in all more than 300. Every season, whether of sorrow or of joy, has been enriched by his songs. A summary of them has been given by Zunz (*l.c.* pp. 203 *et seq.*; Appendix, pp. 8-10, 33, 55, and by Landshuth ("'Ammude ha-'Abodah," pp. 70 *et seq.*). The



מאמר ראשון

והמלאכים האחרים הם שאר הנביאים והשלוחים החדשים הם השכינה והכבוד והמלאכים
והנגדים החמדות הם האור המושכל אשר חל בנפשו מהנבואה והאור המורגש אשר
חל על פניו והמתנות היקרות השלוחות הם השני לוחות בעשרת הדברים ושאר
הנימוסים האחרים לא ראו מכל זה מאומה אך אמרו להם קבלו עבודת מלך הזה
כאשר קבלו עליהם העבדים ההם ואחרי המות תגיעו אל המלך ואם לא תעשו ירחיק
אתכם ויענה אתכם אחרי מותכם ומהם מי שאמר לא בא אלינו אדם שהגיד
לנו שיהיה אחרי מותו בגן עדן או בגיהנם ורובם הגבירו סדור עניניהם וחבור [illegible]
וקבלו העבודה ויחלו נפשותם במצפון יחול חלוש אך בנראה יחול חזק נאמן ומתגדלים
ומתפארים על עמי הארץ שבהם באמונה ואיך יתפארו אלה בטענת מה שיגיע אליו
אחרי מותם על מי שיגיע אליו בחייו והלא טבע הנביאים והחסידים קרוב אל הקיימה
בעולם הבא יותר מטבע מי שלא קרב אל המדרגה ההיא

אמר הכוזרי כמה הוא רחוק מן הדעת שיהיה האדם כלה בטבעו ואבד
גופו ונפשו זולתי הפילוסופים על דעתם׃ ועוד יאמרו
אנשי התורות שהוא ישוב חי לעד בעצמים בעבור מלה שהוא אומר בפיו ואפשר
שאיננו יודע כל ימיו זולתי המלה ההיא ואפשר שלא יבין ענינה במה גדולה מעלת
המלה שתעתיק מדרגת הבהמות למעלת המלאכים׃ ומי שאינו אומר המלה ההיא
ישוב בהמה אפילו אם יהיה פלוסוף חכם עושה טוב כל ימיו
מוסף אל המעלות ההם׃

אמר החבר אנחנו אין שוללים משום אדם גמול מעשיו הטובים באי
זה אומה שיהיה אבל אנחנו רואים הטובה הגמורה לעם
הקרובים בחייהם ואנו עורכים מעלתם אצל האלהים אחרי
מותם בערך ההוא׃

אמר הכוזרי והתמיד הדמיון הזה בהפך וערוך מעלתם בעולם הבא
כמעלתם בעולם הזה היום׃

אמר החבר אני רואה שאתה מגנה אותנו בדלות ומסכנות ובהם היו
מתפארים גדולי האומות האלה כי אין [redacted]
אל עניים [redacted] וכן בעל תו״ת ישמעאל וחביריו עד
שגברו׃ ובאנשים ההם הם מתפארים ומתגדלים לא במלכים האלה אשר גבר שיאם
ורחבה מלכותם ונפלאו מרכבותם אם כן ערכנו מקורבת האלהים יותר קרוב ממה שאם
היתה לנו גדולה בעולם הזה׃

אמר הכוזרי כן הוא אלו היתה כניעתכם ברצון אבל היא בהכרח ובאשר
תמצא

CENSORED PAGE FROM THE FIRST EDITION OF JUDAH HA-LEVI'S "CUZARI," FANO, 1506.
(In the possession of George Alexander Kohut, New York.)

longest and most comprehensive poem is a "ḳedushshah," which summons all the universe to praise God with rejoicing, and which terminates, curiously enough, in Ps. ciii. (Sachs, "Die Religiöse Poesie der Juden in Spanien," pp. 304 *et seq.*). These poems were carried to all lands, even as far as India (Zunz, "Ritus," p. 57); and they influenced the rituals of the most distant countries. Even the Karaites incorporated some of them into their prayer-book; so that there is scarcely a synagogue in which Judah's songs are not sung in the course of the service (Zunz, "S. P." p. 231). The following criticism of Judah's synagogal poems is made by Zunz (*ib.*): "As the perfume and beauty of a rose are within it, and do not come from without, so with Judah word and Bible passage, meter and rime, are one with the soul of the poem; as in true works of art, and always in nature, one is never disturbed by anything external, arbitrary, or extraneous."

Judah by his verses has also beautified the religious life of the home. His Sabbath hymns should be mentioned here, one of the most beautiful of which ends with the words:

"On Friday doth my cup o'erflow,
What blissful rest the night shall know,
When, in thine arms, my toil and wo
Are all forgot, Sabbath my love!

"'Tis dusk, with sudden light, distilled
From one sweet face, the world is filled;
The tumult of my heart is stilled—
For thou art come, Sabbath my love!

"Bring fruits and wine and sing a gladsome lay,
Cry, 'Come in peace, O restful Seventh day!'"

(Heller, *l.c.* p. 19; "Ṭal Orot," No. 1; transl. by S. Solis-Cohen.)

"The use of foreign (*i.e.*, Arabic) meters destroys the essence of the Hebrew language, which is based on homophony and results in harmony," is the observation put into the mouth of the rabbi in Judah ha-Levi's "Cuzari" (ii., § 74), together with other original remarks on the Hebrew language (comp. Friedländer in Kohut Memorial Volume, pp. 139 *et seq.*). Nevertheless, Judah himself used the most complicated Arabic meters in his poems with much good taste (for further details see H. Brody, "Studien zu den Dichtungen Jehuda ha-Levi's," Berlin, 1895). A later critic, applying a Talmudic witticism to Judah, has said: "It is hard for the dough when the baker himself calls it bad." Although these forms came to him naturally and without effort, unlike the mechanical versifiers of his time (see "Cuzari," v. 16), he would not except himself from the number of those he had blamed. His pupil Solomon Parḥon, who wrote at Salerno in 1160, relates that Judah repented having used the new metrical methods, and had declared he would not again employ them. That Judah felt them to be out of place, and that he opposed their use at the very time when they were in vogue, plainly shows his desire for a national Jewish art independent in form as well as in matter.

Judah was recognized by his contemporaries as the great Jewish national poet, and in succeeding generations by all the great scholars and writers in Israel (see, *e.g.*, Al-Ḥarizi, "Taḥkemoni," maḳamahs iii., xviii.). His equal in poetic ability, Heinrich Heine, has paid him a tribute of honor in his "Romancero" (see E. A. Bowring, "The Poems of Heine," p. 476, London, 1859).

MSS.

So far as is known, the first to collect the poems of Judah ha-Levi into a diwan was R. Ḥiyya al-Ma'arabi, probably a younger friend of the poet. R. Jeshua bar Elijah ha-Levi used this diwan as the basis for a new and larger collection, a manuscript of which has been found in Tunis. In his interesting Arabic preface (translated into German in Geiger, *l.c.*), Jeshua states that, besides Ḥiyya's collection, he had two others before him, made respectively by David ben Maimon and Abu Sa'id ibn Alkash (?), from which he took some material. Further, he says that he added songs and piyyuṭim which R. Ḥiyya had omitted because in the time of the latter they were generally known and were to be found in every Maḥzor. Jeshua, however, does not imply that all the poems added by him were written by Judah ha-Levi. On the contrary, he lays special emphasis on the need of caution, particularly in cases where there is only an incomplete signature, as "Judah" or "Levi." He divides his diwan of 816 poems into three parts: (1) poems, for the most part secular in tone, having the same meter and rime throughout; (2) strophic poems, mostly religious in character, in which every strophe has a different rime, although the last line of each strophe has the same rime; (3) poems of varied metrical structure, mostly piyyuṭim, and a few letters in rimed prose. Jeshua usually designates in a short superscription the contents and the occasion of the poem. The Bodleian Library contains two manuscript diwans of Judah ha-Levi (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1970, 1, with the title "Mahaneh Yehudah"; a more recent collection, *ib.* No. 1971, corresponds to the Tunis manuscript, but is more complete).

Editions.

The chief published collections of Judah's poems are: (1) "Betulat Bat Yehudah," ed. S. D. Luzzatto, Prague, 1840; (2) "Diwan," also edited by Luzzatto, Lyck (Meḳiẓe Nirdamim), 1864; (3) "Ṭal Orot," by the same editor, published by Eisig Gräber, Przemysl, 1881; (4) "Ginze Oxford," ed. Edelmann and Dukes, London, 1851; (5) "Rabbi Yehudah ha-Levi," by A. Harkavy, Warsaw ("Aḥiasaf"), 1893-95; (6) "Bet ha-Beḥirah," by Samuel Philipp, Lemberg, 1888 (mainly a reprint of Luzzatto's "Diwan"); (7) "Diwan des Abul-Ḥasan Jehuda ha-Levi," a new and complete edition by H. Brody, Berlin (Meḳiẓe Nirdamim), 1894 *et seq.*

Translations.

Some of Judah's poems have been translated into European languages. The most prominent translators are: German: A. Geiger ("Diwan des Castilier's Abu'l-Hassan," etc., Breslau, 1851); Heller ("Die Echten Hebräischen Melodien," ed. D. Kaufmann, Berlin, 1893); Kämpf ("Nichtandalusische Poesie Andalusischer Dichter," Prague, 1858); Sachs ("Die Religiöse Poesie der Juden in Spanien," Berlin, 1845); Steinschneider ("Manna," *ib.* 1847); Sulzbach ("Dichtungen aus Spanien's Besseren Tagen," Frankfort-on-the-Main, 1873); and Zunz ("S. P." Berlin, 1855).

English: M. H. Bresslau (in "Ginze Oxford," London, 1851); Nina Davis ("Songs of Exile," Philadelphia, 1901); Edward G. King (in "J. Q. R." vii. 464); J. Jacobs ("Jewish Ideals," London, 1896); E. Lazarus ("Songs of a Semite," New York, 1882); Alice Lucas (in "The Jewish Year," London, 1898); Lady Magnus ("Jewish Portraits," *ib.* 1897).

French: J. Weill (in "R. E. J." xxxviii., p. lxv.; Italian: S. de Benedetti ("Canzoniere Sacro di Giuda Levita," Pisa, 1871); Russian: S. Frug (in "Voskhod") and A. Harkavy (*ib.*). Other translations occur in the various Maḥzorim renderings.
